

Search for a Maintenance Attribute Management

Overview

The Maintenance and Utilization module Maintenance Attribute Management Search process provides the ability to add or update maintenance attribute information in the catalog.

Navigation

Catalog > Maintenance Attribute Management > Maintenance Attribute Management Search page

Procedures

Search for a Maintenance Attribute Management

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting  at any point of this procedure returns all fields to the default "All" setting.

1. In the Search Criteria grid, narrow the results by entering one or more of the following optional fields.

The screenshot shows a 'Search Criteria' form with a title bar and a collapse icon. It contains three rows of search fields: 'Stock Number', 'Item Description', and 'FSC' on the left; 'Attribute' and 'Maintenance Program' on the right. Each field has a 'Select an Item' dropdown menu. At the bottom right, there are 'Reset' and 'Search' buttons.

2. Select . The results display in the **Maintenance Attribute Management Search Results** grid.
