Enterprise Logistics Management System (ELMS) Maintenance and Utilization (M&U) Module

Welcome to the Enterprise Logistics Management System (ELMS) Maintenance and Utilization (M&U) Help System.

ELMS Summary

Welcome to the Enterprise Logistics Management System (ELMS) Help System.
The Enterprise Logistics Management System (ELMS) is a Department of Defense (DoD) property management system.
It is the Accountable Property System of Record (APSR) for over 50 DoD Agencies and Military Services.
The ELMSprogram office is located within DLA Logistics Catalog and Data Solutions (LCDS), a Portfolio of the Information Operations of the Defense Logistics Agency. The ELMSPMO receives sponsorship from the Equipment Office, under the Office of the Assistant Secretary of Defense (OASD) for Sustainment / Logistics.

M&U Summary

The ELMS M&U module is designed to provide a comprehensive solution to big-ticket equipment tracking and upkeep needs.
From this module, the asset has any repair or preservation work planned and ordered, as well as dispatching and returning the asset.
It is designed to manage the paperwork involved with use and care of military assets.

M&U Key Functions

There are several key functions within the Maintenance and Utilization Module:

- **Catalog** —
  - Stock Number
  - Manufacturer Part Nbr
  - Maintenance Attribute Management

- **Maintenance** —
  - Maintenance
    - Maintenance Asset Master
    - Work Order

- Work Plan
- Work Plan Detail
- Work Plan Assoc
- Maintenance Movement
- Inbound Resolution

- Sched Prevent Maint
  - Maint Sched/Work Plans
  - Asset Assignment
- Wrnty/Svc/Subscrip
  - Terms/Conditions
  - Asset Assoc

- **Utilization** —
  - Maint Asset Util
  - Dispatch

- **Requisition** —
  - Requisition
    - Requisition
  - ILS-S
    - Order
    - Inquiry

- **Master Data** —
  - Master Data
    - Points of Contact
    - Equip Pool
    - Cert/License
    - Labor Category
    - Operation/Technician
    - Maintenance Team
    - Contractor
    - Contract
    - Dispatch Category
    - Dispatch Rate
    - Maintenance Program
    - Maint Sched Id Prefix
    - Maintenance Activity
  - Maintenance Readiness Set Up
    - Site Report Setting
    - Site Close Out

- **Accounting** —
  - Job Order Nbr

- **Forms-Reports** —
  - View Reports
  - Schedule Reports

- **Utilities** —
  - Fleet
    - FAST Outbound Dspl
  - File Upload
    - Dispatch Rates
    - GSA Rates
    - GSA Fleet
    - Telematics
    - DLA Fuel
    - Vehicle Diagnostics
    - Driver Behavior

- **Inquiries** —
  - Inquiries
    - Statistics
    - Job Order Nbr
    - View Inquiry Extract
  - Maintenance
    - Asset Prvn Maint Sch
    - Maint Asset
    - Equip Pool

- Dispatch Ctgry
- Labor Category
- Operator/Technician
- Maint Activity

- Catalog
  - Stock Nbr Inquiry
  - Agency Catalog Inquiry
- History
  - Audit Viewer
  - Dispatch Journal
  - Work Order Journal

M&U User

Maintenance and Utilization is role-based, similar to all other ELMSmodules.
User access is based on one or more roles, allowing for "need to know" and "separation of duty" access. In addition, a second level of security has been added through the use of Commodity Types. M&U users can only access equipment within their specified list(s) of assigned Commodity Types.
The security uses C.R.U.D. methodology:

- **Create**
- **Read (Inquiry)**
- **Update**
- **Delete**

Enterprise Logistics Management System (ELMS) M&U Module Navigation

Overview

This page describes the primary features found on the Maintenance and Utilization pages:

- Blue Menu Bar
- Menu Bar
- Instructions
- Help
- Standard Buttons

Additional information about ELMS can be found at the ELMS Support Site.

Navigation

ELMS M&U Module > Any Process Page > 

Blue Menu Bar

The Blue Menu bar is at the very top of the page.
The items on the left side are:

- **ELMS logo**  **—**
  Returns to the home page.

  The item next to that is:

- **Module Name**  **—**
  Shows which module is currently open.

The items on the right side are:

- **Activity Nm—**
  Shows the current users associated site.

- **Open Actions —**
  Shows the amount of work the user has scheduled.

- **User ID —**
  Shows the current users identification name.

Menu Bar

The Menu bar is right above the Process page. While each users Menu Bar contains different items, they all work the same way to open a Process page.

1. Click on a Menu item drop-down list. *The drop-down list of the processes in that Menu item appears.*

2. Select a process from the drop-down list. *The Process page appears.*

Instructions

At the top of each Process page is a Help link.

- Select Help. *The **Instructions** drop-down panel appears.*
- *A basic overview and terms on the page appears.*

Help

On the right side of the Instructions panel is the Help button View DPAS Help.

- Select View DPAS Help. *The **Help System** opens in a separate tab.*
- *The Overview topic for the current Process page appears.*

Search Criteria

Most M&U Processes have a Search Criteria panel. *Use it to narrow the number of records in the Results Grid.*

Use the Search Criteria panel

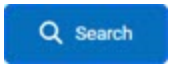

1. Enter the available information in the fields.
2. Use the field assistance available:
   - Use the drop-down to select the field entry.
   - Start entering characters in the fields with .

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

- Use  to open the Browse pop-up window.

3. Select  to perform the search, or select  to clear the fields.

Search Results Grid

Each Process page displays the corresponding data in a Search Results Grid.
Each Search Results Grid has basic properties that are always the same.
Those include:

- **Title Bar —**

Shows the overall Results Grid buttons.

- **Column Header —**

Shows the title of each column, along with the ability to sort and / or filter that column.

- **Individual Records —**

Shows the rows of data in the Results Grid.

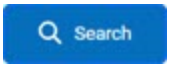

- **Bottom Scroll —**

Standard Buttons

Each M&U process page has some basic buttons that are always the same.
Those include:

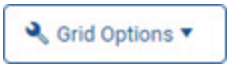

Search Criteria

- **Search**  —
  Searches the data within the process results grid.

- **Reset**  —
  Erases the entered fields and starts over.

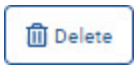

Results Grid

- **Add**  —
  Creates a new record in the process results grid.

- **Grid Options**  —
  Changes the way information appears in the Results Grid. See Grid Options Overview for additional information.

Individual Records

- **Edit**  —
  Revises a record in the process.

- **Delete**  —
  Erases a record in the process.

Enterprise Logistics Management System (ELMS) Maintenance and Utilization (M&U) Module Grid Options

Overview

This page describes the features of the Grid Options within the Search Results Grid in the Maintenance and Utilization module:

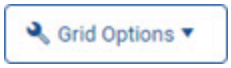

- Clear Filters
- Columns

Navigation

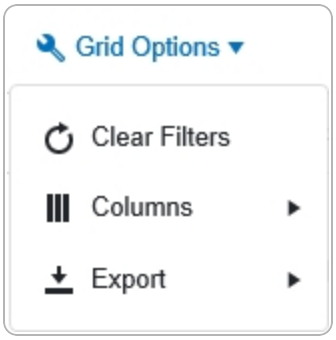

ELMS Maintenance and Utilization (M&U) Module > Any Process Page > Search Results Grid > Title Bar > 

Grid Options

Select 

. The Grid Options drop-down menu appears:

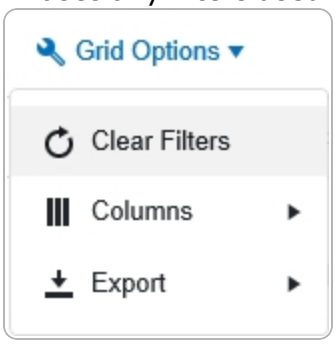

Note

The Export option **only appears** in the Inquiry menu items.

These options change the way information appears in the Results Grid. They include:

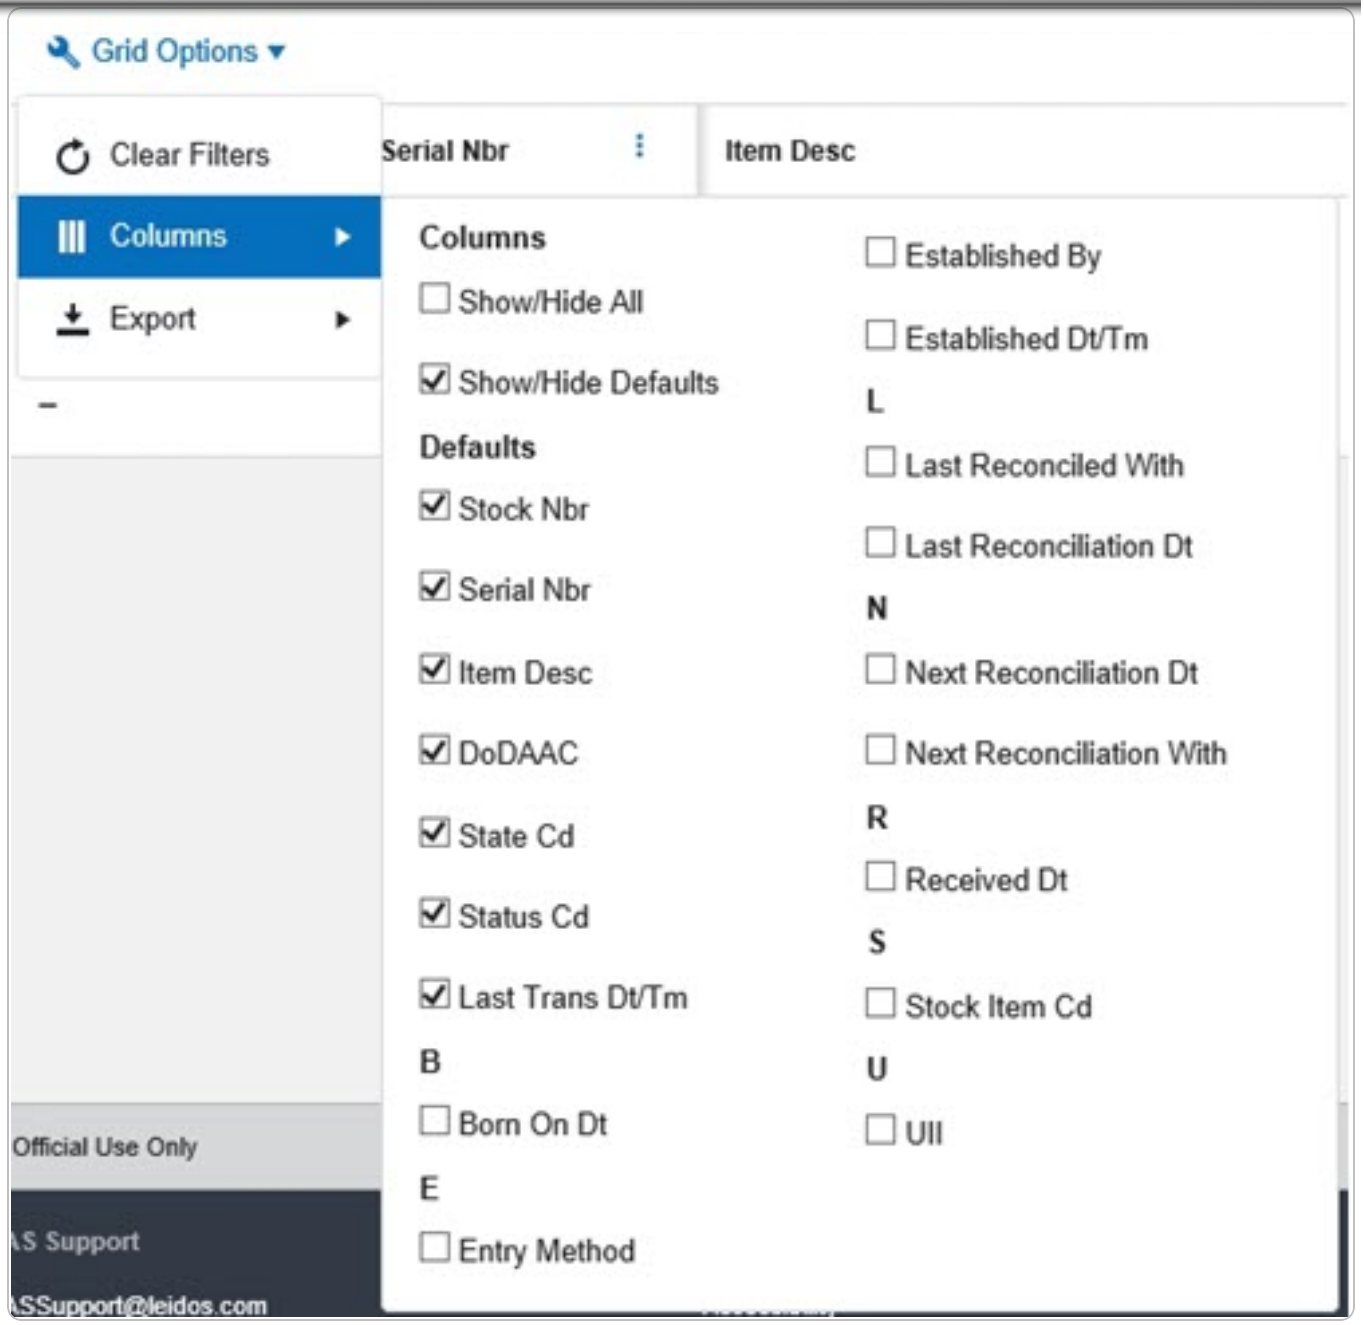

Clear Filters

Erases any filters used within the Results Grid columns.

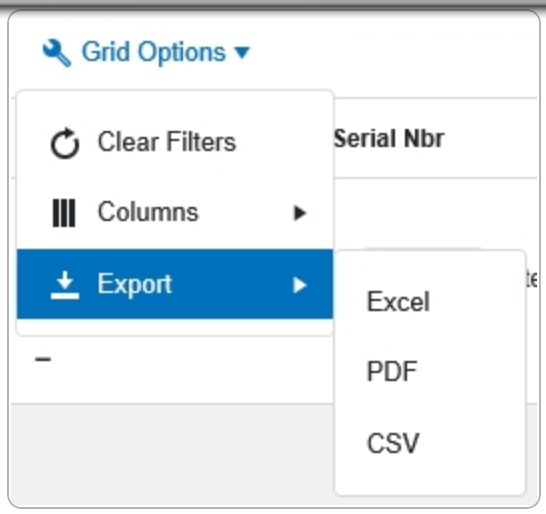

Columns

Changes what columns are viewed in the Results Grid.

Export

Saves the Inquiry Grid in a different format.

The format choices are:

- **Excel** - editable spreadsheet
- **PDF** (Portable Document Format) - non-editable document
- **CSV** (Comma Separated Values) - editable text

Search for a Stock Number

Overview

The Maintenance and Utilization module Stock Number Search process provides the ability to add, update, or delete a stock number record in the catalog.
Each Stock Number is unique to a specific catalog within each logistics program and can only be added once per catalog.
There are five types of stock numbers identified by the STOCK ITEM CD:

- **A - NSN** (National Stock Number)
  — from FEDLOG or TDMS or other DOD lists.
- **J - MCN** (Management Control Number)
  — created at the local level, when an NSN does not exist for that asset.
- **B - PART NBR** (Part Number)
  — created by either the manufacturer or the local level.
- **I - Intangible** (Intangible)
  — created for Software and other stock that has no physical presence.
- **L - Local** (Local)
  — created at the local level.

ELMS interfaces with the DOD Federal Logistics Information Services (FLIS), and can interface with Enterprise Agency Catalogs (e.g., the United States Marine Corps Technical Data Management System - USMC TDMS). The FLIS allows ELMS to access NSN data in the Federal Logistics Data (FEDLOG). The TDMS allows ELMS to access NSN data in the Marine Corps standard catalog information.
The Line Item Number (LIN) / Table of Authorized Materiel Control Numbers (TAMCN) plays a key role in managing equipment. The LIN/TAMCN can be thought of as a Group ID. Stock numbers are grouped under one LIN/TAMCN. For example, when the Warehouse receives a LIN/TAMCN for equipment of various sizes, a Stock Number is assigned for each size.

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Navigation

Catalog > Stock Number > STOCK NBR Search page

Page Fields

The following fields display on the **STOCK NBR Search** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
525	Select "Search" to refresh the STOCK NBR Search Results page.
526	Select "Reset" to clear the STOCK NBR Search Criteria.
527	Select "Grid Options" for additional actions to perform on the STOCK NBR data.
528	Select "Add" to create a new STOCK NBR record.
529	Select "Edit" to update the selected STOCK NBR record(s).
530	Select "Delete" to remove the selected STOCK NBR record(s).
531	Select "Attachments" to add or view an attached document to the selected STOCK NBR record(s).
132	To search for CAGE CD, see https://cage.dla.mil.

161	NCAGE CD must = 5 POS. When POS 1 = 0-9, POS 5 must = alpha but not I, O, or X. When POS 1 = A, POS 5 must = alpha-numeric but not I, L, O, Q, or V thru Z. When POS 1 = alpha, but not alpha O, POS 5 must = 0-9.
162	CAGE CD must = 5 POS, 1st and 5th must = numeric, remaining POS must = alphanumeric except I and O.

Procedures

ELMS Navigation Helpful Tips

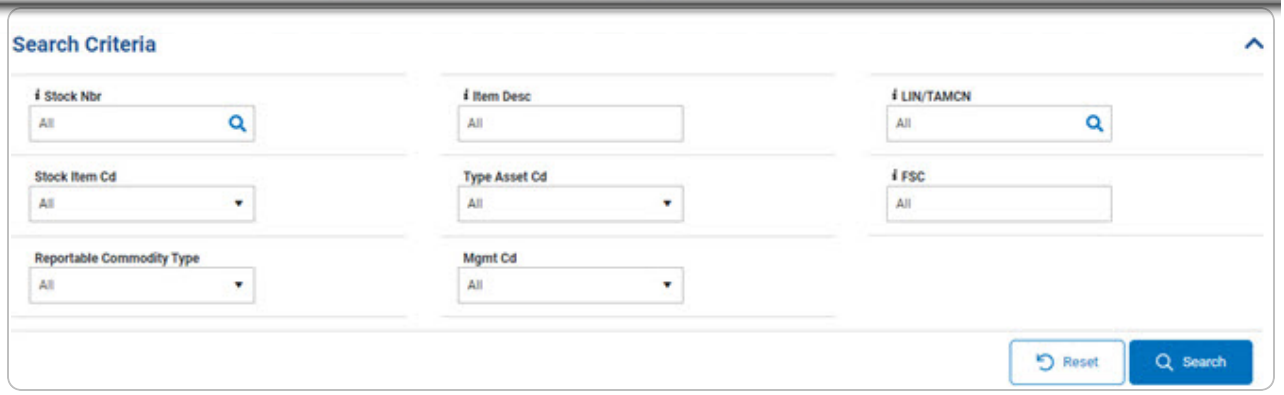

Click the following link to display M&U Navigation Tips.

Search for a Stock Number

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting  *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria grid, narrow the results by entering one or more of the following optional fields:.

- Use or to assist with the STOCK NBR entry. *This is a 15 alphanumeric character field.*

  Stock Number Browse help

- Use to select the Stock Item Cd.
- Use to select the Reportable Commodity Type.
- Enter the ITEM DESC, using to assist with the entry. *This is a 256 alphanumeric character field.*
- Use to select the Type Asset Cd.
- Use to select the Mgmt Cd.
- Use or to assist with the LIN/TAMCN entry. *This is a 10 alphanumeric character field.*

  Line Item Number / Table of Authorized Materiel Control Number Browse help

- Enter the FSC, using to assist with the entry. *This is a 4 alphanumeric character field.*

2. Select Search. *The results display in the **Stock Number Search Results** grid.*

Add a Stock Number

Select + Add. *The **New Stock Nbr** page appears.*

View the Manufacturer Part Nbr Details

Select the Stock Nbr hyperlink. *The **Manufacturer Part Nbr Details** pop-up window appears.*

Update a Stock Number

1. Click ☐ to select the entry. *The Stock Nbr is highlighted, and* Edit, Delete, Attachments, *and* Realign *become available.*
2. Select Edit. *The **Modify Stock Nbr** page appears.*

Delete a Stock Number

1. Click ☐ to select the entry. *The Stock Nbr is highlighted, and* Edit, Delete, Attachments, *and* Realign *become available.*
2. Select Delete. *The **Confirm Delete** pop-up window appears.*

Attach a Document to a Stock Number

1. Click ☐ to select the entry. *The Stock Nbr is highlighted, and* Edit, Delete, Attachments, *and* Realign *become available.*
2. Select Attachments. *The **Stock Nbr Attachments** pop-up window appears.*

Realign a Stock Number

1. Click ☐ to select the entry. *The STOCK NBR is highlighted, and* Edit, Delete, Attachments, *and* Realign *become available.*
2. Select Realign. *The* ***External Catalog Realignment*** *pop-up window appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.

Add a Stock Number

Overview

The Stock Number Add process provides the ability to create a new stock number in the catalog.

Helpful Tip

Each Stock Number is unique to a specific catalog within each logistics program. A Stock Number can only be cataloged one time for each Site Catalog Name.

There are two tabs on the page to create a new stock number record. The tabs are:

1. **ELMS**
   — application specific information, which includes:
   - **Catalog Source**
     — where the number assigned comes from within the Federal government
   - **General**
     — additional details regarding the asset
   - **Phrase Codes**
     —appears for FLIS stock numbers
   - **Add / Edit Remarks**
     — text fields for additional information regarding the asset
2. **Property Book**
   — location specific information, which includes:
   - **Property Book**
     — location details for the asset

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Navigation

Catalog > Stock Number > Stock Number Search > + Add > New STOCK NBR page

Page Fields

The following fields display on the **New Stock Nbr** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
525	Select "Search" to refresh the Stock Nbr Search Results page.
526	Select "Reset" to clear the Stock Nbr Search Criteria.
527	Select "Grid Options" for additional actions to perform on the Stock Nbr data.
528	Select "Add" to create a new Stock Nbr record.
529	Select "Edit" to update the selected Stock Nbr record(s).
530	Select "Delete" to remove the selected Stock Nbr record(s).
531	Select "Attachments" to add or view an attached document to the selected Stock Nbr record(s).
132	To search for CAGE Cd, see https://cage.dla.mil.
161	NCAGE Cd must = 5 pos. When pos 1 = 0-9, pos 5 must = alpha but not I, O, or X. When pos 1 = A, pos 5 must = alpha-

	numeric but not I, L, O, Q, or V thru Z. When POS 1 = alpha, but not alpha O, POS 5 must = 0-9.
162	CAGE CD must = 5 POS, 1st and 5th must = numeric, remaining POS must = alphanumeric except I and O.

Update a Stock Number

Overview

The Stock Number Update process allows editing a stock number in the catalog.

Attention

FEDLOG generated data is not editable during the Update process.

There are two tabs on the page to update a stock number record. The tabs are:

1. **ELMS**
   — application specific information, which includes:
   - **Catalog Source**
     — where the number assigned comes from within the Federal government
   - **General**
     — additional details regarding the asset
   - **Add / Edit Remarks**
     — text fields for additional information regarding the asset
2. **Property Book**
   — location specific information, which includes:
   - **Property Book**
     — location details for the asset

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Navigation

Catalog > Stock Number > Search Criteria > Search > Search Results > (desired record) > Edit > Modify STOCK NBR page

Page Fields

The following fields display on the **Modify Stock Nbr** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
525	Select "Search" to refresh the Stock Nbr Search Results page.
526	Select "Reset" to clear the Stock Nbr Search Criteria.
527	Select "Grid Options" for additional actions to perform on the Stock Nbr data.
528	Select "Add" to create a new Stock Nbr record.
529	Select "Edit" to update the selected Stock Nbr record(s).
530	Select "Delete" to remove the selected Stock Nbr record(s).
531	Select "Attachments" to add or view an attached document to the selected Stock Nbr record(s).
132	To search for CAGE Cd, see https://cage.dla.mil.
161	NCAGE Cd must = 5 pos. When pos 1 = 0-9, pos 5 must = alpha but not I, O, or X. When pos 1 = A, pos 5 must = alpha-

	numeric but not I, L, O, Q, or V thru Z. When POS 1 = alpha, but not alpha O, POS 5 must = 0-9.
162	CAGE CD must = 5 POS, 1st and 5th must = numeric, remaining POS must = alphanumeric except I and O.

Search For a Manufacturer Part Nbr

Overview

The Catalog - Manufacturer Part Nbr Search process provides the ability to add, update, or delete a manufacturer of a Stock Number and initiates the creation of a Stock Number. Information for adding a Stock Number is mandatory before an asset can be added. In the ELMSCatalog, the Manufacturer data provides a central reference to the Commercial and Government Entity (CAGE), Manufacturer Name, Manufacturer Model Number, and Manufacturer Part Number. This information is added to each Stock Number in the ELMSCatalog. For this process, the Stock Number must exist on the local ELMSCatalog.
Adding a Stock Number to the ELMSCatalog must use the Manufacturer Add process to assign manufacturer information to that specific Stock Number. Multiple manufacturers can be assigned to a Stock Number. Doing this allows the use of fewer Stock Numbers and provides the visibility of the Manufacturer, Make and Model of every asset.
For example, an Agency that uses *3/8" drills* would assign multiple manufacturers to the *3/8" drill* Stock Number.

Search For a Manufacturer Part Nbr

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting  *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search grid, narrow the results by entering one or more of the following optional fields:.

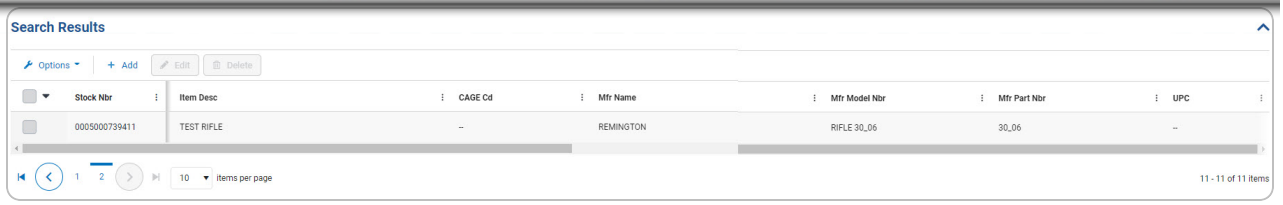

- Enter the STOCK NBR, or use to browse for the entry.

  Internal Stock Number Browse help
- Enter the MFR NAME in the field provided. *This is a 36 alphanumeric character field.*
- Enter the MFR PART NBR in the field provided. *This is a 35 alphanumeric character field. When the Stock Item Type CD is B - Part Nbr, the alphanumeric character field length changes to 32.*
- Enter the MFR MODEL NBR in the field provided. *This is a 48 alphanumeric character field.*
- Enter the UPC in the field provided. *This is a 12 alphanumeric character field.*
- Enter the ITEM DESC in the field provided. *This is a 256 alphanumeric character field.*
- Enter the CAGE CD in the field provided. *This is a 5 alphanumeric character field.*
- Use to select the FAST Reportable.

  Note

  The drop-down filters the Manufacturer Name field, so only FAST manufacturers appear in the search results.
- Use to select the Non Accountable.

2. Click Search. *The results display in the **MANUFACTURER PART NBR Search Results** grid.*

Add a Manufacturer Part Nbr

1. Select + Add. *The **Add Manufacturer Part Nbr** slide-out window appears.*

Update a Manufacturer Part Nbr

1. Click ☐ to select the entry. *The Manufacturer Part NBR is highlighted, and* Edit *and* Delete *become available.*
2. Select Edit next to the desired entry to modify the record. *The **Edit Manufacturer Part Nbr** slide-out window appears.*

Delete a Manufacturer Part Nbr

1. Click ☐ to select the entry. *The Manufacturer Part NBR is highlighted, and* Edit *and* Delete *become available.*
2. Select Delete next to the desired entry to remove the record. *The **Delete Manufacturer Part Nbr** pop-up window appears.*

Add a Manufacturer Part Nbr

Overview

The Manufacturer Part Nbr Add process provides the ability to create new manufacturer's information for a Stock Number within the ELMS Catalog. A single Stock Number may have more than one manufacturer's information associated with it. Before adding a manufacturer, it is a good practice to perform a search (see **Manufacturer Part Nbr Record Search**) for the Stock Number to verify manufacturer information has not already been entered.

Navigation

Catalog > Manufacturer > Search Criteria > *Various Procedural Steps* > + Add > Manufacturer Part Nbr Add slide-out window

Page Fields

The following fields display on the **Manufacturer Part Nbr Add** slide-out window. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
562	Select "Cancel" to return to the previous page.
563	Select "Save" button to save the current selection.
132	To search for CAGE Cd, see https://cage.dla.mil.
162	CAGE Cd must = 5 pos, 1st and 5th must = numeric, remaining

	POS must = alphanumeric except I and O.
161	NCAGE CD must = 5 POS. When POS 1 = 0-9, POS 5 must = alpha but not I, O, or X. When POS 1 = A, POS 5 must = alpha-numeric but not I, L, O, Q, or V thru Z. When POS 1 = alpha, but not alpha O, POS 5 must = 0-9.

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
13 — Mandatory Entry: *MFR NAME*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *STOCK NBR*.	
181— MFR NAME already exists.	Invalid Entry. First Search for the MFR NAME. If it is not found, enter the MFR NAME again.
273 — STOCK NBR is mandatory for an add.	Missing Entry. The STOCK NBR must be entered. The STOCK NBR field is a 15 character alpha-numeric field.
204 — Invalid CAGE/ NCAGE CD. Refer to Instruction Text.	Invalid Characters or Format Entered in the CAGE / NCAGE CD field. For the CAGE CD, enter a total of 5 characters. The **1st** and **5th** must be **numeric**, and the remaining characters may be any mixture of alphanumeric characters, but not "I"; "O"; or special characters. For the NCAGE CD, enter a total of 5 characters. The **1st** character is **alphanumeric**. When the ***1st character is numeric***, the ***5th character must be alphabetic*** (but not "I"; "O"; or "X"). When the *1st character is alphabetic* (but not

	"O"), the *5th character must be numeric*. When the 1st character is "A", then the 5th character is alphanumeric (but not "I"; "L"; "O"; "Q"; or "V"; "W"; "X"; "Y"; "Z")
2192 — When MFR NAME is entered, MFR PART NBR, MFR MODEL NBR, or UPC are required.	Invalid Entry. The MFR PART NBR, MFR MODEL NBR, or UPC is needed when the MFR NAME is entered. Re—enter the fields.
2195 — Record already exists for STOCK NBR, MFR NAME, MFR MODEL NBR, CAGE CD, and MFR PART NBR combination.	Invalid Entry. The entry combination already exists. Re—enter a new combination.
xxxx — Entered value is invalid for Stock Nbr.	Invalid Entry. The entered value does not meet the required format for Stock Nbr. The Stock Number must be 15 alphanumeric characters. Re—enter the Stock Nbr.
xxxx — When Mfr Name is entered, Mfr Part Nbr or Mfr Model Nbr are required.	Invalid Entry. The MFR PART NBR or MFR MODEL NBR is needed when the MFR NAME is entered. Re—enter the fields.
161 — Remarks must be alphanumeric with supported special character(s) $, — , /, #, &, comma, period, and space.	Invalid Characters Entered in the Remarks field. Enter alphanumeric characters, or the following permitted special characters: $, —, /, #, &, comma, period, and space. Special characters like ! or @ are prohibited.

xxxx — MFR NAME must be alphanumeric with supported special character(s) -, /, &, ', and space, and max length of 36.	Invalid Entry. The MFR NAME contains invalid special characters. Re—enter the Mfr Name.
xxxx — When CAGE Cd is entered, Manufacturer Part Number is required.	Invalid Entry. The MFR PART NBR must be entered when the CAGE Cd is entered. Re—try the entry.
2193 — UPC must be numeric.	Invalid Entry. The UPC must only include numbers. Re-enter the UPC.
2194 — UPC must be either 6 or 12 digits long.	Invalid Entry. Incorrect UPC digit length. Re-enter the UPC.
2061 — Invalid entry: *UNIVERSAL PRODUCT CODE*.	Invalid Entry. The UPC entered in the field does not pass the validation rules. Re—enter the UPC.
185 — Record already exists.	Invalid Entry. The field entered is already in the system. Check the information again, and re—enter the record.
xxxx — When License Managed is checked, Software Name is required.	Invalid Entry. The Software Name is mandatory when License Managed is selected. Re—try the entry.

Search for Maintenance Asset Master

Overview

The Maintenance and Utilization module Maintenance Asset Master (MAM) process provides the ability to profile assets. Profiling an M&U asset adds descriptive information in regards to the usage, location, equipment needed, certification and licensing, fuel type, as well as other important information.
For more information, view the FAST Reporting.

Helpful Tip

Assets for profiling can also be accessed from the **ELMS MAINT AND UTIL Home** page. Select the Asset expansion link located in the Message of the Day section to view the various asset profile hyperlinks.

Search for a MAINT ASSET MASTER

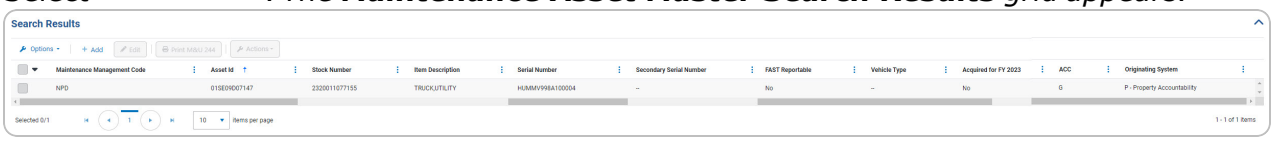

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, narrow the results using one or more of the following optional fields:.

- Enter the ASSET ID in the field provided. *This is a 12 alphanumeric character field.*
- Use ▼ to select the Maintenance Management Code.
- Use ▼ to select the Equipment Pool.
- Enter the Stock Number in the field provided. *This is a 15 alphanumeric character field.*
- Enter the Serial Number in the field provided. *This is a 30 alphanumeric character field.*
- Select ◉ FAST Reportable if the entry is FAST Reportable. *Select the appropriate status to determine whether the search results include FAST Reportable entries. The default is set to All.*

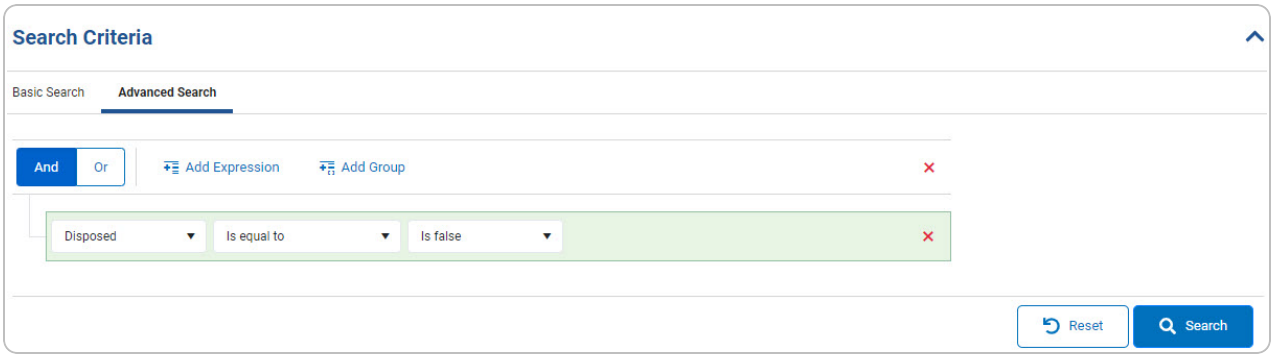

Select Search. *The **Maintenance Asset Master Search Results** grid appears.*

2.

OR

Select the Advanced Search tab.

A. Select And Or. *Selecting the And button includes all rows of criteria in the search results grid. Selecting the Or button includes specified criteria of the selected expressions/groups in the search results grid.*

B. Use ▾ to change the criteria. *The data included is based on the Basic Search entry. Select ▾ to change the advanced search criteria.*

C. Use ▾ to change the Is equal to criteria. *Is equal to is the default option. Select ▾ to change to the Is not equal to option.*

D. Use ▾ to change the Is false criteria. *Is false is the default option. Select ▾ to change to the Is true option.*

E. Select Add Expression. *Adds another expression row to the search criteria grid.*

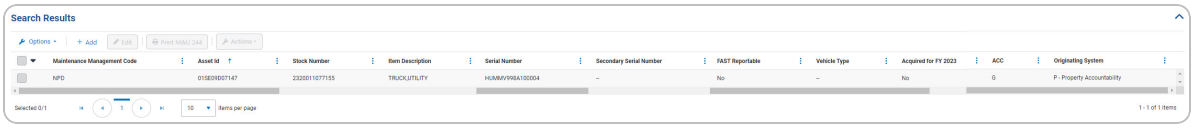

F. Select Add Group. *Adds another group row to the search criteria grid.*

G. Repeat Steps A - F as needed.

Delete a Row

a. Select . *The row is removed from the search criteria grid.*

H. Select Search. *The **Maintenance Asset Master Search Results** grid appears.*

Add a Maint Asset Master

Select + Add or + Add. *The **Maintenance Asset Master — Add** page appears.*

Update a Maint Asset Master

1. Click to select the entry. *The Maint Asset Master is highlighted, and* Edit, Print M&U 244, *and* Actions *becomes available.*

Note

Edit, Print M&U 244, and Actions become available based on the selected maintenance asset record. All options are not available for every record.

2. Select Edit. *The **Maint Asset Master — Edit** page appears.*

Transfer a Maint Asset Master

1. Click to select the entry. *The Maint Asset Master is highlighted, and* Edit, Print M&U 244, *and* Actions *becomes available.*

Note

Edit, Print M&U 244, and Actions become available based on the selected maintenance asset record. All options are not available for every record.

2. Select Actions. *The drop-down grid appears.*
3. Select Transfer. *The **Maintenance Asset Master — Transfer** slide-out window appears.*

Print an M&U 244

1. Click to select the entry. *The MAINT ASSET MASTER is highlighted, and* Edit, Print M&U 244, *and* Actions *becomes available.*

Note

Edit, Print M&U 244, and Actions become available based on the selected maintenance asset record. All options are not available for every record.

2. Select Print M&U 244. *The procedure leaves the application based on the selection made.*
3. *Follow the prompts provided by the computer.*

Delete a MAINT ASSET MASTER

1. Click to select the entry. *The MAINT ASSET MASTER is highlighted, and* Edit, Print M&U 244, *and* Actions *becomes available.*

Note

Edit, Print M&U 244, and Actions become available based on the selected maintenance asset record. All options are not available for every record.

2. Select Actions. *The drop-down grid appears.*

3. Select Disposal. *The **Maintenance Asset Master — Delete** pop-up window appears.*

Reverse a Maintenance Asset Master Disposal

1. Click to select the entry. *The MAINT ASSET MASTER is highlighted, and* Edit, Print M&U 244, *and* Actions *becomes available.*

> **Note**
> Edit, Print M&U 244, and Actions become available based on the selected maintenance asset record. All options are not available for every record.

2. Select Actions. *The drop-down grid appears.*

> **Note**
> The Reverse Disposal option becomes available after a maintenance asset record is disposed.

3. Select Reverse Disposal. *The **Maintenance Asset Master — Reverse Disposal** pop-up window appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security

have the appropriate security access.	access. Enter different Search Criteria and try the Search again.
350 — Must be alphanumeric with supported special characters $, — , /, #, &, comma, period, and space.	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alphanumeric (alphabetic "A" through "Z", numeric "0" through "9") characters, or the following permitted special characters: $, —, /, #, &, ;, comma, period, and space. Special characters like ! or @ are prohibited.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date.
768 — Entry must be alphanumeric with supported special character(s) " — " and "_".	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alphanumeric (alphabetic "A" through "Z", numeric "0" through "9") characters, or a — or a _. Special characters like ! or @ are prohibited.
238 — Date (To) must be > Date (From).	Invalid Date Entry. The NEXT INSPC DT FROM field must be before or the same as the NEXT INSPC DT TO field. Re-enter the date.
2 — Invalid entry.	Invalid Entry. The mentioned field's entry has the incorrect format. Remove the invalid entry and re—attempt, using the correct format.
195 — SERIAL NBR contains invalid special characters.	Invalid Entry. The field must have alphanumeric (alphabetic "A" through "Z", numeric "0"

	through "9") characters only. Re-enter the Serial Number.
765 — No record(s) selected. Select "Cancel" button to return to Search Criteria.	Invalid Entry. There are no selected records in the grid. Select at least one record to proceed.
xxxx — Selection of multiple rows requires the same Owning System.	Invalid Entry. If more than one row is selected, they must all have the same Owning System. Select Deselect All, and re-select the rows.
xxxx — Selection of multiple rows cannot have one or more assets selected that is mandatory for being FAST RPBL, and one or more assets selected that cannot be FAST RPBL.	Invalid Entry. If more than one row is selected, they must all have the same FAST RPBL status. There cannot be some that are mandatory, and some that are not mandatory. Select Deselect All, and re-select the rows.
714 — Selected rows exceed 50 row maximum.	Invalid Entry. Too many records are selected to proceed. Deselect enough records so that 50 or less are selected to proceed.

Update a MAINT ASSET MASTER — Mass Edit

Attention

Having multiple assets selected for updating limits the available fields for editing. Profiling an asset into the M&U module presents many empty fields. The Mass Edit screens appears when the selected assets are from the same originating system.

1. Select Edit. *The* ***Maintenance Asset Master — Mass Edit*** *page appears.*

A. *Verify the Asset Summary grid.*

   a. *Verify the ASSET ID.*

   b. *Verify the Errors.*

c. *Verify the Originating System.*

d. *Verify the Stock Number.*

e. *Verify the Item Description.*

f. *Verify the FAST Reportable.*

B. *Update the Asset Details panel.*

a. Update the Maintenance Management Code, using ▼ to select the desired code.

> **Note**
> Additional fields become mandatory based on the selected Maintenance Management Code.

b. *Verify the Initial Profiled Date.*

c. Update the Equipment Pool, using ▼ to select the desired information.

d. Select ✎ to update the Maintenance Location. *The field becomes editable. This is a 20 alphanumeric character field.*

e. Update the Dispatch Code, using ▼ to select the desired code.

f. Update the Dispatch Category, using ▼ to select the desired category. *When selected, the Subcategory field becomes available.*

g. Update the Subcategory, using ▼ to select the desired category.

h. Update the Dispatch Unavailable Code, using ▼ to select the desired code.

i. Select ✎ to update the Number of Passengers. *The field becomes editable and ▲▼ becomes available to choose the revised number.*

> **Note**
> Select ↺ to reset the field to the default.

j. Select ✎ to update the Number of Bags. *The field becomes editable and ▲▼ becomes available to choose the revised number.*

k. Update the Utilization Measure Code, using to select the desired code.

l. Update the Utilization Target Monthly, using to choose the revised target.

m. Update the Waiver Code, using to select the desired code.

n. Update the Fuel Association, entering the revised fuel code(s) in the field provided. *This is a 2 alphanumeric character field.*

Note

Repeat the process to add additional fuel associations. Selecting removes a fuel association.

o. Update the Default Fuel Type Code, using to select the desired code.

C. *Update the Certificates/Licenses panel.*

a. Update the Certificates/Licenses, using to select the desired information.

Note

The following key applies to Certificates/Licenses:

★	Indicates a certificate or license applied to all selected assets
★	Indicates a certificate or license applied to only some selected assets

D. *Update the Vehicle Characteristics panel.*

Note

The Vehicle Characteristics panel appears when the FAST Reportable = Yes.

a. Update the Vehicle Type Code, using to select the desired code.

b. Update the Vehicle Group Code, using to select the desired code.

c. Select to update the GVWR. *The field becomes editable and becomes available to choose the revised amount.*

Note

Select to reset the field to the default.

d. Update the Fuel Configuration Code, using to select the desired code.

e. Update the EISA Acquisition Code, using to select the desired code.

f. Update the Executive Vehicle Code, using to select the desired code.

g. Update the Vehicle Assign Type Code, using to select the desired code.

h. Update the Vehicle Armor, using to select the desired code.

i. Update the Emergency Response Vehicle, using to select the desired designation.

j. Update the Law Enforcement Vehicle, using to select the desired designation.

k. Update the EPAct 2005 Designation Code, using to select the desired code.

l. Update the EPAct Coverage Code, using to select the desired code.

m. Update the FAST Location Withheld, using to select the desired code.

n. *Verify the EO 13693 Design.*

o. Update the FAST Disposition Reason, using to select the desired code.

E. Select Save. *The **Search For a Maintenance Asset Master** page appears with* Assets Save Succeeded.

Add a Work Order

Overview

The Work Order Add process provides the ability to create new Work Orders and SUB WORK ORDERS.
Work Orders are created by manually entering all of the information, or by basing it on a previous Work Order. This enables importing of existing Labor, Task(s), Part(s), Tool(s) and Certification(s).

Navigation

Search for a Work Plan — Criteria

Overview

The Maintenance and Utilization module Work Plan process provides the ability to define the high level tasks being performed by the Work Order generated at the asset level to track the progress of the actual work being performed.
Each high level task has the following characteristics:

- Estimated Hours (to complete task)
- Estimated Labor and Non-Labor Costs

Work Plans are created as either Public or Private.

- A Public Work Plan is available to all ELMS Maintenance personnel to use, reducing the time to develop new plans.
- A Private Work Plan is only available to the Maintenance personnel within their Maintenance Activity.

Navigation

Maintenance > Work Plan > Work Plan Search Criteria page

Page Fields

The following fields display on the **Work Plan Search Criteria** page. For more information on each field, select the appropriate hyperlink.

Instructions

d. Click Open. *The* ***Choose File to Upload*** *pop-up window closes, and the file name appears in the File Path field.*

e. Update the DESC, entering the correct information in the field provided. *This is a 250 alphanumeric character field.*

f. Click ☐ to select the Primary. *Check if the attachment is the main file for the work plan.*

g. Select Add. *The file appears below in the Temporary Attachments grid.*

Note

If the file should not be a part of the work plan, select the Remove hyperlink to delete the attachment.

h. Repeat Steps b - g for multiple attachments.

i. Select Attach. *The **Update the Work Plan** page appears.*

Note

To view the attachment, click the thumbnail. A second window opens, showing the attachment.

N. Update the Remarks, entering the revised remarks in the field provided. *This is a 256 alphanumeric field*.

O. Update the History Remarks, entering the revised remarks in the field provided. *This is a 256 alphanumeric field*.

2. Select Update. *The **View the Work Plan Transaction Status** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
13 — Mandatory Entry: *PLAN ID*.	Missing Entry. Enter the appropriate information in the desired field.

13 — Mandatory Entry: *PLAN TYPE CD*.	
13 — Mandatory Entry: *Plan Name*.	
13 — Mandatory Entry: *PLAN DESC*.	
676 — Entry must be alpha-numeric.	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alphanumeric (alphabetic "A" through "Z", numeric "0" through "9") characters.
350 — Must be alpha-numeric with supported special characters $, — , /, #, &, comma, period, and space.	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alphanumeric (alphabetic "A" through "Z", numeric "0" through "9") characters, or the following permitted special characters: $, —, /, #, &, ;, comma, period, and space. Special characters like ! or @ are prohibited.
92 — Entry must be numeric.	Invalid Entry. The characters entered in the field include letters. Enter numeric ("0" through "9") characters.
185 — Record already exists.	Invalid Entry. The field entered is already in the system. Check the information again, and re—enter the record.

346 — "Add Attachment" supports only JPG, JPEG, GIF, and PDF files.	Invalid Entry. Only JPG, JPEG, GIF, and PDF files are supported, and no other file types are attachable. Attach a correctly formatted file.
572 — EST Hours must be entered in quarter hour increments (.25, .50, .75).	Invalid Entry. The EST Hours contains a decimal value that is not in quarter hours (i.e. .00,.25, .50, .75). Re-enter the hours.

Delete a Work Plan

Overview

The Work Plan Delete process allows removal of a Work Plan.

Note

The overall Work Plan can be restored, if necessary. To restore, perform the **Add a Work Plan** process, using the same name as the deleted Work Plan. However, if the plan had any associated items (Tasks, Parts, TOOL(S)/EQUIP, Certifications), those **cannot** be restored.

Navigation

Maintenance > Work Plan > Search Criteria > Search > Search Results > Delete hyperlink > Work Plan Delete page

Page Fields

The following fields display on the **Work Plan Delete** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
340	Work Plan cannot be deleted if it is associated with an active MAINT SCHEDULE.

Search for a Work Plan Detail — Criteria

Overview

The Maintenance and Utilization module Work Plan Detail process is to provide the ability to identify the specific Task(s), Part(s) required to perform the work, Tool(s)/Equipment required to perform the task(s), and the required Technician Certification(s) needed to complete the Work Plan.
In order to utilize this process, first establish a Maintenance Work Plan. A Work Plan can be associated with multiple Tasks, Parts, Tool(s)/Equipment, and Certifications. There will be four pages available to identify the details needed to complete the Work Plan.

Navigation

Search for a Work Plan Association — Criteria

Overview

The Maintenance and Utilization module Work Plan Association process provides the ability to create and maintain associations between Work Plans characterized in the M&U module and associated information stored in the Warehouse module. The following Warehouse specifications are mapped to M&U during a Work Order request:

Warehouse Specifications:

- stock number
- item condition
- preservation level
- shipment preparation
- storage type

The work order is generated based on the associated work plan information:

Work Plan Information:

- tasks
- parts
- tools/equipment
- certifications

Inbound Resolution Search

Overview

The Enterprise Logistics Management System (ELMS) allows you to process work orders from external maintenance activities. Work orders are received from outside sources through external transactions or XML files. ELMS processes the data for errors. If errors are found you need to resolve the discrepancies. ELMS allows you to correct the data so the work orders can be processed into ELMS.

Navigation

Maintenance > Inbound Resolution > Search

Page Fields

The following fields display on the Inbound Resolution Status page. For more information on each field, select the appropriate hyperlink.

Work Order Inbound Errors
Update
Reject
Asset ID
Customer Name
Work Order Desc
Error

Work Order Status Inbound Errors
Update
Reject
Asset ID
Work Order Nbr
Requested Work Order Status
Error

* denotes a mandatory field

Procedures

To Update or Reject a Word Order for processing into ELMS:

1. Review the ASSET ID, Customer Name, WORK ORDER DESC, and Error for the record you wish to process.
2. Select the **Update** hyperlink to access the record's update page to correct the error(s).
3. The **Reject** hyperlink will take you to the rejection confirmation screen.

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Search for a Preventive Maintenance Schedule — Work Plan

Overview

The Maintenance and Utilization module Schedule Preventive Maintenance — Work Plan process provides the ability to build Preventive Maintenance (PM) schedules with one or more Work Plans.

Helpful Tip

If a Vehicle needs to be inspected every 10,000 miles and the last time the inspection was completed was at 50,000 miles, then the next time that the asset should be inspected again is 60,000 miles (50,000 + 10,000).

It is imperative that the user reports the asset use in ELMS.

However, if the user **has not** been reporting utilization, then the asset in ELMS is still at 50,000 miles. It doesn't matter that it has been three months since the last inspection point, and the asset had accumulated 13,000 miles, yielding a total utilization of 63,000 miles. Therefore, a Work Order **does not** generate for this asset because, according to the data provided in ELMS, the latest utilization quantity is 50,000 miles and the asset is not yet due for Maintenance at this point.

e. Update the LAST UTIL QTY, using to choose the revised quantity.

- Every X Days

a. Update the Recurring Method, using ▾ to select the desired method.

b. Update the SUSP UNTIL DATE, using 📅 or entering the date (MM/DD/YYYY) in the field provided.

Note

The Recurring Method, Frequency, Interval, and Schedule Method fields become read-only when the Nbr of Assets exceeds 0.

c. Update the Frequency, using ▾ to select the desired frequency.

d. Update the Interval, using ▲▼ to choose the revised quantity.

e. Update the DAYS BEFORE SCHED DATE, using ▲▼ to choose the revised amount of time.

f. Update the Schedule Method, using ▾ to select the desired method.

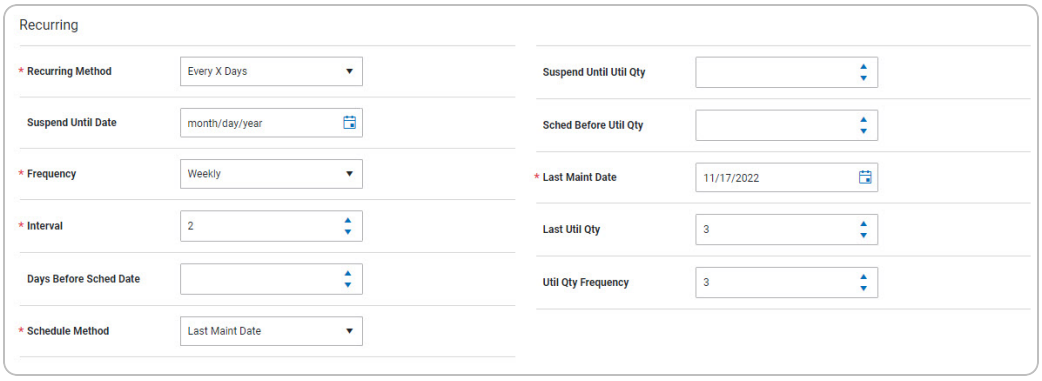

1. Set Sched Date

   Update the Set Schedule Date, using 📅 or entering the date (MM/DD/YYYY) in the field provided.

   Note

   The Set Schedule Date field becomes read-only when the Nbr of Assets exceeds 0.

2. Last Maint Date

A. Update the SUSP UNTIL UTIL QTY, using to choose the revised quantity.

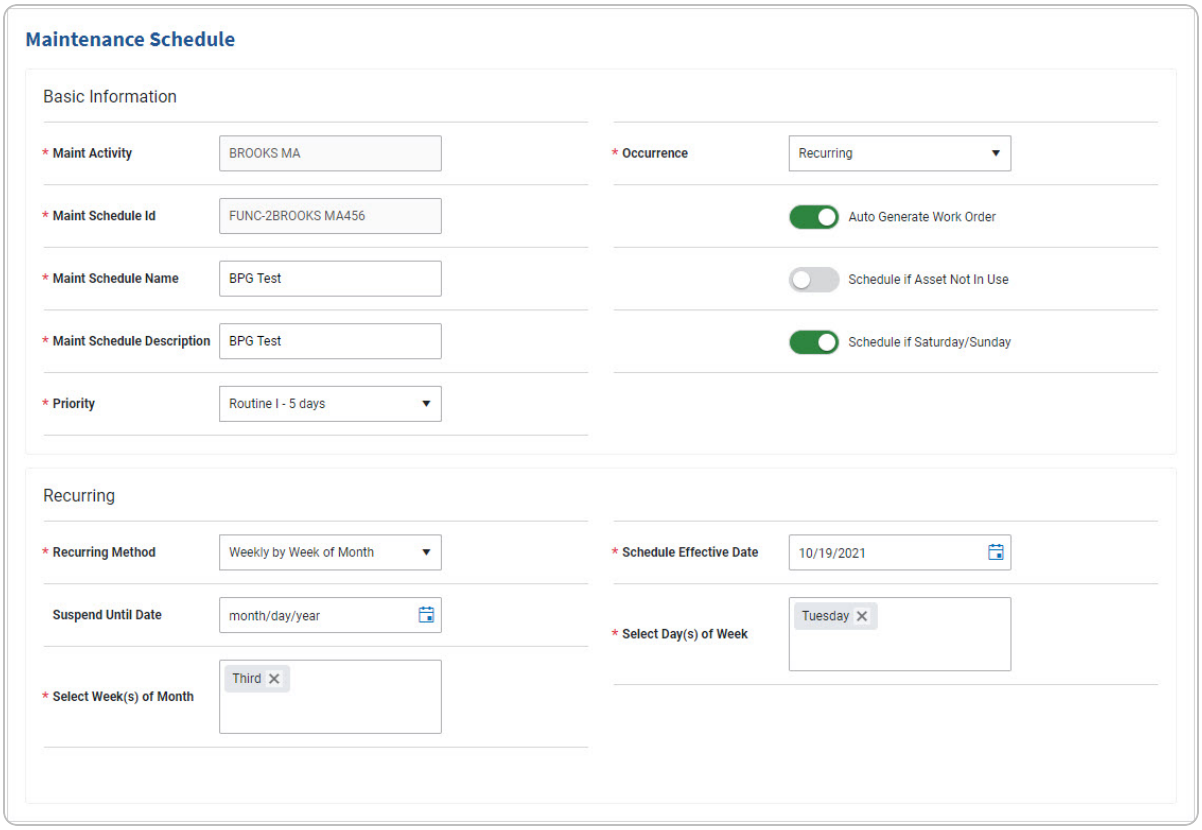

B. Update the SCHED BEFORE UTIL QTY, using to choose revised quantity.

C. Update the LAST MAINT DT, using or entering the date (MM/DD/YYYY) in the field provided.

D. Update the LAST UTIL QTY, using to choose the revised quantity.

E. Update the UTIL QTY FREQUENCY, using to choose the revised frequency.

- Weekly by Week of Month

a. Update the Recurring Method, using ▼ to select the desired process.

b. Update the SUSPEND UNTIL DATE, using 📅 or entering the date (MM/DD/YYYY) in the field provided.

c. Update the Select Weeks(s) of Month field by either:

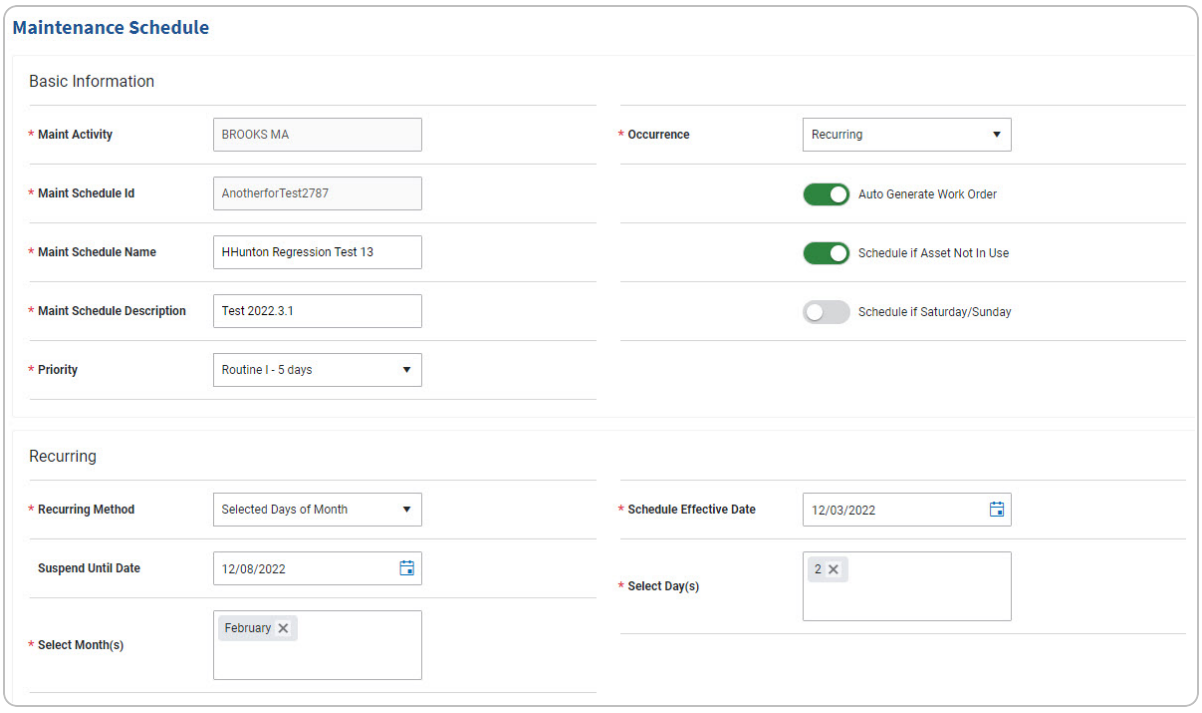

Add a week by selecting the field and choosing additional weeks.
OR
Delete by selecting the X on the week entry.

d. Update the SCHEDULE EFFECTIVE DATE, using 📅 or entering the date (MM/DD/YYYY) in the field provided.

e. Update the Select Day(s) of the Week field by either:

Add a day by selecting the field and choosing additional days.
OR
Delete by selecting the X on the day entry.

- Selected Days of Month

a. Update the Recurring Method, using ▾ to select the desired process.

b. Update the SUSPEND UNTIL DATE, using or entering the date (MM/DD/YYYY) in the field provided.

c. Update the Select Month(s) field by either:

Add a month by selecting the field and choosing additional months.
OR
Delete by selecting the X on the month entry.

Note

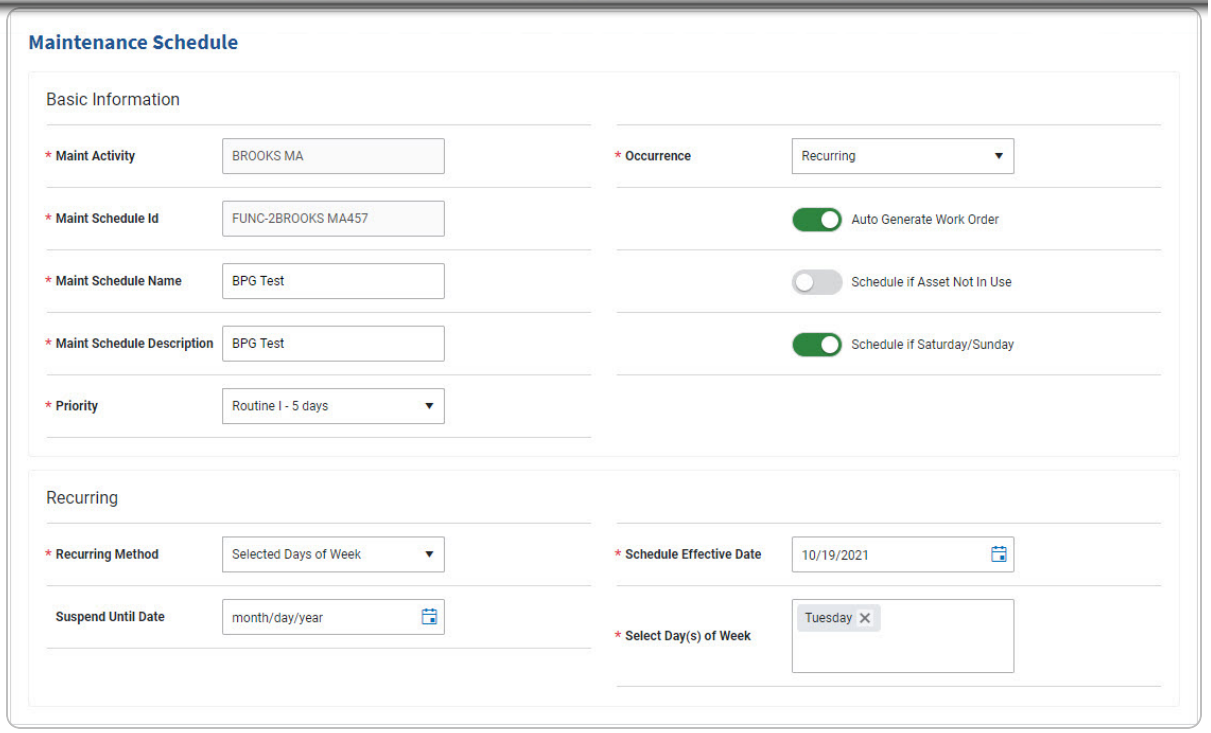

Additional fields become available for update when the Nbr of Assets equals 0.

d. Update the SCHEDULE EFFECTIVE DATE, using or entering the date (MM/DD/YYYY) in the field provided.

e. Update the Select Day(s) field by either:

Add a date number by selecting the field and choosing additional numbers.
OR
Delete by selecting the X on the number entry.

- Selected Days of Week

a. Update the Recurring Method, using ▾ to select the desired process.

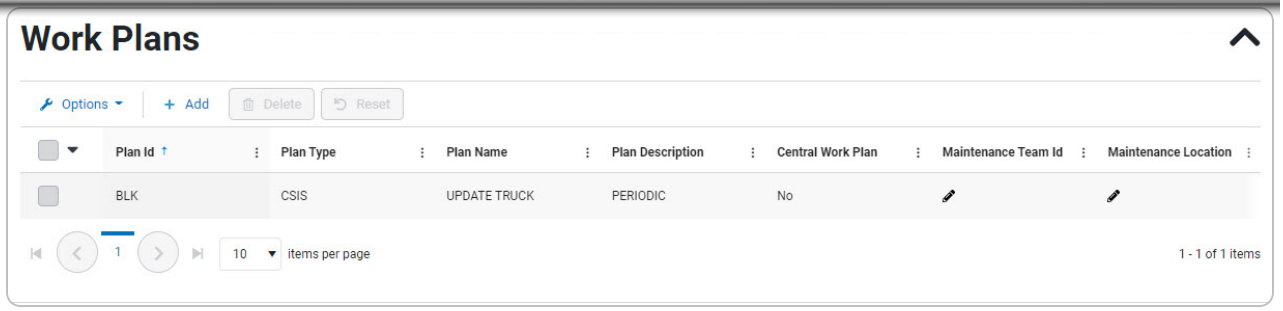

b. Update the SUSPEND UNTIL DATE, using 📅 or entering the date (MM/DD/YYYY) in the field provided.

c. Update the SCHEDULE EFFECTIVE DATE, using 📅 or entering the date (MM/DD/YYYY) in the field provided.

d. Update the Select Day(s) of the Week field by either:

Add a day by selecting the field and choosing additional days.
OR
Delete by selecting the X on the day entry.

3. Click ☐ to select the Work Plan. *All Maintenance Schedules must contain at least one Work Plan. If it does not, select* + Add *, and the* ***Select Work Plans*** *pop-up window appears.*

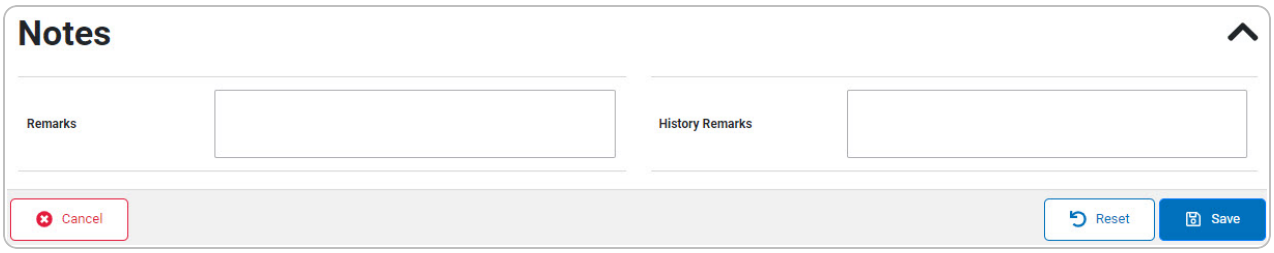

- Delete a Work Plan

  A. Click ☐ to select the desired work plan. *The row becomes highlighted, and the* + Add, 🗑 Delete, *and* ↺ Reset *buttons are available.*

  B. Select 🗑 Delete. *The Work Plan is immediately removed from the Search Results grid.*

4. *Verify the Notes grid.*

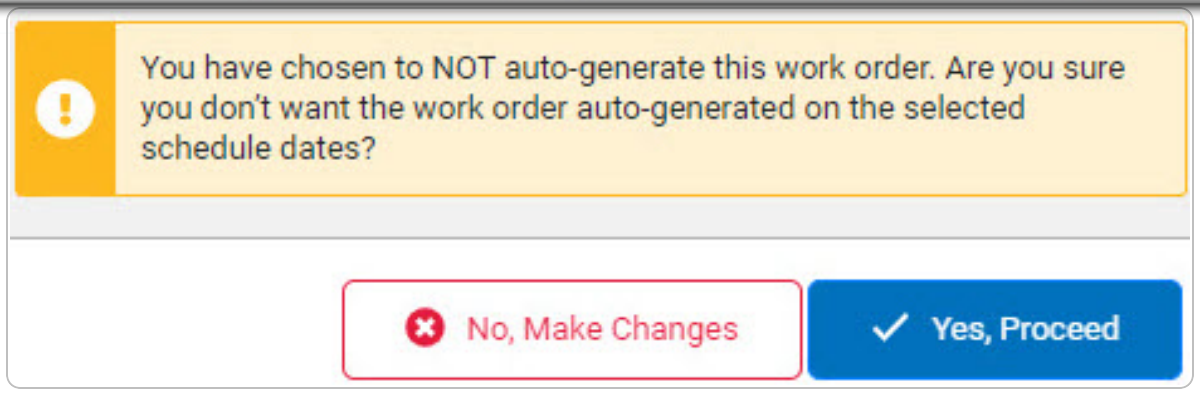

A. Update the Remarks, entering the revised information in the field provided. *This is a 256 alphanumeric character field.*

B. Enter the History Remarks in the field provided. *This is a 256 alphanumeric character field.*

5. Select 💾 Save. *A verification pop-up window appears if the Auto Generate Work Order is changed. The* ***Update a Preventive Maintenance Schedule*** *page closes and* 

appears as the entry is updated in the Search Results grid.

A. If the Auto Generate Work Order is changed from  to  , the verification pop-up window appears:

a. Select No, Make Changes. *The* ***Update a Preventive Maintenance Schedule*** *page appears.*

OR

Select Yes, Proceed. *The* ***Update a Preventive Maintenance Schedule*** *page closes and* Maintenance schedule successfully added. *appears as the entry is added to the Search Results grid.*

Delete a Preventive Maintenance Schedule

1. Click to select the desired preventive maintenance schedule. *The row becomes highlighted, and the* Edit *and* Asset Details *buttons are available. The* Delete *button is available when the* NBR *of Assets is 0.*
2. Select Edit. *The* ***Update a Preventive Maintenance Schedule*** *page appears.*

Note

The Delete button becomes available when the NBR of Assets equals 0.

3. Select Delete. *The* ***Delete a Preventive Maintenance Schedule*** *pop-up window appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
765 — No record(s) selected. Select "Cancel" button to return to Search Criteria.	Invalid Entry. Select at least one record to perform an action. Select at least one row, then click Edit.
603 — Selected rows must contain the same UTIL MEASURE CD: UTIL MEASURE CDs do not match.	Invalid Entries. When there is more than one asset selected, they must have identical UTIL MEASURE CDs. Choose which UTIL MEASURE CD the desired assets use, and select only the assets with that UTIL MEASURE CD.
xxxx — SUSP UNTIL DT cannot be < Today's Date.	Invalid Date Entry. The Suspend Until Date must be after the current date. Re-enter the date.
13 — Mandatory Entry: *SET SCHED DT*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *SET SCHED UTIL QTY*.	
xxxx — SUSP UNTIL DT cannot be <SET SCHED DT.	Invalid Date Entry. The Suspend Until Date must be before the Set Scheduled Date. Re-enter the date.
2061 — Invalid entry: *SUSP UNTIL DT*.	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alphanumeric (alphabetic "A" through "Z",

2061 — Invalid entry: *Days Before Sched Dt*.	numeric "0" through "9") characters, or the following permitted special characters: $, -, /, #, &, comma, period, and space. Special characters like ! or @ are prohibited.
2061 — Invalid entry: *Susp Until Util Qty*.	
2061 — Invalid entry: *Sched Before Util Qty*.	
xxxx — Sched Before Util Qty must be <=Util Qty Frequency.	Invalid Entry. The Schedule Before Utilization Quantity must be less than or equal to the Utilization Quantity Frequency. Re-enter data.
xxxx — At least one Work Plan must be associated with the maintenance schedule.	Invalid Entry. The Maintenance Schedule must have at least one associated Work Plan. Re-enter the data.
xxxx — Maint Sched Id already exists in ELMS. You must enter a new value.	Invalid Entry. The Maint Sched Id cannot be duplicated. Re-enter the data.

Add a WRNTY/SVC/SUBSCRIPTION — Terms/COND

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*

1. Use ⌄ to select the Contract Use Cd.

2. Select Add. *The* ***WRNTY/SVC/SUBSCRIPTION— Terms/CONDAdd*** *page appears.*

A. *The CONTRACT USE CD automatically populates and is not editable.*

B. Use ⌄ to select the Contract Type Cd.

C. Enter the CONTRACT NBR in the field provided. *This is a 50 alphanumeric character field.*

D. Use ⌄ to select the CAGE Cd.

E. Enter the DLVY ORD NBR in the field provided. *This is a 11 alphanumeric character field.*

F. Enter the CLINin the field provided. *This is a 4 alphanumeric character field.*

G. Enter the SLIN in the field provided. *This is a 2 alphanumeric character field.*

H. Enter the CLAUSE DESC in the field provided. *This is a 1,024 alphanumeric character field.*

I. Enter the Clause Terms in the field provided. *This is a 8 alphanumeric character field.*

J. Enter the Clause Procedures in the field provided. *This is a 1,024 alphanumeric character field.*

K. Use  to select the START DT, or enter the date (MM/DD/YYYY) in the field provided.

L. Use  to select the END DT, or enter the date (MM/DD/YYYY) in the field provided.

Note

When the CONTRACT USE CD is P - Equipment Purchase, the START DT and END DT fields do not appear.

M. Use to select the Util Measure Cd.

N. Enter the UTIL MEASURE QTY in the field provided. *This is an 8 numeric character field.*

Helpful Tip

Select  to add one additional UTIL MEASURE CD and UTIL MEASURE QTY set.

O. Use to select the Service Loc Cd.

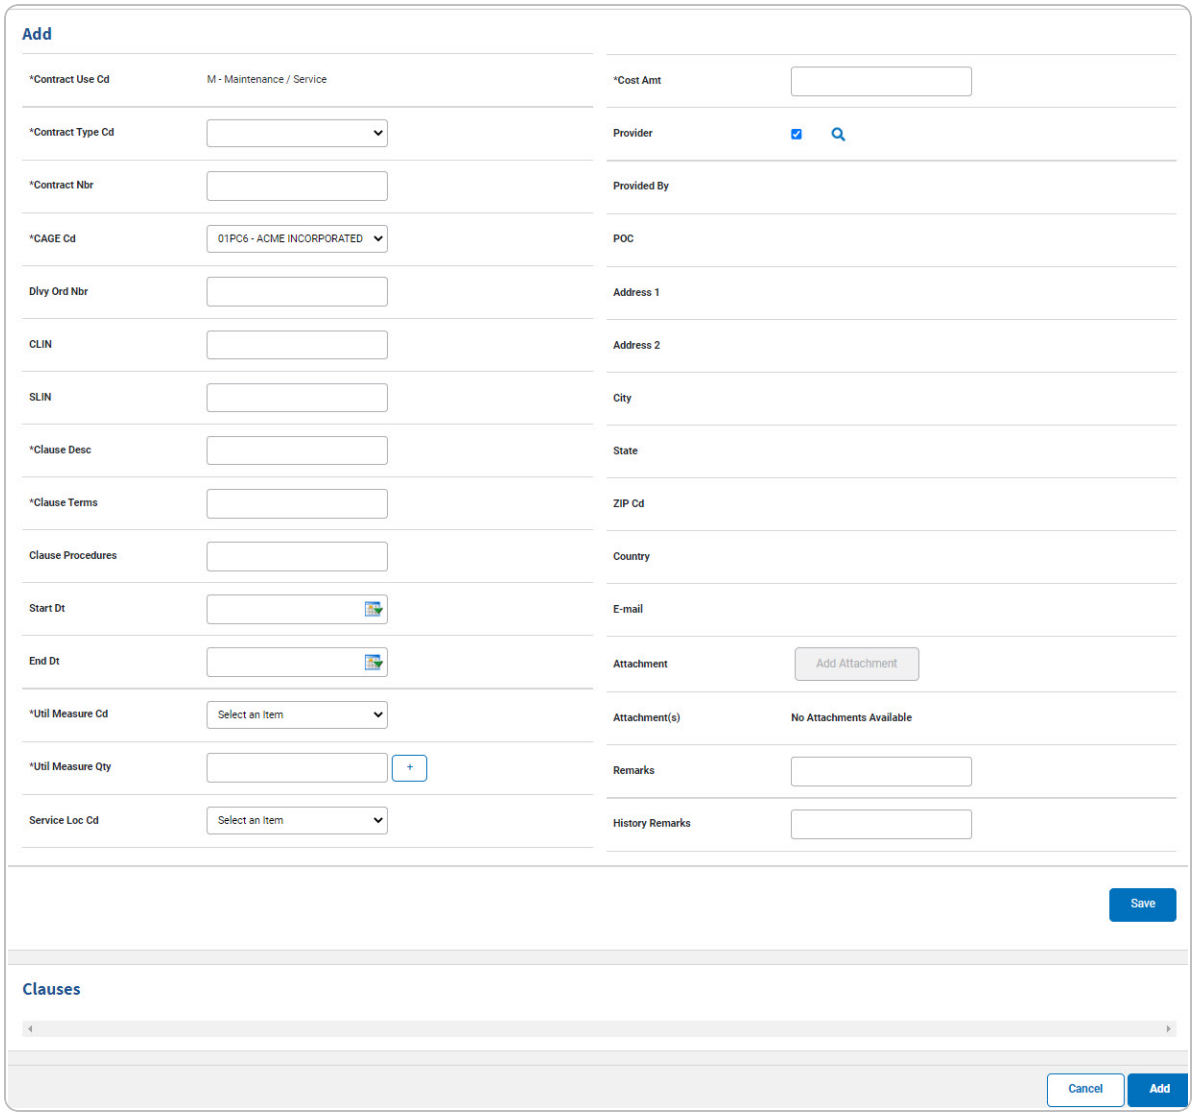

P. Enter the SERVICE LOC NM in the field provided. *This is a 55 alphanumeric character field.*

Note

The SERVICE LOC NM appears when the selected Service Location Code is CF - Company Facility or AD - Dealer.

Q. Enter the COST AMT in the field provided. *This is a 12 numeric character field.*

R. Click ☐ to select the Provider. *Checking this removes the CAGE CD, ORG NM, PHONE NBR, E-MAIL Address fields, and opens new fields.*

a. Use 🔍 to browse for the Provider.

Address Browse help

b. *The Provided By automatically populates and is not editable.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
350 — Must be alpha-numeric with supported special characters $, — , /, #, &, comma, period, and space.	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alphanumeric (alphabetic "A" through "Z", numeric "0" through "9") characters, or the following permitted special characters: $, —, /, #, &, ;, comma, period, and space. Special characters like ! or @ are prohibited.
13 — Mandatory Entry: *Util Measure Cd*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Util Measure Qty*.	
13 — Mandatory Entry: *Clause Desc*.	
13 — Mandatory Entry: *Clause Terms*.	
13 — Mandatory Entry: *Service Location Name*.	
13 — Mandatory Entry: *Cost Amt*.	
13 — Mandatory Entry: *CLIN*.	

92 — Entry must be numeric.	Invalid Entry. The characters entered in the field include letters. Enter numeric (“0” through “9”) characters.
553 — CONTRACT NBR consists of 13 POS: POS 1—6 = DODAAC, POS 7—8 and 10—13 numeric, POS 9 alpha and DODAAC alphanumeric, except for "I" or "O".	Invalid Characters entered in the Contract Number field. The field must have 13 characters. The first 6 positions are the DODAAC; the 7th and 8th positions must be numbers; the 9th position must be a letter (but not "I" or "O"); and positions 10—13 must be numbers.
492 — Invalid CLIN. First 2 — POS must be alphanumeric not to exceed 4 alphanumeric positions.	Invalid Entry. The first two positions of the CLIN must be alphanumeric. Re-enter the CLIN.
xxxx — Cannot commit clauses until current clause is updated.	Invalid Entry. The clause displayed at the top of the page must be saved prior to selecting a clause at the bottom of the page to update. Save the top information before continuing.
xxxx — No clause information found in Clauses grid.	Invalid Entry. Insert the clause information to proceed. Re—enter the entry.
xxxx — Invalid entry: *Contract Nbr - Invalid Format*	Invalid Entry. The Contract Nbr format is incorrect. The field must have 13 characters. The first 6 positions are the DODAAC; the 7th and 8th positions must be numbers; the 9th position must be a letter (but not "I" or "O"); and positions 10—13 must be numbers. Re-enter the Contract Nbr.

xxxx — Only 50 records can be processed at a time.	Invalid Entry. Over 50 records have been added. Remove the extra records and re-try the entry.

Search for a Maintenance Asset Utilization Record — Criteria

Overview

The Maintenance and Utilization module Maintenance Asset Utilization Record process provides the ability to add, update, and delete utilization records. The process allows the input of data, cumulative utilization, and fuel used for a period of time. Only records that exist on the MAM and have a Maintenance Management Code of UTL or MAU are visible, provided the operating personnel has access to the asset.

Navigation

Utilization > MAINT ASSET UTIL > Maintenance Asset Utilization Record Search Criteria page

ELMS Navigation Helpful Tips

Click the following link to display M&U Navigation Tips.

Add a Maintenance Asset Utilization Record — Record UTIL - Single

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Record Util. *The* ***Maintenance Asset Utilization Record Add*** *page appears.*

A. *Disregard the MASS RPTD DT.*

B. *Disregard the Mass FUEL TYPE CD.*

Note

The Mass FUEL TYPE CD field appears when the selected assets have the same Fuel Codes.

C. *Disregard the Mass Fuel Unit Cost.*

D. *Disregard the History Remarks.*

Helpful Tip

For Single Entries within a Single Record, disregard the above fields. The Mass Update section is for updating multiple entries at the same time.

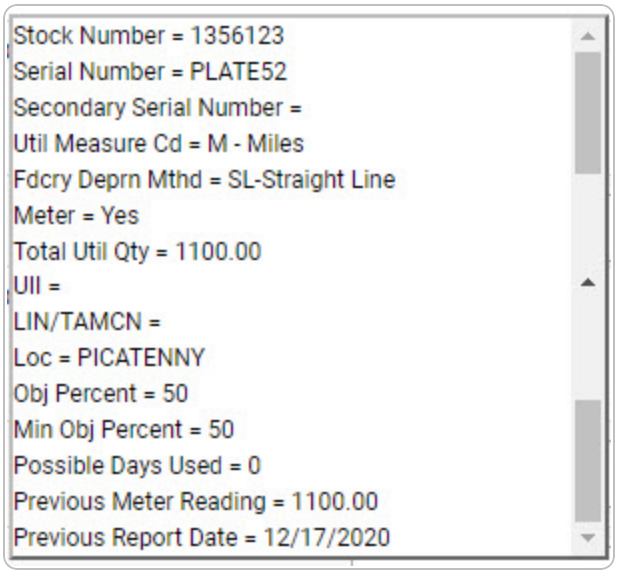

For Multiple Entries within a Single Record, the Mass Update Section allows changing all entries at one time.

Revise the desired fields in the Mass Update Section and select Change. *All entries display the changes.*

E. *Complete the Report UTIL grid.*

a. Hover over the ASSET ID. *The details for that asset appear in a pop-up window.*

b. Update the RPTD DT, using or entering it (MM/DD/YYYY) in the field provided.

c. Enter the CURRENT MTR RDNG in the field provided. *This is a 12 numeric character field.*

Note

The CURRENT MTR RDNG field appears when the asset is metered.

d. Enter the UTIL ON BASE in the field provided. *This is a 7 numeric character field.*

e. Enter the UTIL OFF BASE in the field provided. *This is a 7 numeric character field.*

Helpful Tip

The sum of the UTIL ON BASE and the UTIL OFF BASE must equal the difference between the PREV MTR RDNG and the CURRENT MTR RDNG.

Therefore, CURRENT MTR RDNG — PREV MTR RDNG = UTIL ON BASE + UTIL OFF BASE

Note

The FUEL TYPE CD, FUEL QTY, Fuel Unit Cost, and FUEL STATE CD fields become available when the fuel code default value exists.

f. Update the Fuel Type Cd, using ⌄ to select the desired code.

Note

If the utilization does not record fuel usage, set the FUEL TYPE CD to *Select an Item*.

g. Enter the FUEL QTY in the field provided. *This is a 5 numeric character field.*

h. Enter the Fuel Unit Cost in the field provided. *This is a 3 numeric character field.*

i. Update the Fuel State Cd, using ⌄ to select the desired code.

j. Enter the Days Used in the field provided. *This is a 3 numeric character field.*

k. Enter the Days Not Used in the field provided. *This is a 3 numeric character field.*

l. Enter the DAYS UNAVL in the field provided. *This is a 3 numeric character field.*

m. Click ☐ to select the REPLACEMENT MTR RDNG. *Check this to record the meter reading of the replacement meter at the time of replacement.*

1. Enter the REPLACEMENT MTR RDNG in the field provided. *This is a 12 numeric character field.*

n. Enter the TRAN REF ID in the field provided. *This is a 36 alphanumeric character field.*

o. Enter the History Remarks in the field provided. *This is a 256 alphanumeric character field.*

p. Select New Row to enter the another Asset Utilization Record for the same asset. *A new entry line appears. Repeat Steps b-o.*

2. Select Record Util. *The **Maintenance Asset Utilization Transaction Status** page appears.*

Add a Maintenance Asset Utilization Record — Record UTIL - Multiple

Note

To record utilization for multiple assets, all selected assets must have the same meter code.

1. Use ☐ to select the desired entry(s). *The* ☑ *appears when the entry is selected. Repeat Step 1 as many times as needed.*
2. Select Record Util. *The* ***Maintenance Asset Utilization Record Add*** *page appears.*

3. *Complete the Mass Update Grid.*

Note

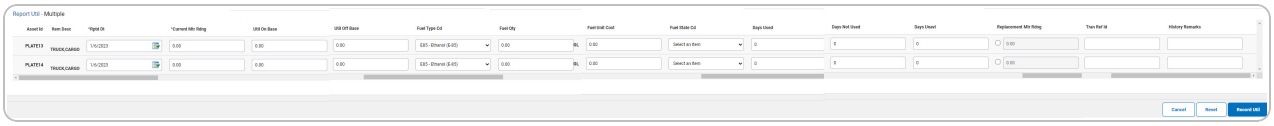

Complete the Mass Update Grid to revise multiple assets at once.

A. Use to select the MASS RPTD DT, or enter the date (MM/DD/YYYY) in the field provided.

B. Enter the Mass Fuel Unit Cost in the field provided. *This is a 3 numeric character field.*

C. Enter the History Remarks in the field provided. *This is a 1024 alphanumeric character field.*

4. Select Change. *All below Utilization entries display the above changes.*
5. *Complete the Report UTIL - Multiple grid.*

A. Hover over the ASSET ID. *The details for that asset appear in a pop-up window.*

B. *The ITEM DESC automatically populates and is not editable.*

C. Update the RPTD DT, using or entering the date (MM/DD/YYYY) in the field provided.

D. Enter the CURRENT MTR RDNG in the field provided. *This is a 12 numeric character field.*

E. Enter the UTIL ON BASE in the field provided. *This is a 7 numeric character field.*

F. Enter the UTIL OFF BASE in the field provided. *This is a 7 numeric character field.*

Helpful Tip

The sum of the UTIL ON BASE and the UTIL OFF BASE must equal the difference between the PREV MTR RDNG and the CURRENT MTR RDNG.
Therefore, CURRENT MTR RDNG — PREV MTR RDNG = UTIL ON BASE + UTIL OFF BASE

Note

The FUEL TYPE CD, FUEL QTY, Fuel Unit Cost, and FUEL STATE CD fields become available when the fuel code default value exists.

G. Update the Fuel Type Cd, using ⌄ to select the desired code.

Note

If the utilization does not record fuel usage, set the FUEL TYPE CD to *Select an Item*.

H. Enter the FUEL QTY in the field provided. *This is a 5 numeric character field.*

I. Enter the Fuel Unit Cost in the field provided. *This is a 3 numeric character field.*

J. Update the Fuel State Cd, using ⌄ to select the desired code.

K. Enter the Days Used in the field provided. *This is a 3 numeric character field.*

L. Enter the Days Not Used in the field provided. *This is a 3 numeric character field.*

M. Enter the DAYS UNAVL in the field provided. *This is a 3 numeric character field.*

N. Click ☐ to select the REPLACEMENT MTR RDNG. *Check this to record the meter reading of the replacement meter at the time of replacement.*

a. Enter the REPLACEMENT MTR RDNG in the field provided. *This is a 12 numeric character field.*

O. Enter the TRAN REF ID in the field provided. *This is a 36 alphanumeric character field.*

P. Enter the History Remarks in the field provided. *This is a 1024 alphanumeric character field.*

6. Select Record Util. *The* ***Maintenance Asset Utilization Transaction Status*** *page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..
13 — Mandatory Entry: *RPTD DT*.	Missing Entry. The Current Meter Reading and Replacement Meter Reading ca be zero if the Replacement Meter Flag is checked. Enter the required information in the desired field.
13 — Mandatory Entry: *CURRENT MTR RDNG*.	
xxxx — Mandatory Entry: Fuel Unit Cost and FUEL QTY must have a value.	Missing Entry. If the Fuel Type drop-down has a value, the Fuel Unit Cost and Fuel Quantity must have a value. Enter the cost and quantity amounts.
350 — Must be alpha-numeric with supported special characters $, — , /, #, &, comma, period, and space.	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alphanumeric (alphabetic "A" through "Z", numeric "0" through "9") characters, or the following permitted special characters: $, —, /, #,

	&, ;, comma, period, and space. Special characters like ! or @ are prohibited.
44 — Input date must be <= system date.	Invalid Date Entry. The system date (Today's Date) must be after or the same as the Input date. Re—enter the date.
xxxx — Nothing entered to mass update.	Missing Entry. No Mass changes were entered. Enter the changes for a Mass Update.
xxxx — UTIL ON BASE + UTIL OFF BASE must = the difference of the CURRENT MTR RDNG minus the Previous Meter Reading.	Invalid Entry. The total amount of the Utilization Off Base and Utilization Off Base must be the same as the total amount between the CURRENT MTR RDNGand the Previous Meter Reading. Check the amounts and re-enter the fields.
647 — TRAN REF ID already exists.	Invalid Entry. The Transaction Reference Identifier entered is a duplicate. Enter a valid identification.
503 — UTIL value exists for RPTD DT; cannot record a REPLACEMENT MTR.	Invalid Entry. The Replacement Meter Reading field has a value entered, and the Reported Date being entered already exists for the given asset. Verify the date and meter reading, and re-enter the information.
559 — CURRENT MTR RDNG must be >= Replacement Meter Reading.	Invalid Entry. The Replacement Meter Reading must be smaller than or equal to the Current Meter Reading. Re—enter the meter reading.

xxxx — Invalid Entry: Meter reading already exists for the date specified.	Invalid Entry. Meter reading matches a record already entered. Select a different date or update the existing entry.
92 — Entry must be numeric.	Invalid Characters Entered in the Remarks field. Enter alphanumeric characters, or the following permitted special characters: $, —, /, #, &, comma, period, and space. Special characters like ! or @ are prohibited. The field name + "Up to ## whole numbers and ## decimals are allowed. Replace the ## signs with the actual numbers for the given field.
645 — Util On Base + Util Off Base must = Total Tran Qty.	Invalid Entry. The Total Tran Qty must equal the Util On Base amount and the Util Off Base amount together. Verify the selected Asset Id, and re—enter the information.
161 — Remarks must be alphanumeric with supported special character(s) $, — , /, #, &, comma, period, and space.	Invalid Characters Entered in the Remarks field. Enter alphanumeric characters, or the following permitted special characters: $, —, /, #, &, comma, period, and space. Special characters like ! or @ are prohibited.
642 — Current Mtr Rdng must be >= Previous Meter Reading.	Invalid Entry. The Previous Meter Reading must be smaller than or equal to the Current Meter Reading. Re—enter the meter reading.
644 — Current Mtr Rdng must be <= Next Mtr Rdng.	Invalid Entry. The Next Meter Reading must be larger than or equal to the Current Meter Reading. Re—enter the meter reading.

Update a Maintenance Asset Utilization Record

Overview

The Maintenance Asset Utilization Record Update process allows editing of a single utilization record. Only certain fields (depending on attributes assigned to assets) are available for update.

Navigation

Utilization > MAINT ASSET UTIL > Search Criteria > Search > Search Results > Update hyperlink > Maintenance Asset Utilization Record Update page

Page Fields

The following fields display on the **Maintenance Asset Utilization Record Update** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
24	(*) Asterisk identifies mandatory fields.
18	Select "Update" button to process transaction(s).
13	Select "Reset" button to clear data.
14	Select "Cancel" button to return to previous page.

Add a Dispatch

Overview

The Dispatch Add process provides the ability to create new Dispatch records within the M&U module.
There are seven tabs to detail the complete dispatch process.

- **Basic** — Describes the details for the dispatch.
- **Utilization** — Tracks utilization of an asset.
  - *Available when the Dispatch Status is "Issued" or "Returned" and the asset is profiled for utilization.*
- **Customer** — Contains the Primary Operator and relevant information.
- **Previous Dispatches** — Lists the previous dispatches for the selected asset.
- **Asset Info** — Displays asset information from the PA module.
  - *Available when the Asset is selected.*
- **License(s)** — Displays the license(s) required to operate the dispatched asset.
  - *Available when a license has been specified for the selected asset.*
- **Rates** — Displays the usage rates for the asset.

Attention

A dispatch record cannot be created for dispatches older than 14 days. When the asset selected is metered, Utilization information is mandatory.

Navigation

Update a Dispatch

Overview

The Dispatch Update process allows editing of Dispatch records within the M&U module. After a record is created, the Attachment tab appears to attach relevant documents to the Dispatch record.
Updating a Dispatch Record's status follows certain parameters:

- The "RQ - Requested" status is editable to "AL - Allocated," "IS - Issued," or "CN - Canceled."
- The "AL - Allocated" status is editable to "RQ - Requested," "IS - Issued," or "CN - Canceled."
- The "IS - Issued" status is editable to "CN - Canceled," "RN - Return - Not Closed," or "RC - Returned - Closed."
- The "RN - Return - Not Closed" status is only editable to "RC - Returned - Closed."
- The "RC - Return - Closed" status is only editable to "RN - Returned - Not Closed."
- The "CN - Canceled" status is NOT editable. It is a Read Only status.

There are eight tabs to detail the complete dispatch process.

- **Basic** — Describes the details for the dispatch.
- **Utilization** — Tracks utilization of an asset.
  - *Available when the Dispatch Status is "Issued" or "Returned" and the asset is profiled for utilization.*

- **Customer** — Contains the Primary Operator and relevant information.
- **Previous Dispatches** — Lists the previous dispatches for the selected asset.
- **Asset Info** — Displays asset information from the PA module.
  - *Available when the Asset is selected.*

- **Attachment(s)** — Allows certain files to be attached to the Dispatch record.
  - *Available only when Updating the Dispatch.*
- **License(s)** — Displays the license(s) required to operate the dispatched asset.
  - *Available when a license has been specified for the selected asset.*
- **Rates** — Displays the usage rates for the asset.

Add a Requisition Default

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*

1. Select + Add. *The **Add Requisition Default** page appears.*

A. *Complete the Tier panel.*

a. Enter the MAINT ACTIVITY in the field provided. *This is an 15 alphanumeric character field.*

B. *Complete the Defaults panel.*

a. Use ▼ to select the Requisition Type.

b. Use ▼ to select the Priority Code.

c. Use ▼ to select the Advice Code.

d. Use ▼ to select the Media & Status Code.

e. Use ▼ to select the Signal Code.

f. Use ▼ to select the Demand Code.

g. Use ▼ to select the Purpose Code.

h. Enter the Distribution Code in the field provided. *This is a 3 alphanumeric character field.*

i. Use ▼ to select the OPTAR.

j. Use ▼ to select the Object Class Code.

k. *The FUND CD automatically populates and is not editable.*

> **Note**
> The FUND CD and Funding Cost Center fields automatically populates after the OPTAR is selected.

l. *The Funding Cost Center automatically populates and is not editable.*

m. Enter the Supplementary Address in the field provided. *This is a 35 alpha-numeric character field.*

2. Select Save. Successfully added requisition defaults *appears and the new Requisition Default appears in the Search Results Grid on the* ***Requisition Default Search*** *page.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
13 — Mandatory Entry: *MAINT ACTIVITY*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Requisition Type*.	
xxxx — Supplementary Address is not valid.	Invalid Entry. The entered Supplementary Address value does not exist. Re—enter the Supplementary Address.
185 — Record already exists.	Invalid Entry. The field entered is already in the system. Check the information again, and re—

	enter the record.
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.

Update a Requisition Default

Overview

The Requisition Default Update process allows editing of a default Requisition.

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Navigation

Search for a Requisition — Order

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Use the Work Queue or Search Criteria grid to generate results.

Helpful Tip

Select to close the Work Queue. *The **Work Queue** grid closes to the left of the Search page.*

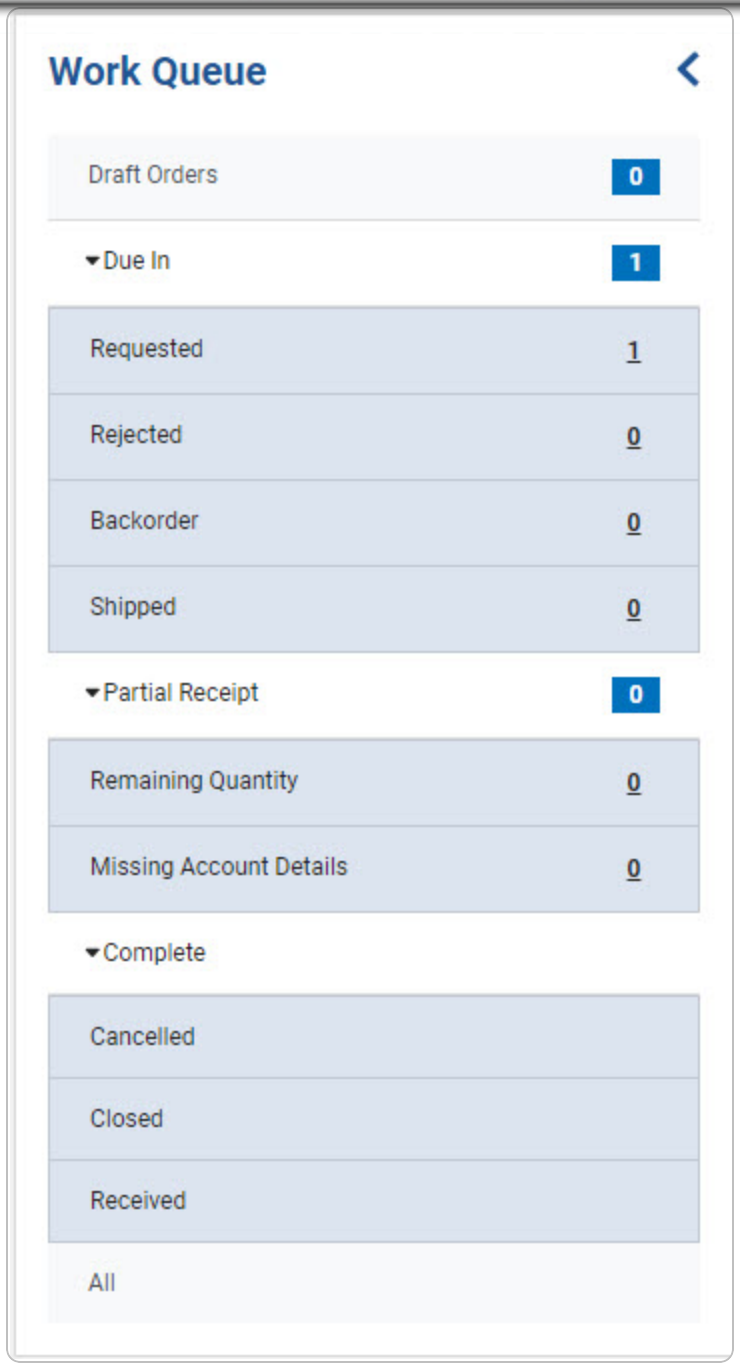

Select to open the Work Queue. *The **Work Queue** grid opens on the top of the Search page.*

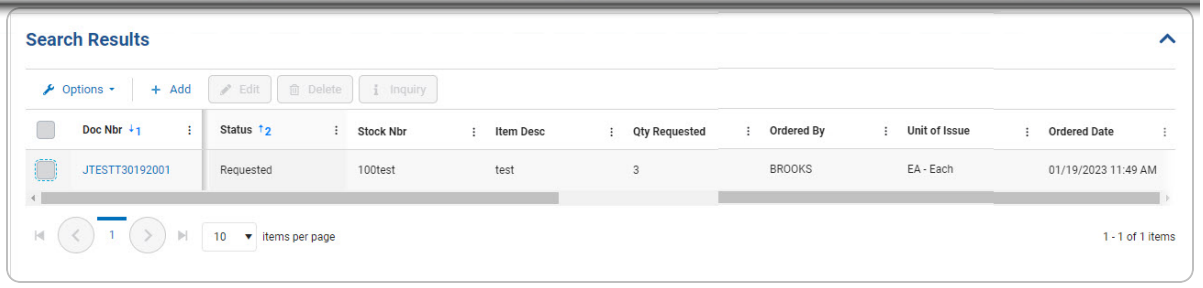

- Select the desired criteria. *The selected criteria appears in the Search Results grid.*

  OR

  Select ▸ next to the desired criteria. *Additional options become available.*

- Select the desired criteria. *The selected criteria displays in the Search Results grid.*

Search Criteria

Helpful Tip

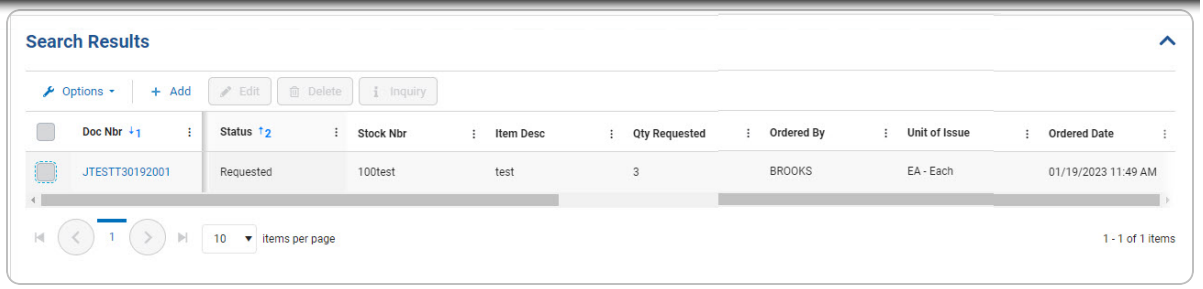

The Search Criteria grid defaults to close when entries generated based on the Work Queue criteria appear in the Search Results grid.

Work Queue entries automatically appear in the Search Results grid if available.

Select to open the Search Criteria grid. *The **Search Criteria** grid opens.*

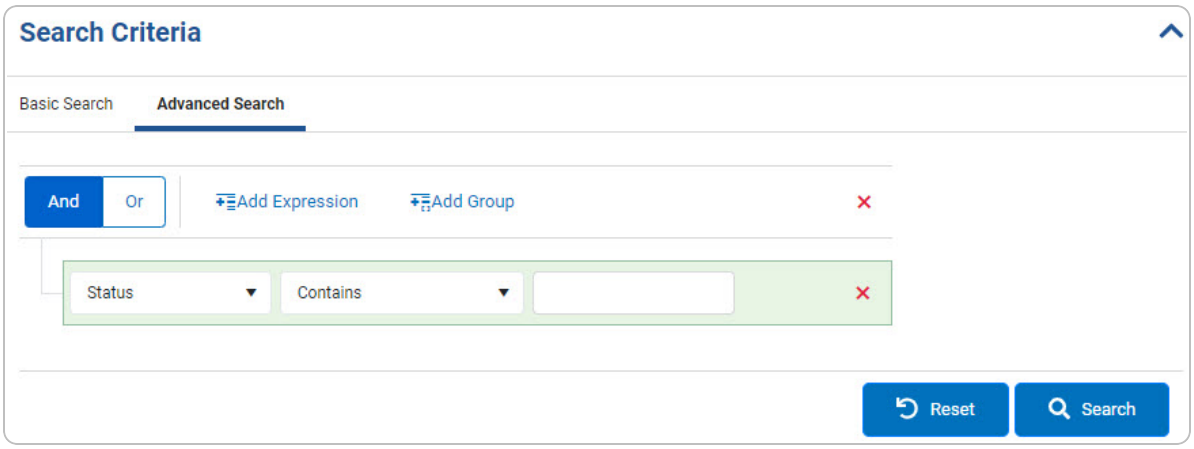

Select to close the Search Criteria grid. *The **Search Criteria** grid closes.*

- Enter the DOC NBR in the field provided. *This is a 14 alphanumeric character field.*
- Enter the STOCK NBR in the field provided. *This is a 15 alphanumeric character field.*
- Enter the Ordered DT FR/To, or use the calender to search for the date. *This is a 8 numeric character field.*
- Select Search. *The results display in the **Requisition Search Results** grid.*

OR

Select the Advanced Search tab.

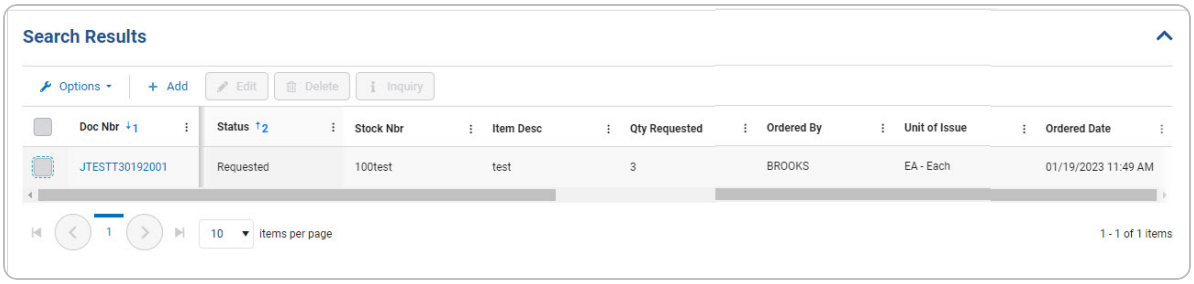

- Select And Or. *Selecting the And button includes all rows of criteria in the search results grid. Selecting the Or button includes specified criteria of the selected expressions/groups in the search results grid.*
- Use ▼ to change the criteria. *The data included is based on the Basic Search entry. Select ▼ to change the advanced search criteria.*
- Select Add Expression. *Adds another expression row to the search criteria grid.*
- Select Add Group. *Adds another group row to the search criteria grid.*
- Repeat the steps as needed.

Delete a Row

- Select ✕. *The row is removed from the search criteria grid.*

- Select Search. *The results appear in the **Requisition Search Results** grid.*

Add a Requisition Order

Select + Add. *The **Add Requisition** page appears.*

Update a Requisition Order

1. Click ☐ to select the entry. *The DOC NBR is highlighted, and* Edit *and* Delete *become available.*

> **Note**
> Edit becomes available when the Status is "Draft Orders".

2. Select Edit. *The **Edit Requisition** page appears.*

Delete a Requisition Order

1. Click ☐ to select the entry. *The DOC NBR is highlighted, and* Edit *and* Delete *become available.*

> **Note**
> Delete becomes available when the Status is "Draft Orders".

2. Select Delete. *The **Delete a Requisition** pop-up window appears.*

Review the Requisition Details

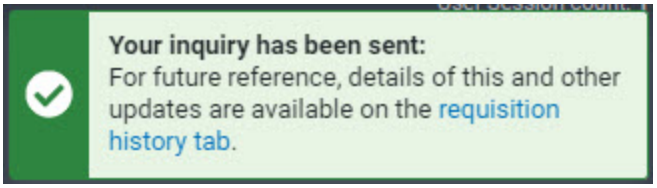

Select the DOC NBR hyperlink. *The **Requisition Review** page appears.*

View the Requisition Inquiry

1. Click ☐ to select the entry. *The DOC NBR is highlighted, and* Inquiry *becomes available.*

> **Note**
> Inquiry becomes available when the Status is "Requested" or "Cancelled".

2. Select Inquiry. *The Inquiry pop-up window appears.*

> **Note**
> To view the inquiry, select the requisition history tab hyperlink or select the DOC NBR hyperlink. *The **Requisition Review** page appears.* Select the History tab to view the inquiry.

Procedures

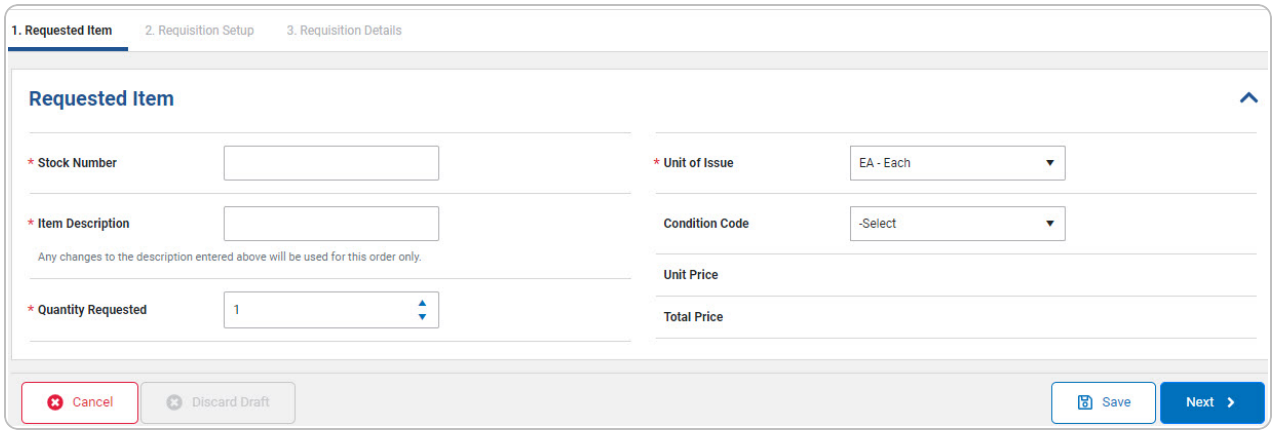

ELMS Navigation Helpful Tips

Click the following link to display M&U Navigation Tips.

Update a MICAP (NOR)

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*

1. Select MICAP Updates (NOR). *The **MICAP Updates (NOR)** slide-out window appears.*

2. *Verify the Requisition Summary grid.*
   A. *Verify the Document NBR.*
   B. *Verify the Stock NBR.*
   C. *Verify the Item DESC.*
   D. *Verify the Work Order NBR.*
3. *Update the NOR Type grid.*
   A. Update the NOR Type, using ▾ to select the desired code.

Helpful Tip

The NOR types are available depending on the UJC for the specific Requisition. The NON-MICAP UJC starts with an A, B, or C value. It does NOT start with a 1 or J value.

- If the requisition's UJC is currently a MICAP, the NOR C, NOR D, and NOR E options display.

- If the MICAP Updates drawer is opened, select NOR C - Update MICAP UJC and Condition Code.

- NOR B & D

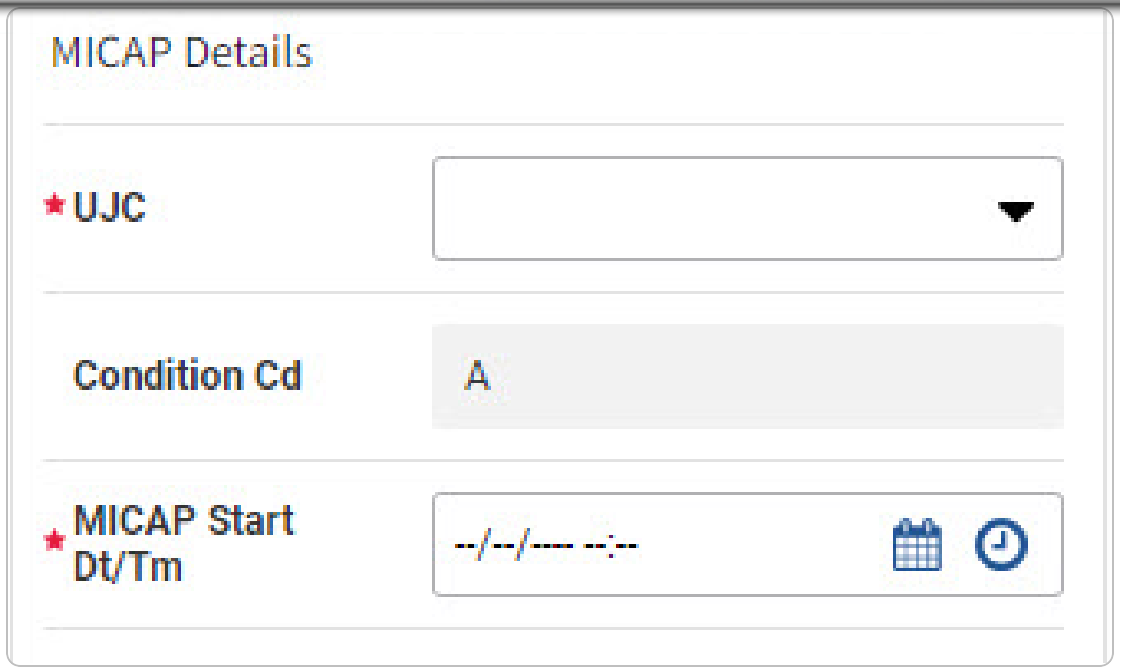

a. *Update the MICAP Details grid.*

1. Update the UJC, using ▾ to select the desired code.

2. Use 📅 🕐 to select the MICAP Start DT/Time, or enter the date (MM/DD/YYYY) in the field provided.

- NOR C

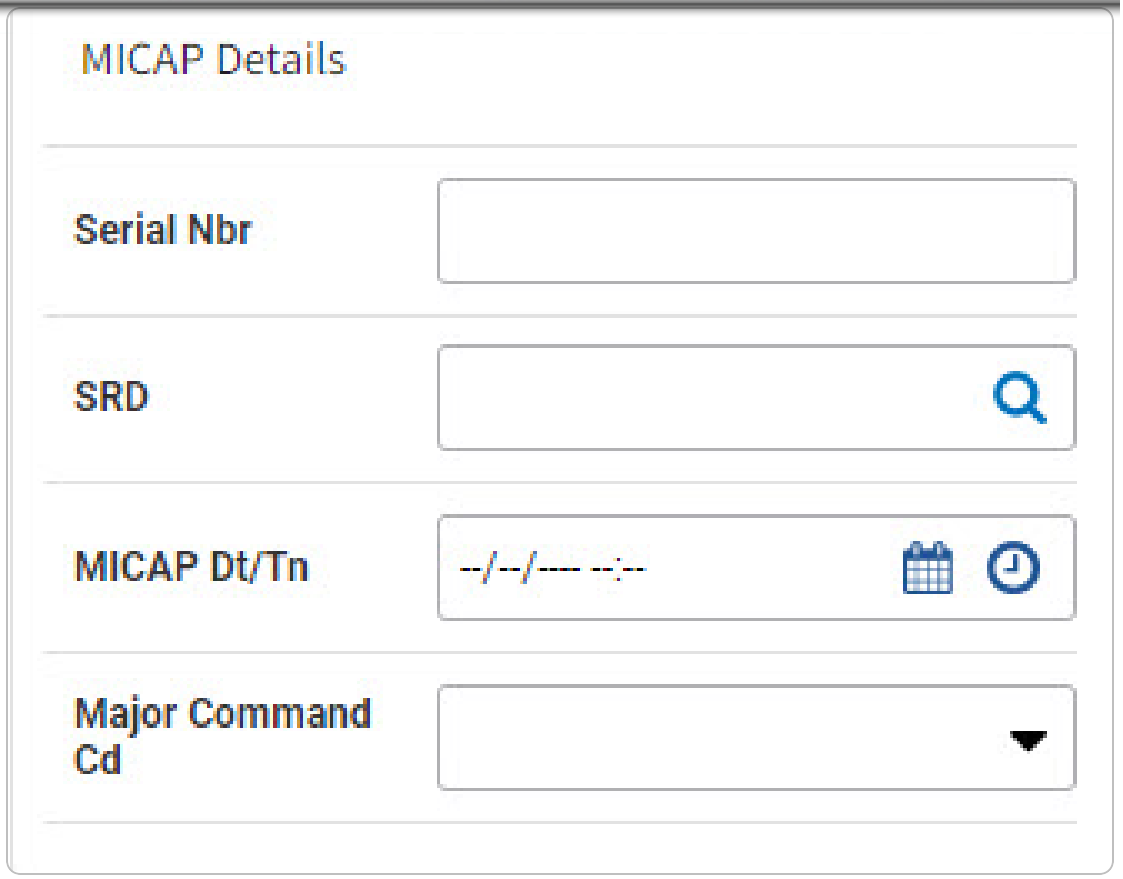

a. *Update the MICAP Details grid.*

1. Update the UJC, using ▾ to select the desired code.

2. *Verify the Condition CD.*

3. Use 📅 🕐 to select the MICAP Start DT/Time, or enter the date (MM/DD/YYYY) in the field provided.

- NOR E

a. *Update the MICAP Details grid.*

1. Update the Serial Number, entering in the revised number in field provided. *This is a 30 alphanumeric character field.*
2. Update the Standard Reporting Designator (SRD), using to browse for the revised entry. *This is a 3 alphanumeric character field.*

   SRD Browse help
3. Use to select the MICAP DT/Time, or enter the date (MM/DD/YYYY) in the field provided.
4. Update the Major Command Cd, using to select the desired code.

4. Select Save. *The **Requisition Review** page reappears and the updated information appears throughout the Requisition Review and/or in the Events grid.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
xxxx — Unable to get off page.	Select Cancel or . *The previous page reappears.*

Search for a Requisition Inquiry

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Use the Inquiries or Search Criteria grid to generate results.

Helpful Tip

The Search Criteria grid defaults to close when entries generated based on the Inquiries criteria appear in the Results grid.

- The Stock NBR - Requests entries automatically appears in the Results grid, if available.
- Select to open the Search Criteria grid. *The **Search Criteria** grid opens.*
- Select to close the Search Criteria grid. *The **Search Criteria** grid closes.*
- Select to close the Results grid. *The **Results** grid closes.*

- Select next to the desired criteria. *Additional options become available.*

Helpful Tip

To view the available records for each inquiry option, hover over the desired option.

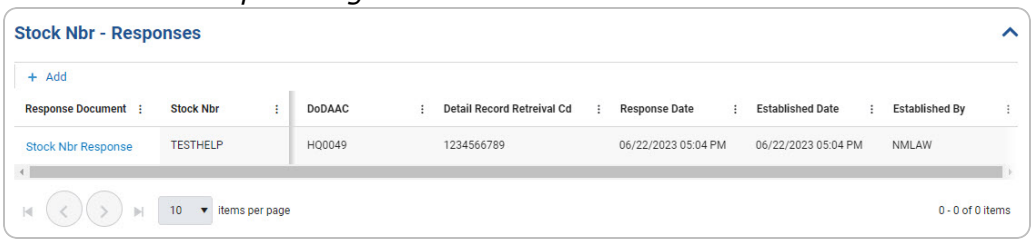

- **Stock Number**
  - Requests

    Select the Requests hyperlink. *The available records appear in the STOCK NBR - Requests grid.*

  - Responses

    Select the Responses hyperlink. *The available records appear in the STOCK NBR - Responses grid.*

    Select the Response Document hyperlink. *The **Response Details** slide-out window appears.*

  - Archived

    Select the Archived hyperlink. *The available records appear in the STOCK NBR - Archived grid.*

Select the Response Document hyperlink. *The **Response Details** slide-out window appears.*

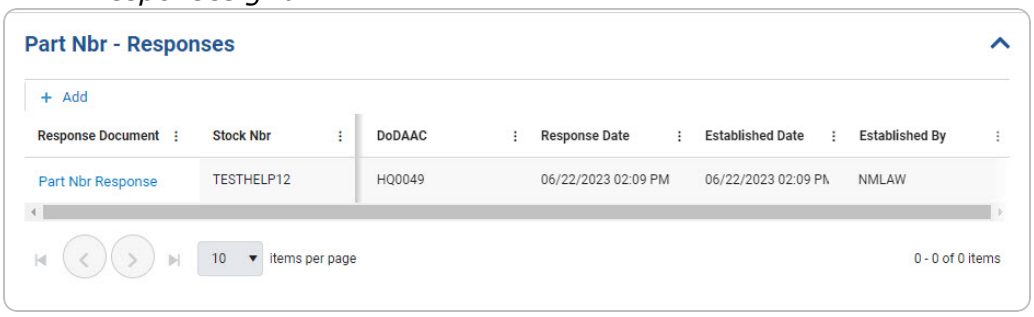

- **Part Number**
  - Requests

    Select the Requests hyperlink. *The available records appear in the Part NBR - Requests grid.*

  - Responses

    Select the Responses hyperlink. *The available records appear in the Part NBR - Responses grid.*

    Select the Response Document hyperlink. *The **Response Details** slide-out window appears.*

  - Archived

    Select the Archived hyperlink. *The available records appear in the Part NBR - Archived grid.*

Select the Response Document hyperlink. *The **Response Details** slide-out window appears.*

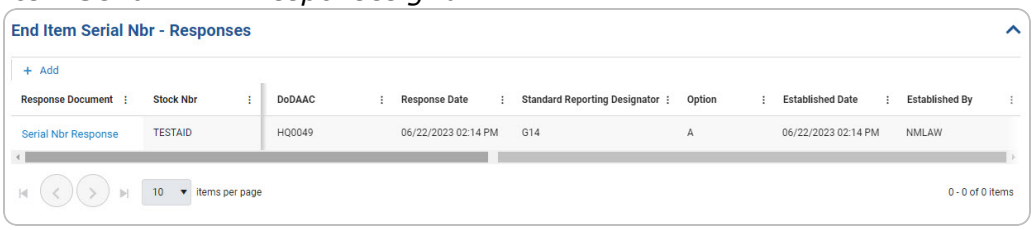

- **End Item Serial Nbr**
  - Requests

    Select the Requests hyperlink. *The available records appear in the End Item Serial NBR - Requests grid.*

  - Responses

    Select the Responses hyperlink. *The available records appear in the End Item Serial NBR - Responses grid.*

Select the Response Document hyperlink. *The **Response Details** slide-out window appears.*

  - Archived

    Select the Archived hyperlink. *The available records appear in the End Item Serial NBR - Archived grid.*

Select the Response Document hyperlink. *The* ***Response Details*** *slide-out window appears.*

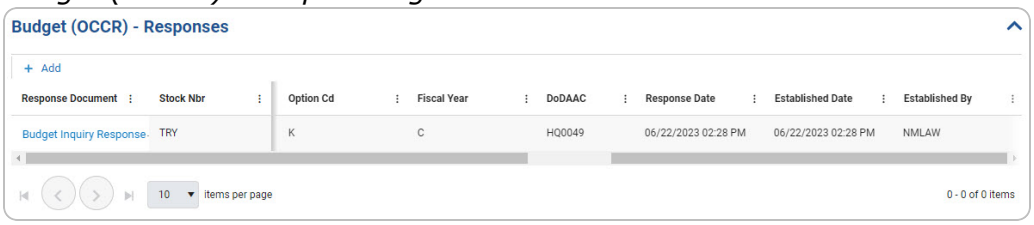

- **Budget (OCCR)**
  - Requests

    Select the Requests hyperlink. *The available records appear in the Budget (OCCR) - Requests grid.*

  - Responses

    Select the Responses hyperlink. *The available records appear in the Budget (OCCR) - Responses grid.*

    Select the Response Document hyperlink. *The* ***Response Details*** *slide-out window appears.*

  - Archived

    Select the Archived hyperlink. *The available records appear in the Budget (OCCR) - Archived grid.*

Select the Response Document hyperlink. *The **Response Details** slide-out window appears.*

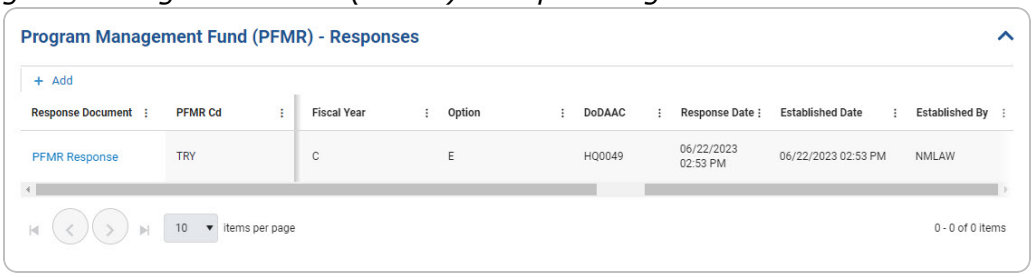

- **Program Management Fund (PFMR)**
  - Requests

    Select the Requests hyperlink. *The available records appear in the Program Management Fund (PFMR) - Requests grid.*

  - Responses

    Select the Responses hyperlink. *The available records appear in the Program Management Fund (PFMR) - Responses grid.*

Select the Response Document hyperlink. *The **Response Details** slide-out window appears.*

  - Archived

    Select the Archived hyperlink. *The available records appear in the Program Management Fund (PFMR) - Archived grid.*

Select the Response Document hyperlink. *The **Response Details** slide-out window appears.*

OR

Select to display the Search Criteria. *The Search Criteria grid appears.*

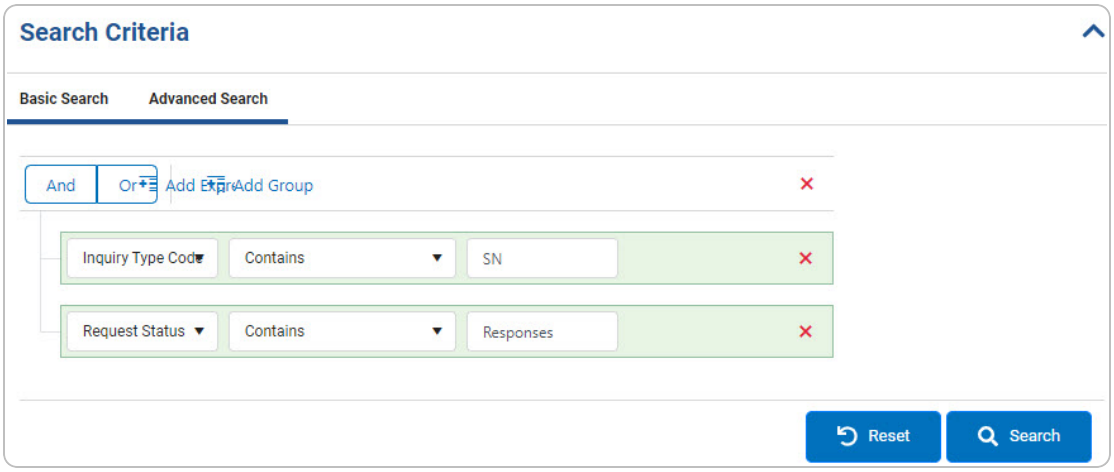

- Enter the Established By in the field provided. *This is a 25 alphanumeric character field.*
- Enter the Established DT FR/To, or use the calender to search for the date. *This is a 8 numeric character field.*
- Select Search. *The results display in the **STOCK NBR - Requests** grid.*

OR

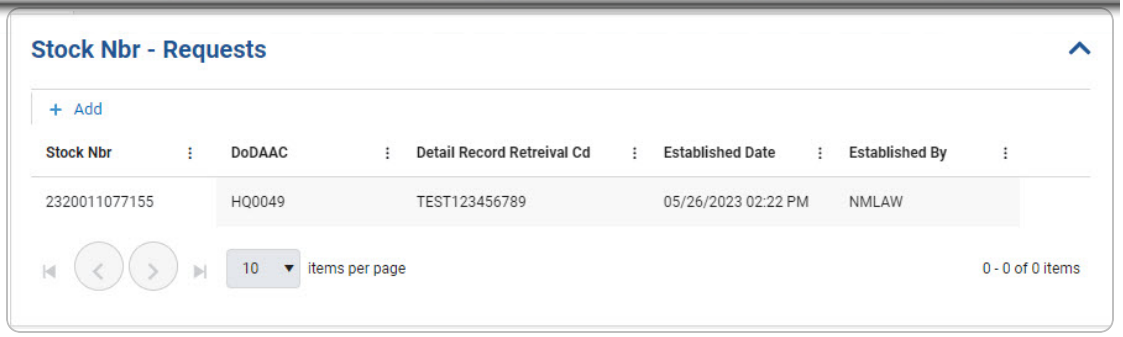

Select the Advanced Search tab.

- Select And Or. *Selecting the And button includes all rows of criteria in the search results grid. Selecting the Or button includes specified criteria of the selected expressions/groups in the search results grid.*
- Use ▾ to change the first criteria row. *The data included is based on the Basic Search entry. Select ▾ to change the advanced search criteria.*
- Use ▾ to change the second criteria row. *The data included is based on the Basic Search entry. Select ▾ to change the advanced search criteria.*
- Select Add Expression. *Adds another expression row to the search criteria grid.*
- Select Add Group. *Adds another group row to the search criteria grid.*
- Repeat the steps as needed.

Delete a Row

- Select ✕. *The row is removed from the search criteria grid.*
- Select Search. *The results appear in the **STOCK NBR - Requests** grid.*

Add a Requisition Inquiry Record

Select + Add. *The **Add Inquiry** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.

Search for an Equipment Pool — Criteria

Overview

The Maintenance and Utilization module Equipment Pool process provides the ability to add, update and delete Equipment Pools. The Equipment Pool exists to permit the grouping of property with the Point of Contact (POC) information to allow for the management of Dispatches (Issue/Return). A Maintenance Activity (MA) can have multiple Equipment Pools. When new assets are profiled in the Maintenance Asset Master process, the asset becomes available for association with an Equipment Pool. Maintenance personnel may have their access restricted where they can only see specific Equipment Pools. This is accomplished in the User Equipment Pool process in conjunction with the ELMS Roles Request Form.

Helpful Tip

Prior to adding an Equipment Pool, an address can be created to populate the POC information on the Add page. Select Master Data > Address > Address Type > EP - Equipment Pool.

Navigation

Master Data > Equip Pool > Equipment Pool Search Criteria page

Page Fields

The following fields display on the **Equipment Pool Search Criteria** page. For more information on each field, select the appropriate hyperlink.

Instructions

Search for an Operator/Technician — Criteria

Overview

The Maintenance and Utilization module Operator/Technician process provides the ability to add, update, and delete Operator and Technician information, designate personnel as Operators and/or Technicians, and associate the corresponding Licenses and/or Certifications to the designated personnel.
The Operator/Technician Identifier (OPR/TECH ID), an alias for the Operator/Technician Name, is an unique value within a Maintenance Activity and cannot be duplicated. The OPR/TECH ID is used in assigning Operators to Dispatches and Technicians to Work Orders.
When creating a plan for assigning the OPR/TECH IDS, the concept is to devise a schema that is easily remembered. The following is an example of a possible schema:
Example: A concept that would work well is using the first three characters of the person's last name and the first three characters of the first name followed by a two digit sequential number. An example would be a person with the name of 'John Smith' having an Id of 'smijoh01'.

Note

Certifications and Licensing must be built before they can be used in association with Operators and Technicians to denote the skill(s)/license(s) of the Operator/Technician.

Navigation

Update an Operator/Technician

Overview

The Operator/Technician Update process allows editing of records to designate personnel as Operators and/or Technicians and associate the corresponding Licenses and/or Certifications, respectively.
The Available Certificate(s)/License(s) tab provides an alphabetical listing of Available Certificate(s)/License(s) to add to a record. A *No Certificate(s)/License(s) Available* displays when no records exist.
The Operator Technician Update page allows modification to fields in the following sections:

- Personnel Info - general information about the Operator or Technician.
- Available Certificate(s)/License(s) Tab - Allows for the addition of credentials for each Operator or Technician.
- Labor Categories Tab - Provides the ability to specify hourly rates using previously established Labor Categories.
- Schedule - Provides the ability to create a schedule for each Operator or Technician.

Update an Operator/Technician

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*

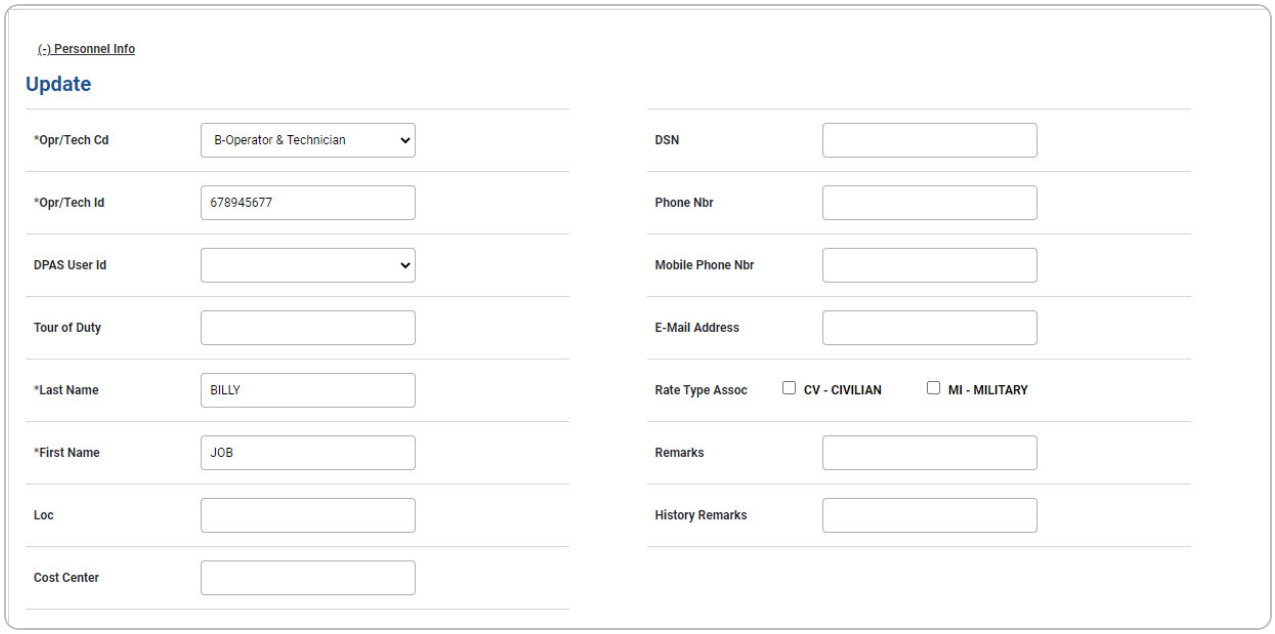

Selecting Reset *at any point of this procedure returns all fields to the default setting.*

Helpful Tip

Select Personnel Info to hide/display the upper section.

1. Select the Update hyperlink. *The **Update an Operator/Technician** page appears.*

A. Update the Opr/Tech Cd, using ⌄ to select the desired code.

B. Update the OPR/TECH ID, entering the revised identifier in the field provided. *This is a 25 alphanumeric character field.*

C. Update the ELMS User Id, using ⌄ to select the desired identifier.

D. Update the Tour of Duty, entering the revised information in the field provided. *This is a 25 alphanumeric character field.*

E. Update the Last Name, entering the revised name in the field provided. *This is a 50 alphanumeric character field.*

F. Update the First Name, entering the revised name in the field provided. *This is a 50 alphanumeric character field.*

G. Update the LOC, entering the revised location in the field provided. *This is a 20 alpha-numeric character field.*

H. Update the Cost Center, entering the revised information in the field provided. *This is a 25 alphanumeric character field.*

I. Update the DSN, entering the revised number in the field provided. *This is a 20 alphanumeric character field.*

J. Update the PHONE NBR, entering the revised number in the field provided. *This is a 25 alphanumeric character field.*

K. Update the Mobile PHONE NBR, entering the revised number in the field provided. *This is a 25 alphanumeric character field.*

L. Update the E-Mail Address, entering the revised e-mail in the field provided. *This is a 65 alphanumeric character field.*

M. Verify the Rate Type ASSOC contains the appropriate ☑ or ☐. *This determines the classification of the Operator/Technician.*

a. Verify the CV - Civilian contains the appropriate ☑ or ☐. *This classifies the Operator/Technician as a civilian.*

b. Verify the MI - Military contains the appropriate ☑ or ☐. *This classifies the Operator/Technician as military.*

N. Update the Remarks, entering the revised information in the field provided. *This is a 1024 alphanumeric character field.*

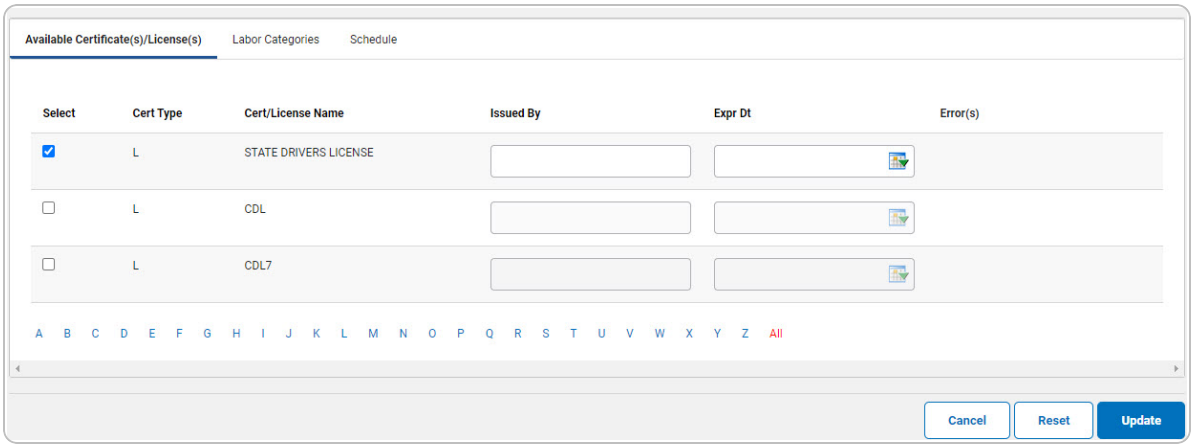

O. Enter the History Remarks in the field provided. *This is a 1024 alphanumeric character field.*

Select Update. *The **View the Operator/Technician Transaction Status** page appears.*

P.

OR

Select the Available Certificate(s)/License(s) tab to continue adding information.

a. Verify the Select contains the appropriate ☑ or ☐. *The Issued By and EXPR DT fields become available.*

b. *Verify the CERT Type.*

c. *Verify the CERT/LICENSE NAME.*

d. Update the Issued By, entering the revised information in the field provided. *This is a 30 alphanumeric character field.*

e. Update the EXPR DT, using 📅 or entering the date (MM/DD/YYYY) in the field provided.

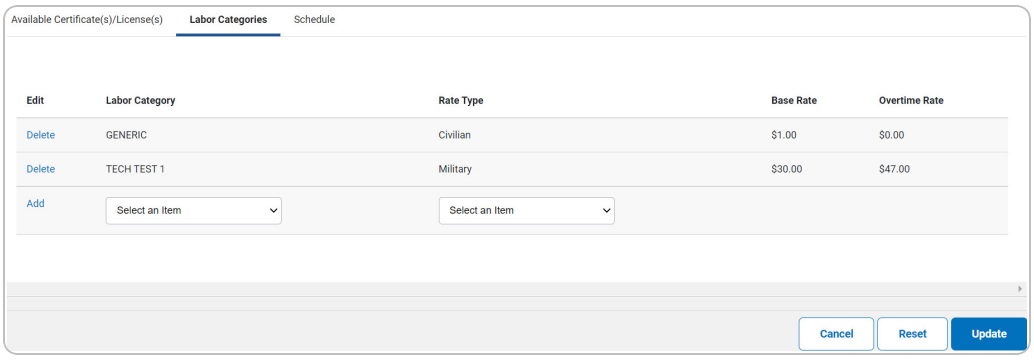

f. *Verify the The Error(s).*

Select Update. *The **View the Operator/Technician Transaction Status** page appears.*

g.

OR

Select the Labor Categories tab to continue adding information.

Note

The Labor Categories fields appear and allow data entry once the Rate Type ASSOCis selected.

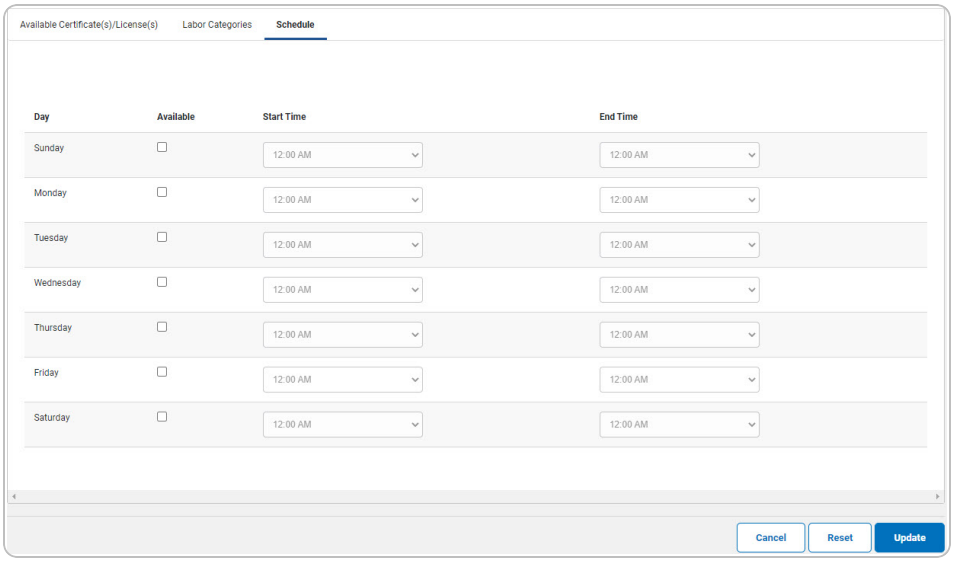

1. Update the Labor Category, using ⌄ to select the desired category.
2. Update the Rate Type, using ⌄ to select the desired rate designation.
3. *Verify the Base Rate.*
4. *Verify the Overtime Rate.*

5. Select the Add hyperlink. *The row becomes read-only and is added to the Labor Categories grid.*

Select Update. *The **View the Operator/Technician Transaction Status** page appears.*

6. **OR**

Select the Schedule tab to continue adding information.

A. Click in the Available field to select the Day to schedule.

B. Update the Start Time, using to select the desired time.

C. Update the End Time, using to select the desired time.

D. Repeat Steps 1-3 for each day as needed.

E. Select Update. *The **View the Operator/Technician Transaction Status** page appears.*

To Remove an Existing Labor Category

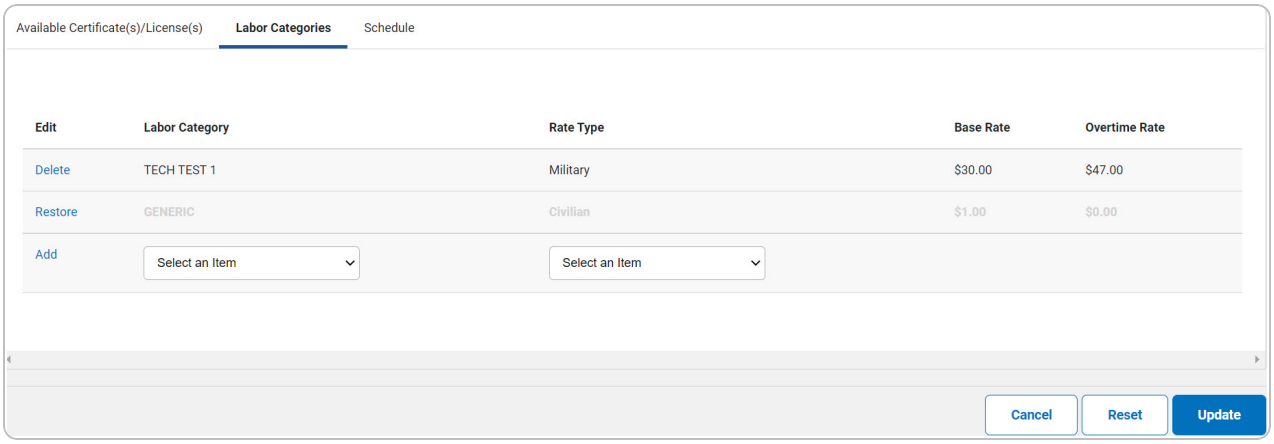

Selecting Cancel at any point of this procedure removes all revisions and closes the page.
***Bold** numbered steps are required.*

Selecting Reset *at any point of this procedure returns all fields to the default setting.*

1. Select the Delete hyperlink of the desired row. *The Delete hyperlink changes to a Restore hyperlink and the row becomes read-only.*

Note

To restore the deleted row, select the Restore hyperlink.

2. Select Update. *The **View the Operator/Technician Transaction Status** page appears.*

Search for a Dispatch Category — Criteria

Overview

The Maintenance and Utilization module Dispatch Category process provides the ability to enable Equipment Pool managers to assign a user-defined category to assets to create multiple groups of assets, as well as multiple SUB Categories per Dispatch Category. The DISPATCH CATEGORY ID cannot be duplicated in a Maintenance Activity. SUB Categories cannot be duplicated within the Dispatch Category. An example includes:

Dispatch Category:
- Passenger Vehicle

SUB Category:
- 2 Passenger Coupe
- 2 Passenger Compact

2. *Verify the Record grid.*

A. *Verify the ASSET ID.*

B. *Verify the STK NBR.*

C. *Verify the VIN.*

D. *Verify the Process Status CD.*

E. *Verify the Details.*

3. *Update the Vehicle Information grid.*

A. Update the Vehicle Class Tag, entering the revised class tag in the field provided. *This is a 15 alphanumeric character field.*

B. Update the Vehicle DESC, entering the revised description in the field provided. *This is a 250 alphanumeric character field.*

C. Update the MFR NM, entering the name in the field provided. *This is a 36 alpha-numeric character field.*

D. Update the MDL NBR, entering the number in the field provided. *This is a 20 alpha-numeric character field.*

E. Update the MDL YR, entering the year in the field provided. *This is a 4 numeric character field.*

F. Update the Vehicle Ownr Cd, using ⌄ to select the desired code.

G. Update the EISA Acq Cd, using Use ⌄ to select the desired code.

H. Update the Vehicle Armor Cd, using ⌄ to select the desired code.

I. Update the Exec Vehicle Cd, using ⌄ to select the desired code.

J. Verify the GSA Report UTIL contains the appropriate ☑ or ☐. *This specifies if the asset uses FAST to report the utilization.*

K. Update the EPAct Coverage Cd, using ⌄ to select the desired code.

L. Update the Vehicle Type, using ⌄ to select the desired vehicle type.

M. Update the Fuel Config Cd, using ⌄ to select the desired code.

N. Update the Fuel Fleet Type Cd One, using ⌄ to select the desired code.

O. Update the Fuel Fleet Type Cd Two, using ⌄ to select the desired code.

P. Verify the EMER RESPONSE VEH contains the appropriate ☑ or ☐. *This specifies if the asset is designated as Emergency Response (S-7).*

Q. Verify the LAW ENFRCMT VEH contains the appropriate ☑ or ☐. *This specifies if the asset is designated as Law Enforcement (S-6).*

R. Update the EO 13693 Designation, using ⌄ to select the desired designation.

S. Update the Vehicle Age AMT, entering the revised amount in the field provided. *This is a 3 numeric character field.*

T. Verify the Acquired contains the appropriate ☑ or ☐. *This specifies if the asset was obtained during the current Fiscal Year (checked).*

U. Verify the Disposed contains the appropriate ☑ or ☐. *This specifies if the asset was disposed of during the current Fiscal Year (checked).*

V. Update the Vehicle LOC, entering the revised location in the field provided. *This is a 20 alphanumeric character field.*

W. Update the Vehicle LOC ZIP, entering the revised code in the field provided. *This is a 10 alphanumeric character field.*

X. Update the Vehicle LOC Street 1, entering the revised street information in the field provided. *This is a 25 alphanumeric character field.*

Y. Update the Vehicle LOC Street 2, entering the revised street information in the field provided. *This is a 25 alphanumeric character field.*

Z. Update the Vehicle LOC City, entering the revised city in the field provided. *This is a 22 alphanumeric character field.*

AA. Update the Vehicle LOC State, entering the revised state in the field provided. *This is a 5 alphanumeric character field.*

AB. Update the Vehicle LOC LTD, entering the revised latitude in the field provided. *This is a 5 alphanumeric character field.*

AC. Update the Vehicle LOC LNG, entering the revised longitude in the field provided. *This is a 5 alphanumeric character field.*

AD. Update the ACQ CST AMT, entering the revised amount in the field provided. *This is a 15 numeric character field.*

AE. Update the Fuel Unit Cd One, using ⌄ to select the desired fuel code.

AF. Update the Fuel Unit Cd Two, using ⌄ to select the desired fuel code.

AG. Update the Fuel State Cd, using ⌄ to select the desired fuel state code.

AH. Update the Fuel ZIP Cd, entering the revised code in the field provided. *This is a 10 alphanumeric character field.*

AI. Update the Tot FY to Dt Deprn, entering the revised date in the field provided. *This is a 5 numeric character field.*

AJ. Update the Tot FY to Dt Maint Labor, entering the revised labor information in the field provided. *This is a 5 numeric character field.*

AK. Update the Tot FY to Dt Maint Non-Labor, entering the revised non-labor information in the field provided. *This is a 5 numeric character field.*

AL. Update the Tot FY to Dt Lease, entering the revised lease information in the field provided. *This is a 3 numeric character field.*

AM. Update the Tot FY to Dt Fuel Use Qy One, entering the revised quantity in the field provided. *This is a 10 numeric character field.*

AN. Update the Tot FY to Dt Fuel Use Qy Two, entering the revised quantity in the field provided. *This is a 10 numeric character field.*

AO. Update the Tot FY to Dt Fuel Cst One, entering the revised cost in the field provided. *This is an 18 numeric character field.*

AP. Update the Tot FY to Dt Fuel Cst Two, entering the revised cost in the field provided. *This is an 18 numeric character field.*

AQ. Update the Tot FY to Dt Mileage, entering the revised mileage in the field provided. *This is an 18 numeric character field.*

AR. Verify the Location Withheld contains the appropriate ☑ or ☐. *This specifies if the asset is secretive enough that the whereabouts cannot be known.*

AS. Update the Gross Vehicle Weight Requirement, entering the revised weight requirement in the field provided. *This is a 5 numeric character field.*

AT. Update the Vehicle Assignment Type, using ⌄ to select the desired vehicle assignment type.

AU. Verify the LGHG AFV Petroleum-Dedicated Vehicles contains the appropriate ☑ or ☐. *This specifies if the vehicle meets all aspects of the definition for purposes of EPAct compliance.*

AV. Update the EPAct 701 Designation, using to select the desired designation.

AW. Update the Accident Repair Cost Amount, entering the revised amount in the field provided. *This is an 18 numeric character field.*

AX. Update the Indirect Cost Amount, entering the revised amount in the field provided. *This is an 18 numeric character field.*

AY. Update the Budget Element Code (BEC), entering the revised code in the field provided. *This is a 32 alphanumeric character field.*

4. Select Save. *The **Edit Record** pop-up window closes, and the updated information is saved.*

Mass Update Selected FAST Outbound Records

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*

1. Select ☐ next to multiple desired records. ☑ *appears.*
2. Select Update. *The* ***Mass Change Grid*** *page appears.*

3. Use ⌄ to select the Field. *When the Field is chosen, the Value field appears.*

4. Enter the Value in the field provided, or use ⌄ or ☐ to select the Value. *The Value field is dependent upon the Field choice. The entry depends upon which Field is chosen.*

A. Update the Vehicle Class Tag, entering the revised class tag in the field provided. *This is a 15 alphanumeric character field.*

B. Update the Vehicle DESC, entering the revised description in the field provided. *This is a 250 alphanumeric character field.*

C. Update the MFR NM, entering the name in the field provided. *This is a 36 alpha-numeric character field.*

D. Update the MDL NBR, entering the number in the field provided. *This is a 20 alpha-numeric character field.*

E. Update the MDL YR, entering the year in the field provided. *This is a 4 numeric character field.*

F. Update the Vehicle Ownr Cd, using ⌄ to select the desired code.

G. Update the EISA Acq Cd, using Use ⌄ to select the desired code.

H. Update the Vehicle Armor Cd, using ⌄ to select the desired code.

I. Update the Exec Vehicle Cd, using ⌄ to select the desired code.

J. Verify the GSA Report UTIL contains the appropriate ☑ or ☐. *This specifies if the asset uses FAST to report the utilization.*

K. Update the EPAct Coverage Cd, using ⌄ to select the desired code.

L. Update the Vehicle Type, using ⌄ to select the desired vehicle type.

M. Update the Fuel Config Cd, using ⌄ to select the desired code.

N. Update the Fuel Fleet Type Cd One, using ⌄ to select the desired code.

O. Update the Fuel Fleet Type Cd Two, using ⌄ to select the desired code.

P. Verify the EMER RESPONSE VEH contains the appropriate ☑ or ☐. *This specifies if the asset is designated as Emergency Response (S-7).*

Q. Verify the LAW ENFRCMT VEH contains the appropriate ☑ or ☐. *This specifies if the asset is designated as Law Enforcement (S-6).*

R. Update the EO 13693 Designation, using ⌄ to select the desired designation.

S. Update the Vehicle Age AMT, entering the revised amount in the field provided. *This is a 3 numeric character field.*

T. Verify the Acquired contains the appropriate ☑ or ☐. *This specifies if the asset was obtained during the current Fiscal Year (checked).*

U. Verify the Disposed contains the appropriate ☑ or ☐. *This specifies if the asset was disposed of during the current Fiscal Year (checked).*

V. Update the Vehicle LOC, entering the revised location in the field provided. *This is a 20 alphanumeric character field.*

W. Update the Vehicle LOCZIP, entering the revised code in the field provided. *This is a 10 alphanumeric character field.*

X. Update the Vehicle LOC Street 1, entering the revised street information in the field provided. *This is a 25 alphanumeric character field.*

Y. Update the Vehicle LOC Street 2, entering the revised street information in the field provided. *This is a 25 alphanumeric character field.*

Z. Update the Vehicle LOC City, entering the revised city in the field provided. *This is a 22 alphanumeric character field.*

AA. Update the Vehicle LOC State, entering the revised state in the field provided. *This is a 5 alphanumeric character field.*

AB. Update the Vehicle LOCLTD, entering the revised latitude in the field provided. *This is a 5 alphanumeric character field.*

AC. Update the Vehicle LOCLNG, entering the revised longitude in the field provided. *This is a 5 alphanumeric character field.*

AD. Update the ACQ CSTAMT, entering the revised amount in the field provided. *This is a 15 numeric character field.*

AE. Update the Fuel Unit Cd One, using ⌄ to select the desired fuel code.

AF. Update the Fuel Unit Cd Two, using ⌄ to select the desired fuel code.

AG. Update the Fuel State Cd, using ⌄ to select the desired fuel state code.

AH. Update the Fuel ZIP CD, entering the revised code in the field provided. *This is a 10 alphanumeric character field.*

AI. Update the TOT FY TO DTDEPRN, entering the revised date in the field provided. *This is a 5 numeric character field.*

AJ. Update the TOT FY TO DTMAINT Labor, entering the revised labor information in the field provided. *This is a 5 numeric character field.*

AK. Update the TOT FY TO DTMAINT Non-Labor, entering the revised non-labor information in the field provided. *This is a 5 numeric character field.*

AL. Update the TOT FY TO DT Lease, entering the revised lease information in the field provided. *This is a 3 numeric character field.*

AM. Update the TOT FY TO DT Fuel Use QY One, entering the revised quantity in the field provided. *This is a 10 numeric character field.*

AN. Update the TOT FY TO DT Fuel Use QY Two, entering the revised quantity in the field provided. *This is a 10 numeric character field.*

AO. Update the TOT FY TO DTFUEL CST One, entering the revised cost in the field provided. *This is an 18 numeric character field.*

AP. Update the TOT FY TO DTFUEL CST Two, entering the revised cost in the field provided. *This is an 18 numeric character field.*

AQ. Update the TOT FY TO DT Mileage, entering the revised mileage in the field provided. *This is an 18 numeric character field.*

AR. Verify the Location Withheld contains the appropriate ☑ or ☐. *This specifies if the asset is secretive enough that the whereabouts cannot be known.*

AS. Update the Gross Vehicle Weight Requirement, entering the revised weight requirement in the field provided. *This is a 5 numeric character field.*

AT. Update the Vehicle Assignment Type, using ⌄ to select the desired vehicle assignment type.

AU. Verify the LGHG AFV Petroleum-Dedicated Vehicles contains the appropriate ☑ or ☐. *This specifies if the vehicle meets all aspects of the definition for purposes of EPACT compliance.*

AV. Update the EPAct 701 Designation, using ⌄ to select the desired designation.

AW. Update the Accident Repair Cost Amount, entering the revised amount in the field provided. *This is an 18 numeric character field.*

AX. Update the Indirect Cost Amount, entering the revised amount in the field provided. *This is an 18 numeric character field.*

AY. Update the Budget Element Code (BEC), entering the revised code in the field provided. *This is a 32 alphanumeric character field.*

5. Select Apply. *The appropriate field changes in the Vehicle grid.*
6. Repeat steps 3 - 5 to revise more fields.
7. Select Update. *The records submit and the **FAST Outbound Display Transaction Status** page appears.*

Upload a Dispatch Rates File

Overview

The Maintenance and Utilization module Dispatch Rates Upload process provides the ability to have maintenance activities include rates for dispatching assets. The ability to identify any errors during the process is also available. The process uses .csv files to upload the data. The process consists of a five step sequence:

1. **File Upload** – Locate the .csv file to upload
2. **Choose Template** – Choose the type of data to convert
3. **Specify Columns** – Match the mandatory columns to the .csv data
4. **Update ELMS** – Upload and initially verify the data
5. **Transaction Results** – Verify the results were processed successfully

Upload the Dispatch Rates file

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.* ***Bold*** *numbered steps are required.*

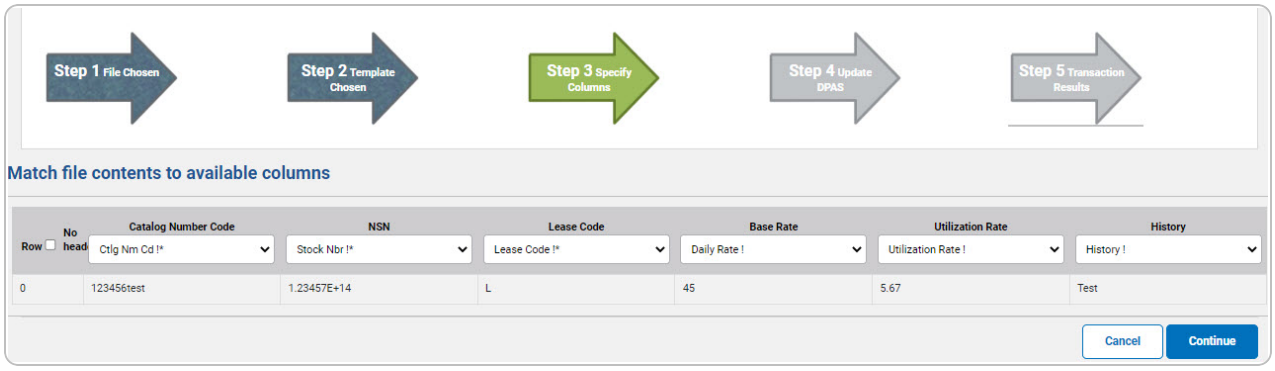

1. Select Choose File in the Upload File Path field. *The Windows* ***Choose File to Upload*** *pop-up window appears.*

2. Choose the .CSV file to attach, and select it.

3. Select Open. *The **Choose File to Upload** pop-up window closes, the file name appears in the Upload File Path field, and the Choose Template step automatically appears.*

4. Use ˅ to select the Dispatch Rates file template. *The Specify Columns step automatically appears, with a grid showing the file's contents.*

5. Click ☐ to select the No Header. *Only select if the .CSV file does NOT have a header row listing the column contents.*

6. Use ˅ to select the correct column indicator for the Catalog Number Code = CTLG NM CD.

7. Use ˅ to select the correct column indicator for the NSN = Stock Nbr.

8. Use ˅ to select the correct column indicator for the Lease Code.

9. Use ˅ to select the correct column indicator for the Base Rate = Daily Rate.

10. Use ˅ to select the correct column indicator for the Utilization Rate.

11. Use ˅ to select the correct column indicator for the History.

12. For all other rows, use ⌄ to select Not Used.

13. Select Continue. *The file upload starts validating.*

If the validation fails:

A. The following symbols specify the error for the individual cell:

- ⚠ — Error
- — Invalid Data Type
- — Data not found in Look up
- — Value Required
- — Max Length of field exceeded. Max Length: x

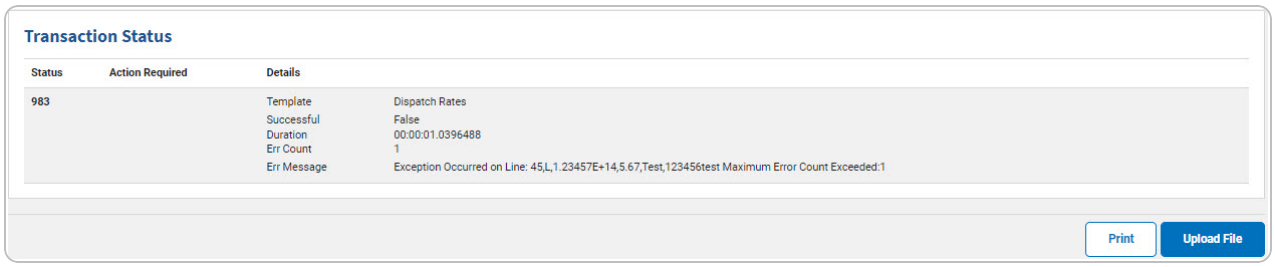

B. Select Cancel twice to return to the **File Upload** page.

C. Review and edit the original .csv file outside of ELMS.

D. Return to Step 1.

If the validation passes:
The Click Update to finalize and check for upload errors step appears.

14. Select Update. *The file is finalized, checked for errors, and the Transaction Results step appears.*

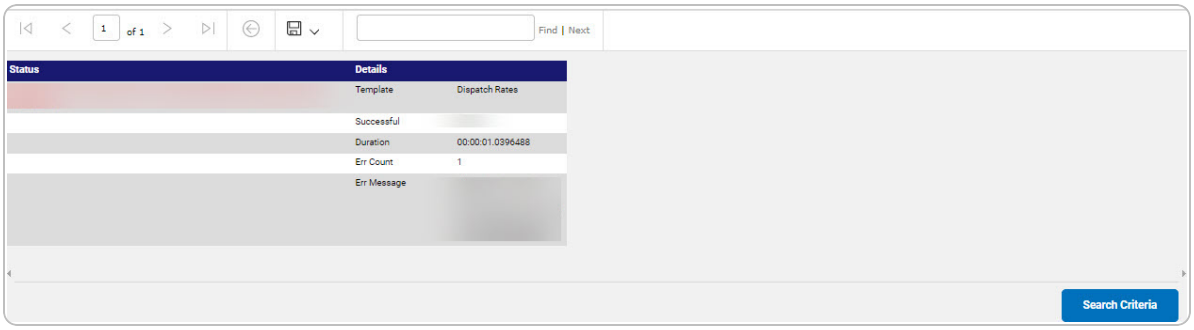

*If the file **does not** pass validation:*

A. Review and edit the original .csv file outside of ELMS.

B. Select Upload File. *The page returns to the **File Upload** page, and repeat the process with the revised file.*

*If the file **does** pass validation:*

A. Select Print to print a report of the transaction. *The **Print a File Upload** page appears.*

B. Select Search Criteria. *The **File Upload** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
xxxx — Only CSV (Comma Delimited) and XLS (Excel 97 - 2003) files can be uploaded.	Invalid File Format. Only CSV or XLS files can be uploaded. Choose a different file to upload.
13 — Mandatory Entry: *Stock Nbr*.	Missing Entry. The template columns must have one of each of the required column headers selected. Choose a column for the missing header.
13 — Mandatory Entry:	

***Lease Code*.**	
13 — Mandatory Entry: *Daily Rate*.	
13 — Mandatory Entry: *Base Rate*.	
13 — Mandatory Entry: *History*.	
13 — Mandatory Entry: *CTLG NM CD*.	
13 — Mandatory Entry: *Utilization Rate*.	
13 — Mandatory Entry: *NSN*.	
983 — USER ID must be 1 — 25 alpha/numeric with supported special character(s) # and underscore.	Invalid Entry. The USER ID needs to have between 1-25 alphanumeric characters including supported characters and an underscore. Re-enter the USER ID.
xxxx — Duplicate Column Header.	Invalid Selection. Each column must have a unique data element name. Select a valid choice from the drop-down menu.
xxxx — No header is selected.	Missing Entry. Select the required header to determine the type of validation to apply and target table column to store the value. Select a

	header from the drop-down menu.
xxxx — Required Column not selected.	Invalid Entry. The template requires specific columns to be selected. Select the required columns.
xxxx — Edit Validation Error.	Invalid Cell Contents. The value in the cell failed the validation edit. Click the icon to show the error, and re-enter the value.
xxxx — File upload error occurred. Please review data in error rows(s) of spreadsheet.	This indicates there is an issue with the data in the .csv file. An example of a possible issue is that the Stock Number listed in the .csv file is not profiled in the Maintenance Asset Master process.
83 — Unexpected error encountered, contact ELMS Call Center for assistance.	Contact the ELMS Call Center

Upload a Vehicle Diagnostics File

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.* ***Bold*** *numbered steps are required.*

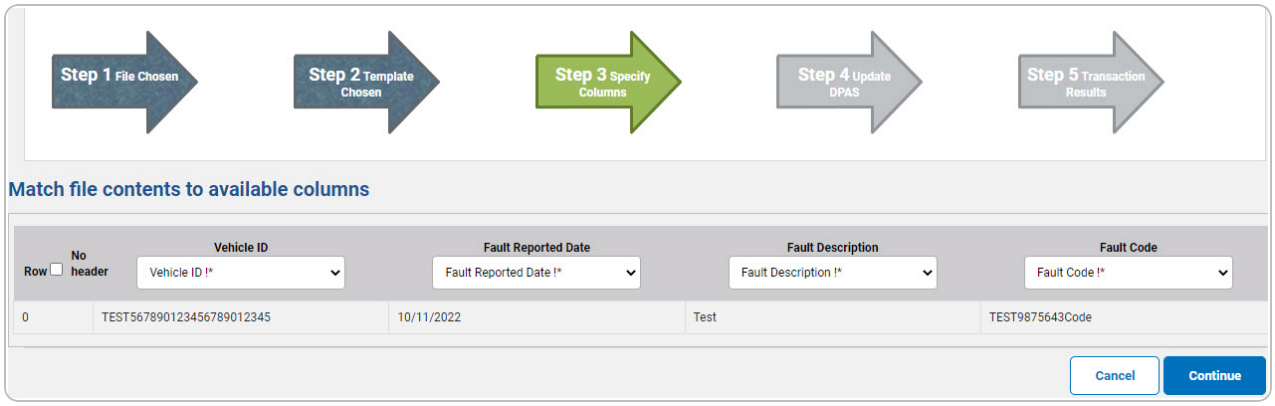

1. Select Choose File in the Upload File Path field. *The Windows* ***Choose File to Upload*** *pop-up window appears.*

2. Choose the .csv file to attach, and select it.

3. Select Open. *The **Choose File to Upload** pop-up window closes, the file name appears in the Upload File Path field, and the Choose Template step automatically appears.*

4. Use ˅ to select the Vehicle Diagnostics file template. *The Specify Columns step automatically appears, with a grid showing the file's contents.*

5. Click ☐ to select the No Header. *Only select if the .csv file does NOT have a header row listing the column contents.*

6. Use ˅ to select the correct column indicator for the Vehicle ID.

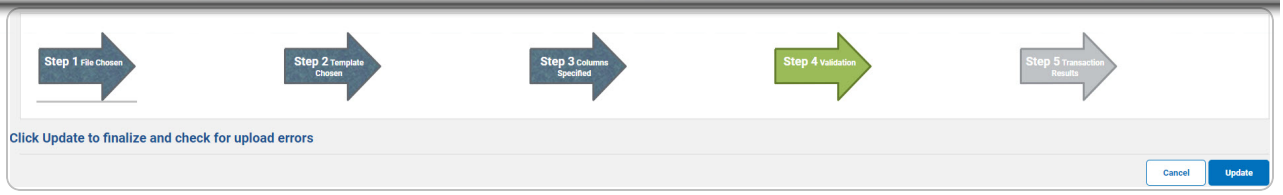

7. Use ˅ to select the correct column indicator for the Fault Reported Date.

8. Use ˅ to select the correct column indicator for the Fault Description.

9. Use ˅ to select the correct column indicator for the Fault Code.

10. For all other rows, use ˅ to select Not Used.

11. Select Continue. *The file upload starts validating.*

If the validation fails:

A. The following symbols specify the error for the individual cell:

- — Error
- — Invalid Data Type
- — Data not found in Look up
- — Value Required
- — Max Length of field exceeded. Max Length: x

B. Select Cancel twice to return to the **File Upload** page.

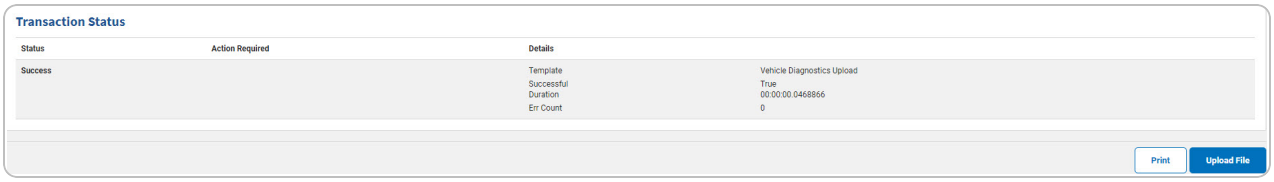

C. Review and edit the original .csv file outside of ELMS.

D. Return to Step 1.

If the validation passes:
The Update ELMS step appears.

12. Select Update. *The file is finalized, checked for errors, and the Transaction Results step appears.*

*If the file **does not** pass validation:*

A. Review and edit the original .csv file outside of ELMS.

B. Select Upload File. *The page returns to the **File Upload** page, and repeat the process with the revised file.*

*If the file **does** pass validation:*

A. Select Print to print a report of the transaction. *The **Print a File Upload** page appears.*

B. Select Search Criteria. *The **File Upload** page appears.*

Common Errors

Search for a JOB ORDER NBR Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

   A. *The first Available Field(s) option (MAINT ACTIVITY/OWNING UIC) automatically populates and is not editable.*

   B. Use ⌄ to select the second Available Field.

   C. Repeat Step B to add additional search criteria.

> **Note**
>
> Adding another Available Field ⌄ automatically populates an additional search criteria row.

> **Note**
>
> Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Use ⌄ to select the second Operands.

C. Repeat Step B to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use ⌄ to select the first Search Value.

B. Use ⌄ to select the second Search Value.

C. Repeat Step B to add additional search criteria.

Remove an Available Field Row

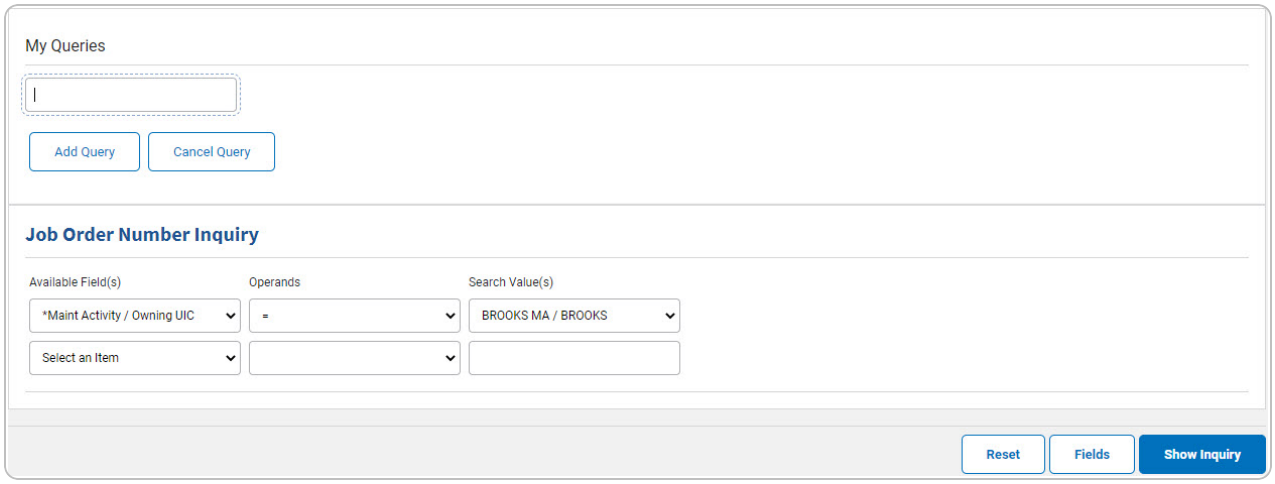

a. Use ⌄ to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Job Order Nbr Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*

2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*

4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*

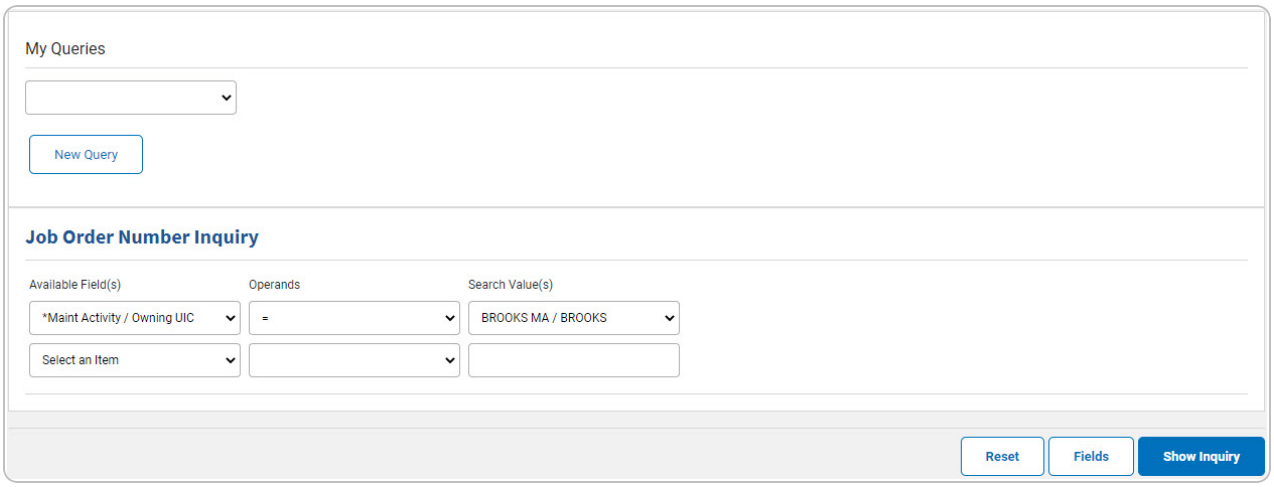

5. Select Fields. *The* ***Job Order Nbr Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Job Order Nbr Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*

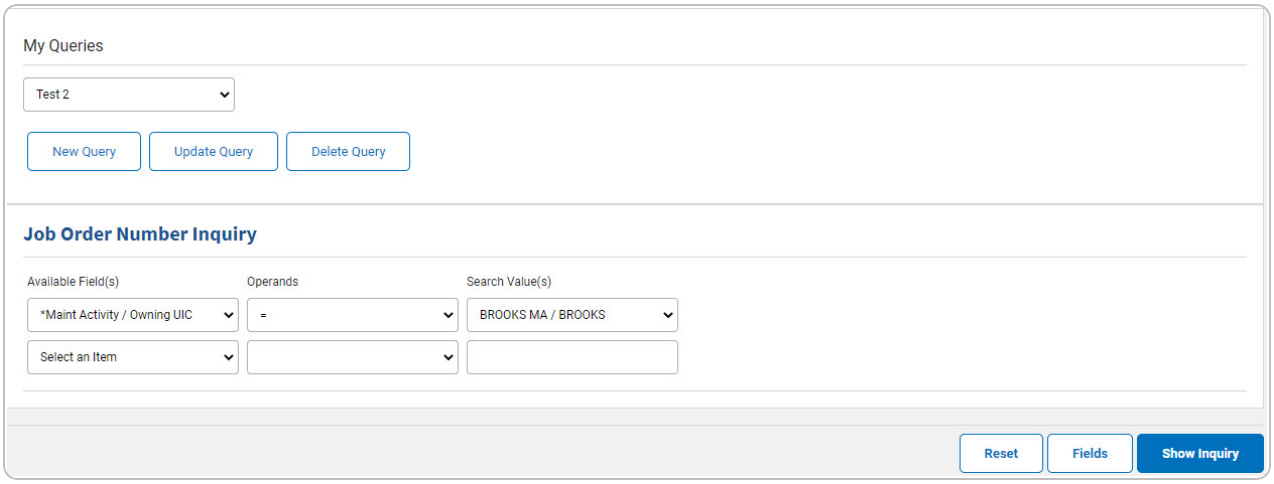

2. Select Fields. *The* ***Job Order Nbr Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Job Order Nbr Inquiry — Results*** *page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

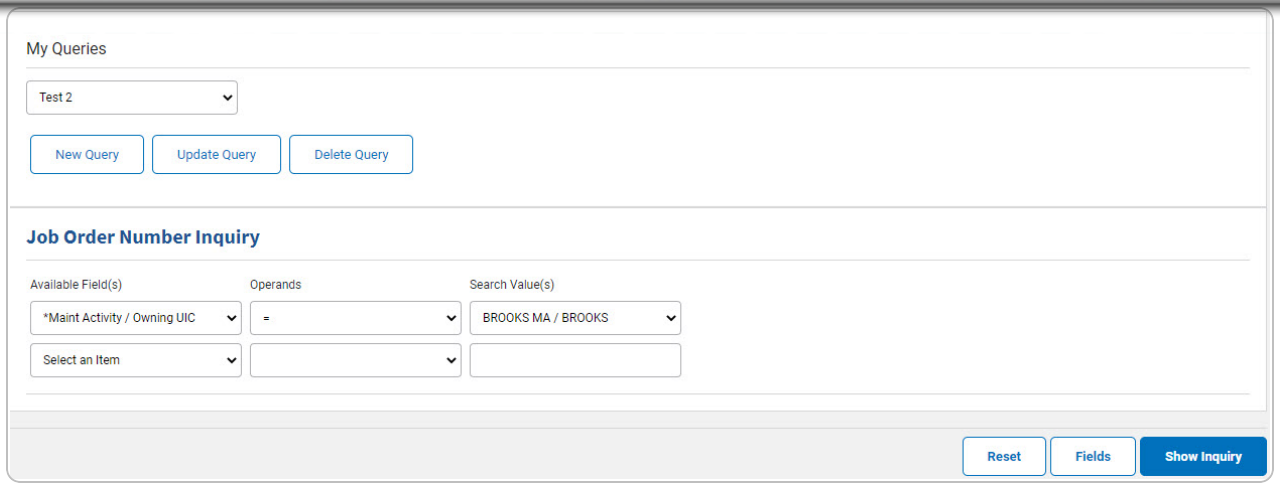

2. *Add and/or Remove rows in the Search Criteria grid as needed.*
3. Select Update Query*. The query information is updated.*
4. Select Fields*. The* ***Job Order Nbr Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry*. The* ***Job Order Nbr Inquiry — Results*** *page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Job Order Number Inquiry — Select Fields** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..

13 — Mandatory Entry: *Available Field(s)*.	
13 — Mandatory Entry: *Operands*.	Missing Entry. No data was entered. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Query Name*.	
xxxx – Saved Inquiry already exists. Select Update Query **or** Delete Query **.**	Invalid Entry. The inquiry already exists in the database. Use the existing inquiry, or select Update Query to revise the existing query.
102 — Inquiry already exists.	Invalid entry. The Inquiry is already established. Re-enter the inquiry or select Update Query or Delete Query to modify the existing inquiry.
106 — Operand must be =, >, <, >= , <= , <>, or Like.	Missing Entry. The Field value was entered, but no operand was selected. Choose an operand from the drop-down menu.
31 — To perform Search, data must be entered in one or more fields.	Missing Entry. At least one field is necessary to perform the search. Enter at least one field, then select the Search button.

ELMS Navigation Helpful Tips

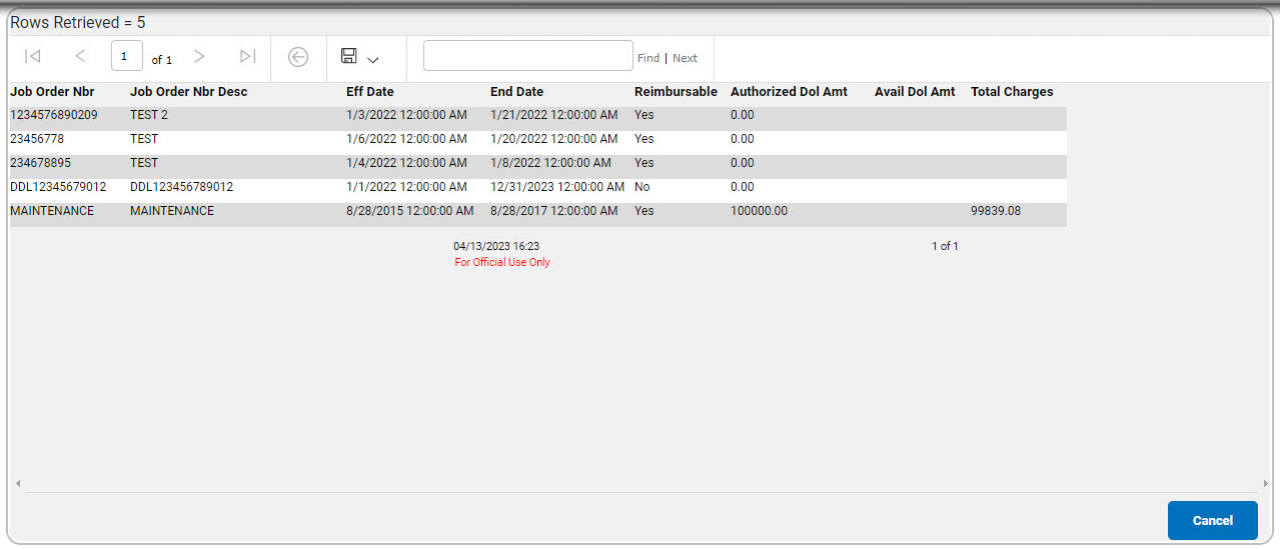

Click the following link to display M&U Navigation Tips.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **JOB ORDER NBR Inquiry** page appears.*

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

OR

Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select [New Selection List]. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting [Cancel Selection] at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select [Add Selection List]. *The page refreshes, and the selected list is added.* [Add Selection List] *is replaced by* [Update Selection List] *and* [Delete Selection List].

   Select [Show Inquiry] for small volumes of data. *The **Job Order Nbr Inquiry — Results** page appears.*
5.

OR

Select Submit for large volumes of data. *The **Job Order Nbr Inquiry Transaction Status** page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

   Select Show Inquiry for small volumes of data. *The **Job Order Nbr Inquiry — Results** page appears.*

3. **OR**

   Select Submit for large volumes of data. *The **Job Order Nbr Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The **Job Order Nbr Inquiry — Results** page appears.*

4. **OR**

   Select Submit for large volumes of data. *The **Job Order Nbr Inquiry Transaction Status** page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

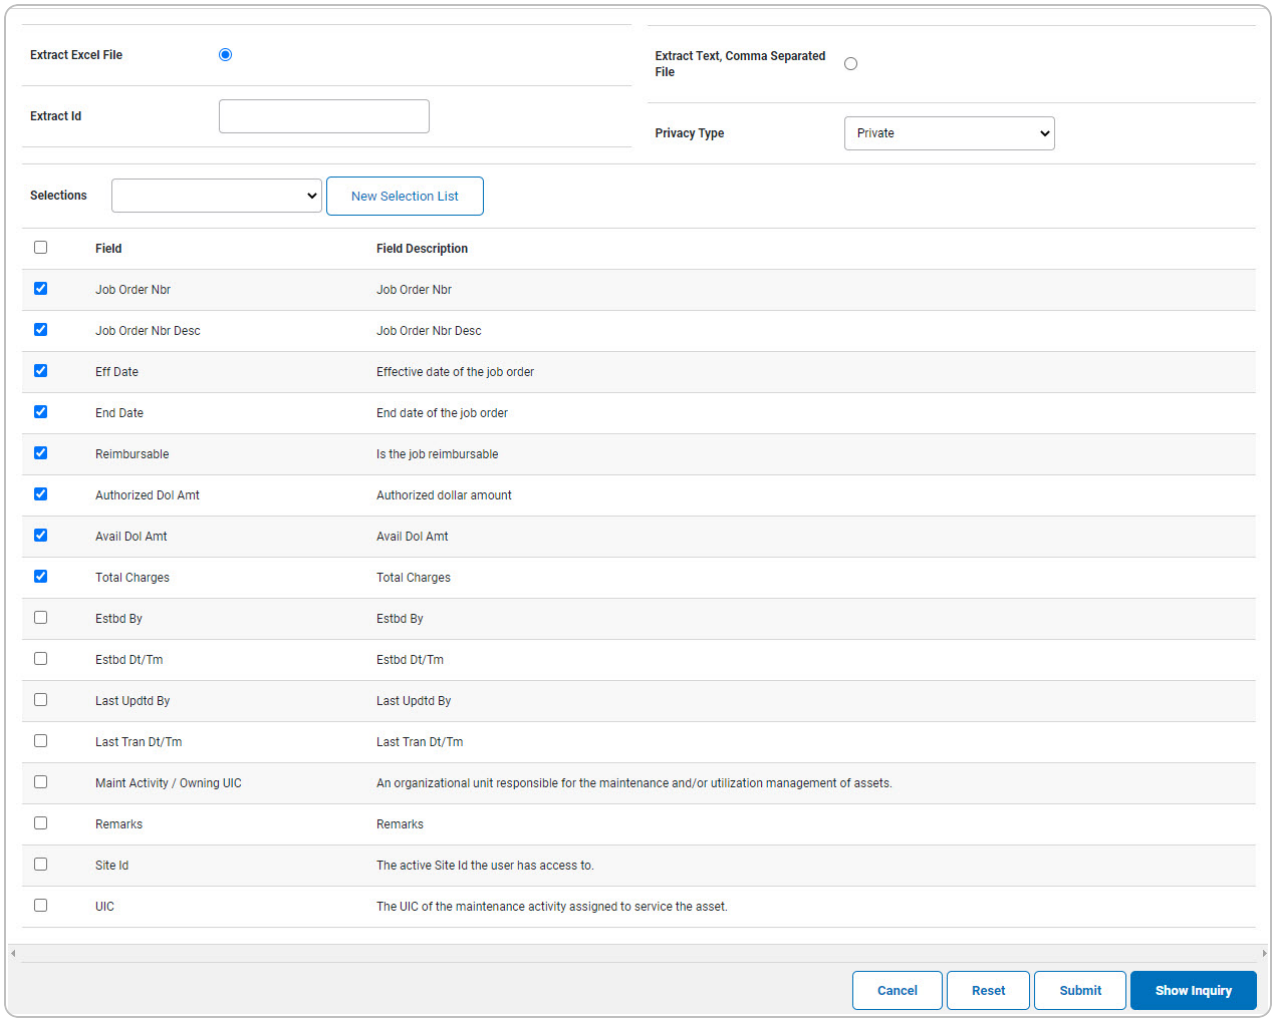

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
***Bold** numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **JOB ORDER NBR Inquiry** page appears.*

2. Select the fields required for the inquiry. *The first 8 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the JOB ORDER NBR contains the appropriate ☑ or ☐. *Select if the inquiry contains a JOB ORDER NBR.*

- Verify the JOB ORDER NBR DESC contains the appropriate ☑ or ☐. *Select if the inquiry contains a JOB ORDER NBR DESC.*
- Verify the EFF DT contains the appropriate ☑ or ☐. *Select if the inquiry contains an effective date.*
- Verify the End Date contains the appropriate ☑ or ☐. *Select if the inquiry has an end date.*
- Verify the Reimbursable contains the appropriate ☑ or ☐. *Select if the inquiry contains a reimbursable designation.*

Search for an Asset Preventive Maintenance Schedule Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

   A. *The first Available Field(s) option (MAINT ACTIVITY NAME) automatically populates and is not editable.*

   B. Use ⌄ to select the second Available Field.

   C. Repeat Step B to add additional search criteria.

> **Note**
> Adding another Available Field ⌄ automatically populates an additional search criteria row.

> **Note**
> Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

   A. Use ⌄ to select the first Operands.

   B. Use ⌄ to select the second Operands.

   C. Repeat Step A to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use ⌄ to select the first Search Value.

B. Use ⌄ to select the second Search Value.

C. Repeat Step A to add additional search criteria.

Remove an Available Field Row

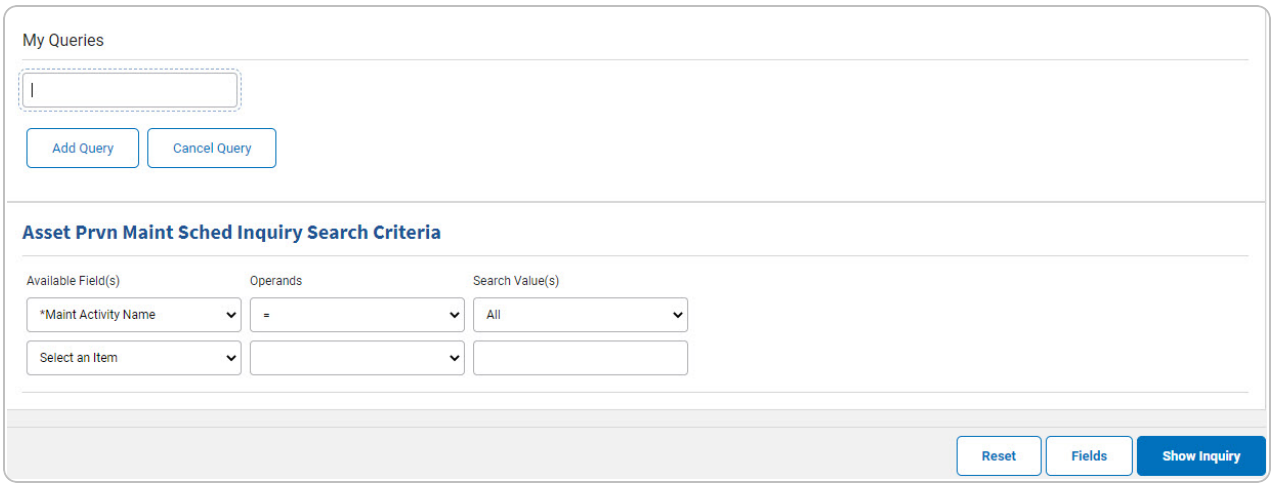

a. Use ⌄ to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Asset Preventive Maintenance Schedule Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*

2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select Cancel Query to disregard the Query.*

   Select Fields. *The **Asset Preventive Maintenance Schedule Inquiry — Select Fields** page appears.*
5.

OR

Select Show Inquiry. *The **Asset Preventive Maintenance Schedule Inquiry — Results** page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*

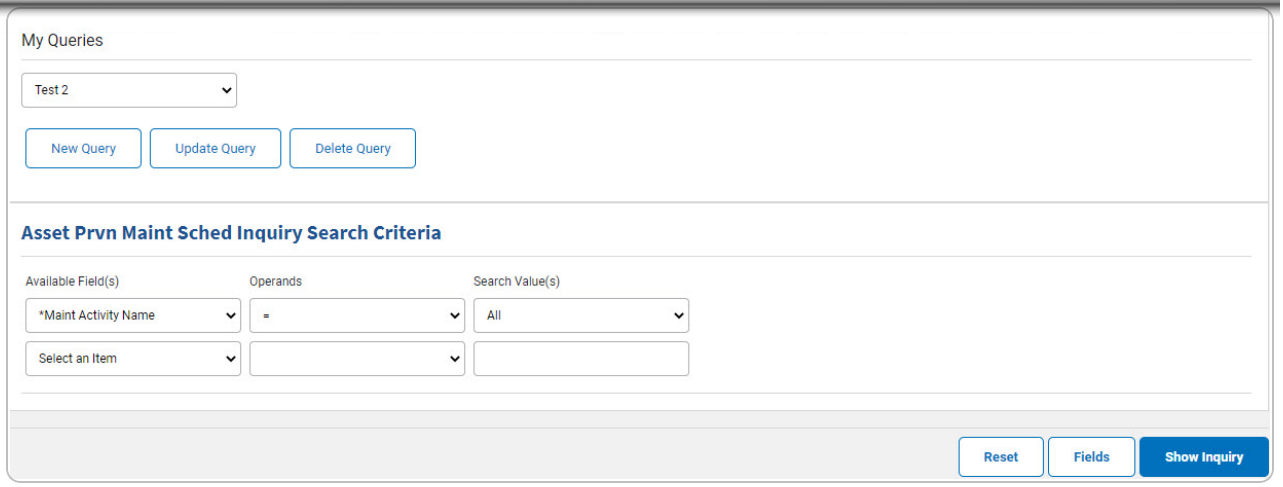

Select Fields. *The **Asset Preventive Maintenance Schedule Inquiry — Select Fields** page appears.*

2. OR

Select Show Inquiry. *The **Asset Preventive Maintenance Schedule Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

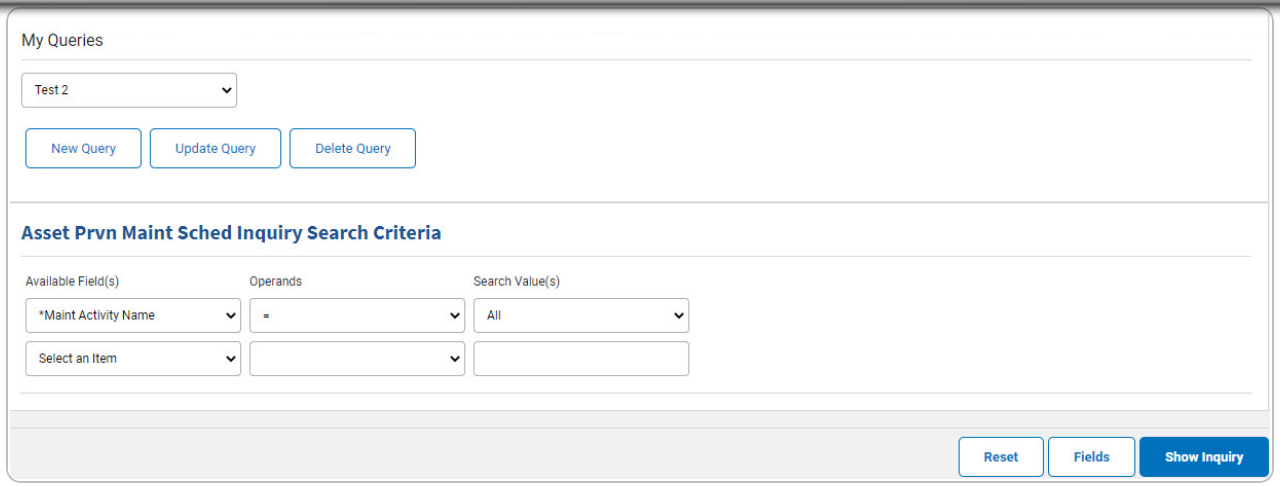

2. *Add and/or Remove rows in the Search Criteria grid as needed.*
3. Select Update Query. *The query information is updated.*

   Select Fields. *The **Asset Preventive Maintenance Schedule Inquiry — Select Fields** page appears.*
4. OR

   Select Show Inquiry. *The **Asset Preventive Maintenance Schedule Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and New Query is joined by Update Query and Delete Query. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

☐	Maint Acty Desc	The description of the maintenance activity.
☐	Maint Loc	The maintenance location assigned to the asset.
☐	Maint Team Desc	The description of the Maintenance Team associated with the Asset Preventative Maintenance Schedule.
☐	Maint Team Id	The Id of the Maintenance Team associated with the Asset Preventative Maintenance Schedule.
☐	Mfr Model Nbr	The specific number assigned to identify the make/model of an asset.
☐	Mfr Name	The full name of a specific manufacturer.
☐	Mfr Part Nbr	Number used to record the make or model of a specific piece of equipment.
☐	Next Util Qty	Next scheduled utilization value for maintenance
☐	Not In Use	The Not In Use for the maintenance schedule record.
☐	Owning UIC	The Owning UIC for an Asset Preventative Maintenance Schedule
☐	Priority Cd	Maintenance Priority Code.
☐	Sched Effective Dt	The Sched Effective Dt for the maintenance schedule record.
☐	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☐	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☐	Suspend Until Dt	The Suspend Until Dt for the table record.
☐	Suspend Util Qty	The Suspend Util Qty for the maintenance schedule record.
☐	Type Dsg Desc	Free text that provides additional information about the Type Dsg Name.
☐	Type Dsg Group Cd	Code that indicates the type designate group code.
☐	Type Dsg Name	A unique name referred to as Type Designation that identifies the asset type, usage, purpose, and variant within an Acquisition Program Type Designation Name.
☐	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.
☐	Util Qty Frequency	The Util Qty Frequency for the table record.
☐	Util Svc Life	Indicates how long an asset is expected to last, in terms of the Util Measure, before being fully depreciated.
☐	Vehicle Grp Cd	The unique value in the lookup table which stores the code assigned to the associated display description
☐	Vehicle Type Cd	Code that identifies the vehicles type.

Cancel Reset Submit Show Inquiry

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

OR

Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select [New Selection List]. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting [Cancel Selection] at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select [Add Selection List]. *The page refreshes, and the selected list is added.* [Add Selection List] *is replaced by* [Update Selection List] *and* [Delete Selection List].

   Select [Show Inquiry] for small volumes of data. *The **Asset Prevent Maintenance Schedule Inquiry — Results** page appears.*
5.

OR

Select Submit for large volumes of data. *The* ***Asset Prevent Maintenance Schedule Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

   Select Show Inquiry for small volumes of data. *The* ***Asset Prevent Maintenance Schedule Inquiry — Results*** *page appears.*

3. **OR**

   Select Submit for large volumes of data. *The* ***Asset Prevent Maintenance Schedule Inquiry Transaction Status*** *page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***Asset Prevent Maintenance Schedule Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Asset Prevent Maintenance Schedule Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

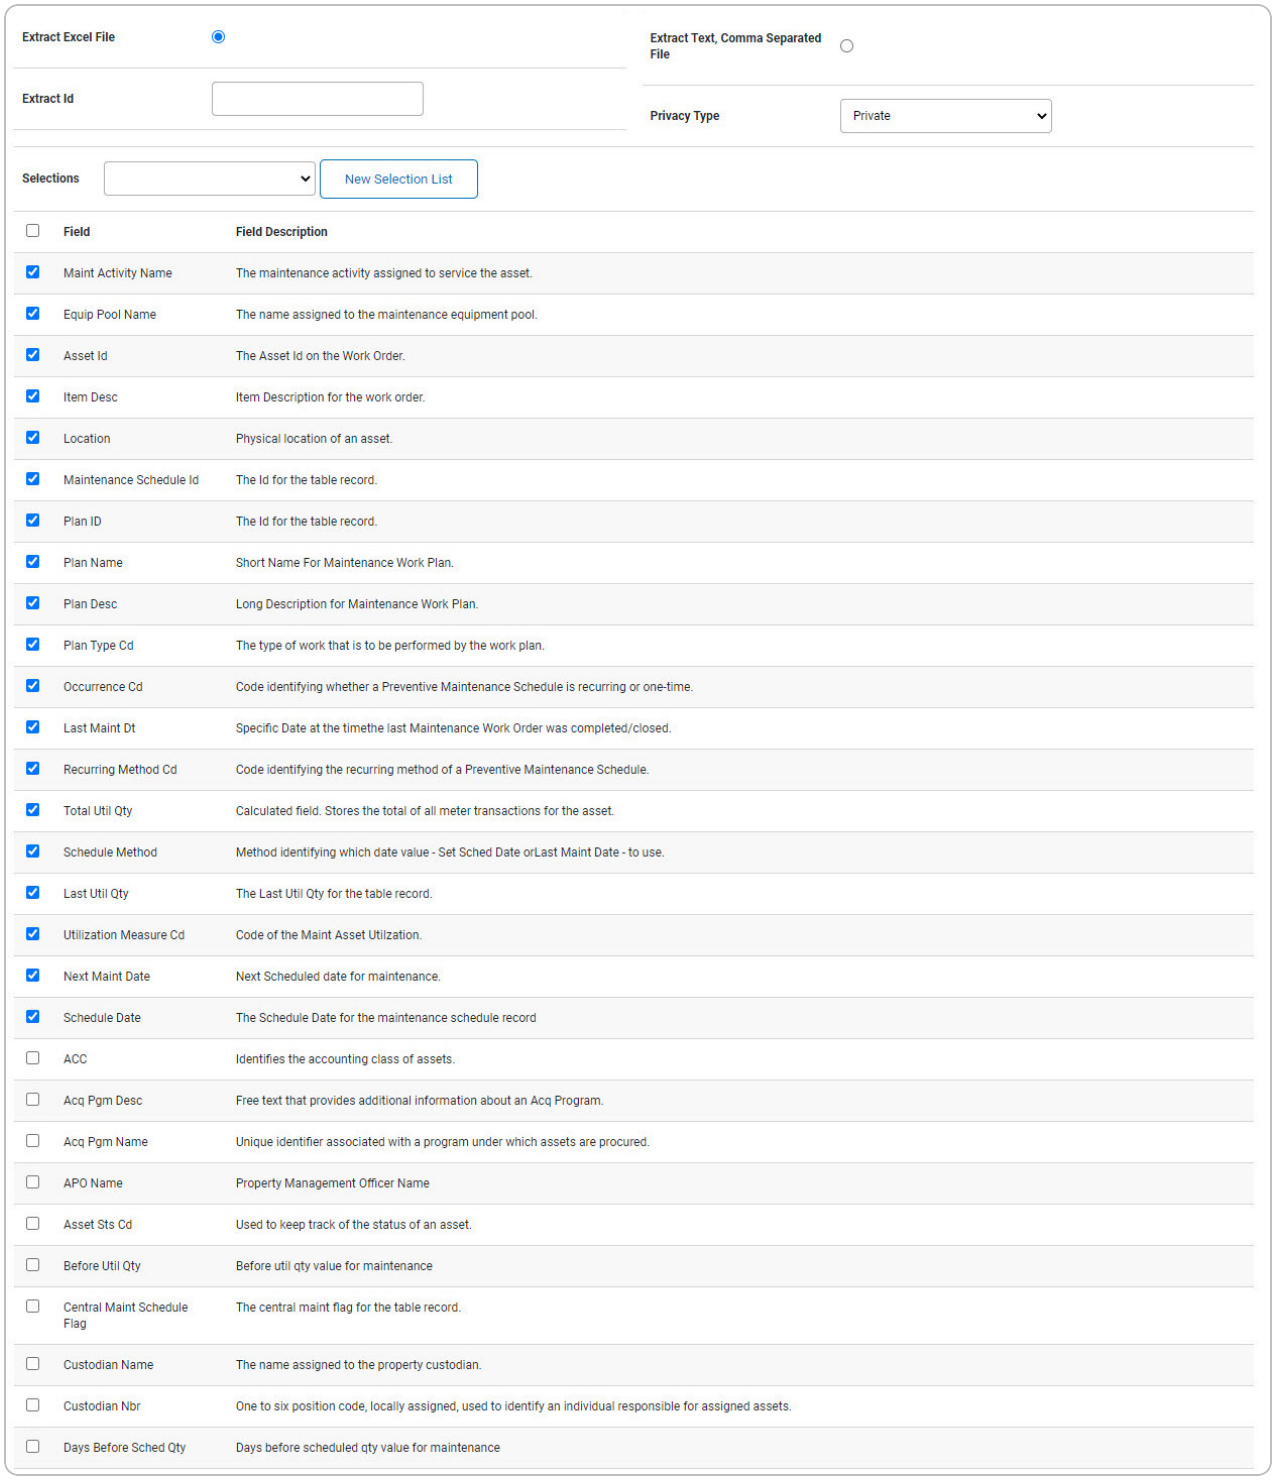

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Asset Preventive Maintenance Schedule Inquiry** page appears.*

Search for a Maintenance Asset Inquiry

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

A. *The first Available Field(s) option (Status) automatically populates and is not editable.*

B. Use ⌄ to select the second Available Field.

C. Repeat Step B to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Use ⌄ to select the second Operands.

C. Repeat Step B to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

   A. Use ⌄ to select the first Search Value.

   B. Enter the second Search Value(s) in the field provided.

   C. Repeat Step B to add additional search criteria.

Remove an Available Field Row

   a. Use ⌄ to select desired Available Field.

   b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Maintenance Asset Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select [New Query]. *The page refreshes, and My Queries changes from a drop-down field to a text field.*

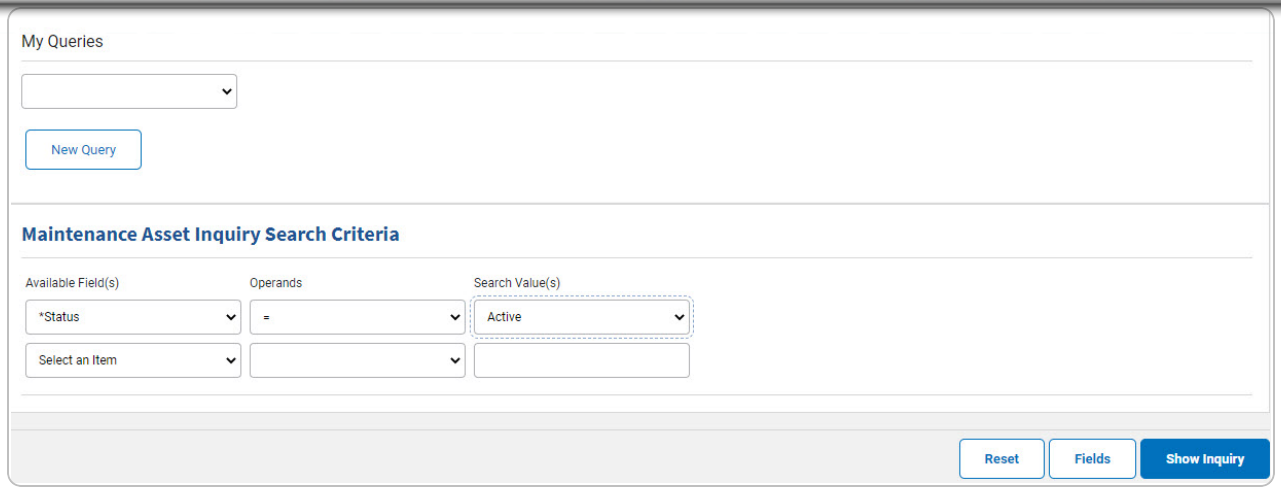

2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select [Add Query]. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* [Cancel Query] *to disregard the Query.*
5. Select [Fields]. *The* ***Maintenance Asset Inquiry — Select Fields*** *page appears.*

   OR

   Select [Show Inquiry]. *The* ***Maintenance Asset Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*

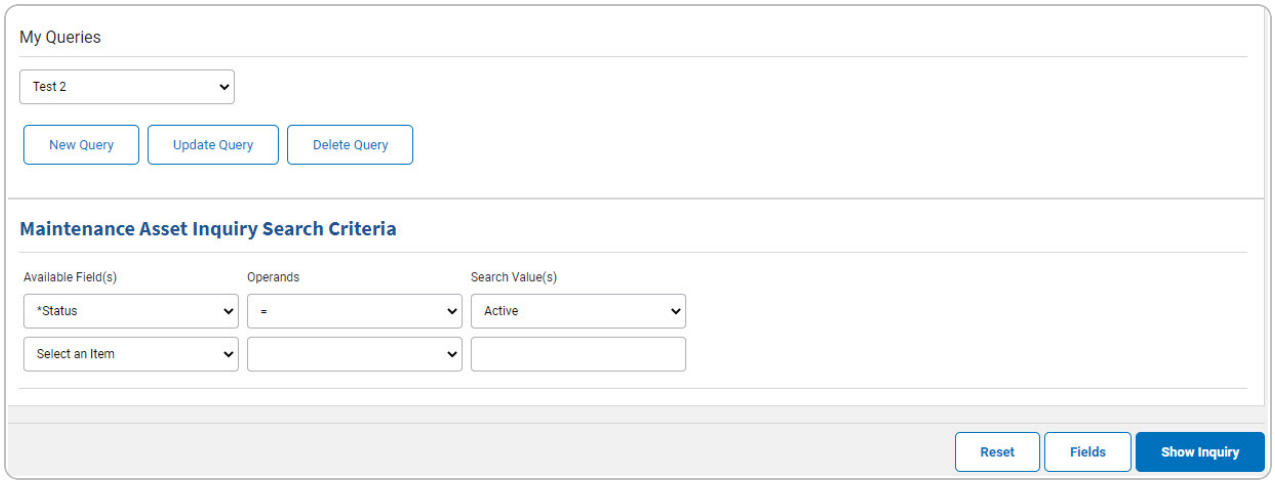

2. Select Fields. *The **Maintenance Asset Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Maintenance Asset Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

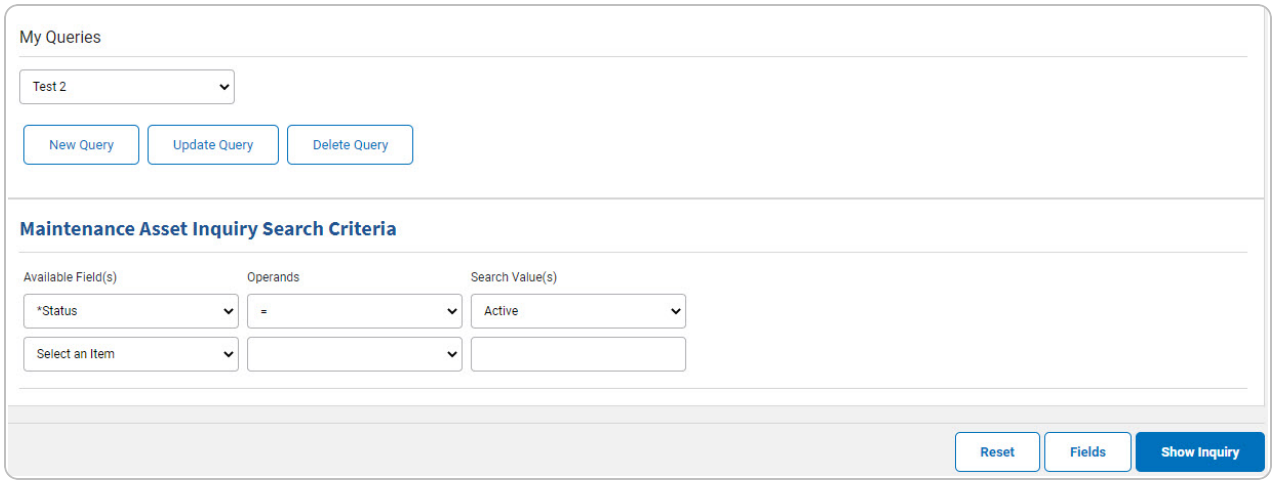

2. *Add and/or Remove rows in the Search Criteria grid as needed.*
3. Select Update Query. *The query information is updated.*
4. Select Fields. *The **Maintenance Asset Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Maintenance Asset Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Maintenance Asset Inquiry — Select Fields** page appears.*

Select Fields for the Maintenance Asset Inquiry

Overview

The Maintenance Asset Inquiry Field Selection page provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > Maintenance > MAINT Asset > Search Criteria > Fields > MAINT Asset Inquiry Fields Selection page

Page Fields

The following fields display on the **MAINT Asset Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

191	Excel is the only reliable print format for this inquiry.
252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
247	Where available, select "Row" to view details for specific record.
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.
290	Do not "Export" large volumes of data, select "Back" button then select "Submit" button on the Field Selection Page

Extract Id | Privacy Type: Private

Selections | New Selection List

	Field	Field Description
☑	Asset Id	The Asset Id on the Work Order.
☑	Current Meter Reading	Current Meter Reading of Vehicle
☑	Dispatch Cd	Daily, Weekly, Recurring etc.
☑	Equip Pool	The maintenance equipment pool containing the asset.
☑	FAST Rptbl	Indicates whether the vehicle is FAST Reportable.
☑	Initial Dt Profiled	Date this record was assigned a maintenance management code.
☑	Item Desc	Item Description for the work order.
☑	Location	Physical location of an asset.
☑	Maint Activity Name	The maintenance activity assigned to service the asset.
☑	Maint Mgt Cd	The code describing the intended use of the maintenance asset (e.g. maintenance, utilization, etc.).
☑	Petroleum Dedicated	Indicates whether the vehicle fuel is low green house gas
☑	UIC	A code that uniquely identifies a unit, organization, or activity. The first position is the Service designator, positions 2-4 are the Parent Organization designator, and positions 5-6 are the Descriptive designator
☑	UIC Name	A unit, organization, or activity name
☑	Utilization Measure Cd	Code of the Maint Asset Utilization
☑	Vehicle Grp Cd	The unique value in the lookup table which stores the code assigned to the associated display description
☑	Vehicle Type Cd	Code that identifies the vehicles type.
☐	Accumd Deprn	Total depreciation incurred to date. Includes depreciation incurred by the current holder and prior holder(s) of the capital asset.
☐	Acq Pgm Desc	Free text that provides additional informatioin about an Acq Program.
☐	Acq Pgm Name	Unique identifier associated with a program under which assets are procured.
☐	Activation Dt	The date a Serial Asset was put into use
☐	Activity Cd	Used to identify a specific installation or level of funding.
☐	Address 1	First line of the address for the Major Custodian
☐	Address 2	Second line of the address for the Major Custodian

☐	ARC	Designates an asset as expendable, non-expendable or durable.
☐	Asset Level Cd	A unique column that holds the code used by the lookup table which coincides with the associated description. Indicates if item is end item or component and if asset has lower level components.
☐	Asset Sts Cd	Used to keep track of the status of an asset.
☐	City	The name of the city of the responsible activity reporting the Asset, or the city where real property facility is located.
☐	CAGE Cd	Controlling activities including manufactures, vendors, and government agencies that control the development of specifications/standards, control the design, or manufacture items of supply, sometimes control the specifications/standards themselves.
☐	Cond Cd	Condition Code
☐	CLIN	A four position field that identifies different contract line items within the same contract.
☐	Owng Cost Center	A code that identifies an organization
☐	Country Cd	Identifies the Country where the Major Custodian is located
☐	Custodian Nbr	One to six position code, locally assigned, used to identify an individual responsible for assigned assets.
☐	Custodian Name	The name assigned to the property custodian.
☐	DSN	Defense Switched Network for the Major Custodian.
☐	Dmil Cd	The code that represents instructions for removal of functional or military characteristics of a materiel item.
☐	Deprn Period	Number of months depreciation will be expensed. Minimum number allowed is 24. Code values represent the maximum number of allowable months based on applicable directives.
☐	Deprn Cost Center	A code that identifies the organization handling depreciation.
☐	Dispatch Ctgry	The identifier of the dispatch category.
☐	Sub Ctgry	The dispatch sub-category assigned to the asset.
☐	Dispatch Unavl Cd	The code determining whether or not a particular asset is available for dispatch.
☐	Type Action	Designates selection of an action to be taken on disposition of asset
☐	Disposition Type Action Cd	Code signifying the type of disposition action
☐	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☐	E-Mail Address	The electronic mailing address of the Point of Contact for the Major Custodian.
☐	ECC	Equipment category of the asset.
☐	EISA	EISA Code
☐	Emergency Response	Emergency Response Designation
☐	EPAct 2005	EPAct 2005 Act
☐	EPAct Coverage	EPAct Coverage
☐	FAST Fuel Config	FAST Fuel Configuration
☐	Fndng Cost Center	Funding Cost Center
☐	Haz Mat Cd	Code identifying explosives and other dangerous articles which require special handling in shipment as freight.

☐	IT Device Cd	Indicates a particular type of IT asset.
☐	Law Enforcement	Law Enforcement Designation
☐	Lease Cd	Indicates the lease status of a particular asset.
☐	Lease End Dt	The date the assets warranty, service or lease contract expires
☐	Lease Start Dt	The date the assets warranty, service or lease contract starts
☐	LIN/TAMCN Desc	Description that the Line Item Number / Table of Authorized Material Control Number represents.
☐	LIN/TAMCN	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Numbers.
☐	Loan Cd	Indicates the loan status of a particular asset.
☐	Loan End Dt	The date the assets warranty, service or loan contract expires
☐	Loan Start Dt	The date the assets warranty, service or loan contract starts
☐	Location Withheld	Indicates whether the location is withheld
☐	Maint Grp	The maintenance group of the asset, used to determine how the asset was assigned to the maint activity.
☐	Mfr Name	The full name of a specific manufacturer.
☐	Mfr Part Nbr	Number used to record the make or model of a specific piece of equipment.
☐	Mfr Yr	Year an asset was manufactured/built/improved.
☐	Min Obj Percent	Minimum percent of utilization.
☐	Mfr Model Nbr	The specific number assigned to identify the make/model of an asset.
☐	Obj Percent Util	Desired percentage of utilization.
☐	Office Id	The name of the office where the Major Custodian is located
☐	Office Name	Description of the organization of the Major Custodian
☐	Origl In Svc Dt	A date that an acquisition was placed in service
☐	Phone Nbr	Office commercial phone number of Major Custodian
☐	APO E-Mail	The electronic mailing address of the Point of Contact
☐	APO Phone Nbr	Office commercial phone number of custodian or Point of Contact who determined the status of the excess materiel or the Point of Contact for the SCHOOL DONATION.
☐	Possible Days Used	Indicates Prime shift as 4 or 5 days a week.
☐	Precious Mtl Cd	Identifies items that have precious metals as part of their content. Precious metals are those metals generally considered to be uncommon and highly valuable
☐	Maint Loc	The maintenance location assigned to the asset.

☐	APO Address 1	Property Management Officer Address Line 1
☐	APO Address 2	Property Management Officer Address Line 2
☐	APO City	Property Management Officer City
☐	APO Country	Property Management Officer Country
☐	APO Name	Property Management Officer Name
☐	APO Office Id	Property Management Officer Office Id
☐	APO Office Name	Property Management Officer Office Name
☐	APO State	Property Management Officer State
☐	APO ZIP Cd	Property Management Officer Zip Code
☐	PO Nbr	Assigned by the procurement activity and used to identify requests for a supply purchase.
☐	Retirement/Dspsl Dt	Date that asset (personal or real property) or improvement is deleted from property book. Date is entered by user during Disposition action.
☐	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☐	State	The State where the Major Custodian is located
☐	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☐	Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☐	Sub Loc	A more specific description of the physical location of an asset within its Location.
☐	SPIIN	Four to six position field added to the basic procurement instrument identification number that identifies amendments/modifications, or calls orders under contract.
☐	Total Cost	Total Cost. Cost of individual end item assets including cost of stand-alone components
☐	Type Dsg Name	A unique name referred to as Type Designation that identifies the asset type, usage, purpose, and variant within an Acquisition Program Type Designation Name.
☐	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.
☐	Util Svc Life	Indicates how long an asset is expected to last, in terms of the Util Measure, before being fully depreciated.
☐	Vehicle Armor	Code that indicates the level of armoring applicable for a vehicle.
☐	Yr Svc Life	Number of years of recommended service life based upon applicable directives.
☐	ZIP Cd	ZIP Code

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

OR

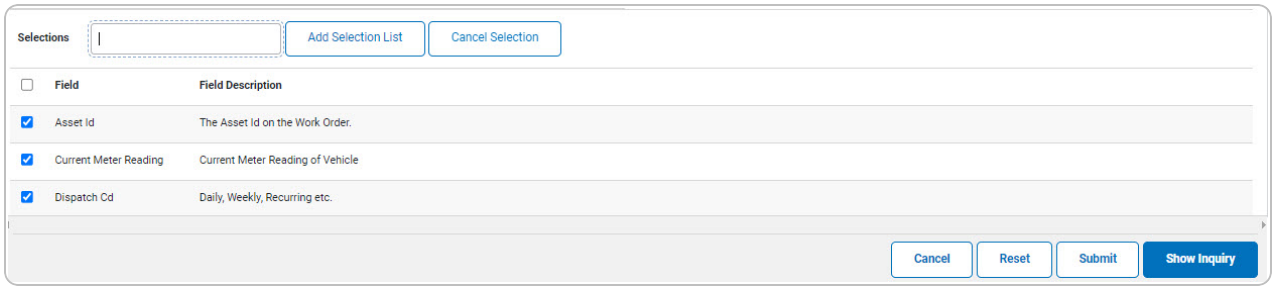

Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select [New Selection List]. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting [Cancel Selection] at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select [Add Selection List]. *The page refreshes, and the selected list is added.* [Add Selection List] *is replaced by* [Update Selection List] *and* [Delete Selection List].

   Select [Show Inquiry] for small volumes of data. *The **Maintenance Asset Inquiry — Results** page appears.*
5.

OR

Select Submit for large volumes of data. *The* ***Maintenance Asset Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

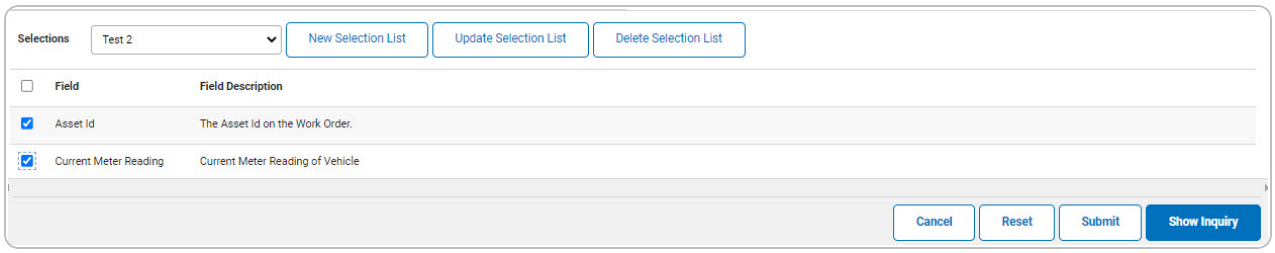

Select Show Inquiry for small volumes of data. *The* ***Maintenance Asset Inquiry — Results*** *page appears.*

3. **OR**

Select Submit for large volumes of data. *The* ***Maintenance Asset Inquiry Transaction Status*** *page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***Maintenance Asset Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Maintenance Asset Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

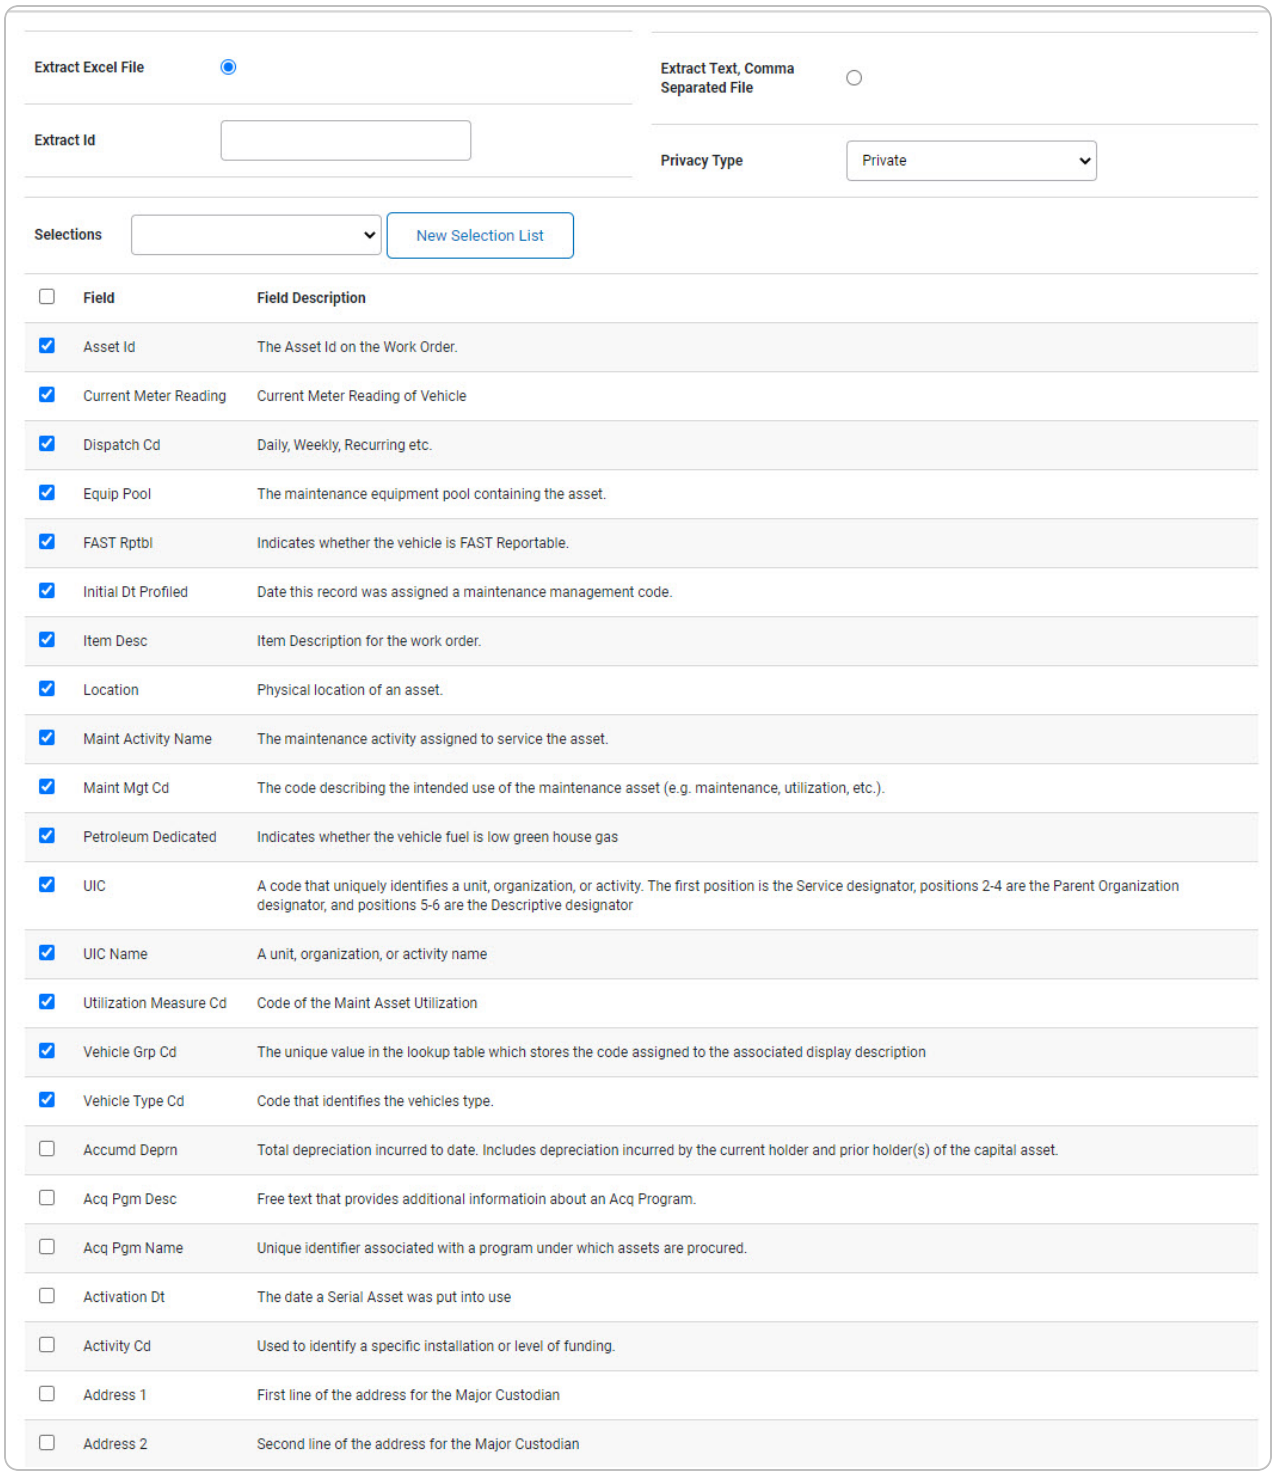

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The* ***Select Fields for the Maintenance Asset Inquiry*** *page appears.*

Search for an Equipment Pool Inquiry

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

   A. Use ⌄ to select the first Available Field.

   B. Repeat Step B to add additional search criteria.

Note

Adding another Available Field automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

   A. Use to select the first Operands.

   B. Use to select the second Operands.

   C. Repeat Step A to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

   A. Use to select the first Search Value.

   B. Use to select the second Search Value.

   C. Repeat Step A to add additional search criteria.

Remove an Available Field Row

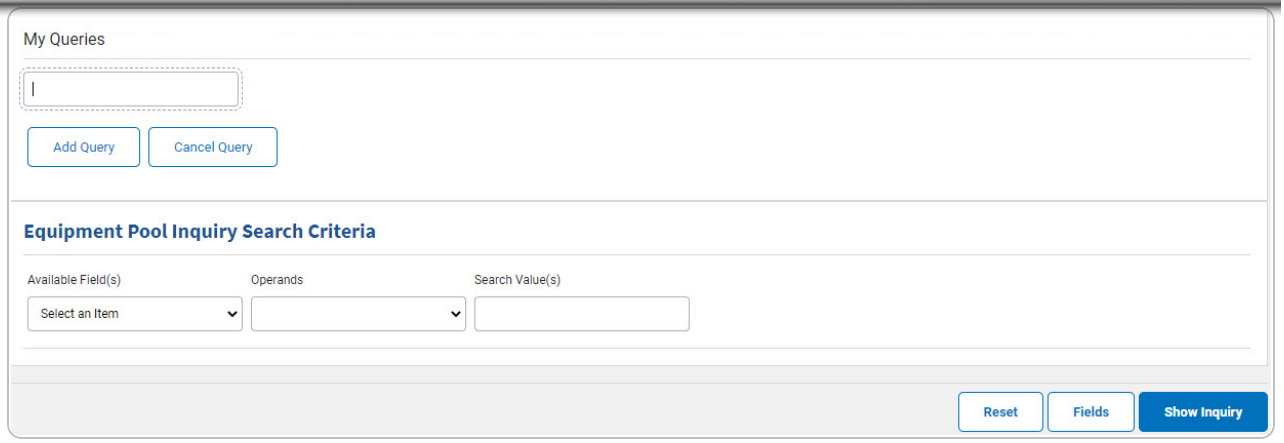

a. Use to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Equipment Pool Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*

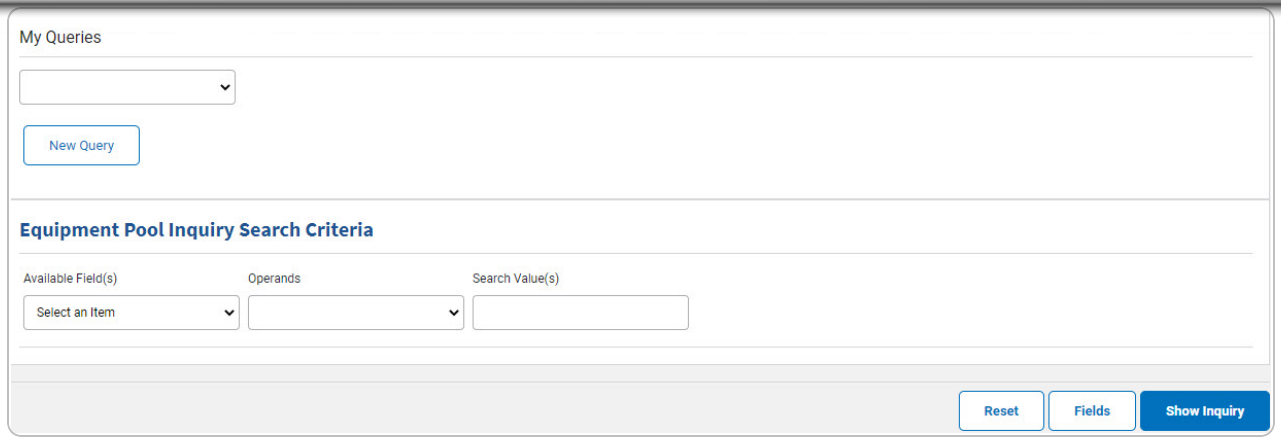

2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*
5. Select Fields. *The* ***Equipment Pool Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Equipment Pool Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*

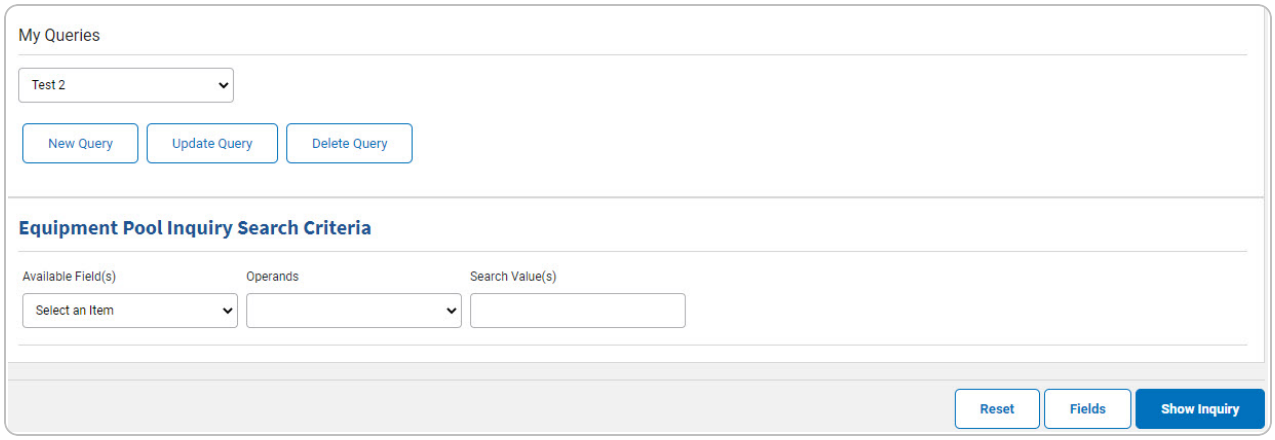

2. Select Fields. *The **Equipment Pool Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Equipment Pool Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Add and/or Remove rows in the Search Criteria grid as needed.*
3. Select Update Query. *The query information is updated.*

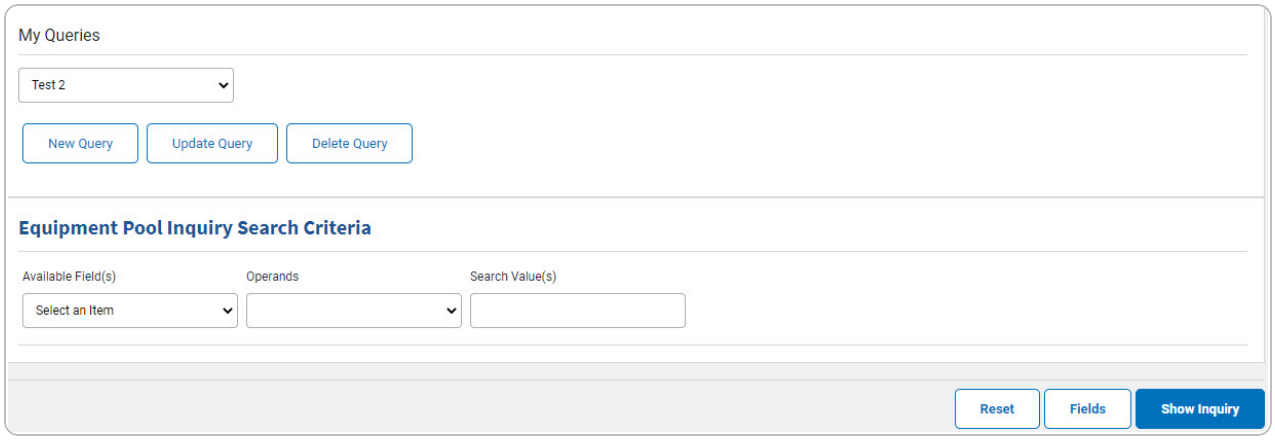

4. Select Fields. *The **Equipment Pool Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Equipment Pool Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and New Query is joined by Update Query and Delete Query. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Equipment Pool Inquiry — Select Fields** page appears.*

Select Fields for the Equipment Pool Inquiry

Overview

The Equipment Pool Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > Maintenance > EQUIP POOL > Search Criteria > Fields > Equipment Pool Inquiry Fields Selection page

Page Fields

The following fields display on the **Equipment Pool Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.

Click the following link to display M&U Navigation Tips.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **Equipment Pool Inquiry** page appears.*

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

   Select Show Inquiry for small volumes of data. *The **Equipment Pool Inquiry — Results** page appears.*

5. **OR**

   Select Submit for large volumes of data. *The **Equipment Pool Inquiry Transaction Status** page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

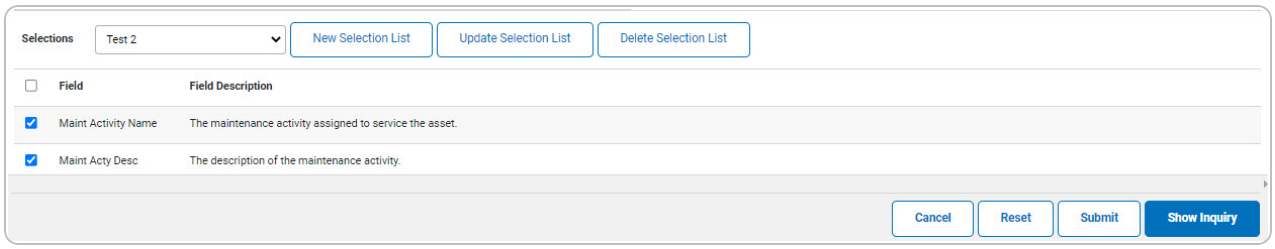

3. Select Show Inquiry for small volumes of data. *The **Equipment Pool Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Equipment Pool Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The **Equipment Pool Inquiry — Results** page appears.*

4. **OR**

   Select Submit for large volumes of data. *The **Equipment Pool Inquiry Transaction Status** page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

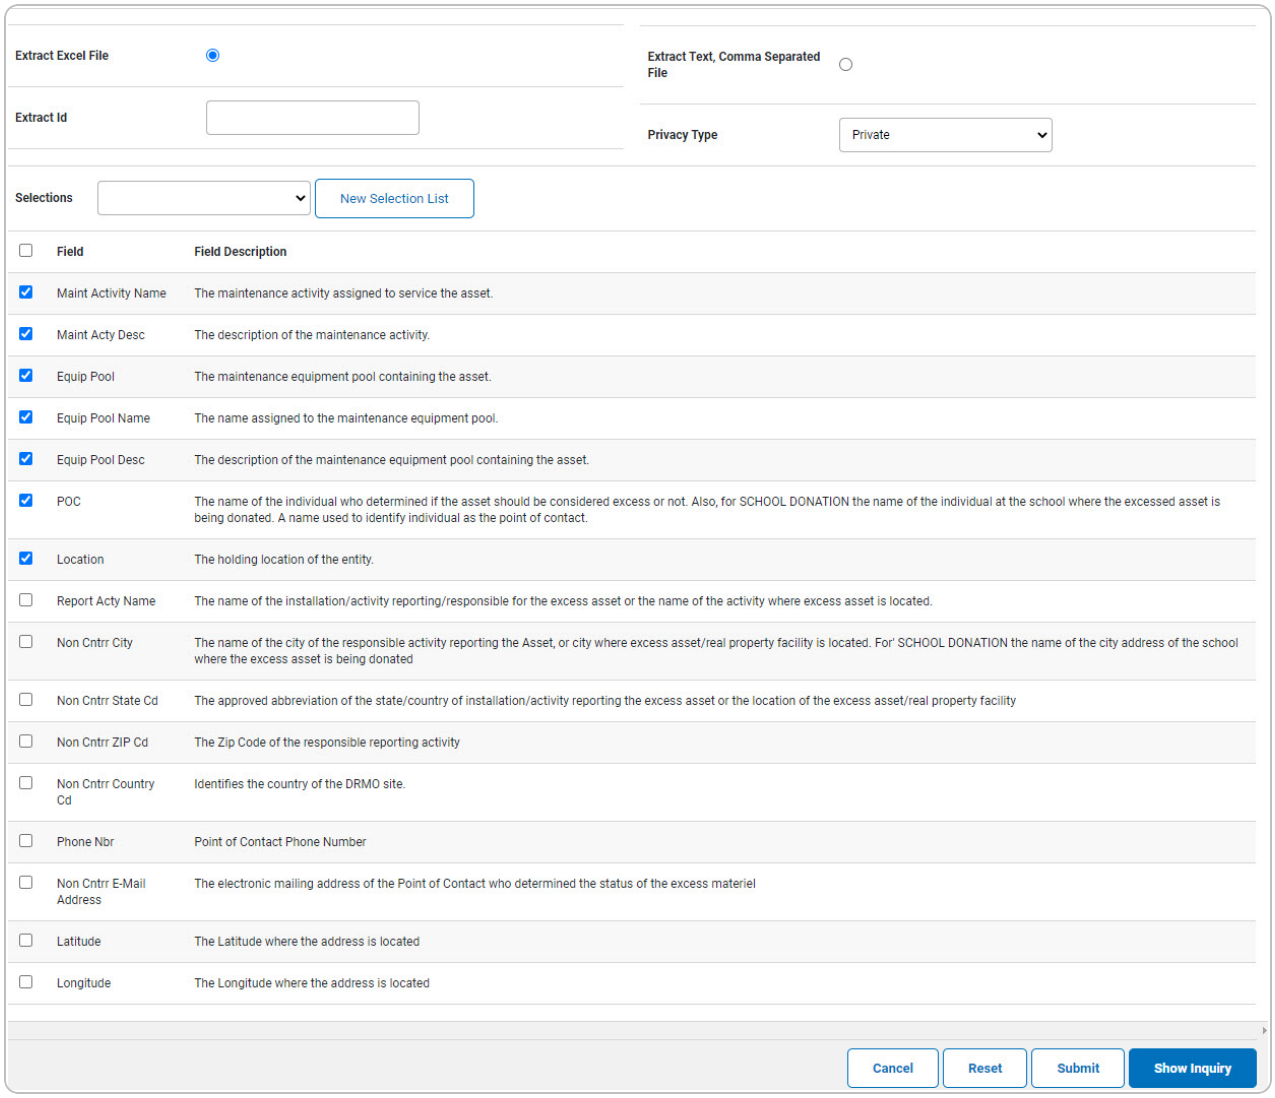

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
***Bold** numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Equipment Pool Inquiry** page appears.*

2. Select the fields required for the inquiry. *The first 7 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the MAINT ACTIVITY NAME contains the appropriate ☑ or ☐. *Select if the inquiry contains a MAINT ACTIVITY NAME.*
- Verify the MAINT ACTY DESC contains the appropriate ☑ or ☐. *Select if the inquiry contains a maintenance activity description.*
- Verify the EQUIP POOL contains the appropriate ☑ or ☐. *Select if the inquiry contains an equipment pool.*
- Verify the EQUIP POOL NAME contains the appropriate ☑ or ☐. *Select if the inquiry contains an equipment pool name.*
- Verify the EQUIP POOL DESC contains the appropriate ☑ or ☐. *Select if the inquiry contains an equipment pool description.*
- Verify the POC contains the appropriate ☑ or ☐. *Select if the inquiry has a POC.*
- Verify the Location contains the appropriate ☑ or ☐. *Select if the inquiry contains a holding location.*
- Click ☐ to select the REPORT ACTY NAME. *Select if the inquiry contains an activity name.*
- Click ☐ to select the NON CNTRR CITY. *Select if the inquiry contains a specified city.*
- Click ☐ to select the NON CNTRR STATE CD. *Select if the inquiry contains a specified state code.*
- Click ☐ to select the NON CNTRR ZIP CD. *Select if the inquiry contains a ZIP CD.*
- Click ☐ to select the NON CNTRR COUNTRY CD. *Select if the inquiry contains a country code.*
- Click ☐ to select the PHONE NBR. *Select if the inquiry contains a PHONE NBR.*

- Click ☐ to select NON CNTRR E-MAIL ADDRESS. *Select if the inquiry contains an E-MAIL address.*
- Click ☐ to select the Latitude. *Select if the inquiry contains latitude information.*
- Click ☐ to select the Longitude. *Select if the inquiry contains longitude information.*

Select Show Inquiry for small volumes of data. *The* ***Equipment Pool Inquiry — Results*** *page appears.*

3. **OR**

Select Submit for large volumes of data. *The* ***Equipment Pool Inquiry Transaction Status*** *page appears.*

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **Work Order Inquiry** page appears.*

Extract Excel File ◉ | Extract Text, Comma Separated File ○

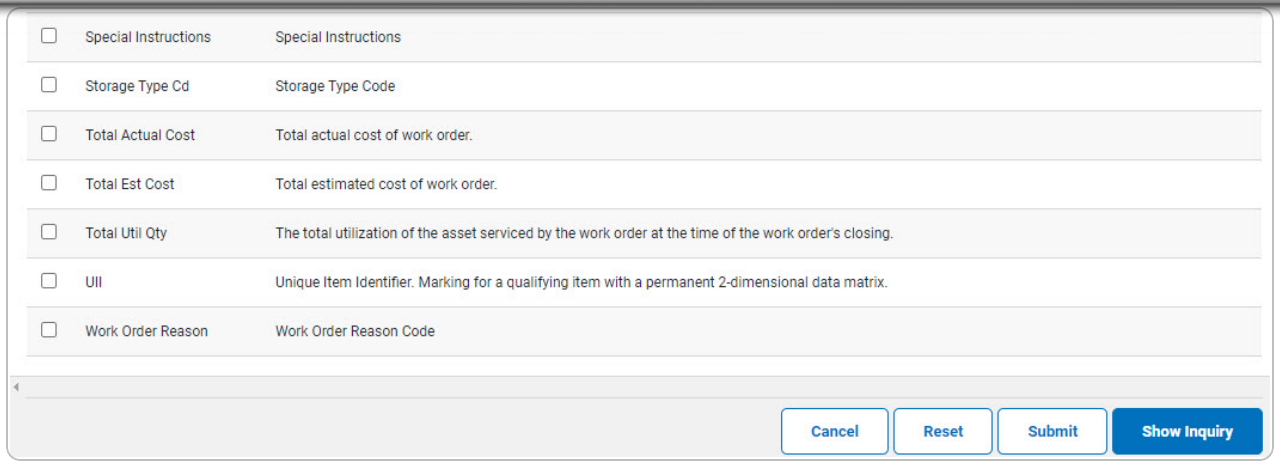

Extract Id | Privacy Type: Private

Selections | New Selection List

	Field	Field Description
☑	Work Order Id	The unique identifier of the work order within its maintenance activity.
☑	Approval Dt	The date the work order was approved.
☑	Asset Id	The Asset Id on the Work Order.
☑	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☑	ECC	Equipment category of the asset.
☑	Item Desc	Item Description for the work order.
☑	Maint Activity	An organizational unit responsible for the maintenance and/or utilization management of assets.
☑	Priority Cd	The priority or importance of the work order.
☑	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☑	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☑	Doc Nbr	Document Number
☑	Work Order Status Cd	The status of the work order, representing whether it is open, closed, voided, etc.
☑	Closed Dt	The date the work order was closed.
☑	Work Order Has Asset	Work Order Has Asset, Yes or No.
☐	ACC	Identifies the accounting class of assets.
☐	Actual Labor Hours	The actual hours of labor performed on the work order.
☐	Asset Certifications	Licenses and Certifications required for the asset.
☐	Asset LIN/TAMCN	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Numbers.
☐	Asset Location	Location of the asset id associated with the work order
☐	Asset UIC	The UIC of the asset associated with the work order.
☐	Avail Dt	The date on which the asset of the work order is available for customer pickup.

☐	CAGE Code	CAGE Code associated to the asset.
☐	CIIC	A one position code that indicates the security classification.
☐	Cond Cd	Condition Code
☐	Custodian Id	ID of the custodian listed in Asset Details.
☐	Dmil Cd	The code that represents instructions for removal of functional or military characteristics of a materiel item.
☐	Dollar Amount	Dollar amount associated with the asset.
☐	Equipment Pool	Equipment pool for asset on the work order.
☐	Est Labor Cost	The estimated number of labor-specific dollars needed to perform the work order.
☐	Est Labor Hours	The estimated number of hours needed to perform the work order.
☐	Est Non-Labor Cost	The estimated number of non-labor (e.g. parts) dollars needed to perform the work order.
☐	Est Service End Dt	Estimated Service End Date
☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt/Time	The date of this row's insertion into the database.
☐	Haz Mat Cd	Code identifying explosives and other dangerous articles which require special handling in shipment as freight.
☐	Incoming Meter Reading	The begining meter reading of the asset on the work order at the time of the work order's opening
☐	Incoming Util Report Date	The date of the incoming meter reading was recorded
☐	Job Order Nbr	A reference number used to identify the customer or project that the activity is associated.
☐	Labor Cost	Actual Labor Cost
☐	Last Updtd By	The id of the user that last modified this row.
☐	Maint Loc	The maintenance location assigned to the asset.
☐	Manufactured Year	Manufactured Year
☐	Meter	Code for the Unit of Measure used to track the Assets utilization
☐	Mfr Model Nbr	Manufacturer Model Number
☐	Mfr Name	The full name of a specific manufacturer.
☐	Mfr Part Nbr	Manufacturer Part Number
☐	NMC End Date	The date the Work Order ended NMC
☐	NMC Start Date	The date the Work Order started NMC
☐	NMC Status	The current NMC status of the Work Order.
☐	NMC Status Start Date/Time	The nmc start dt tm for the work order header nmc record.
☐	NMC Total Time in Days	The total NMC time in days.
☐	NMC Total Time in Hours	The total NMC time in hours.
☐	NMCM Days	The number of days in NMC Maintenance.

☐	NMCM Hours	The number of hours in NMC Maintenance.
☐	NMCS Days	The number of days in NMC Supply.
☐	NMCS Hours	The number of hours in NMC Supply.
☐	Non Accountable	Designates property that is being tracked via DPAS , but does not meet the definition of accountable property.
☐	Non-Labor Cost	Actual Non-Labor Cost
☐	Nuclear	Used in inquiry to determine if record exists
☐	Nuclear Restricted	If the asset is considered nuclear restricted
☐	Nuclear Restricted Reason	Reason why nuclear flag was last changed to restricted
☐	Outgoing Meter Reading	The end meter reading of the asset on the work order at the time of the work order's closing.
☐	Outgoing Util Report Date	The date of the outgoing meter reading was recorded
☐	Owning UIC	The active UIC the user has access to
☐	Precious Metal Code	Code designating the use of precious metal in the asset.
☐	Prep for Shipment Code	Code designating how the asset should be prepared for shipment.
☐	Preservation Level Cd	The preservation level required by the work order.
☐	Rcpt Dt	Receipt Date. Date asset is received for repair and preventative maintenance.
☐	Reimbursable	If asset is considered reimbursable
☐	Refundable	If asset is considered refundable
☐	Remarks	Remarks from the work order.
☐	Requested Dt	The date on which the work order was requested.
☐	Required Delivery Dt	The date by which the work order must be completed.
☐	Return Date	Date the Asset was returned to the custodian.
☐	RIC	Identifies the Routing Identification Code for the warehouse the item is coming from.
☐	Sched Exists	Preventative schedule exists, Yes or No.
☐	Site Id	The active Site Id the user has access to.

2. Choose the desired file type:

   - Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

     OR

     Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select [New Selection List]. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

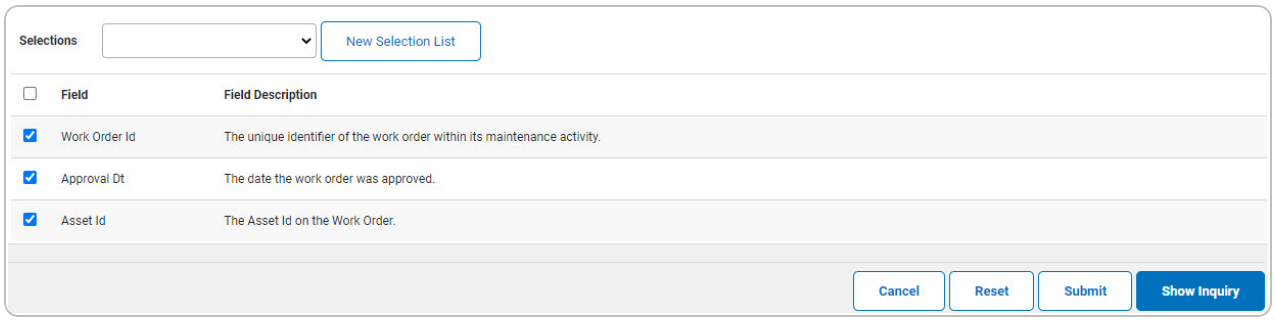

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

   Select Show Inquiry for small volumes of data. *The* ***Work Order Inquiry — Results*** *page appears.*
5. **OR**

   Select Submit for large volumes of data. *The* ***Work Order Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

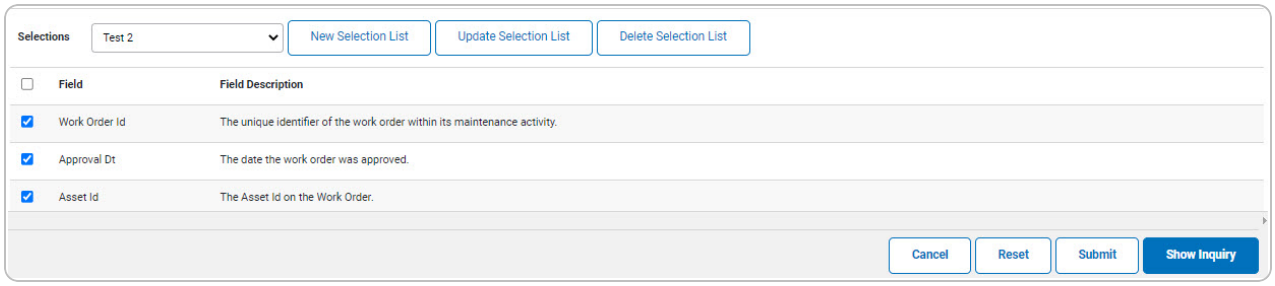

3. Select Show Inquiry for small volumes of data. *The **Work Order Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Work Order Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***Work Order Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Work Order Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

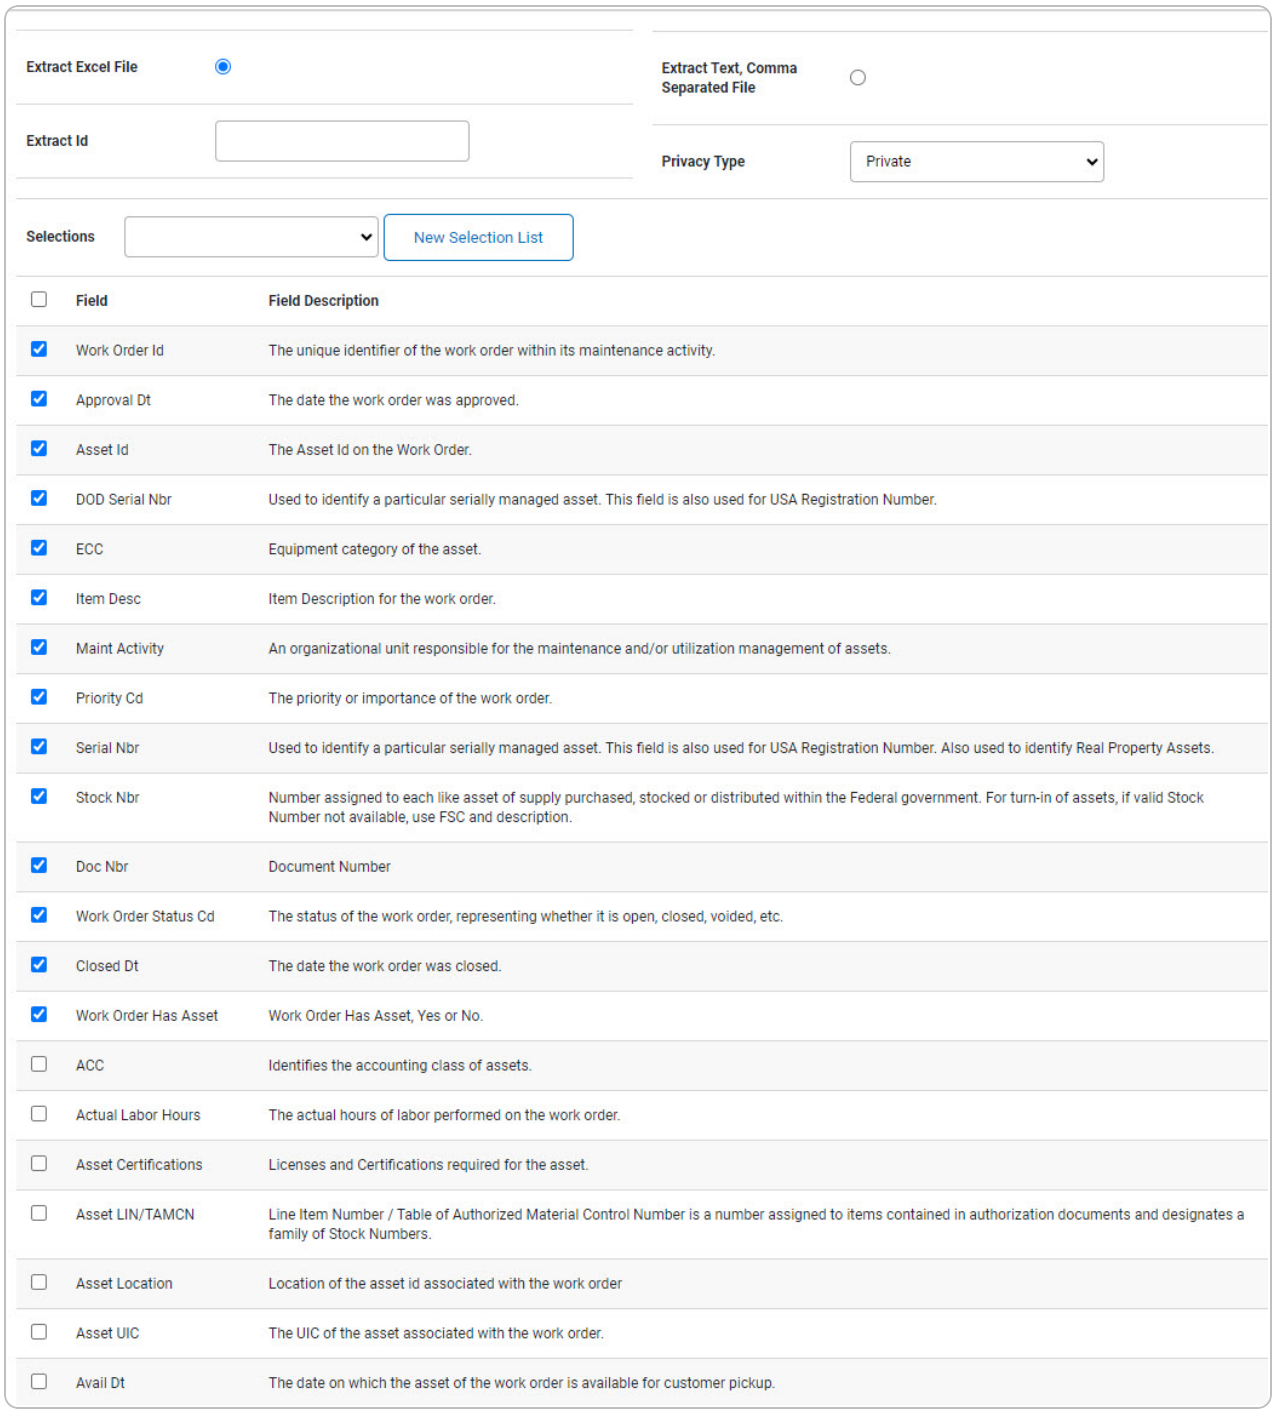

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The* ***Work Order Inquiry*** *page appears.*

Selections | New Selection List

	Field	Field Description
☑	Work Order Id	The unique identifier of the work order within its maintenance activity.
☑	Approval Dt	The date the work order was approved.
☑	Asset Id	The Asset Id on the Work Order.
☑	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☑	ECC	Equipment category of the asset.
☑	Item Desc	Item Description for the work order.
☑	Maint Activity	An organizational unit responsible for the maintenance and/or utilization management of assets.
☑	Priority Cd	The priority or importance of the work order.
☑	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☑	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☑	Doc Nbr	Document Number
☑	Work Order Status Cd	The status of the work order, representing whether it is open, closed, voided, etc.
☑	Closed Dt	The date the work order was closed.
☑	Work Order Has Asset	Work Order Has Asset, Yes or No.
☐	ACC	Identifies the accounting class of assets.
☐	Actual Labor Hours	The actual hours of labor performed on the work order.
☐	Asset Certifications	Licenses and Certifications required for the asset.
☐	Asset LIN/TAMCN	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Numbers.
☐	Asset Location	Location of the asset id associated with the work order
☐	Asset UIC	The UIC of the asset associated with the work order.
☐	Avail Dt	The date on which the asset of the work order is available for customer pickup.

☐	CAGE Code	CAGE Code associated to the asset.
☐	CIIC	A one position code that indicates the security classification.
☐	Cond Cd	Condition Code
☐	Custodian Id	ID of the custodian listed in Asset Details.
☐	Dmil Cd	The code that represents instructions for removal of functional or military characteristics of a materiel item.
☐	Dollar Amount	Dollar amount associated with the asset.
☐	Equipment Pool	Equipment pool for asset on the work order.
☐	Est Labor Cost	The estimated number of labor-specific dollars needed to perform the work order.
☐	Est Labor Hours	The estimated number of hours needed to perform the work order.
☐	Est Non-Labor Cost	The estimated number of non-labor (e.g. parts) dollars needed to perform the work order.
☐	Est Service End Dt	Estimated Service End Date
☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt/Time	The date of this row's insertion into the database.
☐	Haz Mat Cd	Code identifying explosives and other dangerous articles which require special handling in shipment as freight.
☐	Incoming Meter Reading	The begining meter reading of the asset on the work order at the time of the work order's opening
☐	Incoming Util Report Date	The date of the incoming meter reading was recorded
☐	Job Order Nbr	A reference number used to identify the customer or project that the activity is associated.
☐	Labor Cost	Actual Labor Cost
☐	Last Updtd By	The id of the user that last modified this row.
☐	Maint Loc	The maintenance location assigned to the asset.
☐	Manufactured Year	Manufactured Year
☐	Meter	Code for the Unit of Measure used to track the Assets utilization
☐	Mfr Model Nbr	Manufacturer Model Number
☐	Mfr Name	The full name of a specific manufacturer.
☐	Mfr Part Nbr	Manufacturer Part Number
☐	NMC End Date	The date the Work Order ended NMC
☐	NMC Start Date	The date the Work Order started NMC
☐	NMC Status	The current NMC status of the Work Order.
☐	NMC Status Start Date/Time	The nmc start dt tm for the work order header nmc record.
☐	NMC Total Time in Days	The total NMC time in days.
☐	NMC Total Time in Hours	The total NMC time in hours.
☐	NMCM Days	The number of days in NMC Maintenance.

☐	NMCM Hours	The number of hours in NMC Maintenance.
☐	NMCS Days	The number of days in NMC Supply.
☐	NMCS Hours	The number of hours in NMC Supply.
☐	Non Accountable	Designates property that is being tracked via DPAS , but does not meet the definition of accountable property.
☐	Non-Labor Cost	Actual Non-Labor Cost
☐	Nuclear	Used in inquiry to determine if record exists
☐	Nuclear Restricted	If the asset is considered nuclear restricted
☐	Nuclear Restricted Reason	Reason why nuclear flag was last changed to restricted
☐	Outgoing Meter Reading	The end meter reading of the asset on the work order at the time of the work order's closing.
☐	Outgoing Util Report Date	The date of the outgoing meter reading was recorded
☐	Owning UIC	The active UIC the user has access to
☐	Precious Metal Code	Code designating the use of precious metal in the asset.
☐	Prep for Shipment Code	Code designating how the asset should be prepared for shipment.
☐	Preservation Level Cd	The preservation level required by the work order.
☐	Rcpt Dt	Receipt Date. Date asset is received for repair and preventative maintenance.
☐	Reimbursable	If asset is considered reimbursable
☐	Refundable	If asset is considered refundable
☐	Remarks	Remarks from the work order.
☐	Requested Dt	The date on which the work order was requested.
☐	Required Delivery Dt	The date by which the work order must be completed.
☐	Return Date	Date the Asset was returned to the custodian.
☐	RIC	Identifies the Routing Identification Code for the warehouse the item is coming from.
☐	Sched Exists	Preventative schedule exists, Yes or No.
☐	Site Id	The active Site Id the user has access to.

2. Select the fields required for the inquiry. *The first 14 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the WORK ORDER ID contains the appropriate ☑ or ☐. *Select if the inquiry contains a WORK ORDER ID.*
- Verify the APPROVAL DT contains the appropriate ☑ or ☐. *Select if the inquiry contains an approval date.*
- Verify the ASSET ID contains the appropriate ☑ or ☐. *Select if the inquiry contains an asset identifier.*
- Verify the DOD SERIAL NBR contains the appropriate ☑ or ☐. *Select if the inquiry contains a serial managed asset.*
- Verify the ECC contains the appropriate ☑ or ☐. *Select if the inquiry contains an equipment category code.*
- Verify the ITEM DESC contains the appropriate ☑ or ☐. *Select if the inquiry has a description.*

- Verify the MAINT ACTIVITY contains the appropriate ☑ or ☐. *Select if the inquiry contains a maintenance activity.*

Search for a Work Plan Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

A. *The first Available Field(s) option (MAINT ACTIVITY/OWNING UIC) automatically populates and is not editable.*

B. Use ⌄ to select the second Available Field.

C. Repeat Step B to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Use ⌄ to select the second Operands.

C. Repeat Step B to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use ⌄ to select the first Search Value.

B. Use ⌄ to select the second Search Value.

C. Repeat Step B to add additional search criteria.

Remove an Available Field Row

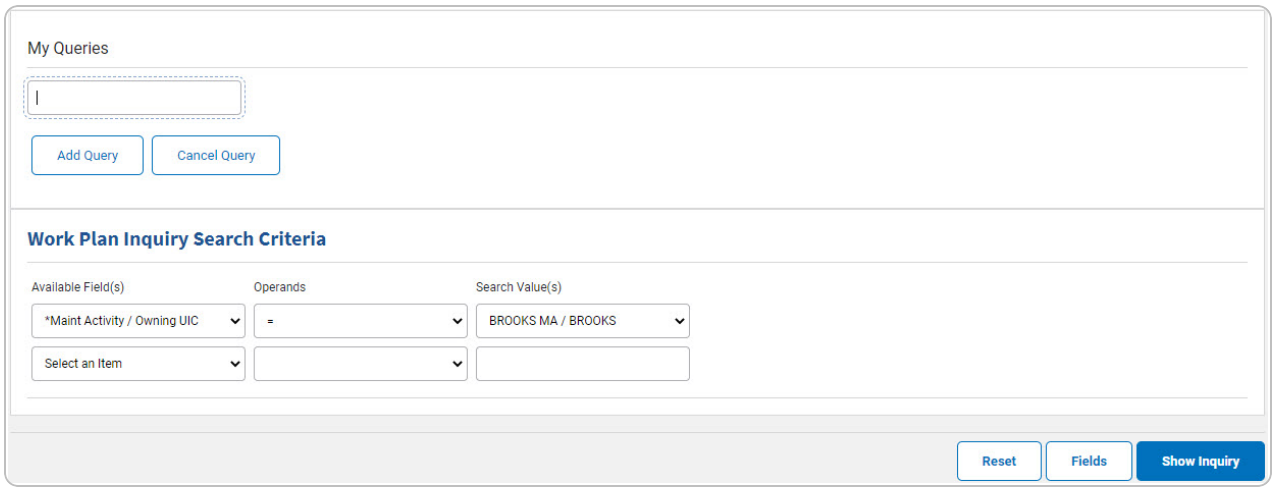

a. Use ⌄ to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Work Plan Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*

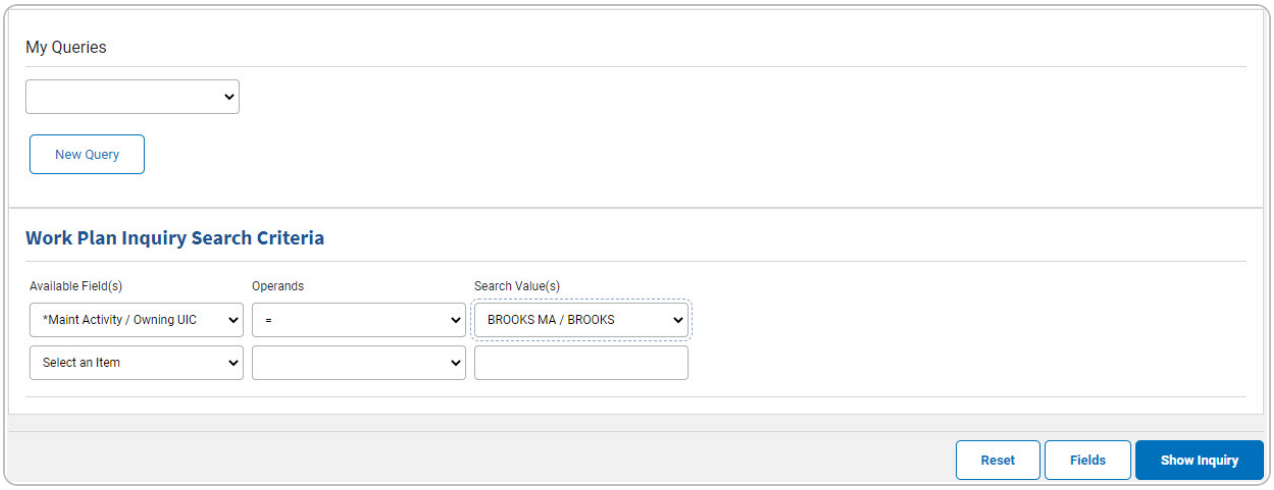

2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select Cancel Query to disregard the Query.*
5. Select Fields. *The **Work Plan Inquiry — Select Fields** page appears.*

OR

Select Show Inquiry. *The* ***Work Plan Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*

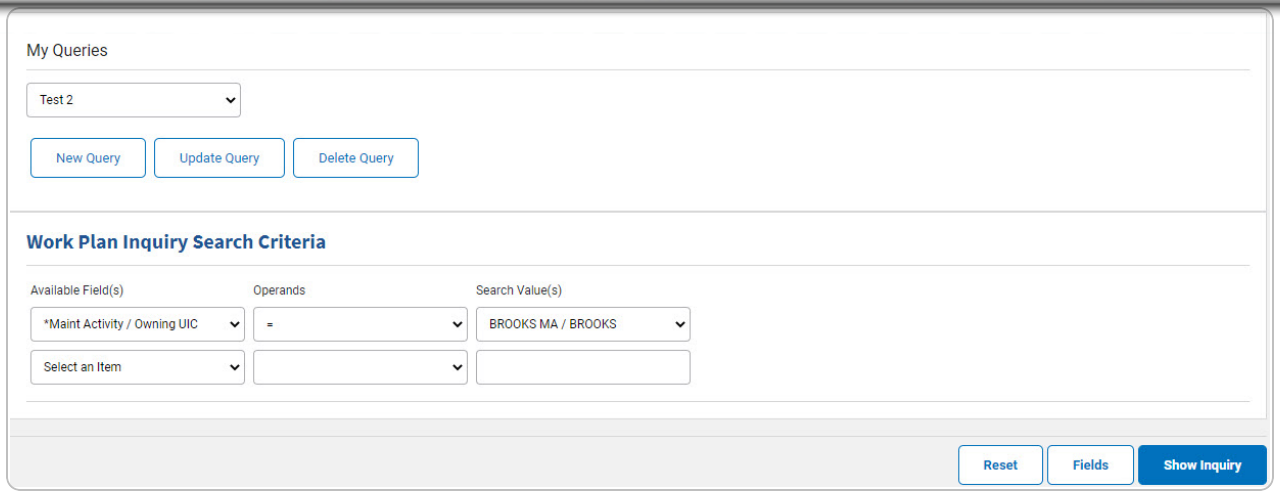

Select Fields. *The* ***Work Plan Inquiry — Select Fields*** *page appears.*

2. OR

Select Show Inquiry. *The* ***Work Plan Inquiry — Results*** *page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

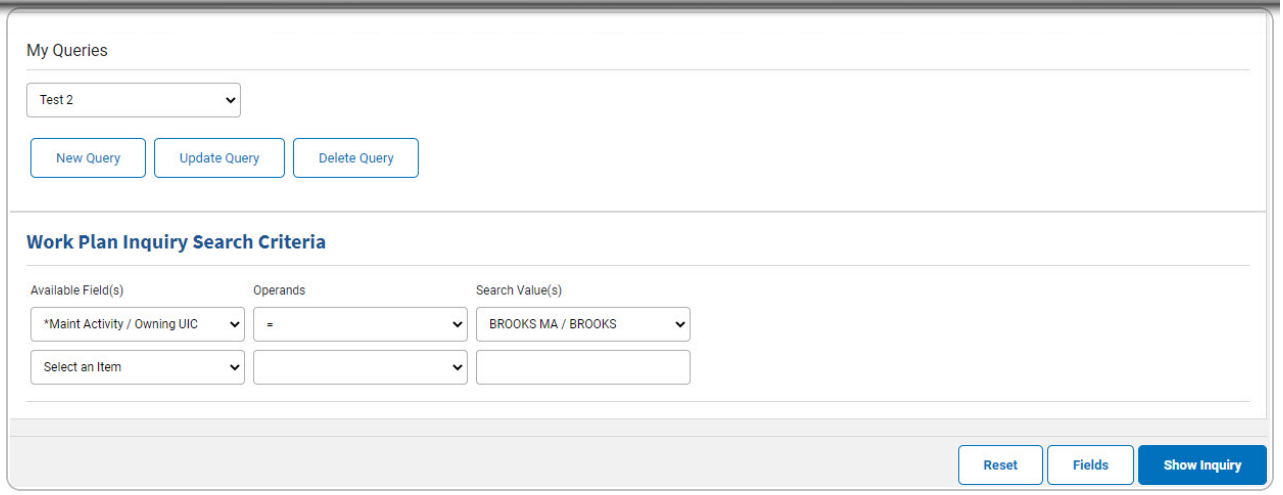

2. *Add and/or Remove rows in the Search Criteria grid as needed.*
3. Select Update Query. *The query information is updated.*
4. Select Fields. *The **Work Plan Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Work Plan Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and New Query is joined by Update Query and Delete Query. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Work Plan Inquiry — Select Fields** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..

13 — Mandatory Entry: *Available Field(s)*.	
13 — Mandatory Entry: *Operands*.	Missing Entry. No data was entered. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Query Name*.	
xxxx – Saved Inquiry already exists. Select Update Query **or** Delete Query **.**	Invalid Entry. The inquiry already exists in the database. Use the existing inquiry, or select Update Query to revise the existing query.
102 — Inquiry already exists.	Invalid entry. The Inquiry is already established. Re-enter the inquiry or select Update Query or Delete Query to modify the existing inquiry.
106 — Operand must be =, >, <, >= , <= , <>, or Like.	Missing Entry. The Field value was entered, but no operand was selected. Choose an operand from the drop-down menu.
31 — To perform Search, data must be entered in one or more fields.	Missing Entry. At least one field is necessary to perform the search. Enter at least one field, then select the Search button.

Select Fields for the Work Plan Inquiry

Overview

The Work Plan Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > Maintenance > Work Plan > Search Criteria > Fields > Work Plan Inquiry Fields Selection page

Page Fields

The following fields display on the **Work Plan Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.

Click the following link to display M&U Navigation Tips.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The* ***Work Plan Inquiry*** *page appears.*

2. Choose the desired file type:

   - Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

     OR

     Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select [New Selection List]. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting [Cancel Selection] at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select [Add Selection List]. *The page refreshes, and the selected list is added.* [Add Selection List] *is replaced by* [Update Selection List] *and* [Delete Selection List].

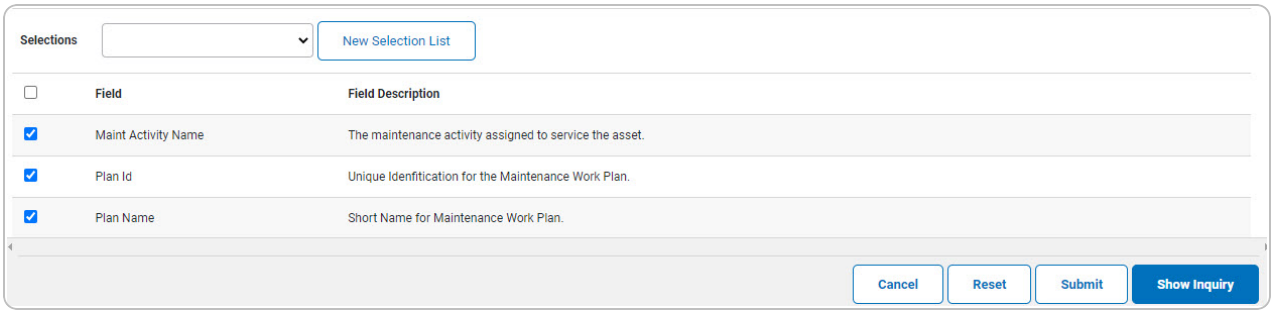

Select Show Inquiry for small volumes of data. *The* ***Work Plan Inquiry — Results*** *page appears.*

5. **OR**

Select Submit for large volumes of data. *The* ***Work Plan Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

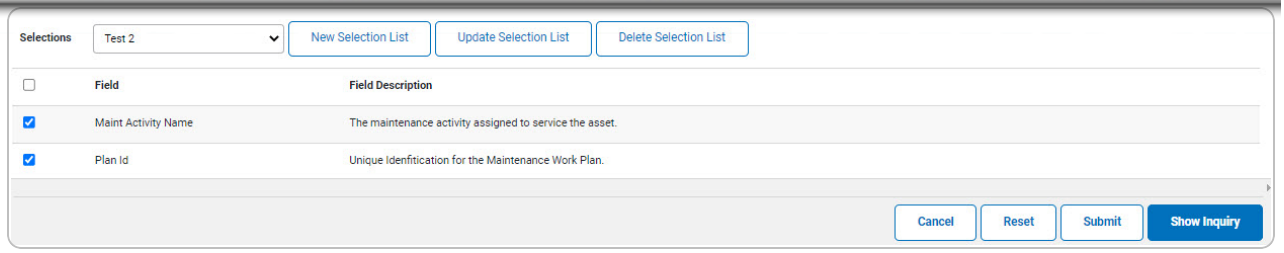

Select Show Inquiry for small volumes of data. *The* ***Work Plan Inquiry — Results*** *page appears.*

3. **OR**

Select Submit for large volumes of data. *The* ***Work Plan Inquiry Transaction Status*** *page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

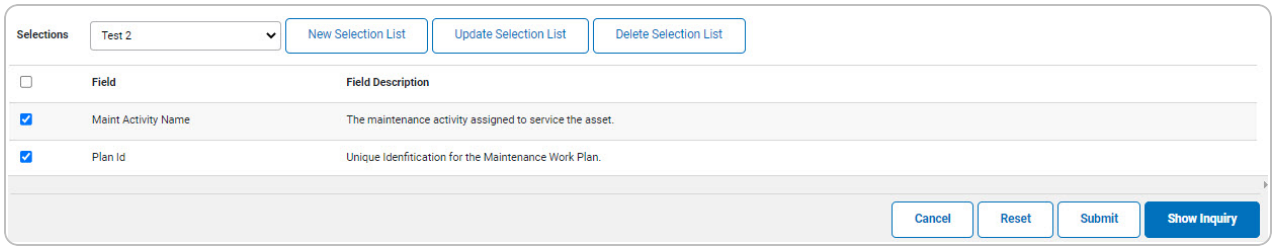

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***Work Plan Inquiry — Results*** *page appears.*
4. **OR**

   Select Submit for large volumes of data. *The* ***Work Plan Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

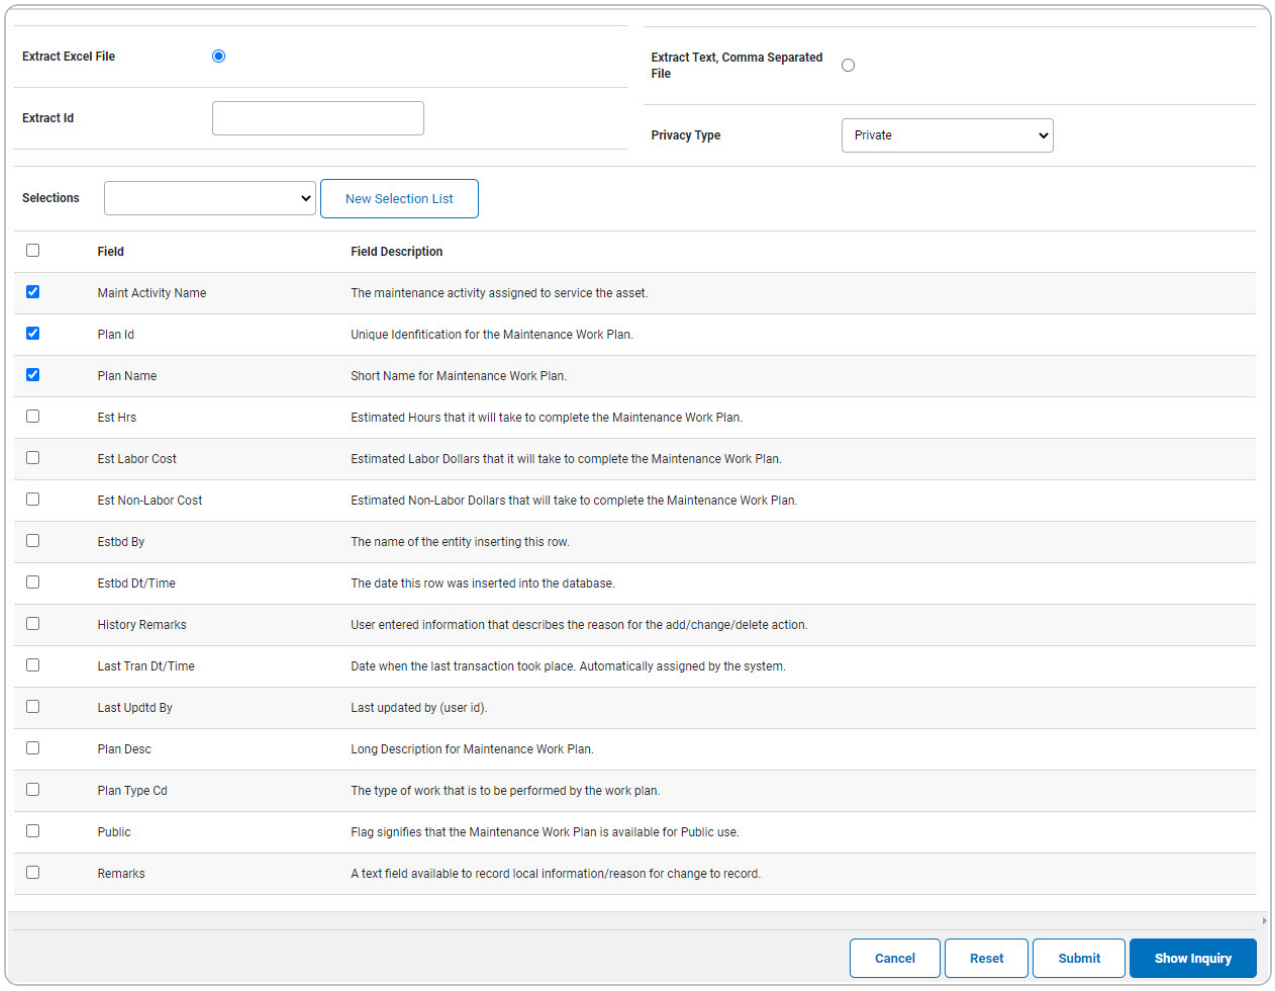

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The* ***Work Plan Inquiry*** *page appears.*

2. Select the fields required for the inquiry. *The first 3 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the MAINT ACTIVITY NAME contains the appropriate ☑ or ☐. *Select if the inquiry contains an appointed MAINT ACTIVITY NAME.*

	Field	Field Description
☑	Maint Activity / Owning UIC	The maintenance activity performing the work order
☑	Local Id	Locally established identifier used to identify an asset.
☑	Asset Id	The Asset Id of the asset that the Maintenance Action is being performed.
☑	Stock Nbr	The Stock Number that was assigned to the asset at the time Maintenance was performed.
☑	Serial Nbr	Serial Number of asset receiving maintenance action.
☑	Receipt Dt	Date that an asset was received in the shop for maintenance action.
☐	Cancel Cd	When populated, the work order was cancelled.
☐	Cmpltn Dt	Date that a maintenance action was completed.
☐	Cmrc Repair Cd	When populated, the work order was performed by a commercial source.
☐	Operator Cost Center	Office or activity that used the asset receiving the maintenance action.
☐	End Mtr Rdng	Actual meter reading when the maintenance action is completed.
☐	Item Desc	Nomenclature from catalog of asset receiving maintenance action.
☐	Labor Cost	Costs expended for labor (hours times hourly rate) for maintenance action.
☐	Labor Hrs	Labor hours expended for maintenance action.
☐	Lo Le Cd	Indicates the Loan / Lease Status of the asset at the time the Maintenance Action was performed.
☐	Local Use	User-defined field used for storing custom data.
☐	Maint Loc	Actual location where maintenance action is to take place.
☐	Maj Custodian Nbr	The Major Custodian of the asset at the time Maintenance was performed.
☐	Mfr Name	Manufacturer name of the asset receiving the maintenance action.
☐	Mfr Part Nbr	Manufacturer part number of the asset receiving the maintenance action.
☐	Mfr Yr	Year that the asset receiving maintenance action was manufactured.
☐	Nbr of Items	Used when performing maintenance actions against bulk-managed assets.

☐	Next Svc Due Dt	The date that the next preventative maintenance action is due for the asset.
☐	Next Svc Due Mi Hrs	The number of miles/hours when the next preventative maintenance action is due for the asset.
☐	Non-Labor Cost	Costs of materials used for maintenance action.
☐	Phone Nbr Ext	Phone number of user submitting the request for the maintenance action.
☐	Pool Dispatch Nbr	Locally devised number to identify a specific motor pool responsible for dispatching a vehicle.
☐	Pri Cd	User assigned code that designates the urgency of the maintenance action.
☐	Property Book Cd	Identifies whether the asset is on the Property Book.
☐	Start Dt	Date that a maintenance action was started.
☐	Sub Custodian Nbr	The Sub Custodian of the asset at the time Maintenance was performed.
☐	Submitter	Name of user submitting the request for maintenance action.
☐	Svc Cd	Identifies the service code of the asset.
☐	Type Maint Cd	Identifies the type of maintenance being performed.
☐	Unavail Maint Days	The total number of days the asset was out of service while waiting for repairs or being repaired.
☐	Unavail Sply Days	The total number of days the asset was out of service while waiting for parts.
☐	User Loc	Actual location of asset.
☐	Wrnty Cd	Identifies that the asset receiving maintenance action is covered by a warranty or service agreement.
☐	Work Ctgry	Identifies the category for preventative maintenance that was scheduled.
☐	Work Desc	Work Description of maintenance action.
☐	Work Order Aprvl Dt	Date the work order was approved for work.
☐	Print Cd	Indicates whether the Work Order has been printed.

Cancel Reset Submit Show Inquiry

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select [New Selection List]. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting [Cancel Selection] at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select [Add Selection List]. *The page refreshes, and the selected list is added.* [Add Selection List] *is replaced by* [Update Selection List] *and* [Delete Selection List].

   Select [Show Inquiry] for small volumes of data. *The* ***Work Order Legacy History Inquiry — Results*** *page appears.*

5. **OR**

   Select [Submit] for large volumes of data. *The* ***Work Order Legacy History Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

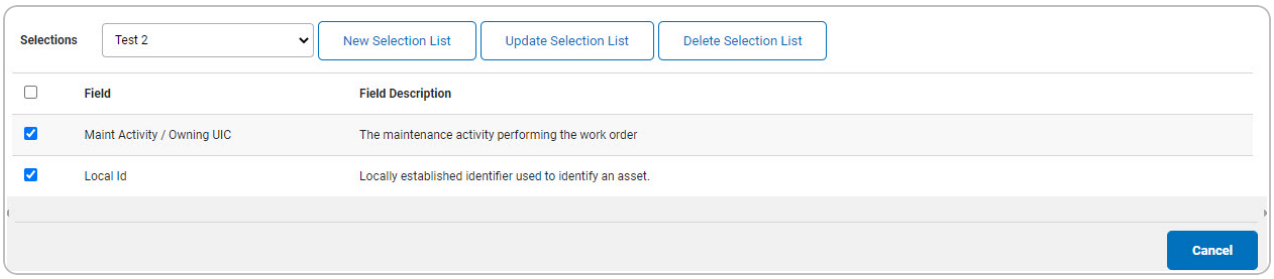

3. Select Show Inquiry for small volumes of data. *The* ***Work Order Legacy History Inquiry — Results*** *page appears.*

OR

Select Submit for large volumes of data. *The* ***Work Order Legacy History Inquiry Transaction Status*** *page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***Work Order Legacy History Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Work Order Legacy History Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

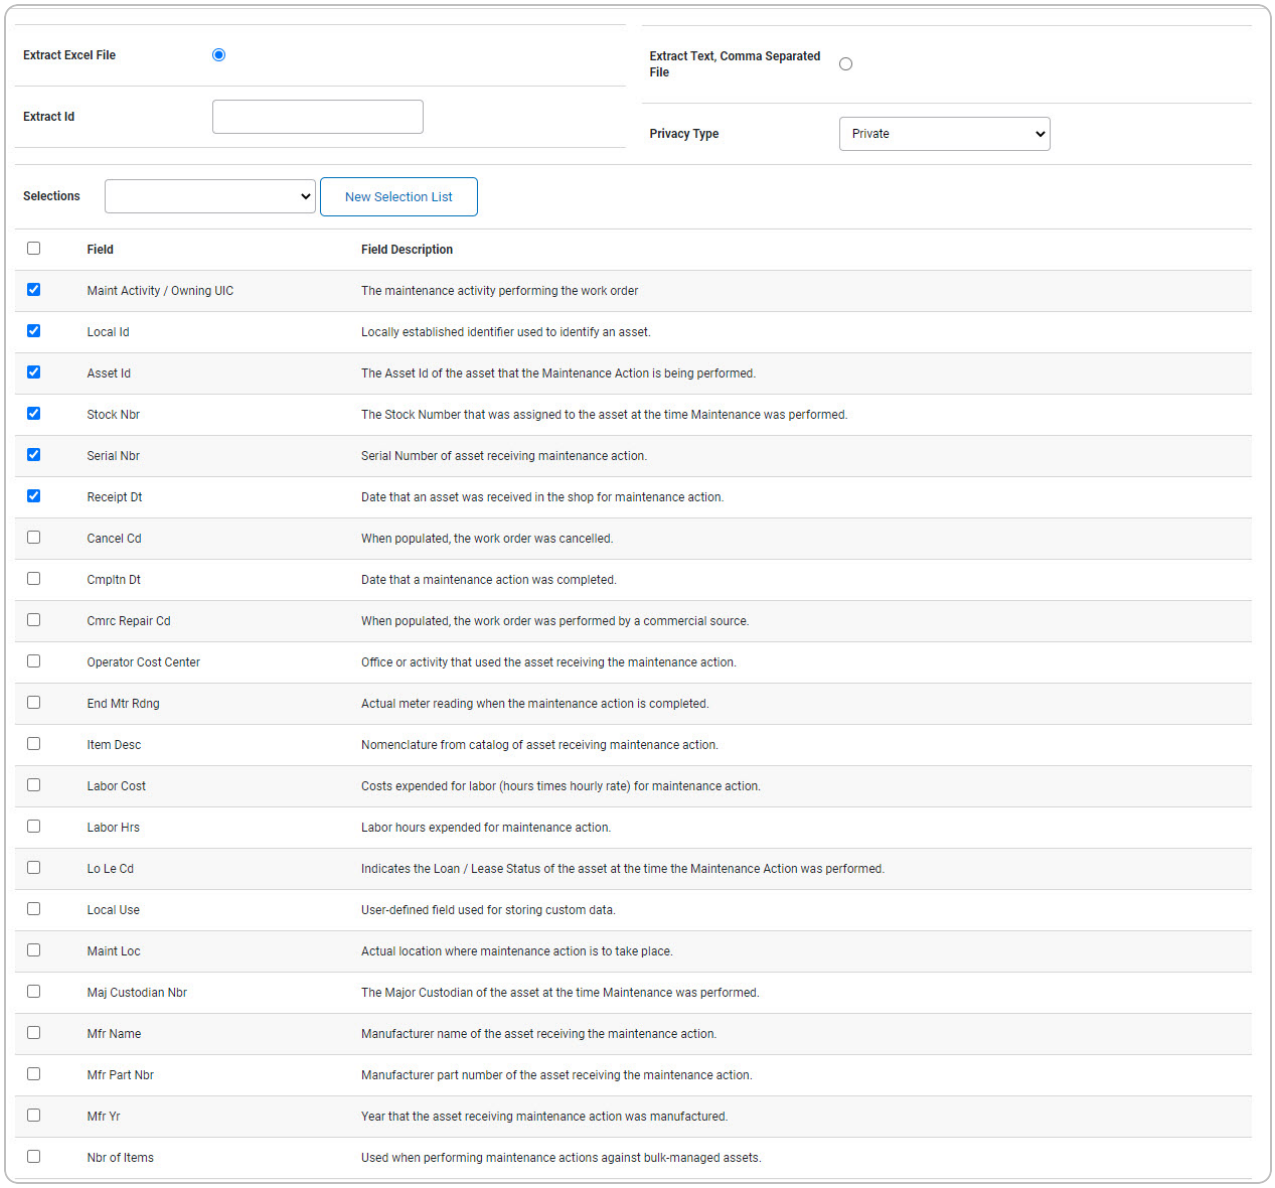

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The* ***Work Order Legacy History Inquiry*** *page appears.*

Search for a Work Order Legacy History Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

   A. *The first Available Field(s) option (MAINT ACTIVITY / OWNING UIC) automatically populates and is not editable.*

   B. *The second Available Field(s) option (TRAN DT FROM) automatically populates and is not editable.*

   C. Use ⌄ to select the third Available Field.

   D. Repeat Step C to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Use ⌄ to select the second Operands.

C. Use ⌄ to select the third Operands.

D. Repeat Step C to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use ⌄ to select the first Search Value.

B. Use  to select the TRAN DT FROM, or enter the date (MM/DD/YYYY) in the field provided.

C. Use ⌄ to select the third Search Value.

D. Repeat Step C to add additional search criteria.

Remove an Available Field Row

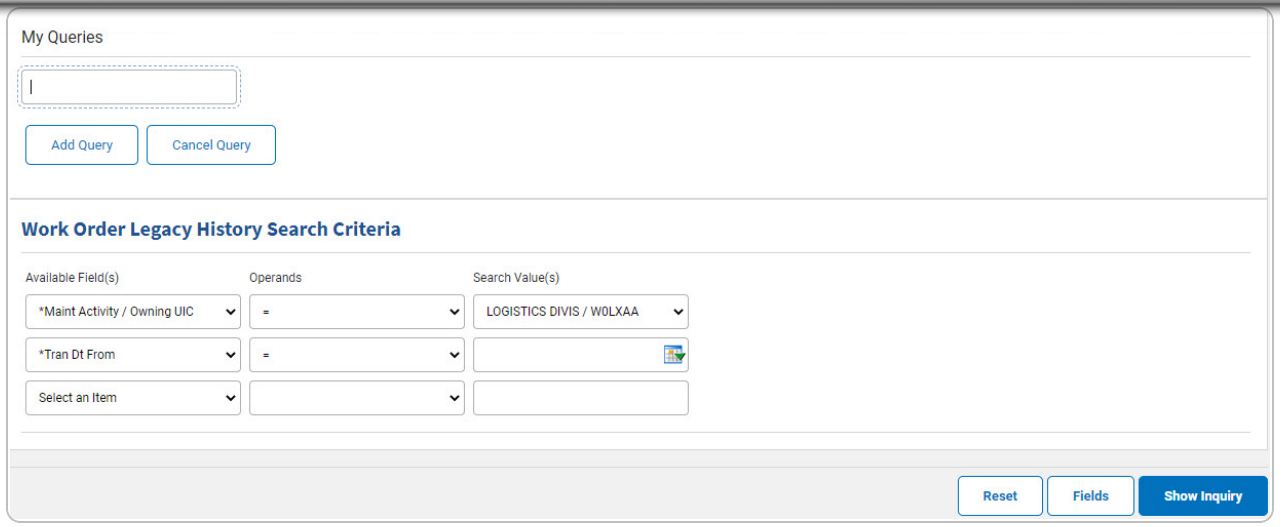

a. Use ⌄ to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Work Order Legacy History Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*

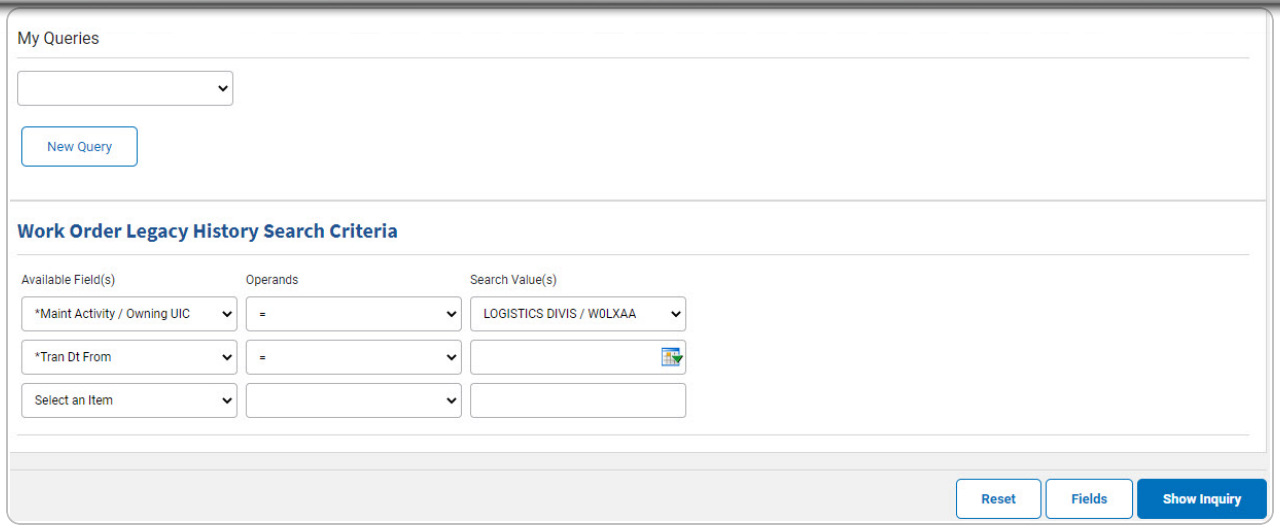

2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*

   Select Fields. *The* ***Work Order Legacy History Inquiry — Select Fields*** *page appears.*
5. OR

   Select Show Inquiry. *The* ***Work Order Legacy History Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*

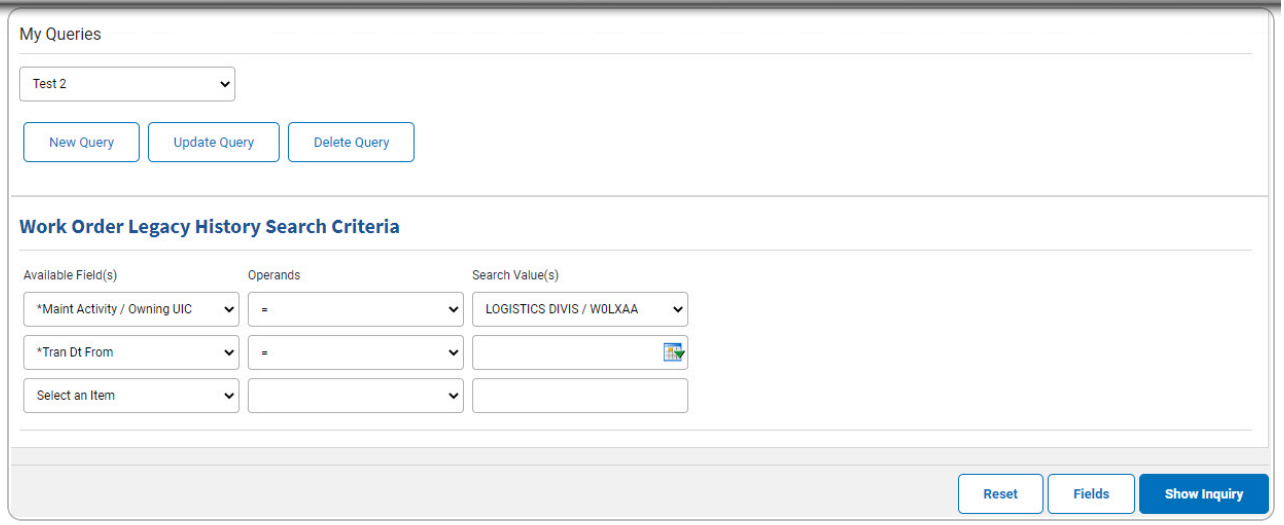

Select Fields. *The **Work Order Legacy History Inquiry — Select Fields** page appears.*

2. OR

Select Show Inquiry. *The **Work Order Legacy History Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*

   Select Fields. *The **Work Order Legacy History Inquiry — Select Fields** page appears.*

4. OR

   Select Show Inquiry. *The **Work Order Legacy History Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and New Query is joined by Update Query and Delete Query. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*

3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Work Order Legacy History Inquiry — Select Fields** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..

13 — Mandatory Entry: *Available Field(s)*.	
13 — Mandatory Entry: *Operands*.	Missing Entry. No data was entered. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Query Name*.	
xxxx – Saved Inquiry already exists. Select Update Query **or** Delete Query **.**	Invalid Entry. The inquiry already exists in the database. Use the existing inquiry, or select Update Query to revise the existing query.
102 — Inquiry already exists.	Invalid entry. The Inquiry is already established. Re-enter the inquiry or select Update Query or Delete Query to modify the existing inquiry.
106 — Operand must be =, >, <, >= , <= , <>, or Like.	Missing Entry. The Field value was entered, but no operand was selected. Choose an operand from the drop-down menu.
31 — To perform Search, data must be entered in one or more fields.	Missing Entry. At least one field is necessary to perform the search. Enter at least one field, then select the Search button.

Select Fields for the NMC Inquiry

Overview

The NMC Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > Maintenance > NMC > Search Criteria > Fields > NMC Inquiry Fields Selection page

Page Fields

The following fields display on the **NMC Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.

C. Use to select the third Available Field.

D. Repeat Step C to add additional search criteria.

Note

Adding another Available Field automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use to select the first Operands.

B. Use to select the second Operands.

C. Use to select the second Operands.

D. Repeat Step C to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use to select the first Search Value.

B. Use to select the second Search Value.

C. Enter the second Search Value(s) in the field provided.

D. Repeat Step C to add additional search criteria.

Remove an Available Field Row

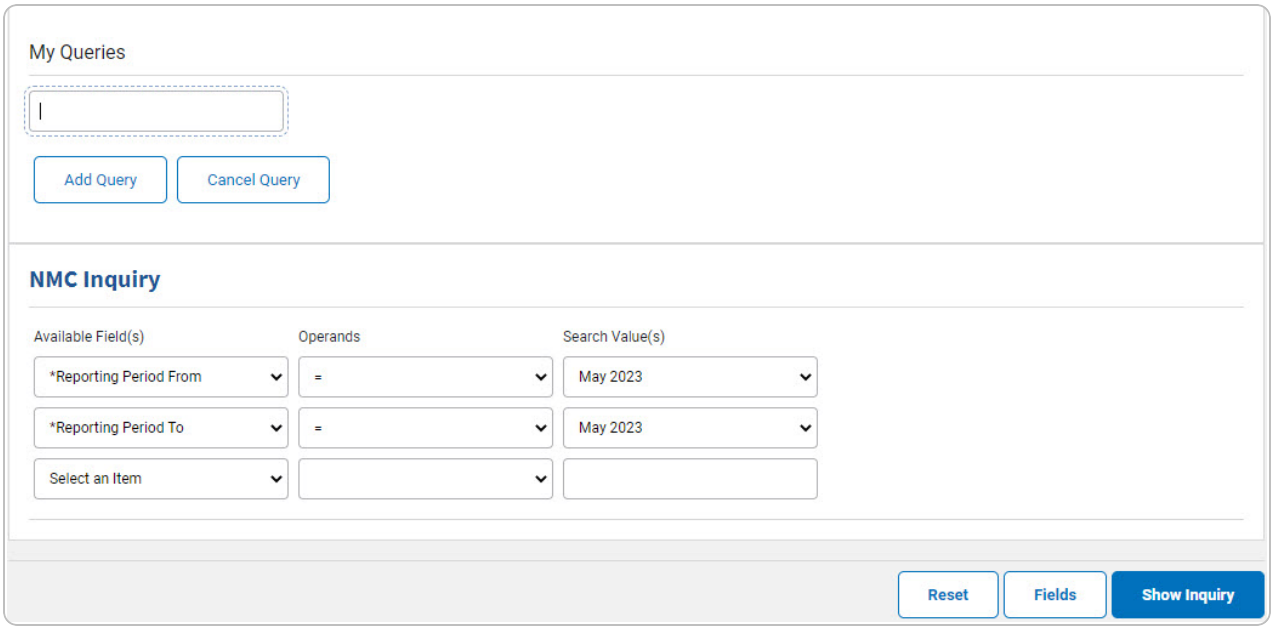

a. Use  to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **NMC Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*

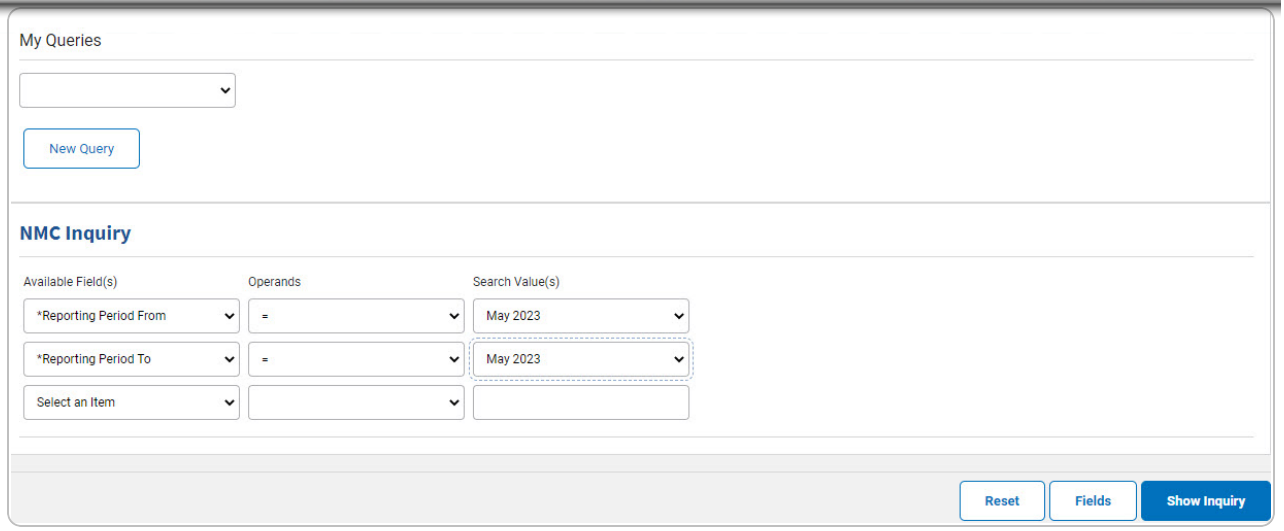

2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*
5. Select Fields. *The* ***NMC Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***NMC Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*

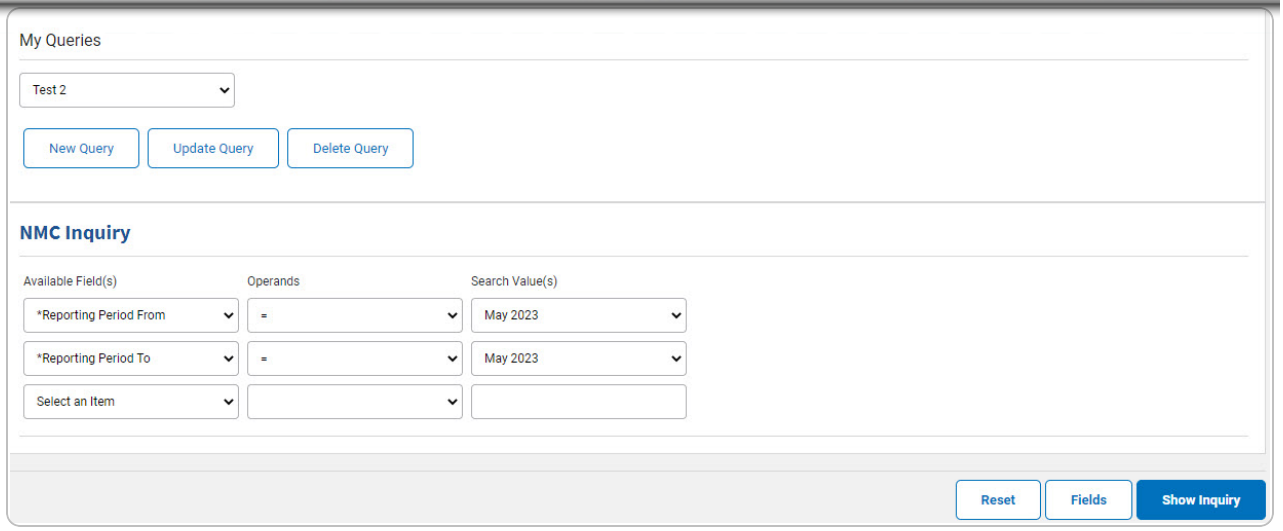

2. Select Fields. *The **NMC Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **NMC Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and New Query is joined by Update Query and Delete Query. The selected query information appears in the search criteria grid.*

2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*

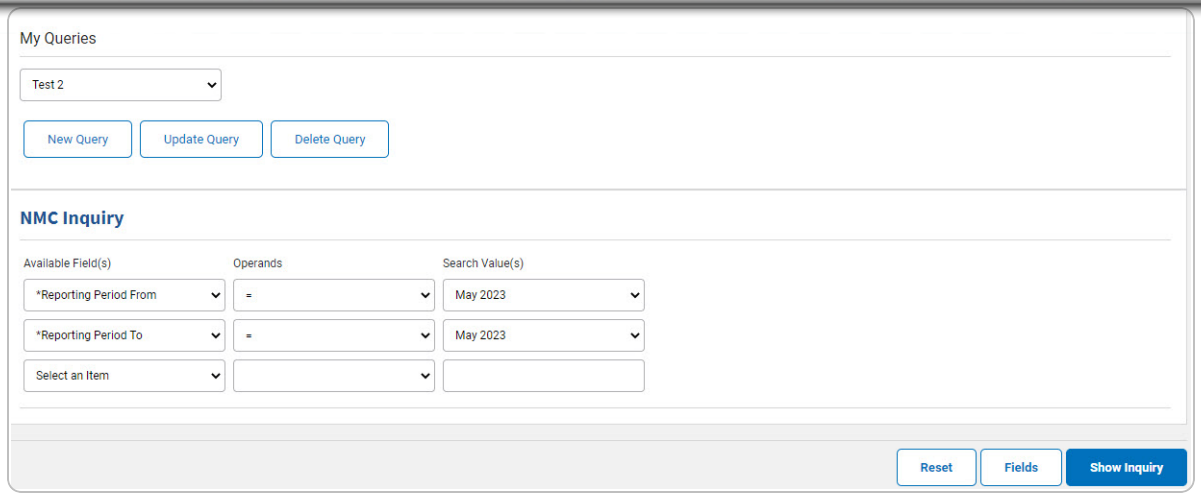

4. Select Fields. *The **NMC Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **NMC Inquiry — Results** page appears.*

Delete a My Queries Inquiry

A. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

B. *Verify the query information.*

C. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **NMC Inquiry — Select Fields** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..

13 — Mandatory Entry: *Available Field(s)*.	
13 — Mandatory Entry: *Operands*.	Missing Entry. No data was entered. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Query Name*.	
xxxx – Saved Inquiry already exists. Select Update Query **or** Delete Query **.**	Invalid Entry. The inquiry already exists in the database. Use the existing inquiry, or select Update Query to revise the existing query.
102 — Inquiry already exists.	Invalid entry. The Inquiry is already established. Re-enter the inquiry or select Update Query or Delete Query to modify the existing inquiry.
106 — Operand must be =, >, <, >= , <= , <>, or Like.	Missing Entry. The Field value was entered, but no operand was selected. Choose an operand from the drop-down menu.
31 — To perform Search, data must be entered in one or more fields.	Missing Entry. At least one field is necessary to perform the search. Enter at least one field, then select the Search button.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **Asset Deferred Parts Inquiry** page appears.*

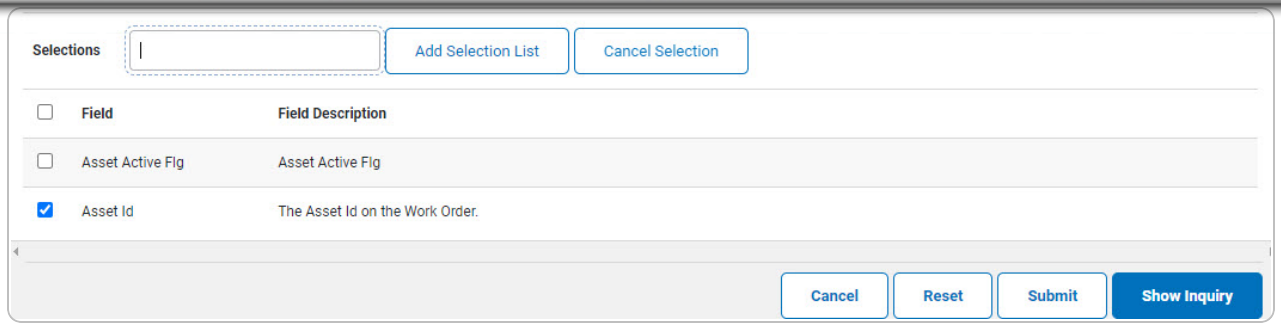

2. Choose the desired file type:
   - Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

     OR

     Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*
3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*
4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

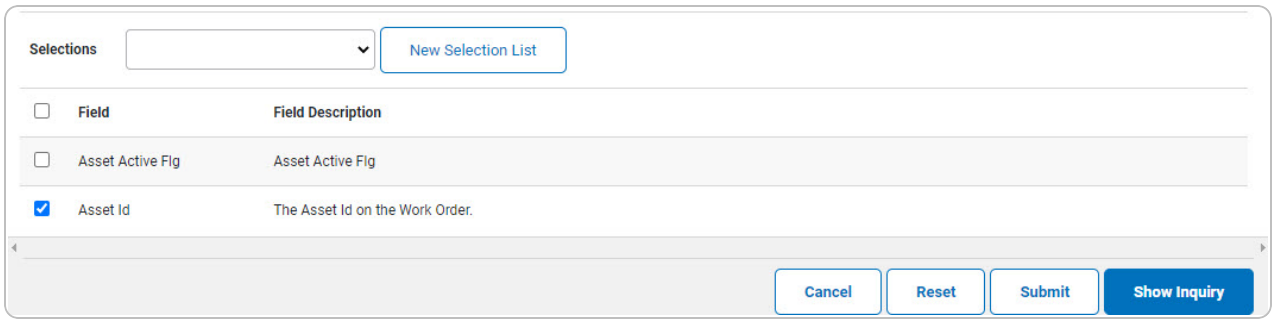

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

   Select Show Inquiry for small volumes of data. *The* ***Asset Deferred Parts Inquiry — Results*** *page appears.*
5. **OR**

   Select Submit for large volumes of data. *The* ***Asset Deferred Parts Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

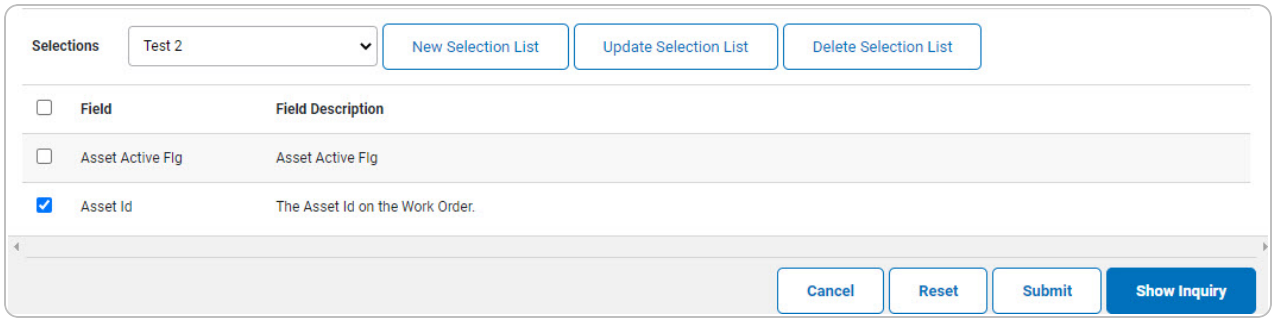

3. Select Show Inquiry for small volumes of data. *The **Asset Deferred Parts Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Asset Deferred Parts Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***Asset Deferred Parts Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Asset Deferred Parts Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

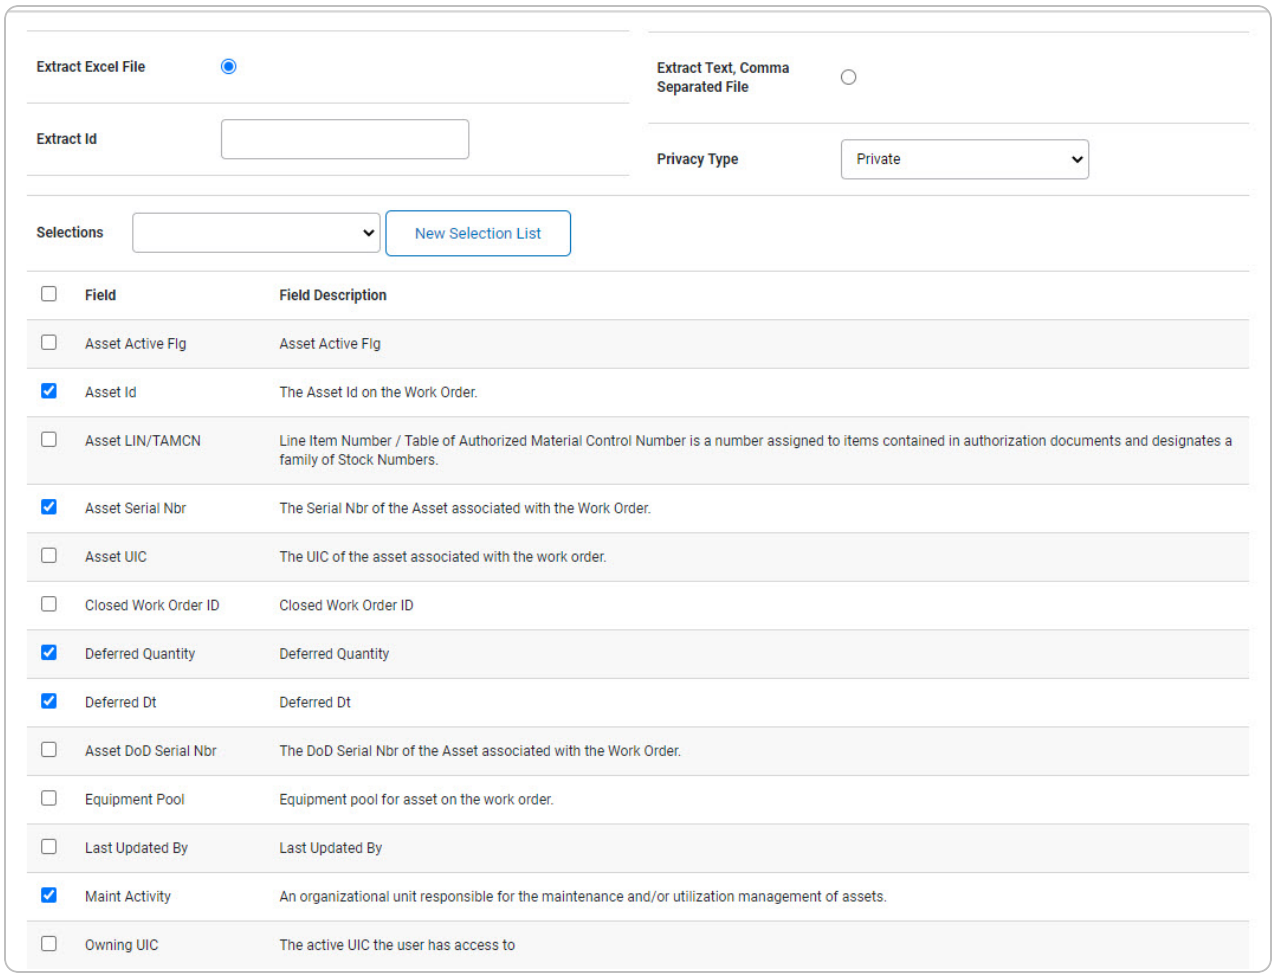

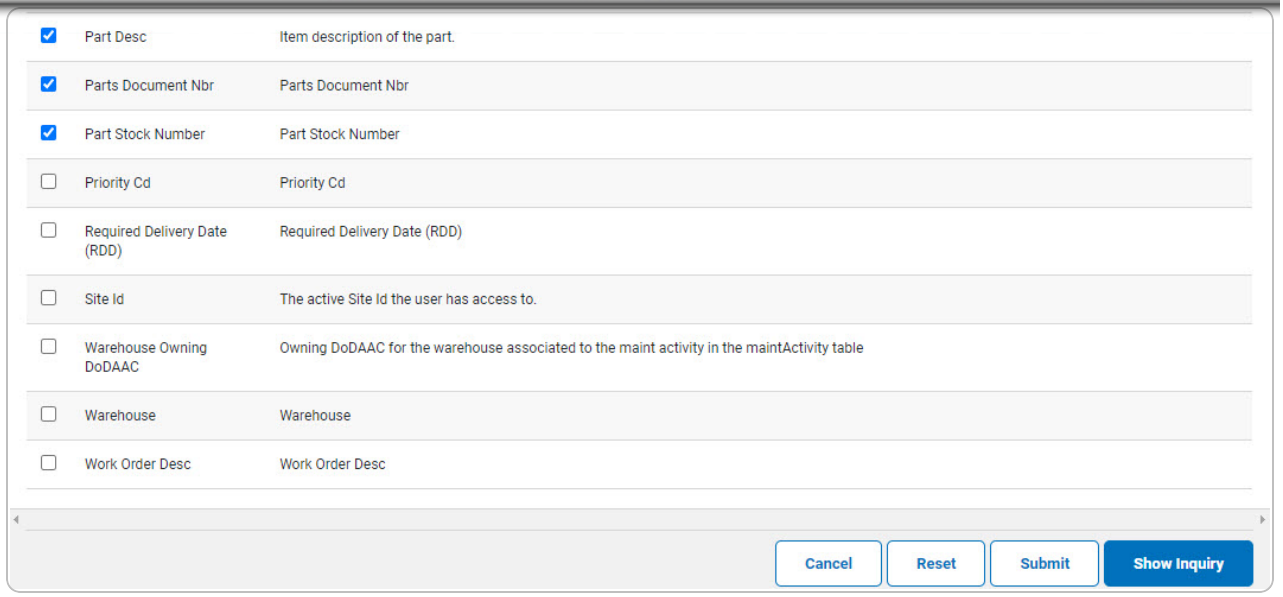

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Asset Deferred Parts Inquiry** page appears.*

2. Select the fields required for the inquiry. *8 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Click ☐ to select the Asset Active FLG. *Select if the inquiry contains an asset active flag.*

C. Repeat Step B to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Use ⌄ to select the second Operands.

C. Repeat Step B to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use ⌄ to select the first Search Value.

B. Use ⌄ to select the second Search Value.

C. Repeat Step B to add additional search criteria.

Remove an Available Field Row

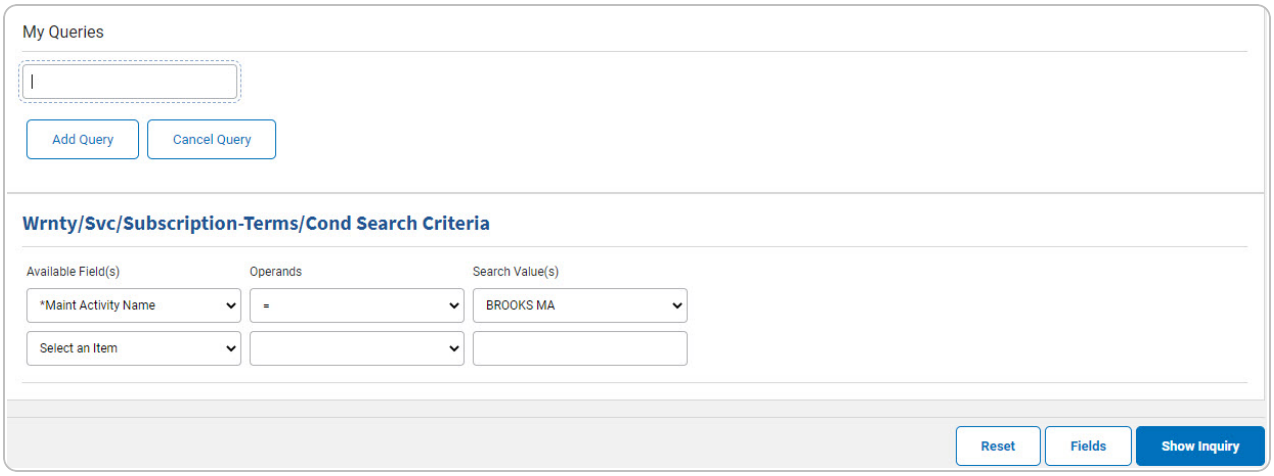

a. Use  to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Wrnty/Svc/Subscription - Terms/Cond Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*

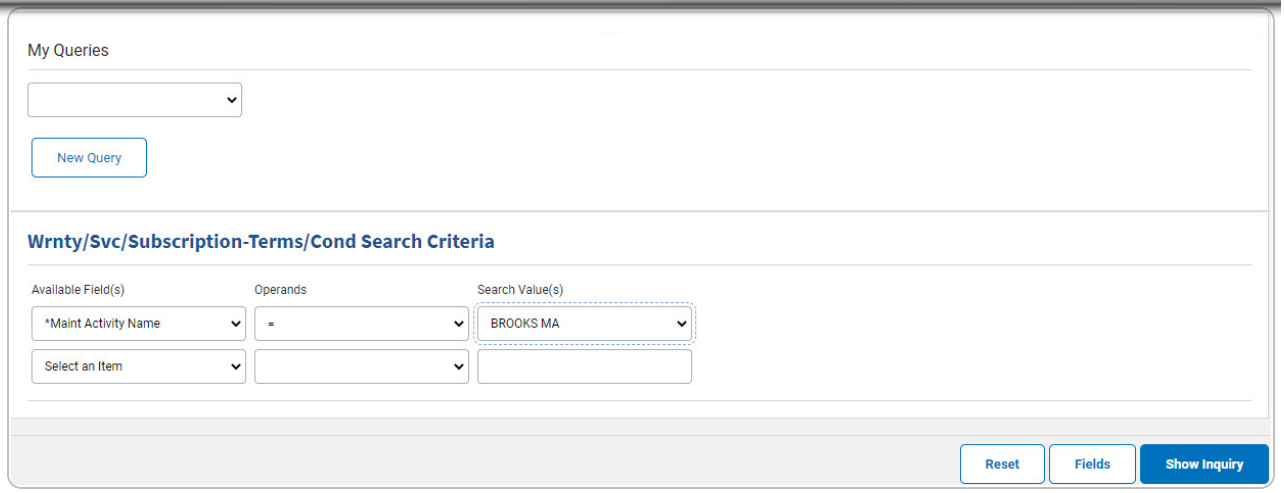

2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*
5. Select Fields. *The* ***Wrnty/Svc/Subscription - Terms/Cond Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Wrnty/Svc/Subscription - Terms/Cond Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*

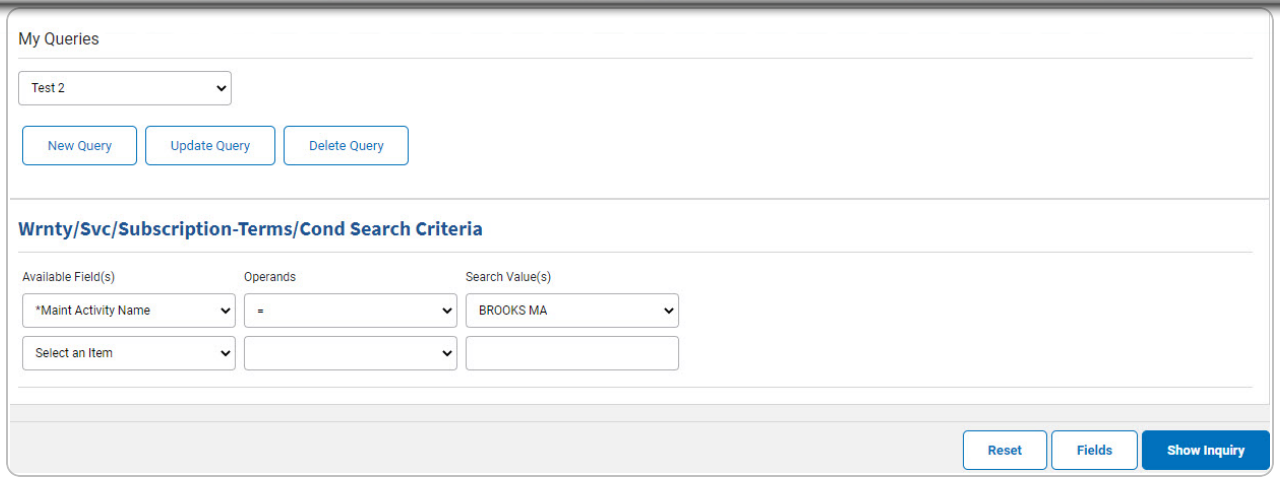

Select Fields. *The **Wrnty/Svc/Subscription - Terms/Cond Inquiry — Select Fields** page appears.*

2. OR

   Select Show Inquiry. *The **Wrnty/Svc/Subscription - Terms/Cond Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*

   Select Fields. *The* ***Wrnty/Svc/Subscription - Terms/Cond Inquiry — Select Fields*** *page appears.*

4. OR

   Select Show Inquiry. *The* ***Wrnty/Svc/Subscription - Terms/Cond Inquiry — Results*** *page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*

3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Wrnty/Svc/Subscription - Terms/Cond Inquiry — Select Fields** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..

13 — Mandatory Entry: *Available Field(s)*.	
13 — Mandatory Entry: *Operands*.	Missing Entry. No data was entered. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Query Name*.	
xxxx – Saved Inquiry already exists. Select Update Query **or** Delete Query **.**	Invalid Entry. The inquiry already exists in the database. Use the existing inquiry, or select Update Query to revise the existing query.
102 — Inquiry already exists.	Invalid entry. The Inquiry is already established. Re-enter the inquiry or select Update Query or Delete Query to modify the existing inquiry.
106 — Operand must be =, >, <, >= , <= , <>, or Like.	Missing Entry. The Field value was entered, but no operand was selected. Choose an operand from the drop-down menu.
31 — To perform Search, data must be entered in one or more fields.	Missing Entry. At least one field is necessary to perform the search. Enter at least one field, then select the Search button.

Select Fields for the WRNTY/SVC/SUBSCRIPTION - TERMS/COND Inquiry

Overview

The WRNTY/SVC/SUBSCRIPTION - TERMS/COND Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > WRNTY/SVC/SUBSCRIP > TERMS/COND> Search Criteria > Fields > WRNTY/SVC/SUBSCRIPTION - TERMS/COND Inquiry Fields Selection page

Page Fields

The following fields display on the **WRNTY/SVC/SUBSCRIPTION - TERMS/COND Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The* ***Wrnty/Svc/Subscription - Terms/Cond Inquiry*** *page appears.*

2. Choose the desired file type:

   - Click ○ to select Extract Excel File. *The extracted file on the* ***View Inquiry Extract*** *page is an .XLS file.*

     OR

     Click ○ to select Extract Text, Comma Separated File. *The extracted file on the* ***View Inquiry Extract*** *page is a .CSV file.*

3. Enter an unique identifier in the Extract Id field provided. *This adds the identifier to the link on the* ***View Inquiry Extract*** *page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select [New Selection List]. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting [Cancel Selection] at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select [Add Selection List]. *The page refreshes, and the selected list is added.* [Add Selection List] *is replaced by* [Update Selection List] *and* [Delete Selection List].

   Select [Show Inquiry] for small volumes of data. *The* ***Wrnty/Svc/Subscription - Terms/Cond Inquiry — Results*** *page appears.*

5. **OR**

   Select [Submit] for large volumes of data. *The* ***Wrnty/Svc/Subscription - Terms/Cond Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

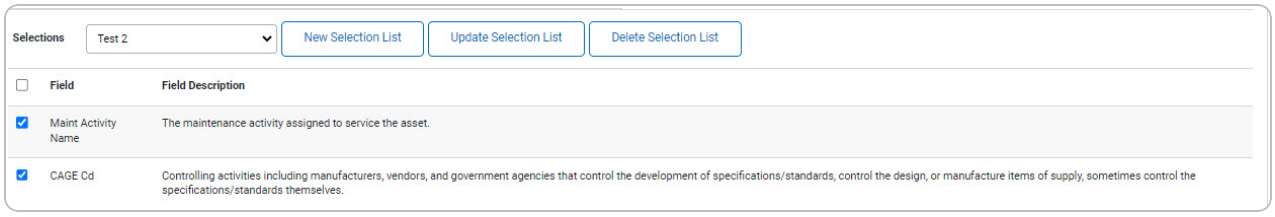

3. Select Show Inquiry for small volumes of data. *The **Wrnty/Svc/Subscription - Terms/Cond Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Wrnty/Svc/Subscription - Terms/Cond Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***Wrnty/Svc/Subscription - Terms/Cond Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Wrnty/Svc/Subscription - Terms/Cond Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

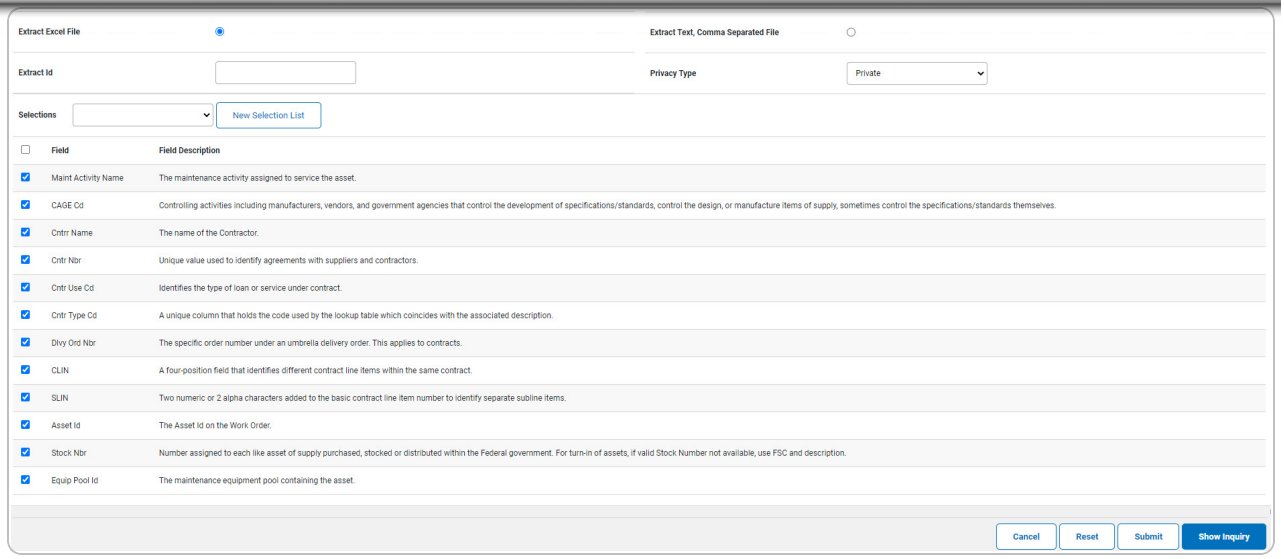

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The* ***Wrnty/Svc/Subscription - Terms/Cond Inquiry*** *page appears.*

2. Select the fields required for the inquiry. *The first 12 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the MAINT ACTIVITY NAME contains the appropriate ☑ or ☐. *Select if the inquiry contains a maintenance activity name.*
- Verify the CAGE CD contains the appropriate ☑ or ☐. *Select if the inquiry contains a code.*
- Verify the CNTRR NAME contains the appropriate ☑ or ☐. *Select if the inquiry contains a contractor name.*
- Verify the CNTR NBR contains the appropriate ☑ or ☐. *Select if the inquiry has a contract number.*
- Verify the CNTR USE CD contains the appropriate ☑ or ☐. *Select if the inquiry contains a contract use code.*

- Verify the CNTR TYP CD contains the appropriate ☑ or ☐. *Select if the inquiry contains a contract type code.*
- Verify the DLVY ORD NBR contains the appropriate ☑ or ☐. *Select if the inquiry contains a delivery order number.*
- Verify the CLIN contains the appropriate ☑ or ☐. *Select if the inquiry contains a contract line item number.*
- Verify the SLIN contains the appropriate ☑ or ☐. *Select if the inquiry contains a subordinate line item number.*
- Verify the ASSET ID contains the appropriate ☑ or ☐. *Select if the inquiry contains an asset identifier.*
- Verify the STOCK NBR contains the appropriate ☑ or ☐. *Select if the inquiry contains a stock number.*
- Verify the EQUIP POOL ID contains the appropriate ☑ or ☐. *Select if the inquiry contains an equipment pool identifier.*

3. Select Show Inquiry for small volumes of data. *The **Wrnty/Svc/Subscription - Terms/Cond Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Wrnty/Svc/Subscription - Terms/Cond Inquiry Transaction Status** page appears.*

Select Fields for the WRNTY/SVC/SUBSCRIPTION - ASSET ASSOC Inquiry

Overview

The WRNTY/SVC/SUBSCRIPTION - ASSET ASSOC Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > WRNTY/SVC/SUBSCRIP > ASSET ASSOC> Search Criteria > Fields > WRNTY/SVC/SUBSCRIPTION - ASSET ASSOC Inquiry Fields Selection page

Page Fields

The following fields display on the **WRNTY/SVC/SUBSCRIPTION - ASSET ASSOC Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The* ***Wrnty/Svc/Subscription - Asset Assoc Inquiry*** *page appears.*

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select [New Selection List]. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting [Cancel Selection] at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select [Add Selection List]. *The page refreshes, and the selected list is added.* [Add Selection List] *is replaced by* [Update Selection List] *and* [Delete Selection List].

   Select [Show Inquiry] for small volumes of data. *The **Wrnty/Svc/Subscription - Asset Assoc Inquiry — Results** page appears.*
5.

OR

Select Submit for large volumes of data. *The* ***Wrnty/Svc/Subscription - Asset Assoc Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

   Select Show Inquiry for small volumes of data. *The* ***Wrnty/Svc/Subscription - Asset Assoc Inquiry — Results*** *page appears.*

3. **OR**

   Select Submit for large volumes of data. *The* ***Wrnty/Svc/Subscription - Asset Assoc Inquiry Transaction Status*** *page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***Wrnty/Svc/Subscription - Asset Assoc Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Wrnty/Svc/Subscription - Asset Assoc Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

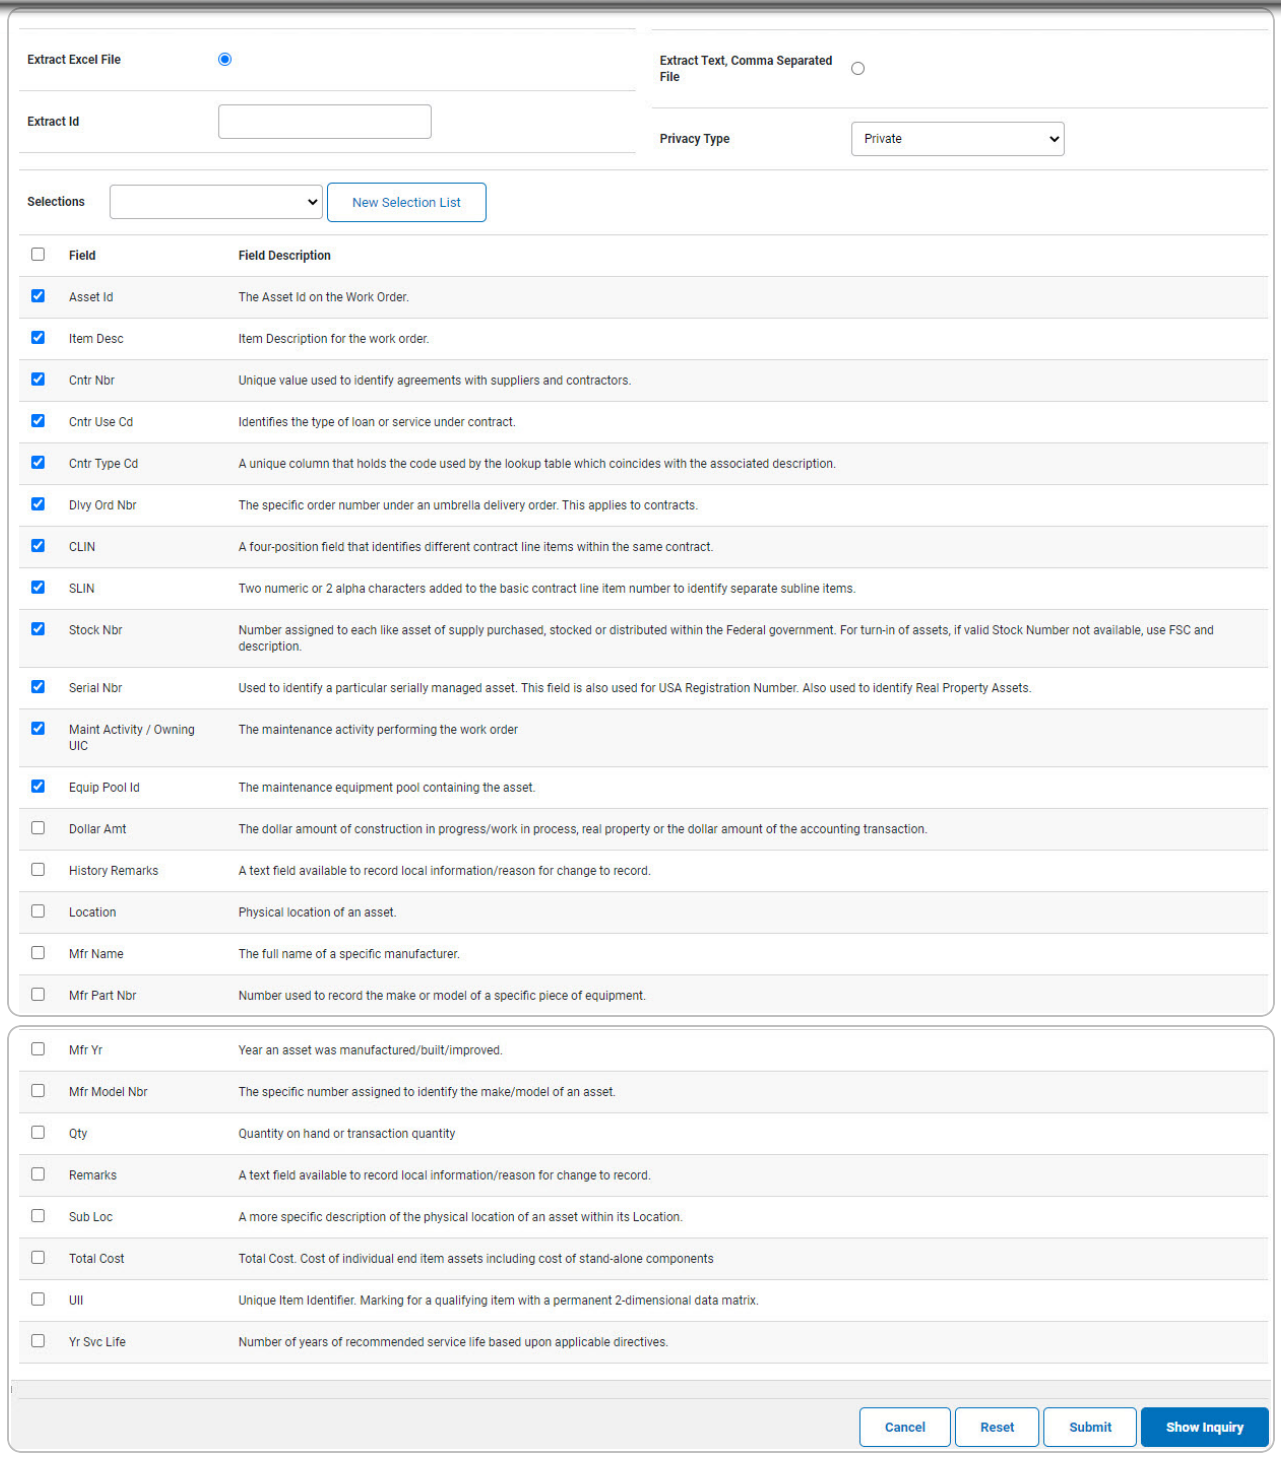

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The* ***Wrnty/Svc/Subscription - Asset Assoc Inquiry*** *page appears.*

2. Select the fields required for the inquiry. *The first 12 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the ASSET ID contains the appropriate ☑ or ☐. *Select if the inquiry contains an asset identifier.*
- Verify the ITEM DESC contains the appropriate ☑ or ☐. *Select if the inquiry contains an item description.*
- Verify the CNTR NBR contains the appropriate ☑ or ☐. *Select if the inquiry contains a contract number.*
- Verify the CNTR USE CD contains the appropriate ☑ or ☐. *Select if the inquiry contains a contract use code.*
- Verify the CNTR TYP CD contains the appropriate ☑ or ☐. *Select if the inquiry contains a contract type code.*
- Verify the DLVY ORD NBR contains the appropriate ☑ or ☐. *Select if the inquiry contains a delivery order number.*
- Verify the CLIN contains the appropriate ☑ or ☐. *Select if the inquiry contains a contract line item number.*
- Verify the SLIN contains the appropriate ☑ or ☐. *Select if the inquiry contains a subordinate line item number.*
- Verify the STOCK NBR contains the appropriate ☑ or ☐. *Select if the inquiry contains a stock number.*
- Verify the SERIAL NBR contains the appropriate ☑ or ☐. *Select if the inquiry contains a serial number.*

- Verify the MAINT ACTIVITY / OWNING UIC contains the appropriate ☑ or ☐. *Select if the inquiry contains a maintenance activity to perform the work order.*
- Verify the EQUIP POOL ID contains the appropriate ☑ or ☐. *Select if the inquiry contains an equipment pool identifier.*
- Click ☐ to select the DOLLAR AMT. *Select if the inquiry contains a dollar amount for a process, property, or transaction.*
- Click ☐ to select the History Remarks. *Select if the inquiry contains history remark information.*
- Click ☐ to select the Location. *Select if the inquiry contains location information.*
- Click ☐ to select the MFR NAME. *Select if the inquiry contains a manufacturer name.*
- Click ☐ to select the MFR PART NBR. *Select if the inquiry contains a manufacturer part number.*
- Click ☐ to select the MFR YEAR. *Select if the inquiry contains a manufacturer year.*
- Click ☐ to select the MFR MODEL NBR. *Select if the inquiry contains a manufacturer model number.*
- Click ☐ to select the QTY. *Select if the inquiry contains a quantity.*
- Click ☐ to select the Remarks. *Select if the inquiry contains remark information.*
- Click ☐ to select the SUB LOC. *Select if the inquiry contains a subordinate location.*
- Click ☐ to select the Total Cost. *Select if the inquiry contains a total cost amount.*
- Click ☐ to select the UII. *Select if the inquiry contains an unique item identifier.*
- Click ☐ to select the YR SVC LIFE. *Select if the inquiry contains a recommended year service life information.*

Select Show Inquiry for small volumes of data. *The* ***Wrnty/Svc/Subscription - Asset Assoc Inquiry — Results*** *page appears.*

3. **OR**

   Select Submit for large volumes of data. *The* ***Wrnty/Svc/Subscription - Asset Assoc Inquiry Transaction Status*** *page appears.*

Search for a Maintenance Asset Utilization Inquiry

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

A. *The first Available Field(s) option (UTIL RPTD) automatically populates and is not editable.*

B. *The second Available Field(s) option (Status) automatically populates and is not editable.*

C. *The third Available Field(s) option (UTIL RPTD FROM DT) automatically populates and is not editable.*

D. *The fourth Available Field(s) option (UTIL RPTD TO DT) automatically populates and is not editable.*

E. *The fifth Available Field(s) option (SITE ID) automatically populates and is not editable.*

F. Use ⌄ to select the sixth Available Field.

G. Repeat Step F to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Use ⌄ to select the second Operands.

C. Use ⌄ to select the third Operands.

D. Use ⌄ to select the fourth Operands.

E. Use ⌄ to select the fifth Operands.

F. Use ⌄ to select the sixth Operands.

G. Repeat Step F to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use ⌄ to select the first Search Value.

B. Use ⌄ to select the second Search Value.

C. Use ⌄ to select the third Search Value.

D. Use ⌄ to select the fourth Search Value.

E. Use ⌄ to select the fifth Search Value.

F. Use ⌄ to select the sixth Search Value.

G. Repeat Step F to add additional search criteria.

Remove an Available Field Row

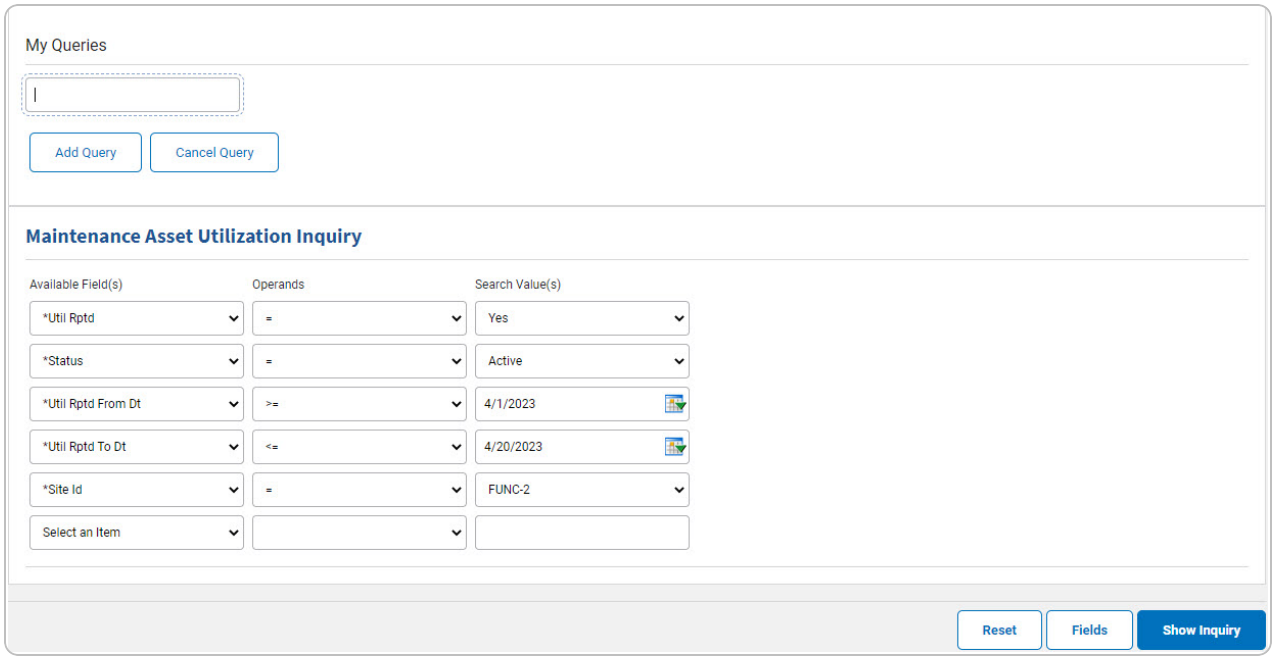

a. Use ⌄ to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Maintenance Asset Utilization Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*

Note

Selecting Cancel Query at any time from this point of the procedure removes all revisions and returns My Query to a drop-down field.

2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*

Note

Create a unique name with a meaningful description, and contains the purpose of the query.

Example: AllAssetsBldg20 or EquipPoolSmallVehicleNoCert

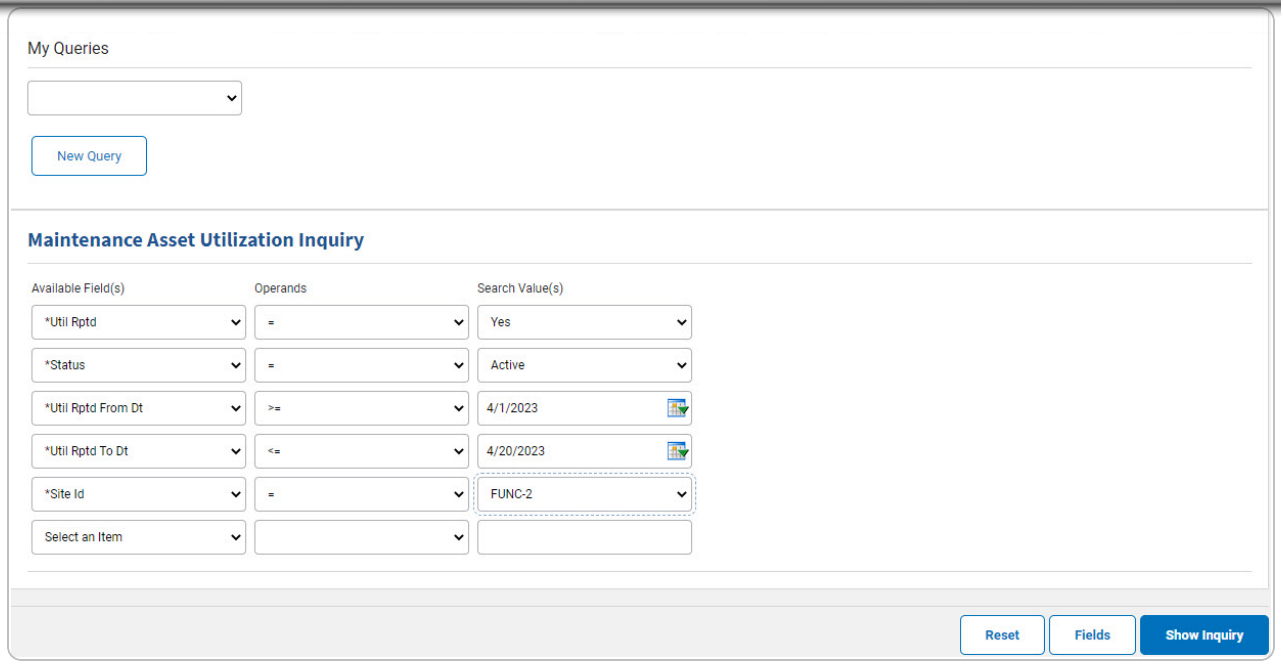

3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*

   Select Fields. *The* ***Maintenance Asset Utilization Inquiry — Select Fields*** *page appears.*
5. OR

   Select Show Inquiry. *The* ***Maintenance Asset Utilization Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*

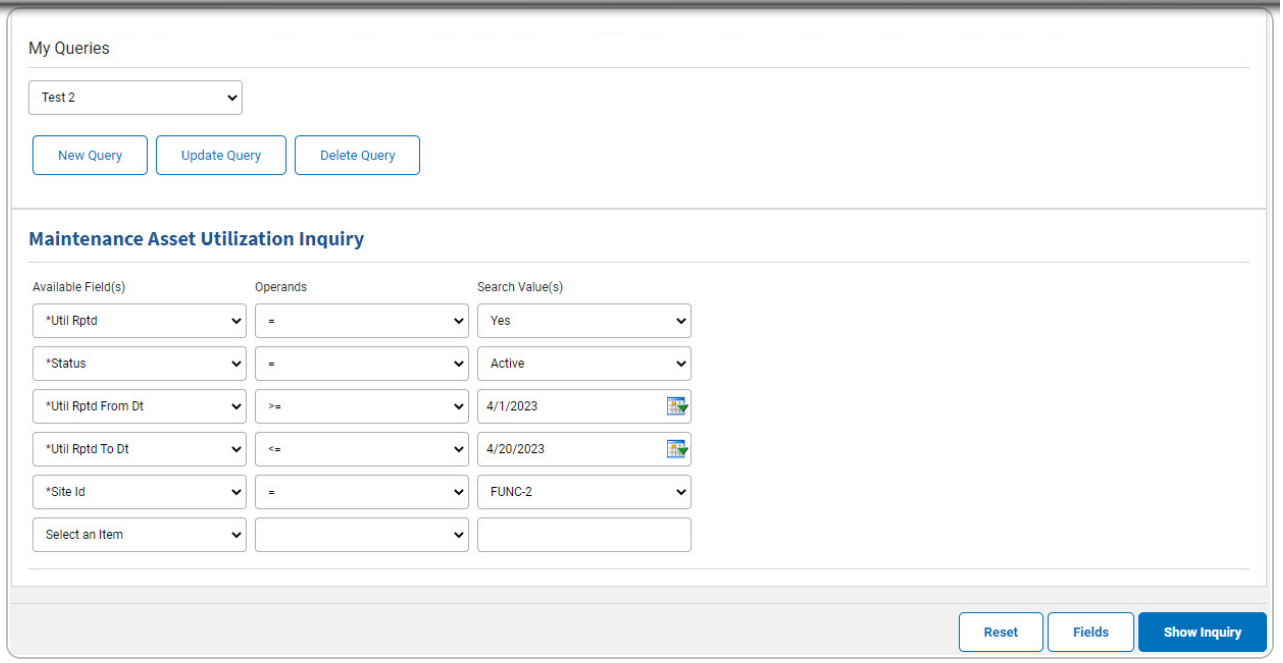

Select Fields. *The **Maintenance Asset Utilization Inquiry — Select Fields** page appears.*

2. OR

Select Show Inquiry. *The **Maintenance Asset Utilization Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*

   Select Fields. *The* ***Maintenance Asset Utilization Inquiry — Select Fields*** *page appears.*

4. OR

   Select Show Inquiry. *The* ***Maintenance Asset Utilization Inquiry — Results*** *page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*

3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Maintenance Asset Utilization Inquiry — Select Fields** page appears.*

☐	Loc	Physical location of an asset.
☐	Maint Mgt Cd	The code describing the intended use of the maintenance asset (e.g. maintenance, utilization, etc.).
☐	Min Obj Percent	Minimum percent of utilization.
☐	Obj Percent Util	Desired percentage of utilization.
☐	Petroleum Dedicated	Indicates whether the vehicle fuel is low green house gas
☐	Pgm Id	Asset Utilization Header
☐	Possible Days Used	Indicates Prime shift as 4 or 5 days a week.
☐	Replacement Mtr	Replacement Meter Flag will be displayed as Yes or No.
☐	Replacement Mtr Rdng	Identifies the replacement meter reading data at the time the meter was replaced.
☐	Site Id	The active Site Id the user has access to.
☐	Source Cd	A code and description that identifies the method of input.
☐	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☐	Sub Loc	A more specific description of the physical location of an asset within its Location.
☐	UIC	The UIC of the maintenance activity assigned to service the asset.
☐	UIC Name	A unit, organization, or activity name
☐	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.
☐	Util Off Base Qty	The amount of utilization recorded off-base for the associated asset.
☐	Util On Base Qty	The amount of utilization recorded on-base for the associated asset.

Cancel Reset Submit Show Inquiry

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

   Select Show Inquiry for small volumes of data. *The* ***Maintenance Asset Utilization Inquiry — Results*** *page appears.*
5. **OR**

   Select Submit for large volumes of data. *The* ***Maintenance Asset Utilization Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

   Select Show Inquiry for small volumes of data. *The **Maintenance Asset Utilization Inquiry — Results** page appears.*

3. **OR**

   Select Submit for large volumes of data. *The **Maintenance Asset Utilization Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

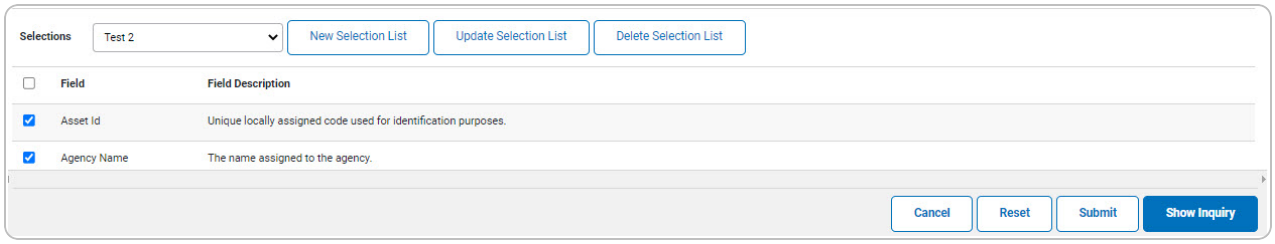

Select Show Inquiry for small volumes of data. *The* ***Maintenance Asset Utilization Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Maintenance Asset Utilization Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

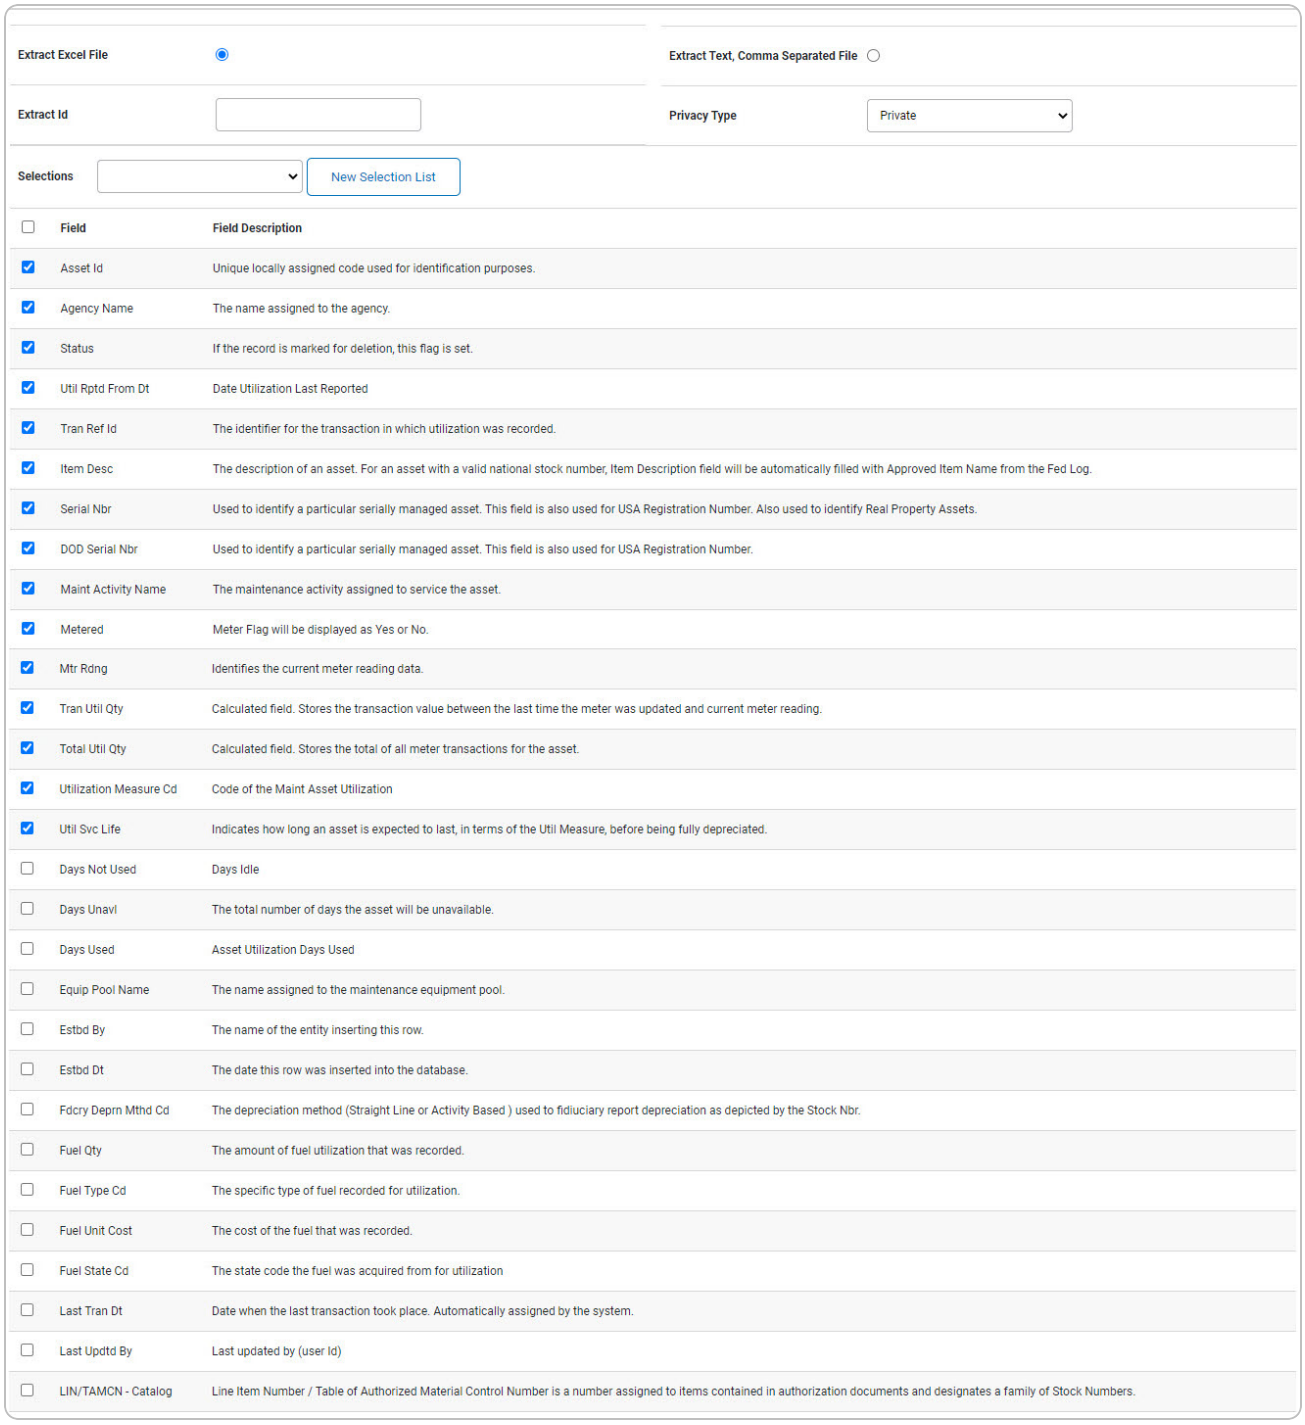

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Maintenance Asset Utilization Inquiry** page appears.*

Selections [ ] New Selection List

	Field	Field Description
☑	Asset Id	Unique locally assigned code used for identification purposes.
☑	Agency Name	The name assigned to the agency.
☑	Status	If the record is marked for deletion, this flag is set.
☑	Util Rptd From Dt	Date Utilization Last Reported
☑	Tran Ref Id	The identifier for the transaction in which utilization was recorded.
☑	Item Desc	The description of an asset. For an asset with a valid national stock number, Item Description field will be automatically filled with Approved Item Name from the Fed Log.
☑	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☑	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☑	Maint Activity Name	The maintenance activity assigned to service the asset.
☑	Metered	Meter Flag will be displayed as Yes or No.
☑	Mtr Rdng	Identifies the current meter reading data.
☑	Tran Util Qty	Calculated field. Stores the transaction value between the last time the meter was updated and current meter reading.
☑	Total Util Qty	Calculated field. Stores the total of all meter transactions for the asset.
☑	Utilization Measure Cd	Code of the Maint Asset Utilization
☑	Util Svc Life	Indicates how long an asset is expected to last, in terms of the Util Measure, before being fully depreciated.
☐	Days Not Used	Days Idle
☐	Days Unavl	The total number of days the asset will be unavailable.
☐	Days Used	Asset Utilization Days Used
☐	Equip Pool Name	The name assigned to the maintenance equipment pool.
☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt	The date this row was inserted into the database.
☐	Fdcry Deprn Mthd Cd	The depreciation method (Straight Line or Activity Based) used to fidiuciary report depreciation as depicted by the Stock Nbr.
☐	Fuel Qty	The amount of fuel utilization that was recorded.
☐	Fuel Type Cd	The specific type of fuel recorded for utilization.
☐	Fuel Unit Cost	The cost of the fuel that was recorded.
☐	Fuel State Cd	The state code the fuel was acquired from for utilization
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user Id)
☐	LIN/TAMCN - Catalog	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Numbers.

☐	Loc	Physical location of an asset.
☐	Maint Mgt Cd	The code describing the intended use of the maintenance asset (e.g. maintenance, utilization, etc.).
☐	Min Obj Percent	Minimum percent of utilization.
☐	Obj Percent Util	Desired percentage of utilization.
☐	Petroleum Dedicated	Indicates whether the vehicle fuel is low green house gas
☐	Pgm Id	Asset Utilization Header
☐	Possible Days Used	Indicates Prime shift as 4 or 5 days a week.
☐	Replacement Mtr	Replacement Meter Flag will be displayed as Yes or No.
☐	Replacement Mtr Rdng	Identifies the replacement meter reading data at the time the meter was replaced.
☐	Site Id	The active Site Id the user has access to.
☐	Source Cd	A code and description that identifies the method of input.
☐	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☐	Sub Loc	A more specific description of the physical location of an asset within its Location.
☐	UIC	The UIC of the maintenance activity assigned to service the asset.
☐	UIC Name	A unit, organization, or activity name
☐	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.
☐	Util Off Base Qty	The amount of utilization recorded off-base for the associated asset.
☐	Util On Base Qty	The amount of utilization recorded on-base for the associated asset.

Search for a Dispatch Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

   A. *The first Available Field(s) option (SITE ID) automatically populates and is not editable.*

   B. *The second Available Field(s) option (UIC) automatically populates and is not editable.*

   C. *The third Available Field(s) option (MAINT ACTIVITY / OWNING UIC) automatically populates and is not editable.*

   D. Use ⌄ to select the fourth Available Field.

   E. Repeat Step D to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Use ⌄ to select the second Operands.

C. Use ⌄ to select the third Operands.

D. Use ⌄ to select the fourth Operands.

E. Repeat Step D to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use ⌄ to select the first Search Value.

B. Use ⌄ to select the second Search Value.

C. Use ⌄ to select the third Search Value.

D. Use ⌄ to select the fourth Search Value.

E. Repeat Step D to add additional search criteria.

Remove an Available Field Row

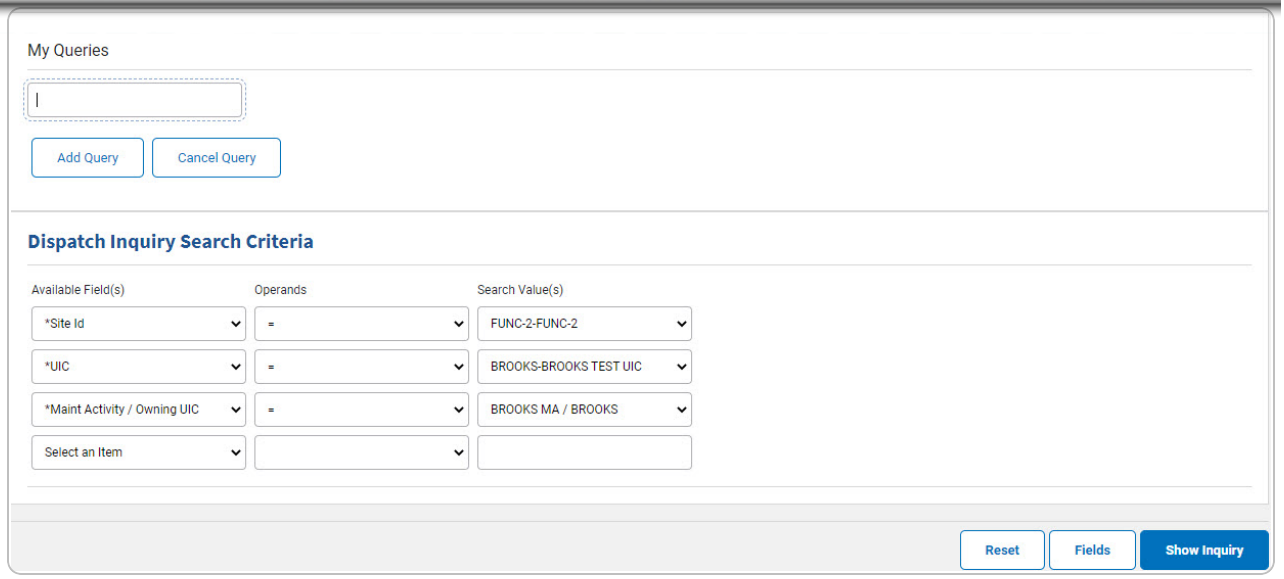

a. Use ⌄ to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Dispatch Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*

Note

Selecting Cancel Query at any time from this point of the procedure removes all revisions and returns My Query to a drop-down field.

2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*

Note

Create a unique name with a meaningful description, and contains the purpose of the query.

Example: AllAssetsBldg20 or EquipPoolSmallVehicleNoCert

3. *Add and/or Remove rows in the Search Criteria grid as needed.*

4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*

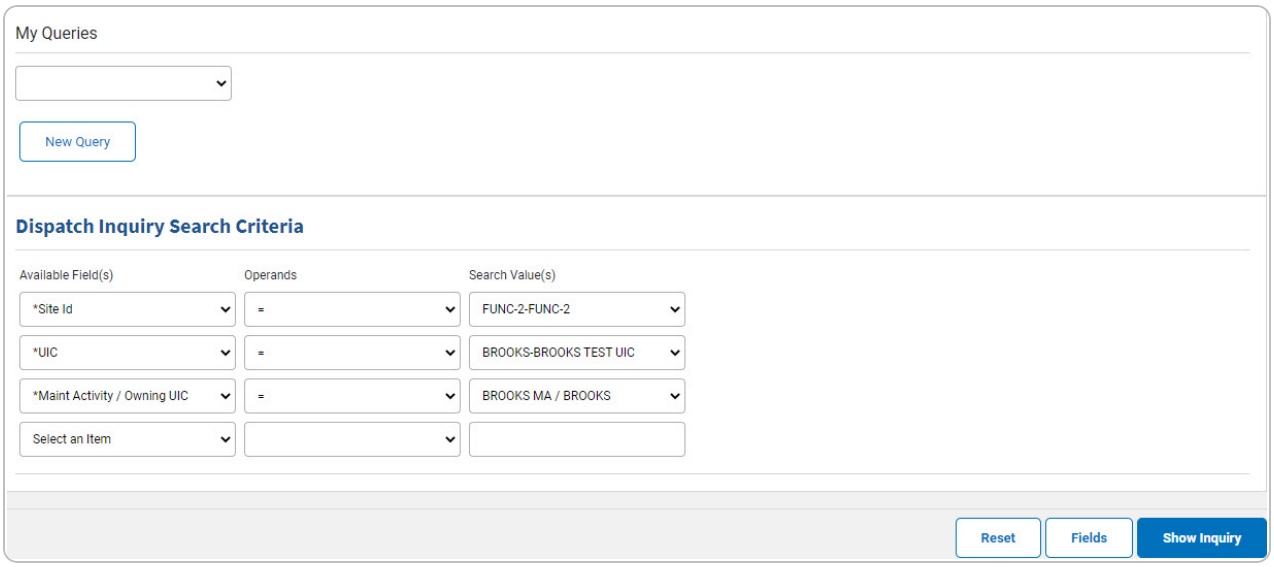

5. Select Fields. *The* ***Dispatch Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Dispatch Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*

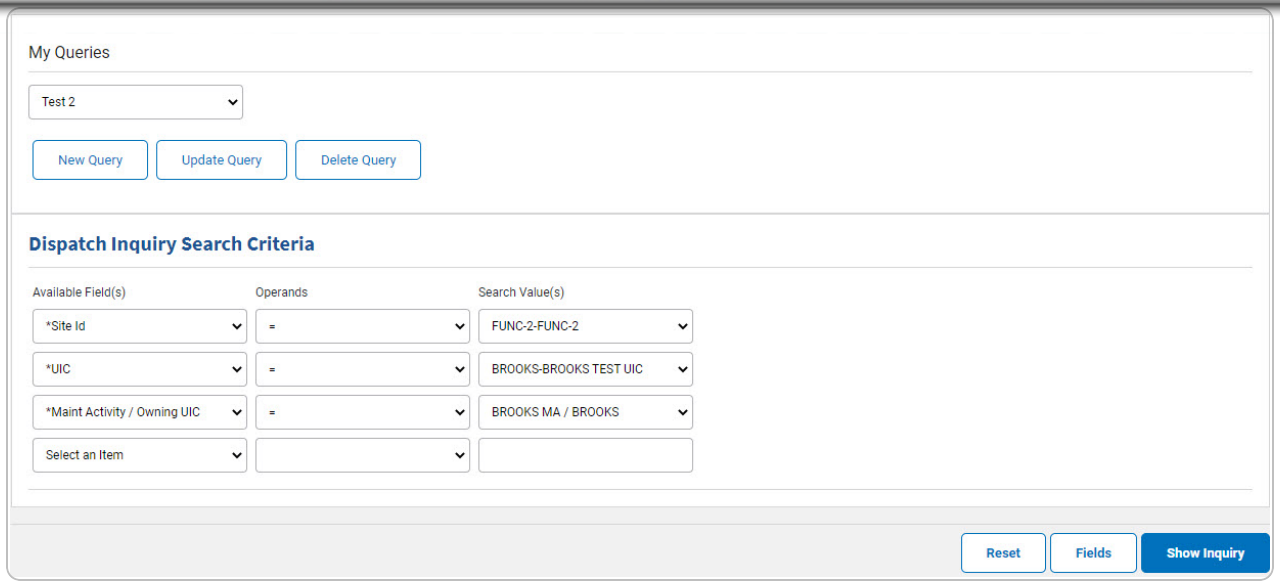

2. Select Fields. *The **Dispatch Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Dispatch Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*

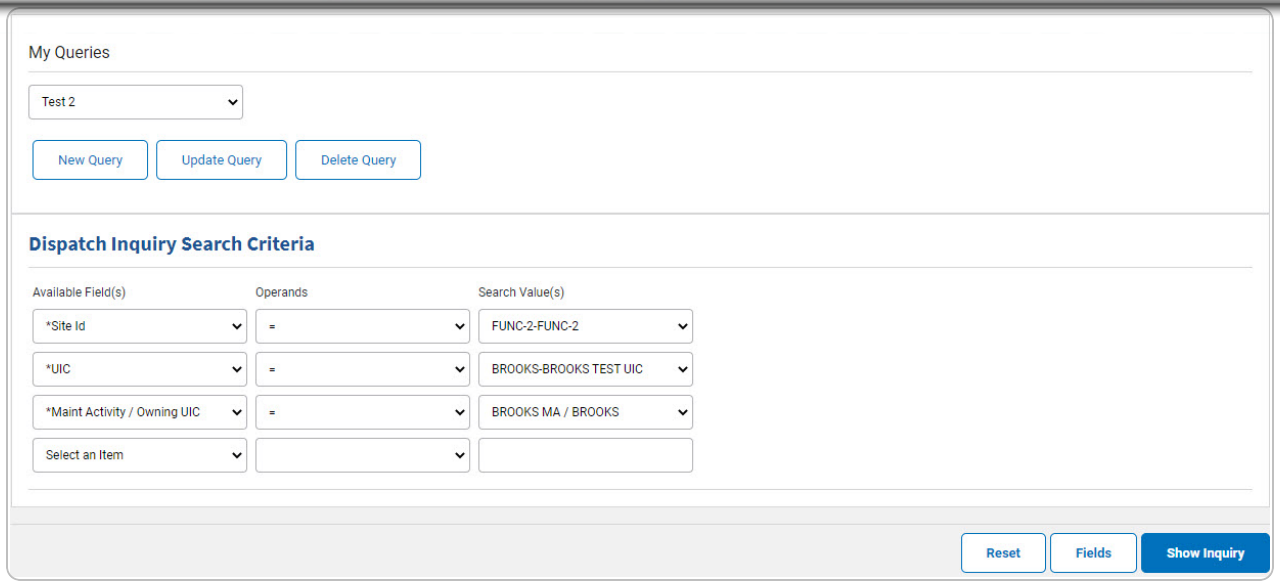

4. Select Fields. *The **Dispatch Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Dispatch Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and New Query is joined by Update Query and Delete Query. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Dispatch Inquiry — Select Fields** page appears.*

Select Fields for the Dispatch Inquiry

Overview

The Dispatch Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > Utilization > Dispatch > Search Criteria > Fields > Dispatch Inquiry Fields Selection page

Page Fields

The following fields display on the **Dispatch Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.

Extract Id [ ] Privacy Type [Private]

Selections [ ] New Selection List

	Field	Field Description
☑	Asset Id	Unique locally assigned code used for identification purposes.
☑	Item Desc	The description of an asset. For an asset with a valid national stock number, Item Description field will be automatically filled with Approved Item Name from the Fed Log.
☑	Maint Mgt Cd	The code describing the intended use of the maintenance asset (e.g. maintenance, utilization, etc.).
☑	Util Measure Cd	The measure used to calculate depreciation for fiduciary reporting the assets Depreciation Amount.
☑	Maint Activity Name	The maintenance activity assigned to service the asset.
☑	Equip Pool	The maintenance equipment pool containing the asset.
☑	Dispatch Cd	Daily, Weekly, Recurring etc.
☑	Dispatch Sts	The status of the dispatch, representing whether it is requested, allocated, etc.
☑	Dispatch Id	The identifier of the dispatch.
☑	Dispatch Ctgry	The identifier of the dispatch category.
☑	Sub Ctgry	The dispatch sub-category assigned to the asset.
☑	Asset Dispatch Ctgry	The dispatch category assigned to the maintenance asset.
☑	Asset Sub Ctgry	The dispatch sub-category assigned to the maintenance asset.
☑	Dispatch Unavl Cd	The code determining whether or not a particular asset is available for dispatch.
☑	Dispatch Purpose	The reason or purpose for the dispatch.
☑	Dispatched To	The entity receiving the dispatch.
☑	Dispatcher	The entity assigning the dispatch.
☑	Customer Account Id	The customer account ID associated with the dispatch.
☑	Job Order Nbr	Job Order Number
☑	Est Issue Dt/Tm	The estimated date and time for the dispatch to occur.
☑	Issue Dt/Tm	The date and time of dispatch issue.
☑	Est Return Dt/Tm	The estimated date/time the asset of the dispatch is to return.
☑	Return Dt/Tm	The date and time of the dispatch return.
☐	Activity Cd	Used to identify a specific installation or level of funding.
☐	Agency Name	The name assigned to the agency.
☐	Bags	Indicates that passengers require space for bags
☐	CAGE Cd	Controlling activities including manufacturers, vendors, and government agencies that control the development of specifications/standards, control the design, or manufacture items of supply, sometimes control the specifications/standards themselves.
☐	Commitment Id	Commitment Id for the dispatch
☐	Cond Cd	Used to classify material for degree of serviceability, condition, and completeness in terms of readiness for issue, and to identify actions underway to change status of materiel. This Field defaults to (A) but can be updated.
☐	Custodian Name	The name assigned to the property custodian.
☐	Custodian Nbr	One to six position code, locally assigned, used to identify an individual responsible for assigned assets.

☐	Days Idle	The number of days the asset was recorded as idle.
☐	Days Unavl	The number of days the asset was recorded as unavailable for use.
☐	Days Used	Asset Utilization Days Used
☐	Dispatch Ctgry Long Desc	A description of the dispatch category.
☐	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☐	Drop-off Loc	Drop-off Location for the dispatch
☐	End Mtr Rdng	The end meter reading of the associated asset upon dispatch return.
☐	End Util Off Base	The amount of utilization recorded off-base for the associated asset.
☐	End Util On Base	The amount of utilization recorded on-base for the associated asset.
☐	Equip Grp Cd	Code that indicates the category group that the equipment belongs to.
☐	Estbd Dt/Tm	The date of the insertion of the row into the database.
☐	Fuel Cd	The main category of fuel recorded for utilization.
☐	Fuel Qty	The amount of fuel utilization that was recorded.
☐	Fuel Type Cd	The specific type of fuel recorded for utilization.
☐	Fuel Unit Cost	The cost of the fuel that was recorded.
☐	Haz Mat Cd	Code identifying explosives and other dangerous articles which require special handling in shipment as freight.
☐	Hazmat	Indicates that the dispatch is carrying hazardous materials
☐	Fuel State Cd	The state code the fuel was acquired from for utilization
☐	Initial Dt Profiled	Date this record was assigned a maintenance management code.
☐	IT Device Cd	Indicates a particular type of IT asset.
☐	LIN/TAMCN - Catalog	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Numbers.
☐	Loc	The information needed to locate an asset during an inventory .
☐	Maint Loc	The maintenance location assigned to the asset.
☐	Mfr Yr	Year an asset was manufactured/built/improved.
☐	Mfr Name	The full name of a specific manufacturer.
☐	Mfr Part Nbr	Number used to record the make or model of a specific piece of equipment.
☐	Min Obj Percent	Minimum percent of utilization.
☐	Mfr Model Nbr	The specific number assigned to identify the make/model of an asset.
☐	Nbr of Passengers	Number of passengers associated with this Maint Asst Master record
☐	Nbr of Bags	Number of bags associated with this Maint Asst Master record
☐	Obj Percent Util	Desired percentage of utilization.
☐	Office Id	The name of the office where the Major Custodian is located
☐	Office Name	Description of the organization of the Major Custodian
☐	Owning UIC	The active UIC the user has access to
☐	Operator/Technician Id	Operator/Technician Id
☐	Operator Labor Category	Labor Category Id
☐	Operator Rate Type	Civilian or Military
☐	Operator Base Rate	Operator Base Rate

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select [New Selection List]. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting [Cancel Selection] at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select [Add Selection List]. *The page refreshes, and the selected list is added.* [Add Selection List] *is replaced by* [Update Selection List] *and* [Delete Selection List].

   Select [Show Inquiry] for small volumes of data. *The* ***Dispatch Inquiry — Results*** *page appears.*

5. **OR**

   Select [Submit] for large volumes of data. *The* ***Dispatch Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

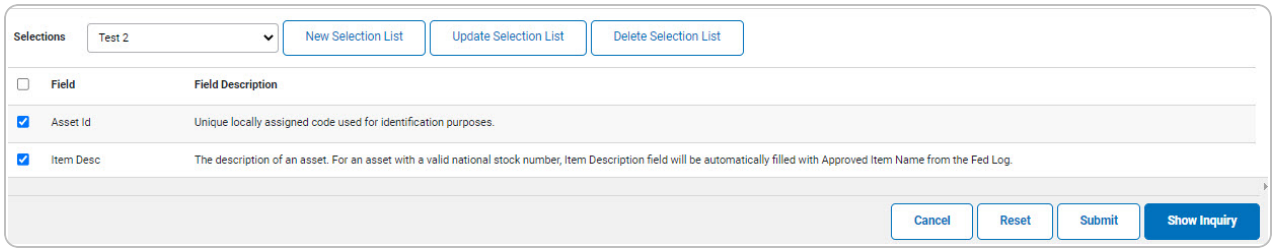

Select Show Inquiry for small volumes of data. *The **Dispatch Inquiry — Results** page appears.*

3. **OR**

Select Submit for large volumes of data. *The **Dispatch Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

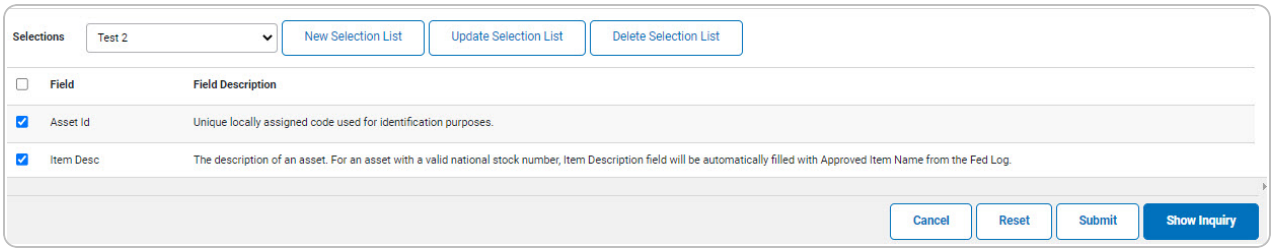

Select Show Inquiry for small volumes of data. *The* ***Dispatch Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Dispatch Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

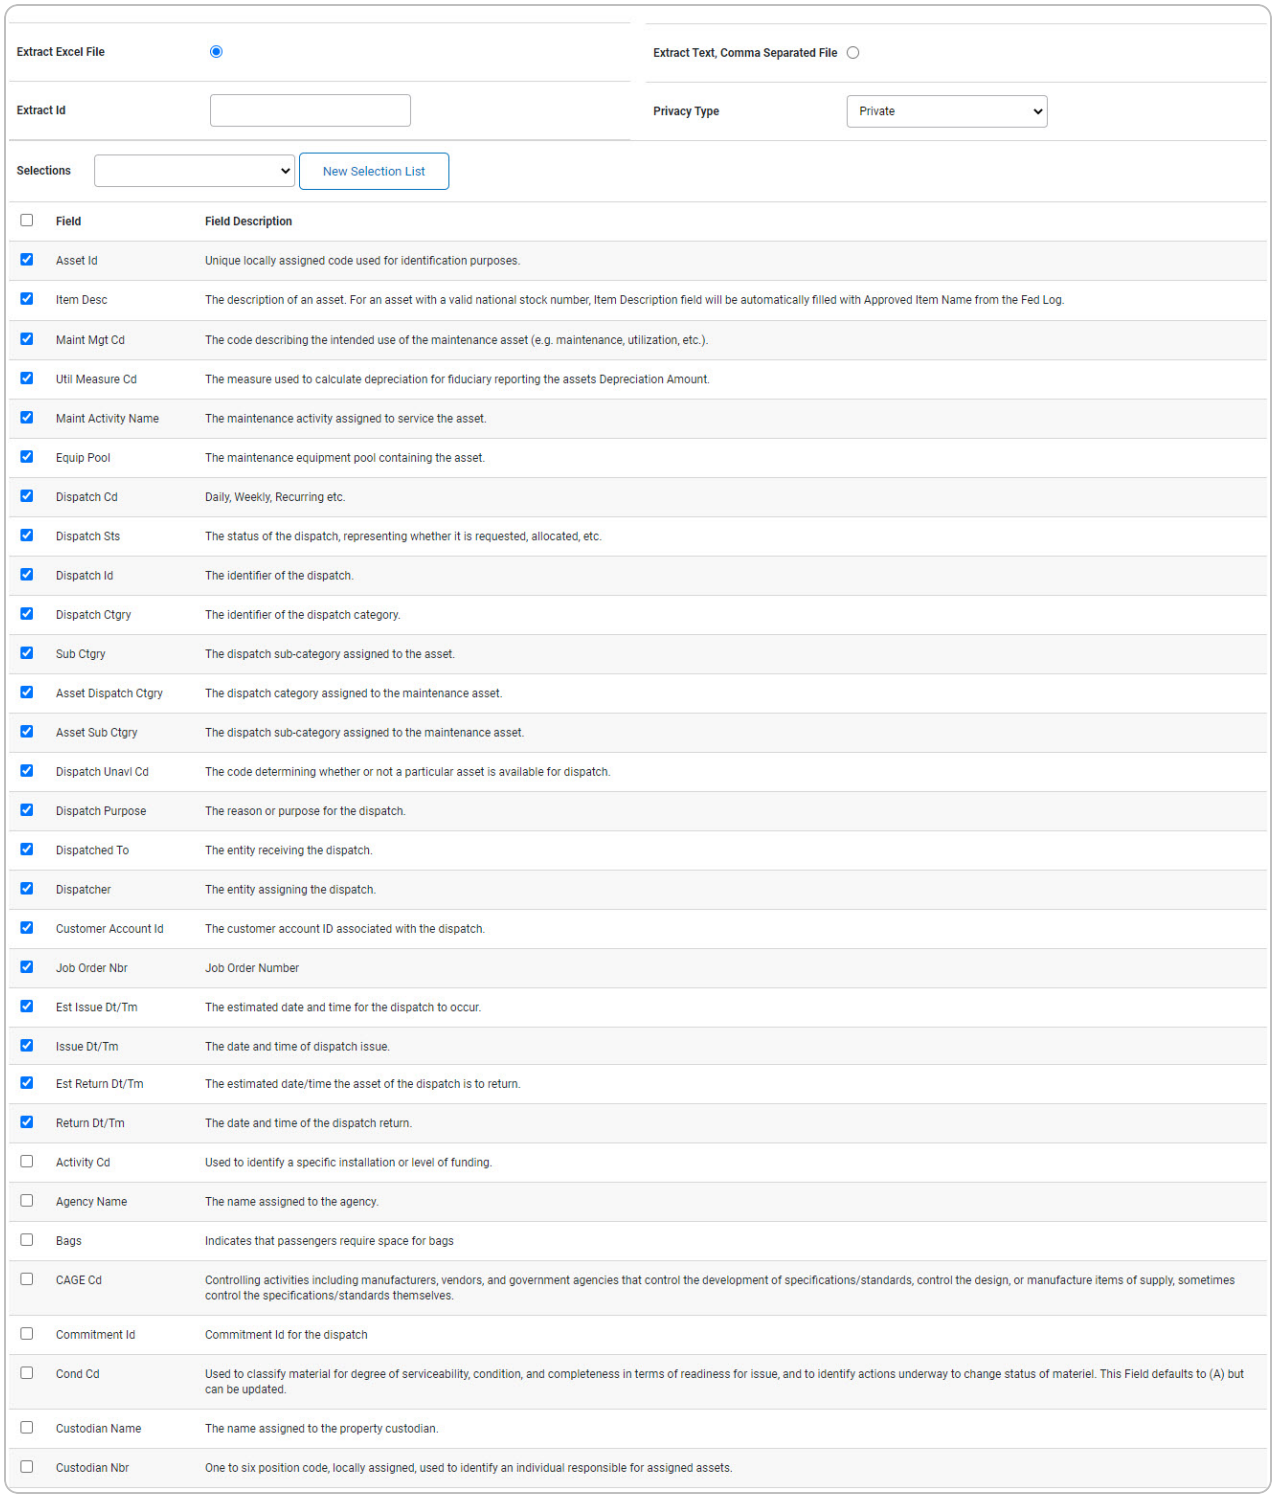

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Dispatch Inquiry** page appears.*

☑	Dispatch Id	The identifier of the dispatch.
☑	Dispatch Ctgry	The identifier of the dispatch category.
☑	Sub Ctgry	The dispatch sub-category assigned to the asset.
☑	Asset Dispatch Ctgry	The dispatch category assigned to the maintenance asset.
☑	Asset Sub Ctgry	The dispatch sub-category assigned to the maintenance asset.
☑	Dispatch Unavl Cd	The code determining whether or not a particular asset is available for dispatch.
☑	Dispatch Purpose	The reason or purpose for the dispatch.
☑	Dispatched To	The entity receiving the dispatch.
☑	Dispatcher	The entity assigning the dispatch.
☑	Customer Account Id	The customer account ID associated with the dispatch.
☑	Job Order Nbr	Job Order Number
☑	Est Issue Dt/Tm	The estimated date and time for the dispatch to occur.
☑	Issue Dt/Tm	The date and time of dispatch issue.
☑	Est Return Dt/Tm	The estimated date/time the asset of the dispatch is to return.
☑	Return Dt/Tm	The date and time of the dispatch return.
☐	Activity Cd	Used to identify a specific installation or level of funding.
☐	Agency Name	The name assigned to the agency.
☐	Bags	Indicates that passengers require space for bags
☐	CAGE Cd	Controlling activities including manufacturers, vendors, and government agencies that control the development of specifications/standards, control the design, or manufacture items of supply, sometimes control the specifications/standards themselves.
☐	Commitment Id	Commitment Id for the dispatch
☐	Cond Cd	Used to classify material for degree of serviceability, condition, and completeness in terms of readiness for issue, and to identify actions underway to change status of materiel. This Field defaults to (A) but can be updated.
☐	Custodian Name	The name assigned to the property custodian.
☐	Custodian Nbr	One to six position code, locally assigned, used to identify an individual responsible for assigned assets.

☐	Days Idle	The number of days the asset was recorded as idle.
☐	Days Unavl	The number of days the asset was recorded as unavailable for use.
☐	Days Used	Asset Utilization Days Used
☐	Dispatch Ctgry Long Desc	A description of the dispatch category.
☐	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☐	Drop-off Loc	Drop-off Location for the dispatch
☐	End Mtr Rdng	The end meter reading of the associated asset upon dispatch return.
☐	End Util Off Base	The amount of utilization recorded off-base for the associated asset.
☐	End Util On Base	The amount of utilization recorded on-base for the associated asset.
☐	Equip Grp Cd	Code that indicates the category group that the equipment belongs to.
☐	Estbd Dt/Tm	The date of the insertion of the row into the database.
☐	Fuel Cd	The main category of fuel recorded for utilization.
☐	Fuel Qty	The amount of fuel utilization that was recorded.
☐	Fuel Type Cd	The specific type of fuel recorded for utilization.
☐	Fuel Unit Cost	The cost of the fuel that was recorded.
☐	Haz Mat Cd	Code identifying explosives and other dangerous articles which require special handling in shipment as freight.
☐	Hazmat	Indicates that the dispatch is carrying hazardous materials
☐	Fuel State Cd	The state code the fuel was acquired from for utilization
☐	Initial Dt Profiled	Date this record was assigned a maintenance management code.
☐	IT Device Cd	Indicates a particular type of IT asset.
☐	LIN/TAMCN - Catalog	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Numbers.
☐	Loc	The information needed to locate an asset during an inventory .
☐	Maint Loc	The maintenance location assigned to the asset.
☐	Mfr Yr	Year an asset was manufactured/built/improved.
☐	Mfr Name	The full name of a specific manufacturer.
☐	Mfr Part Nbr	Number used to record the make or model of a specific piece of equipment.
☐	Min Obj Percent	Minimum percent of utilization.
☐	Mfr Model Nbr	The specific number assigned to identify the make/model of an asset.
☐	Nbr of Passengers	Number of passengers associated with this Maint Asst Master record
☐	Nbr of Bags	Number of bags associated with this Maint Asst Master record
☐	Obj Percent Util	Desired percentage of utilization.
☐	Office Id	The name of the office where the Major Custodian is located
☐	Office Name	Description of the organization of the Major Custodian
☐	Owning UIC	The active UIC the user has access to
☐	Operator/Technician Id	Operator/Technician Id
☐	Operator Labor Category	Labor Category Id
☐	Operator Rate Type	Civilian or Military
☐	Operator Base Rate	Operator Base Rate

☐	Operator Overtime Rate	Operator Overtime Rate
☐	Pax	The total number of passengers in the dispatch
☐	Pick-up Loc	Pick-up Location for the dispatch
☐	PMO Name	Property Management Officer Name
☐	PMO Office Identifier	Property Management Officer Office Identifier
☐	PMO Office Name	Property Management Officer Office Name
☐	Possible Days Used	Indicates Prime shift as 4 or 5 days a week.
☐	Precious Mtl Cd	Identifies items that have precious metals as part of their content. Precious metals are those metals generally considered to be uncommon and highly valuable
☐	Reimbursable	Whether or not the dispatch can be reimbursable.
☐	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☐	Site Id	The active Site Id the user has access to.
☐	Start Mtr Rdng	The start meter reading of the associated asset upon dispatch issue.
☐	Stay	Indicates that the driver is to stay at the drop-off location
☐	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☐	Sub Loc	A more specific description of the physical location of an asset within its Location.
☐	Total Daily Rate	The total daily hourly rate for the dispatch
☐	Total Utilization Rate	The total hourly utilization rate for the dispatch
☐	Type Dsg Name	A unique name referred to as Type Designation that identifies the asset type, usage, purpose, and variant within an Acquisition Program Type Designation Name.
☐	UIC	The UIC of the maintenance activity assigned to service the asset.
☐	UIC Name	A unit, organization, or activity name
☐	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.
☐	Util Svc Life	Indicates how long an asset is expected to last, in terms of the Util Measure, before being fully depreciated.
☐	Vehicle Grp Cd	The unique value in the lookup table which stores the code assigned to the associated display description
☐	Vehicle Type Cd	Code that identifies the vehicles type.
☐	Work Order Created	Represents whether or not the dispatch is configured to create a work order if necessary.
☐	Yr Svc Life	Number of years of recommended service life based upon applicable directives.

Select Fields for the Contractor Inquiry

Overview

The Contractor Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > Master Data > Contractor > Search Criteria > Fields > Contractor Inquiry Fields Selection page

Page Fields

The following fields display on the **Contractor Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The* ***Contractor Inquiry*** *page appears.*

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the* ***View Inquiry Extract*** *page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the* ***View Inquiry Extract*** *page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select [New Selection List]. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting [Cancel Selection] at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

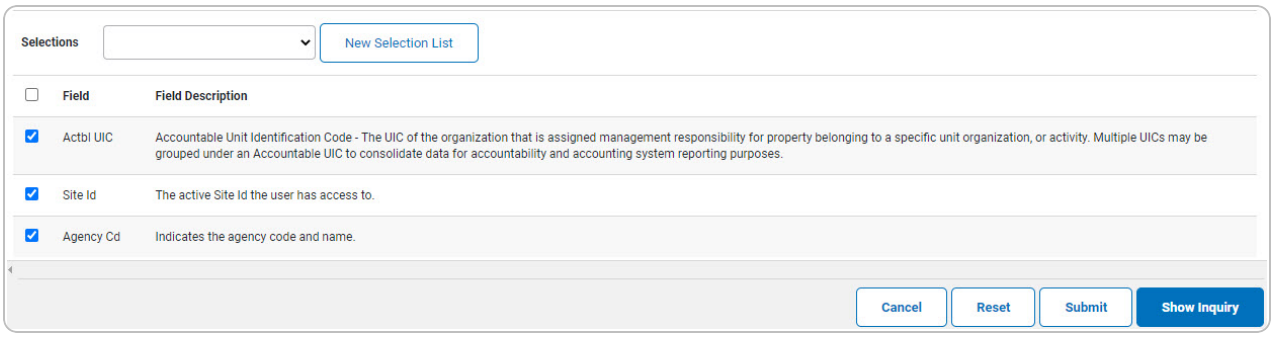

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select [Add Selection List]. *The page refreshes, and the selected list is added.* [Add Selection List] *is replaced by* [Update Selection List] *and* [Delete Selection List].

   Select [Show Inquiry] for small volumes of data. *The **Contractor Inquiry — Results** page appears.*
5. **OR**

   Select [Submit] for large volumes of data. *The **Contractor Inquiry Transaction Status** page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

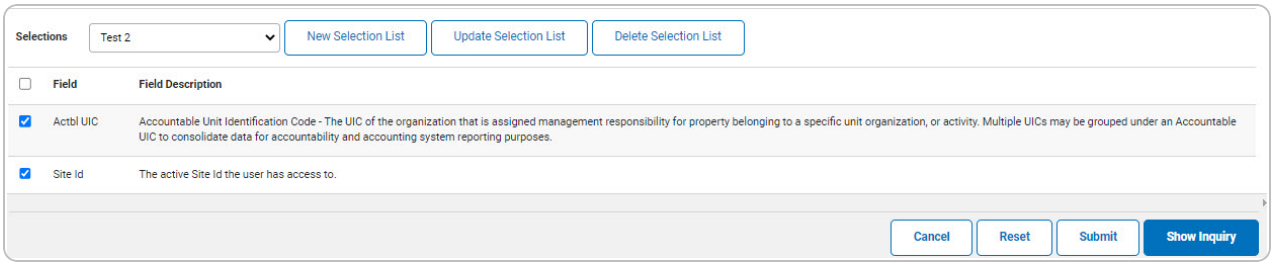

Select Show Inquiry for small volumes of data. *The **Contractor Inquiry — Results** page appears.*

3. **OR**

Select Submit for large volumes of data. *The **Contractor Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***Contractor Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Contractor Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

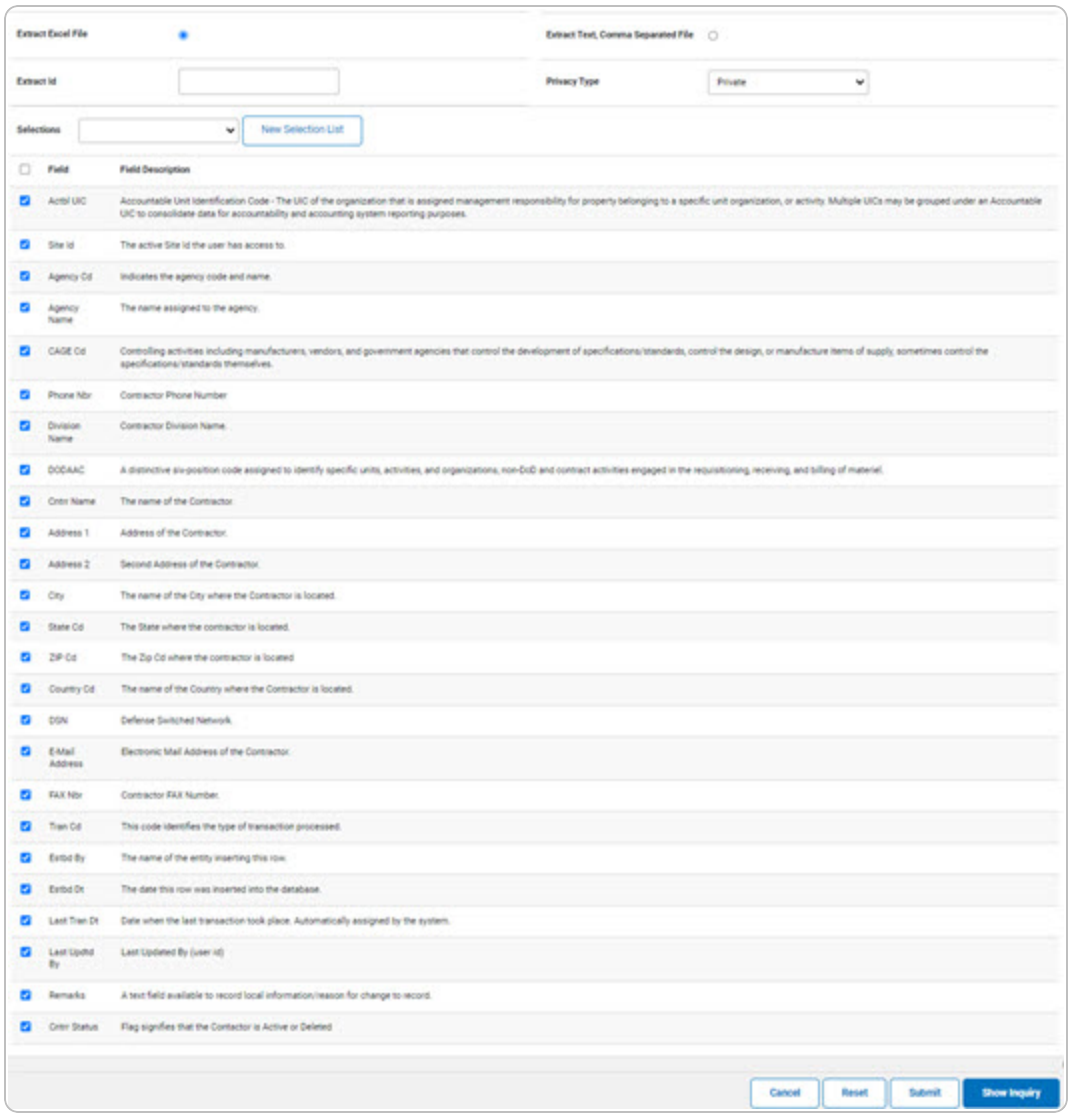

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The* ***Contractor Inquiry*** *page appears.*

2. Select the fields required for the inquiry. *The first 25 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the ACTBL UIC contains the appropriate ☑ or ☐. *Select if the data contains an ACTBL UIC.*
- Verify the SITE ID contains the appropriate ☑ or ☐. *Select if the inquiry contains a SITE ID.*
- Verify the AGENCY CD contains the appropriate ☑ or ☐. *Select if the inquiry contains an AGENCY CD.*

Search for a Contract Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

A. *The first Available Field(s) option (CNTR Status) automatically populates and is not editable.*

B. Use ⌄ to select the second Available Field.

C. Repeat Step B to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Use ⌄ to select the second Operands.

C. Repeat Step B to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use ⌄ to select the first Search Value.

B. Use ⌄ to select the second Search Value.

C. Repeat Step B to add additional search criteria.

Remove an Available Field Row

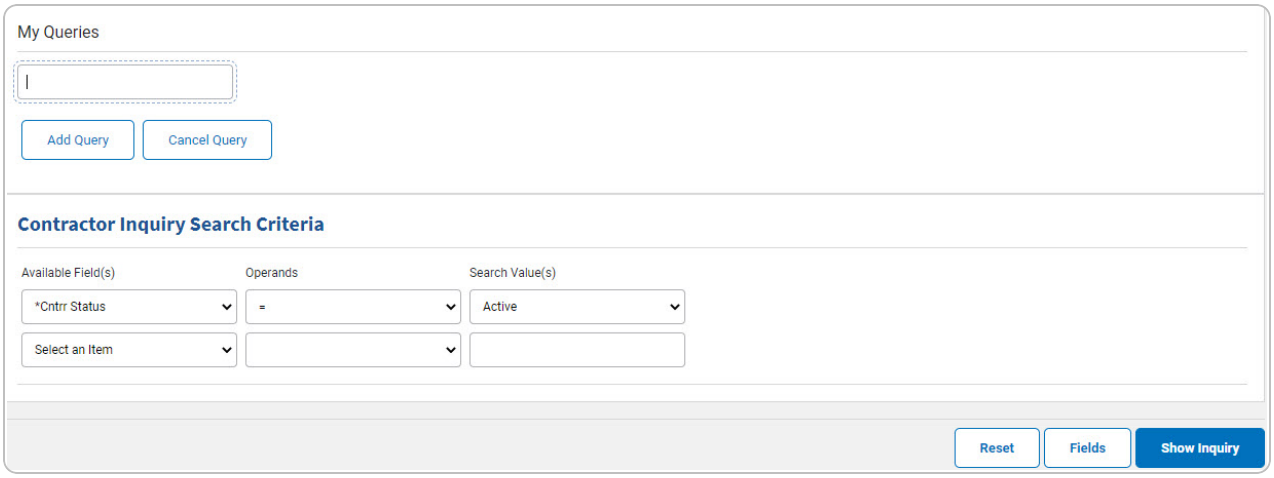

a. Use ⌄ to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Contract Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*

2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*

   Select Fields. *The **Contract Inquiry — Select Fields** page appears.*

5. OR

Select Show Inquiry. *The* ***Contract Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*

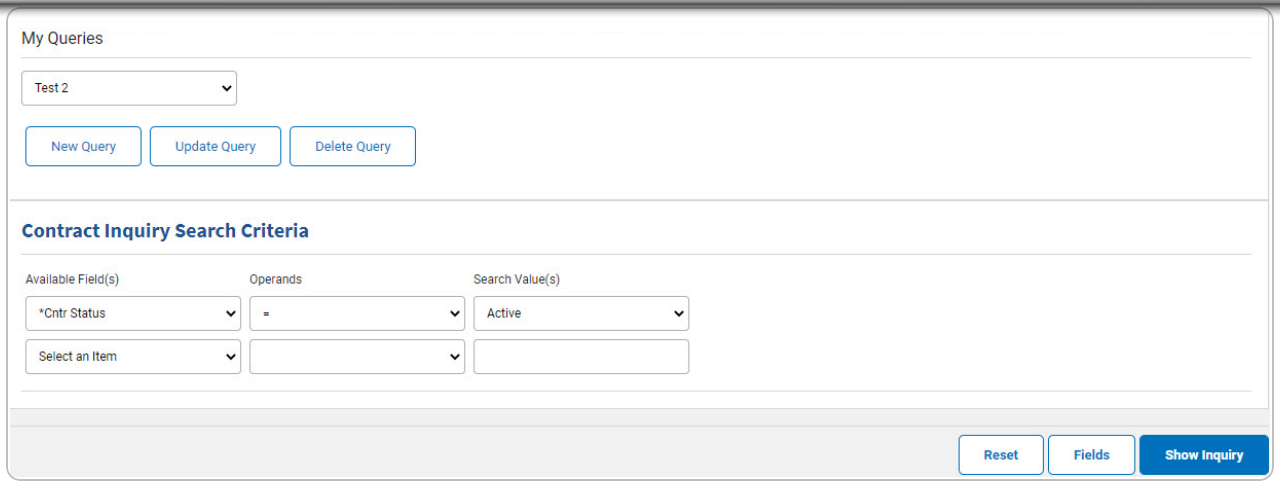

Select Fields. *The* ***Contract Inquiry — Select Fields*** *page appears.*

2. OR

Select Show Inquiry. *The* ***Contract Inquiry — Results*** *page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

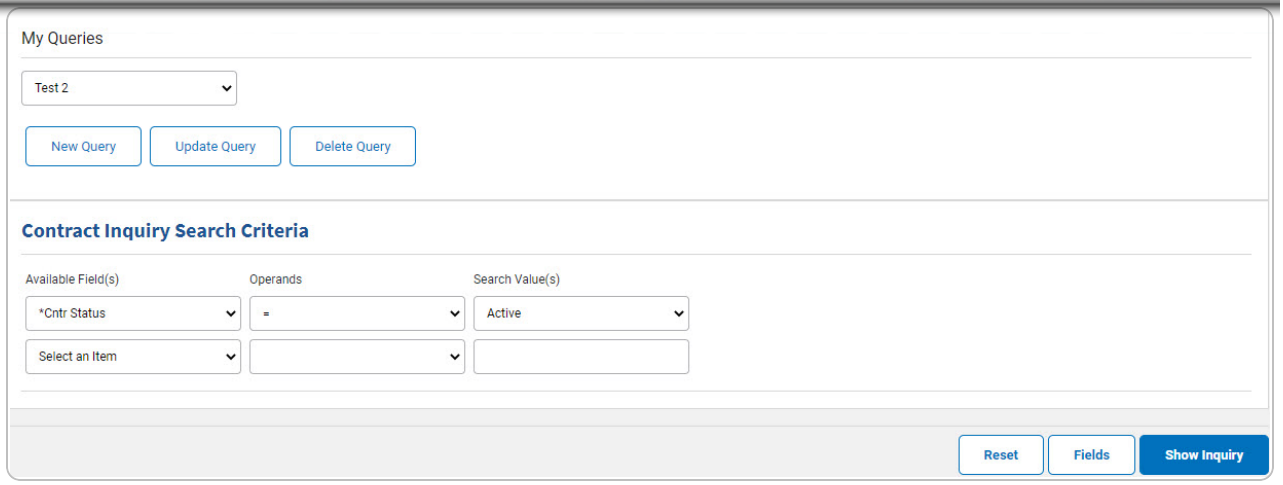

2. *Add and/or Remove rows in the Search Criteria grid as needed.*
3. Select Update Query. *The query information is updated.*
4. Select Fields. *The **Contract Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Contract Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*

3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Contract Inquiry — Select Fields** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..

13 — Mandatory Entry: *Available Field(s)*.	
13 — Mandatory Entry: *Operands*.	Missing Entry. No data was entered. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Query Name*.	
xxxx – Saved Inquiry already exists. Select Update Query **or** Delete Query **.**	Invalid Entry. The inquiry already exists in the database. Use the existing inquiry, or select Update Query to revise the existing query.
102 — Inquiry already exists.	Invalid entry. The Inquiry is already established. Re-enter the inquiry or select Update Query or Delete Query to modify the existing inquiry.
106 — Operand must be =, >, <, >= , <= , <>, or Like.	Missing Entry. The Field value was entered, but no operand was selected. Choose an operand from the drop-down menu.
31 — To perform Search, data must be entered in one or more fields.	Missing Entry. At least one field is necessary to perform the search. Enter at least one field, then select the Search button.

Select Fields for the Contract Inquiry

Overview

The Contract Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > Master Data > Contract > Search Criteria > Fields > Contract Inquiry Fields Selection page

Page Fields

The following fields display on the **Contract Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The* ***Contract Inquiry*** *page appears.*

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the* ***View Inquiry Extract*** *page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the* ***View Inquiry Extract*** *page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

   Select Show Inquiry for small volumes of data. *The **Contract Inquiry — Results** page appears.*

5. **OR**

   Select Submit for large volumes of data. *The **Contract Inquiry Transaction Status** page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

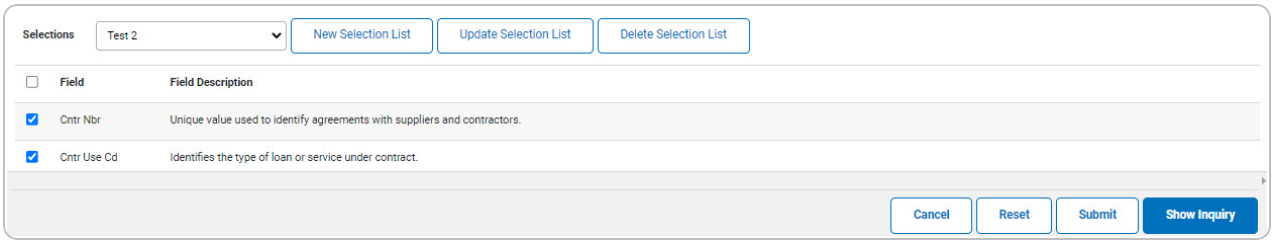

Select Show Inquiry for small volumes of data. *The **Contract Inquiry — Results** page appears.*

3. **OR**

Select Submit for large volumes of data. *The **Contract Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***Contract Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Contract Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

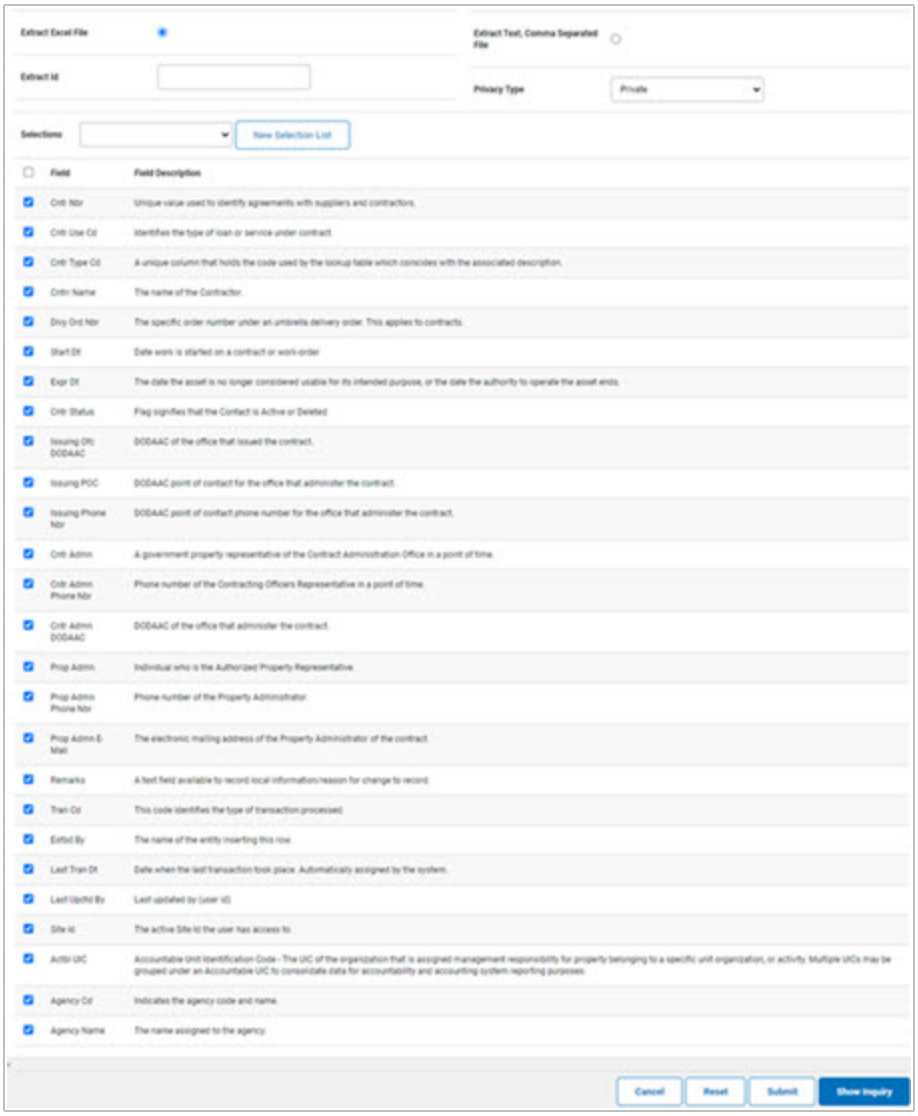

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The* ***Contract Inquiry*** *page appears.*

2. Select the fields required for the inquiry. *The first 26 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the CNTR NBR contains the appropriate ☑ or ☐. *Select if the data contains an CNTR NBR.*

Select Fields for the Dispatch Category Inquiry

Overview

The Dispatch Category Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > Master Data > DISPATCH CTGRY > Search Criteria > Fields > Dispatch Category Inquiry Fields Selection page

Page Fields

The following fields display on the **Dispatch Category Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **Dispatch Category Inquiry** page appears.*

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

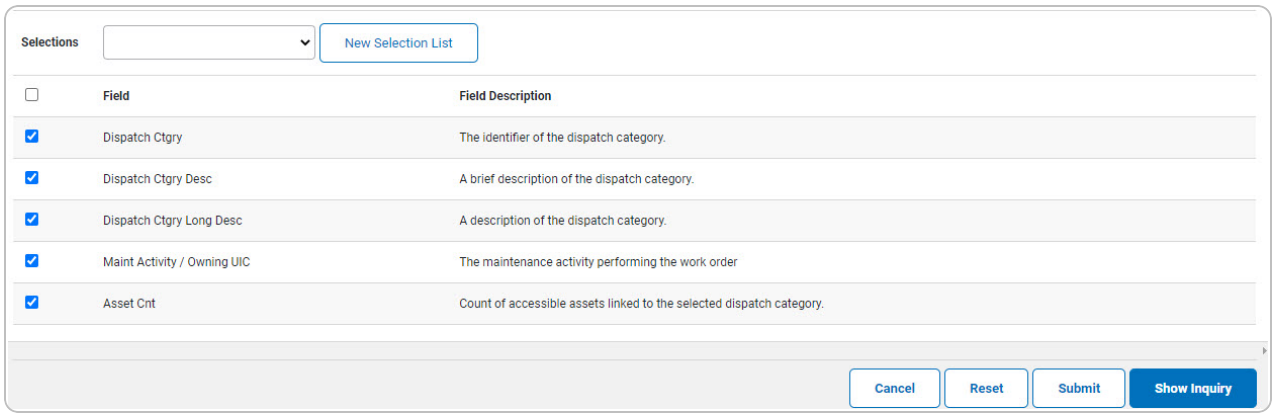

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

   Select Show Inquiry for small volumes of data. *The* ***Dispatch Category Inquiry — Results*** *page appears.*
5. **OR**

   Select Submit for large volumes of data. *The* ***Dispatch Category Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

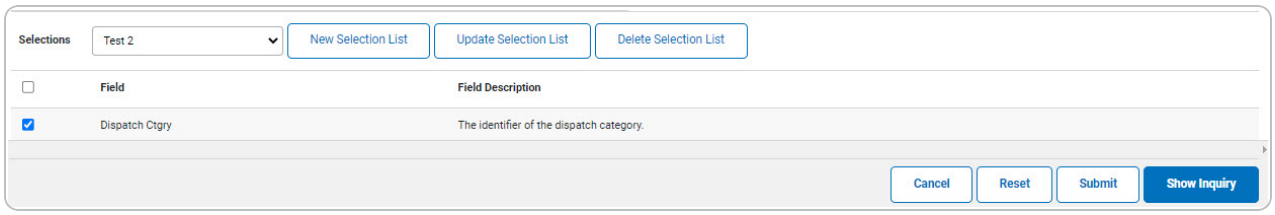

3. Select Show Inquiry for small volumes of data. *The* ***Dispatch Category Inquiry — Results*** *page appears.*

OR

Select Submit for large volumes of data. *The* ***Dispatch Category Inquiry Transaction Status*** *page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***Dispatch Category Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Dispatch Category Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

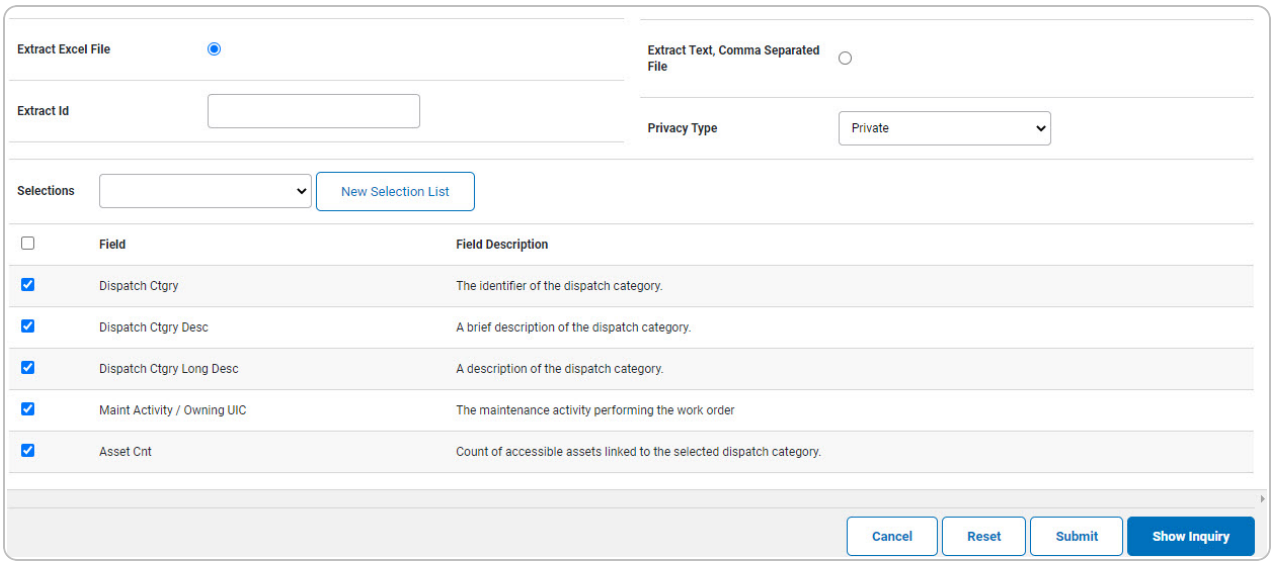

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Dispatch Category Inquiry** page appears.*

2. Select the fields required for the inquiry. *The first 5 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the DISPATCH CTGRY contains the appropriate ☑ or ☐. *Select if the data contains a DISPATCH CTGRY.*
- Verify the DISPATCH CTGRY DESC contains the appropriate ☑ or ☐. *Select if the inquiry contains a DISPATCH CTGRY DESC.*
- Verify the DISPATCH CTGRY LONG DESC contains the appropriate ☑ or ☐. *Select if the inquiry contains a DISPATCH CTGRY LONG DESC.*
- Verify the MAINT ACTIVITY / OWNING UIC contains the appropriate ☑ or ☐. *Select if the inquiry contains a MAINT ACTIVITY / OWNING UIC.*
- Verify the ASSET CNT contains the appropriate ☑ or ☐. *Select if the inquiry contains an ASSET CNT.*

Select Show Inquiry for small volumes of data. *The* ***Dispatch Category Inquiry — Results*** *page appears.*

3. **OR**

   Select Submit for large volumes of data. *The* ***Dispatch Category Inquiry Transaction Status*** *page appears.*

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The* ***Labor Category Inquiry*** *page appears.*

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select [New Selection List]. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting [Cancel Selection] at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select [Add Selection List]. *The page refreshes, and the selected list is added.* [Add Selection List] *is replaced by* [Update Selection List] *and* [Delete Selection List].

   Select [Show Inquiry] for small volumes of data. *The* ***Labor Category Inquiry — Results*** *page appears.*

5. **OR**

   Select [Submit] for large volumes of data. *The* ***Labor Category Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

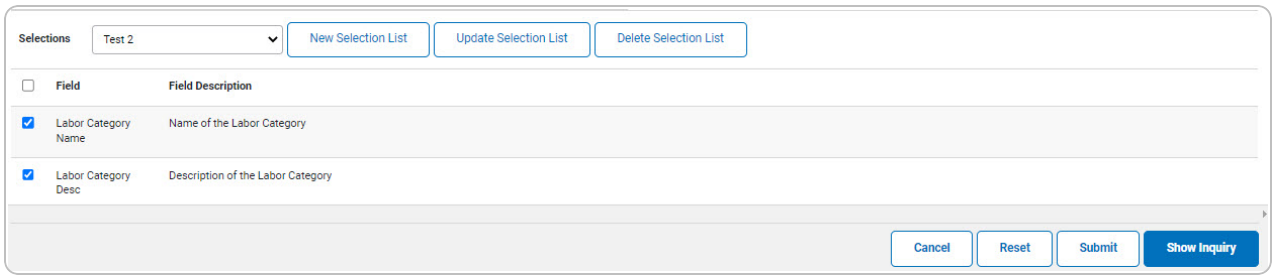

3. Select Show Inquiry for small volumes of data. *The **Labor Category Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Labor Category Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The **Labor Category Inquiry — Results** page appears.*

4. **OR**

   Select Submit for large volumes of data. *The **Labor Category Inquiry Transaction Status** page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and New Selection List is joined by Update Selection List and Delete Selection List.*

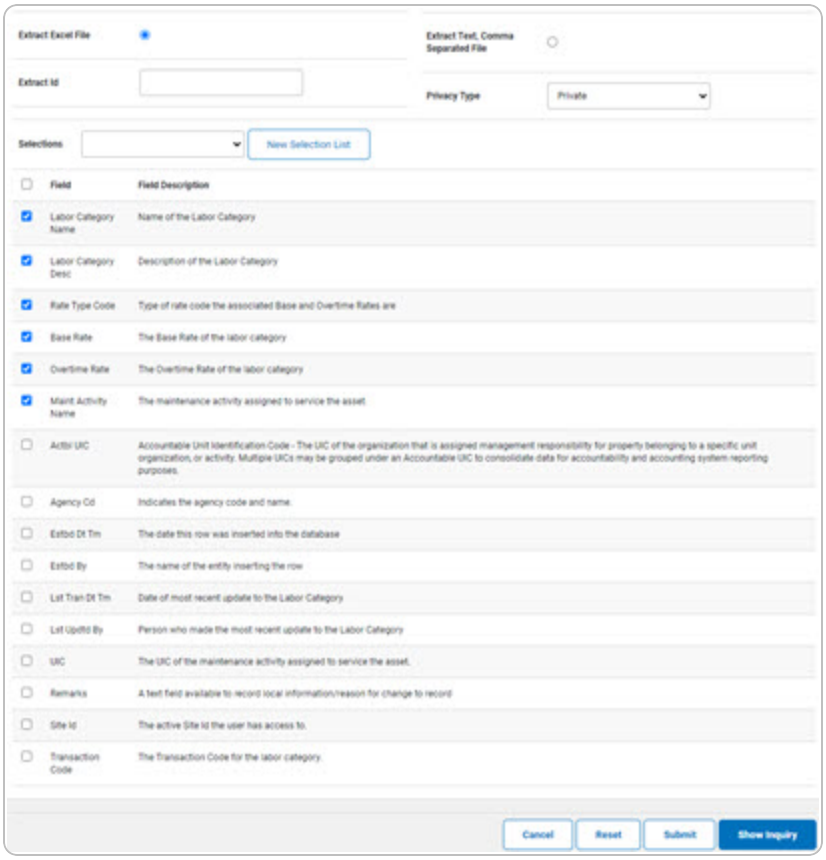

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel at any point of this procedure removes all revisions and closes the page.
***Bold** numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset at any point of this procedure returns all fields to the default "All" setting.

1. Select Fields. *The **Labor Category Inquiry** page appears.*

2. Select the fields required for the inquiry. *The first 6 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the Labor Category Name contains the appropriate ☑ or ☐. *Select if the data contains a Labor Category Name.*
- Verify the LABOR CATEGORY DESC contains the appropriate ☑ or ☐. *Select if the inquiry contains a description.*

- Verify the Rate Type Code contains the appropriate ☑ or ☐. *Select if the inquiry contains a Rate Type Code.*
- Verify the Base Rate contains the appropriate ☑ or ☐. *Select if the inquiry has a Base Rate.*
- Verify the Overtime Rate contains the appropriate ☑ or ☐. *Select if the inquiry contains a Overtime Rate.*
- Verify the MAINT ACTIVITY NAME contains the appropriate ☑ or ☐. *Select if the inquiry contains a MAINT ACTIVITY NAME.*
- Click ☐ to select the ACTBL UIC. *Select if the inquiry contains an ACTBL UIC.*
- Click ☐ to select the AGENCY CD. *Select if the inquiry contains an AGENCY CD.*
- Click ☐ to select the ESTBD DT TM. *Select if the inquiry contains an ESTBD DT TM.*
- Click ☐ to select the ESTBD BY. *Select if the inquiry contains an ESTBD BY.*
- Click ☐ to select the LAST TRAN DT TM. *Select if the inquiry contains the most recent LAST TRAN DT TM.*
- Click ☐ to select the LAST UPDTD BY. *Select if the inquiry contains a LAST UPDTD BY individual.*
- Click ☐ to select the UIC. *Select if the inquiry contains an UIC.*
- Click ☐ to select the Remarks. *Select if the inquiry contains remarks.*
- Click ☐ to select the SITE ID. *Select if the inquiry contains a SITE ID.*
- Click ☐ to select the Transaction Code. *Select if the inquiry contains a transaction code.*

Select Show Inquiry for small volumes of data. *The **Labor Category Inquiry — Results** page appears.*

3.

OR

Select Submit for large volumes of data. *The **Labor Category Inquiry Transaction Status** page appears.*

Search for an Operator/Technician Inquiry

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

   A. *The first Available Field(s) option (MAINT ACTIVITY / OWNING UIC) automatically populates and is not editable.*

   B. Use ⌄ to select the second Available Field.

   C. Repeat Step B to add additional search criteria.

> **Note**
> Adding another Available Field ⌄ automatically populates an additional search criteria row.

> **Note**
> Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

   A. Use ⌄ to select the first Operands.

   B. Use ⌄ to select the second Operands.

   C. Repeat Step B to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use ⌄ to select the first Search Value.

B. Use ⌄ to select the second Search Value.

C. Repeat Step B to add additional search criteria.

Remove an Available Field Row

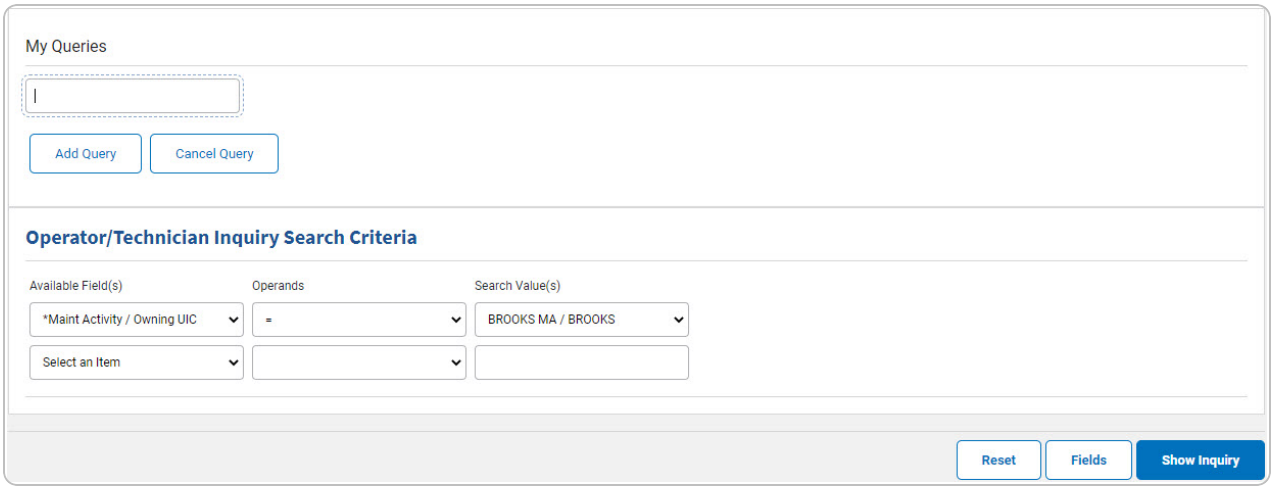

a. Use ⌄ to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Operator/Technician — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*

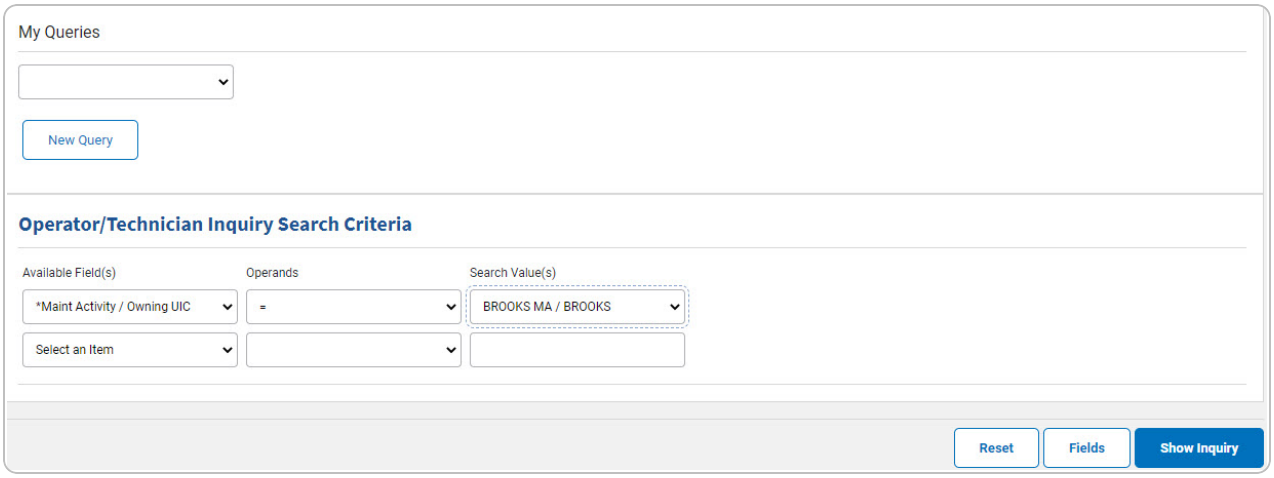

2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select Cancel Query to disregard the Query.*
5. Select Fields. *The **Operator/Technician Inquiry — Select Fields** page appears.*

OR

Select Show Inquiry. *The* ***Operator/Technician Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*

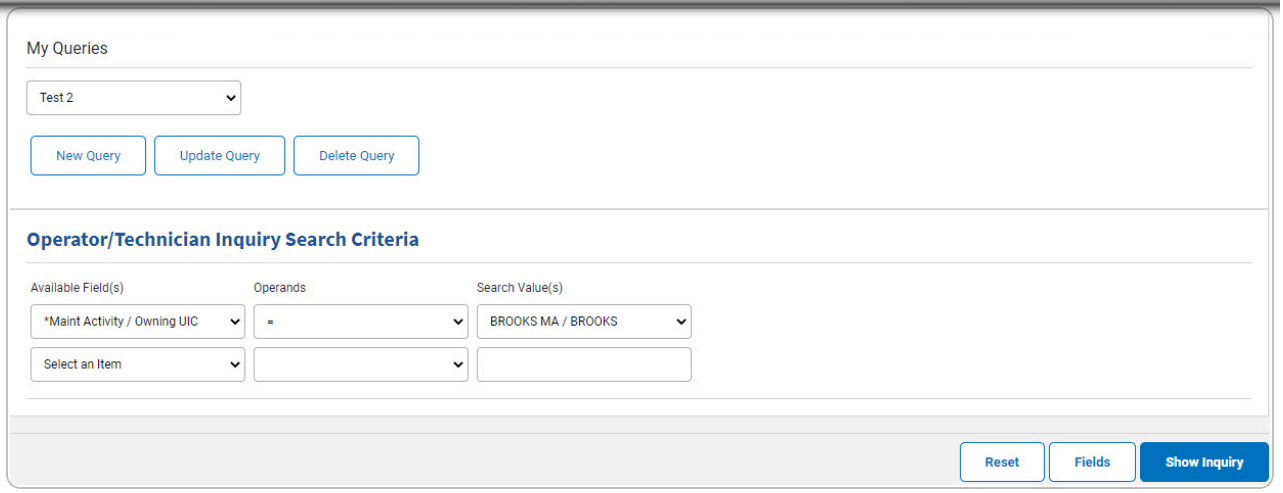

Select Fields. *The* ***Operator/Technician Inquiry — Select Fields*** *page appears.*

2. OR

Select Show Inquiry. *The* ***Operator/Technician Inquiry — Results*** *page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

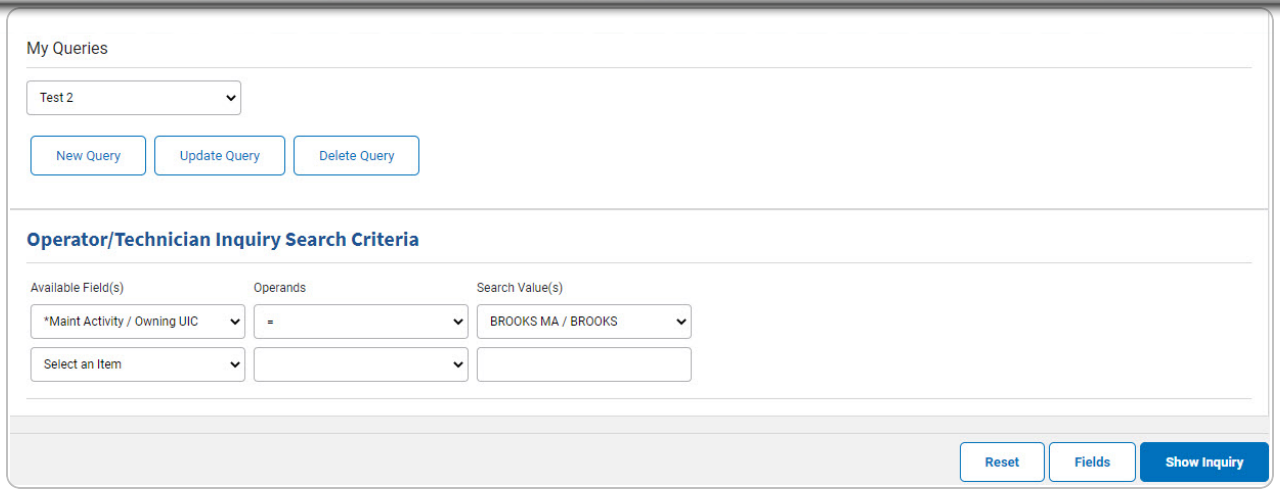

2. *Add and/or Remove rows in the Search Criteria grid as needed.*
3. Select Update Query. *The query information is updated.*
4. Select Fields. *The **Operator/Technician Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Operator/Technician Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and New Query is joined by Update Query and Delete Query. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Operator/Technician Inquiry — Select Fields** page appears.*

Select Fields for the Operator/Technician Inquiry

Overview

The Operator/Technician Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > Master Data > Operator/Technician > Search Criteria > Fields > Operator/Technician Inquiry Fields Selection page

Page Fields

The following fields display on the **Operator/Technician Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.

ELMS Navigation Helpful Tips

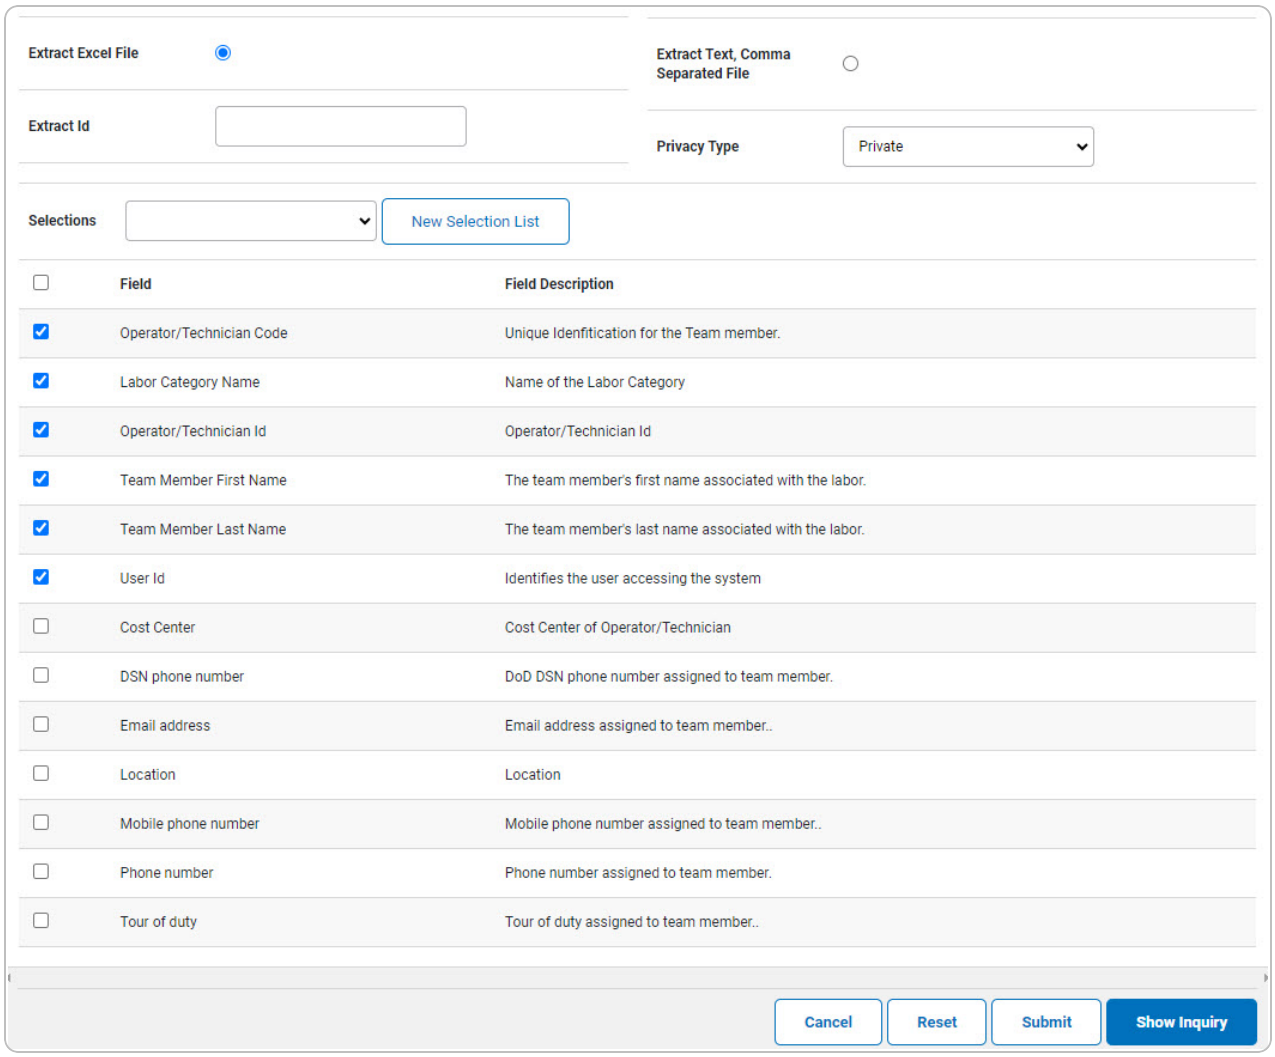

Click the following link to display M&U Navigation Tips.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **Operator/Technician Inquiry** page appears.*

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select [New Selection List]. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting [Cancel Selection] at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select [Add Selection List]. *The page refreshes, and the selected list is added.* [Add Selection List] *is replaced by* [Update Selection List] *and* [Delete Selection List].

   Select [Show Inquiry] for small volumes of data. *The* ***Operator/Technician Inquiry — Results*** *page appears.*

5. **OR**

   Select [Submit] for large volumes of data. *The* ***Operator/Technician Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

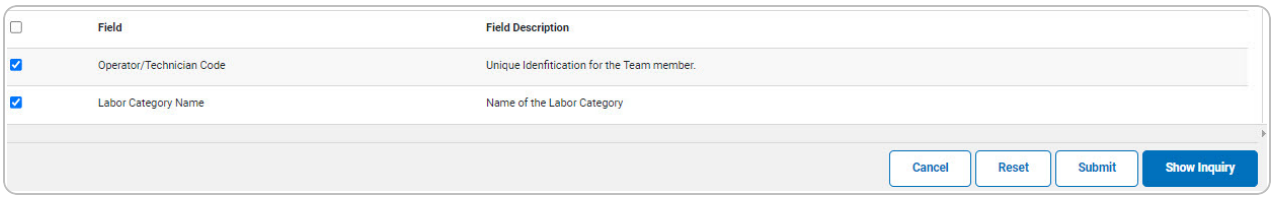

3. Select Show Inquiry for small volumes of data. *The **Operator/Technician Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Operator/Technician Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

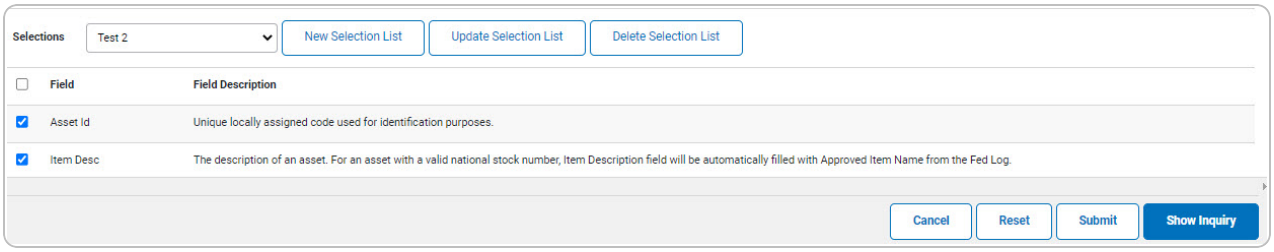

Select Show Inquiry for small volumes of data. *The* ***Operator/Technician Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Operator/Technician Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

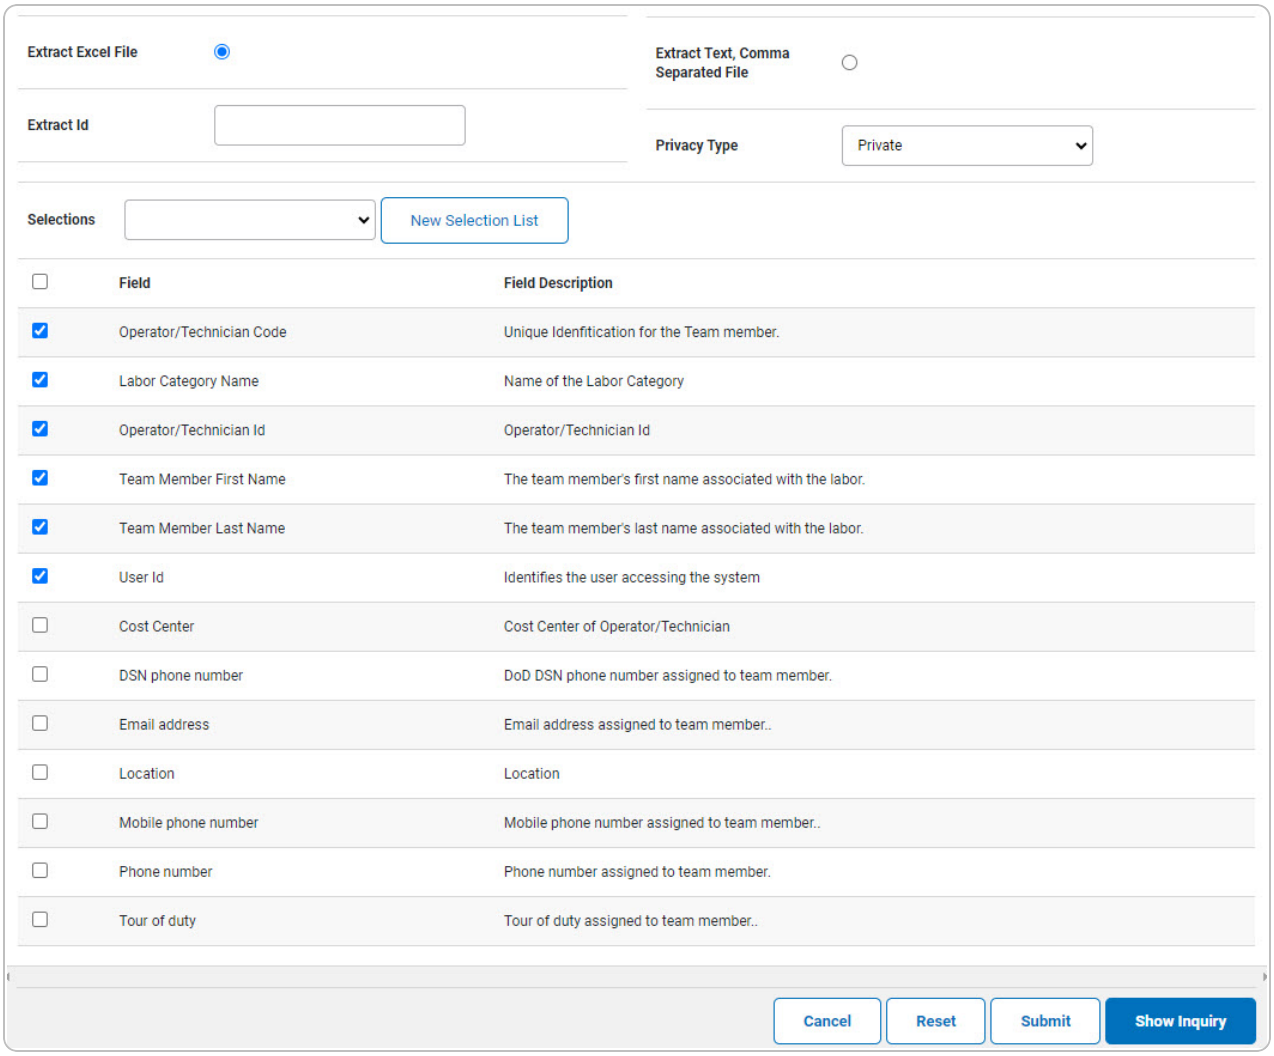

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Operator/Technician Inquiry** page appears.*

2. Select the fields required for the inquiry. *The first 6 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the Operator/Technician Code contains the appropriate ☑ or ☐. *Select if the inquiry contains an operator/technician identification.*

- Verify the Labor Category Name contains the appropriate ☑ or ☐. *Select if the inquiry contains a labor category name.*
- Verify the OPRERATOR/TECHNICIAN ID contains the appropriate ☑ or ☐. *Select if the inquiry contains a OPRERATOR/TECHNICIAN ID.*
- Verify the Team Member First Name contains the appropriate ☑ or ☐. *Select if the inquiry is associated with a team member's first name.*
- Verify the Team Member Last Name contains the appropriate ☑ or ☐. *Select if the inquiry is associated with a team member's last name.*
- Verify the USER ID contains the appropriate ☑ or ☐. *Select if the inquiry contains an USER ID.*
- Click ☐ to select the Cost Center. *Select if the inquiry contains a cost center.*

Search for a STOCK NBR Inquiry

Overview

The Maintenance and Utilization (M&U) module STOCK NBR Inquiry process provides the ability to search for Stock Number records.

Navigation

Inquiries > Catalog > STOCK NBR Inquiry > STOCK NBR Inquiry Search page

Page Fields

The following fields display on the **STOCK NBR Inquiry Search** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
525	Select "Search" to refresh the Stock Nbr Search Results.
526	Select "Reset" to clear the Stock Nbr Search Criteria.
527	Select "Grid Options" for additional actions to perform on the Stock Nbr data.
528	Select "Add" to create a new Stock Nbr record.
529	Select "Edit" to update the selected Stock Nbr record(s).

530	Select "Delete" to remove the selected Stock Nbr record(s).
531	Select "Attachments" to add or view an attached document to the selected {0} record(s).
132	To search for CAGE CD, see https://cage.dla.mil.
161	NCAGE CD must = 5 POS. When POS 1 = 0-9, POS 5 must = alpha but not I, O, or X. When POS 1 = A, POS 5 must = alpha-numeric but not I, L, O, Q, or V thru Z. When POS 1 = alpha, but not alpha O, POS 5 must = 0-9.
162	CAGE CD must = 5 POS, 1st and 5th must = numeric, remaining POS must = alphanumeric except I and O.

Search for a Dispatch Journal — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*
   A. *The first Available Field(s) option (MAINT ACTIVITY / OWNING UIC) automatically populates and is not editable.*
   B. Use ⌄ to select the second Available Field.
   C. Repeat Step B to add additional search criteria.

Note

Adding another Available Field automatically populates an additional search criteria row.

3. *Choose which Operands to use in the search.*

   A. Use to select the first Operands.

   B. Use to select the second Operands.

   C. Repeat Step A to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

   A. Use to select the first Search Value.

   B. Use to select the second Search Value.

   C. Repeat Step A to add additional search criteria.

To Remove an Available Field Row

a. Use to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

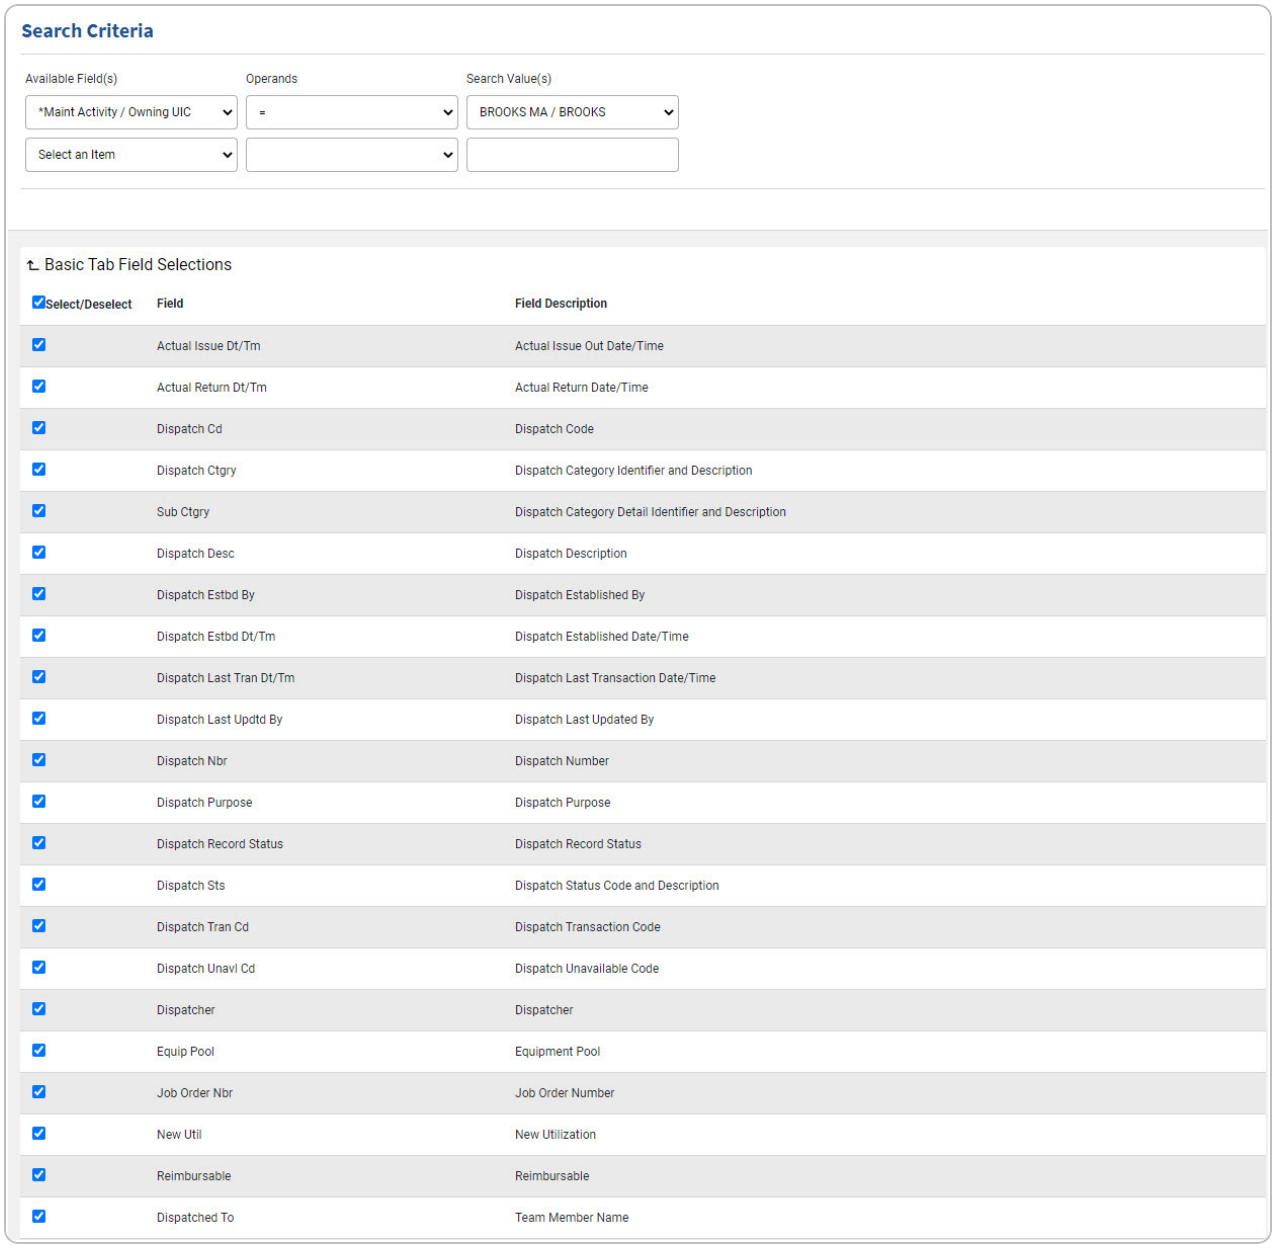

5. Select Custom Select. *The **Dispatch Journal Search — Results** page appears.*

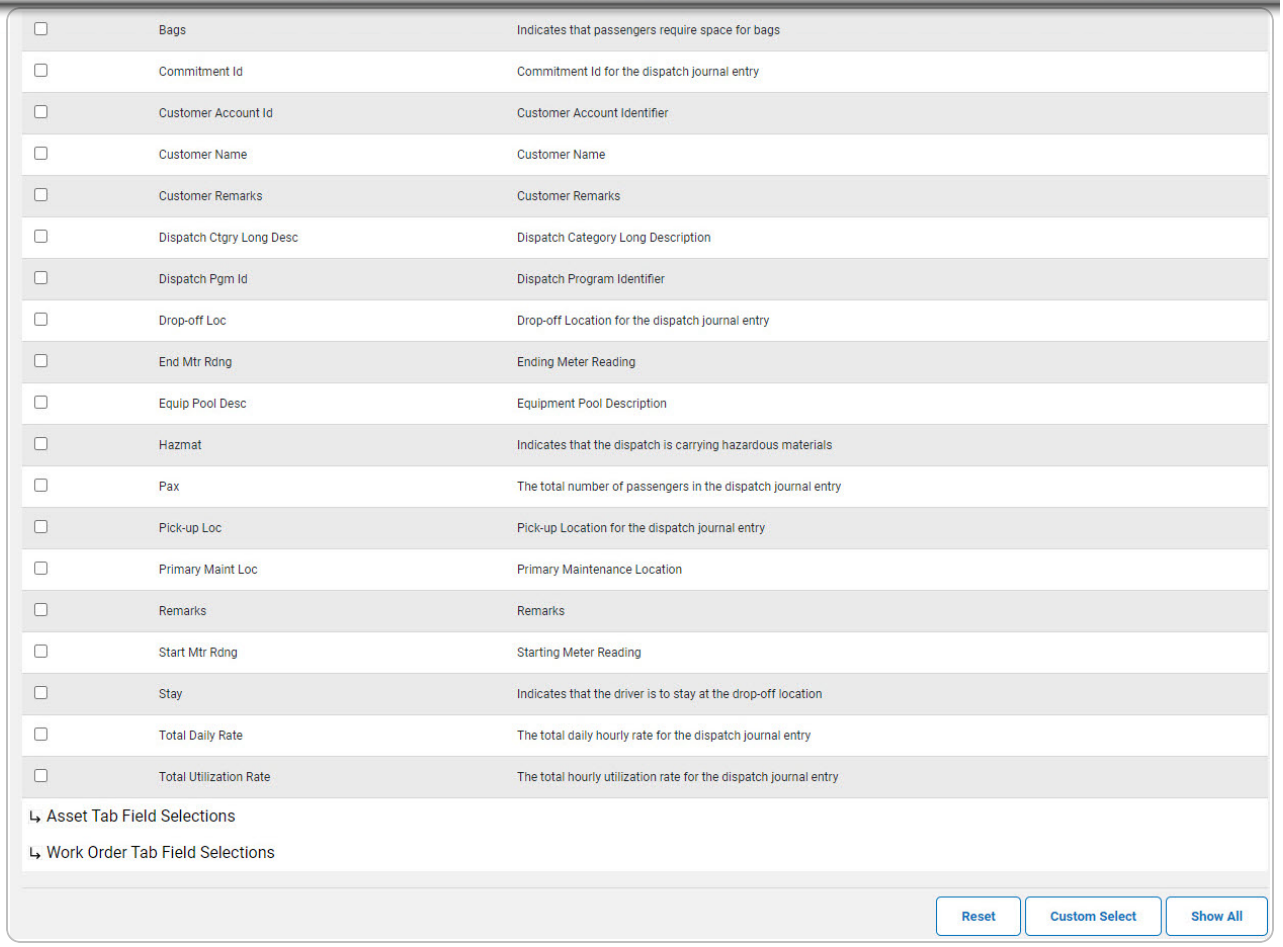

OR

Select Show All. *The **Dispatch Journal Details** page appears.*

Select the Basic Fields

1. Select . *The Basic Tab Field Selection opens.*

ELMS Navigation Helpful Tips

Click the following link to display M&U Navigation Tips.

Search for a Work Order Journal — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

   A. *The first Available Field(s) option (MAINT ACTIVITY / OWNING UIC) automatically populates and is not editable.*

   B. Use ⌄ to select the second Available Field.

   C. Repeat Step B to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Use ⌄ to select the second Operands.

C. Repeat Step A to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use ⌄ to select the first Search Value.

B. Use ⌄ to select the second Search Value.

C. Repeat Step A to add additional search criteria.

To Remove an Available Field Row

a. Use ⌄ to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Custom Select. *The **Work Order Journal Search — Results** page appears.*

OR

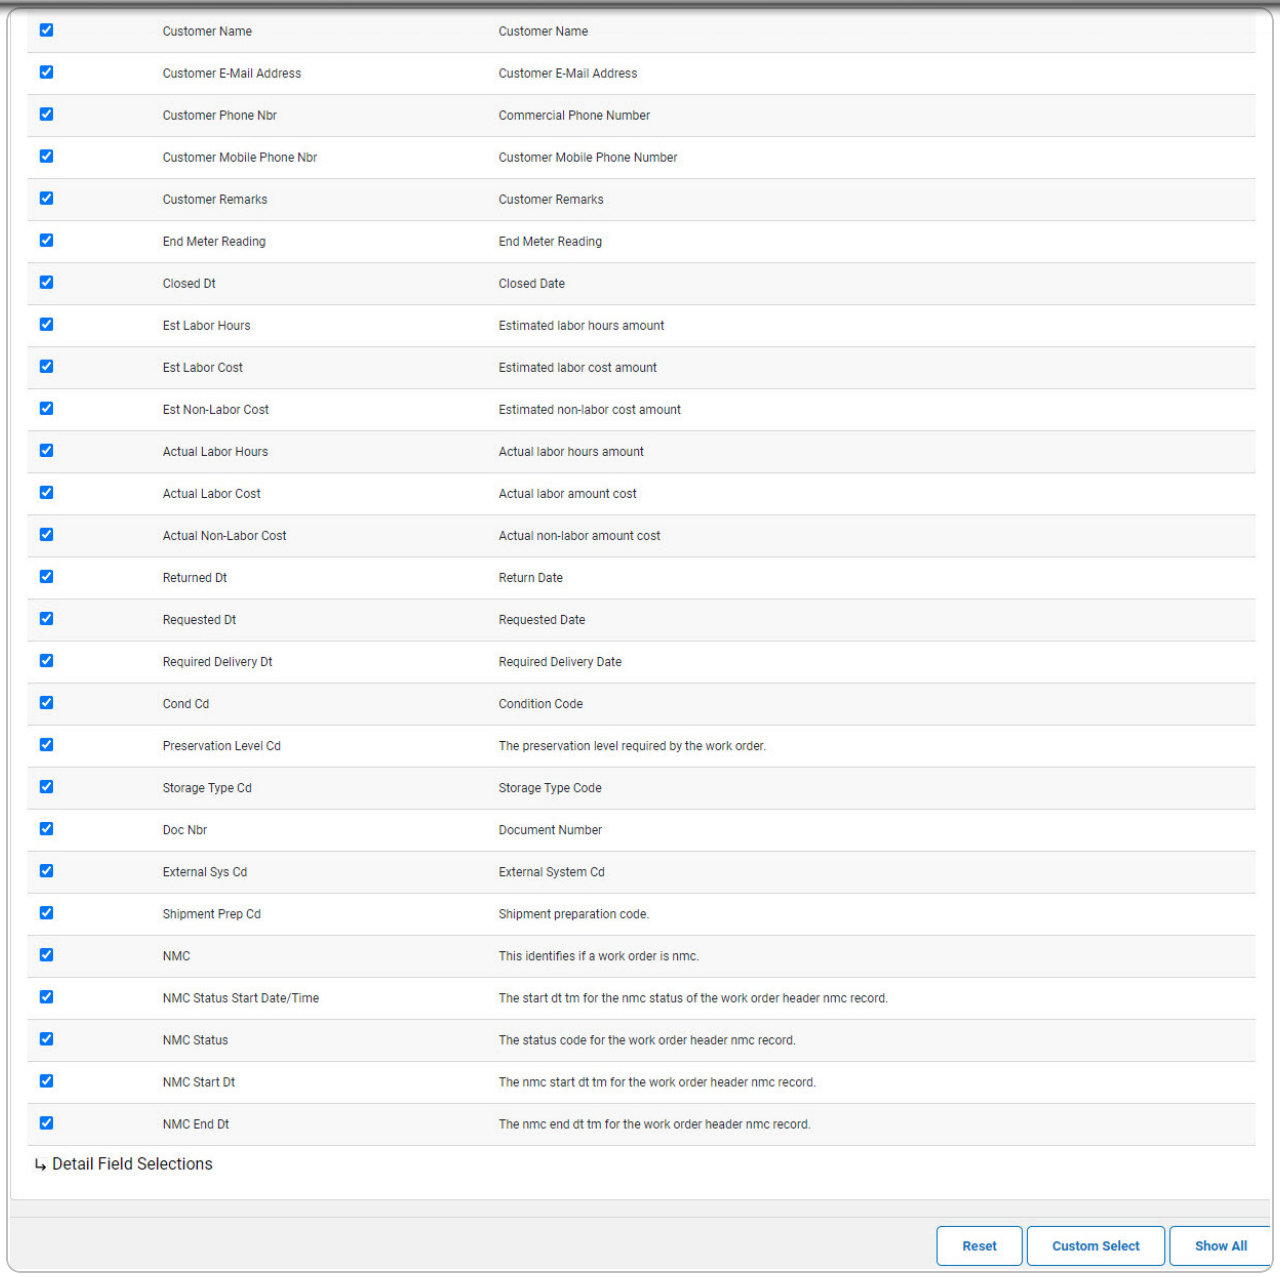

Select Show All. *The **Work Order Journal Details** page appears.*

Select the Header Fields

1. Select . *The Header Tab Field Selections open.*

Header Field Selections

Select/Deselect	Field	Field Description

Inquiry Field Selection

Overview

This page can be grouped into four sections:

- **Extract Report** - Output options including Extract file type, Extract Id (Name) and Privacy Type options (Used when creating an Inquiry Extract)
- **My Selections** – Allows you to save and use previously created Field Slection Lists.
- **Field Selection List** – Displays all data elements available for viewing
- **Action Buttons** – Used to complete the process: Show Inquiry, Submit, Reset and Cancel.

On the Inquiry Field Selection page you have the option to accept the default data fields for your query or modify the individual checkbox(s). You can also reorganize the column header order simply by dragging the Field Name up and down. The field at the top of the list will determine the sort sequence.

Inquiries can be viewed immediately by choosing Show Inquiry (used for smaller search results, displays a maximum of 5,000 records) or can be saved as a data extract by choosing Submit (used for larger search results). The data extract can create files in the following formats:

- **Extract Excel File** – Creates a .xls Excel spreadsheet.
- **Extract Text, Comma Separated File** – Creates a .csv Comma Separated value(CSV), flat text file for import into other applications.

Helpful Tip

Data Extract Inquiries are access by navigating to Inquiries > View Data Extract and are automatically deleted after 30 days.

On the Field Selection page you can also determine if the Data Extract Inquiry you are creating is Private or Shared.

- **Private** – only the creator is able to download this inquiry
- **Shared** – anyone with the appropriate level of access can download this inquiry

Navigation

Inquiries > Search Criteria > Field Selection

Page Fields

The following fields display on the Inquiry Field Selection page. For more information on each field, select the appropriate hyperlink.

Extract Excel File
Extract Text, Comma Separated File

Select/Deselect
Field
Field Description

Extract Id
Privacy Type

Procedures

To Select the Extract Excel File radio button:

Note

The Extract Excel File radio button is optional. Accepting the radio button creates an Excel .xls spreadsheet.

1. Accept the Extract Excel File radio button to create a .xls spreadsheet or modify the radio button to Extract Text, Comma Separated File – .csv flat text file for import into other applications.
2. You have the option to enter an Extract Id user-defined name that displays on the **Inquiry > View Inquiries Extract** page. It is recommended you enter a customized name to distinguish between multiple inquiries of the same name.
3. The Privacy Type default is Private. To save the query to allow anyone with the appropriate level of access to download, select the drop-down list and change to Shared.

To Modify the Default Field Selection List:

1. Choose the fields to display by selecting individual checkbox(s) or using the Select/Deselect header checkbox to toggle all checkboxes. Keep in mind, the number of Fields selected determines the amount of data returned from the database.

Note

You can select any "Field" name and drag the name up or down to modify the display order. The field at top will be the sort order of the inquiry.

2. For small volumes of data, select Show Inquiry or for large volumes of data choose Submit.
3. Select Reset to set default "**Fields**" selection(s) OR select Cancel to return to Search Criteria page.

To Add, Use, Update and Delete My Selections List:

To Add a My Selections List:

1. Field Selections can be saved as a favorite query by selecting New Selection List. The page refreshes and displays Add Selection List and Cancel Selection.
2. Enter your descriptive name for the New Selection List in the My Selections field.
3. Select Add Selection List.
4. To process your selections Show Inquiry for a small number of data or Submit for large amount of data. To cancel the New Selection List select Cancel Selection.
5. Select Reset to return the fields to their default selection or Cancel to return to Search Criteria page.

To Use a My Selections List:

1. Select the My Selections drop-down list and make a selection of a saved list.
2. The selection list check boxes will be populated and the field order set as saved.

3. Continue with the inquiry.

To Update a My Selections List:

1. Select the My Selections drop-down list and choose a saved Selections List.
2. You can select or deselect individual checkbox(s) to update your Field Selection List to display or export. The Select/Deselect header checkbox selects or removes all fields displayed.

Helpful Tip

 Select any "Field" name and drag it up or down to update the field order. The field name at the top will be the sort order of the inquiry.

3. To update the Selection List, select Update Selection List.
4. To process your update Show Inquiry for a small number of data or Submit for large amount of data.
5. Select Reset to return the fields to their default selection or Cancel to return to Search Criteria page.

To Delete a My Selections List:

1. Select the My Selections drop-down list and choose the Selections List to delete.
2. Choose Delete Selection List to remove the My Selections List.
3. Select Reset to return the fields to their default selection or Cancel to return to Search Criteria page.

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error. Use ⊞ Instructions located at the top left of the page for additional assistance.

Error	Solution
Entry must be alphanumeric with supported special character(s) "-" and "_".	Only enter supported characters in the Extract Id field.
You must choose at least 1 field before showing the query.	Select at least one field to be displayed in the results using the check boxes in the Select column.

Inquiry Search Criteria

Overview

Note

In this section of ELMS Help you will find the most important functions of creating, saving and exporting a basic inquiry. While we have not described every detail related to the functionality of each inquiry, we are providing you with the basic steps necessary to utilize the various inquiries available.

ELMS provides you with the ability to search for information and create inquiries based on your requirements. You can retrieve assets and associated information which is important in the management of your property book.
A series of pre-defined inquiries is available for you to choose from. In addition, each Agency is provided the option to request site specific Agency Pre-defined inquiries added to the ELMS Inquiry menu.
Inquiries initiated by you are the most common generated. Your access to information varies based by your role and permissions in the ELMS application.
The benefits of Inquiries include the following:

- You are able to customize your search criteria to create inquiries to meet your specific requirements for information. You can create a simple query or more complex, dynamic queries.
- You can select additional fields to display and determine the field (column) order for the results.
- View detail query pages and associated attachments for the asset. Attachments supported are jpg, jpeg, gif, and pdf files.
- Utilize an Agency Pre-defined Inquiry.
- Make use of the Inquiry Extract Viewer to select output format.
- Save or Export (MS Excel, Adobe PDF or MS Word) an Inquiry.
- Save your queries to use at a later time using My Queries.
- Create and save Field Selection lists to use at a later time using My Selection.

The two Inquiry types displayed on the Search Criteria page are:

- **Dynamic Search Criteria**- Offers search criteria fields in a drop-down list so you can choose only those fields which are necessary for your search.

- **Static Search Criteria** – The search criteria fields display on the page in a table. You complete only those fields which are necessary for your search.

If you use a search criteria repeatedly, you may choose to save it in My Queries. This allows you to save and reuse inquiry search criteria.

Navigation

Inquiries > Search Criteria

Page Fields

The following fields display on the Inquiry Search Criteria page.

Fields vary based on Inquiry selected.

Helpful Tip

A variety of inquiries require you to complete mandatory fields. An asterisk (*) identifies mandatory fields.

Procedures

To Create a Dynamic Search Criteria:

You are able to customize the search criteria for your inquiry. The most common options available on the page to create your query are:

- **Available Field(s)** drop-down list – The list of fields available to use as search criteria
- **Operands**: Equal (=), Not Equal, Less Than (<), Less Than or Equal To (<=), Greater Than (>), Greater Than or Equal To (>=), Like. The LIKE operand, if available, can be used for a wildcard search.
- **Search Value** entry options:
  - Drop-down list of available options
  - Text entry fields
  - Calendar tool ( ) for date values

Example of Creating a Dynamic Search Criteria:

Note

The query you select determines the Available Field options accessible to create your search criteria. In some cases, your UIC may be displayed. Verify the UIC prior to making any selections on the page. Line one of Available Field(s) may be populated for you and you can modify the Operands and Search Value(s).

1. On the first available line of the **Available Field(s)**, select the drop-down list and make a selection or accept the default displayed.
2. The **Operands** field automatically populates with the equal (=) operator. Accept the Operand displayed or modify the Operand for your search criteria by selecting the drop-down list. Operands – (Equal (=), Not Equal, Less Than (<), Less Than or Equal To (<=), Greater Than (>), Greater Than or Equal To (>=), Like). The LIKE operator, if available, and can be used for a wildcard search.
3. Enter the **Search Value(s)** to construct your search criteria. Use the available drop-down list or text entry field to enter the Search Value. To help further refine your search criteria, a  may be displayed on the page to select a date criterion for your query. To retrieve a field equal to space, a space must be entered by the space bar.

Helpful Tip

After your Search Criteria is entered, you can select the **Enter** or **Tab key** to generate additional Field Selection(s).

4. Select Fields to display the Field Selection page or Reset to clear the page.

Note

If the error message **"No record(s) match search criteria"** displays, you can modify/remove your selection. To remove a **"Select an Item"**, select the option chosen and pick the **"Remove Filter Category"** option. The page resets and you can make another selection.

To Create a Static Search Criteria:

The Static Search Criteria page lists fields related to the Inquiry selected. You can choose one or a combination of values to conduct the search. In some cases, your UIC may be displayed. Verify the UIC prior to making any selections on the page. The most common options available on the page to create your query are:

- **Fields** - Based upon the Inquiry selected the options on the page vary
- **Operands** – (Equal (=), Not Equal, Less Than (<), Less Than or Equal To (<=), Greater Than (>), Greater Than or Equal To (>=), Like). The LIKE operator, if available, and can be used for a wildcard search.
- **Search Value** entry options:
  - Drop-down list of available options
  - Text entry fields
  - Calendar tool () for date values

Helpful Tip

Some inquiries allow you to search without any search criteria. It is recommended you enter a search criteria to further refine your search.

Example of Creating a Static Search Criteria:

1. Choose the logical operator that corresponds with the field you wish to use as a filter.
2. Enter the Search Value(s) to construct your search criteria. Use the available drop-down list or text entry field to enter the Search Value. To help further refine your search criteria, a  may be displayed on the page to select a date criterion for your query. To retrieve a field equal to space, a space must be entered by the space bar.
3. Select 

to display the Search Results page or 

to clear the page.

To Add, Use, Update and Delete My Queries Entries:

To Add My Queries:

Saving inquiries you have created to use at a later date is a time saving tool provided within Inquiries. The 

allows you to save a new favorite inquiry that has not been previously saved or added. It is important to remember, adding "My Queries" are saved by the

individual Web ELMS menu option you selected.
For example, an Asset Management > Custodian My Queries you created cannot be accessed from the Inventory Search Criteria page.

1. Select New Query on the Search Criteria page. The page refreshes and displays Add Query and Cancel Query.
2. Enter a descriptive name for the new inquiry into the My Queries text field.

Note

When you are creating My Queries, remember to construct a name with a description that is meaningful. Form a name that includes the purpose of the query.
Example: Asset Custodian Query or AllAssetsBldg20

3. Construct your inquiry utilizing the following most common options available on the page:

- **Fields and Available Field(s)** drop-down list
- **Operands** – Equal (=), Not Equal, Less Than (<), Less Than or Equal To (<=), Greater Than (>), Greater Than or Equal To (>=), Like
- **Search Values** using:
  - Fields drop-down list
  - Search Value(s)
  - Calendar Tool [cal icon] for date values

4. Select Add Query to save the query or choose Cancel Query to return to the New Query status. Once the Add Query is selected, the page refreshes and the Update Query and Delete Query display.
5. Select Fields to display Field Selection page or Search to display Search Results page.

To Use a My Queries Entry:

1. On the Search Criteria page, select the My Queries drop-down list to choose a saved query to display. The page refreshes and displays New Query, Update Query and Delete Query .
2. At this time you saved criteria displays. You can add another filter to your inquiry. Select the logical operator and enter your search criteria.
3. Select Fields to display Field Selection page or Search to display Search Results page.
4. Choose Reset to clear the page.

To Update a My Queries Entry:

1. Select the saved My Queries entry from the drop-down list. The page refreshes and the New Query, Update Query, and Delete Query options display.
2. At this time you can update or use your saved My Queries entry. On the page, you have the following options:

- For Dynamic Inquiries, you can use "**Enter**" or "**Tab**" key to generate additional Available Field(s) or Remove Available Field(s).
- Modify Operands – (Equal (=), Not Equal, Less Than (<), Less Than or Equal To (<=), Greater Than (>), Greater Than or Equal To (>=), Like). The LIKE operator, if available, can be used for a wildcard search.
- Modify or Remove Search Value(s).

3. If adjustments are made to the query, select the Update Query to save your modifications.
4. Select Fields to display Field Selection page or Search to display Search Results page.
5. Choose Reset to clear the page.

To Delete a My Queries Entry:

1. Choose the My Queries drop-down list to select the saved query to delete. The page refreshes and the New Query, Update Query, and Delete Query options are displayed.

Note

Selecting Delete Query immediately deletes the query.

To remove the query, select Delete Query.

2. Select Fields to display Field Selection page or Search to display Search Results page.
3. Choose Reset to clear the page.

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error. Use ⊞ Instructions located at the top left of the page for additional assistance.

Error	Solution
Mandatory Entry: Available Field(s) and Operands.	No data is entered.
Mandatory Entry: Available Field(s).	No data is entered in the Available Field(s) but an operand is selected.
Saved Inquiry already exists.	Inquiry already exists.
Must enter =, >,<, >=, <=, <>, or Like.	Value entered and no operand is selected.
No record(s) match search criteria.	Results for the search criteria you entered do not exist, you are logged into the wrong ACTBL UIC/UIC, or you do not have security access.

Inquiry Search Results

Overview

The Search Results page displays the output of your query for export to MS Excel, Adobe PDF or MS Word.

On the page you can perform the following:

- Scroll thru number of pages returned from query results
- Determine size of font
- Find/Next by entering the characters or words to search
- Select format for export
- View Detail page

Navigation

Inquiries > Search Criteria > Search Results
or
Inquiries > Search Criteria > Field Selection > Search Results

Page Fields

The following fields display on the Inquiry Search Results page.

Fields vary based on Inquiry selected.

Procedures

To View Search Results:

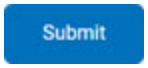

1. You can scroll thru the Number of Pages returned from your query results.

Button	Function
	Return to the first page of results.

Button	Function
	Return to the previous page of the results.
	View the current page number. Enter the desired page number and press Enter to advance to the desired page.
	Display how many pages retrieved.
	Advance to the next page of the results.
	Advance to the last page of results.

2. To modify the **Display Format/Font** on the page, select the drop-down list to change the size of the font displayed on the page.
3. The **Find Text in Report** feature allows you to enter the characters or words to search for in the Find|Next field. This is not case sensitive so you will find the word truck if you enter it as Truck, truck or even TrUcK. Select the Find hyperlink. To find the next matching value select the Next hyperlink.
4. Select the **Export**  and make a selection from the drop-down list to view the results in MS Excel, Adobe PDF or MS Word.

Attention

 Do not export large volumes of data, select the browsers Back button, then select  on the Field Selection Page.

5. Where available on the page, you can mouse over a data field or hyperlink to select a record to display additional information. A Detail page is displayed for the record selected.

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error. Use ⊞ Instructions located at the top left of the page for additional assistance.

Error	Solution
Mandatory Entry From Date.	Transaction From Date is required.

Use a My Queries Inquiry

Selecting Reset *at any point of this procedure returns all fields to the default setting.*

1. Navigate to the desired **Inquiry Search Criteria** page.
2. Use ⌄ to select the desired My Queries. *The page refreshes, and the search criteria fields change.*

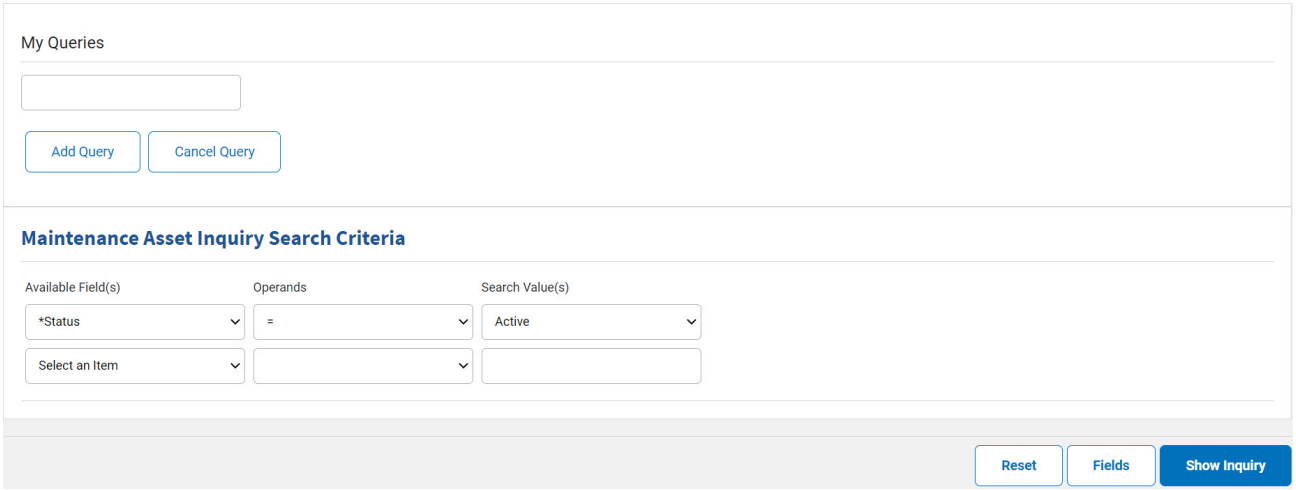

3. Continue with the procedure on the desired Inquiry Search Criteria help topic, at the "Select Show Inquiry" step.

Add a My Queries Inquiry

Selecting Reset at any point of this procedure returns all fields to the default setting.

1. Navigate to the desired **Inquiry Search Criteria** page.
2. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*

Note

Selecting Cancel Query at any time from this point of the procedure removes all revisions and returns My Query to a drop-down field.

3. Enter the unique inquiry name in the My Queries field.

Note

Create a unique name with a meaningful description, and contains the purpose of the query.

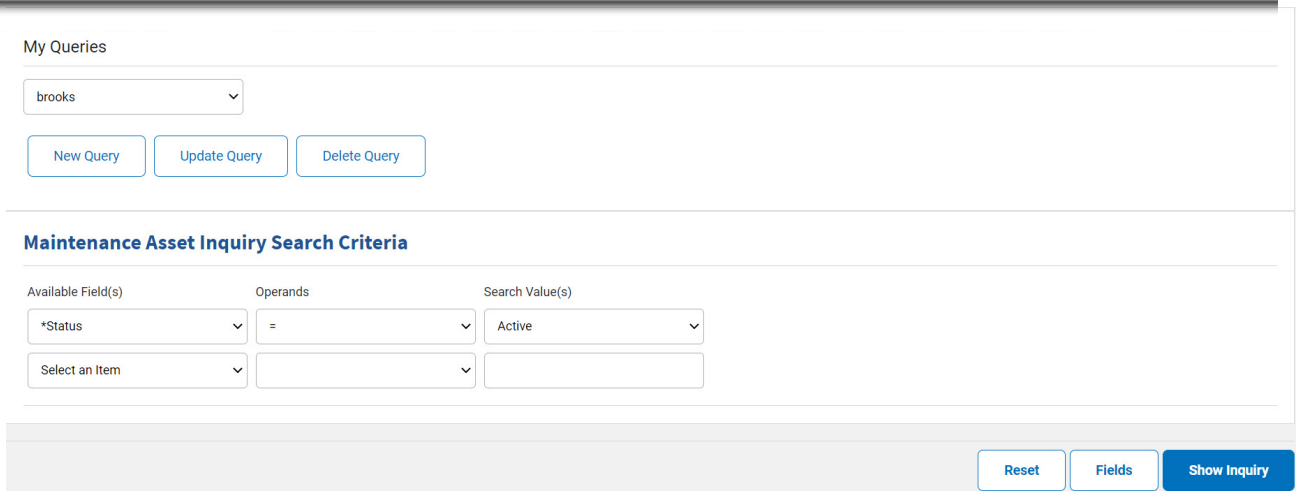

Example: AllAssetsBldg20 or EquipPoolSmallVehicleNoCert

4. Create the inquiry using the procedure on the desired Inquiry Search Criteria help topic, stopping before the "Select Show Inquiry " step.
5. Select Add Query . *The page refreshes, and* Add Query *is replaced by* Update Query *and* Delete Query .
6. Continue with the procedure on the desired Inquiry Search Criteria help topic, at the "Select Show Inquiry " step.

Update a My Queries Inquiry

Selecting Reset *at any point of this procedure returns all fields to the default setting.*

1. Navigate to the desired **Inquiry Search Criteria** page.
2. Use to select the desired My Queries. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query .

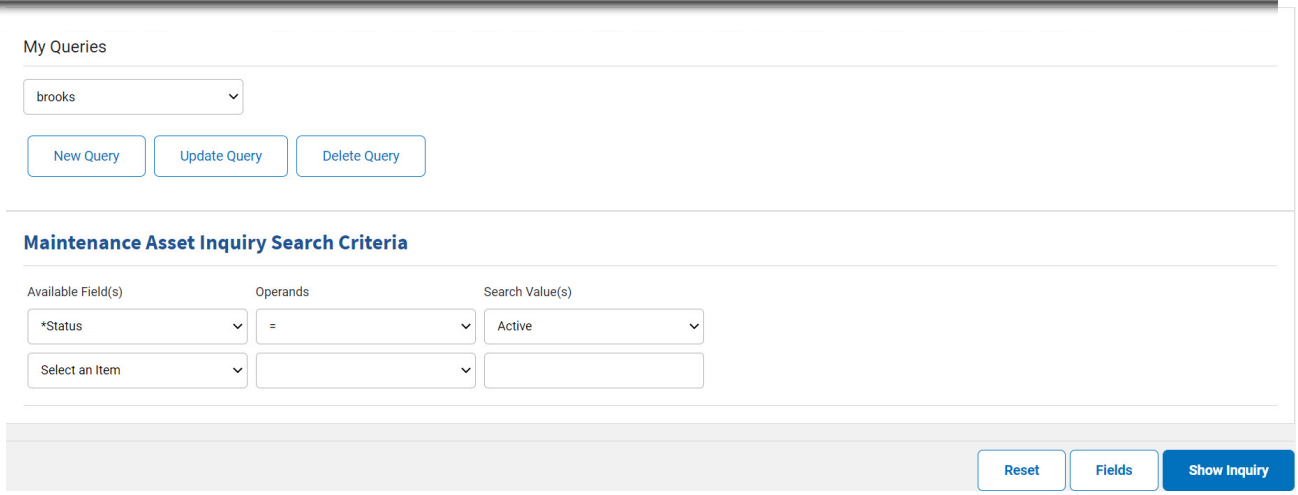

3. Edit the inquiry using the procedure on the desired Inquiry Search Criteria help topic, stopping before the "Select Show Inquiry" step.
4. Select Update Query. *The page refreshes.*
5. Continue with the procedure on the desired Inquiry Search Criteria help topic, at the "Select Show Inquiry" step.

Delete a My Queries Inquiry

Selecting Reset at any point of this procedure returns all fields to the default setting.

1. Navigate to the desired **Inquiry Search Criteria** page.
2. Use ▼ to select the desired My Queries. *The page refreshes, the search criteria fields change, and New Query is joined by Update Query and Delete Query.*

3. Select Delete Query. *The inquiry is immediately deleted.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
13 – Mandatory Entry: *Available Field(s) and Operands*.	Missing Entry. No data was entered. Enter the appropriate information in the desired field.
102 – Inquiry already exists.	Invalid Entry. The inquiry already exists in the database. Use the existing inquiry, or select Update Query to revise the existing query.

Only choose one of the three options. Stock Nbr is the default option.

- Enter the STOCK NBR in the field provided. *This is a 15 alphanumeric character field.*
- Enter the ITEM DESC in the field provided. *This is a 1024 alphanumeric character field.*
- Use ⌄ to select the FSC.

3. Enter any desired additional search criteria.
   - Enter the LIN/TAMCNin the field provided. *This is a 10 alphanumeric character field.*
4. Select Search. *The Search Results display in the Warehouse STOCK NBR Grid below.*

5. Select ☐ next to the desired STOCK NBR.
6. Select Submit. *The pop-up window closes and the selected STOCK NBR appears in the previous screen.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
13 — Mandatory Entry: *STOCK NBR*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *ITEM DESC*.	
13 — Mandatory Entry: *FSC*.	
13 — Mandatory Entry: *LIN/TAMCN*.	
128 - To perform search, ITEM DESC must be three positions.	Invalid Entry. The ITEM DESC field must contain at least three characters to perform a search. Enter three or more characters, then select the Search button again.
208 - You have exceeded the browse limit of a 250 row display. Refine Search Criteria.	Invalid Search Entry. The performed search returned more than 250 rows. Refine and re-enter the search criteria.

- Schedule Preventive Maintenance

User Identifier Browse

Reference Document

The purpose of this process in the Enterprise Logistics Management System (ELMS) is to allow users to browse for a User Id (User Identifier). Following the browse, the User Identifier is input into the User Id field of the particular **User Id Browse Search Criteria** screen.
This process may be used by any program requiring entry of a User Id. The program provides several retrieval options based upon the process calling the browse. These options and the processes using them are described below.
In addition to the individual User's permissions to perform a User Id browse, retrieval options are followed based on the process calling the browse:

- If the individual using the browse is an Application Security Officer, all active users are displayed.
- If the individual using the browse is a Site Security Officer, all active users are displayed that have access to the same sites as the security officer except those who are also Site Security Officers.
- If the individual using the browse is an Accountable Unit Identification Code Security Officer, all active users are displayed that have access to the same Accountable UICs (Unit Identification Code) as the security officer except those who are also Accountable UIC Security Officers.

Steps to Browse for A User Id

1. When necessary, select the **User Identifier**  . The User Identifier Browse screen automatically opens when you enter the **ACTBLUIC/UIC/Custodian NBR Access** (Accountable Unit Identification Code, Unit Identification Code, and Custodian Number Access) screen.

Fields are displayed in the following order:

- **Search By** (Display–only)
- User Id — Entry field into which you may enter all or any part of a User Identifier. You may use the wildcard character (a **'%'** percent sign) as a substitute for all or any number of characters.
- Last Name — An alternative data entry field into which you may enter all or any part of a user last name. You may use the wildcard character (a **'%'** percent sign) as a substitute for all or any number of characters.

1. Select Search to begin the search, or select Reset to clear data. All fields are optional; however, you must enter data to limit the number of rows retrieved. Full or partial values can be entered in either field.

   The **User Id Search Browse Results** records are displayed.
   Fields and data are displayed in the following order. Restrictions on those User Ids displayed are based on the User Type and security profile of the user.
   - Carried forward from the **Search Criteria** screen:
   - **Search By**
   - **User Id**
   - **Last Name**
   - **Search Results** Grid display in the following order:
   - **Select** (Hyperlink)
   - **User Id** Default sort. Can sort on the column heading
   - **Last Name**
   - First Name

   You may alphabetically sort the return list by selecting the User Id link at the top of the User Id data column.
2. Choose the **Select** link for the User Id needed.

The data selected after the search populates the User ID (Identifier) field in the initial transaction screen being used, allowing you to continue processing your transaction. The **User Id Browse Search Results** screen also closes automatically.

Processing considerations for a User Id

- **Site Id**
  - When a site Security Officer is using the browse, ELMS automatically determines what sites the security officer can access also.
  - When returning results for a Site Security Officer using the browse, ELMS determines whether the user has access to any site that the Site Security Officer can access, too.
- **User Accountable UIC** (Unit Identification Code)
  - When an Accountable UIC Security Officer is using the browse, ELMS determines which Accountable UIC(s) the security officer can access. This includes determining whether the user has access to any Site Id that the Accountable UIC Security Officer can access.

Accessibility

The pages on the Enterprise Logistics Management System (ELMS) web-site are developed to be accessible to individuals with disabilities, in accordance with Section 508 of the Rehabilitation Act of 1973, as amended-29 U.S.C. § 794.

Specifically, the pages have been developed to comply with the following 508 web site accessibility requirements developed by the Architectural and Transportation Barriers Compliance Board (The Board) and published by the W3C as worldwide accessibility standards.

These requirements are based upon the Final Rule as Published in the Federal Register on December 21, 2000 at 36 CFR Part 1195 [Docket No. 2001-01] RIN 3014-AA25 and as published in The Board's on-line guide to the standards for Web-based Intranet and Internet Information and Applications (1194.22).

These requirements include the following:

A text equivalent for every non-text element shall be provided (e.g., via "alt," "longdesc," or in element content).

Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.

Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.

Documents shall be organized so they are readable without requiring an associated style sheet.

Redundant text links shall be provided for each active region of a server-side image map.

Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.

Row and column headers shall be identified for data tables.

Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.

Frames shall be titled with text that facilitates frame identification and navigation.

Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.

A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of these standards, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.

When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by assistive technology.

When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).

When electronic forms are designed to be completed on-line, the form shall allow people using assistive technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.

A method shall be provided that permits users to skip repetitive navigation links.

When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.

If you have trouble using this site, report the issue to the point of contact listed on the Contact Us page.

External Link Disclaimer

The appearance of hyperlinks does not constitute endorsement by the Department of Defense (DoD) or the Defense Finance and Accounting Service (DFAS) of this Web site or the information, products or services contained therein.
For other than authorized activities such as military exchanges and Morale, Welfare and Recreation sites, the DoD and the DFAS does not exercise any editorial control over these locations. All links are provided consistent with the Mission of the Enterprise Logistics Management System (ELMS).

Let us know about existing external links which you believe are inappropriate and about specific additional external links which you believe ought to be included.

Consent To Monitoring

This is a U.S. Government (USG) Information System (IS) that is provided for USG-authorized use only.

By using this IS (which includes any device attached to this IS), you consent to the following conditions:

The USG routinely intercepts and monitors communications on this IS for purposes including, but not limited to, penetration testing, communications security (COMSEC) monitoring, network operations and defense, personnel misconduct (PM), law enforcement (LE), and counterintelligence (CI) investigations.

At any time, the USG may inspect and seize data stored on this IS.

Communications using, or data stored on, this IS are not private, are subject to routine monitoring, interception, and search, and may be disclosed or used for any USG authorized purpose.

This IS includes security measures (e.g., authentication and access controls) to protect USG interests — not for your personal benefit or privacy.

Notwithstanding the above, using this IS does not constitute consent to PM, LE or CI investigative searching or monitoring of the content of privileged communications, or work product, related to personal representation or services by attorneys, psychotherapists, or clergy, and their assistants.
Such communications and work product are private and confidential.
See User Agreement for details.
