

Search for an Equipment Pool — Criteria

Overview

The Maintenance and Utilization module Equipment Pool process provides the ability to add, update and delete Equipment Pools. The Equipment Pool exists to permit the grouping of property with the Point of Contact (POC) information to allow for the management of Dispatches (Issue/Return). A Maintenance Activity (MA) can have multiple Equipment Pools. When new assets are profiled in the Maintenance Asset Master process, the asset becomes available for association with an Equipment Pool. Maintenance personnel may have their access restricted where they can only see specific Equipment Pools. This is accomplished in the User Equipment Pool process in conjunction with the ELMS Roles Request Form.

Helpful Tip

Prior to adding an Equipment Pool, an address can be created to populate the POC information on the Add page. Select Master Data > Address > Address Type > EP - Equipment Pool.

Navigation

Master Data > EQUIP POOL > Equipment Pool Search Criteria page

Procedures

Search for an Equipment Pool

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting  at any point of this procedure returns all fields to the default "All" setting.

1. In the Search Criteria panel, narrow the results by entering one or more of the following optional fields.

The screenshot shows a web form titled "Search Criteria". It contains two input fields: "Equip Pool Id" with a dropdown menu showing "Select an Item", and "Equip Pool Name" with a text input field. At the bottom right of the form are three buttons: "Reset", "Search", and "Add".
