

Search for a MAINT Management Assignment – Criteria

Overview

The Property Accountability module MAINT Management Assignment process provides the ability to add, update or delete an association between a UIC or MAINTENANCE GROUP ID and an Interface System Code, INTERFACE SITE ID, or Maintenance Activity. This association controls what assets are associated with a Maintenance Activity/external maintenance application via the Interface System Code or the INTERFACE SITE ID. If the user has access to more than one SITE ID, they must be logged on to the specific Site to perform the maintenance assignments.

Note

An individual with the Cataloger role must set the MAINTENANCE GROUP ID.
