Organization Collection Overview

Overview

The Materiel Management/Inventory Control Point (MM/ICP) module Organization Collection process provides the ability to create or update Organization Collection records for accounting transactions.
There are two types of Organization Collections:

- **Generic Collections** — entered and edited by a Financial Manager.
- **Defense Accounting Interface (DAI) Collections** — imported and not editable.

Organization collections, both Generic and DAI, are created during either the creation of ICP, UIC, ICP Managed DoDAAC agencies, and Major Command updates.
