Property Accountability

Enterprise Logistics Management System

Printed Manual

Version 28 Apr 2026

Welcome

Overview — ELMS

Welcome to the Enterprise Logistics Management System (ELMS) Help System.
The Enterprise Logistics Management System (ELMS) is a Department of Defense (DoD) property management system.
It is the Accountable Property System of Record (APSR) for DoD Agencies and Military Services and non-DoD Agencies.
The ELMS program office is located within DLA Logistics Catalog and Data Solutions (LCDS), a Portfolio of the Information Operations of the Defense Logistics Agency. The ELMS PMO receives sponsorship from the Equipment Office, under the Office of the Assistant Secretary of Defense (OASD) for Sustainment / Logistics.

Overview — Property Accountability Help

This online help is designed to provide access to detailed information and instructions about the various processes contained within the Property Accountability module.
The help topics provide assistance with managing large-ticket items, issues, and assets, in any DoD environment.

  - Security POCs
  - Management Messages
  - User Roles Display

- **Catalog** —
  - Catalog
    - Pndg Catalog Trans
    - Stock Number
    - Manufacturer Part Nbr
    - Ref Publication

    - LIN/TAMCN
    - SKO Catalog
  - Mass Updates
    - Stock Nbr

- **Asset Management** —
  - Asset Management
    - Receiving
    - Disposition
    - Transfer
    - Update
    - Custodian
    - Pending Tran
    - Authorization
    - Authorizations Pndg
    - Excess
    - Excess In Place Del
    - UIT OutOfCycle Recon
    - UII Update/Assign
    - UII Registry Query
    - Reversal
  - IT Management
    - Dashboard
    - IT Device Software
    - Software Request
    - IT Asset Char Update

- **Inventory** —
  - Inventory
    - Manage Inventories
    - Update Inventory
    - Next Inv Initzn Date
    - Inv Mgt Plan
  - Generate Inventory
    - Custodian
    - Cyclic
    - Location
    - Sensitive
    - Custome

- **AIT** —

- Print Labels
- Download to PDCD
- Upload from PDCD
- Label Format
- Physical Inventory Resolution
- Physical Inventory

- **Master Data** —
  - Master Data
    - Contractor
    - Cost Center
    - Report / Form Message
    - Contract
    - Doc Nbr Range
    - Appropriation
    - Agency Acq Pgm
    - Maint Grp Id
    - Location
    - Actbl UIC/UIC

PA User

Property Accountability is role-based, similar to all other ELMSmodules.
User access is based on one or more roles, allowing for "need to know" and "separation of duty" access.
The security uses C.R.U.D. methodology:

- **Create**
- **Read (Inquiry)**
- **Update**
- **Delete**

Enterprise Logistics Management System (ELMS) Property Accountability Module Navigation

Overview

This page describes the primary features found on the Property Accountability pages:

- Blue Menu Bar
- Menu Bar
- Instructions
- Help
- Standard Buttons

Additional information about ELMS can be found at the ELMS Support Site.

Navigation

ELMS PA Module > Any Process Page > 

Blue Menu Bar

The Blue Menu bar is at the very top of the page.
The items on the left side are:

- **ELMS logo**  — Returns to the home page.

  The item next to that is:

- **Module Name** 

— Shows which module is currently open.

The items on the right side are:

- **Site Id** — Shows the unique database within the Enterprise Logistics Management System.
- **Actbl UIC** — Shows the organization that is assigned management responsibility for property.
- **UIC** — Shows the unique unit, organization, or activity.
- **User ID** — Shows the current users identification name.

Menu Bar

The Menu bar is right above the Process page. While each users Menu Bar contains different items, they all work the same way to open a Process page.

1. Click on a Menu item drop-down list. *The drop-down list of the processes in that Menu item appears.*
2. Select a process from the drop-down list. *The Process page appears.*

Instructions

At the top of each Process page is a 

link.

- Select 

. *The **Instructions** drop-down panel appears.*
- *A basic overview and terms on the page appears.*

Help

On the right side of the Instructions panel is the Help button 

.

- Select 

. *The **Help System** opens in a separate tab.*
- *The Overview topic for the current Process page appears.*

Stock Number Overview

Overview

The Property Accountability module Stock Number process provides the ability to add, update, or delete a stock number record in the catalog.
Each Stock Number is unique to a specific catalog within each logistics program and can only be added once per catalog.
There are four types of stock numbers identified by the STOCK ITEM CD:

- **A - NSN** (National Stock Number)
  — from FEDLOG or TDMS or other DOD lists.
- **J - MCN** (Management Control Number)
  — created at the local level, when an NSN does not exist for that asset.
- **B - PART NBR** (Part Number)
  — created by either the manufacturer or the local level.
- **I - Intangible** (Intangible)
  — created for Software and other stock that has no physical presence.
- **L - Local** (Local)
  — created at the local level, when the MCN does not fit the required form for the asset.

ELMS interfaces with the DOD Federal Logistics Information Services (FLIS), and can interface with Enterprise Agency Catalogs (e.g., the United States Marine Corps Technical Data Management System - USMC TDMS). The FLIS allows the Warehouse Management module to access NSN data in the Federal Logistics Data (FEDLOG). The TDMS allows the Warehouse module to access NSN data in the Marine Corps standard catalog information.
The Line Item Number (LIN) / Table of Authorized Materiel Control Numbers (TAMCN) plays a key role in managing equipment. The LIN/TAMCN can be thought of as a Group ID. Stock numbers are grouped under one LIN/TAMCN. For example, when the Warehouse receives a LIN/TAMCN for equipment of various sizes, a Stock Number is assigned for each size.

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Navigation

Add a Stock Number

Overview

The Stock Number Add process provides the ability to create a new stock number in the catalog.

Helpful Tip

Each Stock Number is unique to a specific catalog within each logistics program. A Stock Number can only be cataloged one time for each Site Catalog Name.

There are two tabs on the page to create a new stock number record. The tabs are:

1. **ELMS**
   — application specific information, which includes:
   - **Catalog Source**
     — where the number assigned comes from within the Federal government
   - **General**
     — additional details regarding the asset
   - **Add/Edit Remarks**
     — text fields for additional information regarding the asset
2. **Property Book**
   — location specific information, which includes:
   - **Property Book**
     — location details for the asset

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Navigation

Catalog > Stock Number > Stock Number Search > + Add > New STOCK NBR page

Page Fields

The following fields display on the **New Stock Nbr** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
525	Select "Search" to refresh the Stock Nbr Search Results.
526	Select "Reset" to clear the Stock Nbr Search Criteria.
527	Select "Grid Options" for additional actions to perform on the Stock Nbr data.
528	Select "Add" to create a new Stock Nbr record.
529	Select "Edit" to update the selected Stock Nbr record(s).
530	Select "Delete" to remove the selected Stock Nbr record(s).
531	Select "Attachments" to add or view an attached document to the selected Stock Nbr record(s).
132	To search for CAGE Cd, see https://cage.dla.mil.
161	NCAGE Cd must = 5 pos. When pos 1 = 0-9, pos 5 must = alpha but not I, O, or X. When pos 1 = A, pos 5 must = alpha-

	numeric but not I, L, O, Q, or V thru Z. When POS 1 = alpha, but not alpha O, POS 5 must = 0-9.
162	CAGE CD must = 5 POS, 1st and 5th must = numeric, remaining POS must = alphanumeric except I and O.

Add a Stock Number

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.* ***Bold*** *numbered steps are required.*

1. Select + Add. *The* ***New Stock Nbr*** *page appears, open to the ELMS tab.*

2. *Complete the* ***Catalog Source*** *panel.*

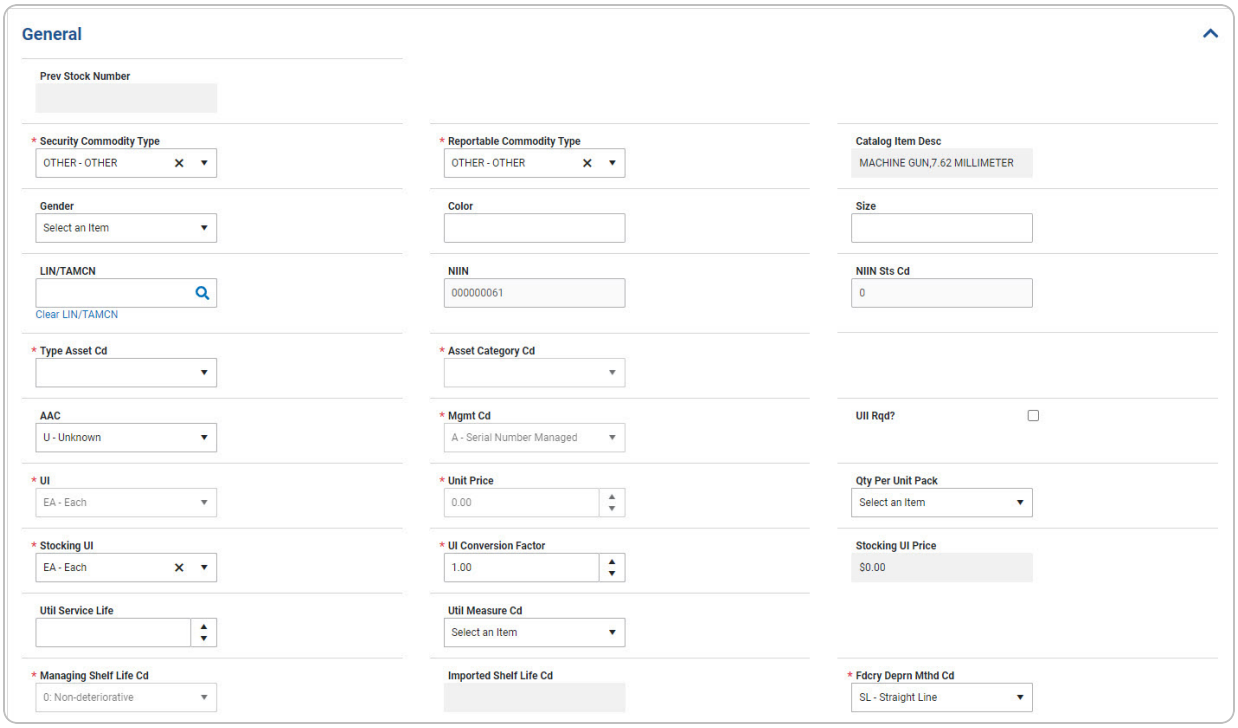
   A. Use ▾ to select the Stock Item Type.

   B. Enter the Item Desc in the field provided. *This is a 256 alphanumeric character field.*

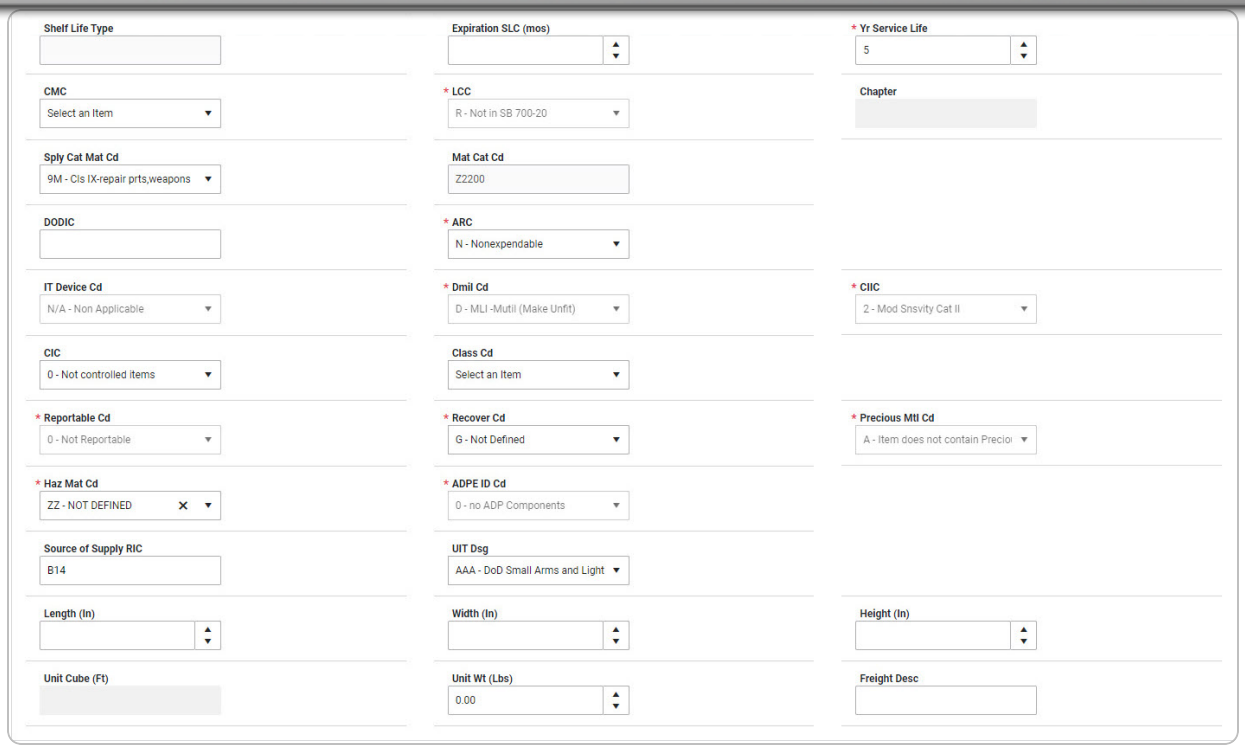
C. Use ▾ to select the NCB Cd.

D. Use ▾ to select the Catalog Source.

E. Enter the FSC, using ℹ to assist with the entry. *This is a 4 numeric character field.*



F. Enter the ITEM NBR in the field provided. *This is a 3 alphanumeric character field.*



G. Enter the STOCK NBR, or use 🔍 to assist with the entry. *This is a 15 alphanumeric character field.*

External Stock Number Browse

H. Enter the Sequence NBR in the field provided.

I. Select Next >. *The **General** and **Add/Edit Remarks** panels appear.*

a. *The PREV STOCK NBR automatically populates and is not editable.*

b. Use ▼ to select the Security Commodity Type.

c. Use ▼ to select the Gender.

d. Enter the LIN/TAMCN, or use 🔍 to assist with the entry. *This is a 10 alpha-numeric character field.*

Line Item Number / Table of Authorized Materiel Control Number Browse

e. Use ▼ to select the Type Asset Cd.

f. Use ▼ to select the AAC.

g. Use ▼ to select the UI.

h. Use ▼ to select the Stocking UI.

i. Use ▲▼ to choose the UTIL SERVICE LIFE.

j. Use ▼ to select the Managing Shelf Life Cd.

k. *The Shelf Life Type automatically populates and is not editable.*

l. Use to select the CMC.

m. Use to select the Sply Cat Mat Cd.

n. Enter the DoDIC in the field provided. *This is a 4 alphanumeric character field.*

o. Use to select the IT Device Cd.

p. Use to select the CIC.

q. Use to select the Reportable Cd.

r. Use to select the Haz Mat Cd.

s. Enter the Source of Supply RIC in the field provided. *This is a 3 alphanumeric character field.*

t. Use to choose the Length (In).

u. *The Unit Cube (Ft) field automatically calculates once the previous four fields are populated.*

v. Use to select the Reportable Commodity Type.

w. Enter the Color in the field provided. *This is a 15 alphanumeric character field.*

x. *The NIIN automatically populates and is not editable.*

y. Use to select the Asset Category Cd.

z. Use to select the Mgmt Cd.

aa. Use to choose the Unit Price.

ab. Use to choose the UI Conversion Factor.

ac. Use to select the Util Measure Cd.

ad. *The Imported Shelf Life Cd automatically populates and is not editable.*

ae. Use to choose the Expiration SLC (mos).

af. Use to select the LCC.

ag. Enter the Mat Cat Cd in the field provided. *This is a 5 alphanumeric character field.*

ah. Use to select the ARC.

10. Select Finish. *The **NEW STOCK NBR** page closes, and the new Stock Number appears at the top of the Search Results grid, highlighted in green.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
161 — Remarks must be alphanumeric with supported special character(s) $, — , /, #, &, comma, period, and space.	Invalid Characters Entered in the Remarks field. Enter alphanumeric characters, or the following permitted special characters: $, —, /, #, &, comma, period, and space. Special characters like ! or @ are prohibited.
13 — Mandatory Entry: *STOCK NBR*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *ITEM DESC*.	
13 — Mandatory Entry: *FSC*.	

13 — Mandatory Entry: *Stock Item Cd*.	
13 — Mandatory Entry: *Type Asset Cd*.	
13 — Mandatory Entry: *Mgmt Cd*.	
13 — Mandatory Entry: *Security Commodity Type*.	
13 — Mandatory Entry: *Reportable Commodity Type*.	
13 — Mandatory Entry: *ACC*.	
13 — Mandatory Entry: *Unit Pack Price*.	
13 — Mandatory Entry: *Managing Shelf Life Cd*.	
13 — Mandatory Entry: *Dmil Cd*.	
13 — Mandatory Entry: *CIIC*.	

13 — Mandatory Entry: *Storage Requirement Cd*.	
13 — Mandatory Entry: *Util Svc Life when Util Measure Cd is provided.*.	Missing Entry. If either Util Svc Life or Util Measure Cd is entered, the other is mandatory.
13 — Mandatory Entry: *Util Measure Cd when Util Svc Life is provided.*.	
92 — Entry must be numeric: *Unit Price*.	Invalid Entry. The characters entered in the field include letters. Enter numeric ("0" through "9") characters.
92 — Entry must be numeric: *Yr Svc Life*.	
92 — Entry must be numeric: *Util Svc Life*.	
92 — Entry must be numeric: *Length*.	
92 — Entry must be numeric: *Width*.	
92 — Entry must be numeric: *Height*.	

92 — Entry must be numeric: *Unit Weight*.	
92 — Entry must be numeric: *Unit Cube*.	
44 — Input date must be <= system date.	Invalid Date Entry. The system date (Today's Date) must be after or the same as the Input date. Re-enter the date.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..
676 — Entry must be alpha-numeric.	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alphanumeric (alphabetic "A" through "Z", numeric "0" through "9") characters.
487 — LIN/TAMCN record must be established.	Invalid Entry. LIN/TAMCN displays the Line Item Number/ Table of Authorized Materiel Control Number (LIN/TAMCN established to provide another identifying number for a generic class of assets. Verify the LIN/TAMCN exists.
488 — TYPE DSG record(s) must be established prior to generating Intangible record.	Invalid Entry. The Intangible record cannot be established until the TYPE DSG record exists. Enter the Type Designation record(s) again.

xxxx — STOCK NBR already exists.	Invalid Entry. First Search for the Stock Number, using  to assist with the entry. If it is not found, enter the number again.
253 — MCN SERIAL NBR for ITEM NBR has reached a value of 9999. Establish new ITEM NBR.	Invalid Entry. The ITEM NBR has reached the limit for that series. Enter a new ITEM NBR.
295 — First position must be alpha; positions 2 - 3 must be numeric.	Invalid Entry. The ITEM NBR field is not in the correct format. Enter a total of 3 characters in the correct format, where the **1st character** must be a **letter**, and the **2nd** and **3rd** must be **numbers**.
2215 — An error occurred when adding/editing the stock number. If the problem persists, please contact the ELMS CALL CENTER.	Contact the ELMS Call Center
316 — FSC must be the first 4 positions of the NSN or MCN.	Invalid Entry. The Stock Number must start with the FSC. Re-enter the Stock Number.

Update a Stock Number

Overview

The Stock Number Update process allows editing of a stock number in the catalog.

Attention

FEDLOG generated data is not editable during the Update process.

There are two tabs on the page to update a stock number record. The tabs are:

1. **ELMS**
   — application specific information, which includes:
   - **Catalog Source**
     — where the number assigned comes from within the Federal government
   - **General**
     — additional details regarding the asset
   - **Add / Edit Remarks**
     — text fields for additional information regarding the asset
2. **Property Book**
   — location specific information, which includes:
   - **Property Book**
     — location details for the asset

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Navigation

Catalog > Stock Number > Search > (desired record) > Edit > Modify STOCK NBR page

Page Fields

The following fields display on the **Modify Stock Nbr** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
525	Select "Search" to refresh the Stock Nbr Search Results.
526	Select "Reset" to clear the Stock Nbr Search Criteria.
527	Select "Grid Options" for additional actions to perform on the Stock Nbr data.
528	Select "Add" to create a new Stock Nbr record.
529	Select "Edit" to update the selected Stock Nbr record(s).
530	Select "Delete" to remove the selected Stock Nbr record(s).
531	Select "Attachments" to add or view an attached document to the selected Stock Nbr record(s).
132	To search for CAGE Cd, see https://cage.dla.mil.
161	NCAGE Cd must = 5 pos. When pos 1 = 0-9, pos 5 must = alpha but not I, O, or X. When pos 1 = A, pos 5 must = alpha-

	numeric but not I, L, O, Q, or V thru Z. When POS 1 = alpha, but not alpha O, POS 5 must = 0-9.
162	CAGE CD must = 5 POS, 1st and 5th must = numeric, remaining POS must = alphanumeric except I and O.

Search For a Manufacturer Part Nbr

Overview

The Catalog - Manufacturer Part Nbr Search process provides the ability to add, update, or delete a manufacturer of a Stock Number and initiates the creation of a Stock Number. Information for adding a Stock Number is mandatory before an asset can be added. In the ELMSCatalog, the Manufacturer data provides a central reference to the Commercial and Government Entity (CAGE), Manufacturer Name, Manufacturer Model Number, and Manufacturer Part Number. This information is added to each Stock Number in the ELMSCatalog. For this process, the Stock Number must exist on the local ELMSCatalog.
Adding a Stock Number to the ELMSCatalog must use the Manufacturer Add process to assign manufacturer information to that specific Stock Number. Multiple manufacturers can be assigned to a Stock Number. Doing this allows the use of fewer Stock Numbers and provides the visibility of the Manufacturer, Make and Model of every asset.
For example, an Agency that uses *3/8" drills* would assign multiple manufacturers to the *3/8" drill* Stock Number.

Add a Manufacturer Part Nbr

Overview

The Manufacturer Part Nbr Add process provides the ability to create new manufacturer's information for a Stock Number within the ELMS Catalog. A single Stock Number may have more than one manufacturer's information associated with it. Before adding a manufacturer, it is a good practice to perform a search (see **Manufacturer Part Nbr Record Search**) for the Stock Number to verify manufacturer information has not already been entered.

Navigation

Catalog > Manufacturer Part Nbr > Search Criteria > + Add > Manufacturer Part Nbr Add slide-out window

Page Fields

The following fields display on the **Manufacturer Part Nbr Add** slide-out window. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
562	Select "Cancel" to return to the previous page.
563	Select "Save" button to save the current selection.
132	To search for CAGE Cd, see https://cage.dla.mil.
162	CAGE Cd must = 5 pos, 1st and 5th must = numeric, remaining

	POS must = alphanumeric except I and O.
161	NCAGE CD must = 5 POS. When POS 1 = 0-9, POS 5 must = alpha but not I, O, or X. When POS 1 = A, POS 5 must = alpha-numeric but not I, L, O, Q, or V thru Z. When POS 1 = alpha, but not alpha O, POS 5 must = 0-9.

SKO Catalog Overview

Overview

The Property Accountability module SKO Catalog process provides the ability to create and manage custom Sets, Kits, and Outfits (SKOs) records within an Enterprise Catalog. The SKO record includes the components that make up the kit as well as the stock number that identifies the kit as a whole.
Once the SKO has been established using the SKO Catalog, the SKO Assemble process is used to assemble the kits as they are needed.

Navigation

Catalog > SKO Catalog > SKO Catalog page

Search for a Stock Number/Selected Mass Change — Criteria

Overview

The Property Accountability module Stock Number Selected Mass Change process provides the ability to change the current existing Stock Number to a new Stock Number for all assets within the catalog. This process also updates certain data elements which cannot be changed in Stock Number Update.

Note

One reason to mass update the Stock Number may be to change from using a Management Control Number (MCN) to a National Stock Number (NSN).

Navigation

Catalog > Mass Updates > STOCK NBR > Stock Number/Selected Mass Change Search Criteria page

Page Fields

The following fields display on the **Stock Number/Selected Mass Change Search Criteria** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
118	STOCK NBR From and STOCK NBR To must exist on Catalog table.

119	To change TYPE ASSET CD or ACC only, enter STOCK NBR From.
385	When Catalog LIN/TAMCN and AUTHN LIN/TAMCN are different, a Substitute record will be generated.

Asset Receiving Entry — IAAR — Administrative Adjustment

Overview

The Property Accountability module Asset Management Receiving process provides the ability to receive assets to ELMS.
The assets are either Serially managed (individual asset - one at a time), Component managed (a part of a total asset - one at a time, linked to the Higher Assemblage), or Bulk managed (group of assets - multiple assets at a time).

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Navigation

Asset Management > Receiving > Asset Receiving > Type Action IAAR — Administrative Adjustment > Asset Receiving Tabs page

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
161 — Remarks must be alphanumeric with supported special character(s) $, — , /, #, &, comma, period, and space.	Invalid Characters Entered in the Remarks field. Enter alphanumeric characters, or the following permitted special characters: $, —, /, #, &, comma, period, and space. Special characters like ! or @ are prohibited.
502 — STOCK NBR must be added to the Catalog Table.	Invalid Entry. The Stock Number entered is not in the catalog. Check to make sure the Stock Number is in the catalog, and re-enter the number.
203 — STOCK NBR is bulk managed.	Invalid Entry. The STOCK NBR entered is already Bulk Managed, and cannot be changed to Serially Managed. Check to make sure the STOCK NBR is correct, and re-enter the number.
13 — Mandatory Entry: *Type Action*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry:	

STOCK NBR.	

13 — Mandatory Entry: *ACQ COST*.	
13 — Mandatory Entry: *HA ASSET ID*.	
13 — Mandatory Entry: *ACQ DT*.	
13 — Mandatory Entry: *DOC NBR*.	
13 — Mandatory Entry: *MFR DATA*.	
13 — Mandatory Entry: *MFR YR*.	
13 — Mandatory Entry: *OWNG COST CENTER*.	
13 — Mandatory Entry: *FNDNG COST CENTER*.	
13 — Mandatory Entry: *FUND CD/ASN*.	
13 — Mandatory Entry: *ACTIVATION DT*.	

194 — Entry must be > zero.	Missing Entry. The field must be a positive number. Enter the missing field.
256 — Receipt Dt cannot be > 3 years from System Dt.	Invalid Entry. The Receipt Date and System Date must be within three years of each other. Enter a valid date.
44 — Input date must be <= system date.	Invalid Date Entry. The system date (Today's Date) must be after or the same as the Input date. Re-enter the date.
325 — Doc Nbr and Stock Nbr entered must agree with Doc Nbr and Stock Nbr of due in record.	Invalid Entry. Another due-in record exists with the same Document Number and different Stock Number. Check to make sure the Stock Nbr and Doc Nbr are correct, and re-enter the information.
261 — Job Order Nbr/ Deprn Job Order Nbr must contain a 12 - position Project and a 3 - position Sub - Project.	Missing Entry. The Job Order Nbr/Deprn Job Order Nbr cannot be empty. Enter the information in the correct format.
659 — Fndng Cost Center invalid for LMP - must be alphanumeric and 5 positions.	Invalid Entry. The LMP requires that the Fndng Cost Center be a specific format to comply with regulations. Enter a valid cost center.
663 — Deprn Cost Center invalid for LMP - must be alphanumeric and 5 positions.	Invalid Entry. The LMP requires that the Deprn Cost Center be a specific format to comply with regulations. Enter a valid cost center.

665 — DEPRN TASK CD invalid for LMP - must be 1, 2, or 4.	Invalid Entry. The LMP requires that the DEPRN TASK CD be a specific number (either 1, 2, or 4) to comply with regulations. Enter a valid TASK CD.
310 — DEPRN PRD must be between 24 and the maximum number of months allowed by regulation XXX.	Invalid Entry. The period of depreciation must be a specific number of months, between 24 (2 years) and a specified amount. Enter a valid amount of months.
302 — ACTIVATION DT must be > or = to ACQ DT.	Invalid Entry. The ACQ DT must be the same as or before the ACTIVATION DT. Re-enter the ACTIVATION DT.
283 — The ACQ COST difference from CTLG UNIT PRICE is: $xxxx.xx.	Invalid Entry. The difference between the CTLG UNIT PRICE and the ACQ COST is the specified amount. Double—check the amounts.
284 — The variance is: xx%.	Invalid Entry. The percentage difference between the two amounts is the specified amount. Double—check the entered amounts.
285 — The current Cost Variance Minimum threshold is: xx%.	Invalid Entry. The minimum percentage difference between the two amounts is the specified amount, which is larger than the current variance amount. Double—check the entered amounts.
358 — Embedded Cost Total is > ACQ COST / CMPN ACQ COST.	Invalid Entry. The ACQ COST / CMPN ACQ COST must be less than the Embedded Cost Total. Find a different component / complete equipment combination.

682 — Invalid UII format. Pos 1 — 50 must be alpha-numeric with POS 1 — 6 mandatory.	Invalid Entry. The UII must be at least 6 alpha-numeric characters, and no more than 50 characters. Re-enter the UII.
xxxx — Depreciation tab may only be used on depreciable assets.	Invalid Entry.

Asset Receiving Entry — IDNT — Donated (Receipt)

Overview

The Property Accountability module Asset Management Receiving process provides the ability to receive assets to ELMS.
The assets are either Serially managed (individual asset - one at a time), Component managed (a part of a total asset - one at a time, linked to the Higher Assemblage), or Bulk managed (group of assets - multiple assets at a time).

Navigation

Asset Management > Receiving > Asset Receiving > Type Action IDNT — Donated (Receipt) > Asset Receiving Tabs page

Page Fields

The following fields display on the **Asset Receiving — IDNT** page. For more information on each field, select the appropriate hyperlink.

Instructions

The tables below provides the list of instructions.

Basic Tab

Number	Value
134	Valid special characters for SERIAL NBR are: "/", "-", ":", "$", "#", and space.

Catalog Tab

Number	Value

132	To search for CAGE CD, see https://cage.dla.mil.

Depreciation Tab

Number	Value
168	DEPRN Period may be between 24 months and the maximum number of months allowed by regulation
328	DEPRN UTIL SVC LIFE must be > "0" for Activity Based DEPRN".

Agency Tab

Number	Value
385	When Catalog LIN/TAMCN and AUTHN LIN/TAMCN are different, a Substitute record will be generated.

Asset Entry Tab

Number	Value
24	(*) Asterisk identifies mandatory fields.
134	Valid special characters for SERIAL NBR are: "/", "-", ":", "$", "#", and space.

2	Select "ACTBL UIC" from the ACTBL UIC/UIC dropdown list.
195	Enter mandatory data, then select "Save" to populate grid.
196	To update/correct grid data, select "Edit", then select "Update" to repopulate grid.
197	Rows displayed from Pending TRANS, select "Edit" for each record to enter and/or update data, then select "Update".
198	When complete select "Add" to process single and/or multiple records.

Select Add. *The* ***Asset Receiving Transaction Status*** *page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
161 — Remarks must be alphanumeric with supported special character(s) $, — , /, #, &, comma, period, and space.	Invalid Characters Entered in the Remarks field. Enter alphanumeric characters, or the following permitted special characters: $, —, /, #, &, comma, period, and space. Special characters like ! or @ are prohibited.
502 — STOCK NBR must be added to the Catalog Table.	Invalid Entry. The Stock Number entered is not in the catalog. Check to make sure the Stock Number is in the catalog, and re-enter the number.
203 — STOCK NBR is bulk managed.	Invalid Entry. The STOCK NBR entered is already Bulk Managed, and cannot be changed to Serially Managed. Check to make sure the STOCK NBR is correct, and re-enter the number.
13 — Mandatory Entry: *Type*	Missing Entry. Enter the appropriate information

***Action*.**	in the desired field.

13 — Mandatory Entry: *Stock Nbr*.	
13 — Mandatory Entry: *Acq Cost*.	
13 — Mandatory Entry: *HA Asset Id*.	
13 — Mandatory Entry: *Acq Dt*.	
13 — Mandatory Entry: *Doc Nbr*.	
13 — Mandatory Entry: *Mfr Data*.	
13 — Mandatory Entry: *Mfr Yr*.	
13 — Mandatory Entry: *Owng Cost Center*.	
13 — Mandatory Entry: *Fndng Cost Center*.	
13 — Mandatory Entry: *Fund Cd/ASN*.	

13 — Mandatory Entry: *Activation Dt*.	
194 — Entry must be > zero.	Missing Entry. The field must be a positive number. Enter the missing field.
256 — Receipt Dt cannot be > 3 years from System Dt.	Invalid Entry. The Receipt Date and System Date must be within three years of each other. Enter a valid date.
44 — Input date must be <= system date.	Invalid Date Entry. The system date (Today's Date) must be after or the same as the Input date. Re-enter the date.
325 — Doc Nbr and Stock Nbr entered must agree with Doc Nbr and Stock Nbr of due in record.	Invalid Entry. Another due-in record exists with the same Document Number and different Stock Number. Check to make sure the Stock Nbr and Doc Nbr are correct, and re-enter the information.
261 — Job Order Nbr/ Deprn Job Order Nbr must contain a 12 - position Project and a 3 - position Sub - Project.	Missing Entry. The Job Order Nbr/Deprn Job Order Nbr cannot be empty. Enter the information in the correct format.
659 — Fndng Cost Center invalid for LMP - must be alphanumeric and 5 positions.	Invalid Entry. The LMP requires that the Fndng Cost Center be a specific format to comply with regulations. Enter a valid cost center.
663 — Deprn Cost Center	Invalid Entry. The LMP requires that the Deprn

invalid for LMP - must be alphanumeric and 5 positions.	COST CENTER be a specific format to comply with regulations. Enter a valid cost center.
665 — DEPRN TASK CD invalid for LMP - must be 1, 2, or 4.	Invalid Entry. The LMP requires that the DEPRN TASK CD be a specific number (either 1, 2, or 4) to comply with regulations. Enter a valid TASK CD.
310 — DEPRN PRD must be between 24 and the maximum number of months allowed by regulation XXX.	Invalid Entry. The period of depreciation must be a specific number of months, between 24 (2 years) and a specified amount. Enter a valid amount of months.
302 — ACTIVATION DT must be > or = to ACQ DT.	Invalid Entry. The ACQ DT must be the same as or before the ACTIVATION DT. Re-enter the ACTIVATION DT.
283 — The ACQ COST difference from CTLG UNIT PRICE is: $xxxx.xx.	Invalid Entry. The difference between the CTLG UNIT PRICE and the ACQ COST is the specified amount. Double—check the amounts.
284 — The variance is: xx%.	Invalid Entry. The percentage difference between the two amounts is the specified amount. Double—check the entered amounts.
285 — The current Cost Variance Minimum threshold is: xx%.	Invalid Entry. The minimum percentage difference between the two amounts is the specified amount, which is larger than the current variance amount. Double—check the entered amounts.
358 — Embedded Cost Total	Invalid Entry. The ACQ COST / CMPN ACQ COST

is >Acq Cost/Cmpn Acq Cost.	must be less than the Embedded Cost Total. Find a different component / complete equipment combination.
682 — Invalid UII format. Pos 1 — 50 must be alphanumeric with pos 1 — 6 mandatory.	Invalid Entry. The UII must be at least 6 alphanumeric characters, and no more than 50 characters. Re-enter the UII.

Asset Receiving Entry — IFOI — Found On Installation

Overview

The Property Accountability module Asset Management Receiving process provides the ability to receive assets to ELMS.
The assets are either Serially managed (individual asset - one at a time), Component managed (a part of a total asset - one at a time, linked to the Higher Assemblage), or Bulk managed (group of assets - multiple assets at a time).

Navigation

Asset Management > Receiving > Asset Receiving > Type Action IFOI — Found On Installation > Asset Receiving Tabs page

Page Fields

The following fields display on the **Asset Receiving — IFOI** page. For more information on each field, select the appropriate hyperlink.

Instructions

The tables below provides the list of instructions.

Basic Tab

Number	Value
134	Valid special characters for SERIAL NBR are: "/", "-", ":", "$", "#", and space.

Catalog Tab

Number	Value

132	To search for CAGE CD, see https://cage.dla.mil.

Asset Entry Tab

Number	Value
24	(*) Asterisk identifies mandatory fields.
134	Valid special characters for SERIAL NBR are: "/", "-", ":", "$", "#", and space.
195	Enter mandatory data, then select "Save" to populate grid.
196	To update/correct grid data, select "Edit", then select "Update" to repopulate grid.
197	Rows displayed from Pending TRANS, select "Edit" for each record to enter and/or update data, then select "Update".
198	When complete select "Add" to process single and/or multiple records.

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
161 — Remarks must be alphanumeric with supported special character(s) $, — , /, #, &, comma, period, and space.	Invalid Characters Entered in the Remarks field. Enter alphanumeric characters, or the following permitted special characters: $, —, /, #, &, comma, period, and space. Special characters like ! or @ are prohibited.
502 — STOCK NBR must be added to the Catalog Table.	Invalid Entry. The Stock Number entered is not in the catalog. Check to make sure the Stock Number is in the catalog, and re-enter the number.
203 — STOCK NBR is bulk managed.	Invalid Entry. The STOCK NBR entered is already Bulk Managed, and cannot be changed to Serially Managed. Check to make sure the STOCK NBR is correct, and re-enter the number.
13 — Mandatory Entry: *Type Action*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry:	

STOCK NBR.	

13 — Mandatory Entry: *Acq Cost*.	
13 — Mandatory Entry: *HA Asset Id*.	
13 — Mandatory Entry: *Acq Dt*.	
13 — Mandatory Entry: *Doc Nbr*.	
13 — Mandatory Entry: *Mfr Data*.	
13 — Mandatory Entry: *Mfr Yr*.	
13 — Mandatory Entry: *Owng Cost Center*.	
13 — Mandatory Entry: *Fndng Cost Center*.	
13 — Mandatory Entry: *Fund Cd/ASN*.	
13 — Mandatory Entry: *Activation Dt*.	

194 — Entry must be > zero.	Missing Entry. The field must be a positive number. Enter the missing field.
256 — Receipt Dt cannot be > 3 years from System Dt.	Invalid Entry. The Receipt Date and System Date must be within three years of each other. Enter a valid date.
44 — Input date must be <= system date.	Invalid Date Entry. The system date (Today's Date) must be after or the same as the Input date. Re-enter the date.
325 — Doc Nbr and Stock Nbr entered must agree with Doc Nbr and Stock Nbr of due in record.	Invalid Entry. Another due-in record exists with the same Document Number and different Stock Number. Check to make sure the Stock Nbr and Doc Nbr are correct, and re-enter the information.
261 — Job Order Nbr/ Deprn Job Order Nbr must contain a 12 - position Project and a 3 - position Sub - Project.	Missing Entry. The Job Order Nbr/Deprn Job Order Nbr cannot be empty. Enter the information in the correct format.
659 — Fndng Cost Center invalid for LMP - must be alphanumeric and 5 positions.	Invalid Entry. The LMP requires that the Fndng Cost Center be a specific format to comply with regulations. Enter a valid cost center.
663 — Deprn Cost Center invalid for LMP - must be alphanumeric and 5 positions.	Invalid Entry. The LMP requires that the Deprn Cost Center be a specific format to comply with regulations. Enter a valid cost center.

665 — DEPRN TASK CD invalid for LMP - must be 1, 2, or 4.	Invalid Entry. The LMP requires that the DEPRN TASK CD be a specific number (either 1, 2, or 4) to comply with regulations. Enter a valid TASK CD.
310 — DEPRN PRD must be between 24 and the maximum number of months allowed by regulation XXX.	Invalid Entry. The period of depreciation must be a specific number of months, between 24 (2 years) and a specified amount. Enter a valid amount of months.
302 — ACTIVATION DT must be > or = to ACQ DT.	Invalid Entry. The ACQ DT must be the same as or before the ACTIVATION DT. Re-enter the ACTIVATION DT.
283 — The ACQ COST difference from CTLG UNIT PRICE is: $xxxx.xx.	Invalid Entry. The difference between the CTLG UNIT PRICE and the ACQ COST is the specified amount. Double—check the amounts.
284 — The variance is: xx%.	Invalid Entry. The percentage difference between the two amounts is the specified amount. Double—check the entered amounts.
285 — The current Cost Variance Minimum threshold is: xx%.	Invalid Entry. The minimum percentage difference between the two amounts is the specified amount, which is larger than the current variance amount. Double—check the entered amounts.
358 — Embedded Cost Total is >ACQ COST/CMPN ACQ COST.	Invalid Entry. The ACQ COST / CMPN ACQ COST must be less than the Embedded Cost Total. Find a different component / complete equipment combination.

682 — Invalid UII format. Pos 1 — 50 must be alpha-numeric with POS 1 — 6 mandatory.	Invalid Entry. The UII must be at least 6 alpha-numeric characters, and no more than 50 characters. Re-enter the UII.

Asset Receiving Entry — ILDI — Create Local Due In

Overview

The Property Accountability module Asset Management Receiving process provides the ability to receive assets to ELMS.
A Local due-in is used to document purchase requests. Once the item is received, it can be posted directly to the property book. If the purchase request is canceled, the request can be rejected.
The assets are either Serially managed (individual asset - one at a time), Component managed (a part of a total asset - one at a time, linked to the Higher Assemblage), or Bulk managed (group of assets - multiple assets at a time).

Navigation

Asset Management > Receiving > Asset Receiving > Type Action drop-down field > Type Action ILDI — Create Local Due In > Asset Receiving Tabs page

Page Fields

The following fields display on the **Asset Receiving — ILDI** page. For more information on each field, select the appropriate hyperlink.

Instructions

The tables below provides the list of instructions.

Basic Tab

Number	Value
134	Valid special characters for SERIAL NBR are: "/", "-", ":", "$", "#", and space.

Catalog Tab

Number	Value
132	To search for CAGE CD, see https://cage.dla.mil.

Asset Entry Tab

Number	Value
24	(*) Asterisk identifies mandatory fields.
134	Valid special characters for SERIAL NBR are: "/", "-", ":", "$", "#", and space.
195	Enter mandatory data, then select "Save" to populate grid.
196	To update/correct grid data, select "Edit", then select "Update" to repopulate grid.
197	Rows displayed from Pending TRANS, select "Edit" for each record to enter and/or update data, then select "Update".
198	When complete select "Add" to process single and/or multiple records.

Select the Edit hyperlink. *The **Asset Receiving Record Update** page appears.*

Remove the Asset from the Receiving Record

Select the Remove hyperlink. *The record is removed form the Save list panel.*

Add the Asset

Select Add. *The **Asset Receiving Transaction Status** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
161 — Remarks must be alphanumeric with supported special character(s) $, — , /, #, &, comma, period, and space.	Invalid Characters Entered in the Remarks field. Enter alphanumeric characters, or the following permitted special characters: $, —, /, #, &, comma, period, and space. Special characters like ! or @ are prohibited.
502 — STOCK NBR must be added to the Catalog Table.	Invalid Entry. The Stock Number entered is not in the catalog. Check to make sure the Stock Number is in the catalog, and re-enter the number.
203 — STOCK NBR is bulk managed.	Invalid Entry. The STOCK NBR entered is already Bulk Managed, and cannot be changed to Serially Managed. Check to make sure the STOCK NBR is correct, and re-enter the number.
13 — Mandatory Entry: *Type Action*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry:	

STOCK NBR.	

13 — Mandatory Entry: *ACQ COST*.	
13 — Mandatory Entry: *HA ASSET ID*.	
13 — Mandatory Entry: *ACQ DT*.	
13 — Mandatory Entry: *DOC NBR*.	
13 — Mandatory Entry: *MFR DATA*.	
13 — Mandatory Entry: *MFR YR*.	
13 — Mandatory Entry: *OWNG COST CENTER*.	
13 — Mandatory Entry: *FNDNG COST CENTER*.	
13 — Mandatory Entry: *FUND CD/ASN*.	
13 — Mandatory Entry: *ACTIVATION DT*.	

194 — Entry must be > zero.	Missing Entry. The field must be a positive number. Enter the missing field.
256 — Receipt Dt cannot be > 3 years from System Dt.	Invalid Entry. The Receipt Date and System Date must be within three years of each other. Enter a valid date.
44 — Input date must be <= system date.	Invalid Date Entry. The system date (Today's Date) must be after or the same as the Input date. Re-enter the date.
325 — Doc Nbr and Stock Nbr entered must agree with Doc Nbr and Stock Nbr of due in record.	Invalid Entry. Another due-in record exists with the same Document Number and different Stock Number. Check to make sure the Stock Nbr and Doc Nbr are correct, and re-enter the information.
261 — Job Order Nbr/ Deprn Job Order Nbr must contain a 12 - position Project and a 3 - position Sub - Project.	Missing Entry. The Job Order Nbr/Deprn Job Order Nbr cannot be empty. Enter the information in the correct format.
659 — Fndng Cost Center invalid for LMP - must be alphanumeric and 5 positions.	Invalid Entry. The LMP requires that the Fndng Cost Center be a specific format to comply with regulations. Enter a valid cost center.
663 — Deprn Cost Center invalid for LMP - must be alphanumeric and 5 positions.	Invalid Entry. The LMP requires that the Deprn Cost Center be a specific format to comply with regulations. Enter a valid cost center.

665 — DEPRN TASK CD invalid for LMP - must be 1, 2, or 4.	Invalid Entry. The LMP requires that the DEPRN TASK CD be a specific number (either 1, 2, or 4) to comply with regulations. Enter a valid TASK CD.
310 — DEPRN PRD must be between 24 and the maximum number of months allowed by regulation XXX.	Invalid Entry. The period of depreciation must be a specific number of months, between 24 (2 years) and a specified amount. Enter a valid amount of months.
302 — ACTIVATION DT must be > or = to ACQ DT.	Invalid Entry. The ACQ DT must be the same as or before the ACTIVATION DT. Re-enter the ACTIVATION DT.
283 — The ACQ COST difference from CTLG UNIT PRICE is: $xxxx.xx.	Invalid Entry. The difference between the CTLG UNIT PRICE and the ACQ COST is the specified amount. Double—check the amounts.
284 — The variance is: xx%.	Invalid Entry. The percentage difference between the two amounts is the specified amount. Double—check the entered amounts.
285 — The current Cost Variance Minimum threshold is: xx%.	Invalid Entry. The minimum percentage difference between the two amounts is the specified amount, which is larger than the current variance amount. Double—check the entered amounts.
358 — Embedded Cost Total is >ACQ COST/CMPN ACQ COST.	Invalid Entry. The ACQ COST / CMPN ACQ COST must be less than the Embedded Cost Total. Find a different component / complete equipment combination.

682 — Invalid UII format. Pos 1 — 50 must be alpha-numeric with POS 1 — 6 mandatory.	Invalid Entry. The UII must be at least 6 alpha-numeric characters, and no more than 50 characters. Re-enter the UII.

Asset Receiving Entry — ILOO — In On Loan — Outside ELMS

Overview

The Property Accountability module Asset Management Receiving process provides the ability to receive assets to ELMS.
The assets are either Serially managed (individual asset - one at a time), Component managed (a part of a total asset - one at a time, linked to the Higher Assemblage), or Bulk managed (group of assets - multiple assets at a time).

Navigation

Asset Management > Receiving > Asset Receiving > Type Action ILOO — In On Loan — Outside ELMS > Asset Receiving Tabs page

Page Fields

The following fields display on the **Asset Receiving — ILOO** page. For more information on each field, select the appropriate hyperlink.

Instructions

The tables below provides the list of instructions.

Basic Tab

Number	Value
134	Valid special characters for SERIAL NBR are: "/", "-", ":", "$", "#", and space.

Catalog Tab

Number	Value

132	To search for CAGE CD, see https://cage.dla.mil.

Asset Entry Tab

Number	Value
24	(*) Asterisk identifies mandatory fields.
134	Valid special characters for SERIAL NBR are: "/", "-", ":", "$", "#", and space.
195	Enter mandatory data, then select "Save" to populate grid.
196	To update/correct grid data, select "Edit", then select "Update" to repopulate grid.
197	Rows displayed from Pending TRANS, select "Edit" for each record to enter and/or update data, then select "Update".
198	When complete select "Add" to process single and/or multiple records.

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
161 — Remarks must be alphanumeric with supported special character(s) $, — , /, #, &, comma, period, and space.	Invalid Characters Entered in the Remarks field. Enter alphanumeric characters, or the following permitted special characters: $, —, /, #, &, comma, period, and space. Special characters like ! or @ are prohibited.
502 — STOCK NBR must be added to the Catalog Table.	Invalid Entry. The Stock Number entered is not in the catalog. Check to make sure the Stock Number is in the catalog, and re-enter the number.
203 — STOCK NBR is bulk managed.	Invalid Entry. The STOCK NBR entered is already Bulk Managed, and cannot be changed to Serially Managed. Check to make sure the STOCK NBR is correct, and re-enter the number.
13 — Mandatory Entry: *Type*	Missing Entry. Enter the appropriate information

***Action*.**	in the desired field.

13 — Mandatory Entry: *Stock Nbr*.	
13 — Mandatory Entry: *Acq Cost*.	
13 — Mandatory Entry: *HA Asset Id*.	
13 — Mandatory Entry: *Acq Dt*.	
13 — Mandatory Entry: *Doc Nbr*.	
13 — Mandatory Entry: *Mfr Data*.	
13 — Mandatory Entry: *Mfr Yr*.	
13 — Mandatory Entry: *Owng Cost Center*.	
13 — Mandatory Entry: *Fndng Cost Center*.	
13 — Mandatory Entry: *Fund Cd/ASN*.	

13 — Mandatory Entry: *Activation Dt*.	
194 — Entry must be > zero.	Missing Entry. The field must be a positive number. Enter the missing field.
256 — Receipt Dt cannot be > 3 years from System Dt.	Invalid Entry. The Receipt Date and System Date must be within three years of each other. Enter a valid date.
44 — Input date must be <= system date.	Invalid Date Entry. The system date (Today's Date) must be after or the same as the Input date. Re-enter the date.
325 — Doc Nbr and Stock Nbr entered must agree with Doc Nbr and Stock Nbr of due in record.	Invalid Entry. Another due-in record exists with the same Document Number and different Stock Number. Check to make sure the Stock Nbr and Doc Nbr are correct, and re-enter the information.
261 — Job Order Nbr/ Deprn Job Order Nbr must contain a 12 - position Project and a 3 - position Sub - Project.	Missing Entry. The Job Order Nbr/Deprn Job Order Nbr cannot be empty. Enter the information in the correct format.
659 — Fndng Cost Center invalid for LMP - must be alphanumeric and 5 positions.	Invalid Entry. The LMP requires that the Fndng Cost Center be a specific format to comply with regulations. Enter a valid cost center.
663 — Deprn Cost Center	Invalid Entry. The LMP requires that the Deprn

invalid for LMP - must be alphanumeric and 5 positions.	COST CENTER be a specific format to comply with regulations. Enter a valid cost center.
665 — DEPRN TASK CD invalid for LMP - must be 1, 2, or 4.	Invalid Entry. The LMP requires that the DEPRN TASK CD be a specific number (either 1, 2, or 4) to comply with regulations. Enter a valid TASK CD.
310 — DEPRN PRD must be between 24 and the maximum number of months allowed by regulation XXX.	Invalid Entry. The period of depreciation must be a specific number of months, between 24 (2 years) and a specified amount. Enter a valid amount of months.
302 — ACTIVATION DT must be > or = to ACQ DT.	Invalid Entry. The ACQ DT must be the same as or before the ACTIVATION DT. Re-enter the ACTIVATION DT.
283 — The ACQ COST difference from CTLG UNIT PRICE is: $xxxx.xx.	Invalid Entry. The difference between the CTLG UNIT PRICE and the ACQ COST is the specified amount. Double—check the amounts.
284 — The variance is: xx%.	Invalid Entry. The percentage difference between the two amounts is the specified amount. Double—check the entered amounts.
285 — The current Cost Variance Minimum threshold is: xx%.	Invalid Entry. The minimum percentage difference between the two amounts is the specified amount, which is larger than the current variance amount. Double—check the entered amounts.
358 — Embedded Cost Total	Invalid Entry. The ACQ COST / CMPN ACQ COST

is >Acq Cost/Cmpn Acq Cost.	must be less than the Embedded Cost Total. Find a different component / complete equipment combination.
682 — Invalid UII format. Pos 1 — 50 must be alphanumeric with pos 1 — 6 mandatory.	Invalid Entry. The UII must be at least 6 alphanumeric characters, and no more than 50 characters. Re-enter the UII.

Asset Receiving Entry — ITRO — Transfer In — Outside ELMS

Overview

The Property Accountability module Asset Management Receiving process provides the ability to receive assets to ELMS.
The assets are either Serially managed (individual asset - one at a time), Component managed (a part of a total asset - one at a time, linked to the Higher Assemblage), or Bulk managed (group of assets - multiple assets at a time).

Navigation

Asset Management > Receiving > Asset Receiving > Type Action drop-down field > ITRO — Transfer In — Outside ELMS > Asset Receiving Tabs page

Page Fields

The following fields display on the **Asset Receiving — ITRO** page. For more information on each field, select the appropriate hyperlink.

Instructions

The tables below provides the list of instructions.

Basic Tab

Number	Value
134	Valid special characters for SERIAL NBR are: "/", "-", ":", "$", "#", and space.

Catalog Tab

Number	Value

132	To search for CAGE CD, see https://cage.dla.mil.

Asset Entry Tab

Number	Value
24	(*) Asterisk identifies mandatory fields.
134	Valid special characters for SERIAL NBR are: "/", "-", ":", "$", "#", and space.
195	Enter mandatory data, then select "Save" to populate grid.
196	To update/correct grid data, select "Edit", then select "Update" to repopulate grid.
197	Rows displayed from Pending TRANS, select "Edit" for each record to enter and/or update data, then select "Update".
198	When complete select "Add" to process single and/or multiple records.

Edit the Asset

Select the Edit hyperlink. *The **Asset Receiving Update** page appears.*

Remove the Asset from the Receiving Record

Select the Remove hyperlink. *The record is removed from the Save list panel.*

Add the Asset

Select Add. *The **Asset Receiving Transaction Status** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
161 — Remarks must be alphanumeric with supported special character(s) $, — , /, #, &, comma, period, and space.	Invalid Characters Entered in the Remarks field. Enter alphanumeric characters, or the following permitted special characters: $, —, /, #, &, comma, period, and space. Special characters like ! or @ are prohibited.
502 — STOCK NBR must be added to the Catalog Table.	Invalid Entry. The Stock Number entered is not in the catalog. Check to make sure the Stock Number is in the catalog, and re-enter the number.
203 — STOCK NBR is bulk managed.	Invalid Entry. The STOCK NBR entered is already Bulk Managed, and cannot be changed to Serially Managed. Check to make sure the STOCK NBR is correct, and re-enter the number.
13 — Mandatory Entry: *Type Action*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry:	

STOCK NBR.	

13 — Mandatory Entry: *Acq Cost*.	
13 — Mandatory Entry: *HA Asset Id*.	
13 — Mandatory Entry: *Acq Dt*.	
13 — Mandatory Entry: *Doc Nbr*.	
13 — Mandatory Entry: *Mfr Data*.	
13 — Mandatory Entry: *Mfr Yr*.	
13 — Mandatory Entry: *Owng Cost Center*.	
13 — Mandatory Entry: *Fndng Cost Center*.	
13 — Mandatory Entry: *Fund Cd/ASN*.	
13 — Mandatory Entry: *Activation Dt*.	

194 — Entry must be > zero.	Missing Entry. The field must be a positive number. Enter the missing field.
256 — Receipt Dt cannot be > 3 years from System Dt.	Invalid Entry. The Receipt Date and System Date must be within three years of each other. Enter a valid date.
44 — Input date must be <= system date.	Invalid Date Entry. The system date (Today's Date) must be after or the same as the Input date. Re-enter the date.
325 — Doc Nbr and Stock Nbr entered must agree with Doc Nbr and Stock Nbr of due in record.	Invalid Entry. Another due-in record exists with the same Document Number and different Stock Number. Check to make sure the Stock Nbr and Doc Nbr are correct, and re-enter the information.
261 — Job Order Nbr/ Deprn Job Order Nbr must contain a 12 - position Project and a 3 - position Sub - Project.	Missing Entry. The Job Order Nbr/Deprn Job Order Nbr cannot be empty. Enter the information in the correct format.
659 — Fndng Cost Center invalid for LMP - must be alphanumeric and 5 positions.	Invalid Entry. The LMP requires that the Fndng Cost Center be a specific format to comply with regulations. Enter a valid cost center.
663 — Deprn Cost Center invalid for LMP - must be alphanumeric and 5 positions.	Invalid Entry. The LMP requires that the Deprn Cost Center be a specific format to comply with regulations. Enter a valid cost center.

665 — DEPRN TASK CD invalid for LMP - must be 1, 2, or 4.	Invalid Entry. The LMP requires that the DEPRN TASK CD be a specific number (either 1, 2, or 4) to comply with regulations. Enter a valid TASK CD.
310 — DEPRN PRD must be between 24 and the maximum number of months allowed by regulation XXX.	Invalid Entry. The period of depreciation must be a specific number of months, between 24 (2 years) and a specified amount. Enter a valid amount of months.
302 — ACTIVATION DT must be > or = to ACQ DT.	Invalid Entry. The ACQ DT must be the same as or before the ACTIVATION DT. Re-enter the ACTIVATION DT.
283 — The ACQ COST difference from CTLG UNIT PRICE is: $xxxx.xx.	Invalid Entry. The difference between the CTLG UNIT PRICE and the ACQ COST is the specified amount. Double—check the amounts.
284 — The variance is: xx%.	Invalid Entry. The percentage difference between the two amounts is the specified amount. Double—check the entered amounts.
285 — The current Cost Variance Minimum threshold is: xx%.	Invalid Entry. The minimum percentage difference between the two amounts is the specified amount, which is larger than the current variance amount. Double—check the entered amounts.
358 — Embedded Cost Total is >ACQ COST/CMPN ACQ COST.	Invalid Entry. The ACQ COST / CMPN ACQ COST must be less than the Embedded Cost Total. Find a different component / complete equipment combination.

682 — Invalid UII format. Pos 1 — 50 must be alpha-numeric with POS 1 — 6 mandatory.	Invalid Entry. The UII must be at least 6 alpha-numeric characters, and no more than 50 characters. Re-enter the UII.

Asset Receiving Entry — Mass Upload

Overview

The Property Accountability module Asset Receiving process provides the ability to receive assets to ELMS.
The assets are either Serially managed (individual asset - one at a time), Component managed (a part of a total asset - one at a time, linked to the Higher Assemblage), or Bulk managed (group of assets - a bunch at a time).

Update an Asset Receiving Record

Overview

The Asset Management Receiving Update process provides the ability to edit the record before receiving the assets to ELMS.

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Navigation

Asset Management > Receiving > Asset Receiving > *Various Procedural Steps* > Asset Entry tab > Save > Edit hyperlink

Page Fields

The following fields display on the **Asset Receiving** pages. For more information on each field, select the appropriate hyperlink.

Instructions

The tables below provides the list of instructions.

Basic Tab

Number	Value
134	Valid special characters for Serial Nbr are: "/", "-", ":", "$", "#", and space.

Catalog Tab

Number	Value

Search for an Asset Disposition — Criteria

Overview

The Property Accountability module Asset Disposition process provides the ability to get rid of assets which are no longer needed. This process disposes of both serial and bulk managed assets, as well as assets with components or improvements.

Note

The Asset Disposition process is not used to dispose of any Real Property assets; there is a separate process for Real Property within ELMS.

When the **Designate** check-box *is* selected, the following are the only valid Type Action codes:

- **DTNI — Turn-In**
  Return an asset to an intermediate activity and they decide how the asset will be disposed.
- **DTRO — Transfer Out - outside ELMS**
  Send an asset to an agency that does not use ELMS.
- **DSPL — Disposal**
  Return an asset directly to the DRMO without using an automated interface, or dispose of it locally.
- **DLNR — Loan Return**
  The asset was loaned to a UIC. This action type records the return of the property, the contact information and the condition of the asset.

When the **Designate** check-box *is not* selected, the following Type Action codes also display:

- **DLDD — Report of Survey / Lost, Damaged, Destroyed**
  The asset is no longer physically available because it was stolen, lost, or it was damaged or destroyed.
- **DSAL — Sales**
  The asset is sold. The action also records the condition of the asset, accounting and financial information and the contact information of the buyer.
- **DDNT — Donated**
  The contact information of the enterprise receiving the property, the condition of the property and the financial impact for the donating activity is recorded.
- **DAAR — AAR**
  The action records administrative disposal of property.
- **DIAJ — Inventory Adjustment**

The asset was recorded as missing during an inventory, removed from the system and documented by this action.

When an asset is disposed, all components, improvements and ancillary costs are disposed of at the same time.

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Selected Rows for Asset Disposition

Overview

The Asset Disposition Selected Rows process displays records selected for disposition actions.

Note

For bulk records, the quantity must be entered for the record(s) for which the update applies. If no DISP QTY is entered, all records are updated.

Navigation

Asset Management > Disposition > Search Criteria > Search > Search Results > ☐ (desired record) > Continue > Asset Disposition Selected Rows page

Page Fields

The following fields display on the **Asset Disposition Selected Rows** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
76	For bulk records, enter CHG QTY for the record(s) which the update applies. If no QTY is entered, all records will be updated.
14	Select "Cancel" button to return to previous page.

Search for an Asset Transfer — Criteria

Overview

The Property Accountability module Asset Transfer process provides the ability to transfer an end item or component record (Serial or Bulk) to another Property Custodian within the same UIC, UIC-to-UIC, or SITE ID-to-SITE ID.
If a serial record has components, the Transfer process looks for the Stock Number on the gaining Catalog. If one does not exist, the Transfer process inserts the Stock Number of the component on the losing Catalog. If the manufacturer information does not exist on the gaining Catalog, the Transfer process inserts the manufacturer information of the component from the losing Catalog.
During the Transfer process, users have the capability to designate assets for a Pending Transfer. If the user does not have Security access to the gaining portion of the transaction, the assets are automatically designated as Pending.

Attention

Use the Both (Non-Capital and Capital) radio button only if all assets being transferred. Do not use the **Defense Agencies Initiative (DAI)** Accounting System Interface. For DAI, Non-Capital and Capital assets should be transferred in separate transactions.

Navigation

Asset Management > Transfer > Asset Transfer Search Criteria page

Search for an Asset(s) to Transfer

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, narrow the results by entering one of the following optional fields:.

A. Select ◉ Non-Capital if the search is for a personal property asset.

OR

Select ◉ Capital if the search is for a real property asset.

OR

Select ○ Both. *This chooses Non-Capital and Capital.*

B. Select ◉ Accountable if the search is for the user who is obligated to keep accurate records.

OR

Select ◉ Non-Accountable if the search is for the user who is not obligated to keep accurate records.

OR

Select ○ Both. *This chooses Accountable and Non-Accountable.*

C. Select ◉ End Item if the search is for a combination of independently functioning end products, components parts, and/or Materiels.

OR

Select ◉ Component if the search is for an assembly or combination of parts, subassemblies and assemblies mounted together in manufacture, assembly, maintenance or rebuild.

D. Enter the ASSET ID. *This is a 12 alphanumeric character field.*

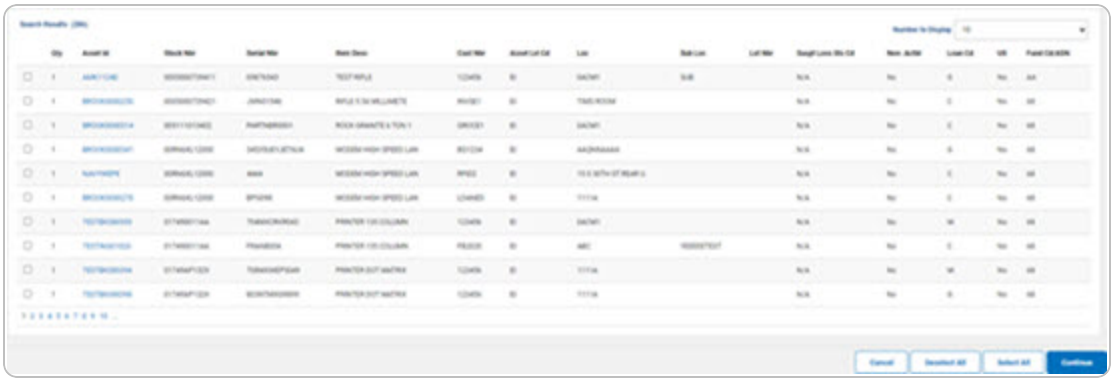
E. Enter the STOCK NBR, or use 🔍 to browse for the entry. *This is a 15 alphanumeric character field.*

Stock Number Browse help

F. Enter the SERIAL NBR. *This is a 30 alphanumeric character field.*

G. Enter the CUSTODIAN NBR, using  or  to browse for the entry. *This is a 12 alpha-numeric character field.*

Custodian Browse help



H. Enter the LOC, or use  to browse for the entry. *This is a 20 alphanumeric character field.*

Search for an Asset Transfer — Results

Overview

The Asset Transfer Search Results process provides the ability to display all assets available for transfer.

Helpful Tip

There may be several pages returned from the Search Criteria. To page through the results, select the page number at the bottom of the page. The information is sorted in ascending order.

From the displayed assets on the Asset Transfer Search Results page, some will error at the end of the Transfer process. Assets cannot transfer if they:

- Are Marked as Excess
- Are Out on Loan
- Are in a Suspected Loss state
- Are in a Pending status
- Have associated components
- Have improvements

Update the Asset Transfer Destination

Overview

The Asset Transfer Destination Update process allows editing of the destination and individual for the transfer of assets. Ability to complete the Asset Transfer is dependent upon role and security level.

Helpful Tip

- If the asset has components, all components will transfer with the higher assemblage asset.
- A component cannot be on a different Custodian Nbr than the End Item.
- A Document Number is required for generation of DD Form 1150 or DD Form 1149.

When performing an Asset Transfer, keep the following in mind:

- Determine the type of transfer (UIC)
- Is a Document Number required?
- The Gaining side information MUST be entered before the Document Number is selected; otherwise, the wrong **Doc Nbr Type** (which describes the type of Document Number) may be created when
  generating a new Document Number
- Are the designating assets for a pending or approval process?

Navigation

Asset Management > Transfer > Search Criteria > Search > Search Results > Continue > Selected Rows > Continue > Asset Transfer Destination page

Page Fields

The following fields display on the **Asset Transfer Destination** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

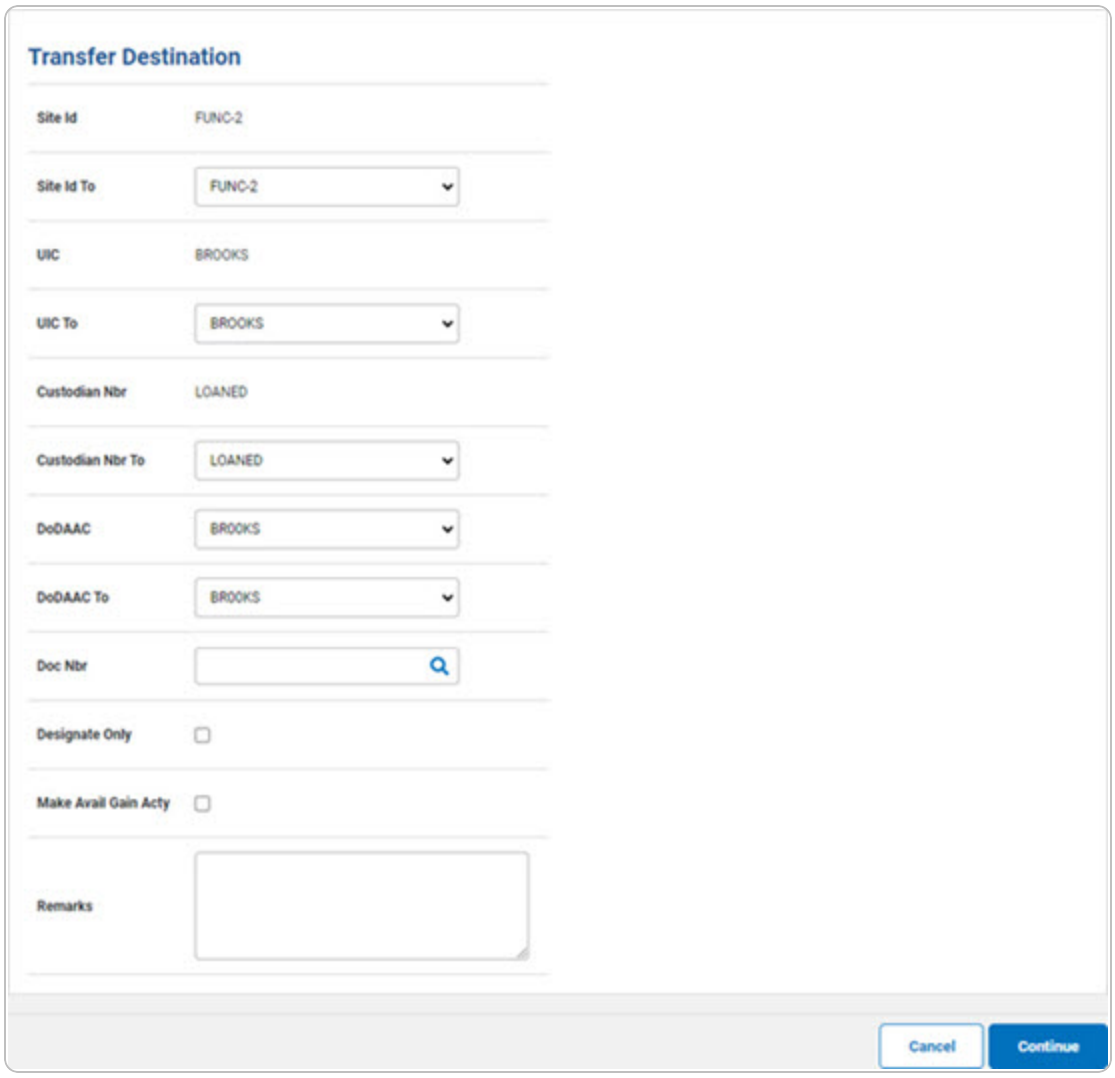
Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
***Bold** numbered steps are required.*

Helpful Tip

When an asset is transferred between UICs, it goes from one custodian to another custodian in a different UIC. The originator of the transfer is referred to as the Losing side and the receiving Site, UIC or Custodian is referred to as the Gaining side.

For example, if an asset is transferred from UIC HQ0001 to UIC HQ0002, then UIC HQ0001 is the Losing side and UIC HQ0002 is the Gaining side.



Attention

It is recommended to not select the **Custodian Nbr To**. If the **Custodian Nbr To** is selected, the gaining side will not be able to change it when they complete the Transfer. Transfer action is not authorized for asset(s) other than LOAN CD "G".

Update the Asset Transfer Destination

1. Update the Transfer Destination Tab.

A. *Verify the SITE ID.*

B. Update the Site Id To, using ⌄ to select the desired code.

C. *Verify the UIC.*

D. Update the UIC To, using ⌄ to select the desired code.

E. *Verify the CUSTODIAN NBR.*

F. Update the Custodian Nbr To, using to select the desired code.

G. Update the DoDAAC, using to select the desired code.

H. Update the DoDAAC To, using to select the desired code.

I. Update the DOC NBR, using to browse for the number. *This is a 15 alphanumeric character field.*

Document Number Browse help

J. Verify the Designate Only contains the appropriate or . *Select if asset transfer needs higher authority for approval.*

K. Verify the Make Avail Gain ACTY contains the appropriate or . *Select if asset is to be immediately available to the gaining activity.*

L. Update the Remarks, entering the revised remarks in the field provided. *This is a 256 alphanumeric character field.*

M. Select Continue. *The **Asset Transfer Transaction Status** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
13 — Mandatory Entry: *LIN/TAMCN AUTH TO*.	Missing Entry. Enter the appropriate information in the desired field.
113 — UIC is mandatory.	Invalid Entry. The UIC must be included. Re-

	enter the UIC.
132—CUSTODIAN NBR is mandatory.	Invalid Entry. The CUSTODIAN NBR is mandatory if the SITE ID TO and UIC TO are blank. Enter the CUSTODIAN NBR.
133 — Not authorized to transfer to gaining entity; the Designate Only check box is mandatory.	Invalid Entry. The user does not have the necessary Security access. Select the "Designate Only" check box.
134 — Custodians must request approval for transfer of Capital Assets. Select Designate Only to process.	Invalid Entry. The user does not have the necessary Security access. Select the "Designate Only" check box.
4 — Proposed update matches the current record.	Invalid Entry. There were no changes made to the record. Enter actual changes, and try again.
xxxx —A component cannot be on a different CUSTODIAN NBR than the End Item.	Invalid Entry. A component cannot be assigned to a different Custodian Number than the End Item. Re-enter the entry.
XXXX—DOC NBR required for generation of DD Form 1150.	Invalid Entry. The DOC NBR is required. Enter a valid Document Number in the DOC NBR field.
431 — UIC assigned to a Contractor. Use Asset Update to loan to Contractor or Asset Disposition to return from Contractor.	Invalid Entry. The current UIC has a CAGE CD assigned. This makes the UIC a Contractor's UIC and must follow Contractor rules for loans and returns. Re-enter the UIC.

895 — Date entered must be > = System Date.	Invalid Date Entry. The date must be either the system date or later. Re—enter the date.
426 — Transfer action not authorized for asset(s)other than LOAN CD "G".	Invalid Entry. The transfer action can only be used for LOAN CD "G". Enter a valid transfer action.

Search for an Asset Update — Criteria

Overview

The Property Accountability module Asset Update process provides the ability to modify data fields related to assets currently on the property book. This process updates:

- End Item / Component / Bulk Asset Updates

> **Note**
> If End Item Serial, Component and/or Bulk assets are being mass updated, this process must be repeated for each type.

- Location / Sub Location
- Manufacturer Information
- Price Update
- Loan

> **Note**
> Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.
> The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Navigation

Asset Management > Update > Asset Update Search Criteria

Asset Update Loan Update

Overview

The Asset Update Loan Update process allows editing of the Loan information for an asset or multiple assets.
There are primarily two types of Loans: Within ELMS and Outside ELMS.
All loans within ELMS should utilize a Department of Defense Activity Address Code (DoDAAC); however, there may be some instances where a Government Activity may use a Commercial and Government Entity Code (CAGE Cd).
Loans outside ELMS may use a DoDAAC or a CAGE Cd.
There are five types of Loan Codes:

- **C — Out on Loan to a Non-Government Activity**
  The asset is not currently in the property book; it is being loaned outside of the DoD.
- **G — Government Owned**
  The asset is currently in the property book; it is not out on loan. *The natural state of the asset.*
- **L — In on Loan from a Government Activity**
  The asset is currently in the property book; it is on loan from elsewhere in the DoD. *This Loan Code is not editable from this screen.*
- **M — Out on Loan to a Government Activity**
  The asset is not currently in the property book; it is being loaned from elsewhere within the DoD.
- **N — In on Loan from a Non-Government Activity**
  The asset is currently in the property book; it is on loan from outside of the DoD. *This Loan Code is not editable from this screen.*

Note

The Loan Update process is available only for End Items. It is **not** available for Components or Bulk Items.

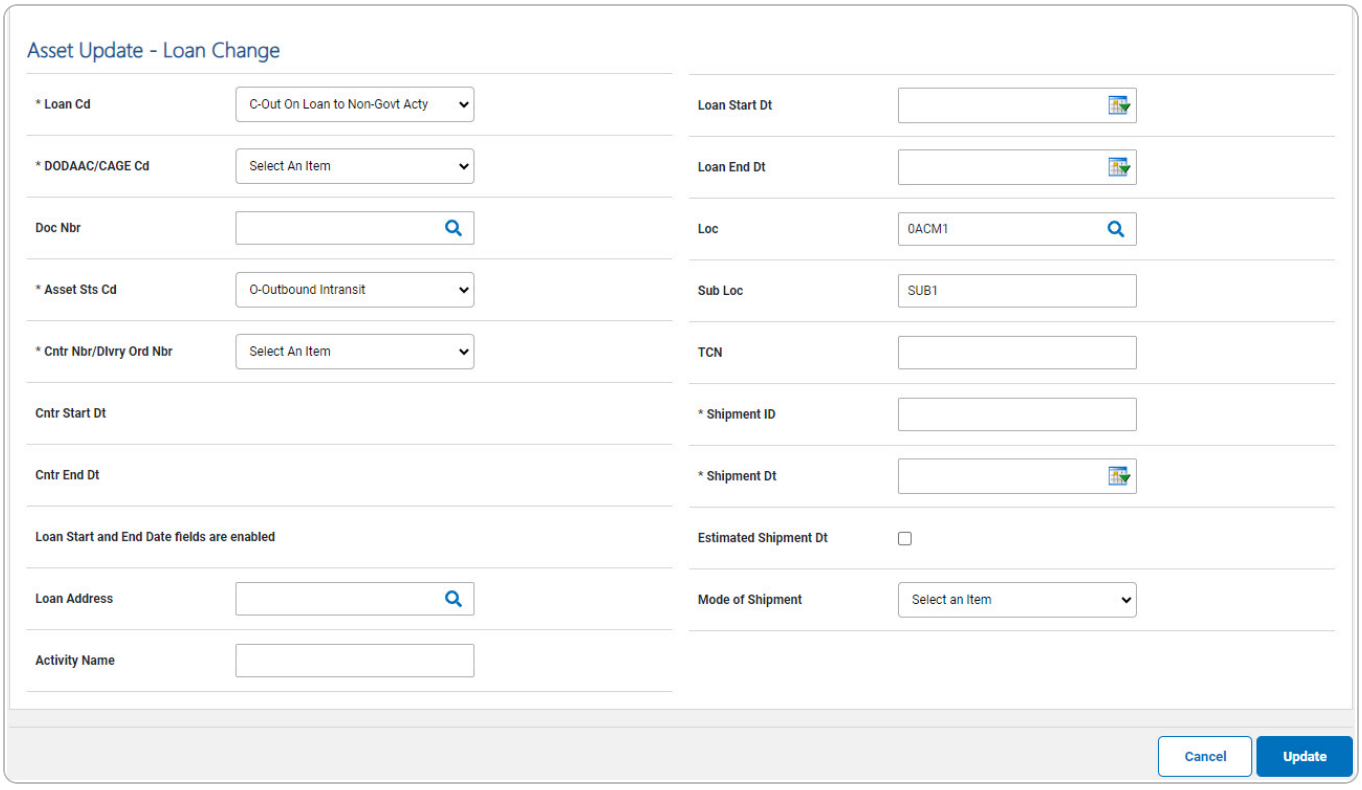
Update the Loan Information for an Asset



Selecting Cancel *at any point of this procedure removes all revisions and closes the page.* ***Bold*** *numbered steps are required.*

Note

The **LOAN CD** selected from the drop-down list determines the data fields displayed on the page.

1. From the Selected Rows page, select Continue. *The **Asset Update Loan Update** page appears.*
2. *Verify the ASSET ID.*
3. *Verify the STOCK NBR.*
4. *Verify the LOAN CD.*
5. *Verify the Quantity.*
6. *Depending upon the LOAN CD above, the fields are different:*

Loan Code C — Out on Loan to Non-GOVT ACTY

A. Update the Loan Cd, using to select the desired code.

B. Update the DoDAAC/CAGE Cd, using to select the desired code.

C. Update the DOC NBR, using to browse for the revised number. *This is a 14 alpha-numeric character field.*

Document Number Browse

D. Update the Asset Sts Cd, using to select the desired code.

E. Update the Cntr Nbr, using to select the desired identifier.

F. *Verify the CNTR START DT.*

G. *Verify the CNTR END DT.*

H. Update the Loan Address, using to browse for the revised address. *This is a 35 alpha-numeric character field.*

Address Browse

I. Update the Activity Name, entering the revised name in the field provided. *This is a 50 alphanumeric character field.*

J. Update the LOAN START DT, using or entering the date (MM/DD/YYYY) in the field provided.

K. Update the LOAN END DT, using or entering the date (MM/DD/YYYY) in the field provided.

L. Update the LOC, using to browse for the revised entry. *This is a 20 alphanumeric character field.*

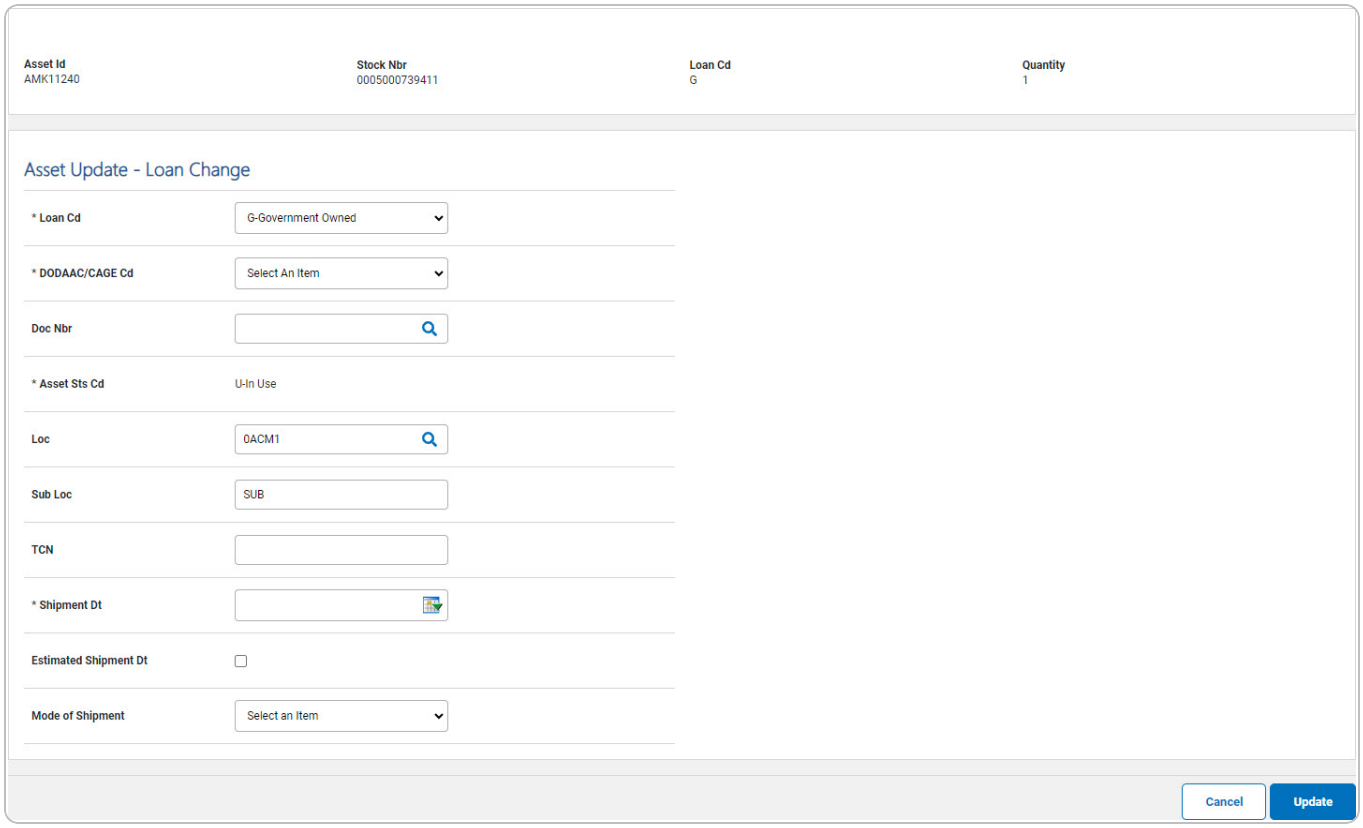
Location Browse

M. Update the SUB LOC, entering the revised location in the field provided. *This is a 20 alpha-numeric character field.*

N. Update the TCN, entering the revised location in the field provided. *This is a 40 alpha-numeric character field.*

O. Enter the SHIPMENT ID in the field provided. *This is a 30 alphanumeric character field.*

Helpful Tip



To transmit information to the GFP module in PIEE, a new SHIPMENT ID is required. It is recommended to use a carrier-provided tracking number, if applicable.

P. Update the SHIPMENT DT, using or entering the date (MM/DD/YYYY) in the field provided.

Q. Verify the Estimated SHIPMENT DT contains the appropriate ☑ or ☐. *This specifies the SHIPMENT DT is not an exact date.*

R. Update the Mode of Shipment, using to select the desired method.

Loan Code G — Government Owned

A. Update the Loan Cd, using to select the desired code.

B. Update the DoDAAC/CAGE Cd, using to select the desired code.

C. Update the DOC NBR, using to browse for the revised number. *This is a 14 alpha-numeric character field.*

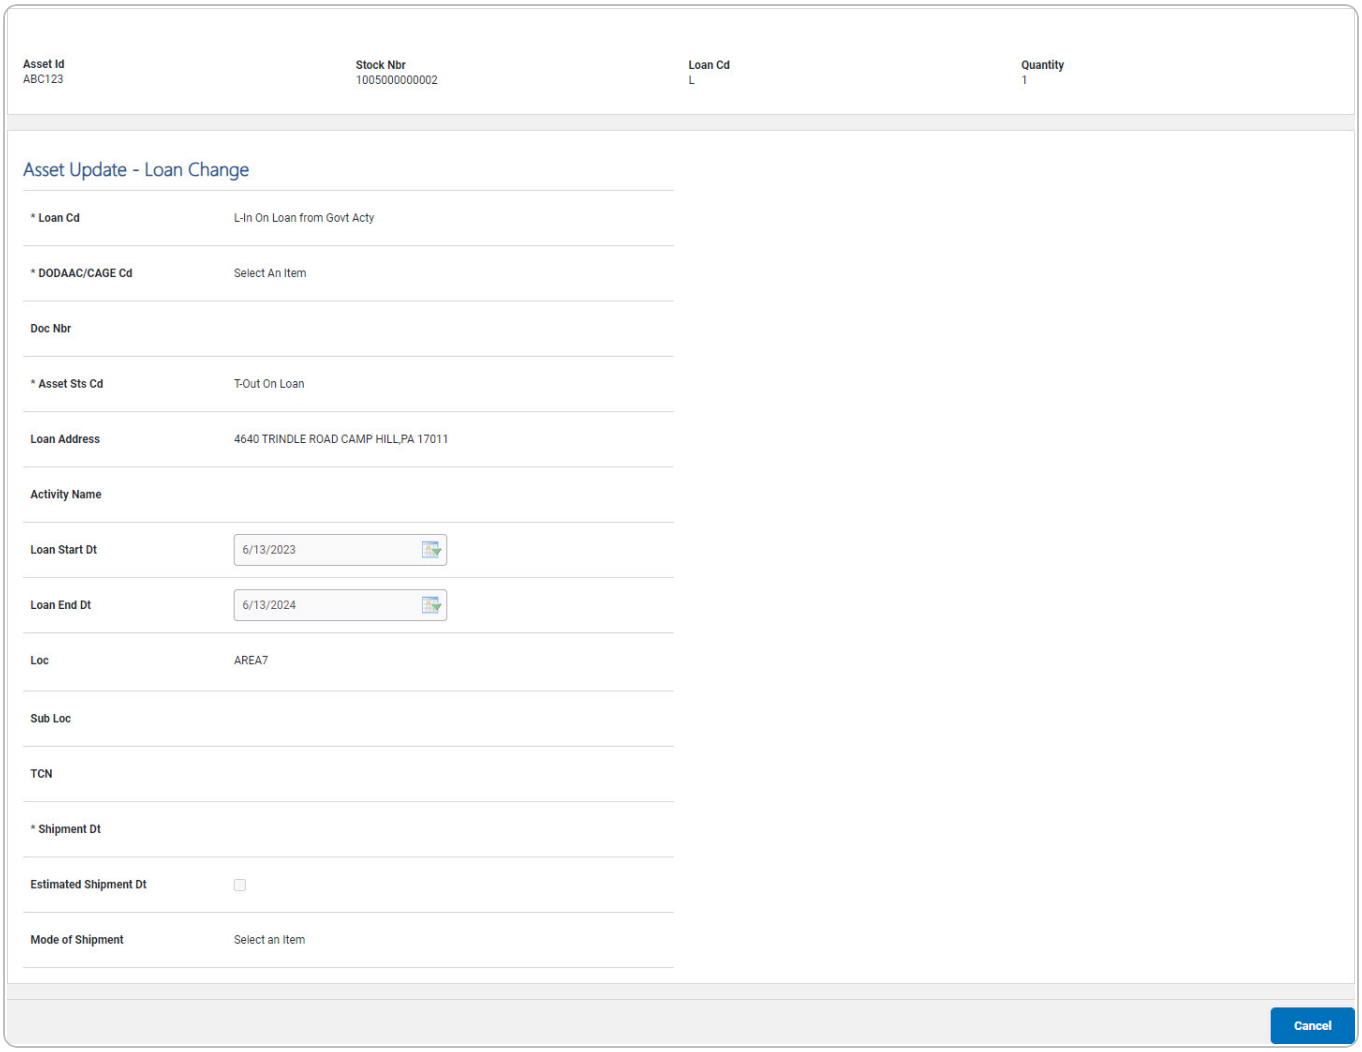
Document Number Browse

D. *Verify the ASSET STS CD.*

E. Update the LOC, using to browse for the revised entry. *This is a 20 alphanumeric character field.*

Location Browse

F. Update the SUB LOC, entering the revised location in the field provided. *This is a 20 alpha-numeric character field.*



G. Update the TCN, entering the revised location in the field provided. *This is a 40 alpha-numeric character field.*

H. Update the SHIPMENT DT, using or entering the date (MM/DD/YYYY) in the field provided.

I. Verify the EST SHIPMENT DT contains the appropriate ☑ or ☐. *This specifies the SHIPMENT DT is not an exact date.*

J. Update the Mode of Shipment, using to select the desired method.

Loan Code L — In on Loan from a Govt Acty

A. *Verify the Loan Cd.*

B. *Verify the DoDAAC / CAGE Cd.*

C. *Verify the Doc Nbr.*

D. *Verify the Asset Sts Cd.*

E. *Verify the Loan Address.*

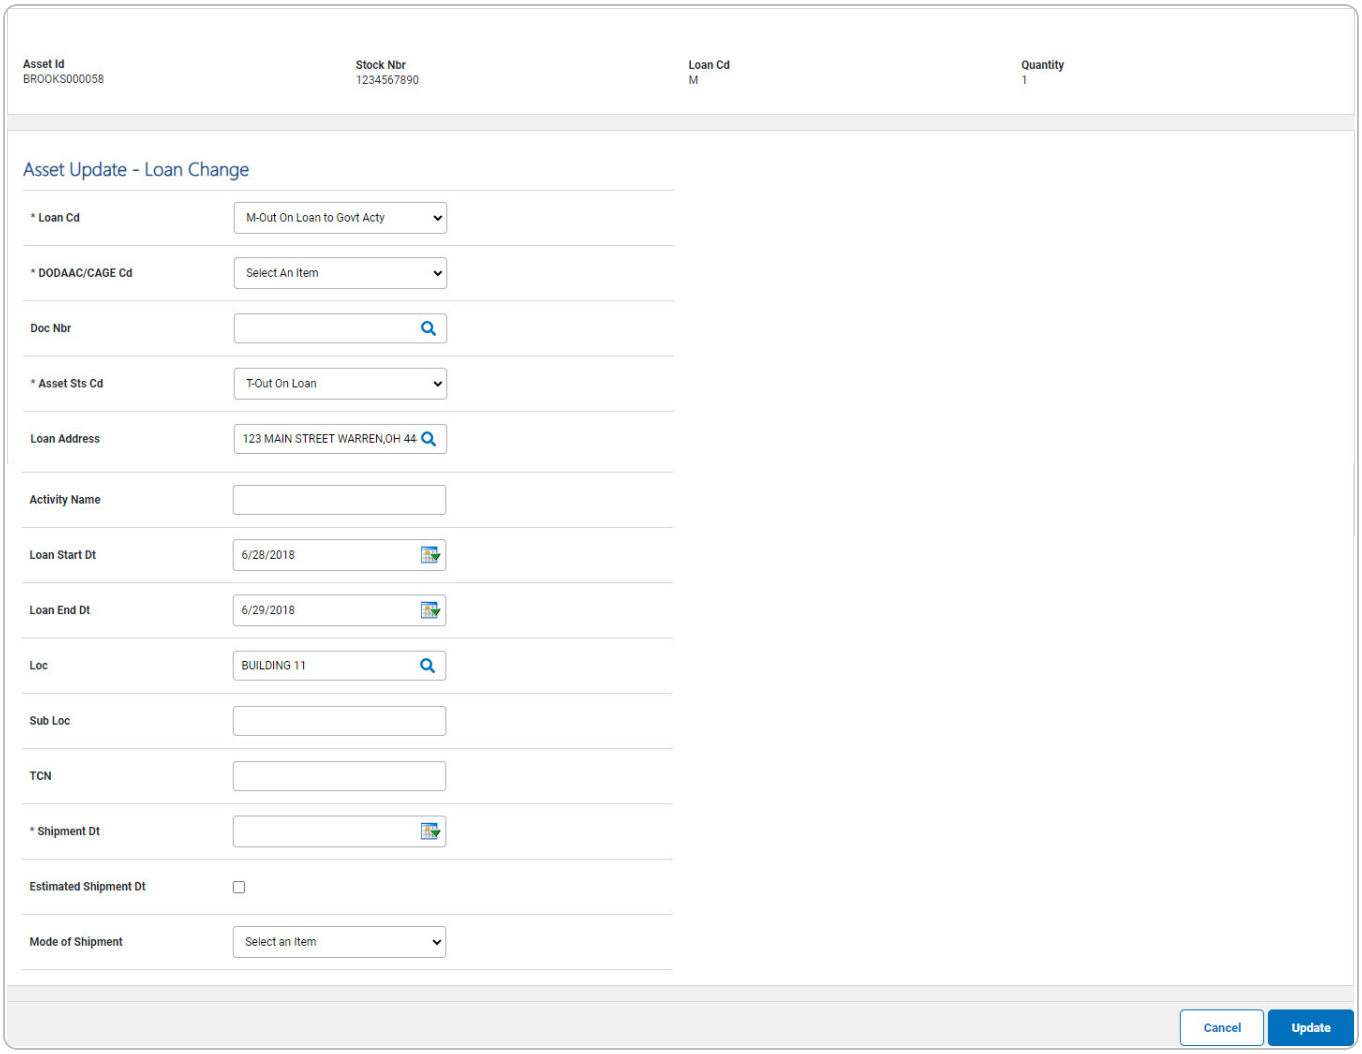
F. *Verify the Activity Name.*

G. *Verify the Loan Start Dt.*

H. *Verify the Loan End Dt.*

I. *Verify the Loc.*

J. *Verify the SUB LOC.*



K. *Verify the TCN.*

L. *Verify the SHIPMENT DT.*

M. *Verify the Estimated SHIPMENT DT.*

N. *Verify the Mode of Shipment.*

Loan Code M — Out on Loan to GOVT ACTY

A. Update the Loan Cd, using to select the desired code.

B. Update the DoDAAC/CAGE Cd, using to select the desired code.

C. Update the DOC NBR, using to browse for the revised number. *This is a 14 alpha-numeric character field.*

Document Number Browse

D. Update the Asset Sts Cd, using to select the desired code.

E. Update the Loan Address, using to browse for the revised address. *This is a 35 alpha-numeric character field.*

Address Browse

F. Update the Activity Name, entering the revised name in the field provided. *This is a 50 alphanumeric character field.*

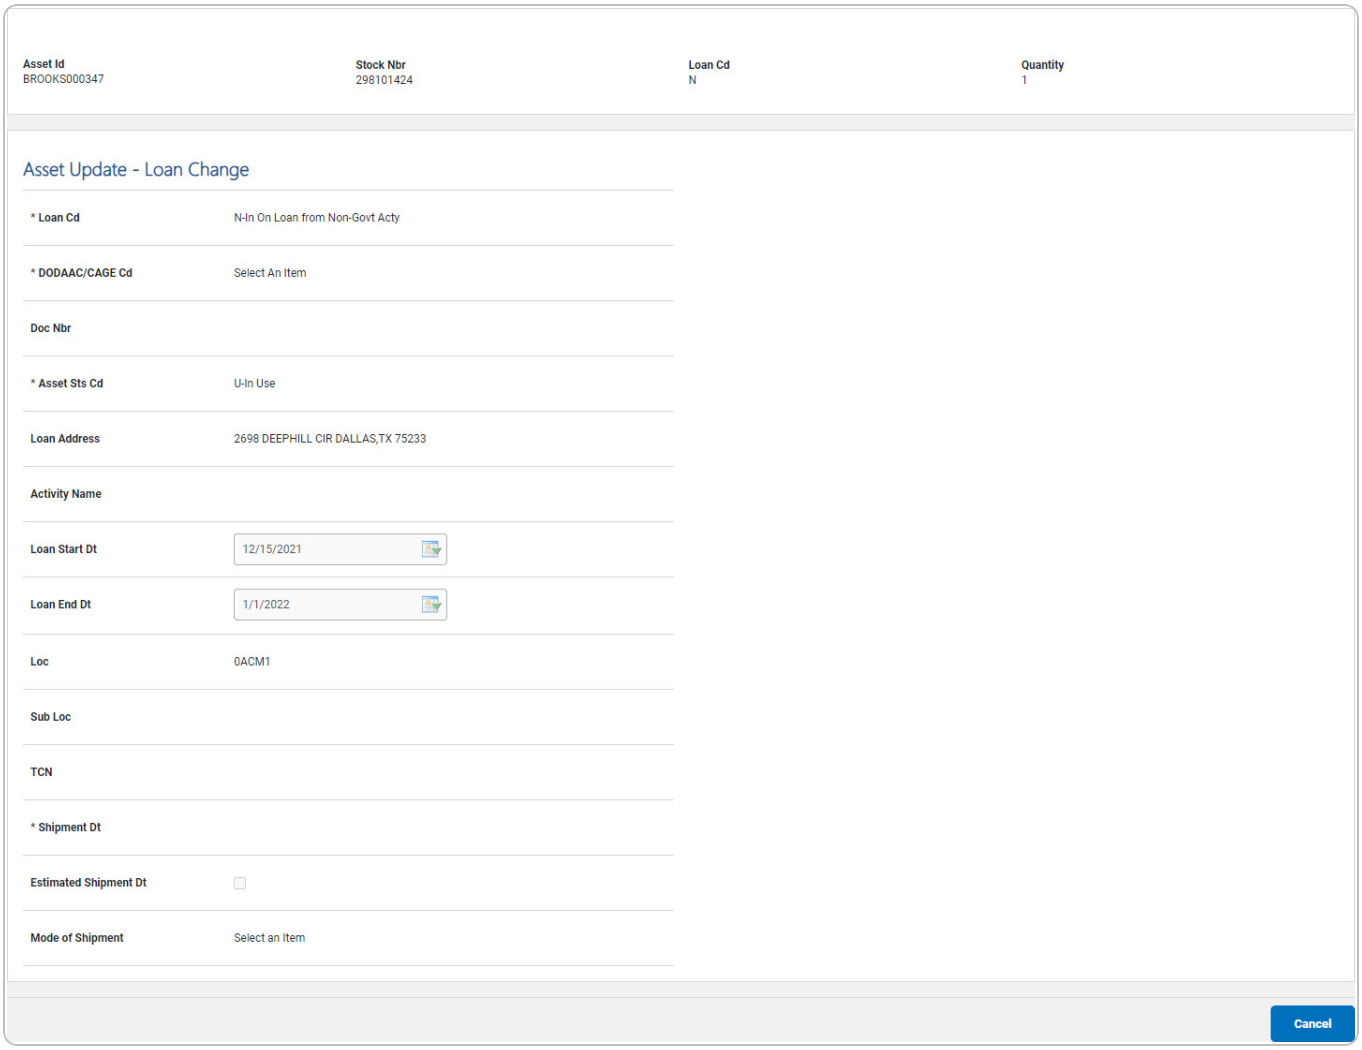
G. Update the LOAN START DT, using or entering the date (MM/DD/YYYY) in the field provided.

H. Update the LOAN END DT, using or entering the date (MM/DD/YYYY) in the field provided.

I. Update the LOC, using to browse for the revised entry. *This is a 20 alphanumeric character field.*

Location Browse

J. Update the SUB LOC, entering the revised location in the field provided. *This is a 20 alpha-numeric character field.*



K. Update the TCN, entering the revised location in the field provided. *This is a 40 alpha-numeric character field.*

L. Update the SHIPMENT DT, using or entering the date (MM/DD/YYYY) in the field provided.

M. Verify the Estimated SHIPMENT DT contains the appropriate ☑ or ☐. *This specifies the SHIPMENT DT is not an exact date.*

N. Update the Mode of Shipment, using to select the desired method.

Loan Code N — In on Loan from a Non-Govt Acty

A. *Verify the Loan Cd.*

B. *Verify the DoDAAC / CAGE Cd.*

C. *Verify the Doc Nbr.*

D. *Verify the Asset Sts Cd.*

E. *Verify the Loan Address.*

F. *Verify the Activity Name.*

G. *Verify the Loan Start Dt.*

H. *Verify the Loan End Dt.*

I. *Verify the Loc.*

J. *Verify the SUB LOC.*

K. *Verify the TCN.*

L. *Verify the SHIPMENT DT.*

Asset Update Stock Number Update

Overview

The Asset Update Stock Number Update process allows editing of the document number, stock number, manufacturer data, and authorizations (where applicable) assigned to assets.

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Navigation

Add Attribute Value(s)

Overview

The Attribute User Input process allows the ability to add attribute information to an asset. Attributes are added based on the template selected when the Stock Number is first added to the catalog. The same template must be used for all attribute entries regarding the Stock Number, though the attributes can differ.

Navigation

Asset Management > Update > Search Criteria > Search > Search Results > ☐ (desired record(s)) > Continue > Selected Rows > Continue > ○ Attribute(s) Update > Continue > Asset Update Attribute(s) Update > Attributes Value(s) > 🖱 > Attribute User Input pop-up window

Search For a Custodian — Criteria

Overview

The Property Accountability module Custodian process provides the ability to manage individuals assigned as being responsible for property assets for a specific area. The Custodian Search Criteria page begins the process and provides means to search for existing Custodian Number records and create new records.
When creating a new Custodian Number record, be sure to adhere to the following rules:

- Use up to 6 alphanumeric characters for a MAJ CUSTODIAN NBR.
- Use up to 6 alphanumeric characters for a SUB CUSTODIAN NBR.
- Do not use with a space or special character.
- At least one character must be used.
- If LIN/TAMCN authorizations are available for the UIC, users have the option to assign/unassign Paragraph Numbers to the Custodian.
- A MAJ CUSTODIAN NBR must be created before a SUB CUSTODIAN NBR.
- When adding a MAJ CUSTODIAN NBR, select the Transfer Authority ☑ to grant the Custodian the authority to transfer items.

Navigation

Add a Custodian

Overview

The Custodian Add process provides the ability to create a MAJ CUSTODIAN NBR or a SUB CUSTODIAN NBR record. A MAJ CUSTODIAN is the person responsible for the equipment and is assigned by the Accountable Property Officer (APO) or Property Administrator (PA). The SUB CUSTODIAN is the person associated with the equipment assigned to the MAJ CUSTODIAN.
If authorizations are tracked down to the Custodian level, there must be a unique Paragraph Number assigned, regardless of the type of authorization.
Follow these rules to create a new Custodian Number record:

- Use up to six alphanumeric characters for a MAJ CUSTODIAN NBR.
- Use up to six alphanumeric characters for a SUB CUSTODIAN NBR.
- Do not use with a space or special character.
- At least one character must be used.
- If LIN/TAMCN authorizations are available for the UIC, users have the option to assign/unassign Paragraph Numbers to the Custodian.
- A MAJ CUSTODIAN NBR must be created before a SUB CUSTODIAN NBR.
- When adding a MAJ CUSTODIAN NBR, select the Transfer Authority ☑ to grant the Custodian the authority to transfer items.

Delete a Custodian

Overview

The Custodian Delete process allows the removal of a Custodian record. When Custodians change positions or leave the organization, it is imperative the custodian account is removed or reassigned. Prior to deleting a record, the system verifies that no assets exist for this Custodian/Sub Custodian. Assets cannot be assigned to a deleting Custodian record. Assets must be assigned to a different Custodian record.

Add a Custodian Paragraph Number

Overview

The Custodian Paragraph Number Add process provides the ability to add one or more Paragraph Numbers to a Custodian record. If using LIN/TAMCN authorizations, the Custodian Paragraph Number tab displays and allows associations of Paragraph Numbers to a Custodian.

Helpful Tip

The Paragraph Number must be unique for each Custodian. However, the use of the Paragraph Number is NOT mandatory.

Search for Pending Transactions — Criteria

Overview

The Property Accountability module Pending Transactions Search Criteria process provides the ability to review the incoming and outgoing assets.
The types of pending transaction processes available for reviewing are:

- Receipt
- Disposition
- Transfer
- Pending
- Loan Within ELMS
- Loan Return

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Search for an Excess Asset — Criteria

Overview

The Property Accountability module Excess Asset Search Criteria process provides the ability to select assets which are no longer needed and identify them as available to other ELMSsites or to be reported to an excess system. Currently the ELMSinterface for excess is the Defense Reutilization and Marketing Service (DRMS) Asset Redistribution Table known as Defense Reutilization and Marketing Service Automated Information System (DAISY).
The Type Action selected is used to identify assets which will be:

- **Pre-notifications**
  — available in the future
- **Excess**
  — available now
- **Withdraw**
  — previously marked as being or becoming available

The Excess process works in conjunction with the Disposition process to remove an asset from ELMS. Assets which are unavailable to Excess are:

- Assets under Suspected Loss
- Assets on the Due-Out Table
- Bulk assets on Pre-notification
- Assets On-Loan
- Leased Assets

Navigation

Asset Management > Excess > Excess Asset Search Criteria page

Page Fields

The following fields display on the **Excess Asset Search Criteria** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Overview

The Property Accountability module Excess in Place Delete Search Criteria process provides the ability to delete the excess in place asset(s) which have been turned in to the Defense Reutilization and Marketing Office (DRMO) and have been reissued/sold by DRMO.
Assets for deletion are entered into the Excess Asset or Excess Non-Property process and identified as Excess In Place.

Navigation

Asset Management > Excess In Place DEL > Excess In Place Delete Search Criteria page

Page Fields

The following fields display on the **Excess In Place Delete Search Criteria** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
79	If no Search Criteria is entered, search will be performed by UIC.
27	A wild card is permitted using percentage (%).
128	Disposal Turn-In DOC NBR(s) with Excess Action CD "E" is not displayed.
12	Select "Search" button to view Search Results page.

13	Select "Reset" button to clear data.

UIT Out-Of-Cycle Reconciliation Request

Overview

The UIT Out-Of-Cycle Reconciliation Request process is used to run an out-of-cycle reconciliation for either all UIC's under one Accountable UIC or a single UIC. Prior approval is required from LOGSA (Logistics Support Activity) to run an out-of-cycle reconciliation.
When a selection is made on the page, a record is written to the Batch Queue. A separate record is written to the Batch Queue Table for each UIC selected in the UIT Reconciliation Request program. The UIT Reconciliation Process then processes the batch record.

Navigation

Asset Management > UIT Out Of Cycle RECON > UIT Out-Of-Cycle Reconciliation page

Page Fields

The following fields display on the **UIT Out-Of-Cycle Reconciliation** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Search for an Asset Reversal — Criteria

Overview

The Property Accountability module Asset Reversal process provides the ability to return assets which were inadvertently disposed from the ELMS system. This returns the property book to the same condition prior to the executed action. All appropriate business partner events (accounting events, UIT, IUID, etc.) are processed as well.
This process only handles Personal Property end items without component(s) assets which were inadvertently disposed and need to be returned to the ELMS system. The process does not handle the reversing of any receipts into ELMS, the reversing of any end items with components, nor any reverses of Real Property (either receipts or dispositions).

Note

On a reversal of an asset which has been deleted and the Cost Center has been marked as Deleted, the Cost Center will be reinstated.

Navigation

Asset Management > Reversal > Asset Reversal Search Criteria page

Search for an Authorization Request — Criteria

Overview

The Property Accountability module Authorization Request process provides the ability to search for Authorization Request records. The two types of Authorizations are Command Authorization and Local Authorization. The process allows a Local Authority to request a Command Authorization and attaches the Authority Documentation to the request. The types of Authority Documentation include a DD250, DD1342, or Modification of Allowance (MOA) letter.
Requests are for the establishment of a new authorization, the removal of an existing authorization, or the modification of an allowance for an existing authorization. When submitting an Authorization Request or a Change in Request, the Approving Official is notified by email, which contains a subject line (Request for Authorization) and a body (A Request for Authority is submitted for (Append UIC, Stock Number, requested quantity, Request Remarks, and AUTHN REF NBR).

File Upload

Overview

The Property Accountability module File Upload process provides the ability to insert new records into the Online Data Table Upload program using a browser upload.

Navigation

Asset Management > File Upload > File Upload page

Page Fields

The following fields display on the **File Upload** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value

Download the Template

Download Template

File Upload

Upload File Path

Select the template that matches the file contents

Template

Match file contents to available columns

Asset Id
Device Name

Software Name
Software Version
Manufacturer Name
Service Tag Serial Number

(*) Asterisk identifies mandatory fields.

Procedures

ELMS Navigation Helpful Tips

Click the following link to display PA Navigation Tips.

Step 0 — Download the Template

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*

1. Select . *The Download Template grid appears.*
2. Use to select Download Template. *The template downloads to the user's computer.*

Step 1 — Select a File to Upload

1. Select the Upload File Path Browse... . *The Windows* ***Choose File To Upload*** *pop-up window appears.*
2. Browse for the desired file to upload.
3. Select the file. *The file is highlighted.*
4. Select Open or double-click to select. *The file is downloaded and automatically proceeds to the next step.*

Step 2 — Pick the File Upload Template

1. Use to select Template. *The template is applied to the uploaded file.*

Step 3 — Map the File Columns to the Template

1. ELMS automatically detects columns from the first row of the uploaded file. Select the check box for File Does not have a header if no column headers were specified in the first row of the uploaded file.
2. From left to right order match the column name and the template columns by selecting the appropriate drop-down values for each column.
3. Select Continue to validate the file upload or Cancel to return to the previous page.

Validate the Columns

1. Choose one of the following tabs:
   - **Software**
   - **Asset**
   - **License**
2. Select Update to check for upload errors or Cancel to return to the previous page.

Finalize - Process the File

1. Once the file has been validated free of errors select the Upload File button to process the file.
2. Select Print to print the Transaction Status.

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Note

Each error has a button that directs to the appropriate screen to resolve the error.

If it is an asset error, the user is directed to the IT Asset Characteristics. Once the ASSET ID is identified and the record is updated, the user is returned to the IT Error Resolution screen.

If there is an error for the software, the user is directed to IT Device Software process. The correct asset is pre-populated and the search grid is enabled to allow adding the correct software. When the update is complete, the user is brought back to the IT Error Resolution screen.

If there is an error for both the asset and the software, the asset is fixed first.

The errors are removed from the screen once corrected. If the errors are corrected via the process versus this screen the Ignore check box allows the errors to be cleared from the screen.

Error	Solution
No common errors have been identified for this page.

IT MGT ERRORS Overview

Overview

The Property Accountability module IT Management Error Resolution process provides the ability to resolve any errors that occur during processing of uploaded files.
An error is displayed under two circumstances:

- The asset does not exist in the catalog.
- The software in the file does not match to the software in the software catalog.

For example, an error displays when the process is unable to match the asset in the file to the IT asset on the property book.

Navigation

Asset Management > File Upload > IT MGT ERRORS > IT Asset Software Upload Errors page

Page Fields

The following fields display on the **IT Asset Software Upload Errors** page. For more information on each field, select the appropriate hyperlink.

IT Management Dashboard

Overview

The Property Accountability module IT Management Dashboard process provides the ability to view and track the usage, compliance, and expenditures of software licenses. The Dashboard is a reporting and analytical tool used to manage the software and assets. It provides the ability to view summary data for assets, licenses, and software. The information is summed and rolled from the Accountable Unit Identification Code (ACTBL UIC) level to an Agency level.

Note

The ELMS account must have Accountable, Site, or Agency level inquiry access to view the IT Management Dashboard.

Navigation

Asset Management > IT Management > IT Management Dashboard page

IT Management Dashboard

There are four sections of the Dashboard:

Compliance

1. Compliance consists of:

   A. **License Allocation**

   A Bar graph, comparing the software licenses associated with the asset to the software license quantity assigned to the IT devices.

B. **Allocation by License Type (in Dollars)**

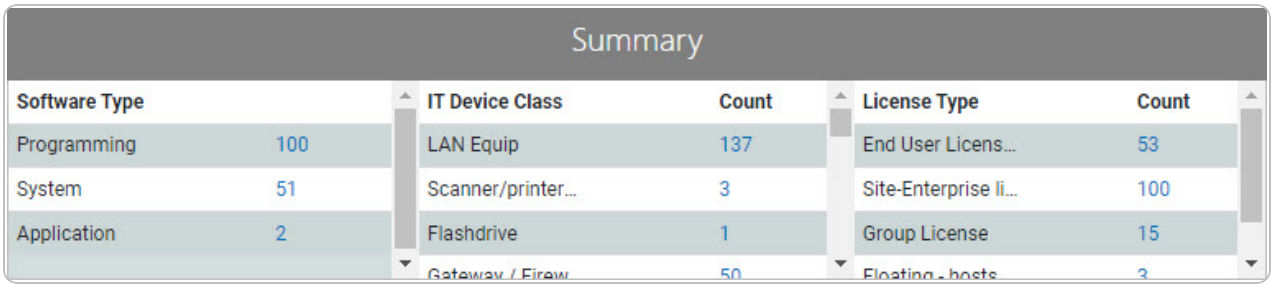
A 3D Pie graph, showing the total license amount (in dollars).

C. **Expiring Licenses (with Cost)**

A Bubble graph, showing the cost of expiring licenses, by month.

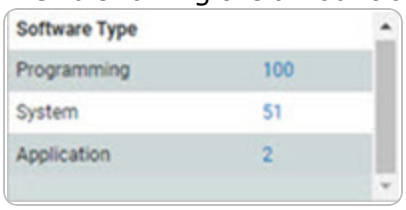
D. **Licenses Initiated (with Dollars Allocated)**

A Bubble graph, showing the new licenses purchased, by month.



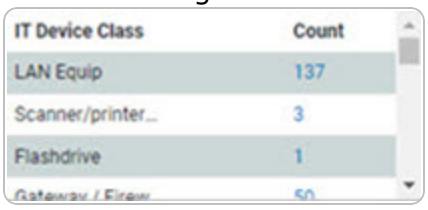
Summary

Note



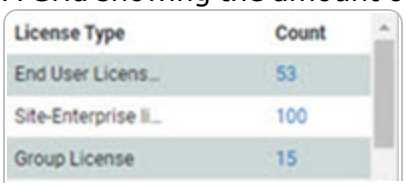
Clicking the Count hyperlink next to the listed item brings up the Results list for that item.

1. Summary consists of:



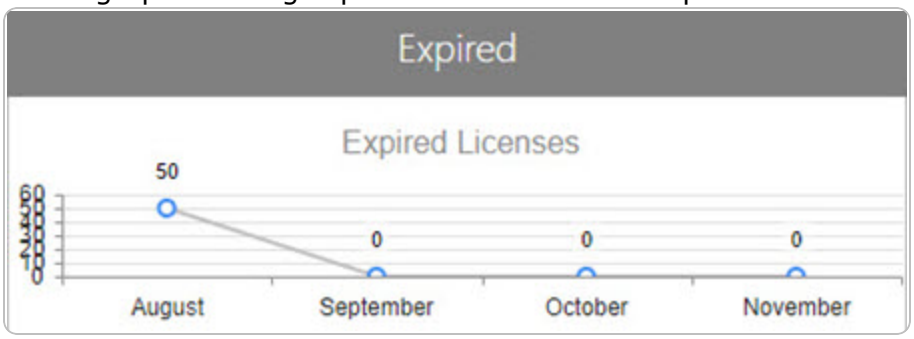
A. **Software Type**

A Grid showing the amount of each kind of software.



B. **IT Device Class**

A Grid showing the amount of each kind of IT asset.



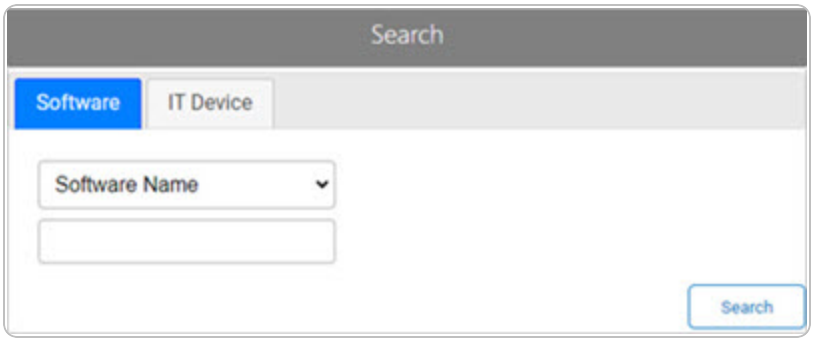
C. **License Type**

A Grid showing the amount of each kind of License.

Expired

A Line graph showing expired licenses within the past 4 months.

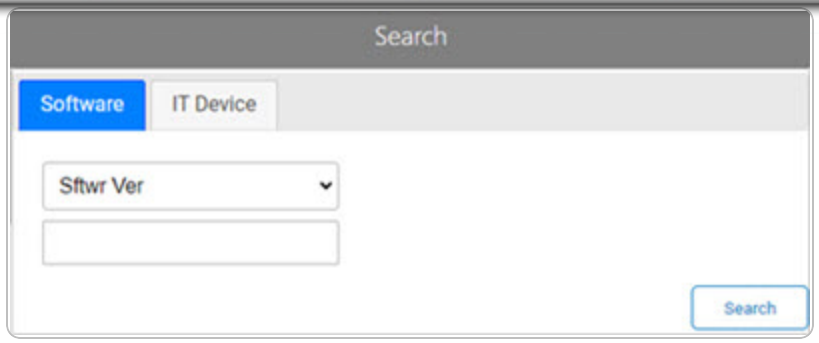
Search



1. Search consists of:

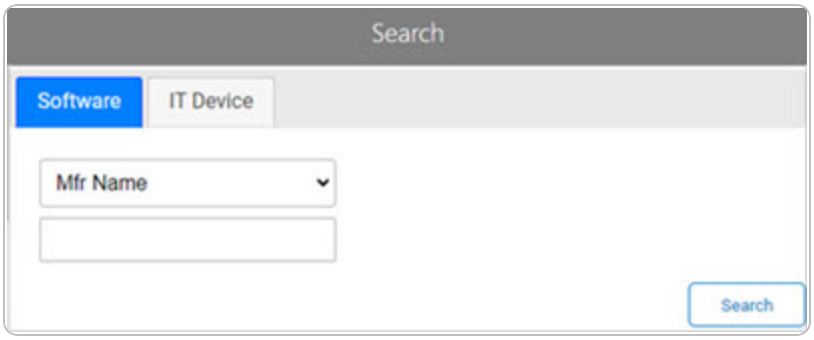
A. **Software**

a. Software consists of:



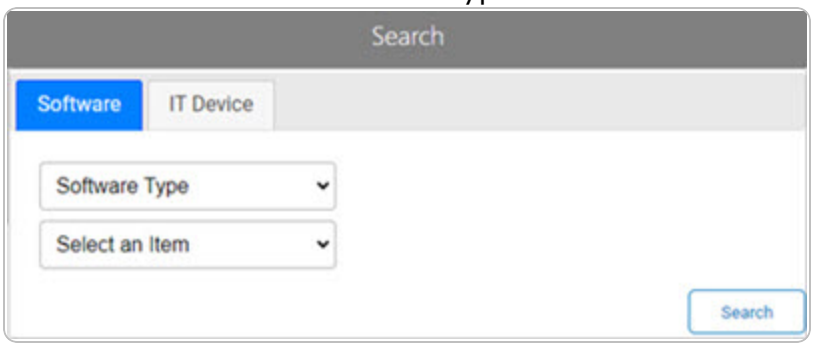
I. **Software Name**

Enter the Software Name in the field provided. *This is a 100 alpha-numeric character field.*



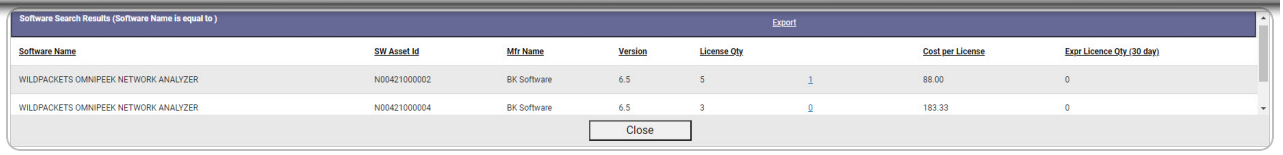
II. **Software Version**

Enter the Software Version in the field provided. *This is a 100 alpha-numeric character field.*



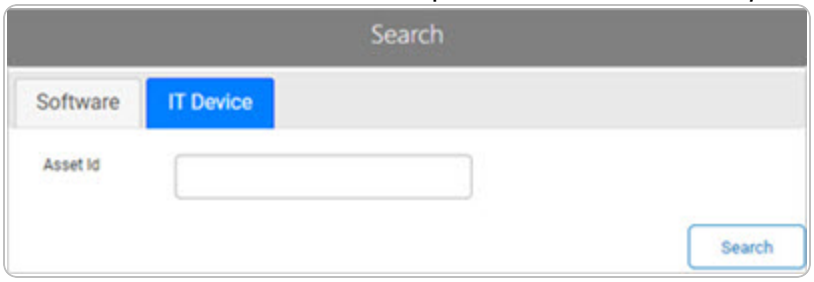
III. **Manufacturer Name**

Enter the Manufacturer Name in the field provided. *This is a 36 alpha-numeric character field.*

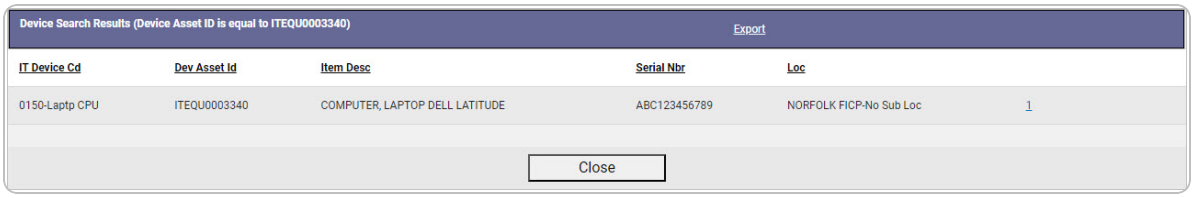


IV. **Software Type**

Use ⌄ to select the Software Type.



b. Select Search. *The Software Search Results grid appears.*



B. **IT Device**

Enter the ASSET ID in the field provided.*This is a 12 alphanumeric character field.*

a. Select 

. *The Device Search Results grid appears.*

Location Update Exception Search Criteria

Overview

Enterprise Logistics Management System (ELMS) allows you to manage location change exceptions reported by the Real Time Location System (RTLS). When an asset with pRFTag is moved within the monitored RTLS perimeter fence, a change location alert is sent to ELMS to ensure that the location in the ELMS database is reflected. Consequently, if an asset is moving or moved several times during the day, the RTLS detects these changes as location changes and each change is transmitted to ELMS.

ELMS creates filter criteria to avoid or minimize the constant updating of the location in the ELMS database. For example, if an asset such as projector is carried to different conference rooms for presentation use, the user may not want to update the location of the asset as it moves to different locations. It may, however, just update the last location at the end of the day.

ELMS defines an exception base filtering that can be used as a temporary measure to prevent the constant updating of a moving asset. The exception filtering is at the individual asset; therefore, you must identify the asset from the ELMS **Asset Id** to be filtered.

Navigation

Asset Management > Location Update Exception> Search Criteria

Page Fields

The following fields display on the **Location Exception Search Criteria** page. All data fields are optional on the **Search Criteria** page. For more information on each field, select the appropriate hyperlink.

To Select Assets to Manage Their Location Update Exception:

1. Use the **Select** checkbox to select individual records or choose Select All to select all records on all pages.
2. To display a **Details** page, select the **ASSET ID** hyperlink for the record to view. To return to the **Search Results** page, select Cancel.
3. Select Continue to display the **Selected Results** page or choose Cancel to return to **Search Criteria** page.

Helpful Tip

You may have several pages returned from your search criteria. To sort the rows, select the underlined column header. The information is sorted in ascending order. Select the column header again to sort your table in descending order. An underlined column header sort affects ALL rows on every page of your results, not just those seen on the currently active page.

Note

To clear your selections, Deselect All.

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error. Use ⊞ Instructions located at the top left of the page for additional assistance.

Error	Solution
No record(s) match search criteria or	Results for the search criteria you entered do not exist, you

you do not have the appropriate security access.	are logged into the wrong ACTBL UIC/UIC, or you do not have security access.

Location Update Exception Selected Results

Overview

Enterprise Logistics Management System (ELMS) allows you to manage location change exceptions reported by the Real Time Location System (RTLS). You can select to never report location exceptions for an asset or to report once a day at the end of the day.

Navigation

Asset Management > Location Update Exception> Search Criteria > Search Results > ☐ (desired record(s)) > Selected Results

Page Fields

The following fields display on the **Location Exception Selected Results** page. All data fields are optional on the **Search Criteria** screen. For more information on each field, select the appropriate hyperlink.

Selected Records
Asset Id
Stock Nbr
Serial Nbr
Item Desc
Custodian Nbr

Location
Amount
Update Exception
Active Exception
Effective Date
Start Date
End Date

Exception Assignment
Location Update Exception
*Effective Date
Range Start Date
Range End Date
Active
Inactive
History Remarks

Procedures

To Delete the Exception Assignment:

1. Review the selected record(s) you are going to process.
2. Select the **Location Update Exception** from the drop-down list. You can choose:

- Not Applicable
- Never update locations
- Updated once a day (at the end of the day)

1. If the **Location Update Exception** is set to *N - Never update locations* or *D - Updated once a day (at the end of the day)*, the **Effective Date** becomes a mandatory field. Input when this exception assignment becomes effective.
2. Enter a **Range Start Date** and **Range End Date** to specify a range. Leaving these fields blank will continue to exception assignment indefinitely.
3. By default the exception assignment is set to *Active*. Select the *Inactive* radio button to turn the exception assignment off.

4. The **History Remarks** is an optional field. It is recommended you enter comments to further document the update action.
5. Select Submit to process the transaction or choose Cancel to return to the **Search Criteria** page.

Custodian Nbr
Location
Amount
Update Exception
Active Exception
Effective Date
Start Date
End Date

Exception Assignment
Location Update Exception
Effective Date
Range Start Date
Range End Date
Active
Inactive
History Remarks

Procedures

To Manage the Exception Assignment:

1. Review the selected record(s) you are going to process.
2. Select the **Location Update Exception** from the drop-down list. You can choose Not Application, Never report location exceptions, or report once daily, at the end of the day.
3. If the **Location Update Exception** is set to *N - Never update location* or *D-Updated once a day (end of day)*, the **Effective Date** becomes a mandatory field. Input when this exception assignment becomes effective.
4. Enter a **Range Start Date** and **Range End Date** to specify a date range. Leaving these fields blank will continue to exception assignment indefinitely.
5. By default the exception assignment is set to *Active*. Select the *Inactive* radio button to turn the exception assignment off.

6. The **History Remarks** is an optional field. It is recommended you enter comments to further document the update action.
7. Select Delete to process the transaction or choose Cancel to return to the **Search Criteria** page.

Search for Reconcile Inventory Data — Criteria

Overview

The Property Accountability module Manage Inventories - Reconcile Inventory Data process provides the ability to reconcile both manual (paper report) and automated (scanned) inventories in ELMS.

- For Automated inventories, this process works off discrepancies (overages/shortages generated during the automated inventory) using a Portable Data Collection Device (PDCD).
- For Manual inventories, once the exceptions are updated, all remaining records are updated en masse using the Reconciliation process.

Navigation

Inventory > Manage Inventories > Search Criteria > Search > Search Results > ☐ (desired record(s)) > Continue > Selected Rows > Reconcile INV Data option > Continue > Manage Inventories - Reconcile Inventory Data Search Criteria page

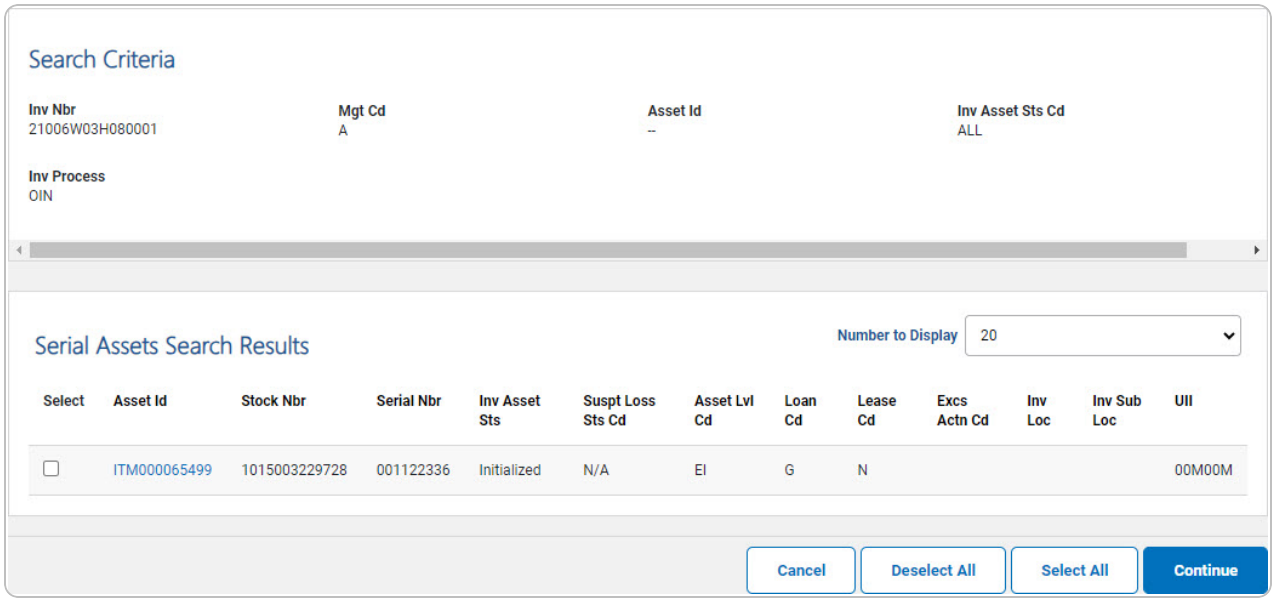
Reconcile Serial Assets

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Review the inventory to reconcile.

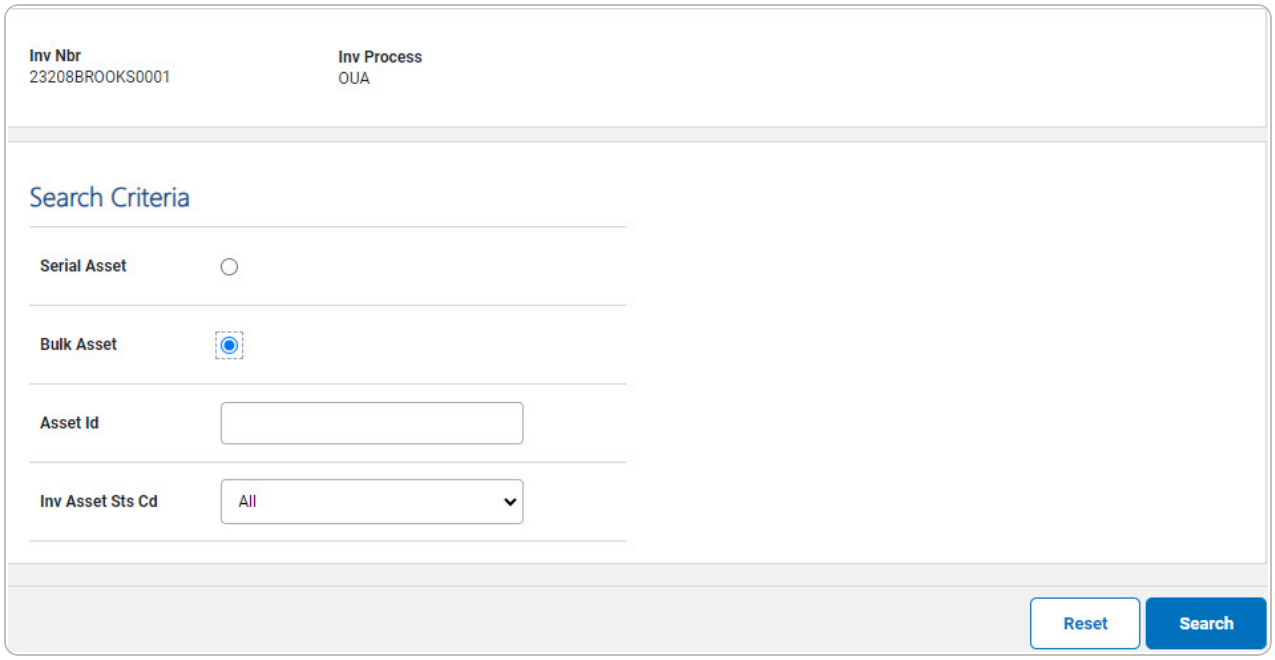


- *Verify the INV NBR.*
- *Verify the INV PROCESS CD.*

2. In the Search Criteria panel, narrow the results by entering one or more of the following optional fields:.
   - Choose Serial Asset.
   - Enter the ASSET ID in the field provided. *This is a 12 alphanumeric character field.*
   - Use to select the Inv Asset Sts Cd.

   Note
   When reconciling an inventory by using a PDCD, the INV ASSET STS CD field is available. For manual inventories, this field is unavailable.

3. Select Search. *The **Reconcile Inventory Data Serial Asserts Search Results** page appears.*



Reconcile Bulk Assets

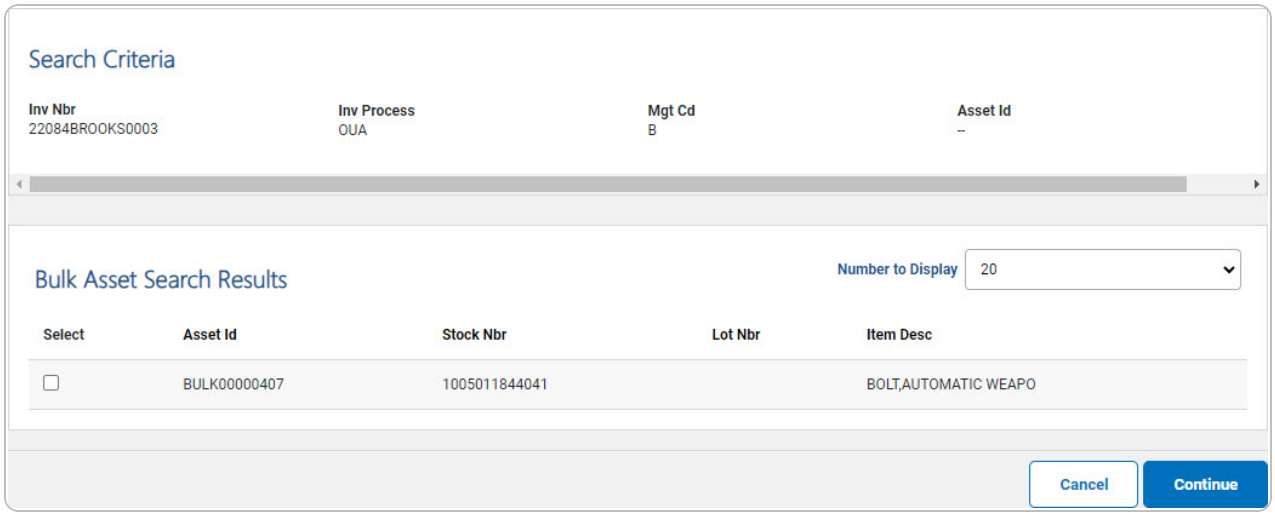
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the*

default "All" setting.

1. Review the inventory to reconcile.

- *Verify the INV NBR.*
- *Verify the INV PROCESS CD.*

2. In the Search Criteria panel, narrow the results by entering one or more of the following optional fields:



- Choose Bulk Asset.
- Enter the ASSET ID in the field provided. *This is a 12 alphanumeric character field.*
- Use to select the Inv Asset Sts Cd.

Note

When reconciling an inventory by using a PDCD, the INV ASSET STS CD field is available. For manual inventories, this field is unavailable.

3. Select Search. *The **Reconcile Inventory Data Bulk Asset Search Results** page*

appears.

Common Errors

Search for Managed Inventories — Criteria

Overview

The Property Accountability module Manage Inventories process provides the ability to work with previously initialized inventories. From this central location it is possible to:

- **Reconcile Inventory Data** —
  Addresses all overages and shortages found during the inventory. The inventory must be in Open Initialized (OIN), Open Downloaded (ODL), or Open Unreconciled Manual (OUM) status for reconciliation.
- **Update Inventory Header Dates** —
  Changes the Sched Cmpltn Dt and Next Initzn Dt of a selected inventory. The inventory must be in Open Initialized (OIN) or Open Downloaded (ODL) status to update the header dates.
- **Generate/Reprint Inventory Reports** —
  Requests a new inventory report that shows all assets that are included on the inventory. The inventory must be in Open Initialized (OIN) or Open Downloaded (ODL) status to generate the inventory report.
- **Generate/Reprint Reconciliation Reports** —
  Requests a new reconciliation report that shows all overages and shortages on the inventory. The inventory must be in Open Unreconciled Automated (OUA) status to generate the reconciliation report.
- **Close an Inventory** —
  Completes an inventory before all assets are reconciled, and completes any changes made under the Reconcile Inventory Data option, disregarding all other changes. The inventory must be in Open Initialized (OIN), Open Downloaded (ODL), or Open Unreconciled Manual (OUM) status to close the inventory.
- **Cancel an Inventory** —
  Quits an inventory, disregarding any changes under Reconcile Inventory Data. The inventory must be in open status, such as Open Initialized (OIN), Open Downloaded (ODL), Open Scanner (OSC), Open Process Recon (OPR), Open Unreconciled Automated (OUA), and Open Unreconciled Manual (OUM). It is then assigned a status code of Closed Canceled (CAN).
- **Delete an Inventory** —
  Removes closed inventories from the list. The inventory must be in closed status, such as Closed No Assets (CNA), Closed Scanner (CSC), Closed Reconciled (CRC), Closed Mass Update (CMU), or Closed Canceled (CAN).

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Next Inventory Initialization Date Update

Overview

This page allows you to modify an inventory's **Next Initialization Due Date**.

When inputting the **Custodian** and **Location Next Initialization Date**, it must be greater than the system date but less than 1095 days in the future. For Sensitive Inventories, the date must be greater than the system date but less than 365 days in the future since sensitive inventories must be performed annually.

Navigation

Inventory > Next Inv Initzn Date > Search Criteria > Search Results > Update page

Page Fields

The following fields display on the **Next Inventory Initialization Date Update** page. For more information on each field, select the appropriate hyperlink.

Custodian/Sensitive/Custom Inventories

Custodian Nbr
Last Inv Dt
Next Initlzn Dt

Location Inventories

Loc
Last Inv Dt
Next Initlzn Dt

Procedures

To Update the Next Initialization Date:

1. Verify the correct inventory displays.

Note

If multiple inventories were selected, the CUSTODIAN NBR and LAST INV DT/LOC will appear as asterisks (*) if the data is not the same.

2. Update the **NEXT INITZN DT** using or enter a valid date in MM/DD/YYYY format. The date must be greater than or equal to the current system date but not by more than 1095 days (three years) for Custodian and Location inventories and 365 days (one year) for Sensitive inventories.
3. Select Update to complete the transaction or choose Cancel to return to the previous page.

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error. Use ⊞ Instructions located at the top left of the page for additional assistance.

Error	Solution
Date format should be MM/DD/YYYY; with valid month/day combination.	Use to select a date or enter a valid date in MM/DD/YYYY format.
Next CUST or LOCINITLZN DT must be > SYSTEM DT but < 1095 days.	NEXT INITZN DT must be greater than the current system date but not by more than 1095 days (three years).

Search for an Inventory Management Plan — Criteria

Overview

The Property Accountability module Inventory Management Plan Update process provides the ability to manage an Inventory Management Plan.

The Inventory Management Plan is created by the Agency Coordinator. ELMS stores inventory management plans at three levels:

- **Agency** – Highest level. Controls the ability to set parameters at all levels: Agency, ACTBL UIC, and UIC.
- **ACTBL UIC** – Level below Agency. Controls the ability to set parameters at the ACTBL UIC and UIC levels. This is an administrative level only. Assets do not exist at this level.
- **UIC** – Lowest level, below ACTBL UIC. Physical assets and their associated information reside at this level.

There are two types of Inventory Management Plans:

- **General** – Non-sensitive Plant, Property and Equipment (PP&E) assets.
- **Sensitive** – Assets that require special control and accountability.

The Inventory Management Plan is modified before the designated End Date. Modifying an existing plan may result in changes to the inventory dates.

Note

Attempting to initialize an inventory prior to the establishment of the plan prompts the error message: *No Inv Plan for UIC Cannot generate Inv* to display. Contact the Agency Coordinator to setup an Inventory Management Plan.

Navigation

1. In the Search Criteria panel, narrow the results by entering one or more of the following optional fields:.

- Use to select the Level.
- Use to select the Type.

2. Select Search. *The **Inventory Management Plan Update Search Results** page appears.*

Helpful Tip

DoD directives state that a sensitive inventory must be completed annually. Sensitive items on such an inventory are designated by certain CIIC (Controlled Item Inventory Code) and Pilferable Codes.

Please refer to glossary terms for further guidance. Sensitive items require storage, shipment, and safeguarding sensitive inventory items, controlled substances and pilferable items of supply.

Refer to DoD Instruction 5000.64, *Accountability and Management of DoD-Owned Equipment and Other Accountable Property*, November 2, 2006.
http://www.dtic.mil/whs/directives/corres/html/500064.htm.

Search for an Inventory Management Plan — Results

Overview

The Inventory Management Plan Update Results process provides the ability to select specified level entries to update the inventory management plan. Custodians with open inventories do not appear on the page. The search results are based according to Update access level.
The Inventory Management Plan Search Results page displays as follows:

- The Inventory Management Plan at the Agency level displays one result. There is only one Agency level plan per Plan Type.
- The Inventory Management Plan at the ACTBL UIC or UIC levels displays multiple Update entries. There is a plan for each activity at the selected level within the Agency. Results are based on the user's access to the activity. Inventory plans for Accountable UIC / UICs which the user does not have access to does not display.

Navigation

Inventory > INV MGT Plan > Search Criteria > Search > Inventory Management Plan Update Search Results page

Search for a Custodian Inventory Request — Criteria

Overview

The Property Accountability module Request Custodian Inventory process provides the ability to request a custodian inventory.

This process is used for both manual and automated inventories. Requesting a Custodian Inventory allows the inventorying of one or more Major Custodians. When an inventory is initialized, an Inventory Number is created to track the inventory from "cradle to grave" for managing purposes.

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Navigation

Inventory > Generate Inventory > Custodian > Request Custodian Inventory Search Criteria page

Page Fields

The following fields display on the **Request Custodian Inventory Search Criteria** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
4	When "Search" button is selected all fields are optional, enter data to limit number of rows retrieved.

13	Select "Reset" button to clear data.

Search for a Cyclic Inventory Request — Criteria

Overview

The Property Accountability module Request Cyclic Inventory process provides the ability to request a Cyclic Inventory.
The process is used for both manual and automated inventories. An Agency Coordinator is responsible for creating a Cyclic Inventory Management Plan containing the parameters for the Cyclic Inventory. Cyclic Inventories are managed at the UIC level. On the UIC level, the user decides whether to inventory a portion of the assets in each location within the UIC or a portion of the assets within each Custodian of the UIC.

Search for a Location Inventory Request — Criteria

Overview

The Property Accountability module Request Location Inventory process provides the ability to request a location inventory. The inventory is grouped by the physical location of assets. When an inventory is initialized, an Inventory Number is created to track the inventory from "cradle to grave" to help manage the inventory. This process is used for both manual and automated inventories.

Navigation

Inventory > Generate Inventory > Location > Request Location Inventory Search Criteria page

Search for a Sensitive Inventory Request — Criteria

Overview

The Property Accountability module Request Sensitive Inventory process provides the ability to request a Sensitive Inventory.
A Sensitive Item Inventory is the physical count of items identified by a specific service as sensitive (e.g., firearms, ammunition, night vision devices navigation systems (GPS, and some items that are identified as pilferable). The inventory process is completed by manual or automated inventories. The Controlled Inventory Item Code (CIIC) indicates the security classification of assets. When an inventory is initialized, an Inventory Number is created to track the process from "cradle to grave" to help manage the inventory.

Note

Sensitive assets are determined by CIIC = 1, 2, 3, 4, 5, 6, 8, 9, P, N, Q, R, Y, $. The UIC Inventory Management Plan designates Pilferable assets to be included in the Inventory. Pilferable assets are determined by a CIIC = I, J, M, V, W, X, Z or identified as Pilferable on asset record. Contact the Agency Coordinator for additional information regarding the Inventory Management Plan created for sensitive assets.

ELMS Navigation Helpful Tips

Click the following link to display PA Navigation Tips.

Search for a Custom Inventory Request — Criteria

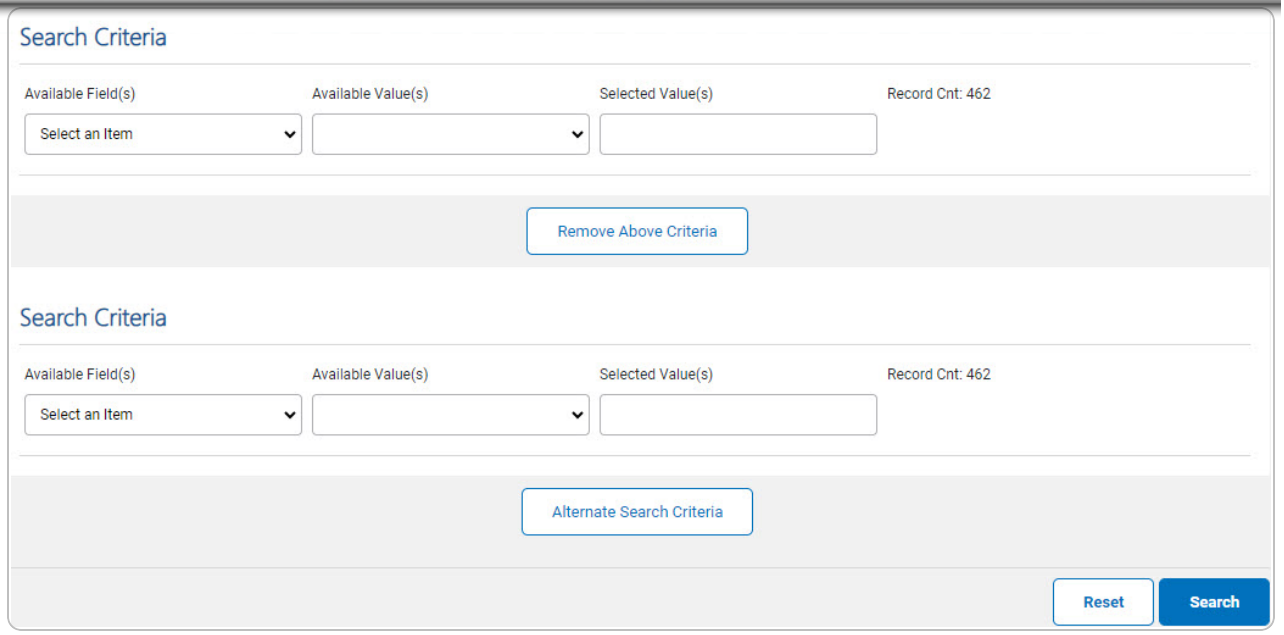
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria panel, narrow the results by entering one or more of the following optional fields:.

- Use ⌄ to select the Available Field(s).
- Use ⌄ to select the Available Value(s).
- *The Selected Value(s) automatically populates and is not editable.*

Helpful Tip

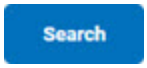


Use "wildcard characters" (percent sign [%], greater than [>] or less than [<] symbols) to refine the search. For example, if *Item Description* is selected in the Available Field(s) and *%LAPTOP%* is entered in the Selected Value(s) field, the process retrieves all records with the word *LAPTOP* in any part of the Item Description.

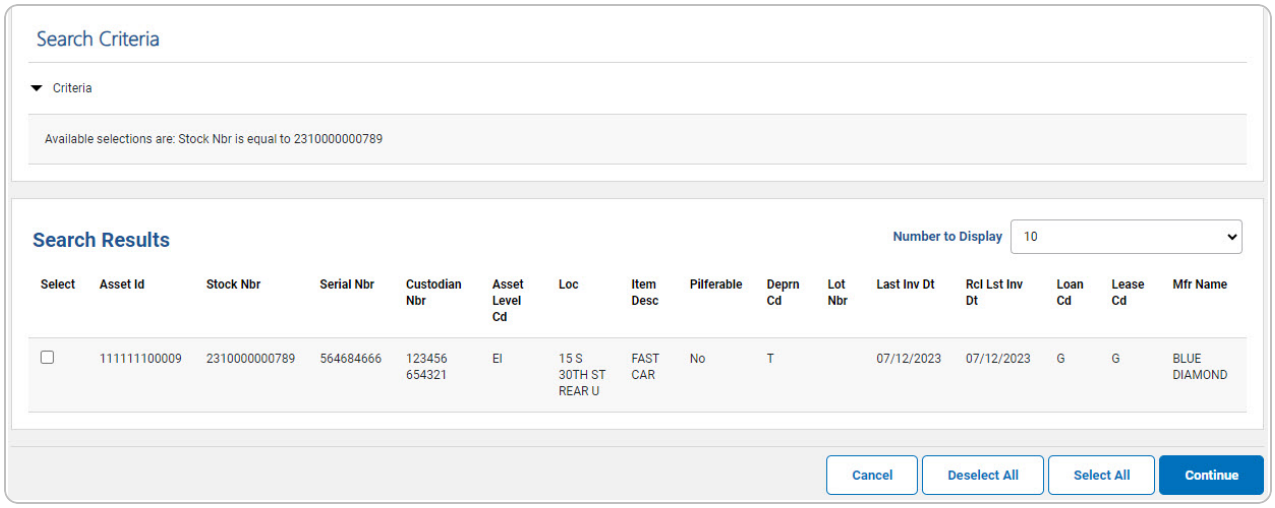
- *The Record CNT automatically populates and is not editable.*

Attention

As selections are made, a running count of Search Results display in the Record Count. This represents the total number of assets that are accessible for inventory or inquiry. As specific values are selected, the Record Count shows how many assets meet the criteria.



2. Select Alternate Search Criteria. *An Alternate Search Criteria grid appears.*



3. *Repeat the Search Criteria steps.*

4. Select 

. *The Above Search Criteria grid is removed and not included in the Search Criteria.*

5. Select 

. *The* ***Request Custom Inventory Search Results*** *page appears.*

Search for the Print AIT Labels — Criteria

Overview

The Property Accountability module Print AIT Labels process provides the ability to print out labels that are used by Portable Data Collection Devices (PDCDs) to scan and identify a specified part of an inventory.

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Labels can be printed for:

- A single asset, or a range of assets
- A specific custodian, or a range of custodians
- A STOCK NBR, which means every SERIAL NBR for that STOCK NBR
- A single location, or a range of locations
- A single sub-location, or a range or sub-locations
- Any combination of the above
- Any previously printed labels

There are three ways to specify the labels for printing:

- **ASSET ID** — for ASSET ID, CUSTODIAN NBR, or STOCK NBR labels
- **LOC** — for LOC, SUB LOC, or CUSTODIAN NBR labels
- **Requested** — for any combination of the above, or for previously printed labels.

Helpful Tip

Do **NOT** purchase AIT equipment or supplies without contacting the ELMS Call Center first.

To view the customized ELMSAIT Scanner and Printers instructions, please visit https://ELMSsupport.golearnportal.org.

Install ELMSAIT for Motorola WM 6

Overview

The Portable Data Collection Device (PDCD) Software provides the ability to conduct an inventory with a Motorola scanner using the Windows Mobile operating system.

Note

For Windows 7 to communicate with the scanner, it is necessary to install Windows Mobile Device Center (WMDC). This software is a free download from Microsoft.

Navigation

AIT > PDCD SFTWR Install > PDCD Software Download > PDCD Software Download Results > MTO.CAB file

Page Fields

No page fields have been identified for this process.

Procedures

ELMS Navigation Helpful Tips

Click the following link to display PA Navigation Tips.

Copy the ELMSAIT Software to the PDCD with Windows 7

1. Minimize all programs and windows to view the PC's desktop.
2. Open Windows Mobile Device Center (WMDC).
3. Dock the PDCD.
4. Verify that WMDC shows the PDCD as Connected.
5. Select *Connect without setting up your device*.
6. Select File Management > Browse the contents of your device. *A pop-up window appears.*
7. Select the Root (\) icon.

8. Select the Program Files folder.
9. Copy and Paste the MTO.CAB file into the Program Files folder.

Install the ELMSAIT software

1. Select Start > Programs > File Explorer on the PDCD.
2. Select the My Device folder.

Helpful Tip

If the My Device folder is not available, find the My Documents folder and rename it to My Device.

3. Select Program Files.
4. Double-tap the MTO.CAB file. *The Choose a location to install "SAIC ELMSAitInst" window opens.*

Helpful Tip

There are three installation directories to choose from. Ensure the location is the device directory (normally the default).

5. Tap Install on the bottom left corner. *The software installs.*

Helpful Tip

The PDCD will restart several times during this installation.

4. Verify that WMDC shows the PDCD as Connected.
5. Select *Connect without setting up your device*.
6. Select File Management > Browse the contents of your device. *A pop-up window appears.*
7. Select the Root (\) icon.

8. Select the Program Files folder.
9. Copy and Paste the WM5.CAB file into the Program Files folder.

Install the ELMSAIT software

1. Select Start > Programs > File Explorer on the PDCD.
2. Select the My Device folder.

> **Helpful Tip**
> If the My Device folder is not available, find the My Documents folder and rename it to My Device.

3. Select Program Files.
4. Double-tap the WM5.CAB file. *The Choose a location to install "SAIC ELMSAitInst" window opens.*

> **Helpful Tip**
> There are three installation directories to choose from. Ensure the location is the device directory (normally the default).

5. Tap Install on the bottom left corner. *The software installs.*

> **Helpful Tip**
> The PDCD will restart several times during this installation.

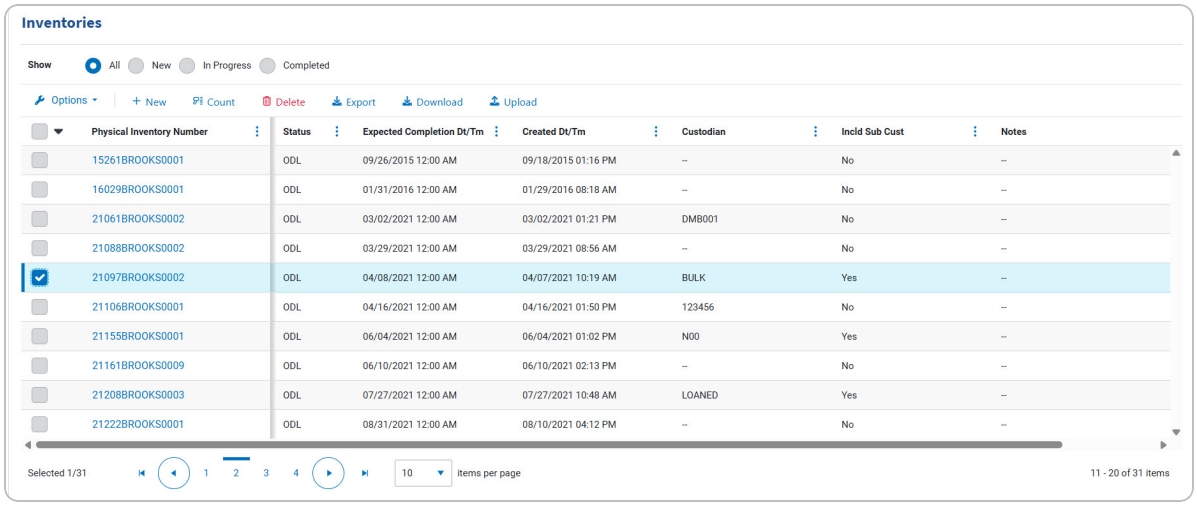
Create a Physical Inventory

Selecting Cancel *at any point of this procedure removes all revisions and closes the page. Selecting* Back *retains the information and returns to the previous page.* ***Bold*** *numbered steps are required.*

1. In the Profile Information panel, enter the following fields:.

Helpful Tip



Scanning a CAC auto-fills all fields.

A. Enter the First Name in the field provided. *This is a 50 alphanumeric character field.*

B. Enter the Last Name in the field provided. *This is a 50 alphanumeric character field.*

C. Enter the USER ID in the field provided. *This is an 8 alphanumeric character field.*

2. Select Save. *The **Inventories** panel appears.*

3. Select + New. *The **New Inventory** page appears.*

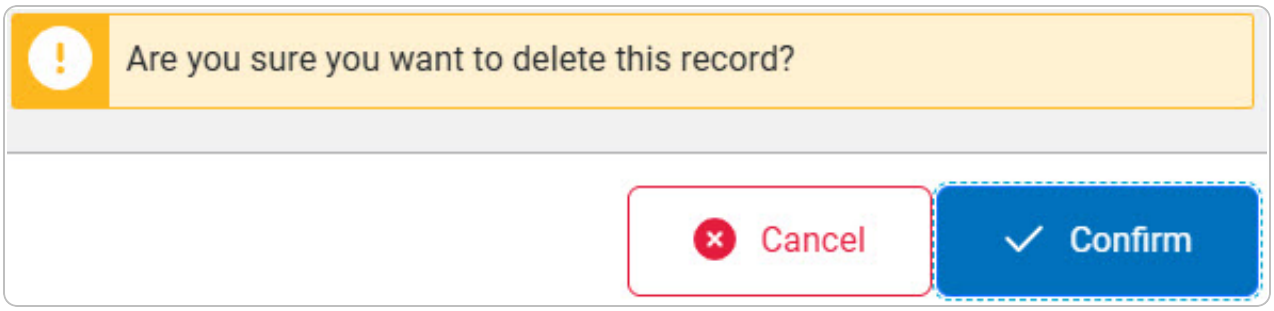
Update a Physical Inventory

1. Click ☐ to select the entry. *The Physical Inventory Number is highlighted, and* Count, Delete, Export, Download, *and* Upload *become available.*

Note

Count, Delete, Export, Download, and Upload become available depending on the status of the Physical Inventory Number.

2. Select Count. *The **Count Inventory** page appears.*



Delete a Physical Inventory

1. Click ☐ to select the entry. *The Physical Inventory Number is highlighted, and* Count, Delete, Export, Download, *and* Upload *become available.*

Note

Count, Delete, Export, Download, and Upload become available depending on the status of the Physical Inventory Number.

2. Select Delete. *The **Count Inventory** page appears.*

3. Select Confirm. *The selected record is removed from the **Inventories grid**.*

View the Physical Inventory Detail

1. Select the Physical Inventory Number hyperlink. *The **Items Counted** slide-out window appears on the right.*

Export the Physical Inventory

1. Click to select the entry. *The Physical Inventory Number is highlighted, and Count, Delete, Export, Download, and Upload become available.*

Note

Count, Delete, Export, Download, and Upload become available depending on the status of the Physical Inventory Number.

2. Select Export. *Follow the prompts provided by the computer or device.*

Download the Physical Inventory

1. Click ☐ to select the entry. *The Physical Inventory Number is highlighted, and* Count, Delete, Export, Download, *and* Upload *become available.*

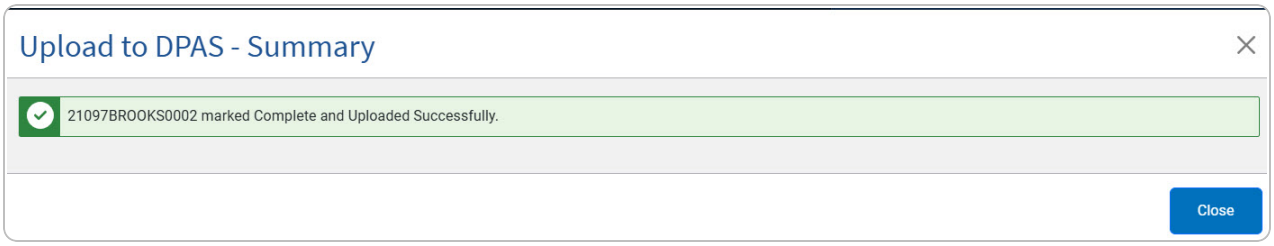
Note

Count, Delete, Export, Download, and Upload become available depending on the status of the Physical Inventory Number.

2. Select Download. *The selected physical inventory content is downloaded to the computer or device, and the status of the inventory is updated to "Open Downloaded".*

Helpful Tip

Use the Download feature if the inventory is conducted in a location with limited internet connectivity.



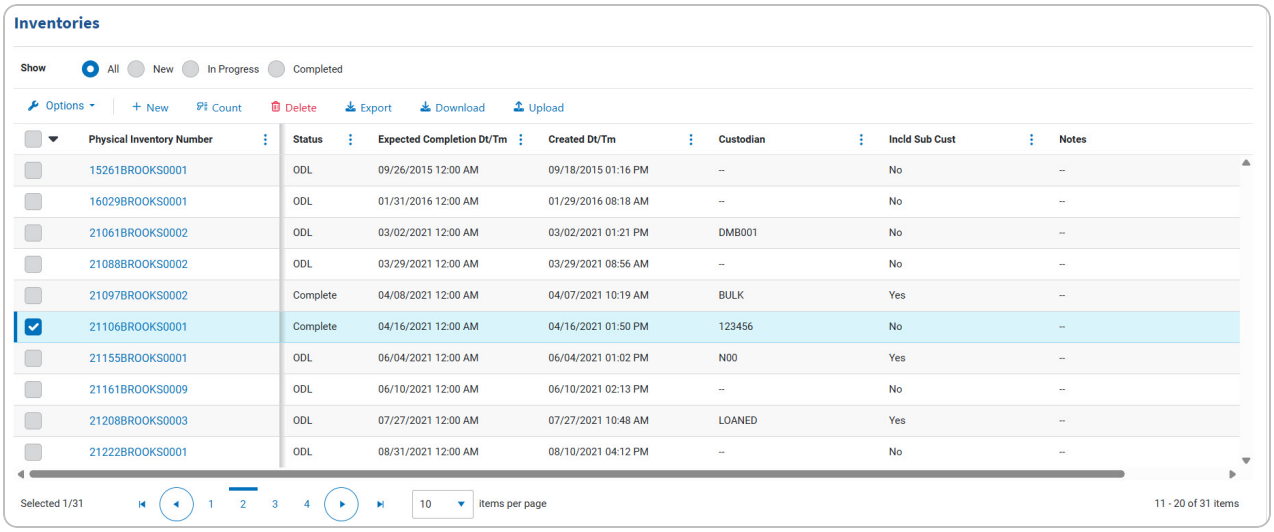
Upload the Physical Inventory

1. Click ☐ to select the entry. *The Physical Inventory Number is highlighted, and* Count, Delete, Export, Download, *and* Upload *become available.*

Note

Count, Delete, Export, Download, and Upload become available depending on the status of the Physical Inventory Number.

2. Select Upload.



appears .

Helpful Tip

Use the Upload feature if the inventory was conducted in a location with limited internet connectivity and needs to be imported into the server.

3. Select Close. *The **Inventories** grid reappears and the selected Physical Inventory Number is uploaded to the server.*

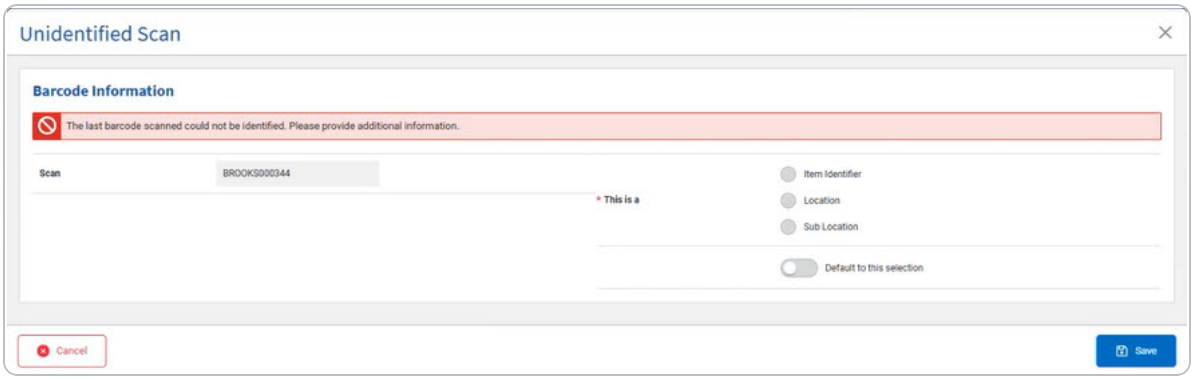
Add a Count Inventory - Single Item Entry

1. Select Save. *The **Count Inventory** page appears.*

Helpful Tip

Select ← Inventory List. *The **Physical Inventory** page appears.*



A. Enter the Location in the field provided. *This is a 20 alphanumeric character field.*

B. Enter the SUB LOCATION in the field provided. *This is a 20 alphanumeric character field.*

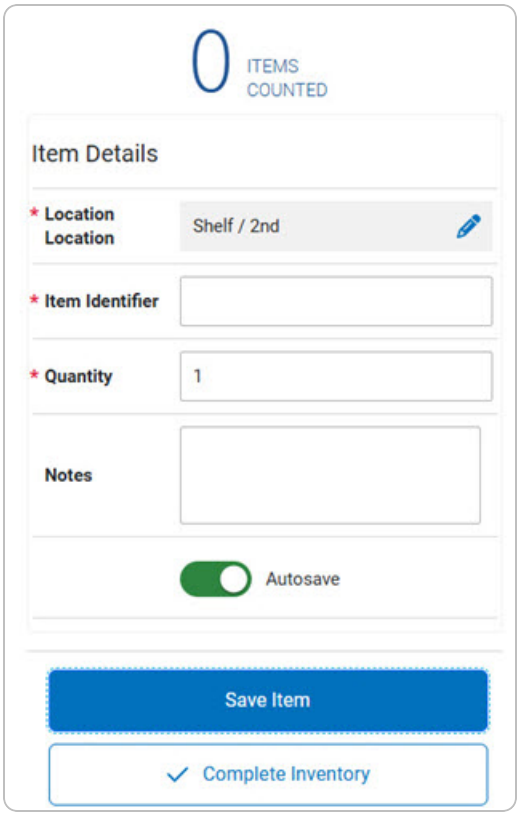
C. Select Save Location. *Additional fields appear. Enter the additional fields **or** start scanning items using the device scanner.*

Scanner - Count Inventory

Note

The **Unidentified Scan** pop-up window only appears during the first scan of an asset in PA.

A. *Verify the Scan.*



B. Select This is a. *When selected, this identifies the item being scanned.*

C. Click to select the Default to this selection. *When selected, the scanned items will default to the selection made under the "This is a" field.*

D. Select Save. *The **Unidentified Scan** pop-up window closes, the **Items Counted** grid re-appears, and the selections are applied to the selected asset and as a preference for future assets.*

E. Continue to scan items as needed.

Manual - Count Inventory

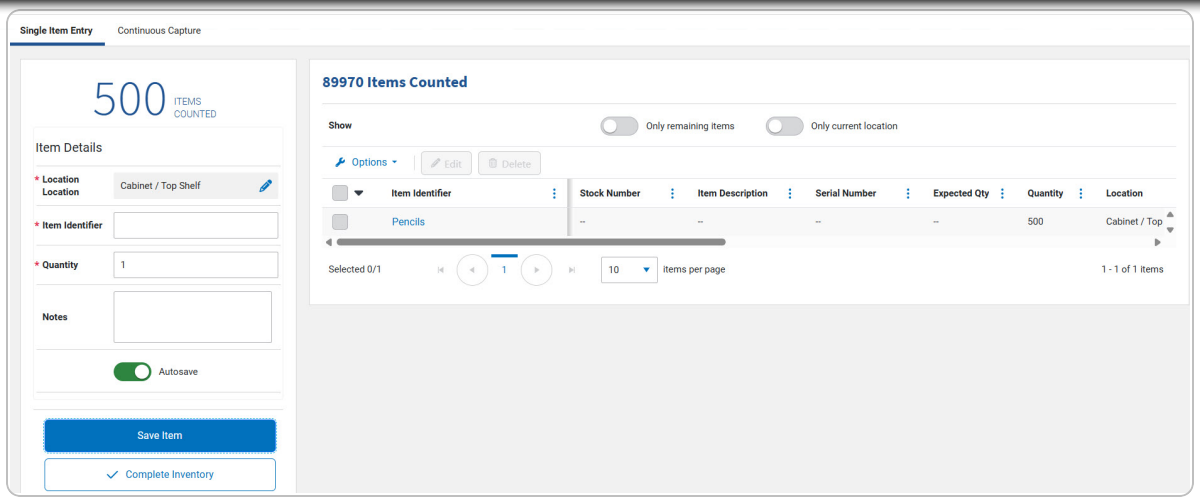
Note

Select . *The **Location and Sub Location fields** appear for editing.*

Select 

. *The **Item Details grid** appears with additional fields. Repeat Steps D-H to add additional items to the Counted Inventory.*

A. Enter the Item Identifier in the field provided. *This is a 20 alphanumeric character field.*



B. Enter the Quantity in the field provided. *This is a 6 numeric character field.*

C. Enter the Notes in the field provided. *This is a 256 alphanumeric character field.*

D. Click  to select the Autosave. *When selected, the entered items are auto-matically save.*

E. Select 

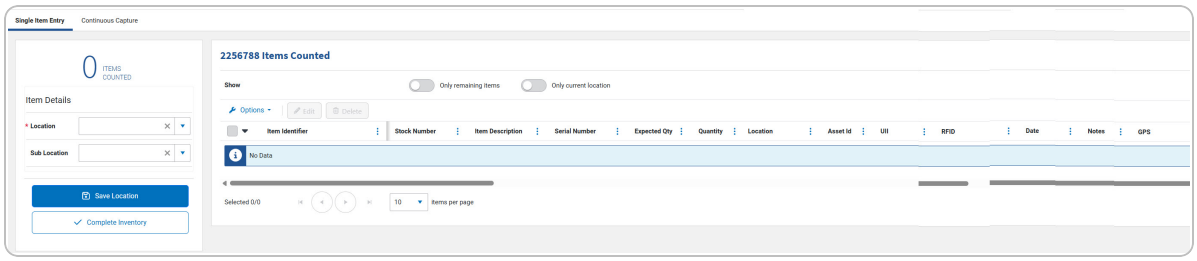
. *The entered inventory appears on the right in the Items Counted grid.*

Note

In the Items Counted grid, click  to select the Only remaining items. *When selected, this shows only remaining inventory items.*

Click  to select the Only current location. *When selected, this shows only inventory items at the current location.*

F. Repeat Steps A-H as needed to add additional inventory.

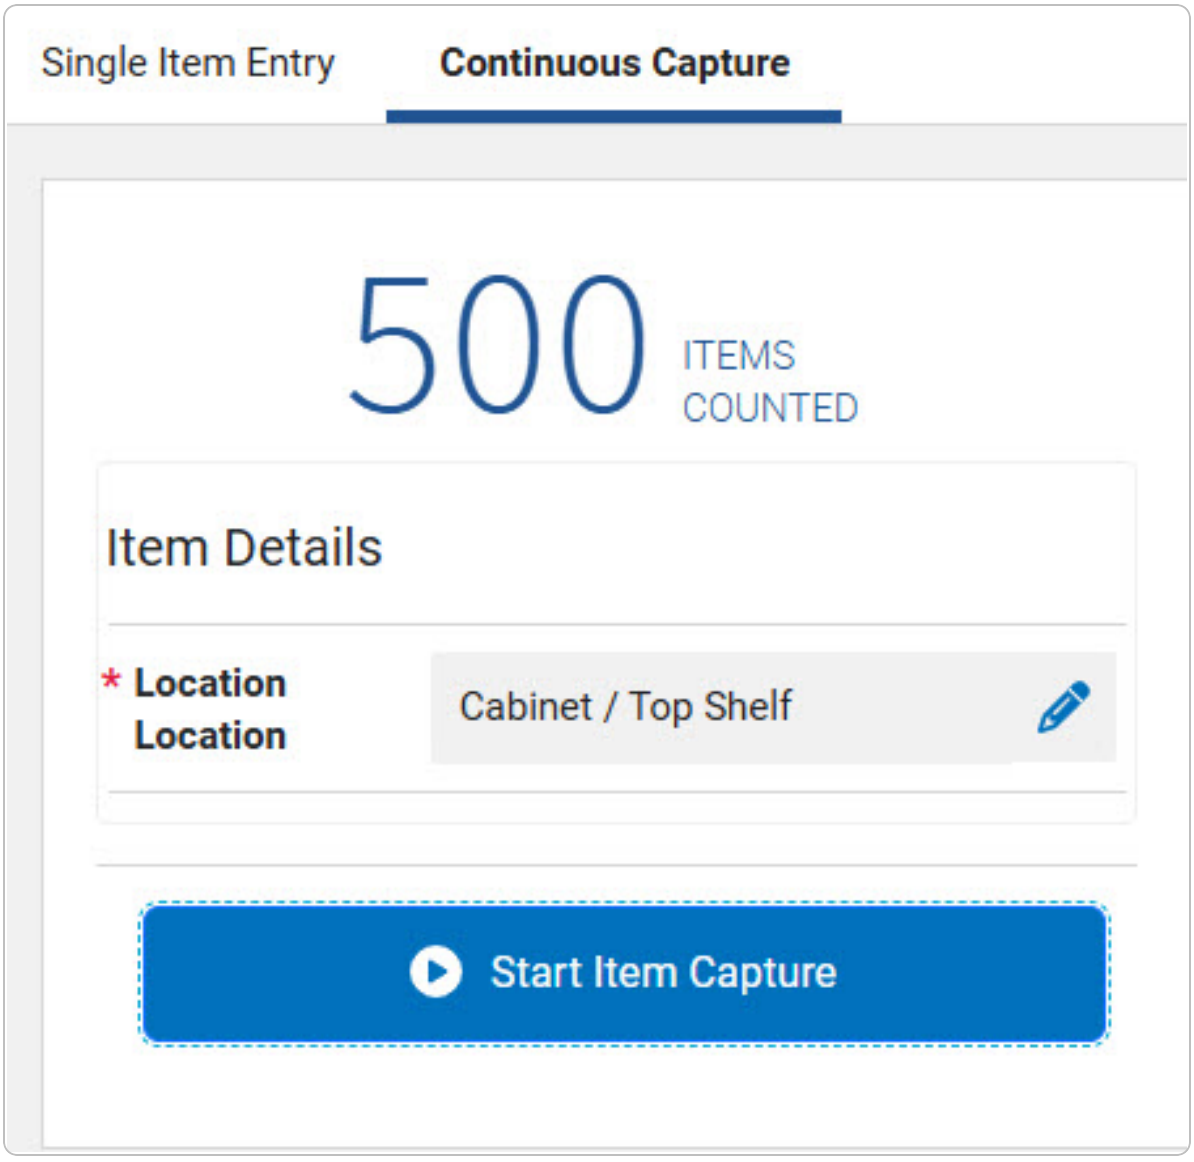


G. Select . *The **Physical Inventory** page appears.*

Add a Count Inventory - Continuous Capture

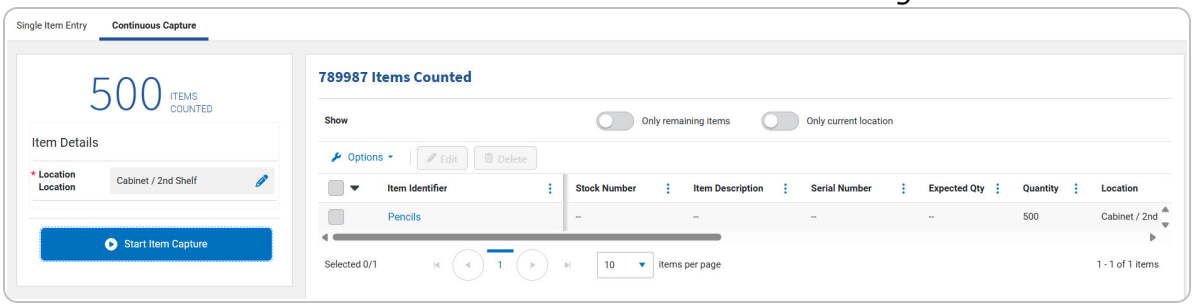
1. Select . *The **Count Inventory** page appears.*

Helpful Tip



Select . *The **Physical Inventory** page appears.*

A. Enter the Location in the field provided. *This is a 20 alphanumeric character field.*



B. Enter the SUB LOCATION in the field provided. *This is a 20 alphanumeric character field.*

C. Select Save Location. *The Location fields combine and* Start Item Capture *appears.*

D. Select Start Item Capture. *Start scanning the Inventory items using the handheld device. Scanned items will appear on the right side in the Item Counted grid and the*

0 Items Counted will increase on the left side in the Item Details grid.

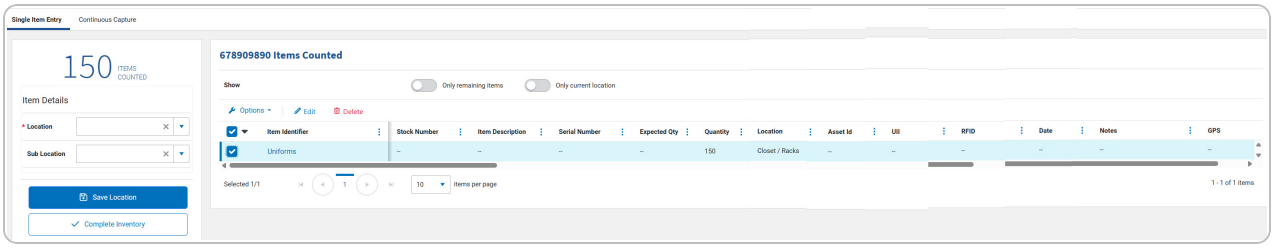
Note

In the Items Counted grid, click to select the Only remaining items. *When selected, this shows only remaining inventory items.*

Click to select the Only current location. *When selected, this shows only inventory items at the current location.*

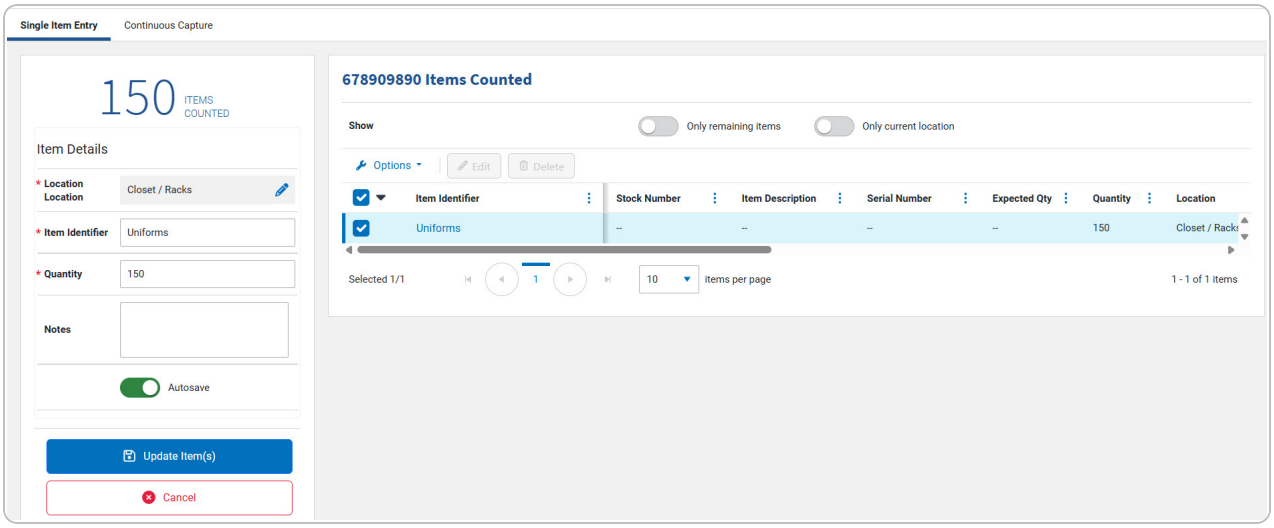
E. Select Stop Item Capture. *Select once the scanning is complete. The scanned items appear in the Items Counted grid.*

F. Repeat Steps A-D as needed to add additional inventory.



G. Select Complete Inventory. *The **Physical Inventory** page appears.*

Update a Count Inventory - Single Item Entry



1. Click to select the entry. *The Item Identifier is highlighted, and* Edit *and* Delete *become available.*

Helpful Tip

Select ← Inventory List. *The **Physical Inventory** page appears.*

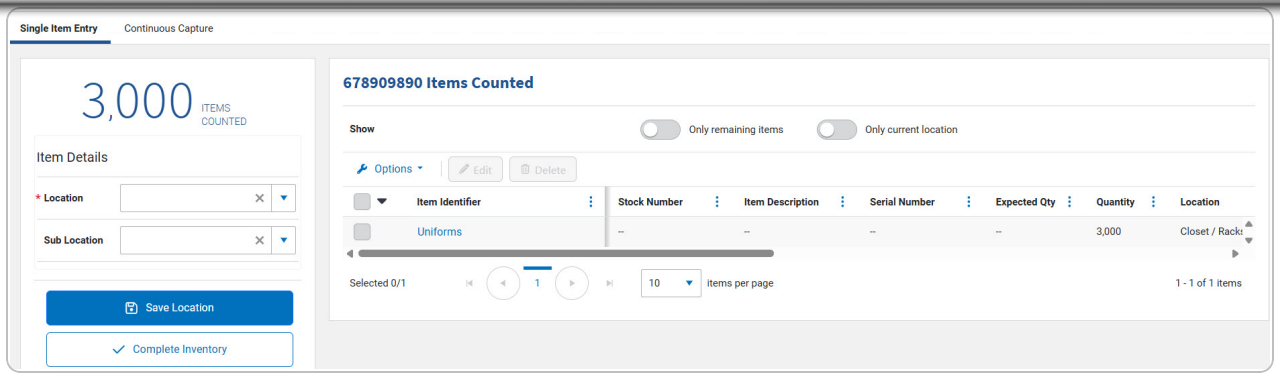
2. Select Edit. *The selected Item Identifier information appears on the left in the Item Details grid and additional fields appear.*

Note

Select . *The **Location and Sub Location fields** appear for editing.*

Select Save Location. *The **Item Details grid** appears with additional fields. Repeat Steps 5-8 to add additional items to the Counted Inventory.*

3. Update the Location, entering the revised location in the field provided. *This is a 20 alpha-numeric character field.*



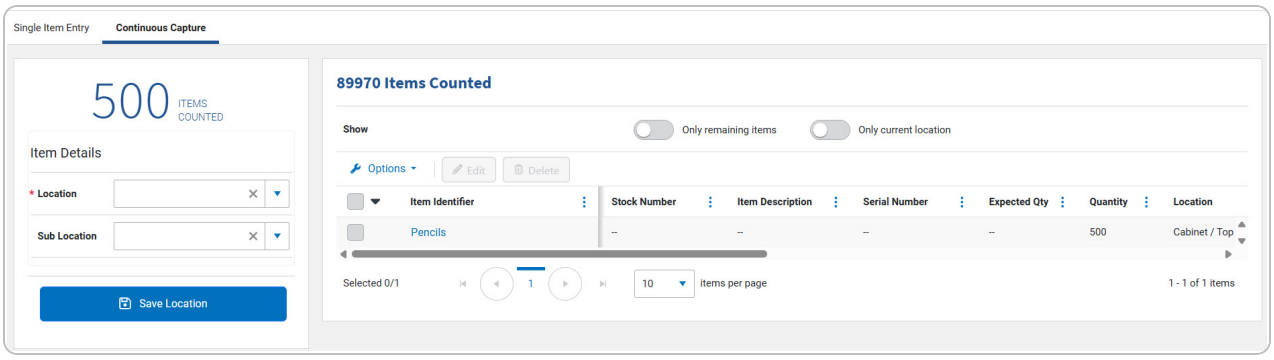
4. Update the Item Identifier, entering the revised Item Identifier in the field provided. *This is a 20 alphanumeric character field.*

5. Update the Quantity, entering the revised quantity in the field provided. *This is a 6 numeric character field.*

6. Update the Notes, entering the revised notes in the field provided. *This is a 256 alpha-numeric character field.*

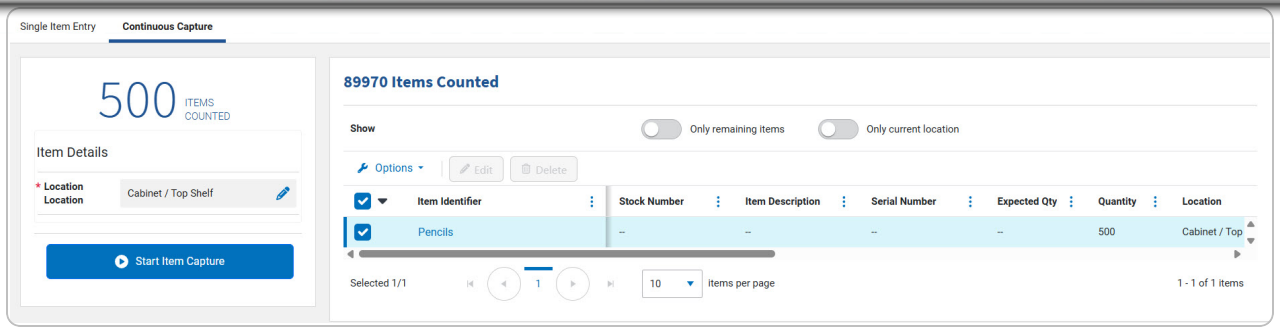
7. Verify the Autosave contains the appropriate or . *When selected, the entered items are automatically save.*

8. Select Update Item(s). *The updated Items Counted changes to the quantity entered and the updated information appears in the Items Counted grid.*



9. Select Complete Inventory. *The **Physical Inventory** page appears and the updated Count Inventory appears in the Physical Inventory grid.*

Update a Count Inventory - Continuous Capture



1. Click ☐ to select the entry. *The Item Identifier is highlighted, and* Edit *and* Delete *become available.*

Helpful Tip

Select ← Inventory List. *The **Physical Inventory** page appears.*

2. Select Edit. *The selected Item Identifier information appears on the left in the Item Details grid and additional fields appear.*

3. Select  to edit the Location/Location, entering the revised location in the field provided. *This is a 20 alphanumeric character field.*

Note

 Select . *The **Location and Sub Location fields** appear for editing.*

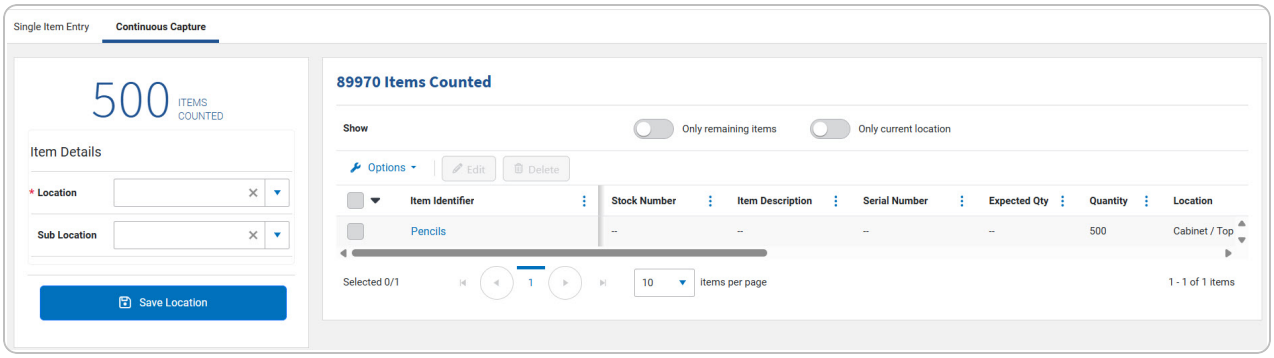
Update the Location, entering the revised location in the field provided. *This is a 20 alpha-numeric character field.*

Update the Sub Location, entering the revised Item Identifier in the field provided. *This is a 20 alphanumeric character field.*

Select . *The **Item Details grid** appears with additional fields.Repeat Steps 5-8 to add additional items to the Counted Inventory.*

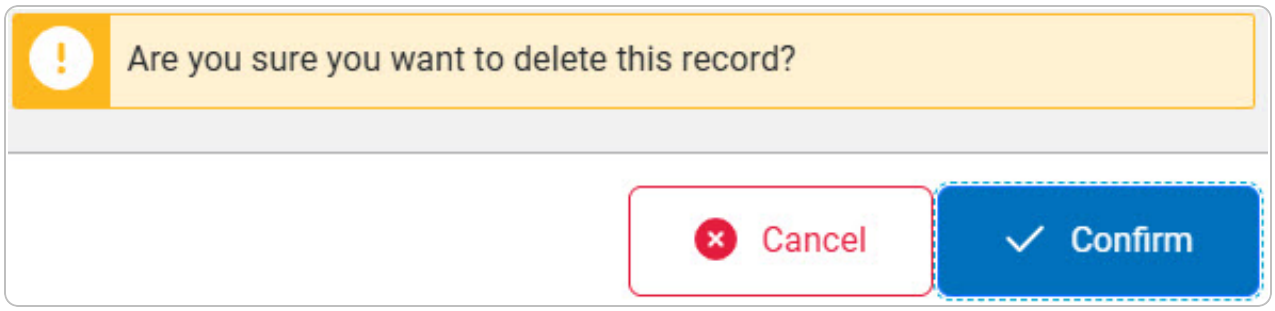
4. Select . *Start scanning the Inventory items using the handheld device. Scanned items will appear on the right side in the Item Counted grid and the 0 Items Counted will increase on the left side in the Item Details grid.*

5. Select Stop Item Capture. *Select once the scanning is complete. The scanned items appear in the Items Counted grid.*
6. Repeat Steps 5-6 as needed to add additional inventory.
7. Select Complete Inventory. *The **Physical Inventory** page appears and the updated Count Inventory appears in the Physical Inventory grid.*



Delete a Count Inventory

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*

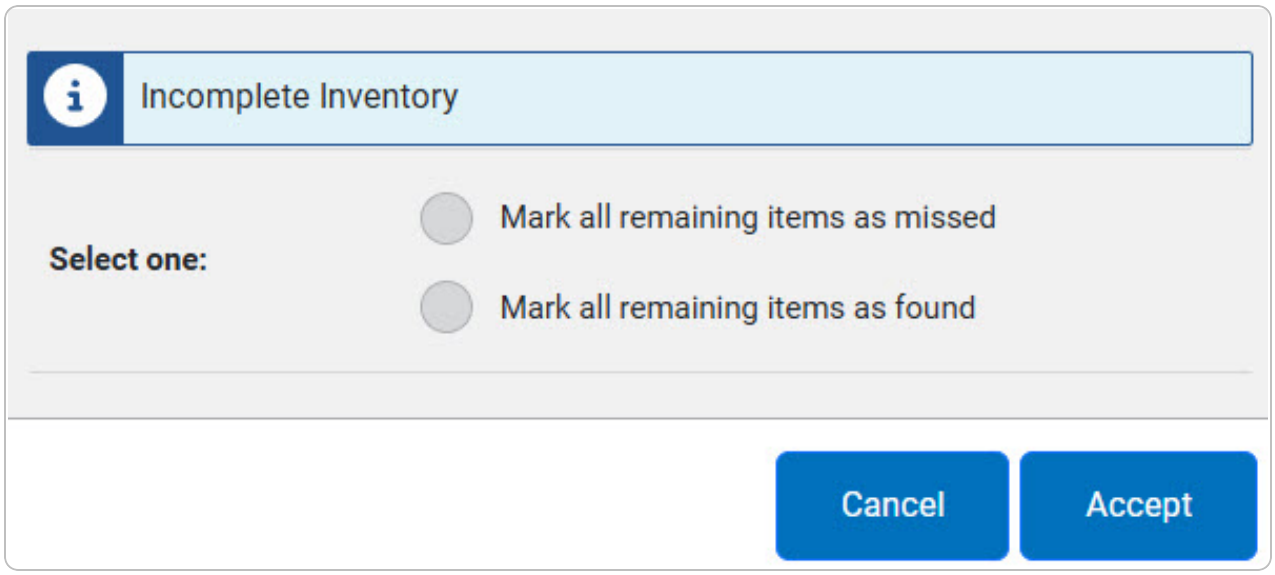


1. Click ☐ to select the entry. *The Item Identifier is highlighted, and* Edit *and* Delete *become available.*

Helpful Tip

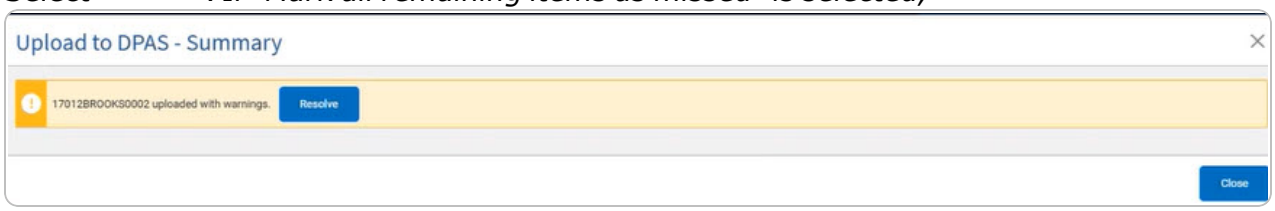
Select ← Inventory List. *The* ***Physical Inventory*** *page appears.*

2. Select Delete. *The* ***Count Inventory Delete*** *pop-up window appears.*



3. Select Confirm. *The selected record is removed from the* ***Count Inventory grid*** *and the* ***Item Counted total*** *decreases by the count number of the selected inventory.*

Resolve an Incomplete Inventory



Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*

1. Select Complete Inventory. *The **Incomplete Inventory** pop-up window appears.*

2. Select . *If "Mark all remaining items as missed" is selected, this indicates the remaining items are missing and does not match the count. If "Mark all remaining items as found" is selected, this indicates the items have been found and counted.*

3. Select Accept. *If "Mark all remaining items as missed" is selected,*

appears.

4. Select Resolve. *The **Physical Inventory Resolution** page appears*.

AIT Overview

Overview

The Property Accountability module Automatic Identification Technology (AIT) process provides the ability to perform an inventory using a scanner, instead of by hand.

Navigation

AIT >

Overall Flow

The AIT process has a very specific start and a very specific end. This overview contains all the AIT processes, but not all inventories include every process.

1. **Setup**

PDCD Sftwr Install

Download the appropriate software so ELMS can interact with the PDCD.

Label Format

Design and create the labels for the inventory process.

Attention

Please contact the ELMS Call Center to assist with creating and loading a logo to a Zebra or Intermec printer. Do not select Dwnld ELMS Logo until after this phone call.

Print Labels

Print the labels to use during the inventory process.

2. **Inventory**

Generate Inventory

Prepare the inventory on the computer in ELMS.

Download to PDCD

Send the inventory from the computer to the scanner.

Perform the Inventory

Scan the assets to be included in the inventory.

Upload from PDCD

Send the inventory from the scanner to the computer.

3. **Reconciliation**

Print the Reconciliation Report

View the inventory in relation to all the different reconciliation statuses.

Search for a Cost Center — Criteria

Overview

The Property Accountability module Cost Center provides the ability to search, add, update, and delete Cost Center records. Cost Centers are established by the Unit Identification Code (UIC) and is considered a subordinate organization to a UIC. Cost Centers are used to identify the current holder/owner of the asset, fund the purchase of the asset, and when applicable, identify the Cost Center charged the Depreciation expense.

For Cost Centers that are maintained by other external systems, ELMS provides limited updates of the record. Users are not be able to:

- Mark a Cost Center as frozen.
- Change the effective dates.
- Attempt to update the type of cost center if the Cost Center is assigned to an asset and the change(s) results in the Cost Center being invalid. The process errors for the specific Cost Center and provides the reason why the update is not made.

The format and use of the Cost Center is controlled by the asset's reporting Accounting System. ELMS obtains the Cost Center validation requirements by the appropriation assigned to the asset (using the appropriation to obtain the accounting system).

Navigation

Search for a Reports/Forms Message — Criteria

Overview

The Property Accountability module Reports/Forms Message process provides the ability to create a message to display on reports and/or forms generated in ELMS. Each message built can be updated or deleted. For example, the user can create a message on a **DD-1348-1a** or an Inventory report to display at the bottom of the report or form. Users have the option to add the information for an Add action on the Search Criteria page but cannot process the Add on this page.

Navigation

Master Data > Report/Form Message > Reports/Forms Message Search Criteria page

Page Fields

The following fields display on the **Reports/Forms Message Search Criteria** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
178	Search will use ACTBL UIC displayed in the header.
27	A wild card is permitted using percentage (%).

Search for a Contract

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
***Bold** numbered steps are required.*

1. In the Search Criteria panel, narrow the results by entering one or more of the following optional fields:.

- Use to select the Contract Use Cd.
- Use to select the Contract Type Cd.
- Enter the CONTRACT NBR in the field provided. *This is a 50 alphanumeric character field.*

Note

The CONTRACT NBR requirements vary based on the selected Contract Type CD.

- Use to select the Contractor.
- Enter the Delivery Order Number in the field provided. *This is an 11 alphanumeric character field.*

2. Select Search. *The **Contract Search Results** page appears. Results display in the Search Results grid.*

Search for a Document Number Range — Criteria

Overview

The Property Accountability module Document Number Range process provides the ability to create and view Document Number Ranges.
Document numbers are unique numbers either automatically assigned by Web ELMS or manually assigned by the user to track a Requisition. They are used for transaction tracking purposes. Additionally, they are used to group assets together when printing Web ELMS forms.

Navigation

Add a Document Number Range

Overview

The Document Number Range Add process provides the ability to create new Document Number Ranges. Creating the Document Number Range allows the ability to create automated document numbers. Document Number Ranges can be from 1 to 9999 and must not overlap. Document Number Ranges start over every day and should anticipate the maximum number of transactions in a day.
Common descriptions for Document Number Ranges include:

- Increases
- Dispositions
- Updates
- Transfers
- DRMO Turn In
- Turn In
- CIP

Search for a Batch Activity Review — Criteria

Overview

The Property Accountability module Batch Activity Review process provides the ability to monitor and manage jobs that have been submitted for scheduled execution. The transactions submitted for processing are known as a Batch or a Scheduled Program. An example of a Batch process is a STK NBR Mass Change/Update. In this process, the STK NBR To and the STK NBR From type process creates a Batch transaction.

Search for Appropriation Data — Criteria

Overview

The Property Accountability module Appropriation Data process provides the ability to create or remove a FUND CD/Allotment Serial Number (ASN) record for each Unit Identification Code (UIC) established on the UIC table.
The UIC, Fund Code, and Allotment Serial NBR combination in ELMS forms the basis for an Asset Trial Balance. When required, the Asset Trial Balance generates at the program year and possibly at the Budget Line Item level. This capability is available when adding the Program Year and Program/Project fields to ELMS. The mass change of the FUND CD/ASN is available for all assets.

Navigation

Master Data > Appropriation > Appropriation Data Search Criteria page

Search for Appropriation Data — Results

Overview

The Appropriation Data Results process provides the ability to select a FUND CD and/or Allotment Serial Number (ASN) for updating or deleting.
When multiple FUND CD and/or Allotment Serial Number (ASN) records are selected, a mass transaction is generated.

Helpful Tip

There may be several pages returned from the Search Criteria. To page through the results, select the page number at the bottom of the page. The information is sorted in ascending order.

Navigation

Master Data > Appropriation > Search Criteria > Search > Appropriation Data Search Results page

Page Fields

The following fields display on the **Appropriation Data Search Results** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
70	To mass update "FUND CD/ASN" select only one "FUND CD/ASN".
71	Select Check Box next to record for "Update" or "Delete" or "Select All" button for mass actions.

14	Select "Cancel" button to return to previous page.

Update Appropriation Data

Overview

The Appropriation Data Update process allows editing of the appropriation data assigned to an asset(s). All personal property assets, ancillary costs, improvements, real property assets, and/or Construction In Progress (CIP) Project records are affected by the appropriation change. When changing to a new appropriation, the new appropriation record must first be established.

Note

Only personally created records display all fields for updating. If at least one active asset is associated with the record(s) to be updated, only the following fields are available for editing:

- SVCG ACTIVITY CD
- Remarks
- History Remarks
- Status

Navigation

Master Data > Appropriation > Search Criteria > Search > Search Results > ☐ (desired record) > Update > Selected Rows > Continue > Appropriation Data Update page

Page Fields

The following fields display on the **Appropriation Data Update** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
69	FUND CD or ASN cannot be deleted if there are assets associated

	with FUND CD/ASN.
72	If "INTRF SYS CD" is DBMS or e-Biz, ASN is mandatory.
14	Select "Cancel" button to return to previous page.

Search for a MAINT GROUP ID — Criteria

Overview

The Property Accountability module MAINT GROUP ID process provides the ability to identify assets for maintenance or utilization. When a new stock number is cataloged, the cataloger must associate a Maintenance Group with the Stock Number. Since the Maintenance Group is associated a Stock Number, the Maintenance Groups must be maintained at the Catalog Name level (a set of Maintenance Groups/Catalog).
Maintenance Groups are subsequently associated with a UIC and Maintenance Activity or to a UIC and External Maintenance Interface. This allows for identifying what activity is providing maintenance or utilization management for the assets that are associated with the Stock Number with a particular Maintenance Group.

Navigation

Master Data > MAINT GRP ID> MAINT GROUP ID Search Criteria page

Page Fields

The following fields display on the **MAINT GROUP ID Search Criteria** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
24	(*) Asterisk identifies mandatory fields.
21	Select "Add" button to create a new record.
12	Select "Search" button to view Search Results page.

13	Select "Reset" button to clear data.

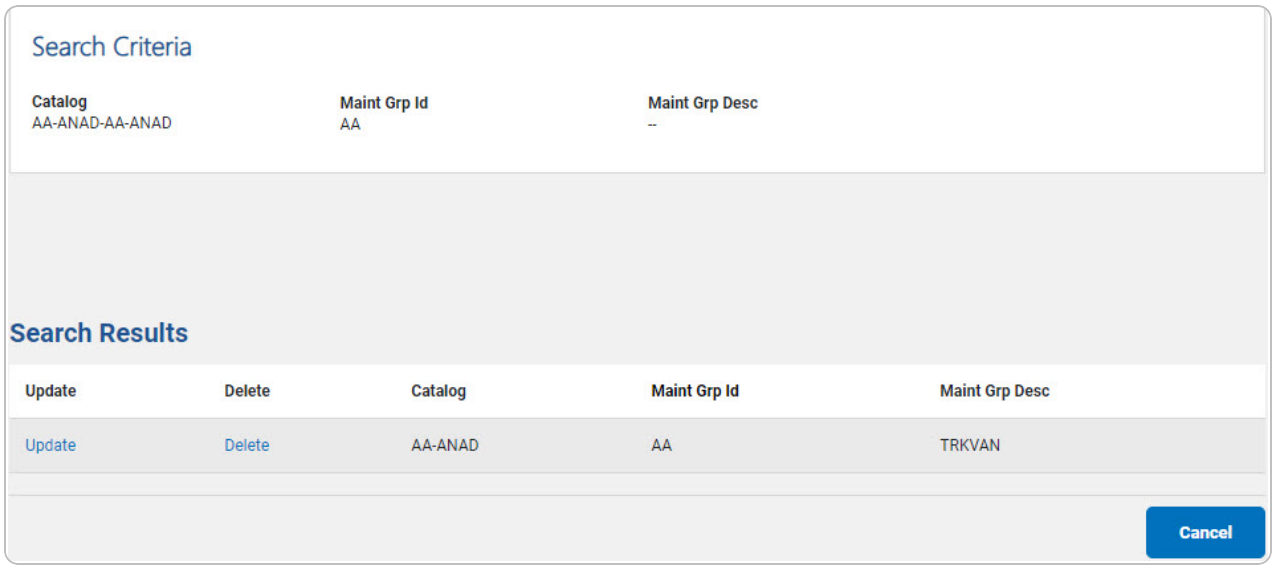
Search for a Maint Group Id — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria panel, narrow the results by entering one or more of the following optional fields:.



- Use ⌄ to select the Catalog.
- Enter the MAINT GRP ID in the field provided. *This is a 2 alphanumeric character field.*
- Enter the MAINT GRP DESC in the field provided. *This is a 25 alphanumeric character field.*

Helpful Tip

A wild card is permitted using the percentage (%) sign when performing a search. Example: MAINT GRP ID of Maint% will find all MAINTENANCE GROUP IDS beginning with the word Maint.

2. Select Search. *The **Maint Group Id Search Results** page appears. Results display in the Search Results grid.*

Add a MAINT GROUP ID:

Select Add. *The **Maint Group Id Add** page appears.*

Search for Location — Criteria

Overview

The Property Accountability module Location process provides the ability to create, update, or delete the physical location of the assets.

Navigation

Master Data > Location > Location Search Criteria page

Page Fields

The following fields display on the **Location Search Criteria** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

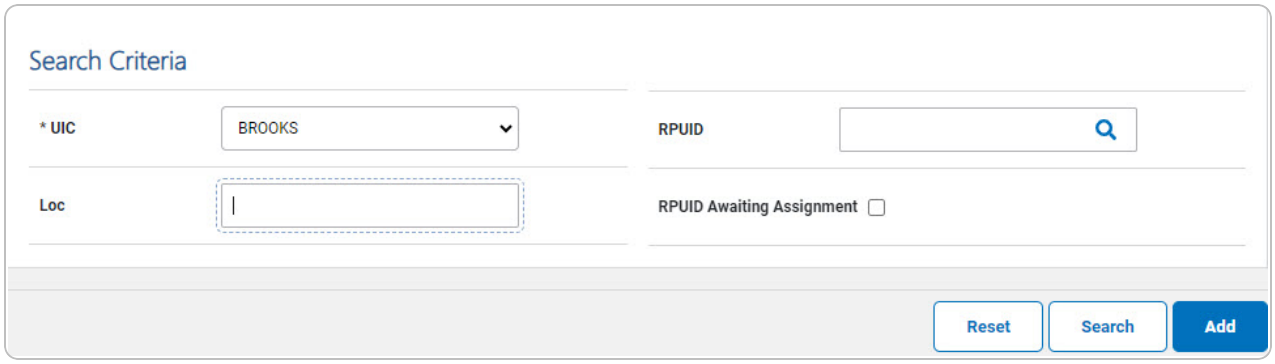
Number	Value
117	Select "UIC" from dropdown list and select "Search".
21	Select "Add" button to create a new record.

Search Criteria Grid

UIC *
Loc
RPUID
RPUID Awaiting Assignment

(*) Asterisk identifies mandatory fields.

Procedures



ELMS Navigation Helpful Tips

Click the following link to display PA Navigation Tips.

Search for a Location

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria panel, narrow the results by entering one or more of the following fields:.

- Use to select the UIC.
- Enter the Loc in the field provided. *This is a 20 alphanumeric character field.*
- Enter the RPUID, or use to browse for the entry. *This is a 18 alphanumeric character field.*

  Location RPUID Browse help
- Click to select the RPUID Awaiting Assignment. *When selected, designates the location is awaiting an assignment.*

2. Select Search. *The* ***Location Search Results*** *page appears.*

Add a Location

Attention

Do Not create multiple location names for a single location.

Search for existing locations first, before adding a new location. This ensures the location does not already exist.

For example, "BLDG 10 SECT 15" and "BLDG 10 SEC 15" appear as two different locations, but reference the same physical space.

1. Use ⌄ to select the UIC.
2. Enter the LOC in the field provided. *This is a 20 alphanumeric character field.*

Note

If the LOC field is left empty, the warning "Loc is mandatory in add mode" appears.

3. Select Add. *The **Location Add** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
13 - Mandatory Entry: *UIC*.	Missing Entry. Enter the appropriate information in the desired field.

2094 - Must be alpha-numeric with supported special characters $, -, /, #, &, ;, (,), comma, period, and space.	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alphanumeric (alphabetic "A" through "Z", numeric "0" through "9") characters, or the following permitted special characters: $, -, /, #, &, ;, (,), comma, period, and space. Special characters like ! or @ are prohibited.
3 - UIC record must be established on the UIC Table.	Invalid Assigned UIC. The entry does not exist in the system. Enter an existing UIC.
7 - Loc must exist on Location Table.	Invalid Entry. The Location entered does not exist. Enter an existing Location to continue.

Search for an ACTBL UIC/UIC — Criteria

Overview

The Property Accountability module Accountable Unit Identification Code (ACTBL UIC)/Unit Identification Code (UIC) process provides the ability to create, view, update, and delete a UIC specific to the agency currently being accessed.

Note

Any role with Master Data access can create a new Accountable UIC. However, when creating a new Accountable UIC, a new matching UIC (with the same 6 characters) must be created at the same time.

Navigation

Master Data > ACTBL UIC/UIC > ACTBL UIC/UIC Search Criteria page

Page Fields

The following fields display on the **ACTBL UIC/UIC Search Criteria** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
34	To add "UIC", enter new "UIC" and select "Add" button.
4	When "Search" button is selected all fields are optional, enter data to limit number of rows retrieved.

12	Select "Search" button to view Search Results page.
13	Select "Reset" button to clear data.
21	Select "Add" button to create a new record.

Add an ACTBL UIC/UIC

Overview

The ACTBL UIC/UIC Add process provides the ability to create a new Unit Identification Code (UIC) specific to the agency currently being accessed. A new matching Accountable UIC is also created using this process, but only at the currently accessed UIC tier level.
There are three tabs on the Add page - Basic, APO, and FM.

Note

To create a new Accountable UIC, the Accountable UIC designation entered must match the value shown to the right in the 'UIC' labeled field previously entered to initiate the Add process. A new Accountable UIC designation cannot be created if it differs from the new UIC designation that is currently being created.

Navigation

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
161 — Remarks must be alphanumeric with supported special character(s) $, — , /, #, &, comma, period, and space.	Invalid Characters Entered in the Remarks field. Enter alphanumeric characters, or the following permitted special characters: $, —, /, #, &, comma, period, and space. Special characters like ! or @ are prohibited.

13 — Mandatory Entry: *UIC*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Agency Cd*.	
6 — Entry must be 6 positions, A - Z and/or 0 - 9.	Invalid Entry. The UIC must contain six alphanumeric characters with no special characters. Enter the UIC again.
74 — Action is invalid, UICs exist.	Invalid Entry. The UIC entered already exists. Check the information again, and re-enter the UIC.
419 — DoDAAC entry must be 6 - pos alphanumeric except for alpha "I" or "O".	Invalid Entry. The DoDAAC is a 6-position alphanumeric entry, but not "I"; "O"; or special characters. Re-enter the DoDAAC.
37 — Entry must = A - Z and/or 0 - 9.	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alphanumeric (alphabetic "A" through "Z", numeric "0" through "9") characters.
275 — Invalid entry. First two positions must be alphanumeric.	Invalid Entry. A character that was not a letter or number was entered into the mentioned field. Remove the invalid character and re-enter the field.
817 — Invalid Actbl UIC.	Invalid Entry. The Actbl UIC does not exist in the Actbl UIC table. Remove the invalid entry and re-enter the correct Actbl UIC.

8 — On hand balance or requisition action pending.	Invalid Deletion. The Accountable UIC cannot be deleted if there are any open Due Ins or Due Outs still associated to that UIC. Review the Accountable UIC record again, and remove any remaining associated information so the Accountable UIC can be deleted.
72 — CIP record(s) exist for this UIC.	Invalid Deletion. The UIC cannot be deleted if there is a CIP record still associated with the UIC. Review the UIC again, and remove any remaining associated information so the UIC can be deleted.
73 — Real Property record (s) exist for this UIC.	Invalid Deletion. The UIC cannot be deleted if there is a Real Property record still associated with the UIC. Review the UIC again, and remove any remaining associated information so the UIC can be deleted.
167 — Excess record(s) exist for UIC.	Invalid Deletion. The UIC cannot be deleted if there is a Redistribution record still associated with the UIC. Review the UIC again, and remove any remaining associated information so the UIC can be deleted.

Add an Address

Overview

The Address Add process provides the ability to create an address that is used on a frequent basis. Completing the information on this page eliminates the need to type repetitive data for a person or action.
If loaning an asset to a Government Activity, set up an Address with a Loan Type of LD-Loan – DoDAAC.
Non-Government or Contractors uses a Loan Type of LC-Loan - CAGE Cd.

Navigation

Search for an Asset Id Prefix — Criteria

Overview

The Property Accountability module Asset Id Prefix process provides the ability to create, view, update, and delete an unique asset identifier. Asset Id Prefixes are used to assist in automatically assigning Asset Ids.
Asset Id Prefixes start with an alphanumeric sequence plus a sequential number. They must be created if automated Asset Ids are to be assigned.

Note

Asset Ids are assigned at the UIC level and must be unique across all other Site Ids in ELMS.

Navigation

Search for a MAINT Management Assignment — Criteria

Overview

The Property Accountability module MAINT Management Assignment process provides the ability to add, update or delete an association between a UIC or MAINTENANCE GROUP ID and an Interface System Code, INTERFACE SITE ID, or Maintenance Activity. This association controls what assets are associated with a Maintenance Activity/external maintenance application via the Interface System Code or the INTERFACE SITE ID. If the user has access to more than one SITE ID, they must be logged on to the specific Site to perform the maintenance assignments.

Note

An individual with the Cataloger role must set the MAINTENANCE GROUP ID.

Search for Asset Utilization Record — Results

Overview

The Asset Utilization Results process provides the ability to view, add, update, or delete a utilization record.

Navigation

MAINT/UTIL > Asset Utilization > Search > Asset Utilization Record Search Results page

Page Fields

The following fields display on the **Asset Utilization Record Search Results** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
377	When available, select Update or Delete hyperlink to process a record.
5	Select "Hyperlink" to view details for specific record.
121	When available, select Change button to apply mass changes to all records in grid.
356	When available, select Record UTIL button to create a new record.

14	Select "Cancel" button to return to previous page.

Procedures

ELMS Navigation Helpful Tips

Click the following link to display PA Navigation Tips.

Enter an Asset Utilization Record — Record UTIL - Single

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

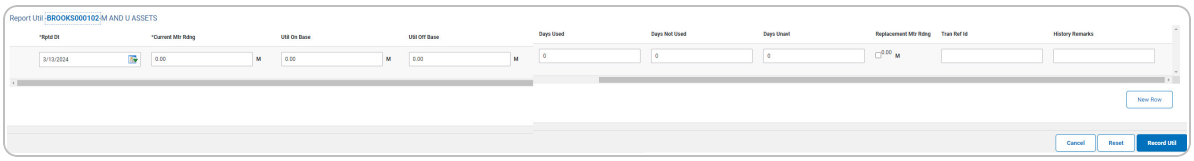
1. Select Record Util. *The* ***Asset Utilization Record Add*** *page appears.*

A. *Disregard the MASS RPTD DT Change.*

B. *Disregard the Mass FUEL TYPE CD.*

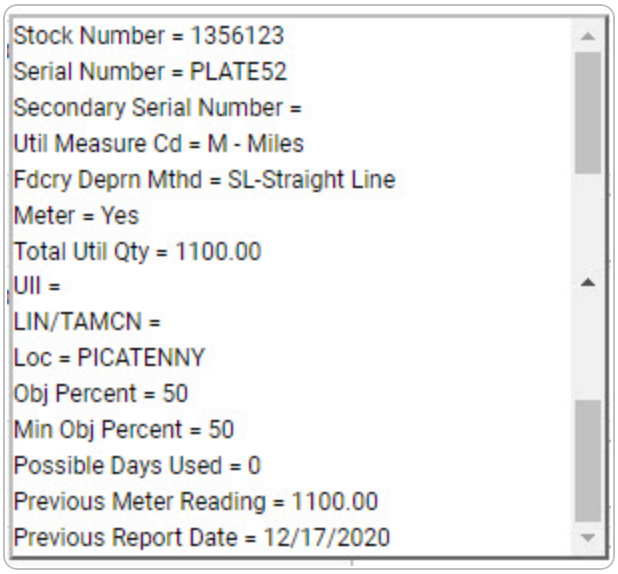
C. *Disregard the Mass Fuel Unit Cost.*

D. *Disregard the History Remarks.*



Helpful Tip

For Single Entries within a Single Record, disregard the above fields. The Mass Update section is for updating multiple entries at the same time.



For Multiple Entries within a Single Record, the Mass Update Section allows changing all entries at one time.

Revise the desired fields in the Mass Update Section and select Change. *All entries display the changes.*

E. *Complete the Report UTIL grid.*

a. Hover over the ASSET ID. *The details for that asset appear in a pop-up window.*

b. Update the RPTD DT, using or entering it (MM/DD/YYYY) in the field provided.

c. Enter the CURRENT MTR RDNG in the field provided. *This is a 12 numeric character field.*

Note

The CURRENT MTR RDNG field appears when the asset is metered.

d. Enter the UTIL ON BASE in the field provided. *This is a 7 numeric character field.*

e. Enter the UTIL OFF BASE in the field provided. *This is a 7 numeric character field.*

Helpful Tip

The sum of the UTIL ON BASE and the UTIL OFF BASE must equal the difference between the PREV MTR RDNG and the CURRENT MTR RDNG.
Therefore, CURRENT MTR RDNG—PREV MTR RDNG=UTIL ON BASE+UTIL OFF BASE.

Note

The FUEL TYPE CD, FUEL QTY, Fuel Unit Cost, and FUEL STATE CD fields become available when the fuel code default value exists.

f. Update the Fuel Type Cd, using ˅ to select the desired code.

Note

If the utilization does not record fuel usage, set the FUEL TYPE CD to *Select an Item*.

g. Enter the FUEL QTY in the field provided. *This is a 5 numeric character field.*

h. Enter the Fuel Unit Cost in the field provided. *This is a 3 numeric character field.*

i. Update the Fuel State Cd, using ˅ to select the desired code.

j. Enter the Days Used in the field provided. *This is a 3 numeric character field.*

k. Enter the Days Not Used in the field provided. *This is a 3 numeric character field.*

l. Enter the DAYS UNAVL in the field provided. *This is a 3 numeric character field.*

m. Click ☐ to select the REPLACEMENT MTR RDNG. *Check this to record the meter reading of the replacement meter at the time of replacement.*

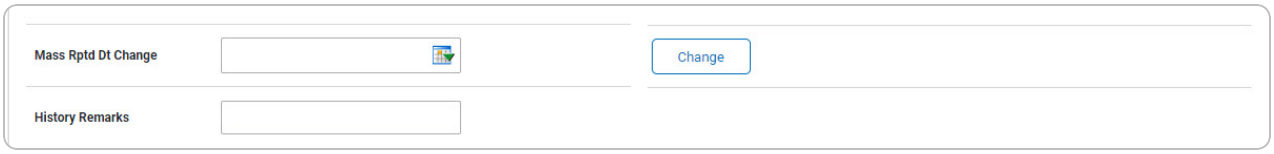
1. Enter the REPLACEMENT MTR RDNG in the field provided. *This is a 12 numeric character field.*

n. Enter the TRAN REF ID in the field provided. *This is a 36 alphanumeric character field.*

o. Enter the History Remarks in the field provided. *This is a 256 alphanumeric character field.*

p. Select New Row to enter the another Asset Utilization Record for the same asset. *A new entry line appears. Repeat Steps b-o.*

2. Select Record Util. *The **Asset Utilization Record Transaction Status** page appears.*



Add an Asset Utilization Record — Record UTIL - Multiple

Note

To record utilization for multiple assets, all selected assets must have the same meter code.

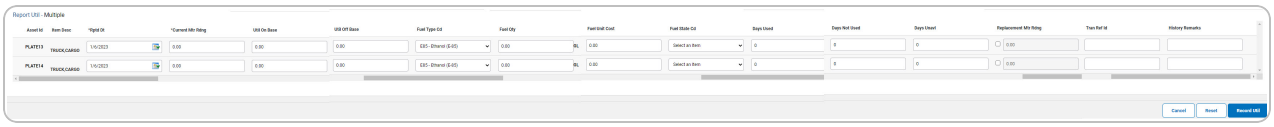
1. Use ☐ to select the desired entry(s). *The ☑ appears when the entry is selected. Repeat Step 1 as many times as needed.*

2. Select Record Util. *The **Asset Utilization Record Add** page appears.*

3. *Complete the Mass Update Grid.*

Note

Complete the Mass Update Grid to revise multiple assets at once.



A. Use to select the MASS RPTD DT, or enter the date (MM/DD/YYYY) in the field provided.

B. Enter the Mass Fuel Unit Cost in the field provided. *This is a 3 numeric character field.*

C. Enter the History Remarks in the field provided. *This is a 256 alphanumeric character field.*

4. Select Change. *All below Utilization entries display the above changes.*

5. *Complete the Report UTIL - Multiple grid.*

A. Hover over the ASSET ID. *The details for that asset appear in a pop-up window.*

B. *The ITEM DESC automatically populates and is not editable.*

C. Update the RPTD DT, using or entering the date (MM/DD/YYYY) in the field provided.

D. Enter the CURRENT MTR RDNG in the field provided. *This is a 12 numeric character field.*

E. Enter the UTIL ON BASE in the field provided. *This is a 7 numeric character field.*

F. Enter the UTIL OFF BASE in the field provided. *This is a 7 numeric character field.*

Helpful Tip

The sum of the UTIL ON BASE and the UTIL OFF BASE must equal the difference between the PREV MTR RDNG and the CURRENT MTR RDNG.
Therefore, CURRENT MTR RDNG—PREV MTR RDNG=UTIL ON BASE+UTIL OFF BASE.

Note

The FUEL TYPE CD, FUEL QTY, Fuel Unit Cost, and FUEL STATE CD fields become available when the fuel code default value exists.

G. Update the Fuel Type Cd, using to select the desired code.

Note

If the utilization does not record fuel usage, set the FUEL TYPE CD to *Select an Item*.

H. Enter the FUEL QTY in the field provided. *This is a 5 numeric character field.*

I. Enter the Fuel Unit Cost in the field provided. *This is a 3 numeric character field.*

J. Update the Fuel State Cd, using ⌄ to select the desired code.

K. Enter the Days Used in the field provided. *This is a 3 numeric character field.*

L. Enter the Days Not Used in the field provided. *This is a 3 numeric character field.*

M. Enter the DAYS UNAVL in the field provided. *This is a 3 numeric character field.*

N. Click ☐ to select the REPLACEMENT MTR RDNG. *Check this to record the meter reading of the replacement meter at the time of replacement.*

   a. Enter the REPLACEMENT MTR RDNG in the field provided. *This is a 12 numeric character field.*

O. Enter the TRAN REF ID in the field provided. *This is a 36 alphanumeric character field.*

P. Enter the History Remarks in the field provided. *This is a 256 alphanumeric character field.*

6. Select Record Util. *The **Asset Utilization Record Transaction Status** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
161 — Remarks must be alphanumeric with supported special character(s) $, — , /, #, &, comma, period, and space.	Invalid Characters Entered in the Remarks field. Enter alphanumeric characters, or the following permitted special characters: $, —, /, #, &, comma, period, and space. Special characters like ! or @ are prohibited.

13 — Mandatory Entry: *RPTD DT*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *CURRENT MTR RDNG*.	
13 — Mandatory Entry: *Fuel Unit Cost and FUEL QTY*.	Missing Entry. If the Fuel Type drop-down has a value, the Fuel Unit Cost and Fuel Quantity must have a value. Enter the appropriate information in the desired field.
645 - UTIL ON BASE+UTIL OFF BASE must =TOTAL TRAN QTY.	Invalid Entry. The TOTAL TRAN QTY must equal the UTIL ON BASE amount and the UTIL OFF BASE amount together. Verify the selected ASSET ID, and re-enter the information.
xxxx - Nothing entered to mass update.	No Mass changes were entered.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..
44 - Input date must be <= system date.	Invalid Date Entry. The system date (Today's Date) must be after or the same as the Input date. Re-enter the date.
647 - TRAN REF ID already exists.	Invalid Entry. The Transaction Reference Identifier entered is a duplicate. Enter a valid identification.

503 - UTIL value exists for RPTD DT; cannot record a REPLACEMENT MTR.	Invalid Entry. The Replacement Meter Reading field has a value entered, and the Reported Date being entered already exists for the given asset. Verify the date and meter reading, and re-enter the information.
559 - Current Meter Reading must be >= Replacement Meter Reading.	Invalid Entry. The Replacement Meter Reading must be smaller than or equal to the Current Meter Reading. Re-enter the meter reading.
642 - CURRENT MTR RDNG must be >= Previous Meter Reading.	Invalid Entry. The Previous Meter Reading must be smaller than or equal to the Current Meter Reading. Re-enter the meter reading.
350 — Must be alpha-numeric with supported special characters $, — , /, #, &, comma, period, and space.	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alphanumeric (alphabetic "A" through "Z", numeric "0" through "9") characters, or the following permitted special characters: $, —, /, #, &, ;, comma, period, and space. Special characters like ! or @ are prohibited.
92 - Entry must be numeric.	Invalid Entry. The characters entered in the field include letters. Enter numeric ("0" through "9") characters.

Enter alphanumeric characters, or the following permitted special characters: $, —, /, #, &, comma, period, and space. Special characters like ! or @ are prohibited.
350 — Must be alphanumeric with supported special characters $, — , /, #, &, comma, period, and space.	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alphanumeric (alphabetic "A" through "Z", numeric "0" through "9") characters, or the following permitted special characters: $, —, /, #, &, ;, comma, period, and space. Special characters like ! or @ are prohibited.
656 — UTIL RECORD is associated with a Dispatch record; cannot delete.	Invalid Deletion. An Asset's Utilization record cannot be deleted if a Dispatch Record exists, and the Dispatch STATUS CD is not 'RC' (Return-Closed) for any of the records being deleted. Review the Asset's Utilization record again, and remove any remaining associated information so the record can be deleted.

Search for Utilization Exceptions Update — Criteria

Overview

The Property Accountability module Utilization Exceptions Update process provides the ability to review Utilization Exceptions data in ELMS. Exceptions are created when data is imported into ELMS but has no matching asset record or has more than one matching record. This process is used to mark received assets as ELMS assets or non ELMS assets.

Note

No additions or deletions to the utilization exceptions are made through this process. ELMS can receive service life and usage data sent from an interface such as Aircraft Inventory Readiness and Reporting System (AIRRS).

Navigation

MAINT/UTIL > UTIL EXCP UPDATE > Utilization Exceptions Update Search Criteria page

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
350 — Must be alpha-numeric with supported special characters $, — , /, #, &, comma, period, and space.	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alphanumeric (alphabetic "A" through "Z", numeric "0" through "9") characters, or the following permitted special characters: $, —, /, #, &, ;, comma, period, and space. Special characters like ! or @ are prohibited.
13 — Mandatory Entry: *Util Measure Cd*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Util Measure Qty*.	
13 — Mandatory Entry: *Clause Desc*.	
13 — Mandatory Entry: *Clause Terms*.	
13 — Mandatory Entry: *Service Location Name*.	
13 — Mandatory Entry: *Cost*	

***AMT*.**	
13 — Mandatory Entry: *CLIN*.	
92 — Entry must be numeric.	Invalid Entry. The characters entered in the field include letters. Enter numeric (“0” through “9”) characters.
553 — CONTRACT NBR consists of 13 POS: POS 1—6 = DODAAC, POS 7—8 and 10—13 numeric, POS 9 alpha and DODAAC alphanumeric, except for "I" or "O".	Invalid Characters entered in the Contract Number field. The field must have 13 characters. The first 6 positions are the DODAAC; the 7th and 8th positions must be numbers; the 9th position must be a letter (but not "I" or "O"); and positions 10—13 must be numbers.
492 — Invalid CLIN. First 2 — POS must be alphanumeric not to exceed 4 alphanumeric positions.	Invalid Entry. The first two positions of the CLIN must be alphanumeric. Re-enter the CLIN.
xxxx — Cannot commit clauses until current clause is updated.	Invalid Entry. The clause displayed at the top of the page must be saved prior to selecting a clause at the bottom of the page to update. Save the top information before continuing.
xxxx — No clause information found in Clauses grid.	Invalid Entry. Insert the clause information to proceed. Re—enter the entry.
xxxx — Invalid entry: *Con-*	Invalid Entry. The Contract Nbr format is incor-

tract Nbr - Invalid Format	rect. The field must have 13 characters. The first 6 positions are the DoDAAC; the 7th and 8th positions must be numbers; the 9th position must be a letter (but not "I" or "O"); and positions 10—13 must be numbers. Re-enter the Contract Nbr.
xxxx — Only 50 records can be processed at a time.	Invalid Entry. Over 50 records have been added. Remove the extra records and re-try the entry.
161 — Remarks must be alphanumeric with supported special character(s) $, — , /, #, &, comma, period, and space, and max length of 256.	Invalid Characters Entered in the Remarks field. Enter alphanumeric characters, or the following permitted special characters: $, —, /, #, &, comma, period, and space, with a max length of 256. Special characters like ! or @ are prohibited.

ELMS Navigation Helpful Tips

Click the following link to display PA Navigation Tips.

Update a Wrnty/Svc/Subscription — Terms/Cond

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
***Bold** numbered steps are required.*

1. Select the Update hyperlink. *The **Wrnty/Svc/Subscription — Terms/Cond Update** page appears.*

A. *Verify the CONTRACT USE CD.*

B. *Verify the CONTRACT TYPE CD.*

C. *Verify the CONTRACT NBR.*

D. *Verify the CAGE CD.*

E. *Verify the DLVY ORD NBR.*

F. *Verify the CLIN.*

G. *Verify the SLIN.*

H. Update the CLAUSE DESC, entering the revised description in the field provided. *This is a 1,024 alphanumeric character field.*

I. Update the Clause Terms, entering the revised terms in the field provided. *This is an 8 alphanumeric character field.*

J. Update the Clause Procedures, entering the revised steps in the field provided. *This is a 1,024 alphanumeric character field.*

K. Update the START DT, using or entering the date (MM/DD/YYYY) in the field provided.

L. Update the END DT, using or entering the date (MM/DD/YYYY) in the field provided.

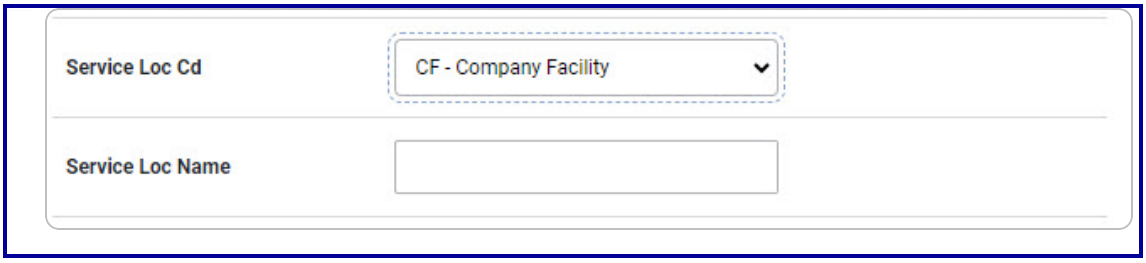
Note

When the CONTRACT USE CD is P - Equipment Purchase, the START DT and END DT fields do not appear.

M. Update the Util Measure Cd, using to select the desired code.

N. Update the UTIL MEASURE QTY, entering the revised amount in the field provided. *This is an 8 numeric character field.*

Helpful Tip



Select to add one additional UTIL MEASURE CD and UTIL MEASURE QTY set.

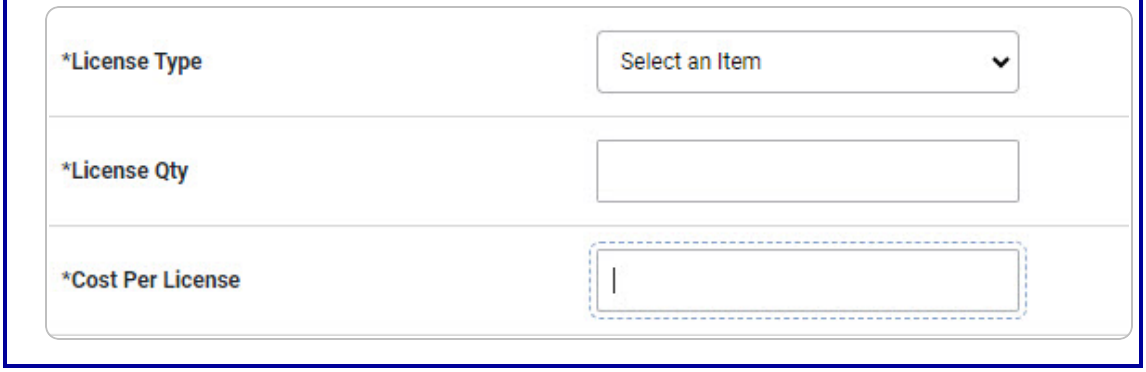
O. Update the Service Loc Cd, using to select the desired code.

P. Update the SERVICE LOC NM, entering the revised name in the field provided. *This is a 55 alphanumeric character field.*

Note

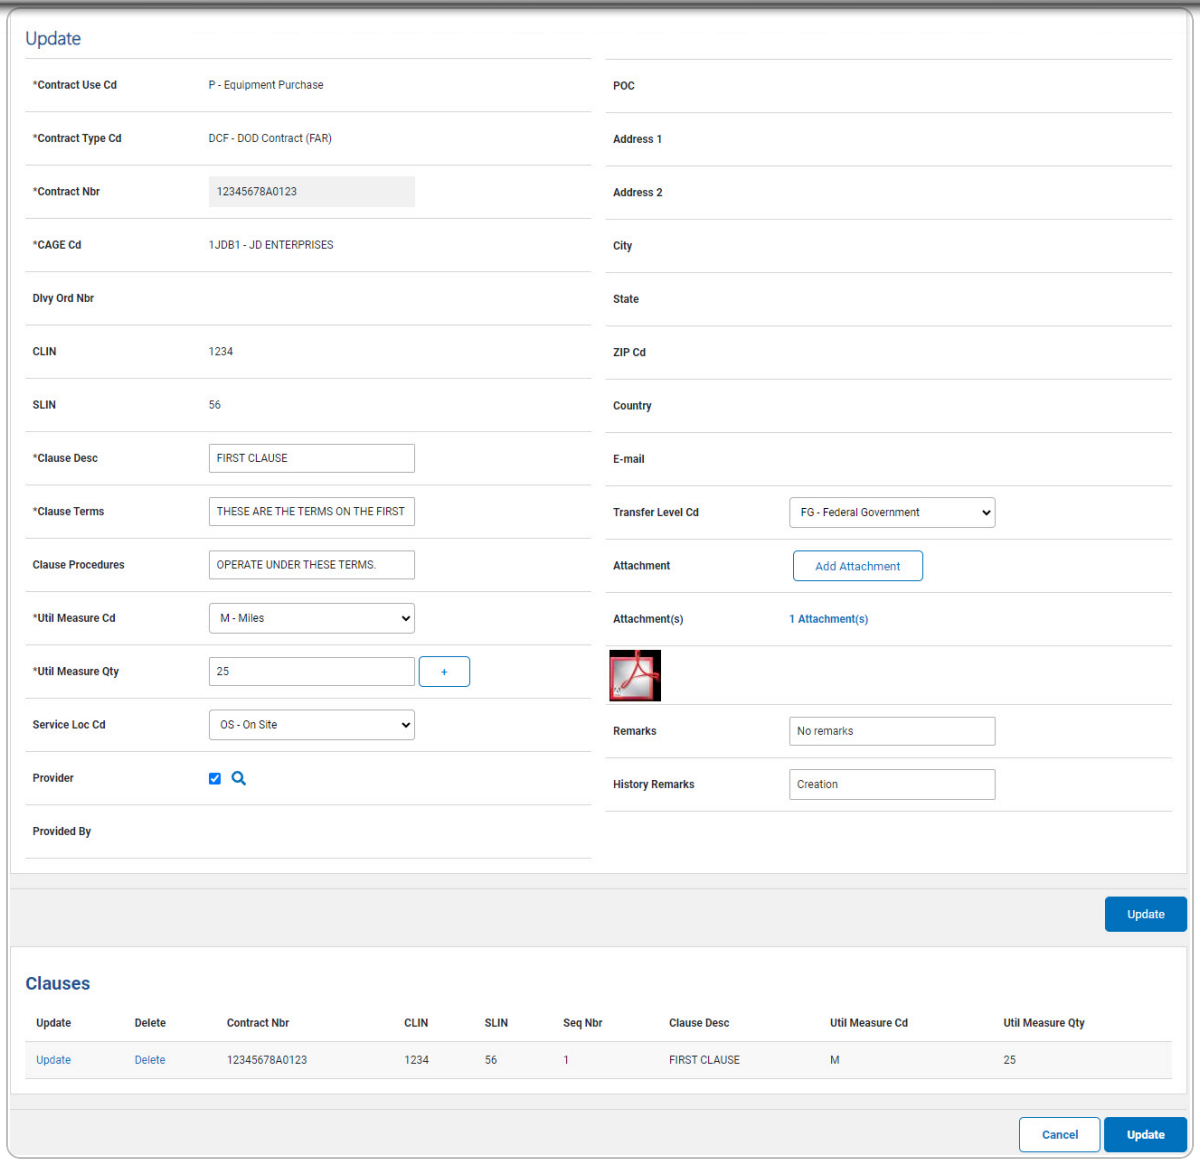
The SERVICE LOC NM appears when the selected Service Location Code is CF - Company Facility or AD - Dealer.

Q. Update the COST AMT, entering the revised quantity in the field provided. *This is a 12 numeric character field.*



R. Update the License Type, using ⌄ to select the desired type.

S. Update the License QTY, entering the revised quantity in the field provided. *This is a 9 numeric character field.*



T. Update the Cost Per License, entering the revised cost in the field provided. *This is a 18 numeric character field.*

Note

The License Type, License QTY, and Cost Per License fields appear when the CONTRACT USE CD is L - Software License.

U. Verify the Provider contains the appropriate ☑ or ☐. *Checking this removes the CAGE CD, ORG NM, PHONE NBR, E-MAIL Address fields, and opens new fields.*

a. Use to browse for the Provider.

Search for an Improvement — Criteria

Overview

The Property Accountability module Improvement process provides the ability to add improvement records to Real Property and serially managed Direct Input Asset Improvements and gives users the capability to convert completed Construction In Progress (CIP) projects to Improvements. When deleting / removing an Improvement, there will not be an option for the Sale of an Improvement.
An Improvement is any change made to an asset that increases its value, performance or its useful life. Examples include:

- Installing utilities on unimproved land
- Excavating, clearing and landscaping real property
- Adding a functional part or accessory to a vehicle

Leasehold Improvements are repairs or improvements, usually prior to occupancy, made to a leased facility by the lessee. The cost is then added to fixed assets and amortized over the life of the lease.
The process will display different entry fields in each page depending on the Type Action selected.

Navigation

Accounting > Improvement > Improvement Search Criteria page

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution

125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
161 — Remarks must be alphanumeric with supported special character(s) $, — , /, #, &, comma, period, and space.	Invalid Characters Entered in the Remarks field. Enter alphanumeric characters, or the following permitted special characters: $, —, /, #, &, comma, period, and space. Special characters like ! or @ are prohibited.
92 — Entry must be numeric.	Invalid Entry. The characters entered in the field include letters. Enter numeric (“0” through “9”) characters.
676 — Entry must be alphanumeric.	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alphanumeric (alphabetic “A” through “Z”, numeric “0” through “9”) characters.
13 — Mandatory Entry: *Oblign Doc Nbr*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Impv Cost Amt*.	
13 — Mandatory Entry: *Fund Cd/ASN*.	
13 — Mandatory Entry:	

TRANSFER TYPE CD.	
119 — DOC NBR is mandatory: *RCPT DOC NBR*.	Missing Entry. The DOC NBR is mandatory for the Add process. Enter the appropriate information in the desired field.
44 — Input date must be <= system date.	Invalid Date Entry. The system date (Today's Date) must be after or the same as the Input date. Re—enter the date.
561 — Improvement cannot be added to asset with Non—Accountable Manufacturer.	Missing Entry. Non—Accountable Manufacturer Information is required for the Add action. Enter the information in the field.
497 — IMPV is tied to an open CIP PRJ. If IMPV COST is incorrect, use CIP ASSET/IMPV A/U/D to correct cost.	Invalid Entry. The option containing "Price Correction" or "Price Revaluation" is selected for Improvement with an Open Construction In Progress (CIP) Project. Either uncheck the option, or use CIP ASSET to correct the cost.
635 — TASK CD selected is invalid. Must select another TASK CD.	Invalid Entry. The TASK CD chosen is not appropriate for this Improvement. Select the drop—down list to choose a different Task Code for the Improvement.
749 — Cost Center invalid for cost center type.	Invalid Entry. The type of cost center entered does not match the type of cost center expected (OWNG, FNDNG, DEPRN, etc.). Enter a valid cost center.

750 — Cost Center does not exist.	Invalid Entry. The entered Cost Center is not currently in the system. Enter a valid Cost Center.
751 — Cost Center is either frozen or outside of date range.	Invalid Entry. The cost center entered is not currently available. Enter a valid cost center.

Update an Improvement – Type Action

Overview

The Improvement — Type Action Update process allows editing of Direct Input Improvements.

Note

If Fund Code/Allotment Serial Number (ASN) selected is associated with the Defense Agencies Initiative (DAI) Interface System Code, the TASK CD and Cost Center displays, and TASK CD, Cost Center and JOB ORDER NBR are unavailable for data entry.

Navigation

Accounting > Improvement > Search Criteria > Search > Search Results > Update hyperlink > Improvement Update – Type Action page

F. *Verify the IMPV NBR.*

G. Use ⌄ to select the Type Action. *Choose New Procurement - Update.*

H. Select Continue. *The **Direct Input Real Property Improvement Update** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
497 — IMPV is tied to an open CIP PRJ. If IMPV COST is incorrect, use CIP ASSET/IMPV A/U/D to correct cost.	Invalid Entry. The option containing "Price Correction" or "Price Revaluation" is selected for Improvement with an Open Construction In Progress (CIP) Project. Either uncheck the option, or use CIP ASSET to correct the cost.
