

# Asset Receiving – Entry Page

## Overview

The Property Accountability module Asset Receiving process provides the ability to receive assets to ELMS.

The assets are either Serially managed (individual asset - one at a time), Component managed (a part of a total asset - one at a time, linked to the Higher Assemblage), or Bulk managed (group of assets - a bunch at a time).

## Navigation

Asset Management > Receiving > Asset Receiving page

## Procedures

### Add an Asset

Selecting  at any point of this procedure removes all revisions and closes the page.  
**Bold** numbered steps are required.

1. In the Asset Management menu, choose Receiving. **The Asset Receiving Data Entry page appears.**
2. Choose which kind of asset to receive:
