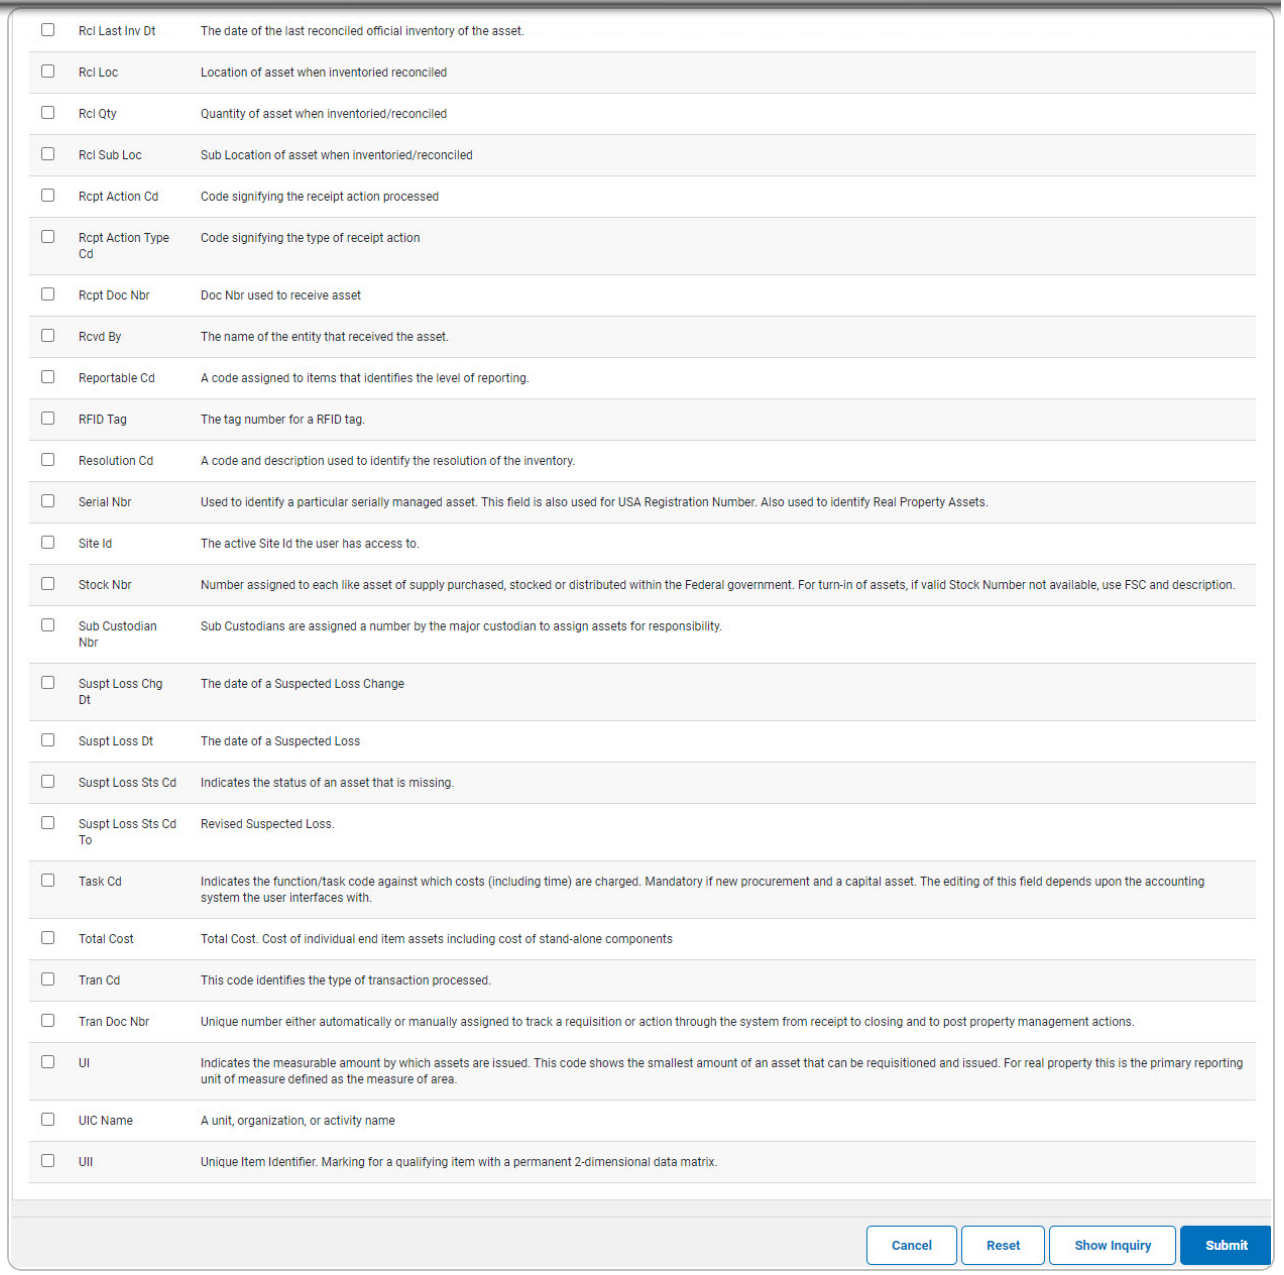
☐	Asset Level Cd	A unique column that holds the code used by the lookup table which coincides with the associated description. Indicates if item is end item or component and if asset has lower level components.
☐	Asset Pilferable	Asset Pilferable Flag. Yes or No
☐	Asset Sts Cd	Used to keep track of the status of an asset.
☐	Cause Lst Inv Dt Chg	Identifies how the lst inv dt was modified. Program description or Inv List Nbr.
☐	Cause Lst Rcl Dt Chg	Identifies how the Rcl Last Inv Date was modified. Program description of Inv List Nbr.
☐	Cause of Suspt Loss	Identifies the Inv List Nbr or program that most recently changed the suspected loss status code.
☐	Cond Cd	Used to classify material for degree of serviceability, condition, and completeness in terms of readiness for issue, and to identify actions underway to change status of materiel. This Field defaults to (A) but can be updated.
☐	Deprn Cd	Indicates whether the asset is a capital asset and if fiduciary reportable by DPAS. C – Capital/Non-Reportable, N – Non-Capital/Non-Reportable, T - Capital/Reportable.
☐	Detail Chg Cd	A unique column that holds the code used by the lookup table which coincides with the associated dspl_desc - description
☐	Deprn Cost Center	A unique identifier for the organization that handles depreciation.
☐	Dmil Cd	The code that represents instructions for removal of functional or military characteristics of a materiel item.
☐	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☐	Dollar Amt	The dollar amount of construction in progress/work in process, real property or the dollar amount of the accounting transaction.
☐	Embedded Cost	Identifies the unit cost of a component as embedded in the total cost of the end item. Bulk component is automatically embedded.
☐	Excess Action Cd	Code which indicates the action being taken for the excess asset. Codes (E, P and I) are system generated. For code (W) (Withdraw), there is a Check Box used to withdraw previously reported excess asset.
☐	Excess Doc Nbr	A system generated number that is used to track potential Excess (Prenotification) and Excess notifications asset. This number is generated for either prenotification or excess actions
☐	Excess Dt	Date an asset is documented as excess.
☐	Excess Type Action Cd	Excess Action type code which indicates the action being taken for the excess asset
☐	Expr Dt	The date the asset is no longer considered usable for its intended purpose, or the date the authority to operate the asset ends.
☐	FSC	Number which provides the capability to identify the Federal Supply Class that would be assigned to a nonstandard national stock number.
☐	Fndng Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code

☐	Haz Mat Cd	Code identifying explosives and other dangerous articles which require special handling in shipment as freight.
☐	Inv By Serial Nbr	Is asset to be inventoried by Serial Number. Yes or No.
☐	Inv Cond Cd	Inventory Condition Code.
☐	Inv Dt/Tm	Inventory Date/Time.
☐	Inv Input Type	Identifies how the inventory data was entered in the database.
☐	Initlzn Qty	Initialization Quantity.
☐	Inv Remv Dt	Inventory Removal Date.
☐	Inv Remvl Pgm Desc	Inventory Removal Program Description.
☐	Inv Remvl Pgm Id	Inventory Removal Program Identifier.
☐	Inv Remvl Qty	Inventory Removal Quantity.
☐	Inv Remvl User Id	User Id of the individual that removed the Inventory.
☐	Inv Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	Lease Cd	Indicates the lease status of a particular asset.
☐	Loan Cd	Indicates the loan status of a particular asset.
☐	Local Rcpt Dt	Date asset received
☐	Lot Nbr	Manufacturer assigned number that identifies items produced on the same production run.
☐	Match Asset Id	Inventory matching Asset Identifier
☐	Match E-Mail Address	Inventory matching E-Mail Address
☐	Match History Remarks	Inventory matching History Remarks
☐	Match Item Desc	Inventory matching Item Description
☐	Match Phone Nbr	Asset Owners Phone Number
☐	Match POC	Match Point Of Contact
☐	Match UIC	Inventory matching UIC
☐	Mfr Yr	Year an asset was manufactured/built/improved.
☐	Custodian Name	The name assigned to the property custodian.
☐	Non-Actbl	Non Accountable is displayed Yes or No.
☐	Owng Cost Center	A code that identifies an organization
☐	Qty	Quantity on hand or transaction quantity
☐	Rcl Inv Input Type	Reconciliation Inventory Input Type. Identifies how the reconciliation data was entered in the database
☐	Rcl Inv User Id	Identifies the user id of who entered the inventory data.



☐	Rcl Last Inv Dt	The date of the last reconciled official inventory of the asset.
☐	Rcl Loc	Location of asset when inventoried reconciled
☐	Rcl Qty	Quantity of asset when inventoried/reconciled
☐	Rcl Sub Loc	Sub Location of asset when inventoried/reconciled
☐	Rcpt Action Cd	Code signifying the receipt action processed
☐	Rcpt Action Type Cd	Code signifying the type of receipt action
☐	Rcpt Doc Nbr	Doc Nbr used to receive asset
☐	Rcvd By	The name of the entity that received the asset.
☐	Reportable Cd	A code assigned to items that identifies the level of reporting.
☐	RFID Tag	The tag number for a RFID tag.
☐	Resolution Cd	A code and description used to identify the resolution of the inventory.
☐	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☐	Site Id	The active Site Id the user has access to.
☐	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☐	Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☐	Suspt Loss Chg Dt	The date of a Suspected Loss Change
☐	Suspt Loss Dt	The date of a Suspected Loss
☐	Suspt Loss Sts Cd	Indicates the status of an asset that is missing.
☐	Suspt Loss Sts Cd To	Revised Suspected Loss.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Total Cost	Total Cost. Cost of individual end item assets including cost of stand-alone components
☐	Tran Cd	This code identifies the type of transaction processed.
☐	Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
☐	UI	Indicates the measurable amount by which assets are issued. This code shows the smallest amount of an asset that can be requisitioned and issued. For real property this is the primary reporting unit of measure defined as the measure of area.
☐	UIC Name	A unit, organization, or activity name
☐	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

OR

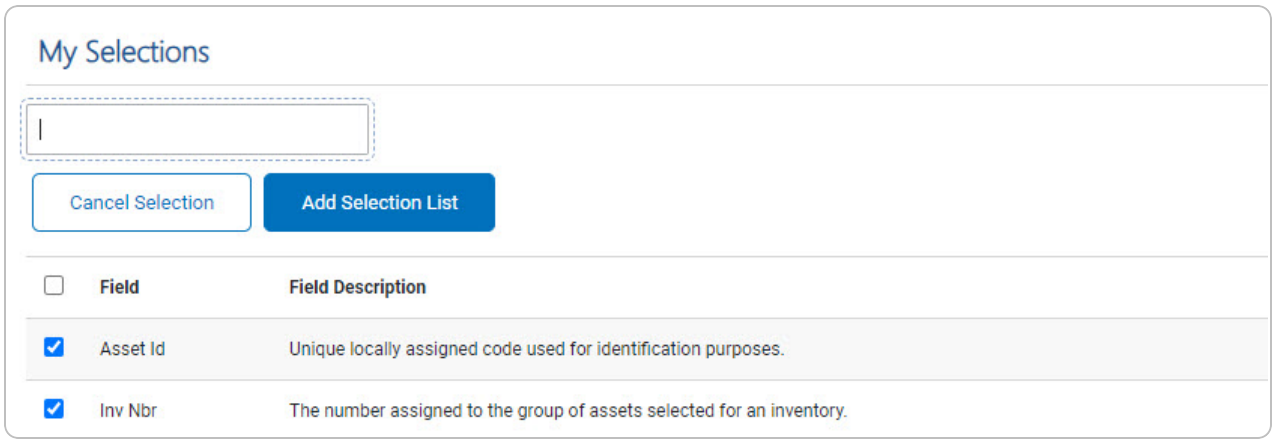
Click ☐ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*



Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.*

Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

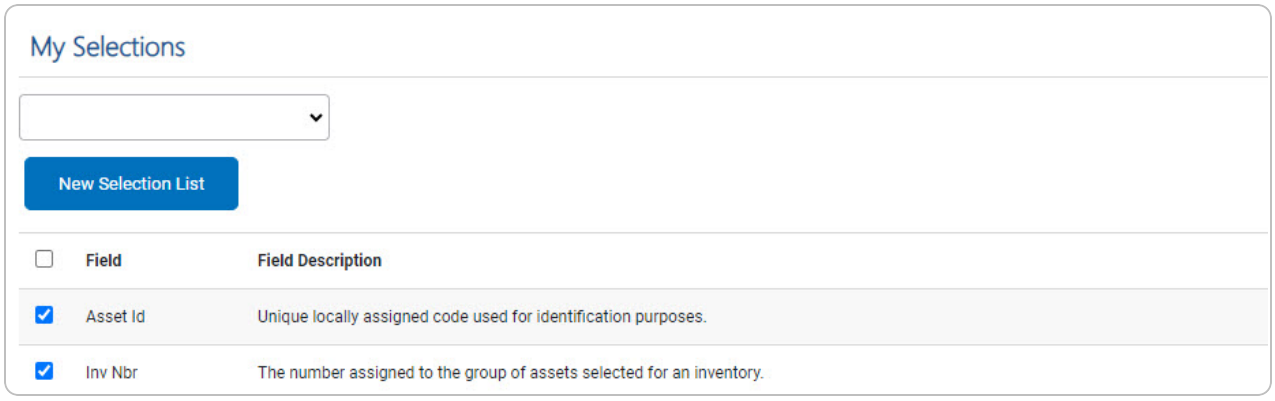
Select Show Inquiry for small volumes of data. *The* ***Inventory Detail Inquiry — Results*** *page appears.*

5. **OR**

Select Submit for large volumes of data. *The* ***Inventory Detail Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.



2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

Select Show Inquiry for small volumes of data. *The* ***Inventory Detail Inquiry — Results*** *page appears.*

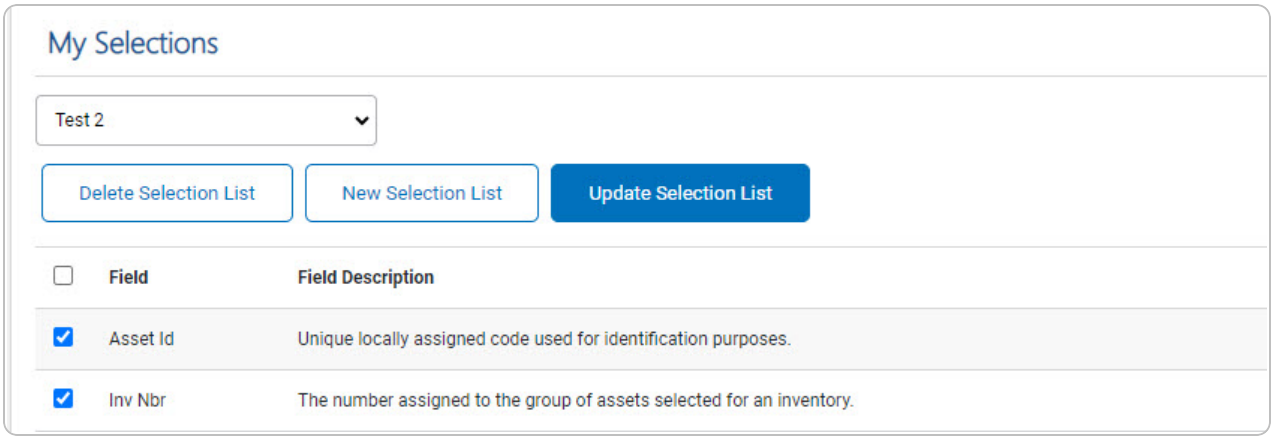
3. **OR**

Select Submit for large volumes of data. *The* ***Inventory Detail Inquiry Transaction Status*** *page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and*

New Selection List *is joined by* Update Selection List *and* Delete Selection List.



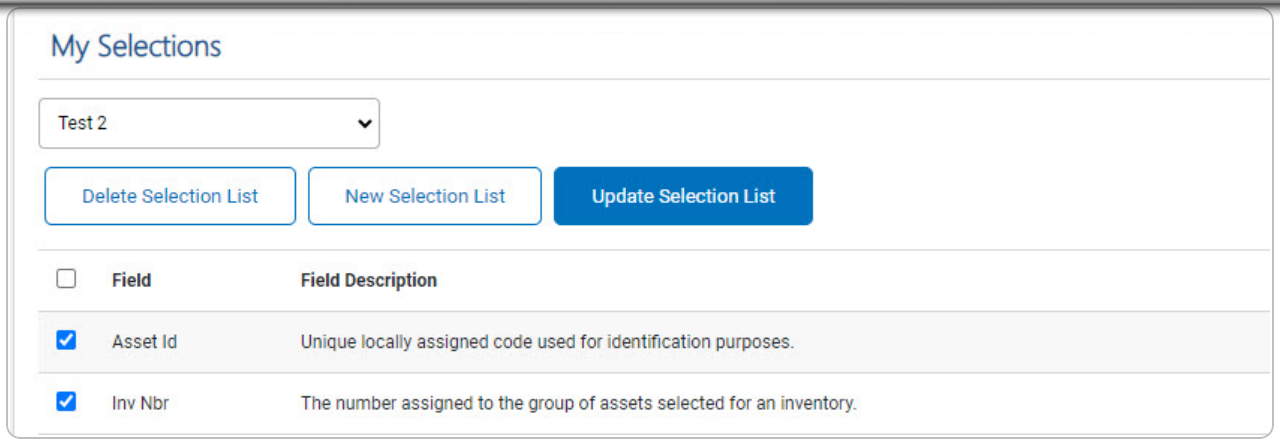
2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*
4. Select Show Inquiry for small volumes of data. *The* ***Inventory Detail Inquiry — Results*** *page appears.*

OR

Select Submit for large volumes of data. *The* ***Inventory Detail Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The* ***Inventory Detail Inquiry*** *page appears.*

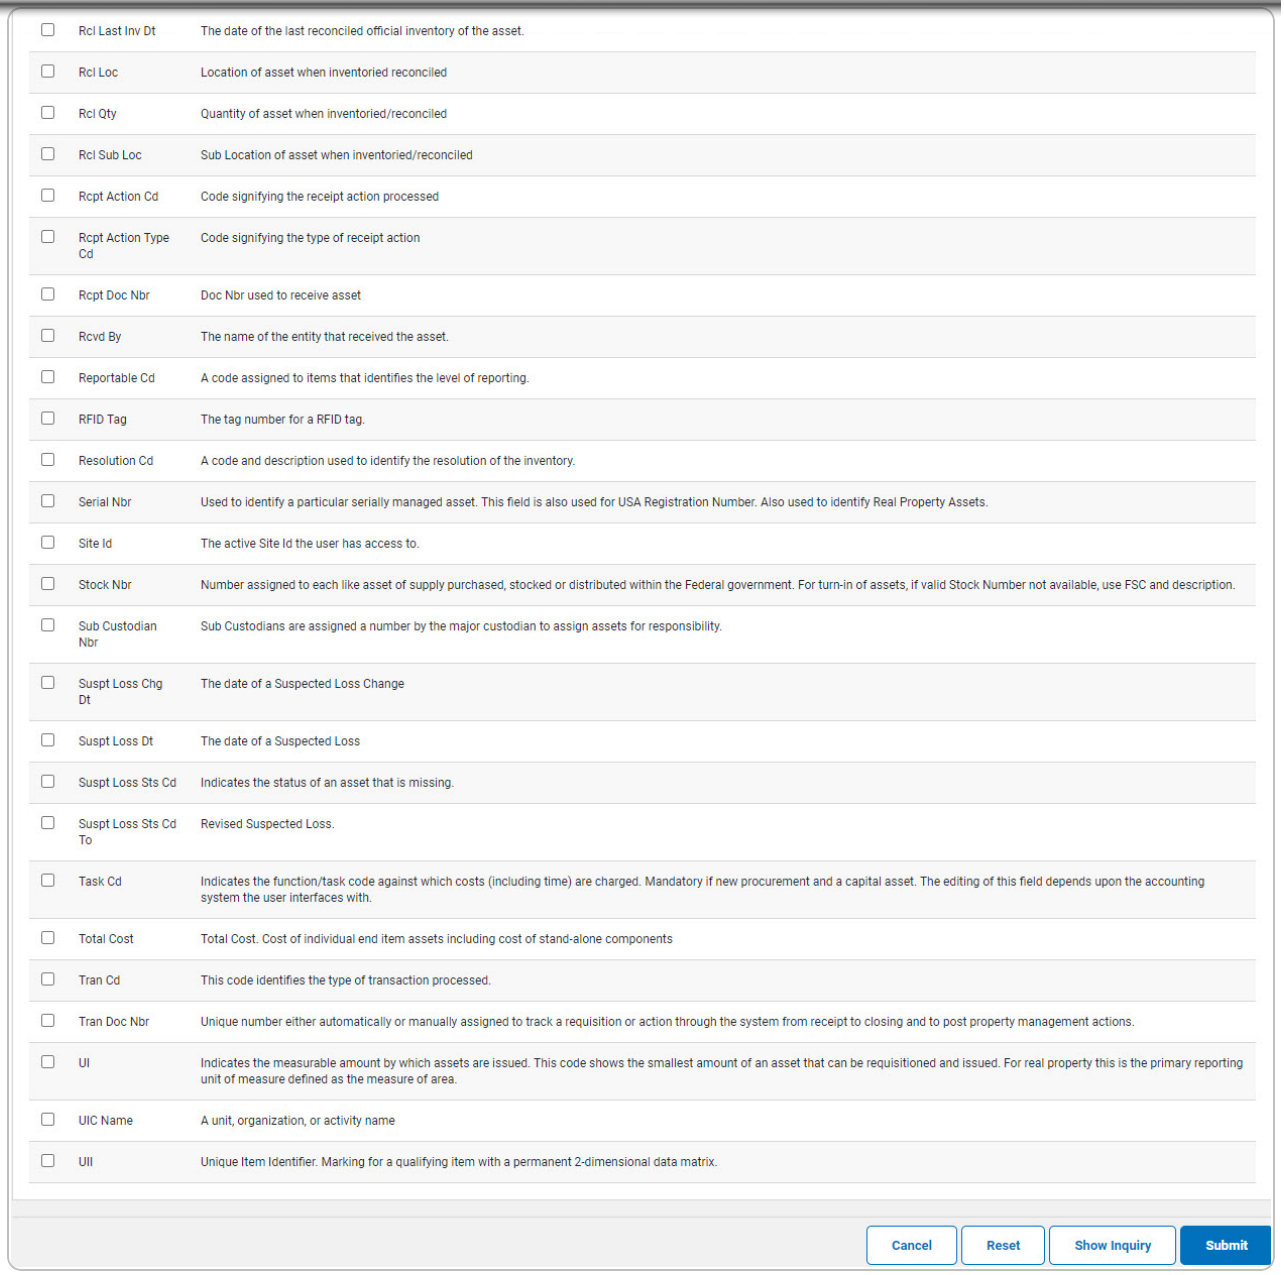
New Selection List

	Field	Field Description
☑	Asset Id	Unique locally assigned code used for identification purposes.
☑	Inv Nbr	The number assigned to the group of assets selected for an inventory.
☑	Inv Asset Sts Cd	A unique column that holds the code used by the lookup table which coincides with the associated dspl_desc - description
☑	Inv Asst Sts Cd Desc	Inventory Asset Status Description
☑	UIC	The UIC of the maintenance activity assigned to service the asset.
☑	Inv UIC	UIC asset recorded when inventoried
☑	Custodian Nbr	One to six position code, locally assigned, used to identify an individual responsible for assigned assets.
☑	Inv Custodian Nbr	A unique system generated number that identifies the custodian id inventory the associated asset is included on
☑	Last Inv Dt/Tm	Last Inventory Date - Date the last official inventory of a particular asset or group of assets was conducted
☑	Loc	Physical location of an asset.
☑	Inv Loc	The physical location of an asset when it was inventoried.
☑	Sub Loc	A more specific description of the physical location of an asset within its Location.
☑	Inv Sub Loc	The sub location where the asset was last inventoried.
☑	Inv User Id	Identifies the user who last inventoried this asset.
☑	Item Desc	The description of an asset. For an asset with a valid national stock number, Item Description field will be automatically filled with Approved Item Name from the Fed Log.
☑	Mfr Name	The full name of a specific manufacturer.
☑	Mfr Part Nbr	Number used to record the make or model of a specific piece of equipment.
☑	Mfr Model Nbr	The specific number assigned to identify the make/model of an asset.
☐	Asset Master Updt Cd	A unique column that holds the code used by the lookup table which coincides with the associated dsp desc - description
☐	Actbl UIC	Accountable Unit Identification Code - The UIC of the organization that is assigned management responsibility for property belonging to a specific unit organization, or activity. Multiple UICs may be grouped under an Accountable UIC to consolidate data for accountability and accounting system reporting purposes.

☐	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Asset Level Cd	A unique column that holds the code used by the lookup table which coincides with the associated description. Indicates if item is end item or component and if asset has lower level components.
☐	Asset Pilferable	Asset Pilferable Flag. Yes or No
☐	Asset Sts Cd	Used to keep track of the status of an asset.
☐	Cause Lst Inv Dt Chg	Identifies how the lst inv dt was modified. Program description or Inv List Nbr.
☐	Cause Lst Rcl Dt Chg	Identifies how the Rcl Last Inv Date was modified. Program description of Inv List Nbr.
☐	Cause of Suspt Loss	Identifies the Inv List Nbr or program that most recently changed the suspected loss status code.
☐	Cond Cd	Used to classify material for degree of serviceability, condition, and completeness in terms of readiness for issue, and to identify actions underway to change status of materiel. This Field defaults to (A) but can be updated.
☐	Deprn Cd	Indicates whether the asset is a capital asset and if fiduciary reportable by DPAS. C – Capital/Non-Reportable, N – Non-Capital/Non-Reportable, T - Capital/Reportable.
☐	Detail Chg Cd	A unique column that holds the code used by the lookup table which coincides with the associated dspl_desc - description
☐	Deprn Cost Center	A unique identifier for the organization that handles depreciation.
☐	Dmil Cd	The code that represents instructions for removal of functional or military characteristics of a materiel item.
☐	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☐	Dollar Amt	The dollar amount of construction in progress/work in process, real property or the dollar amount of the accounting transaction.
☐	Embedded Cost	Identifies the unit cost of a component as embedded in the total cost of the end item. Bulk component is automatically embedded.
☐	Excess Action Cd	Code which indicates the action being taken for the excess asset. Codes (E, P and I) are system generated. For code (W) (Withdraw), there is a Check Box used to withdraw previously reported excess asset.
☐	Excess Doc Nbr	A system generated number that is used to track potential Excess (Prenotification) and Excess notifications asset. This number is generated for either prenotification or excess actions
☐	Excess Dt	Date an asset is documented as excess.
☐	Excess Type Action Cd	Excess Action type code which indicates the action being taken for the excess asset
☐	Expr Dt	The date the asset is no longer considered usable for its intended purpose, or the date the authority to operate the asset ends.
☐	FSC	Number which provides the capability to identify the Federal Supply Class that would be assigned to a nonstandard national stock number.
☐	Fndng Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code

☐	Haz Mat Cd	Code identifying explosives and other dangerous articles which require special handling in shipment as freight.
☐	Inv By Serial Nbr	Is asset to be inventoried by Serial Number. Yes or No.
☐	Inv Cond Cd	Inventory Condition Code.
☐	Inv Dt/Tm	Inventory Date/Time.
☐	Inv Input Type	Identifies how the inventory data was entered in the database.
☐	InitIzn Qty	Initialization Quantity.
☐	Inv Remv Dt	Inventory Removal Date.
☐	Inv Remvl Pgm Desc	Inventory Removal Program Description.
☐	Inv Remvl Pgm Id	Inventory Removal Program Identifier.
☐	Inv Remvl Qty	Inventory Removal Quantity.
☐	Inv Remvl User Id	User Id of the individual that removed the Inventory.
☐	Inv Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	Lease Cd	Indicates the lease status of a particular asset.
☐	Loan Cd	Indicates the loan status of a particular asset.
☐	Local Rcpt Dt	Date asset received
☐	Lot Nbr	Manufacturer assigned number that identifies items produced on the same production run.
☐	Match Asset Id	Inventory matching Asset Identifier
☐	Match E-Mail Address	Inventory matching E-Mail Address
☐	Match History Remarks	Inventory matching History Remarks
☐	Match Item Desc	Inventory matching Item Description
☐	Match Phone Nbr	Asset Owners Phone Number
☐	Match POC	Match Point Of Contact
☐	Match UIC	Inventory matching UIC
☐	Mfr Yr	Year an asset was manufactured/built/improved.
☐	Custodian Name	The name assigned to the property custodian.
☐	Non-Actbl	Non Accountable is displayed Yes or No.
☐	Owng Cost Center	A code that identifies an organization
☐	Qty	Quantity on hand or transaction quantity
☐	Rcl Inv Input Type	Reconciliation Inventory Input Type. Identifies how the reconciliation data was entered in the database
☐	Rcl Inv User Id	Identifies the user id of who entered the inventory data.



☐	Rcl Last Inv Dt	The date of the last reconciled official inventory of the asset.
☐	Rcl Loc	Location of asset when inventoried reconciled
☐	Rcl Qty	Quantity of asset when inventoried/reconciled
☐	Rcl Sub Loc	Sub Location of asset when inventoried/reconciled
☐	Rcpt Action Cd	Code signifying the receipt action processed
☐	Rcpt Action Type Cd	Code signifying the type of receipt action
☐	Rcpt Doc Nbr	Doc Nbr used to receive asset
☐	Rcvd By	The name of the entity that received the asset.
☐	Reportable Cd	A code assigned to items that identifies the level of reporting.
☐	RFID Tag	The tag number for a RFID tag.
☐	Resolution Cd	A code and description used to identify the resolution of the inventory.
☐	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☐	Site Id	The active Site Id the user has access to.
☐	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☐	Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☐	Suspt Loss Chg Dt	The date of a Suspected Loss Change
☐	Suspt Loss Dt	The date of a Suspected Loss
☐	Suspt Loss Sts Cd	Indicates the status of an asset that is missing.
☐	Suspt Loss Sts Cd To	Revised Suspected Loss.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Total Cost	Total Cost. Cost of individual end item assets including cost of stand-alone components
☐	Tran Cd	This code identifies the type of transaction processed.
☐	Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
☐	UI	Indicates the measurable amount by which assets are issued. This code shows the smallest amount of an asset that can be requisitioned and issued. For real property this is the primary reporting unit of measure defined as the measure of area.
☐	UIC Name	A unit, organization, or activity name
☐	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.

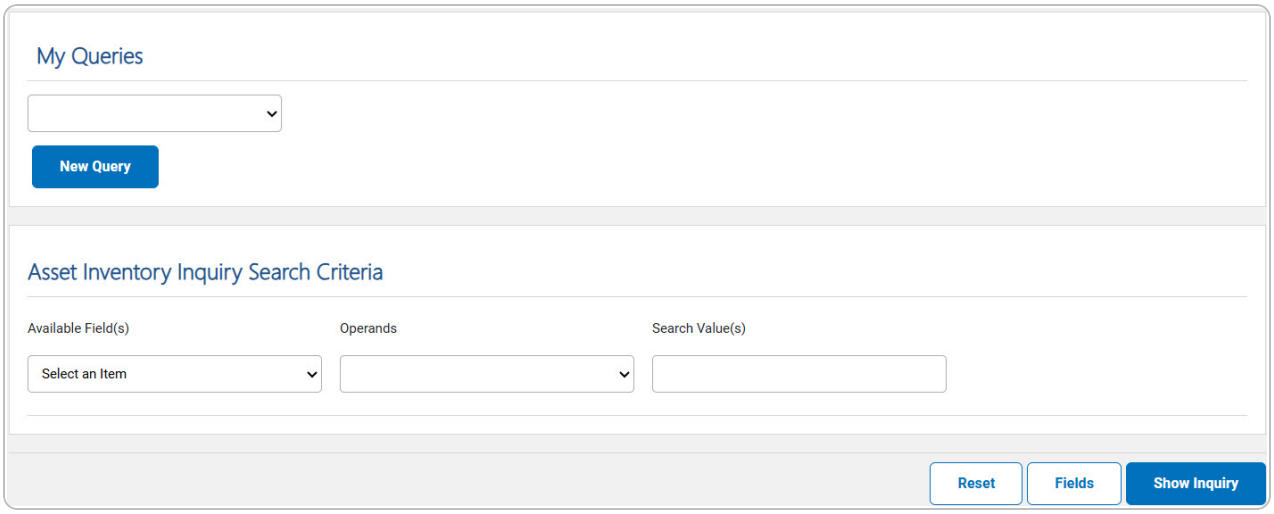
Search for an Asset Activity Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.



2. *Choose which Available Field(s) to use in the search.*

A. Use ⌄ to select the first Available Field.

B. Use ⌄ to select the second Available Field.

C. Repeat Step B to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Use ⌄ to select the second Operands.

C. Repeat Step B to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

   A. Use ⌄ to select the first Search Value.

   B. Use ⌄ to select the second Search Value.

   C. Repeat Step B to add additional search criteria.

Remove an Available Field Row

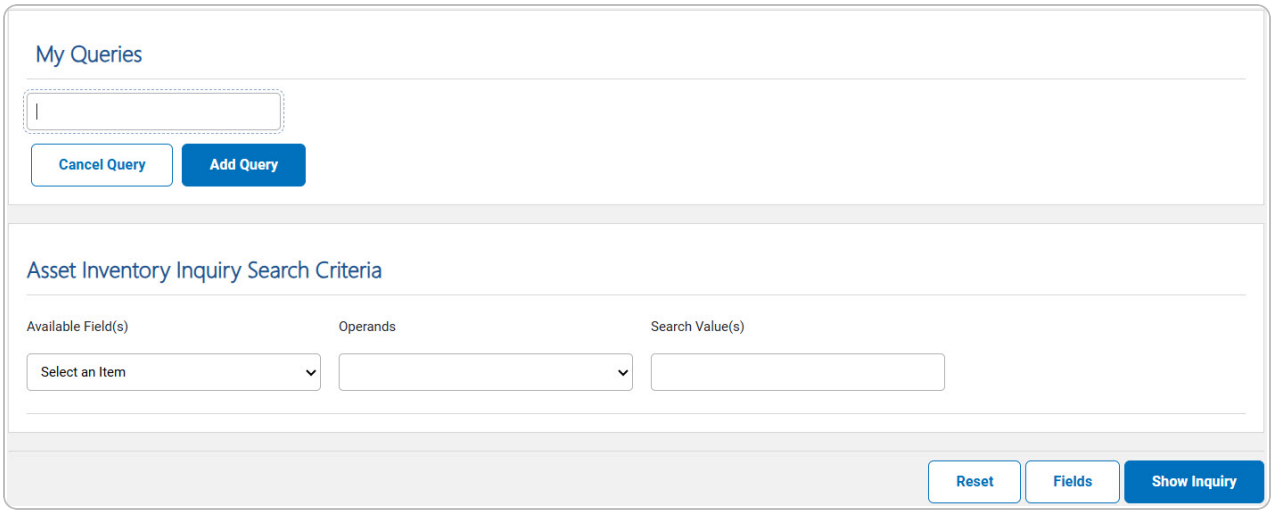
   a. Use ⌄ to select desired Available Field.

   b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Asset Inventory Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*



2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*

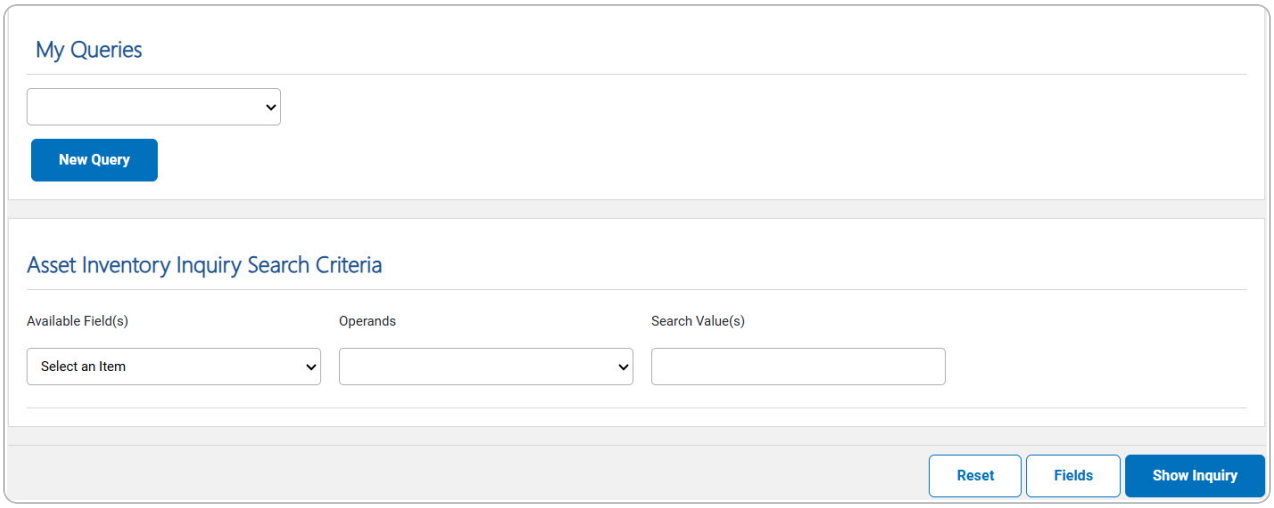
5. Select Fields. *The **Asset Inventory Inquiry — Select Fields** page appears.*

OR

Select Show Inquiry. *The **Asset Inventory Inquiry — Results** page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



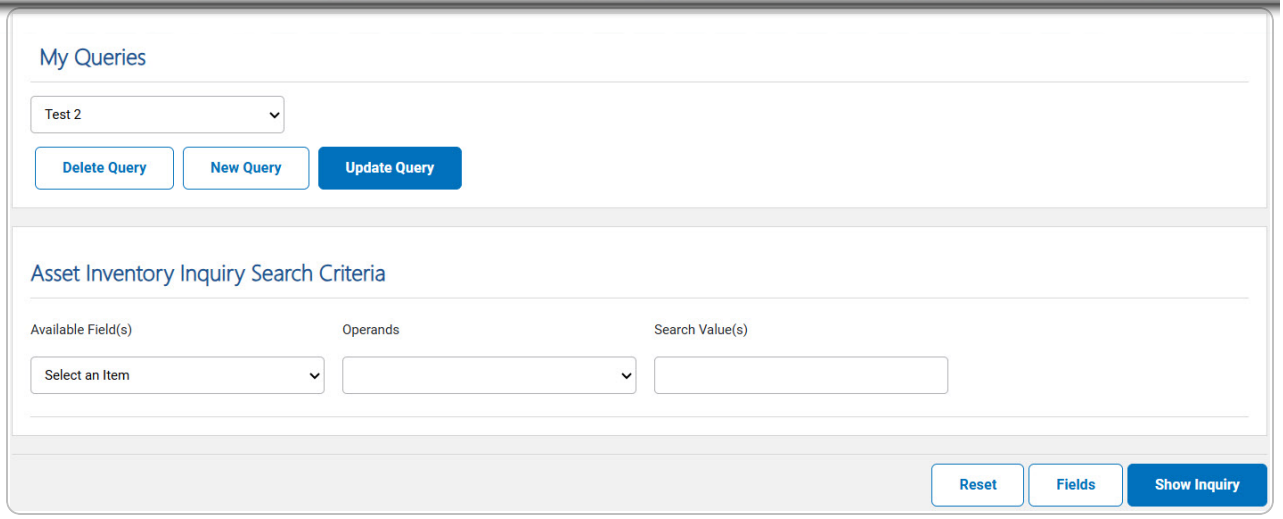
2. Select Fields. *The **Asset Inventory Inquiry — Select Fields** page appears.*

OR

Select Show Inquiry. *The **Asset Inventory Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and New Query is joined by Update Query and Delete Query. The selected query information appears in the search criteria grid.*



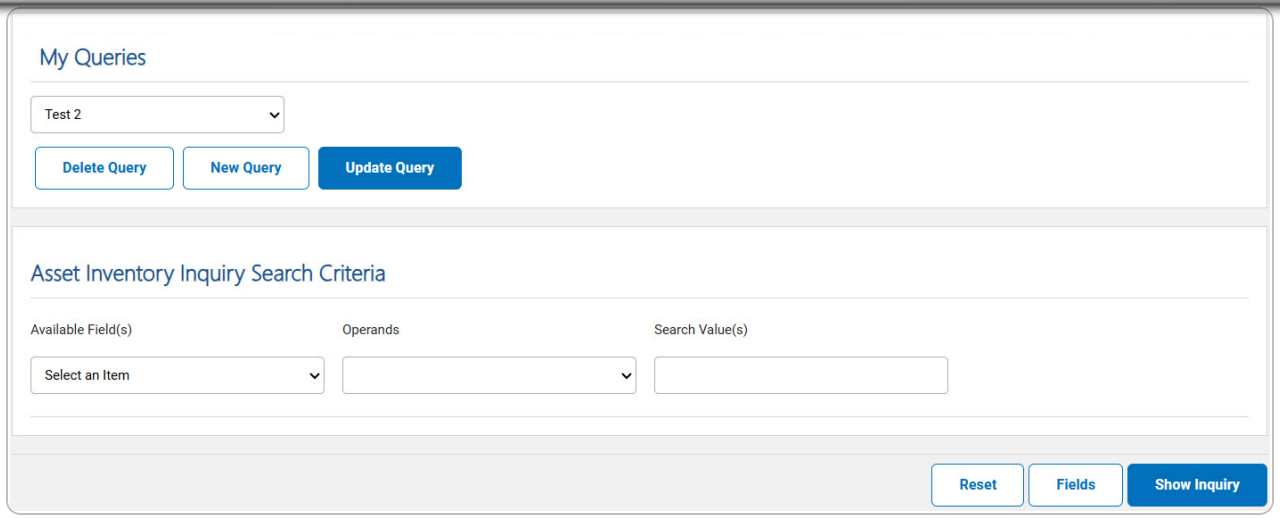
2. *Add and/or Remove rows in the Search Criteria grid as needed.*
3. Select Update Query. *The query information is updated.*
4. Select Fields. *The **Asset Inventory Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Asset Inventory Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query. *The selected query information appears in the search criteria grid.*



2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Asset Inventory Inquiry — Select Fields** page appears.*

New Selection List

	Field	Field Description
☑	Actbl UIC	Accountable Unit Identification Code - The UIC of the organization that is assigned management responsibility for property belonging to a specific unit organization, or activity. Multiple UICs may be grouped under an Accountable UIC to consolidate data for accountability and accounting system reporting purposes.
☑	Asset Id	Unique locally assigned code used for identification purposes.
☑	Asset Pilferable	Asset Pilferable Flag. Yes or No
☑	Cause Lst Inv Dt Chg	Identifies how the lst inv dt was modified. Program description or Inv List Nbr.
☑	Cause Lst Rcl Dt Chg	Identifies how the Rcl Last Inv Date was modified. Program description of Inv List Nbr.
☑	Cause of Suspt Loss	Identifies the Inv List Nbr or program that most recently changed the suspected loss status code.
☑	Custodian Nbr	One to six position code, locally assigned, used to identify an individual responsible for assigned assets.
☑	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☑	Dollar Amt	The dollar amount of construction in progress/work in process, real property or the dollar amount of the accounting transaction.
☑	Expr Dt	The date the asset is no longer considered usable for its intended purpose, or the date the authority to operate the asset ends.
☑	Inv By Serial Nbr	Is asset to be inventoried by Serial Number. Yes or No.
☑	Inv Custodian Nbr	A unique system generated number that identifies the custodian id inventory the associated asset is included on
☑	Inv Input Type	Identifies how the inventory data was entered in the database.
☑	Inv Loc	The physical location of an asset when it was inventoried.
☑	Inv Qty	Inventory Quantity. The quantity for bulk items
☑	Inv Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☑	Inv Sub Loc	The sub location where the asset was last inventoried.
☑	Inv UIC	UIC asset recorded when inventoried
☑	Inv User Id	Identifies the user who last inventoried this asset.
☑	Item Desc	The description of an asset. For an asset with a valid national stock number, Item Description field will be automatically filled with Approved Item Name from the Fed Log.
☑	Last Inv Dt/Tm	Last Inventory Date - Date the last official inventory of a particular asset or group of assets was conducted

☑	Non-Actbl	Non Accountable is displayed Yes or No.
☑	Qty	Quantity on hand or transaction quantity
☑	Rcl Inv Input Type	Reconciliation Inventory Input Type. Identifies how the reconciliation data was entered in the database
☑	Rcl Inv User Id	Identifies the user id of who entered the inventory data.
☑	Rcl Last Inv Dt	The date of the last reconciled official inventory of the asset.
☑	Rcl Loc	Location of asset when inventoried reconciled
☑	Rcl Qty	Quantity of asset when inventoried/reconciled
☑	Rcl Sub Loc	Sub Location of asset when inventoried/reconciled
☑	RFID Tag	The tag number for a RFID tag.
☑	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☑	Site Id	The active Site Id the user has access to.
☑	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☑	Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☑	Sub Loc	A more specific description of the physical location of an asset within its Location.
☑	Suspt Loss Chg Dt	The date of a Suspected Loss Change
☑	Suspt Loss Dt	The date of a Suspected Loss
☑	Suspt Loss Sts Cd	Indicates the status of an asset that is missing.
☑	Total Cost	Total Cost. Cost of individual end item assets including cost of stand-alone components
☑	UI	Indicates the measurable amount by which assets are issued. This code shows the smallest amount of an asset that can be requisitioned and issued. For real property this is the primary reporting unit of measure defined as the measure of area.
☑	UIC	The UIC of the maintenance activity assigned to service the asset.
☑	UIC Name	A unit, organization, or activity name
☑	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.
☐	Agency Defined1	Agency set user defined function
☐	Agency Defined2	Agency set user defined function
☐	Agency Defined3	Agency set user defined function
☐	Agency Defined4	Agency set user defined function
☐	Agency Defined5	Agency set user defined function
☐	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Asset Level Cd	A unique column that holds the code used by the lookup table which coincides with the associated description. Indicates if item is end item or component and if asset has lower level components.

☐	Dmil Cd	The code that represents instructions for removal of functional or military characteristics of a materiel item.

☐	Excess Action Cd	Code which indicates the action being taken for the excess asset. Codes (E, P and I) are system generated. For code (W) (Withdraw), there is a Check Box used to withdraw previously reported excess asset.
☐	Excess Doc Nbr	A system generated number that is used to track potential Excess (Prenotification) and Excess notifications asset. This number is generated for either prenotification or excess actions
☐	Excess Dt	Date an asset is documented as excess.
☐	Excess Type Action Cd	Excess Action type code which indicates the action being taken for the excess asset
☐	Fndng Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code
☐	FSC	Number which provides the capability to identify the Federal Supply Class that would be assigned to a nonstandard national stock number.
☐	Haz Mat Cd	Code identifying explosives and other dangerous articles which require special handling in shipment as freight.
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	Lease Cd	Indicates the lease status of a particular asset.
☐	Loan Cd	Indicates the loan status of a particular asset.
☐	Local Rcpt Dt	Date asset received
☐	Owng Cost Center	A code that identifies an organization
☐	Rcpt Action Cd	Code signifying the receipt action processed
☐	Rcpt Action Type Cd	Code signifying the type of receipt action
☐	Rcpt Doc Nbr	Doc Nbr used to receive asset
☐	Rcvd By	The name of the entity that received the asset.
☐	Remarks	A text field available to record local information/reason for change to record.
☐	Reportable Cd	A code assigned to items that identifies the level of reporting.
☐	Sys Desc	The description of the system identification
☐	Sys Id	Used to tie various end items and components together into a system.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Tran Cd	This code identifies the type of transaction processed.
☐	Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
☐	Type Asset Cd	Identifies the category of an asset as General PP&E, National Defense PP&E or Heritage Asset.

4. Select [Add Selection List]. *The page refreshes, and the selected list is added.* [Add Selection List] *is replaced by* [Update Selection List] *and* [Delete Selection List].

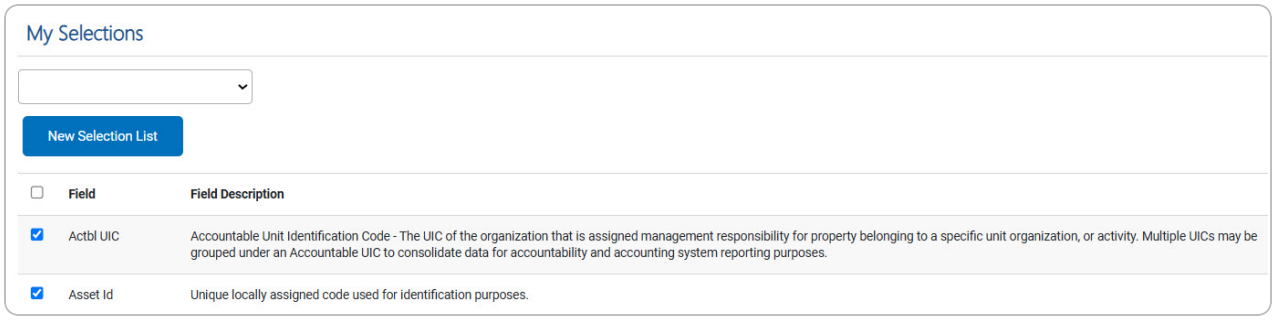
Select Show Inquiry for small volumes of data. *The **Asset Inventory Inquiry — Results** page appears.*

5. **OR**

Select Submit for large volumes of data. *The **Asset Inventory Inquiry Transaction Status** page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.



2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

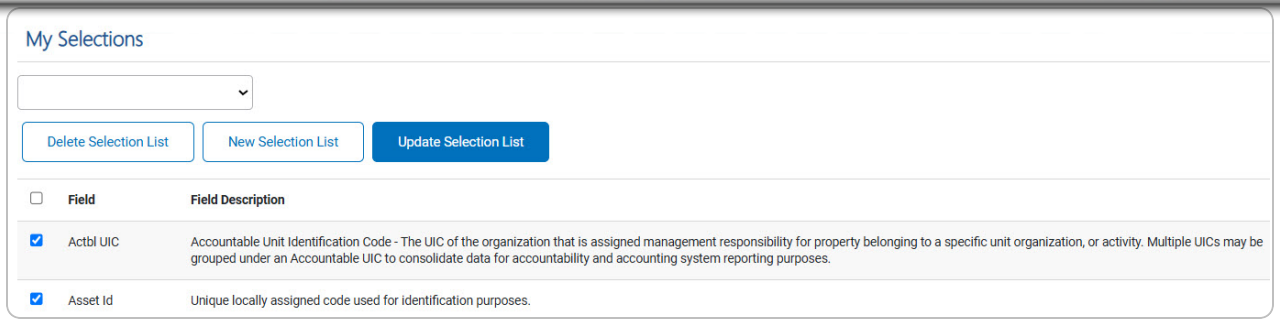
Select Show Inquiry for small volumes of data. *The **Asset Inventory Inquiry — Results** page appears.*

3. **OR**

Select Submit for large volumes of data. *The **Asset Inventory Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

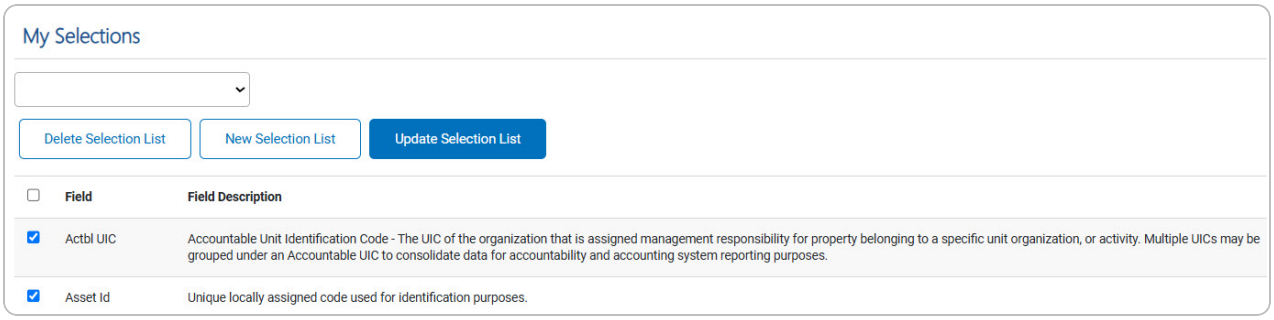
   Select Show Inquiry for small volumes of data. *The* ***Asset Inventory Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Asset Inventory Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The* ***Asset Inventory Inquiry*** *page appears.*

New Selection List

	Field	Field Description
☑	Actbl UIC	Accountable Unit Identification Code - The UIC of the organization that is assigned management responsibility for property belonging to a specific unit organization, or activity. Multiple UICs may be grouped under an Accountable UIC to consolidate data for accountability and accounting system reporting purposes.
☑	Asset Id	Unique locally assigned code used for identification purposes.
☑	Asset Pilferable	Asset Pilferable Flag. Yes or No
☑	Cause Lst Inv Dt Chg	Identifies how the lst inv dt was modified. Program description or Inv List Nbr.
☑	Cause Lst Rcl Dt Chg	Identifies how the Rcl Last Inv Date was modified. Program description of Inv List Nbr.
☑	Cause of Suspt Loss	Identifies the Inv List Nbr or program that most recently changed the suspected loss status code.
☑	Custodian Nbr	One to six position code, locally assigned, used to identify an individual responsible for assigned assets.
☑	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☑	Dollar Amt	The dollar amount of construction in progress/work in process, real property or the dollar amount of the accounting transaction.
☑	Expr Dt	The date the asset is no longer considered usable for its intended purpose, or the date the authority to operate the asset ends.
☑	Inv By Serial Nbr	Is asset to be inventoried by Serial Number. Yes or No.
☑	Inv Custodian Nbr	A unique system generated number that identifies the custodian id inventory the associated asset is included on
☑	Inv Input Type	Identifies how the inventory data was entered in the database.
☑	Inv Loc	The physical location of an asset when it was inventoried.
☑	Inv Qty	Inventory Quantity. The quantity for bulk items
☑	Inv Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☑	Inv Sub Loc	The sub location where the asset was last inventoried.
☑	Inv UIC	UIC asset recorded when inventoried
☑	Inv User Id	Identifies the user who last inventoried this asset.
☑	Item Desc	The description of an asset. For an asset with a valid national stock number, Item Description field will be automatically filled with Approved Item Name from the Fed Log.
☑	Last Inv Dt/Tm	Last Inventory Date - Date the last official inventory of a particular asset or group of assets was conducted

☑	Non-Actbl	Non Accountable is displayed Yes or No.
☑	Qty	Quantity on hand or transaction quantity
☑	Rcl Inv Input Type	Reconciliation Inventory Input Type. Identifies how the reconciliation data was entered in the database
☑	Rcl Inv User Id	Identifies the user id of who entered the inventory data.
☑	Rcl Last Inv Dt	The date of the last reconciled official inventory of the asset.
☑	Rcl Loc	Location of asset when inventoried reconciled
☑	Rcl Qty	Quantity of asset when inventoried/reconciled
☑	Rcl Sub Loc	Sub Location of asset when inventoried/reconciled
☑	RFID Tag	The tag number for a RFID tag.
☑	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☑	Site Id	The active Site Id the user has access to.
☑	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☑	Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☑	Sub Loc	A more specific description of the physical location of an asset within its Location.
☑	Suspt Loss Chg Dt	The date of a Suspected Loss Change
☑	Suspt Loss Dt	The date of a Suspected Loss
☑	Suspt Loss Sts Cd	Indicates the status of an asset that is missing.
☑	Total Cost	Total Cost. Cost of individual end item assets including cost of stand-alone components
☑	UI	Indicates the measurable amount by which assets are issued. This code shows the smallest amount of an asset that can be requisitioned and issued. For real property this is the primary reporting unit of measure defined as the measure of area.
☑	UIC	The UIC of the maintenance activity assigned to service the asset.
☑	UIC Name	A unit, organization, or activity name
☑	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.
☐	Agency Defined1	Agency set user defined function
☐	Agency Defined2	Agency set user defined function
☐	Agency Defined3	Agency set user defined function
☐	Agency Defined4	Agency set user defined function
☐	Agency Defined5	Agency set user defined function
☐	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Asset Level Cd	A unique column that holds the code used by the lookup table which coincides with the associated description. Indicates if item is end item or component and if asset has lower level components.

☐	Dmil Cd	The code that represents instructions for removal of functional or military characteristics of a materiel item.

☐	Excess Action Cd	Code which indicates the action being taken for the excess asset. Codes (E, P and I) are system generated. For code (W) (Withdraw), there is a Check Box used to withdraw previously reported excess asset.
☐	Excess Doc Nbr	A system generated number that is used to track potential Excess (Prenotification) and Excess notifications asset. This number is generated for either prenotification or excess actions
☐	Excess Dt	Date an asset is documented as excess.
☐	Excess Type Action Cd	Excess Action type code which indicates the action being taken for the excess asset
☐	Fndng Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code
☐	FSC	Number which provides the capability to identify the Federal Supply Class that would be assigned to a nonstandard national stock number.
☐	Haz Mat Cd	Code identifying explosives and other dangerous articles which require special handling in shipment as freight.
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	Lease Cd	Indicates the lease status of a particular asset.
☐	Loan Cd	Indicates the loan status of a particular asset.
☐	Local Rcpt Dt	Date asset received
☐	Owng Cost Center	A code that identifies an organization
☐	Rcpt Action Cd	Code signifying the receipt action processed
☐	Rcpt Action Type Cd	Code signifying the type of receipt action
☐	Rcpt Doc Nbr	Doc Nbr used to receive asset
☐	Rcvd By	The name of the entity that received the asset.
☐	Remarks	A text field available to record local information/reason for change to record.
☐	Reportable Cd	A code assigned to items that identifies the level of reporting.
☐	Sys Desc	The description of the system identification
☐	Sys Id	Used to tie various end items and components together into a system.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Tran Cd	This code identifies the type of transaction processed.
☐	Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
☐	Type Asset Cd	Identifies the category of an asset as General PP&E, National Defense PP&E or Heritage Asset.

Select Fields for the Asset Inventory Inquiry

Overview

The Asset Inventory Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > Inventory > Asset Inventory Data > Asset Inventory Inquiry > Search Criteria > Fields > Asset Inventory Inquiry Fields Selection page

Page Fields

The following fields display on the **Asset Inventory Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

191	Excel is the only reliable print format for this inquiry.
252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
247	Where available, select "Row" to view details for specific record.
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.
290	Do not "Export" large volumes of data, select "Back" button then select "Submit" button on the Field Selection Page

My Selections

New Selection List

	Field	Field Description
☑	Actbl UIC	Accountable Unit Identification Code - The UIC of the organization that is assigned management responsibility for property belonging to a specific unit organization, or activity. Multiple UICs may be grouped under an Accountable UIC to consolidate data for accountability and accounting system reporting purposes.
☑	Asset Id	Unique locally assigned code used for identification purposes.
☑	Asset Pilferable	Asset Pilferable Flag. Yes or No
☑	Cause Lst Inv Dt Chg	Identifies how the lst inv dt was modified. Program description or Inv List Nbr.
☑	Cause Lst Rcl Dt Chg	Identifies how the Rcl Last Inv Date was modified. Program description of Inv List Nbr.
☑	Cause of Suspt Loss	Identifies the Inv List Nbr or program that most recently changed the suspected loss status code.
☑	Custodian Nbr	One to six position code, locally assigned, used to identify an individual responsible for assigned assets.
☑	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☑	Dollar Amt	The dollar amount of construction in progress/work in process, real property or the dollar amount of the accounting transaction.
☑	Expr Dt	The date the asset is no longer considered usable for its intended purpose, or the date the authority to operate the asset ends.
☑	Inv By Serial Nbr	Is asset to be inventoried by Serial Number. Yes or No.
☑	Inv Custodian Nbr	A unique system generated number that identifies the custodian id inventory the associated asset is included on
☑	Inv Input Type	Identifies how the inventory data was entered in the database.
☑	Inv Loc	The physical location of an asset when it was inventoried.

☑	Inv Qty	Inventory Quantity. The quantity for bulk items
☑	Inv Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☑	Inv Sub Loc	The sub location where the asset was last inventoried.
☑	Inv UIC	UIC asset recorded when inventoried
☑	Inv User Id	Identifies the user who last inventoried this asset.
☑	Item Desc	The description of an asset. For an asset with a valid national stock number, Item Description field will be automatically filled with Approved Item Name from the Fed Log.
☑	Last Inv Dt/Tm	Last Inventory Date - Date the last official inventory of a particular asset or group of assets was conducted
☑	Loc	Physical location of an asset.
☑	Lot Nbr	Manufacturer assigned number that identifies items produced on the same production run.
☑	Mfr Name	The full name of a specific manufacturer.
☑	Mfr Part Nbr	Number used to record the make or model of a specific piece of equipment.
☑	Mfr Yr	Year an asset was manufactured/built/improved.
☑	Mfr Model Nbr	The specific number assigned to identify the make/model of an asset.
☑	Custodian Name	The name assigned to the property custodian.
☑	Non-Actbl	Non Accountable is displayed Yes or No.
☑	Qty	Quantity on hand or transaction quantity
☑	Rcl Inv Input Type	Reconciliation Inventory Input Type. Identifies how the reconciliation data was entered in the database

☑	Rcl Inv User Id	Identifies the user id of who entered the inventory data.
☑	Rcl Last Inv Dt	The date of the last reconciled official inventory of the asset.
☑	Rcl Loc	Location of asset when inventoried reconciled
☑	Rcl Qty	Quantity of asset when inventoried/reconciled
☑	Rcl Sub Loc	Sub Location of asset when inventoried/reconciled
☑	RFID Tag	The tag number for a RFID tag.
☑	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☑	Site Id	The active Site Id the user has access to.
☑	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☑	Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☑	Sub Loc	A more specific description of the physical location of an asset within its Location.
☑	Suspt Loss Chg Dt	The date of a Spepected Loss Change
☑	Suspt Loss Dt	The date of a Suspected Loss
☑	Suspt Loss Sts Cd	Indicates the status of an asset that is missing.
☑	Total Cost	Total Cost. Cost of individual end item assets including cost of stand-alone components
☑	UI	Indicates the measurable amount by which assets are issued. This code shows the smallest amount of an asset that can be requisitioned and issued. For real property this is the primary reporting unit of measure defined as the measure of area.
☑	UIC	The UIC of the maintenance activity assigned to service the asset.
☑	UIC Name	A unit, organization, or activity name
☑	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.

☐	Agency Defined1	Agency set user defined function
☐	Agency Defined2	Agency set user defined function
☐	Agency Defined3	Agency set user defined function
☐	Agency Defined4	Agency set user defined function
☐	Agency Defined5	Agency set user defined function
☐	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Asset Level Cd	A unique column that holds the code used by the lookup table which coincides with the associated description. Indicates if item is end item or component and if asset has lower level components.
☐	Asset Sts Cd	Used to keep track of the status of an asset.
☐	Cond Cd	Used to classify material for degree of serviceability, condition, and completeness in terms of readiness for issue, and to identify actions underway to change status of materiel. This Field defaults to (A) but can be updated.
☐	Deprn Cd	Indicates whether the asset is a capital asset and if fiduciary reportable by DPAS. C – Capital/Non-Reportable, N – Non-Capital/Non-Reportable, T - Capital/Reportable.
☐	Deprn Cost Center	A unique identifier for the organization that handles depreciation.
☐	Dmil Cd	The code that represents instructions for removal of functional or military characteristics of a materiel item.
☐	Embedded Cost	Identifies the unit cost of a component as embedded in the total cost of the end item. Bulk component is automatically embedded.
☐	Excess Action Cd	Code which indicates the action being taken for the excess asset. Codes (E, P and I) are system generated. For code (W) (Withdraw), there is a Check Box used to withdraw previously reported excess asset.
☐	Excess Doc Nbr	A system generated number that is used to track potential Excess (Prenotification) and Excess notifications asset. This number is generated for either prenotification or excess actions

☐	Excess Dt	Date an asset is documented as excess.
☐	Excess Type Action Cd	Excess Action type code which indicates the action being taken for the excess asset
☐	Fndng Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code
☐	FSC	Number which provides the capability to identify the Federal Supply Class that would be assigned to a nonstandard national stock number.
☐	Haz Mat Cd	Code identifying explosives and other dangerous articles which require special handling in shipment as freight.
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	Lease Cd	Indicates the lease status of a particular asset.
☐	Loan Cd	Indicates the loan status of a particular asset.
☐	Local Rcpt Dt	Date asset received
☐	Owng Cost Center	A code that identifies an organization
☐	Rcpt Action Cd	Code signifying the receipt action processed
☐	Rcpt Action Type Cd	Code signifying the type of receipt action
☐	Rcpt Doc Nbr	Doc Nbr used to receive asset
☐	Rcvd By	The name of the entity that received the asset.
☐	Remarks	A text field available to record local information/reason for change to record.
☐	Reportable Cd	A code assigned to items that identifies the level of reporting.
☐	Sys Desc	The description of the system identification
☐	Sys Id	Used to tie various end items and components together into a system.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Tran Cd	This code identifies the type of transaction processed.
☐	Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
☐	Type Asset Cd	Identifies the category of an asset as General PP&E, National Defense PP&E or Heritage Asset.

Search for a Real Property Inquiry — Criteria

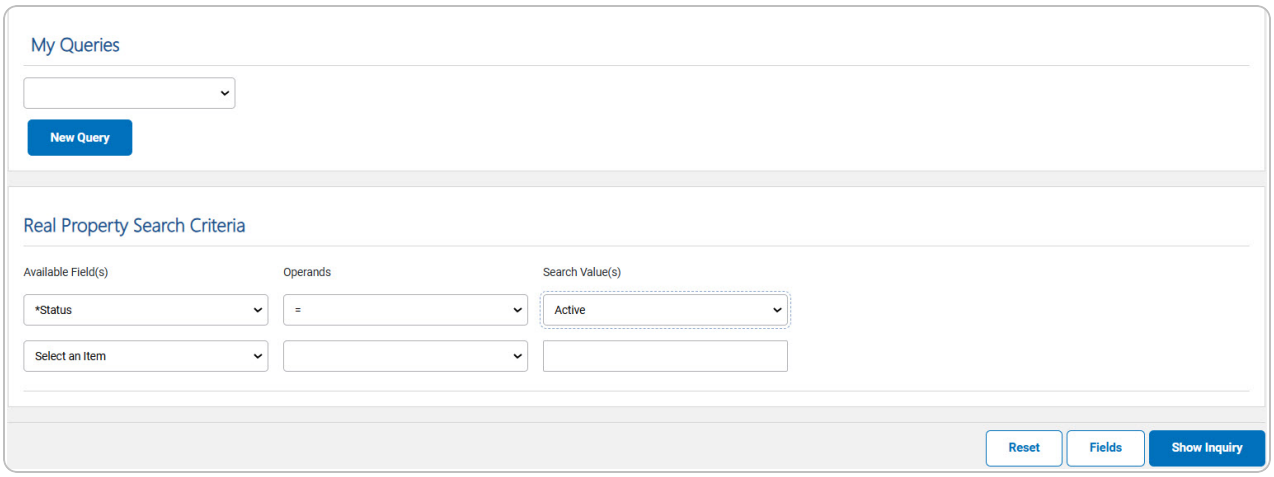
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.



2. *Choose which Available Field(s) to use in the search.*

   A. *The first Available Field(s) option (Status) automatically populates and is not editable.*

B. Use to select the second Available Field.

C. Repeat Step B to add additional search criteria.

Note

Adding another Available Field automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use to select the first Operands.

B. Use to select the second Operands.

C. Repeat Step B to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use to select the first Search Value.

B. Use to select the second Search Value.

C. Repeat Step B to add additional search criteria.

Remove an Available Field Row

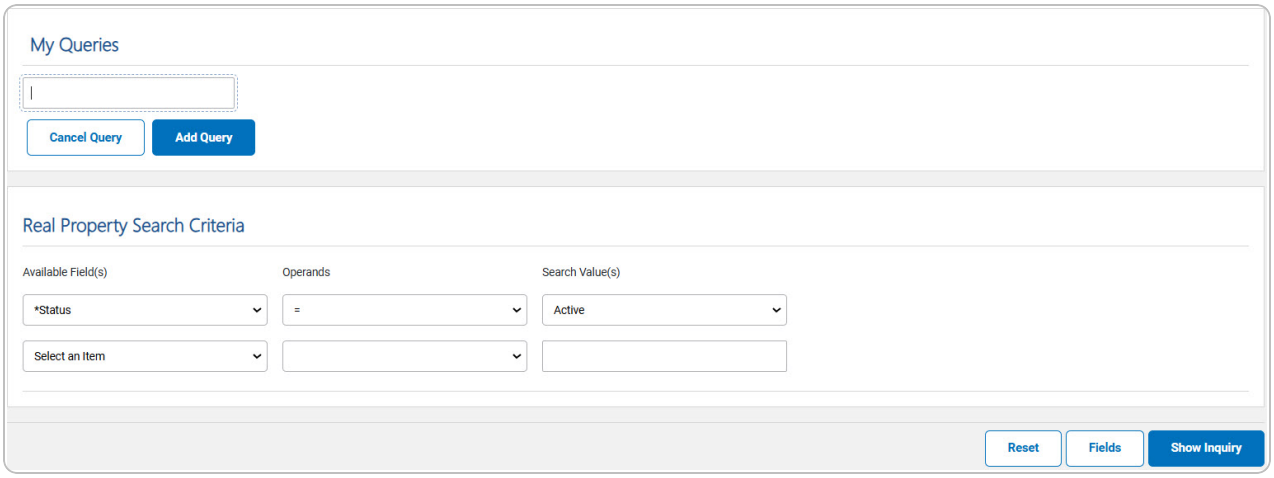
a. Use to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Real Property Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*



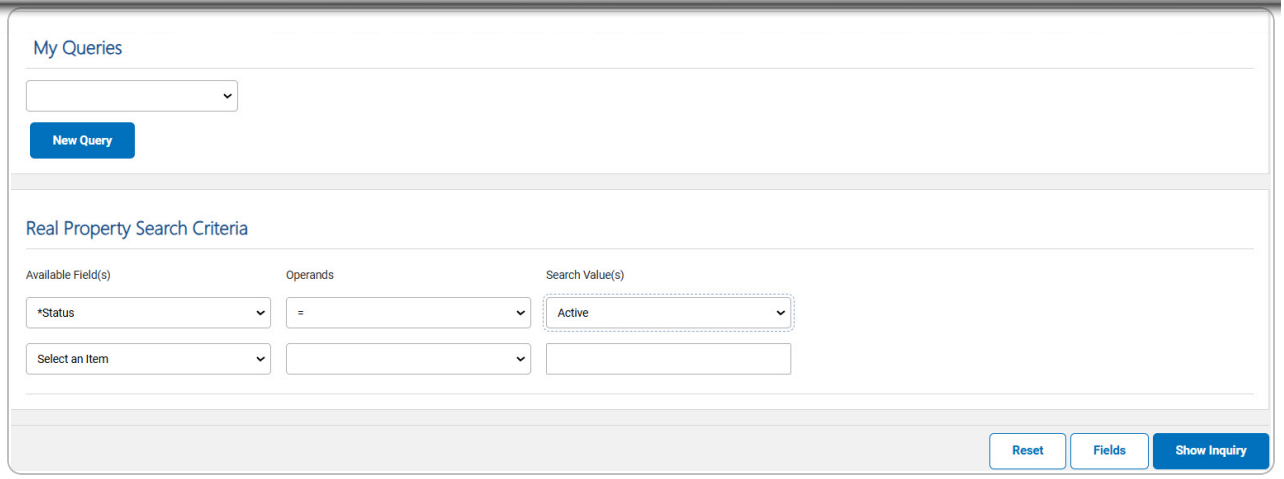
2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*
5. Select Fields. *The* ***Real Property Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Real Property Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



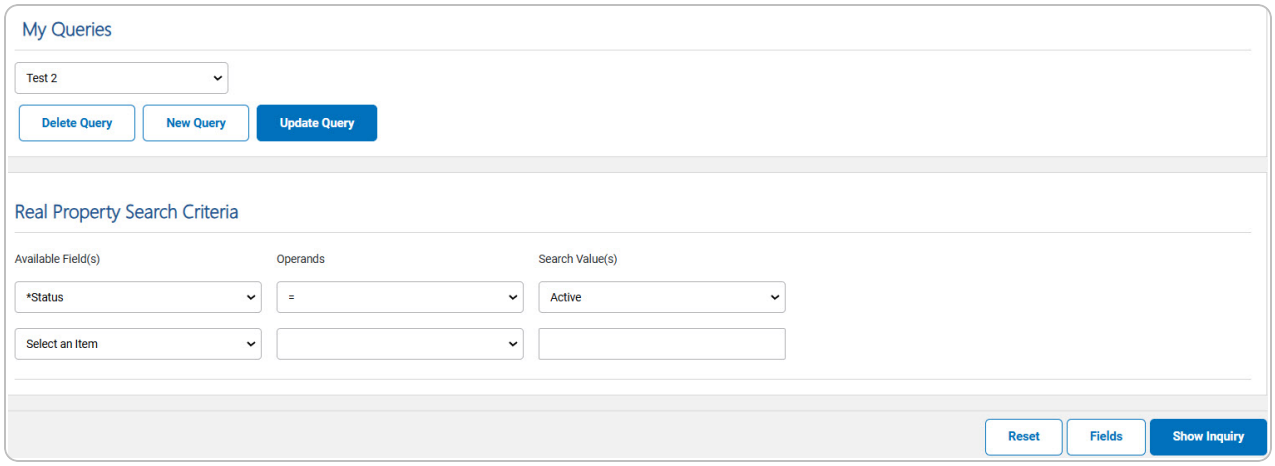
Select Fields. *The **Real Property Inquiry — Select Fields** page appears.*

2. OR

Select Show Inquiry. *The **Real Property Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*



2. *Add and/or Remove rows in the Search Criteria grid as needed.*

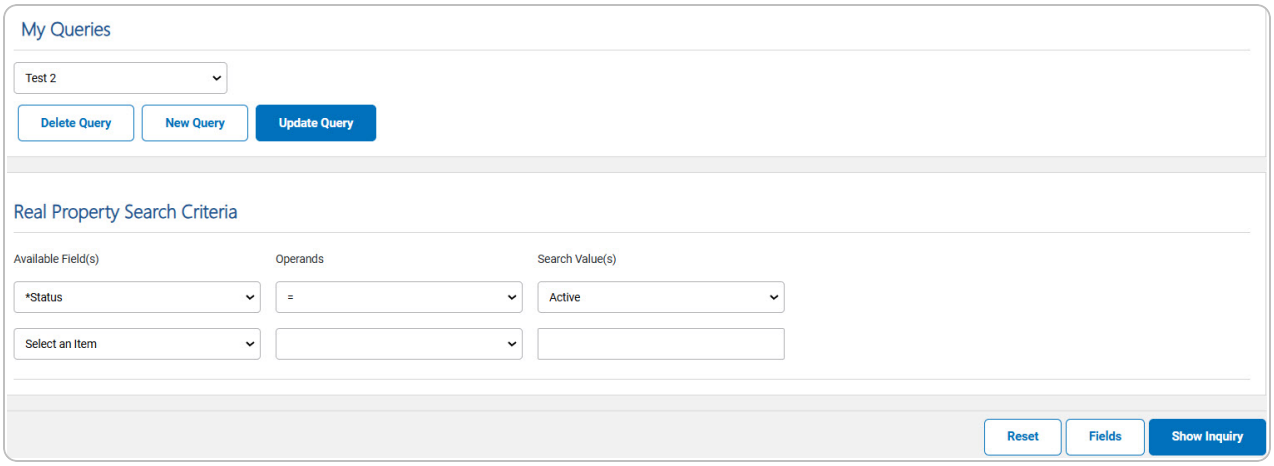
3. Select Update Query. *The query information is updated.*
4. Select Fields. *The **Real Property Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Real Property Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*



2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

My Selections

New Selection List

	Field	Field Description
☑	Fac Nbr	A number assigned to a real property facility within an installation for identification purposes.
☑	Instl Nbr	Unique identification number that identifies a specific location of land or real property facility
☑	RPUID	The Unique Identifier that insures uniqueness of items that are listed in the registry
☑	Tran Cd	This code identifies the type of transaction processed.
☑	UIC	The UIC of the maintenance activity assigned to service the asset.
☑	RPSUID	Real Property Site Unique Identifier
☑	Land Acq Tract Id	Land Acquisition Tract Identification. The tract number assigned by the government for each parcel in a land acquisition.
☐	ACC-SFIS	Pos. 1-2 identifies the accounting class of assets. Remaining positions identify the SFIS code.
☐	Acq Dt	The fund approval/obligation date.
☐	Agency Defined1	Agency set user defined function
☐	Agency Defined2	Agency set user defined function
☐	Agency Defined3	Agency set user defined function
☐	Agency Defined4	Agency set user defined function
☐	Agency Defined5	Agency set user defined function
☐	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Disposition Doc Nbr	A system generated number that is used to track the disposition document.
☐	Disposition Type Action Cd	Code signifying the type of disposition action
☐	Doc Nbr To	Revised Doc Nbr
☐	Eff Dt	Date the transaction being entered occurred. Example: The transfer or receipt of property occurred on 2/15/06 is the effective date even though the date it was input into the computer may have been a later date.

☐	Basic Symbol	A four digit number that identifies the type of funds being used.
☐	Cond Cd	Real Property Condition Code
☐	Cptl Cd	Denotes capital asset not in use, or capital asset with a dollar value under the specified dollar threshold or an asset over a specified dollar threshold that is non-capital.
☐	Deprn Cd	Indicates whether the asset is a capital asset and if fiduciary reportable by DPAS. C – Capital/Non-Reportable, N – Non-Capital/Non-Reportable, T - Capital/Reportable.
☐	Deprn Cost Center	A unique identifier for the organization that handles depreciation.
☐	Deprn Cost Center Desc	A description of the organization that handles depreciation.
☐	Deprn Exp Cd	Identifies the depreciation expense as funded or unfunded.
☐	Deprn Job Order Nbr	Job order number where the depreciation expense is charged.
☐	Deprn Period	Number of months depreciation will be expensed. Minimum number allowed is 24. Code values represent the maximum number of allowable months based on applicable directives.
☐	Deprn Sts Cd	A code and description that identifies the depreciation status of the asset/real property/improvement.
☐	Deprn Task Cd	Task Code/Cost Acct Code/Organization Code where the depreciation expense is charged.
☐	Dept Cd	A three position code which identifies the military department of government entity receiving the appropriation. (Also called Agency Cd or Treasury Symbol.)
☐	Eff Dt	Date the transaction being entered occurred. Example: The transfer or receipt of property occurred on 2/15/06 is the effective date even though the date it was input into the computer may have been a later date.
☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt	The date this row was inserted into the database.
☐	Fac Address	The address of a real property facility, usually for commemorative or descriptive purposes
☐	Fac City	The city of a real property facility, usually for commemorative or descriptive purposes
☐	Fac Country	The country of a real property facility, usually for commemorative or descriptive purposes
☐	Fac State	The state of a real property facility, usually for commemorative or descriptive purposes
☐	Fac ZIP Cd	The postal service zip code of the real property facility.
☐	Facility Condition Index	Facility Condition Index
☐	Fndng Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code
☐	Fndng Cost Center Desc	Identifies the Cost Control Center/MCLO and Work Center or Code
☐	Fund Cd	Used to identify type funding used in the acquisition of assets/services.
☐	FY Cost	Accumulated monthly depreciation to date, in a fiscal year.
☐	Heritage Asset Cd	Code used to identify the type of heritage asset. (Note: Heritage assets are not depreciated)
☐	Interface Flag	Depending on the action, this flag identifies if UIC has a UIT, Accounting, or Real Property Interface.
☐	Intrf Sys Cd	A code that identifies the Interface System.
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)

☐	LOA	Identifies the department code, period of availability, basic symbol, and subhead of the original appropriation.
☐	Mfr Yr	Year an asset was manufactured/built/improved.
☐	Obj Class Cd	Identifies labor and materiel resources utilized in the production processes that apply to accounting transactions.
☐	Oblign Doc Nbr	Number used by accounting to track each obligation record.
☐	Owng Cost Center	A code that identifies an organization
☐	Owng Cost Center Desc	A description of the Owning Cost Center
☐	Pgm Yr	Identifies the beginning/ending year of the appropriation in YYYYYYYY format.
☐	Prior Deprn	Total accumulated depreciation incurred by previous holders of the capital asset.
☐	Qty	Quantity on hand or transaction quantity
☐	Rcpt Action Cd	Code signifying the receipt action processed
☐	Rcpt Action Type Cd	Code signifying the type of receipt action
☐	Rcpt Doc Nbr	Doc Nbr used to receive asset
☐	Remarks	A text field available to record local information/reason for change to record.
☐	RPUID Last Dt Valdt	Real Property Unit Identification Description Last Date Validated
☐	Salvage Value Amt	Estimated value remaining at the end of a capital assets useful life or the amount that can be expected to be recovered from the assets disposal when removed from service.
☐	Sub Head	A four digit suffix to the Basic Symbol that identifies a subdivision of funds.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Trading Basic Symbol	A 4-position code that identifies the type of funds being used.
☐	Trading Dept Cd	A 3-position alphanumeric code that identifies the Department or Agency used to facilitate the preparation of the Financial Report.
☐	Trading Partner Nbr	This code identifies the intragovernmental trading partner for transfer actions. Used when reporting eliminations in the CFO Accounting Statement Report.
☐	Trading Subhead	A 4-position alphanumeric code used in financial transactions.
☐	Tran Action Cd	The last visit date for the Real Property site
☐	Tran Action Type Cd	An identifier for the type of transaction processed
☐	Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
☐	Transfer Type Cd	Code to let user know what type of fund the asset has been transferred from or being transferred to.
☐	Type Fund Cd	A code that indicates if assets were purchased with Defense Working Capital Funds (DWCF).
☐	UI	Indicates the measurable amount by which assets are issued. This code shows the smallest amount of an asset that can be requisitioned and issued. For real property this is the primary reporting unit of measure defined as the measure of area.
☐	Yr Svc Life	Number of years of recommended service life based upon applicable directives.
☐	Status	Record is either Active or Deleted

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

OR

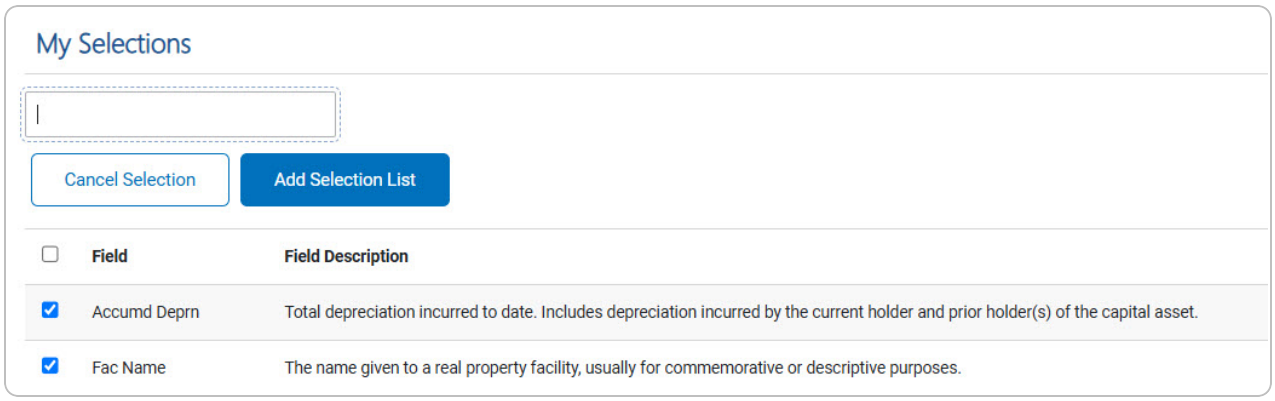
Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*



Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

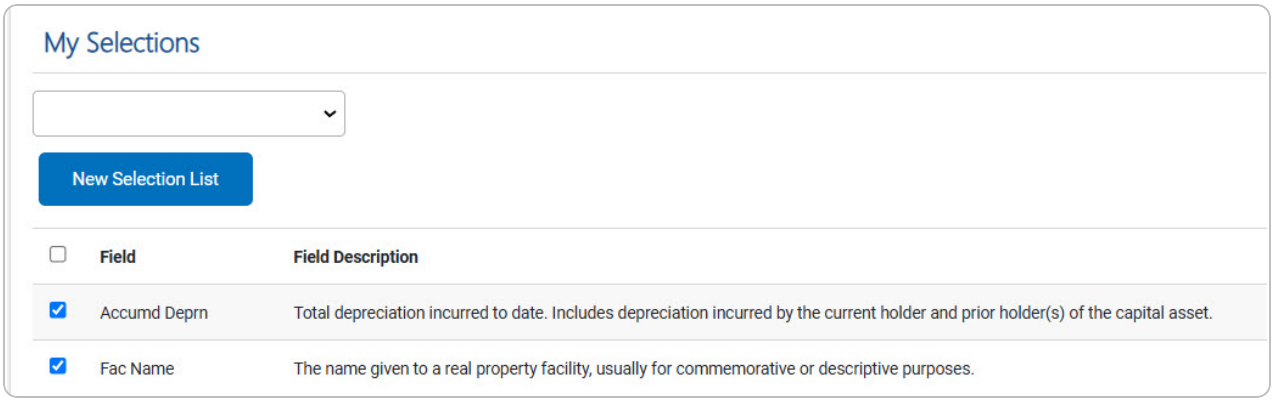
2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

   Select Show Inquiry for small volumes of data. *The* ***Real Property Inquiry — Results*** *page appears.*
5. **OR**

   Select Submit for large volumes of data. *The* ***Real Property Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.



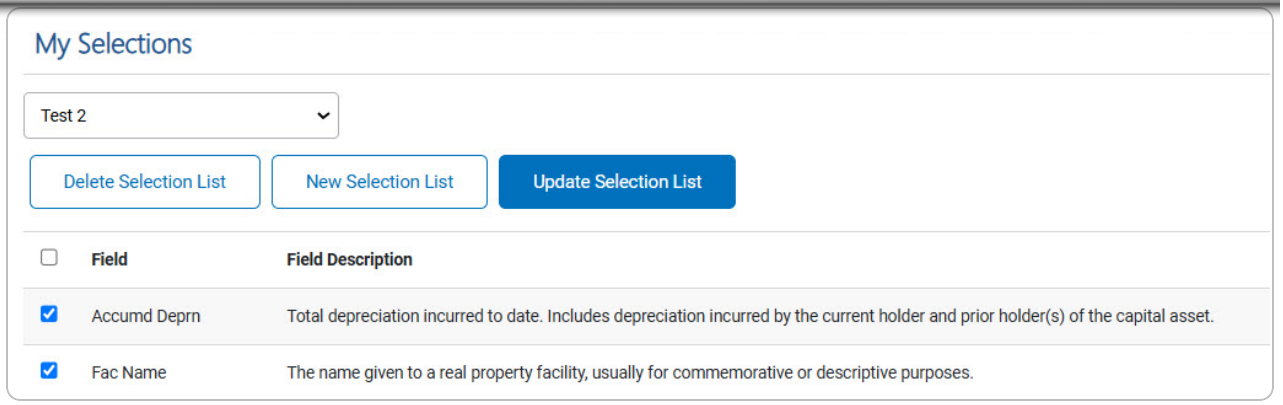
2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*
3. Select Show Inquiry for small volumes of data. *The **Real Property Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Real Property Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



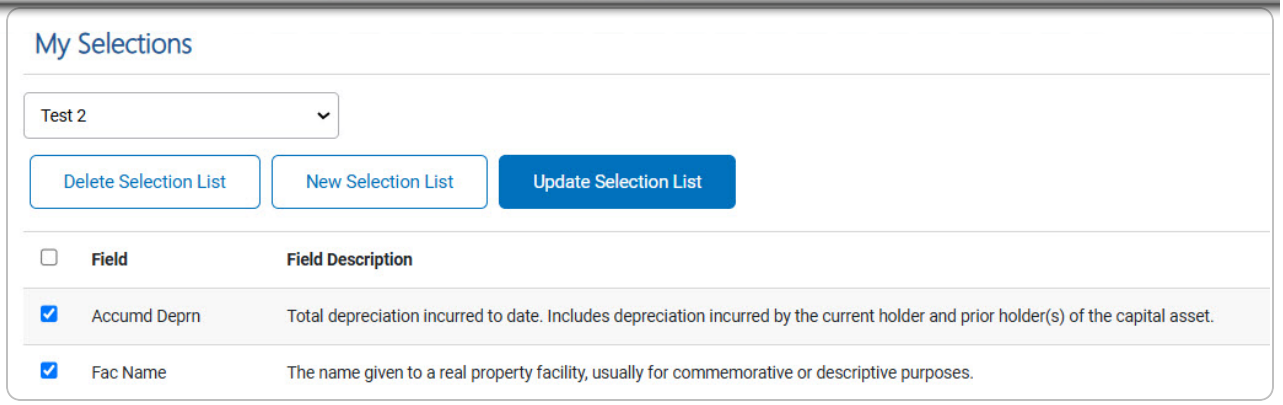
2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*
4. Select Show Inquiry for small volumes of data. *The* ***Real Property Inquiry — Results*** *page appears.*

OR

Select Submit for large volumes of data. *The* ***Real Property Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Real Property Inquiry** page appears.*

	Field	Field Description
☑	Accumd Deprn	Total depreciation incurred to date. Includes depreciation incurred by the current holder and prior holder(s) of the capital asset.
☑	Fac Name	The name given to a real property facility, usually for commemorative or descriptive purposes.
☑	Fac Nbr	A number assigned to a real property facility within an installation for identification purposes.
☑	Land Acq Tract Id	Land Acquisition Tract Identification. The tract number assigned by the government for each parcel in a land acquisition.
☑	RP Site Name	The Real Property Site Name
☑	RPSUID	A unique identifier that identifies the Real Property site.
☑	RPUID	The Unique Identifier that insures uniqueness of items that are listed in the registry
☑	Instl Nbr	Unique identification number that identifies a specific location of land or real property facility
☑	Total Cost	Total Cost. Cost of individual end item assets including cost of stand-alone components
☑	UIC	The UIC of the maintenance activity assigned to service the asset.
☑	UIC Name	A unit, organization, or activity name
☐	ACC-SFIS	Pos. 1-2 identifies the accounting class of assets. Remaining positions identify the SFIS code.
☐	Acct Rpt Nbr	Report number assigned when the accounting data is generated
☐	Acq Dt	The fund approval/obligation date.
☐	Activation Dt	The date a Serial Asset was put into use.
☐	Agency Defined1	Agency set user defined function
☐	Agency Defined2	Agency set user defined function
☐	Agency Defined3	Agency set user defined function
☐	Agency Defined4	Agency set user defined function
☐	Agency Defined5	Agency set user defined function
☐	ASN	This number is the revised APPN. This field includes the Appropriation Allotment Serial Number and the Funds Code
☐	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.

☐	Basic Symbol	A four digit number that identifies the type of funds being used.
☐	Cond Cd	Real Property Condition Code
☐	Cptl Cd	Denotes capital asset not in use, or capital asset with a dollar value under the specified dollar threshold or an asset over a specified dollar threshold that is non-capital.
☐	Deprn Cd	Indicates whether the asset is a capital asset and if fiduciary reportable by DPAS. C – Capital/Non-Reportable, N – Non-Capital/Non-Reportable, T - Capital/Reportable.
☐	Deprn Cost Center	A unique identifier for the organization that handles depreciation.
☐	Deprn Cost Center Desc	A description of the organization that handles depreciation.
☐	Deprn Exp Cd	Identifies the depreciation expense as funded or unfunded.
☐	Deprn Job Order Nbr	Job order number where the depreciation expense is charged.
☐	Deprn Period	Number of months depreciation will be expensed. Minimum number allowed is 24. Code values represent the maximum number of allowable months based on applicable directives.
☐	Deprn Sts Cd	A code and description that identifies the depreciation status of the asset/real property/improvement.
☐	Deprn Task Cd	Task Code/Cost Acct Code/Organization Code where the depreciation expense is charged.
☐	Dept Cd	A three position code which identifies the military department of government entity receiving the appropriation. (Also called Agency Cd or Treasury Symbol.)
☐	Eff Dt	Date the transaction being entered occurred. Example: The transfer or receipt of property occurred on 2/15/06 is the effective date even though the date it was input into the computer may have been a later date.
☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt	The date this row was inserted into the database.
☐	Fac Address	The address of a real property facility, usually for commemorative or descriptive purposes
☐	Fac City	The city of a real property facility, usually for commemorative or descriptive purposes
☐	Fac Country	The country of a real property facility, usually for commemorative or descriptive purposes
☐	Fac State	The state of a real property facility, usually for commemorative or descriptive purposes
☐	Fac ZIP Cd	The postal service zip code of the real property facility.
☐	Facility Condition Index	Facility Condition Index
☐	Fndng Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code
☐	Fndng Cost Center Desc	Identifies the Cost Control Center/MCLO and Work Center or Code
☐	Fund Cd	Used to identify type funding used in the acquisition of assets/services.
☐	FY Cost	Accumulated monthly depreciation to date, in a fiscal year.
☐	Heritage Asset Cd	Code used to identify the type of heritage asset. (Note: Heritage assets are not depreciated)
☐	Interface Flag	Depending on the action, this flag identifies if UIC has a UIT, Accounting, or Real Property Interface.
☐	Intrf Sys Cd	A code that identifies the Interface System.
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)

☐	LOA	Identifies the department code, period of availability, basic symbol, and subhead of the original appropriation.
☐	Mfr Yr	Year an asset was manufactured/built/improved.
☐	Obj Class Cd	Identifies labor and materiel resources utilized in the production processes that apply to accounting transactions.
☐	Oblign Doc Nbr	Number used by accounting to track each obligation record.
☐	Owng Cost Center	A code that identifies an organization
☐	Owng Cost Center Desc	A description of the Owning Cost Center
☐	Pgm Yr	Identifies the beginning/ending year of the appropriation in YYYYYYYY format.
☐	Prior Deprn	Total accumulated depreciation incurred by previous holders of the capital asset.
☐	Qty	Quantity on hand or transaction quantity
☐	Rcpt Action Cd	Code signifying the receipt action processed
☐	Rcpt Action Type Cd	Code signifying the type of receipt action
☐	Rcpt Doc Nbr	Doc Nbr used to receive asset
☐	Remarks	A text field available to record local information/reason for change to record.
☐	RPUID Last Dt Valdt	Real Property Unit Identification Description Last Date Validated
☐	Salvage Value Amt	Estimated value remaining at the end of a capital assets useful life or the amount that can be expected to be recovered from the assets disposal when removed from service.
☐	Sub Head	A four digit suffix to the Basic Symbol that identifies a subdivision of funds.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Trading Basic Symbol	A 4-position code that identifies the type of funds being used.
☐	Trading Dept Cd	A 3-position alphanumeric code that identifies the Department or Agency used to facilitate the preparation of the Financial Report.
☐	Trading Partner Nbr	This code identifies the intragovernmental trading partner for transfer actions. Used when reporting eliminations in the CFO Accounting Statement Report.
☐	Trading Subhead	A 4-position alphanumeric code used in financial transactions.
☐	Tran Action Cd	The last visit date for the Real Property site
☐	Tran Action Type Cd	An identifier for the type of transaction processed
☐	Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
☐	Transfer Type Cd	Code to let user know what type of fund the asset has been transferred from or being transferred to.
☐	Type Fund Cd	A code that indicates if assets were purchased with Defense Working Capital Funds (DWCF).
☐	UI	Indicates the measurable amount by which assets are issued. This code shows the smallest amount of an asset that can be requisitioned and issued. For real property this is the primary reporting unit of measure defined as the measure of area.
☐	Yr Svc Life	Number of years of recommended service life based upon applicable directives.
☐	Status	Record is either Active or Deleted

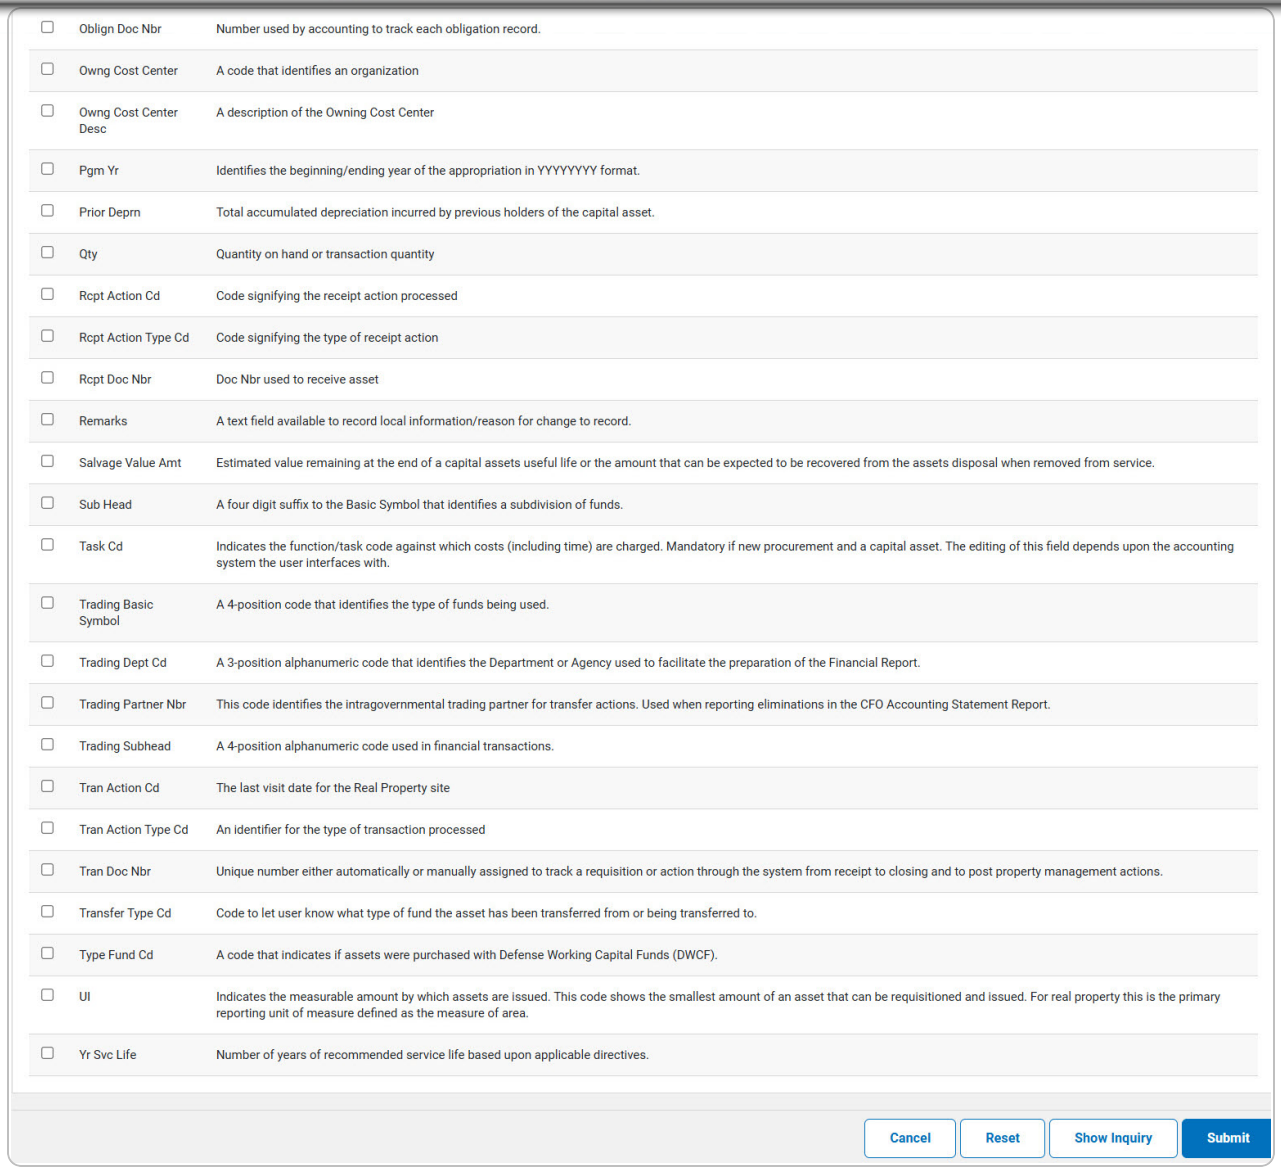
New Selection List

	Field	Field Description
☑	Accumd Deprn	Total depreciation incurred to date. Includes depreciation incurred by the current holder and prior holder(s) of the capital asset.
☑	Acq Dt	The fund approval/obligation date.
☑	Activation Dt	The date a Serial Asset was put into use.
☑	Deprn Cd	Indicates whether the asset is a capital asset and if fiduciary reportable by DPAS. C – Capital/Non-Reportable, N – Non-Capital/Non-Reportable, T - Capital/Reportable.
☑	Deprn Period	Number of months depreciation will be expensed. Minimum number allowed is 24. Code values represent the maximum number of allowable months based on applicable directives.
☑	Deprn Sts Cd	A code and description that identifies the depreciation status of the asset/real property/improvement.
☑	Eff Dt	Date the transaction being entered occurred. Example: The transfer or receipt of property occurred on 2/15/06 is the effective date even though the date it was input into the computer may have been a later date.
☑	Fac Name	The name given to a real property facility, usually for commemorative or descriptive purposes.
☑	Fac Nbr	A number assigned to a real property facility within an installation for identification purposes.
☑	Instl Nbr	Unique identification number that identifies a specific location of land or real property facility
☑	Interface Flag	Depending on the action, this flag identifies if UIC has a UIT, Accounting, or Real Property Interface.
☑	RPUID	The Unique Identifier that insures uniqueness of items that are listed in the registry
☑	Total Cost	Total Cost. Cost of individual end item assets including cost of stand-alone components
☑	UIC	The UIC of the maintenance activity assigned to service the asset.
☐	ACC-SFIS	Pos. 1-2 identifies the accounting class of assets. Remaining positions identify the SFIS code.
☐	Acct Rpt Nbr	Report number assigned when the accounting data is generated
☐	ASN	This number is the revised APPN. This field includes the Appropriation Allotment Serial Number and the Funds Code

☐	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Basic Symbol	A four digit number that identifies the type of funds being used.
☐	Cond Cd	Real Property Condition Code
☐	Cptl Cd	Denotes capital asset not in use, or capital asset with a dollar value under the specified dollar threshold or an asset over a specified dollar threshold that is non-capital.
☐	Deprn Cost Center	A unique identifier for the organization that handles depreciation.
☐	Deprn Cost Center Desc	A description of the organization that handles depreciation.
☐	Deprn Exp Cd	Identifies the depreciation expense as funded or unfunded.
☐	Deprn Job Order Nbr	Job order number where the depreciation expense is charged.
☐	Deprn Task Cd	Task Code/Cost Acct Code/Organization Code where the depreciation expense is charged.
☐	Dept Cd	A three position code which identifies the military department of government entity receiving the appropriation. (Also called Agency Cd or Treasury Symbol.)
☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt	The date this row was inserted into the database.
☐	Fndng Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code
☐	Fndng Cost Center Desc	Identifies the Cost Control Center/MCLO and Work Center or Code
☐	Fund Cd	Used to identify type funding used in the acquisition of assets/services.
☐	Facility Condition Index	Facility Condition Index
☐	FY Cost	Accumulated monthly depreciation to date, in a fiscal year.
☐	Heritage Asset Cd	Code used to identify the type of heritage asset. (Note: Heritage assets are not depreciated)
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	LOA	Identifies the department code, period of availability, basic symbol, and subhead of the original appropriation.
☐	Mfr Yr	Year an asset was manufactured/built/improved.
☐	Obj Class Cd	Identifies labor and materiel resources utilized in the production processes that apply to accounting transactions.



☐	Oblign Doc Nbr	Number used by accounting to track each obligation record.
☐	Owng Cost Center	A code that identifies an organization
☐	Owng Cost Center Desc	A description of the Owning Cost Center
☐	Pgm Yr	Identifies the beginning/ending year of the appropriation in YYYYYYYY format.
☐	Prior Deprn	Total accumulated depreciation incurred by previous holders of the capital asset.
☐	Qty	Quantity on hand or transaction quantity
☐	Rcpt Action Cd	Code signifying the receipt action processed
☐	Rcpt Action Type Cd	Code signifying the type of receipt action
☐	Rcpt Doc Nbr	Doc Nbr used to receive asset
☐	Remarks	A text field available to record local information/reason for change to record.
☐	Salvage Value Amt	Estimated value remaining at the end of a capital assets useful life or the amount that can be expected to be recovered from the assets disposal when removed from service.
☐	Sub Head	A four digit suffix to the Basic Symbol that identifies a subdivision of funds.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Trading Basic Symbol	A 4-position code that identifies the type of funds being used.
☐	Trading Dept Cd	A 3-position alphanumeric code that identifies the Department or Agency used to facilitate the preparation of the Financial Report.
☐	Trading Partner Nbr	This code identifies the intragovernmental trading partner for transfer actions. Used when reporting eliminations in the CFO Accounting Statement Report.
☐	Trading Subhead	A 4-position alphanumeric code used in financial transactions.
☐	Tran Action Cd	The last visit date for the Real Property site
☐	Tran Action Type Cd	An identifier for the type of transaction processed
☐	Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
☐	Transfer Type Cd	Code to let user know what type of fund the asset has been transferred from or being transferred to.
☐	Type Fund Cd	A code that indicates if assets were purchased with Defense Working Capital Funds (DWCF).
☐	UI	Indicates the measurable amount by which assets are issued. This code shows the smallest amount of an asset that can be requisitioned and issued. For real property this is the primary reporting unit of measure defined as the measure of area.
☐	Yr Svc Life	Number of years of recommended service life based upon applicable directives.

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

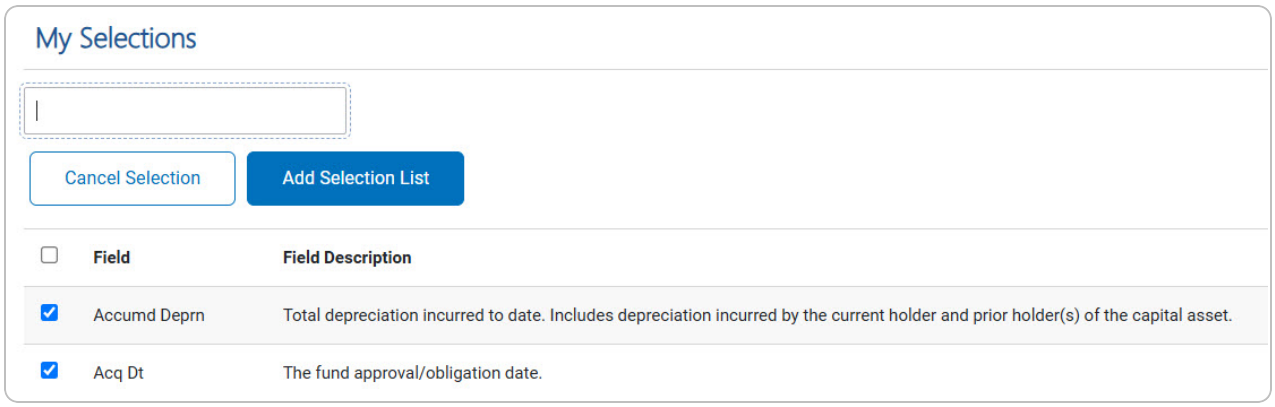
  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*



Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

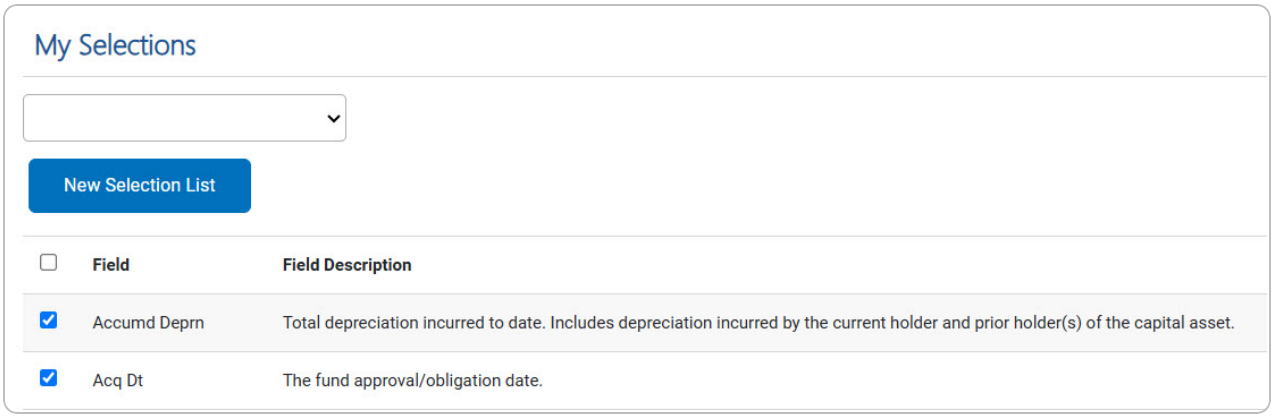
2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

   Select Show Inquiry for small volumes of data. *The* ***Real Property Capital Asset Inquiry — Results*** *page appears.*
5. **OR**

   Select Submit for large volumes of data. *The* ***Real Property Capital Asset Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.



2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

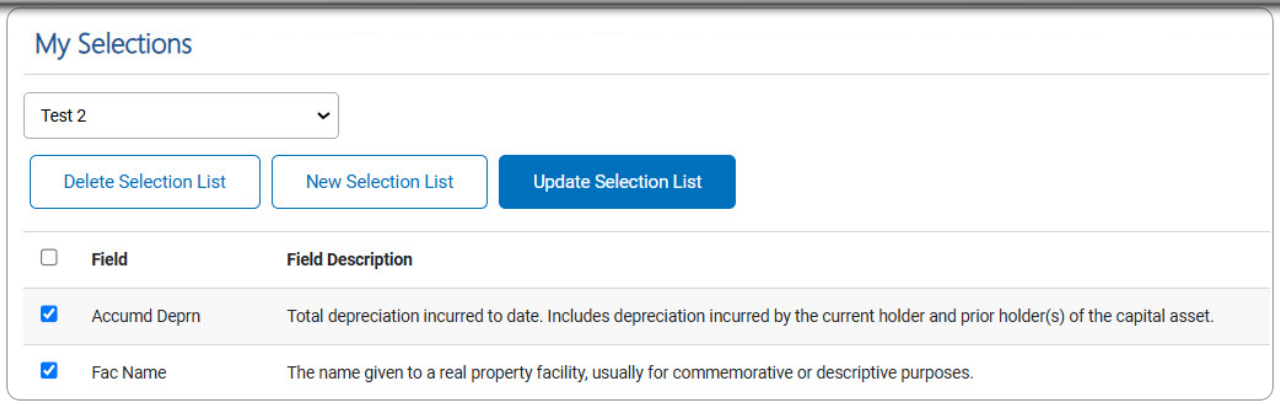
3. Select Show Inquiry for small volumes of data. *The* ***Real Property Capital Asset Inquiry — Results*** *page appears.*

OR

Select Submit for large volumes of data. *The* ***Real Property Capital Asset Inquiry Transaction Status*** *page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



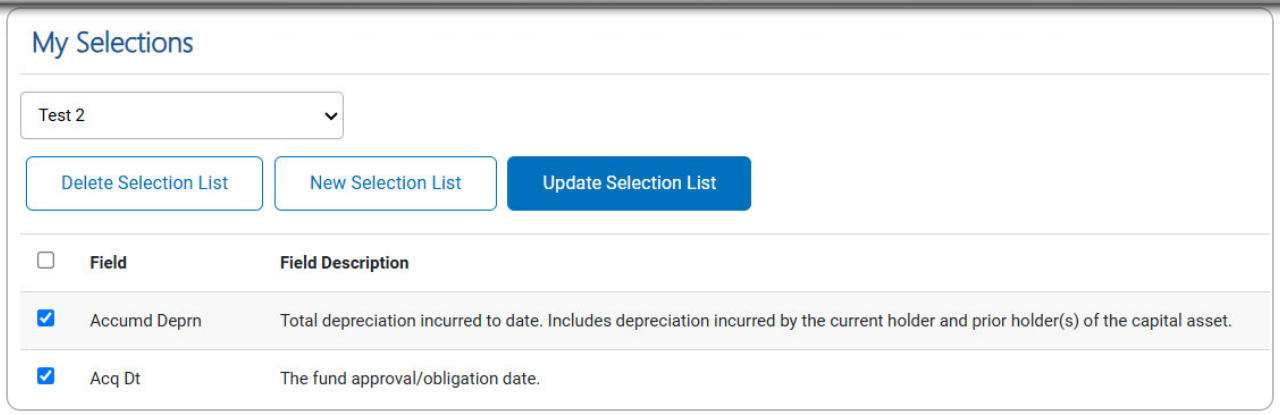
2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*
4. Select Show Inquiry for small volumes of data. *The* ***Real Property Capital Asset Inquiry — Results*** *page appears.*

OR

Select Submit for large volumes of data. *The* ***Real Property Capital Asset Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Real Property Capital Asset Inquiry** page appears.*

New Selection List

	Field	Field Description
☑	Acq Dt	The fund approval/obligation date.
☑	Activation Dt	The date a Serial Asset was put into use.
☑	Deprn Period	Number of months depreciation will be expensed. Minimum number allowed is 24. Code values represent the maximum number of allowable months based on applicable directives.
☑	Deprn Sts Cd	A code and description that identifies the depreciation status of the asset/real property/improvement.
☑	Eff Dt	Date the transaction being entered occurred. Example: The transfer or receipt of property occurred on 2/15/06 is the effective date even though the date it was input into the computer may have been a later date.
☑	Fac Name	The name given to a real property facility, usually for commemorative or descriptive purposes.
☑	Fac Nbr	A number assigned to a real property facility within an installation for identification purposes.
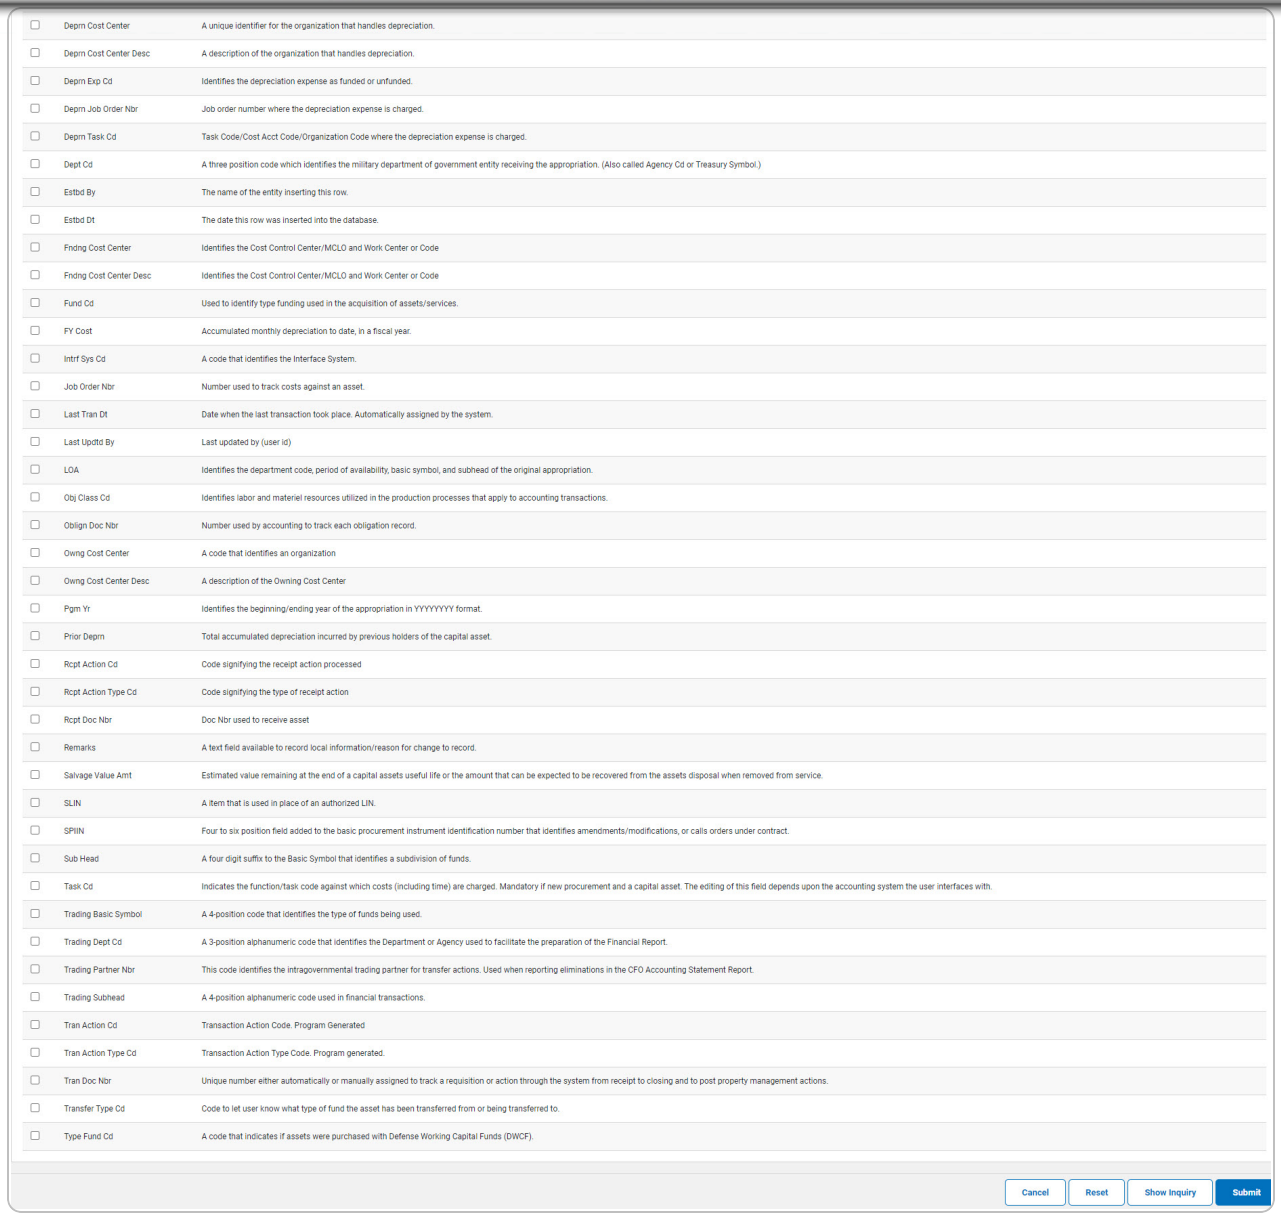
☑	Impv Cost	Total cost of improving serial asset which will extend the useful life of the asset.
☑	Impv Nbr	System generated number assigned to relate the correct amount each fund source paid for the improvement within the same installation number, facility number, and document number.
☑	Instl Nbr	Unique identification number that identifies a specific location of land or real property facility
☑	RPUID	The Unique Identifier that insures uniqueness of items that are listed in the registry
☑	Total Cost	Total Cost. Cost of individual end item assets including cost of stand-alone components
☑	UIC	The UIC of the maintenance activity assigned to service the asset.
☐	Years Service Life	Years Service Life
☐	Reason Cd	Reason Cd
☐	ACC-SFIS	Pos. 1-2 identifies the accounting class of assets. Remaining positions identify the SFIS code.
☐	Acct Rpt Nbr	Report number assigned when the accounting data is generated
☐	Accumd Deprn	Total depreciation incurred to date. Includes depreciation incurred by the current holder and prior holder(s) of the capital asset.
☐	ACRN	Two position alpha or alpha/numeric code assigned to each discrete accounting classification citation within a contract.
☐	ASN	This number is the revised APPN. This field includes the Appropriation Allotment Serial Number and the Funds Code
☐	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Basic Symbol	A four digit number that identifies the type of funds being used.
☐	CLIN	A four position field that identifies different contract line items within the same contract.
☐	Cntr/PO Nbr	Assigned by the procurement activity and used to identify requests for a supply purchase.
☐	Cptl Cd	Denotes capital asset not in use, or capital asset with a dollar value under the specified dollar threshold or an asset over a specified dollar threshold that is non-capital.
☐	Deprn Cd	Indicates whether the asset is a capital asset and if fiduciary reportable by DPAS. C – Capital/Non-Reportable, N – Non-Capital/Non-Reportable, T - Capital/Reportable.



☐	Deprn Cost Center	A unique identifier for the organization that handles depreciation.
☐	Deprn Cost Center Desc	A description of the organization that handles depreciation.
☐	Deprn Exp Cd	Identifies the depreciation expense as funded or unfunded.
☐	Deprn Job Order Nbr	Job order number where the depreciation expense is charged.
☐	Deprn Task Cd	Task Code/Cost Acct Code/Organization Code where the depreciation expense is charged.
☐	Dept Cd	A three position code which identifies the military department of government entity receiving the appropriation. (Also called Agency Cd or Treasury Symbol.)
☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt	The date this row was inserted into the database.
☐	Fndng Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code
☐	Fndng Cost Center Desc	Identifies the Cost Control Center/MCLO and Work Center or Code
☐	Fund Cd	Used to identify type funding used in the acquisition of assets/services.
☐	FY Cost	Accumulated monthly depreciation to date, in a fiscal year.
☐	Intrf Sys Cd	A code that identifies the Interface System.
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	LOA	Identifies the department code, period of availability, basic symbol, and subhead of the original appropriation.
☐	Obj Class Cd	Identifies labor and materiel resources utilized in the production processes that apply to accounting transactions.
☐	Oblign Doc Nbr	Number used by accounting to track each obligation record.
☐	Owng Cost Center	A code that identifies an organization
☐	Owng Cost Center Desc	A description of the Owning Cost Center
☐	Pgm Yr	Identifies the beginning/ending year of the appropriation in YYYYYYYY format.
☐	Prior Deprn	Total accumulated depreciation incurred by previous holders of the capital asset.
☐	Rcpt Action Cd	Code signifying the receipt action processed
☐	Rcpt Action Type Cd	Code signifying the type of receipt action
☐	Rcpt Doc Nbr	Doc Nbr used to receive asset
☐	Remarks	A text field available to record local information/reason for change to record.
☐	Salvage Value Amt	Estimated value remaining at the end of a capital assets useful life or the amount that can be expected to be recovered from the assets disposal when removed from service.
☐	SLIN	A item that is used in place of an authorized LIN.
☐	SPIIN	Four to six position field added to the basic procurement instrument identification number that identifies amendments/modifications, or calls orders under contract.
☐	Sub Head	A four digit suffix to the Basic Symbol that identifies a subdivision of funds.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Trading Basic Symbol	A 4-position code that identifies the type of funds being used.
☐	Trading Dept Cd	A 3-position alphanumeric code that identifies the Department or Agency used to facilitate the preparation of the Financial Report.
☐	Trading Partner Nbr	This code identifies the intragovernmental trading partner for transfer actions. Used when reporting eliminations in the CFO Accounting Statement Report.
☐	Trading Subhead	A 4-position alphanumeric code used in financial transactions.
☐	Tran Action Cd	Transaction Action Code. Program Generated
☐	Tran Action Type Cd	Transaction Action Type Code. Program generated.
☐	Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
☐	Transfer Type Cd	Code to let user know what type of fund the asset has been transferred from or being transferred to.
☐	Type Fund Cd	A code that indicates if assets were purchased with Defense Working Capital Funds (DWCF).

New Selection List

	Field	Field Description
☑	Fac Nbr	A number assigned to a real property facility within an installation for identification purposes.
☑	Instl Nbr	Unique identification number that identifies a specific location of land or real property facility
☑	RPUID	The Unique Identifier that insures uniqueness of items that are listed in the registry
☑	Tran Cd	This code identifies the type of transaction processed.
☑	UIC	The UIC of the maintenance activity assigned to service the asset.
☑	RPSUID	Real Property Site Unique Identifier
☑	Land Acq Tract Id	Land Acquisition Tract Identification. The tract number assigned by the government for each parcel in a land acquisition.
☐	ACC-SFIS	Pos. 1-2 identifies the accounting class of assets. Remaining positions identify the SFIS code.
☐	Acq Dt	The fund approval/obligation date.
☐	Agency Defined1	Agency set user defined function
☐	Agency Defined2	Agency set user defined function
☐	Agency Defined3	Agency set user defined function
☐	Agency Defined4	Agency set user defined function
☐	Agency Defined5	Agency set user defined function
☐	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Disposition Doc Nbr	A system generated number that is used to track the disposition document.
☐	Disposition Type Action Cd	Code signifying the type of disposition action
☐	Doc Nbr To	Revised Doc Nbr
☐	Eff Dt	Date the transaction being entered occurred. Example: The transfer or receipt of property occurred on 2/15/06 is the effective date even though the date it was input into the computer may have been a later date.

☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt	The date this row was inserted into the database.
☐	Fac Name	The name given to a real property facility, usually for commemorative or descriptive purposes.
☐	Gain Amt	The amount of Gain taken on a Transaction
☐	Heritage Asset Cd	Code used to identify the type of heritage asset. (Note: Heritage assets are not depreciated)
☐	History Remarks	A text field available to record local information/reason for change to record.
☐	Interface Flag	Depending on the action, this flag identifies if UIC has a UIT, Accounting, or Real Property Interface.
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	Lease Cd	Indicates the lease status of a particular asset.
☐	Lease End Dt	The date the assets warranty, service or lease contract expires
☐	Lease Start Dt	The date the assets warranty, service or lease contract starts
☐	Loan Cd	Indicates the loan status of a particular asset.
☐	Loss Amt	The amount of Loss taken on a Transaction
☐	Mfr Yr	Year an asset was manufactured/built/improved.
☐	Pgm Id	Unique software identification.
☐	POC	The name of the individual who determined if the asset should be considered excess or not. Also, for SCHOOL DONATION the name of the individual at the school where the excessed asset is being donated. A name used to identify individual as the point of contact
☐	Qty	Quantity on hand or transaction quantity
☐	Rcpt Action Cd	Code signifying the receipt action processed
☐	Rcpt Action Type Cd	Code signifying the type of receipt action
☐	Rcpt Doc Nbr	Doc Nbr used to receive asset
☐	Remarks	A text field available to record local information/reason for change to record.
☐	RPUID Last Dt Valdt	Real Property Unit Identification Description Last Date Validated
☐	RP Site Name	Real Property Site Name
☐	Selling Price	Field to show the amount an asset has been sold for.
☐	Trading Partner Nbr To	Revised Trading Partner Nbr.
☐	Tran Action Cd	Transaction Action Code. Program Generated
☐	Tran Action Type Cd	Transaction Action Type Code. Program generated.
☐	Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
☐	Transfer Type Cd To	Revised code to let user know what type of fund the asset has been transferred from or being transferred to.
☐	Type Action	Designates selection of an action to be taken on disposition of asset
☐	UI	Indicates the measurable amount by which assets are issued. This code shows the smallest amount of an asset that can be requisitioned and issued. For real property this is the primary reporting unit of measure defined as the measure of area.
☐	Write Off Amt	The undepreciated amount (Total Cost - Accumulated Depreciation) that was written off when the asset was disposed.
☐	Yr Svc Life	Number of years of recommended service life based upon applicable directives.

Cancel | Reset | Show Inquiry | Submit

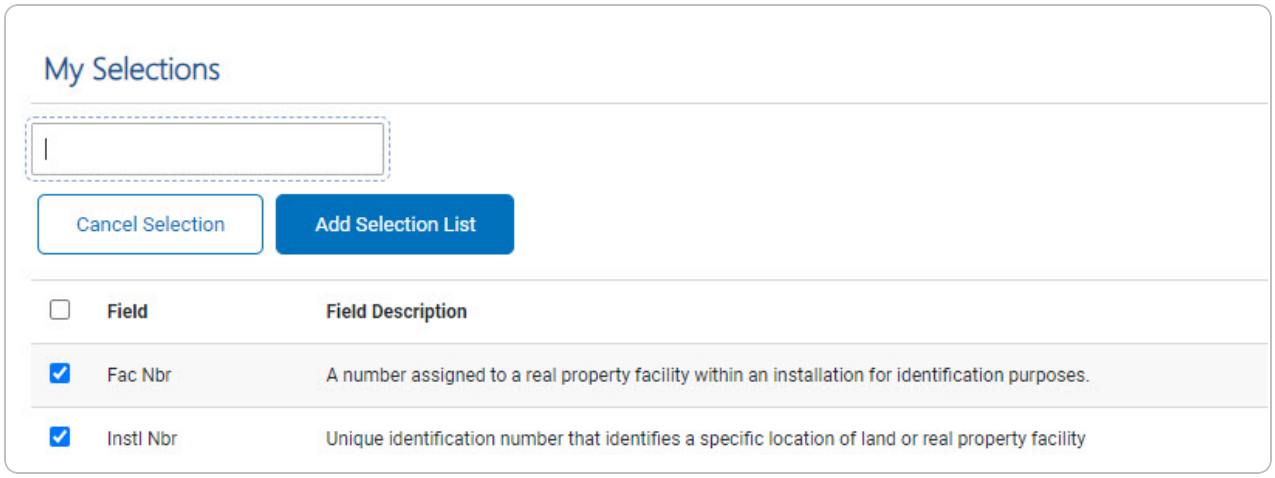
2. Choose the desired file type:
   - Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

     OR

     Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*
3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*
4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select [New Selection List]. *The page refreshes, and Selections changes from a drop-down field to a text field.*



Note

Selecting [Cancel Selection] at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*

3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

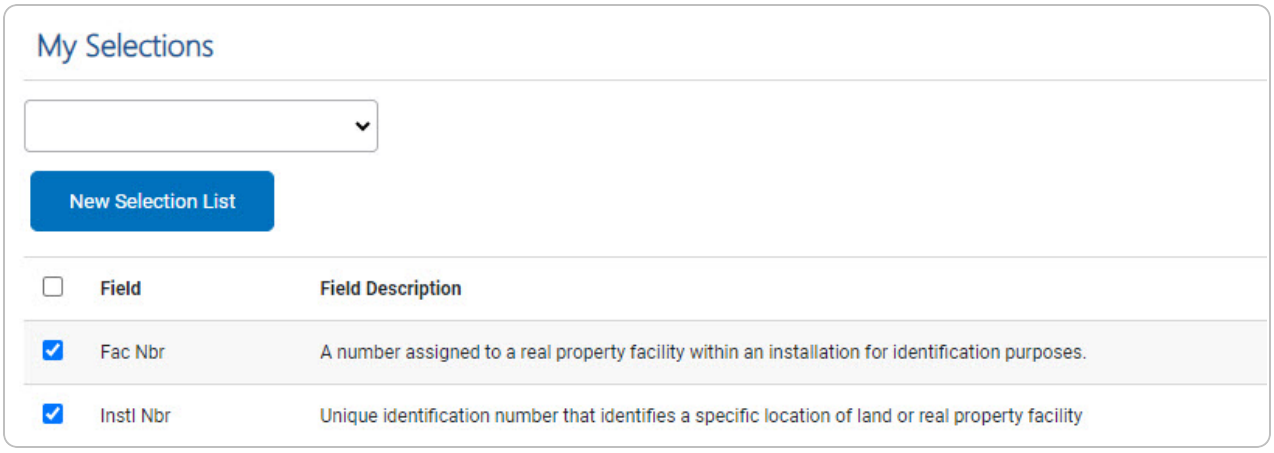
   Select Show Inquiry for small volumes of data. *The* ***Real Property Activity Inquiry — Results*** *page appears.*

5. **OR**

   Select Submit for large volumes of data. *The* ***Real Property Activity Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.



2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

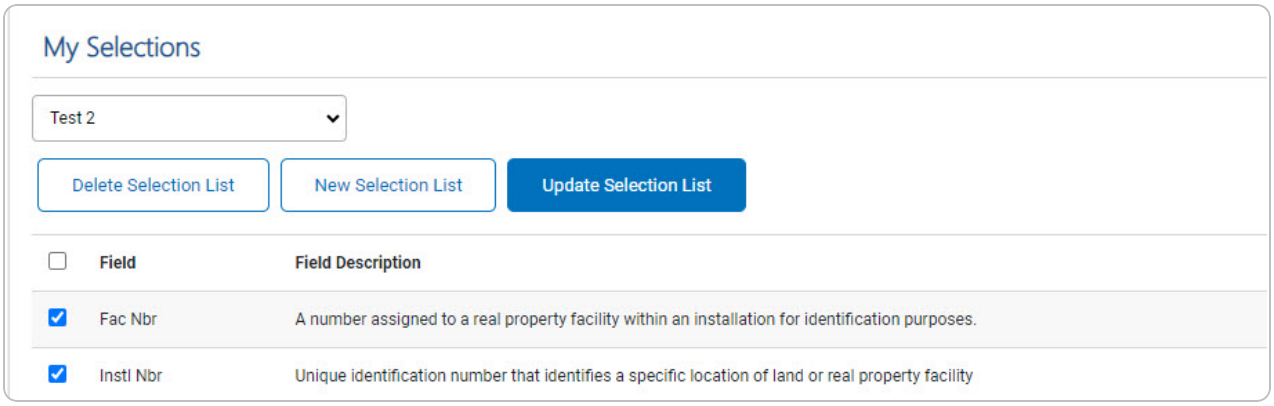
   Select Show Inquiry for small volumes of data. *The* ***Real Property Activity Inquiry — Results*** *page appears.*

3. **OR**

Select Submit for large volumes of data. *The* ***Real Property Activity Inquiry Transaction Status*** *page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*

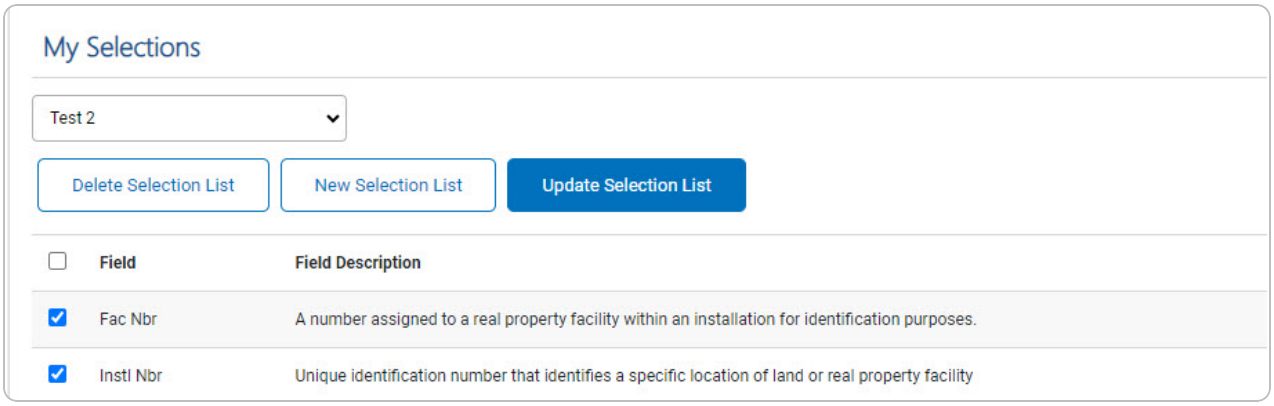
   Select Show Inquiry for small volumes of data. *The* ***Real Property Activity Inquiry — Results*** *page appears.*
4. **OR**

   Select Submit for large volumes of data. *The* ***Real Property Activity Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and*

New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Real Property Activity Inquiry** page appears.*

Search for a Real Property Registry Inquiry — Criteria

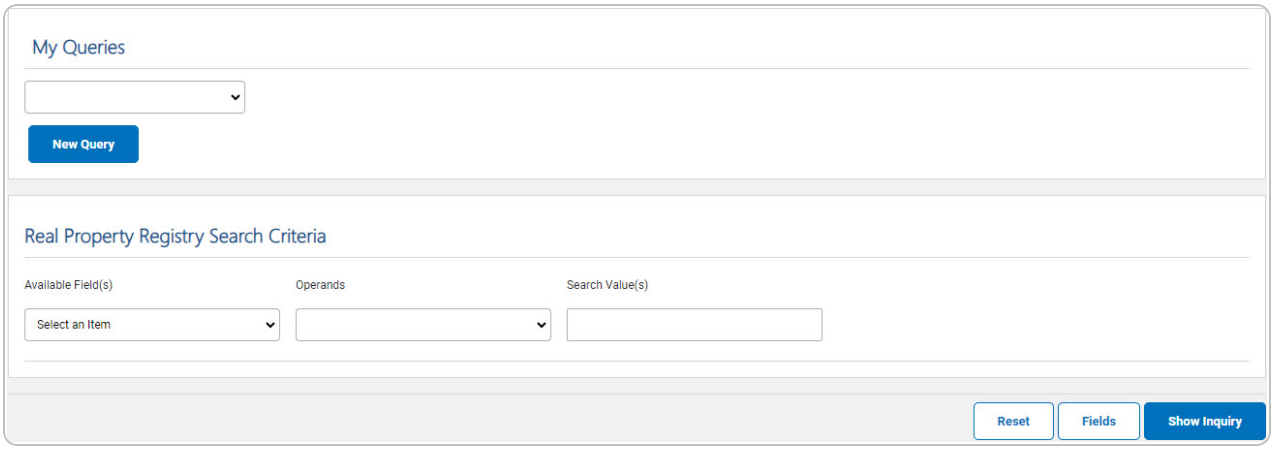
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.



2. *Choose which Available Field(s) to use in the search.*

   A. Use ⌄ to select the first Available Field.

   B. Repeat Step A to add additional search criteria.

> **Note**
>
> Adding another Available Field ⌄ automatically populates an additional search criteria row.

> **Note**
>
> Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

   A. Use ⌄ to select the first Operands.

   B. Use ⌄ to select the second Operands.

   C. Repeat Step B to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

   A. Use ⌄ to select the first Search Value.

   B. Use ⌄ to select the second Search Value.

   C. Repeat Step B to add additional search criteria.

Remove an Available Field Row

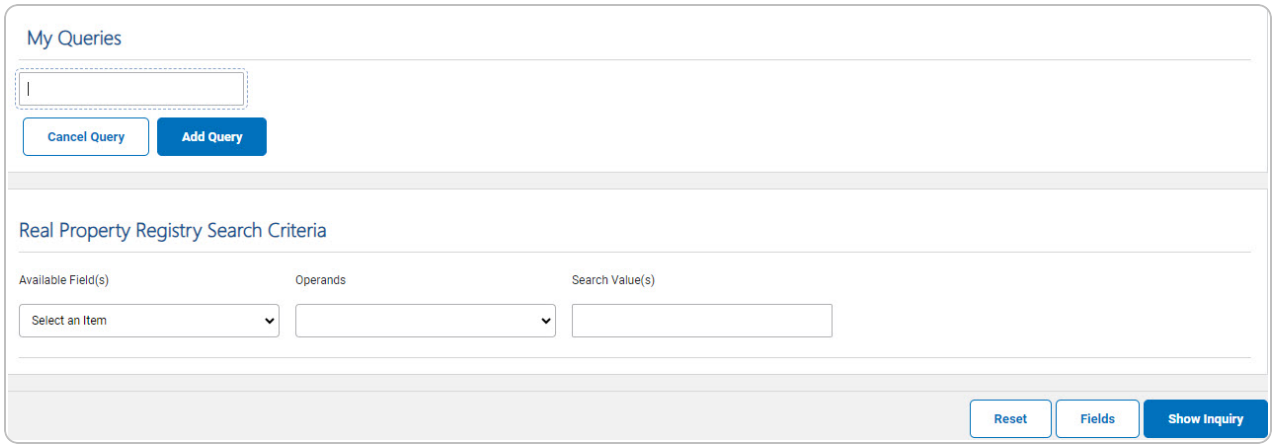
   a. Use ⌄ to select desired Available Field.

   b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Real Property Registry Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*



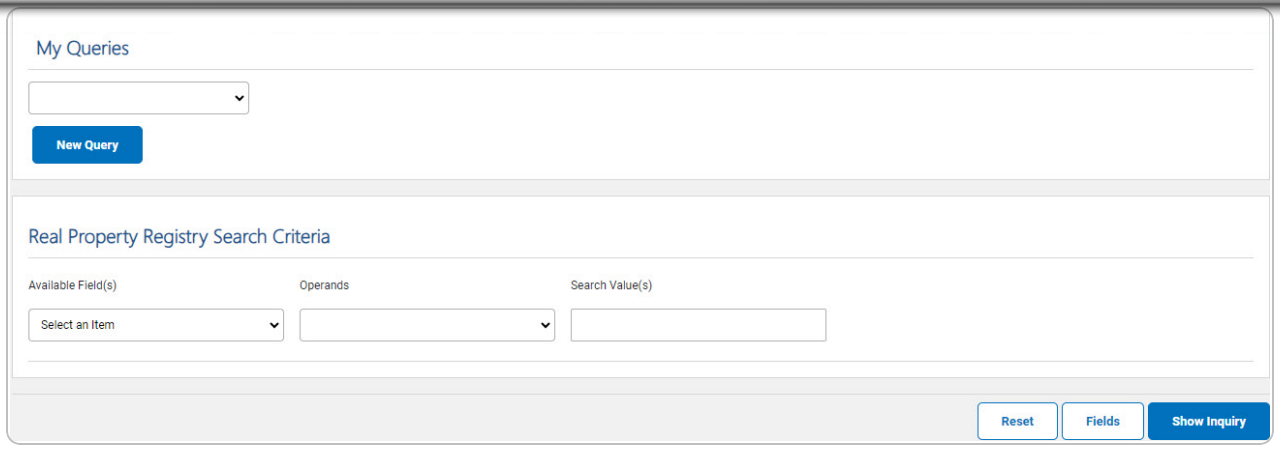
2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*
5. Select Fields. *The* ***Real Property Registry Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Real Property Registry Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



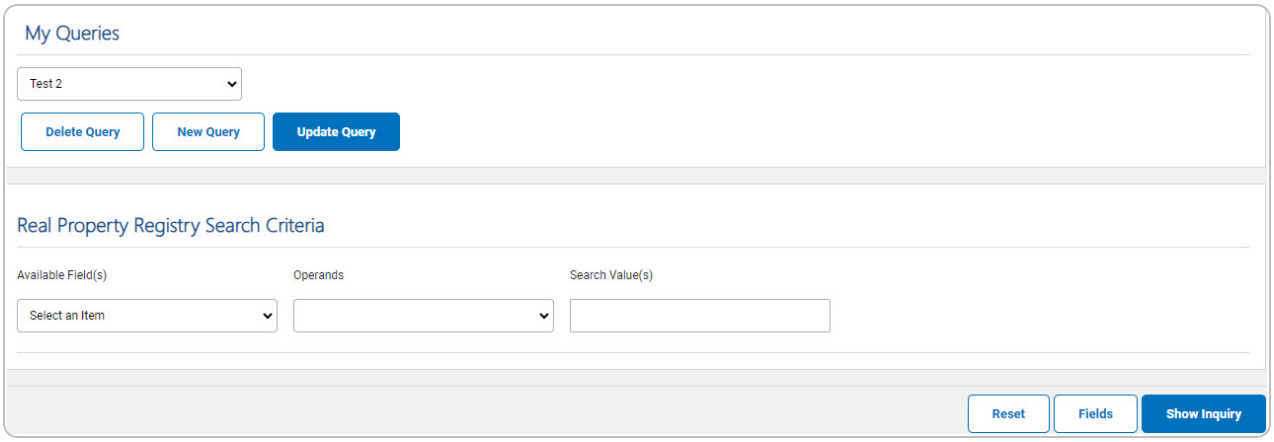
2. Select Fields. *The **Real Property Registry Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Real Property Registry Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*



2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*

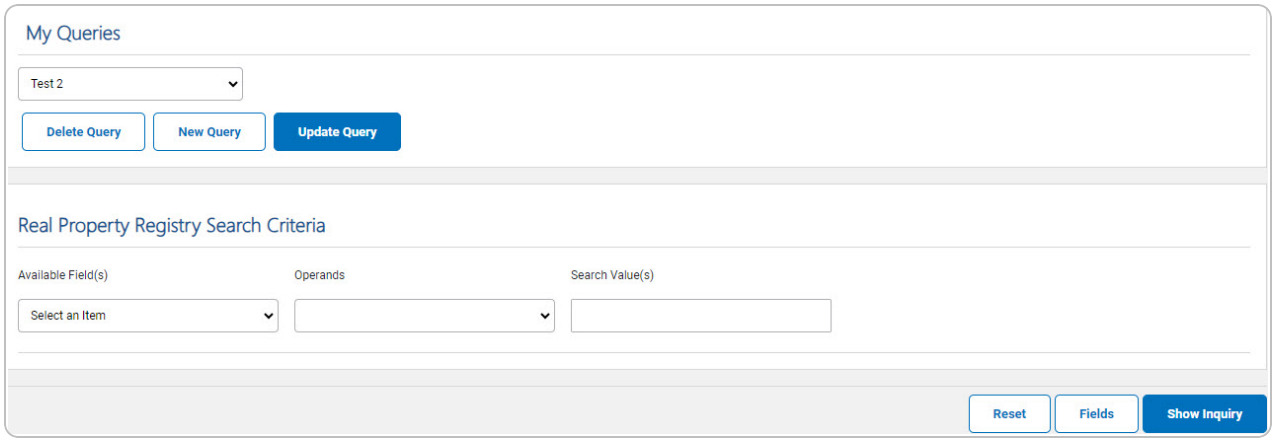
4. Select Fields. *The **Real Property Registry Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Real Property Registry Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and New Query is joined by Update Query and Delete Query. The selected query information appears in the search criteria grid.*



2. *Verify the query information.*

3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Real Property Registry Inquiry — Select Fields** page appears.*

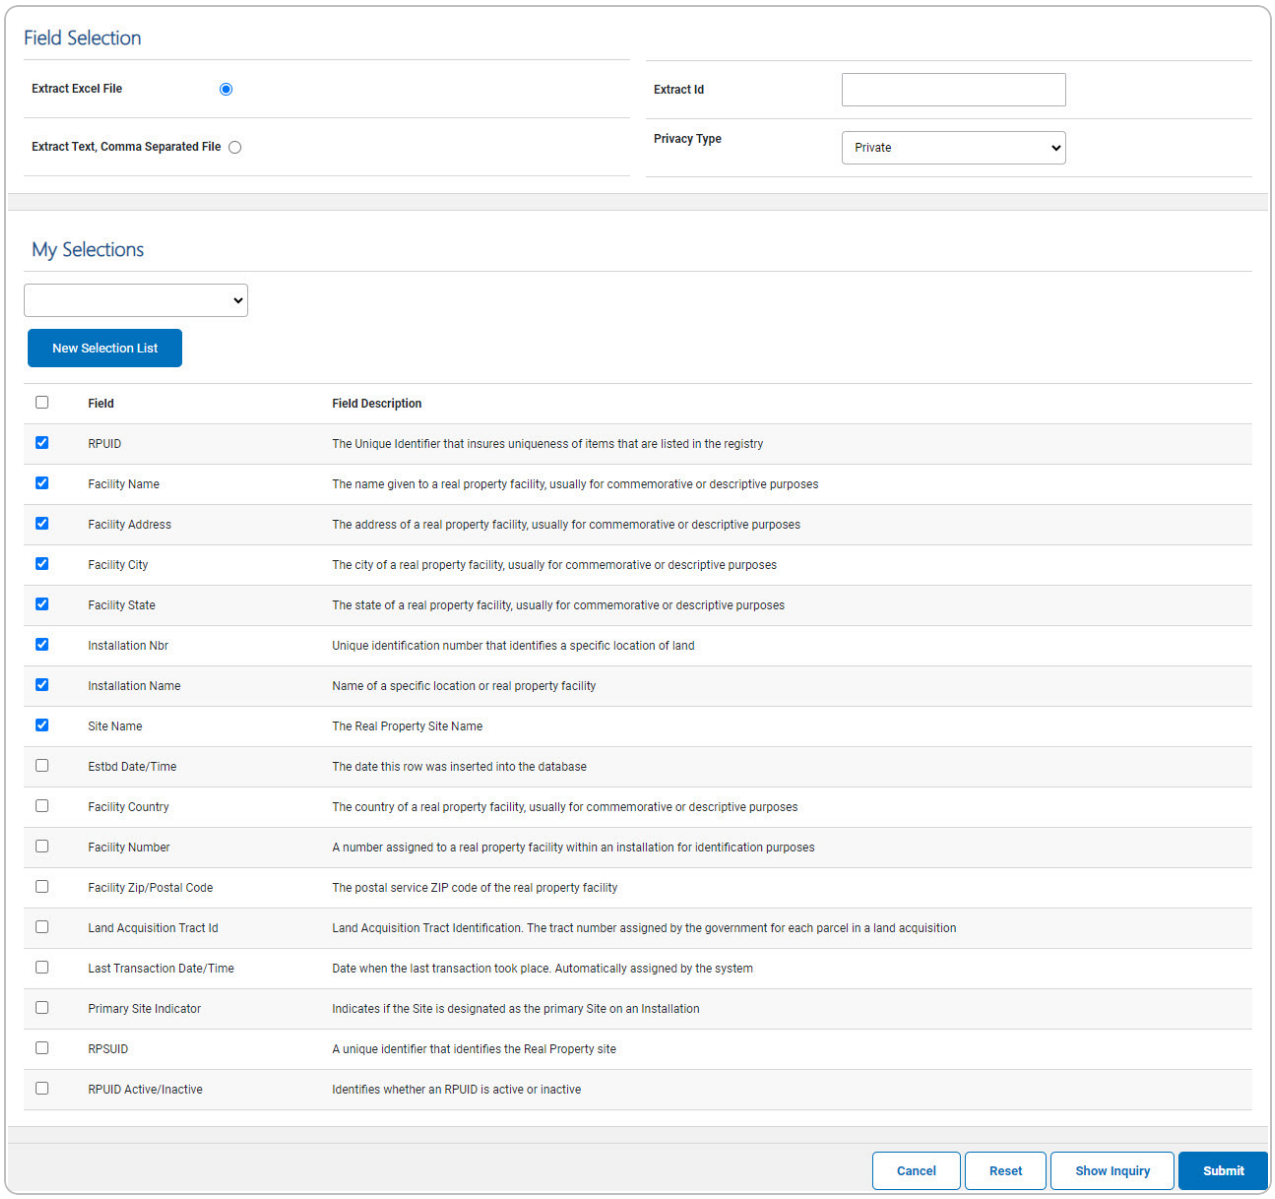
Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **Real Property Registry Inquiry Field Selection** page appears.*



2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

OR

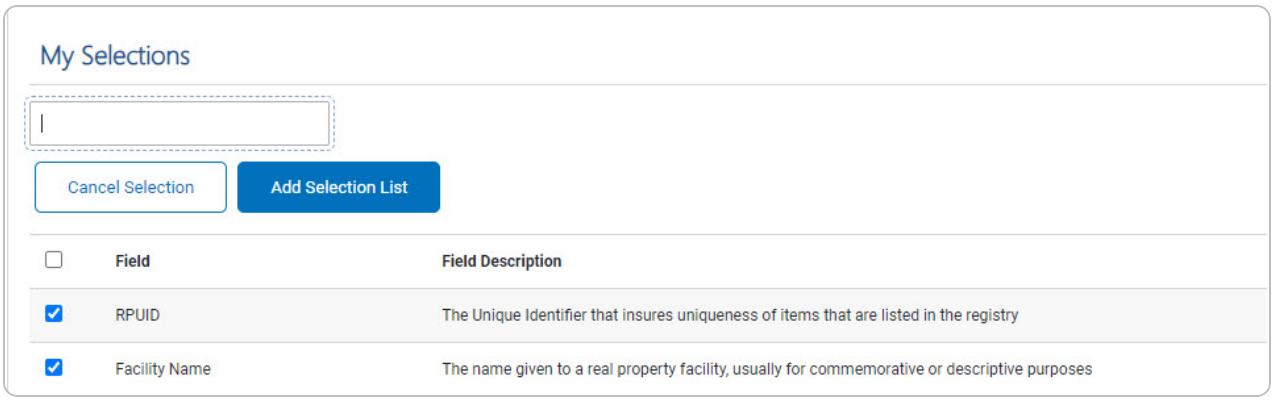
Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*



Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

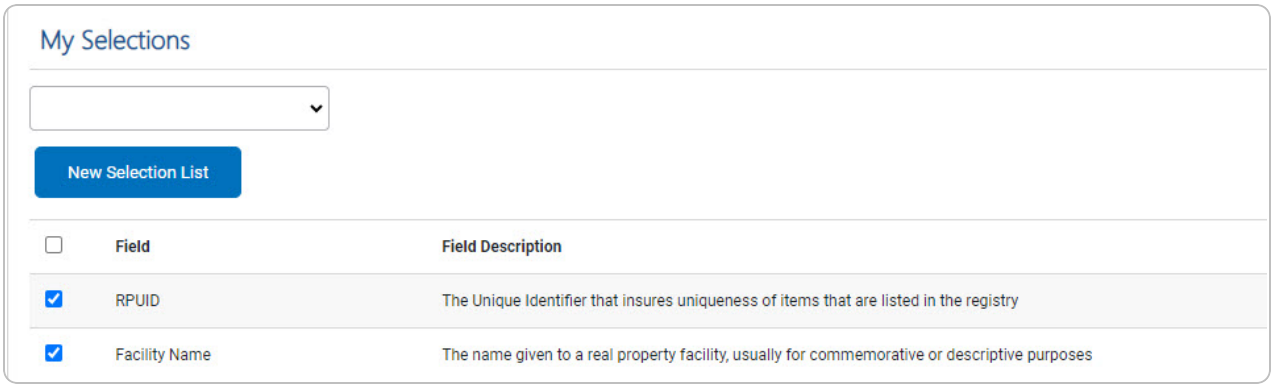
2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

   Select Show Inquiry for small volumes of data. *The* ***Real Property Registry Inquiry — Results*** *page appears.*
5. **OR**

   Select Submit for large volumes of data. *The* ***Real Property Registry Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.



2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

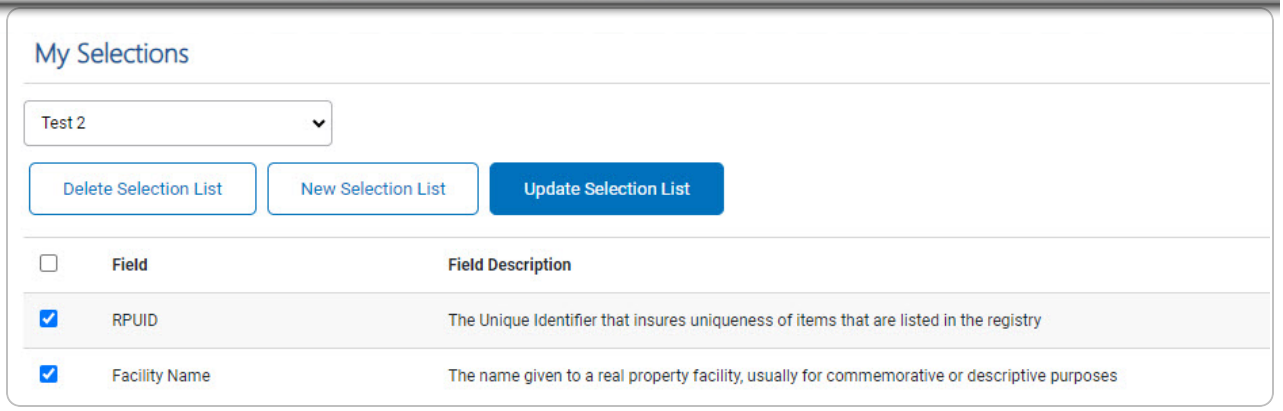
3. Select Show Inquiry for small volumes of data. *The **Real Property Registry Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Real Property Registry Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



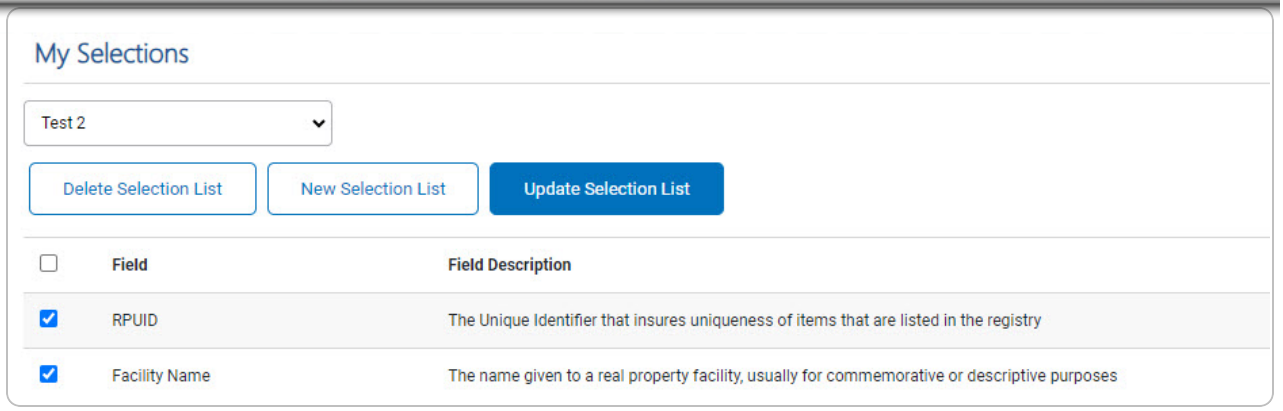
2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*
4. Select Show Inquiry for small volumes of data. *The* ***Real Property Registry Inquiry — Results*** *page appears.*

   OR

   Select Submit for large volumes of data. *The* ***Real Property Registry Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

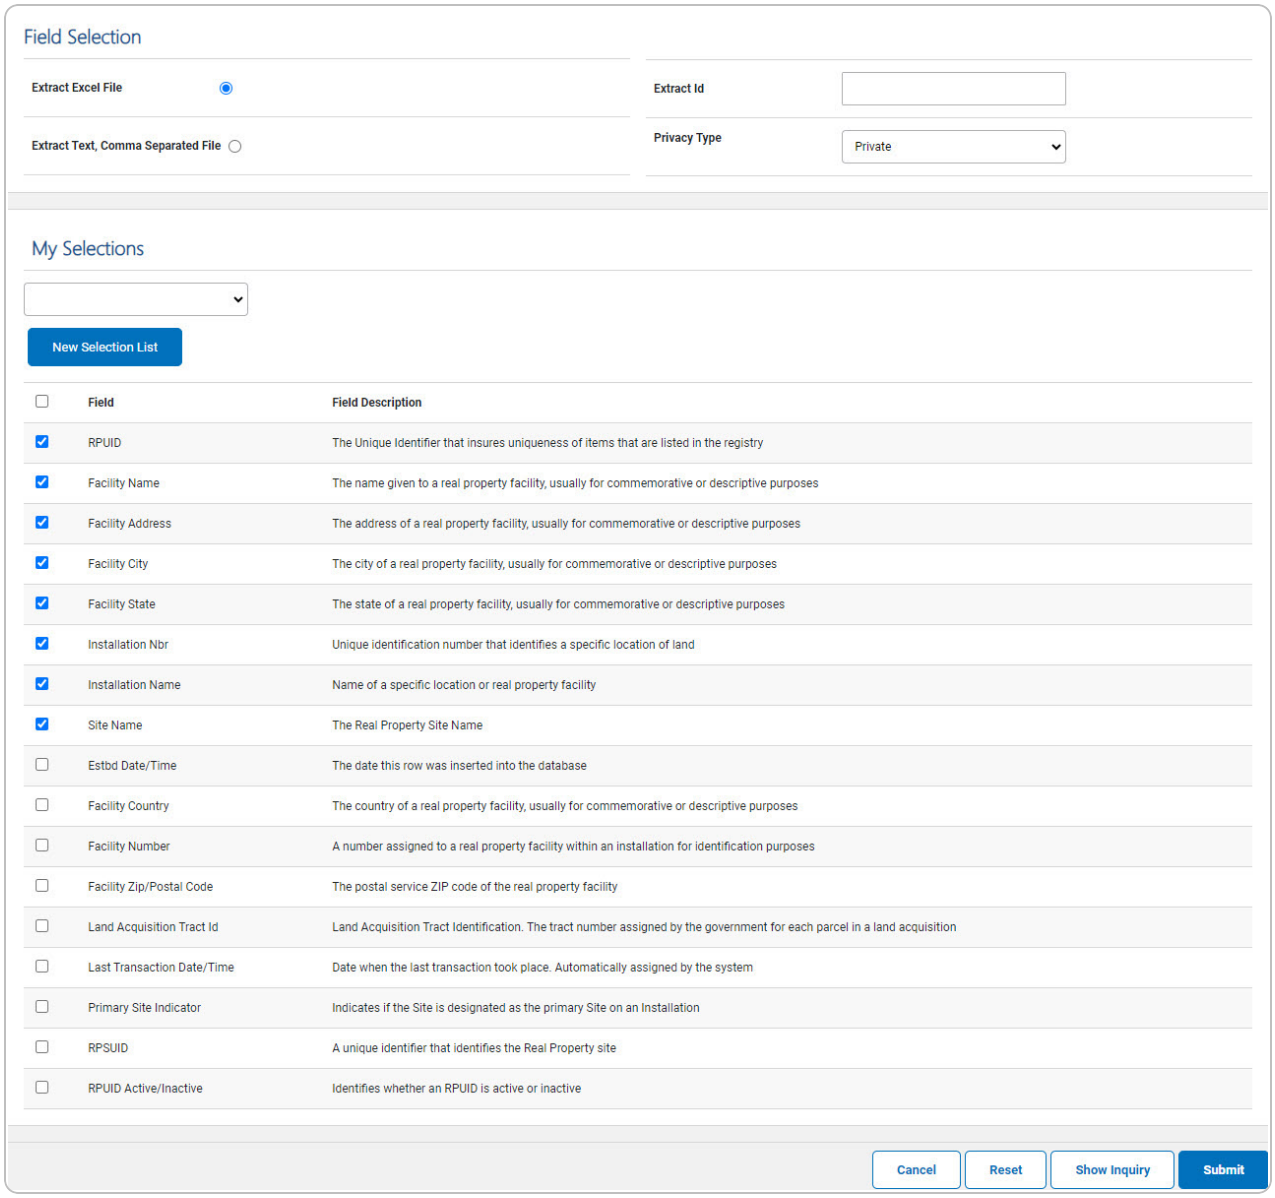


2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Real Property Registry Inquiry** page appears.*



2. Select the fields required for the inquiry. *The first 8 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the RPUID contains the appropriate ☑ or ☐. *Select if the inquiry contains a RPUID.*
- Verify the FACILITY NAME contains the appropriate ☑ or ☐. *Select if the inquiry contains a FAC NM.*

Click the following link to display PA Navigation Tips.

Search for an Address Inquiry — Criteria

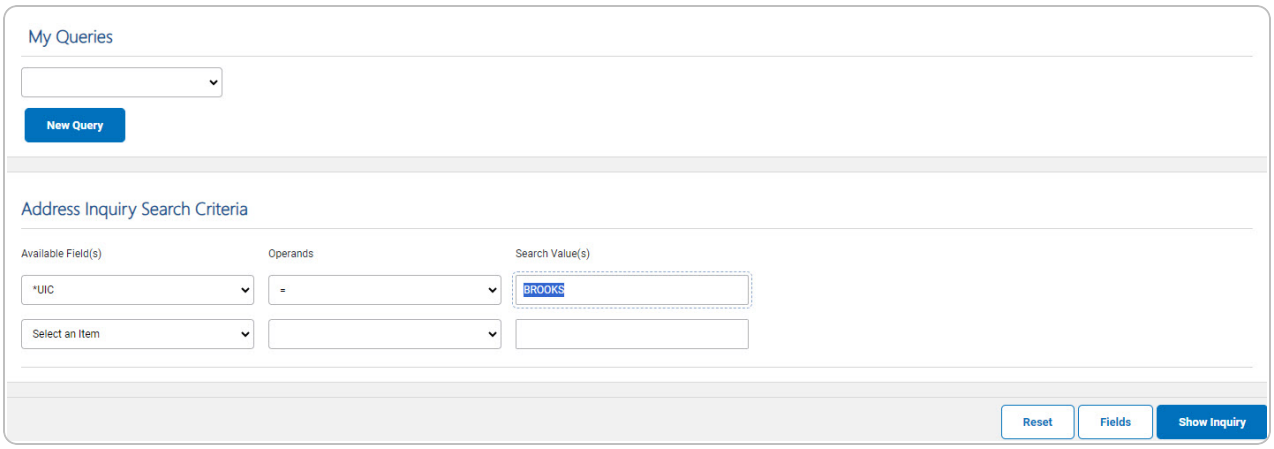
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.



2. *Choose which Available Field(s) to use in the search.*

   A. *The first Available Field(s) option (UIC) automatically populates and is not editable.*

   B. Use ⌄ to select the second Available Field.

C. Repeat Step B to add additional search criteria.

Note

Adding another Available Field automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use to select the first Operands.

B. Use to select the second Operands.

C. Repeat Step B to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use to select the first Search Value.

B. Use to select the second Search Value.

C. Repeat Step B to add additional search criteria.

Remove an Available Field Row

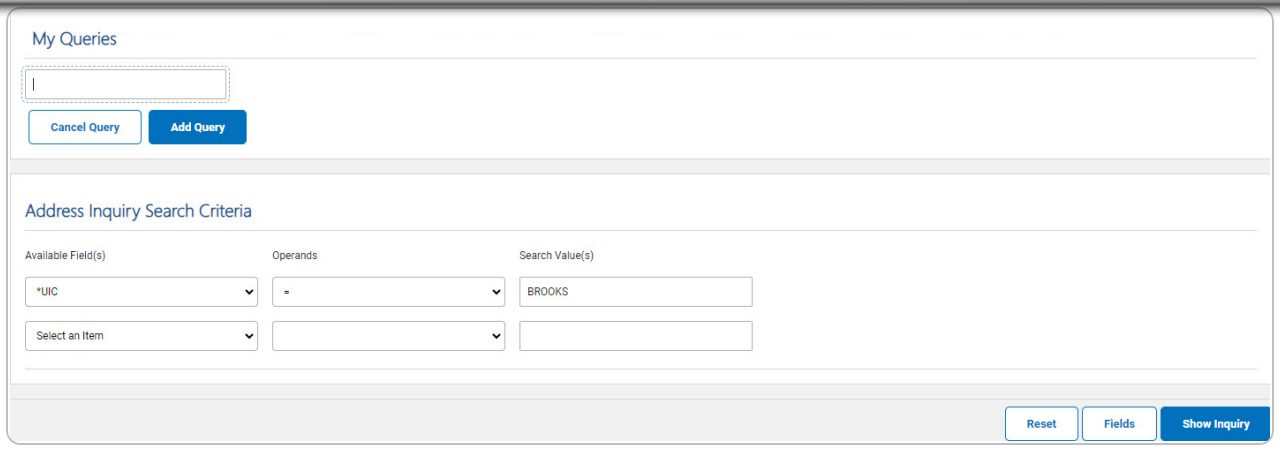
a. Use to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Address Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*



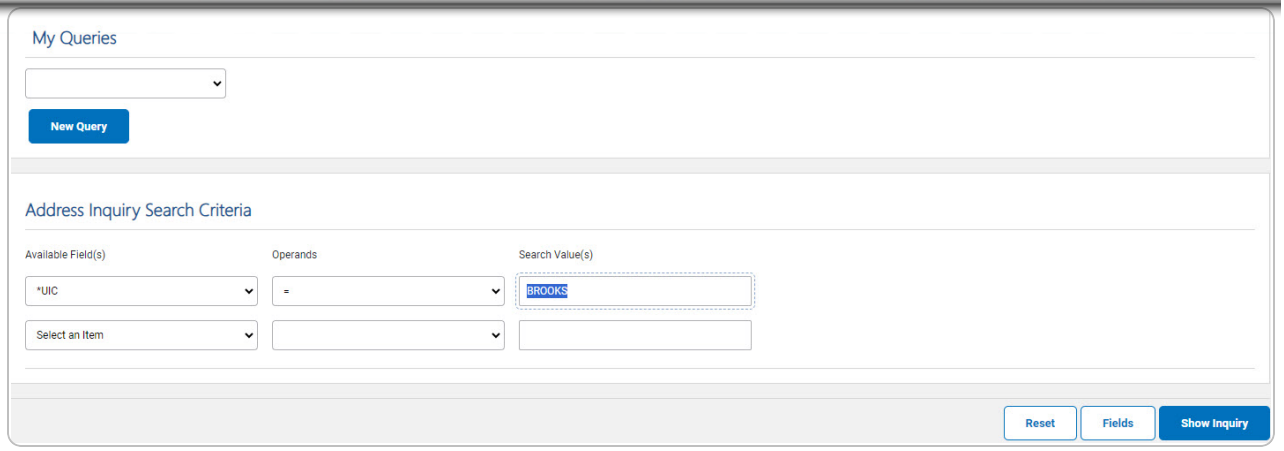
2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*
5. Select Fields. *The* ***Address Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Address Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



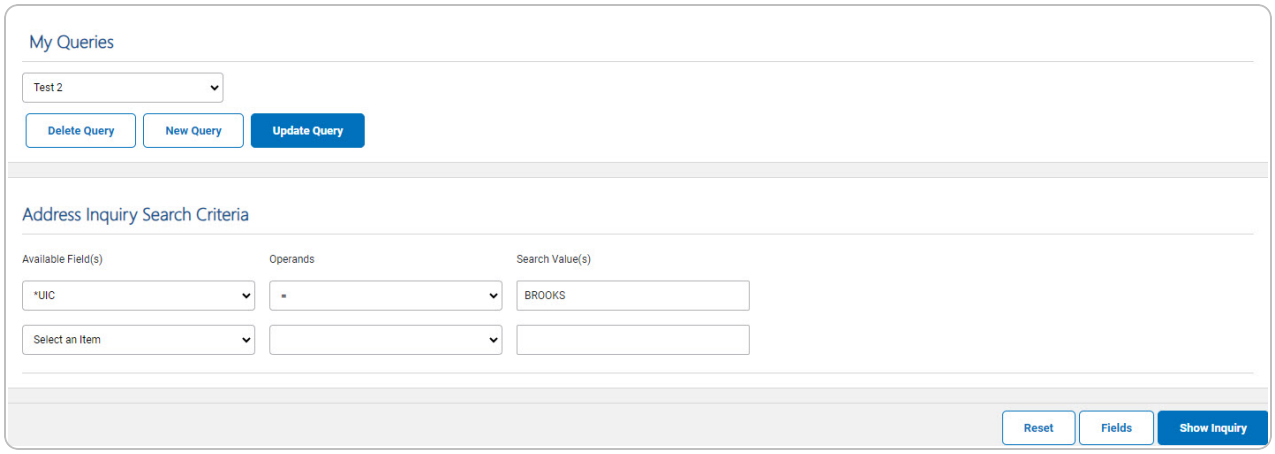
2. Select Fields. *The **Address Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Address Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*



2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*

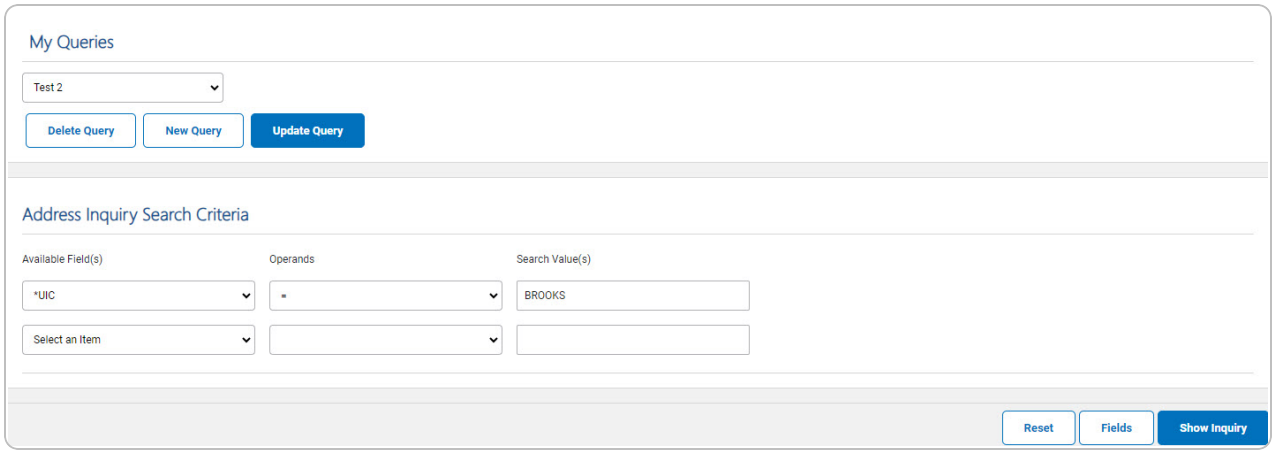
4. Select Fields. *The **Address Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Address Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*



2. *Verify the query information.*

3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Address Inquiry — Select Fields** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..
13 — Mandatory Entry: *Available Field(s)*.	Missing Entry. No data was entered. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Operands*.	
13 — Mandatory Entry: *Query Name*.	
xxxx – Saved Inquiry already exists. Select Update Query **or** Delete Query **.**	Invalid Entry. The inquiry already exists in the database. Use the existing inquiry, or select Update Query to revise the existing query.
102 — Inquiry already exists.	Invalid entry. The Inquiry is already established. Re-enter the inquiry or select

	Update Query or Delete Query to modify the existing inquiry.
106 — Operand must be =, >, <, >= , <= , <>, or Like.	Missing Entry. The Field value was entered, but no operand was selected. Choose an operand from the drop-down menu.
31 — To perform Search, data must be entered in one or more fields.	Missing Entry. At least one field is necessary to perform the search. Enter at least one field, then select the Search button.
65 — No record(s) match search criteria.	Invalid Entry. Results for the search criteria entered do not exist. Enter different Search Criteria and try the Search again.

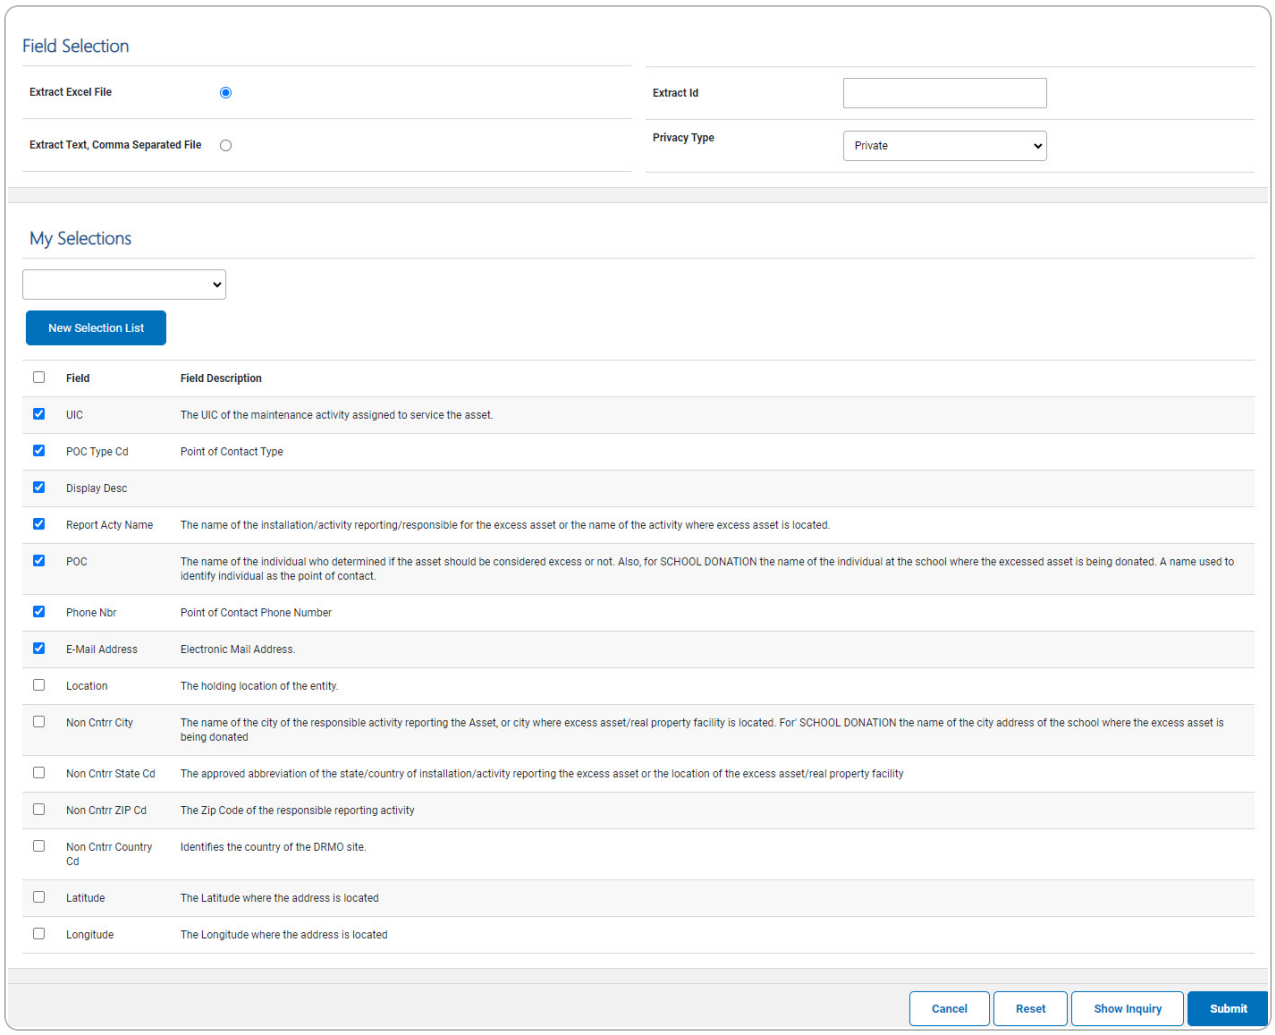
Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **Address Inquiry** page appears.*



2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

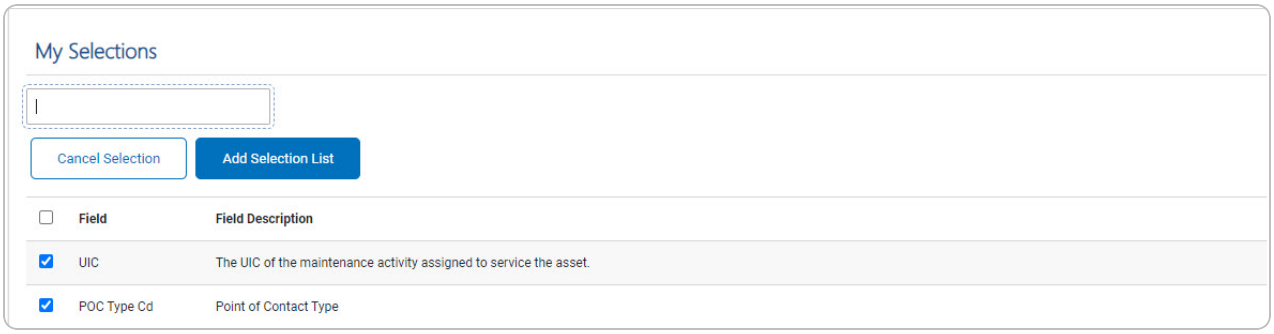
  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select **New Selection List**. *The page refreshes, and Selections changes from a drop-down field to a text field.*



Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select **Add Selection List**. *The page refreshes, and the selected list is added.* **Add Selection List** *is replaced by* **Update Selection List** *and* Delete Selection List.

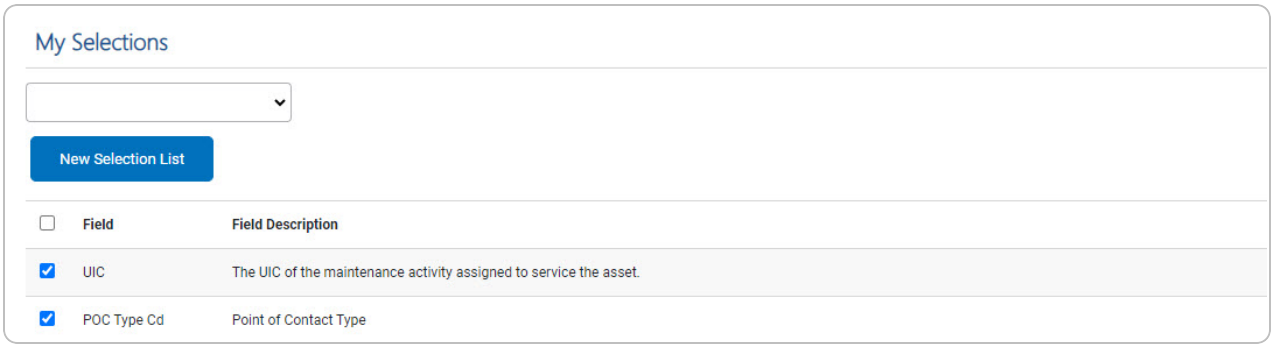
   Select **Show Inquiry** for small volumes of data. *The* ***Address Inquiry — Results*** *page appears.*

5. **OR**

   Select **Submit** for large volumes of data. *The* ***Address Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.



2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

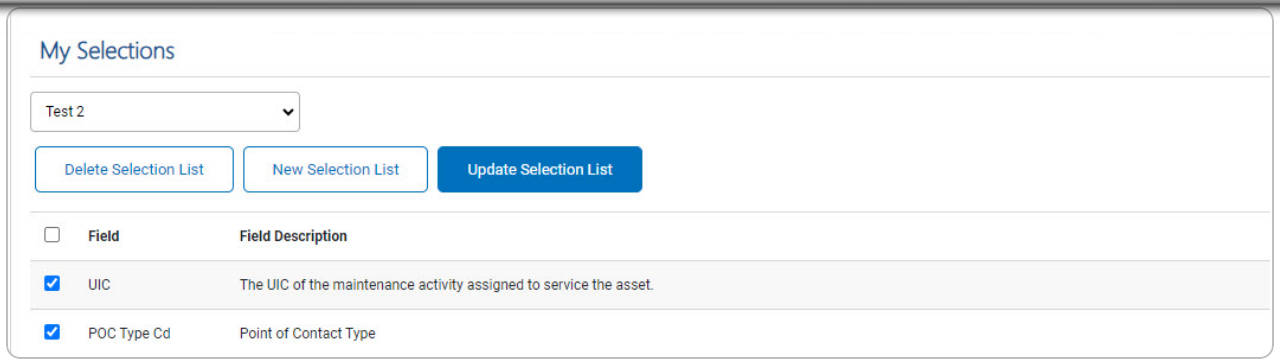
3. Select Show Inquiry for small volumes of data. *The **Address Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Address Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

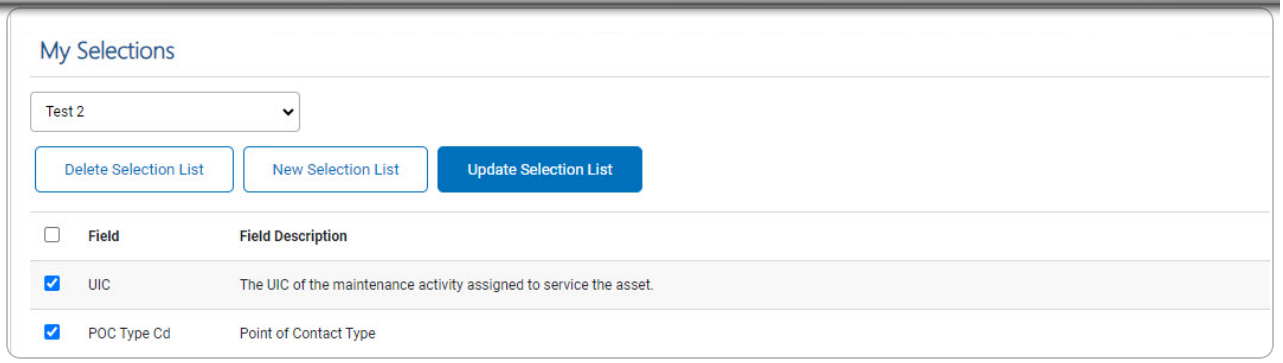
4. Select Show Inquiry for small volumes of data. *The* ***Address Inquiry — Results*** *page appears.*

OR

Select Submit for large volumes of data. *The* ***Address Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

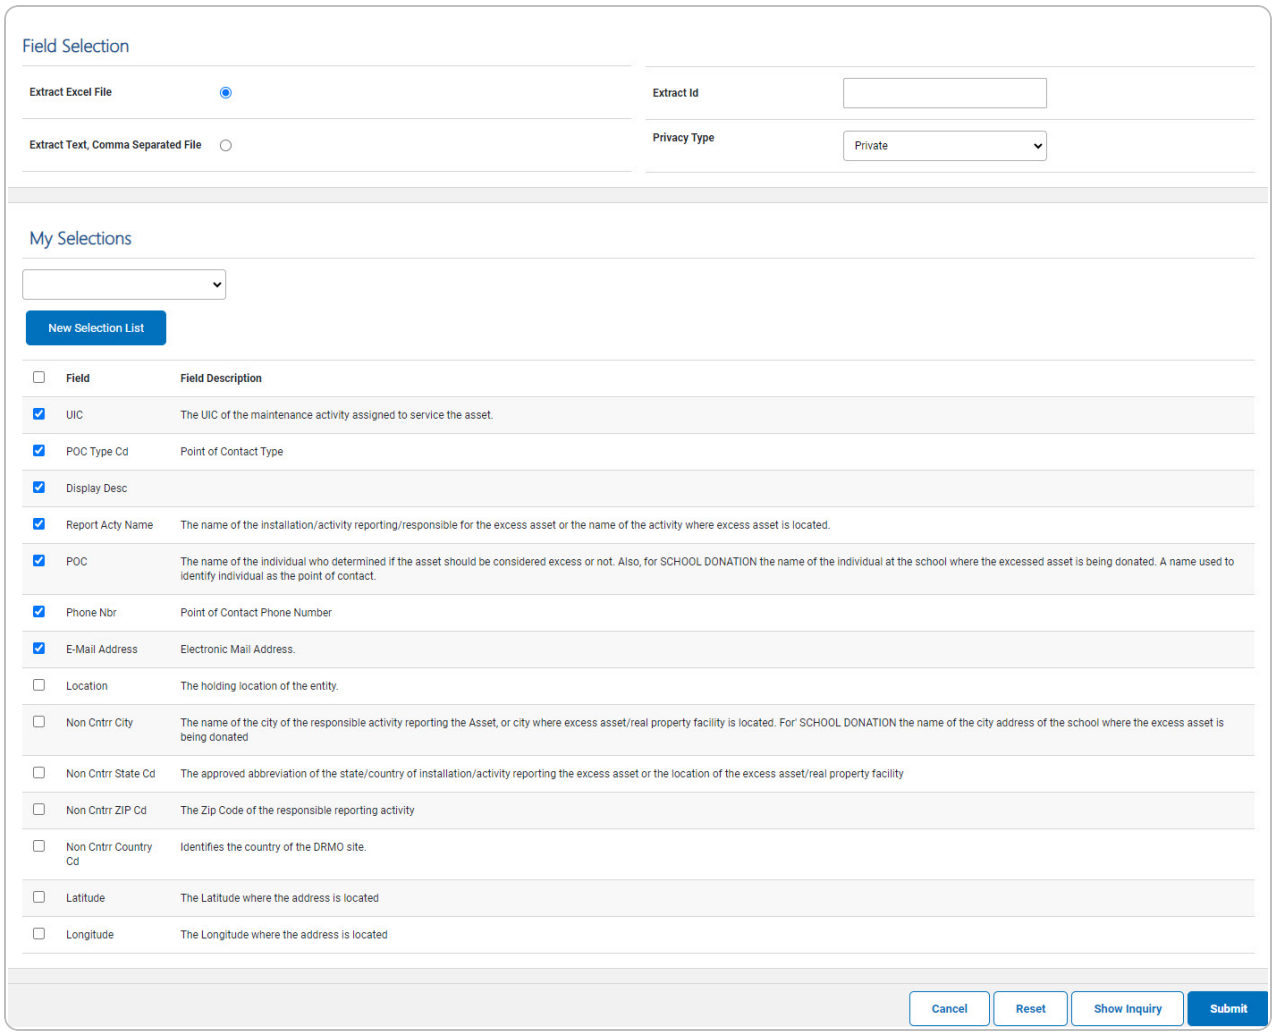


2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Address Inquiry** page appears.*



2. Select the fields required for the inquiry. *The first 7 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the UIC contains the appropriate ☑ or ☐. *Select if the inquiry contains a UIC.*

Click the following link to display PA Navigation Tips.

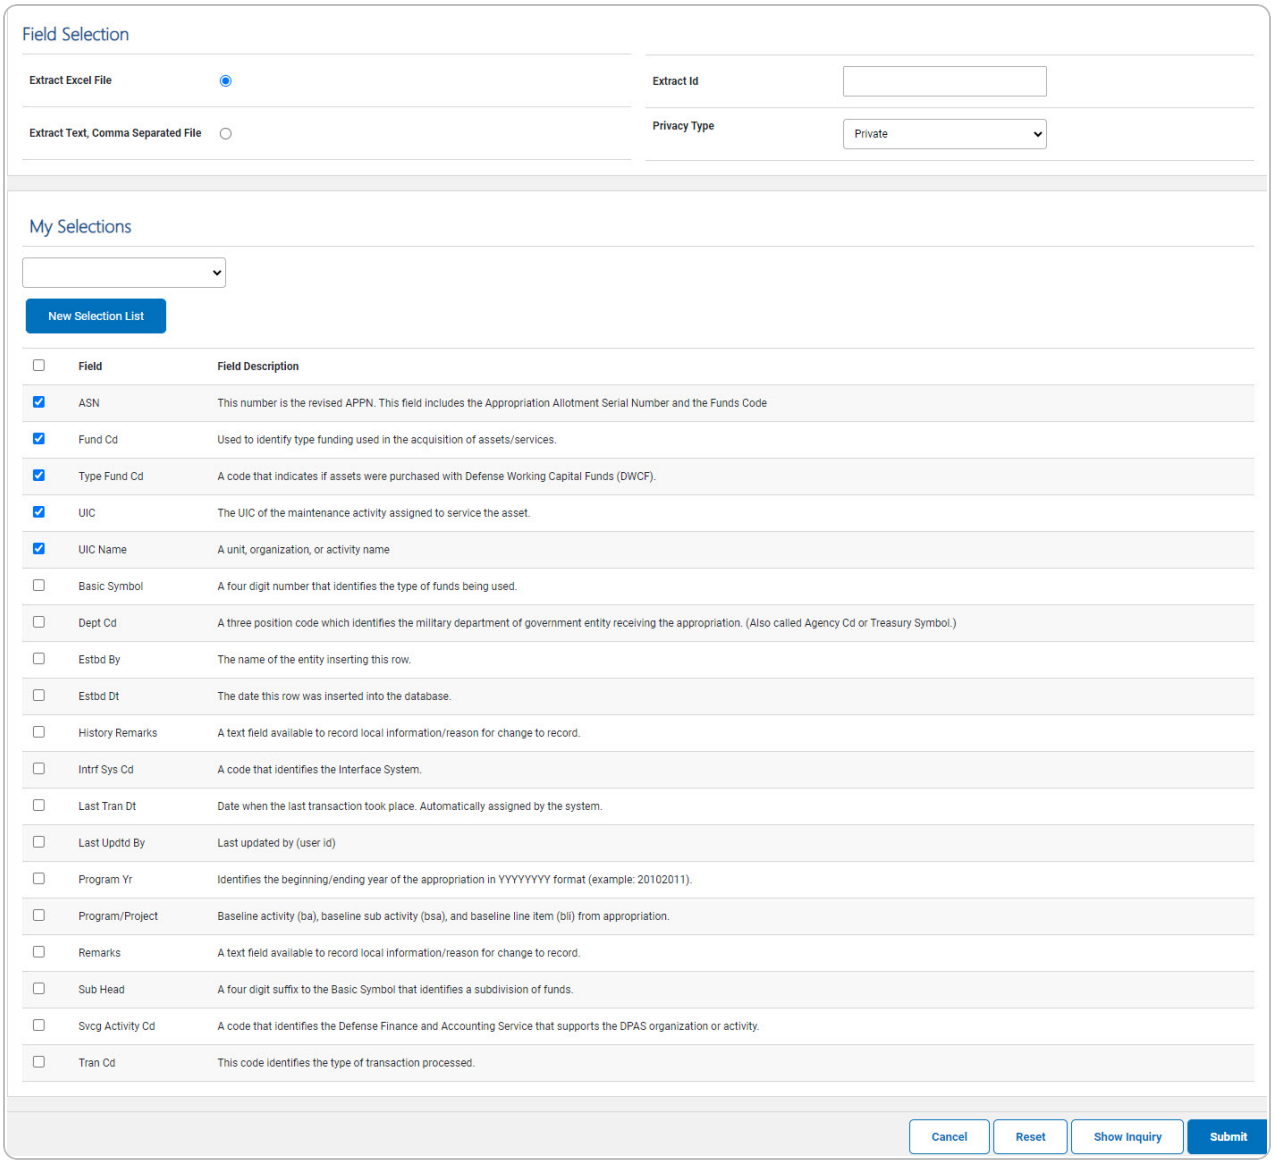
Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **Appropriation Data Inquiry** page appears.*



2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

OR

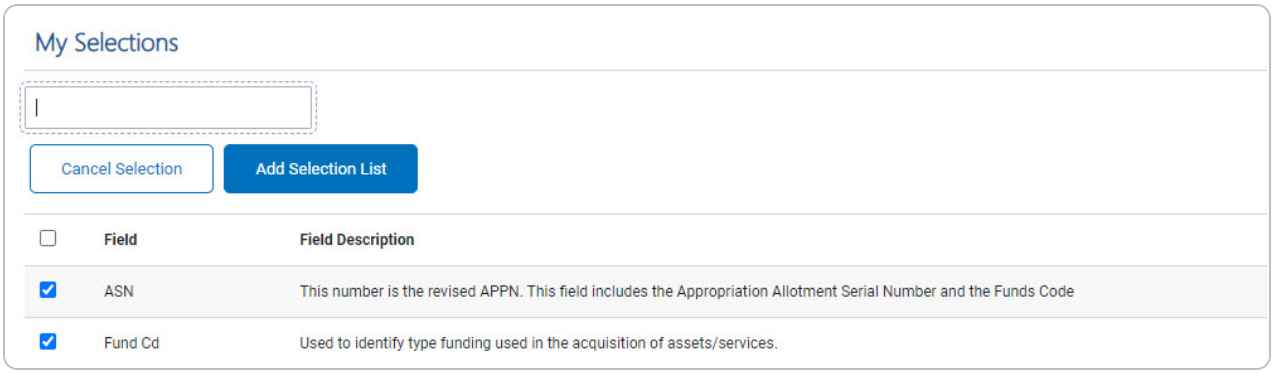
Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select **New Selection List**. *The page refreshes, and Selections changes from a drop-down field to a text field.*



Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select **Add Selection List**. *The page refreshes, and the selected list is added.*

Add Selection List *is replaced by* **Update Selection List** *and* Delete Selection List.

Select **Show Inquiry** for small volumes of data. *The **Appropriation Data Inquiry — Results** page appears.*

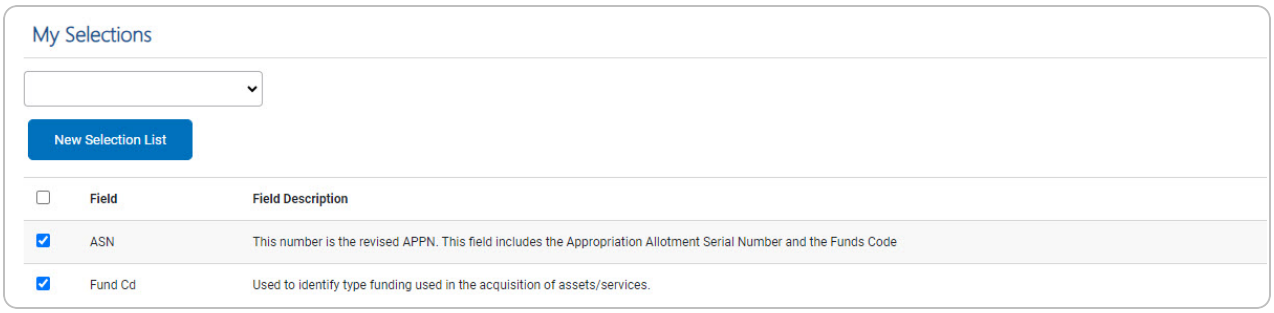
5.

OR

Select Submit for large volumes of data. *The **Appropriation Data Inquiry Transaction Status** page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.



2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

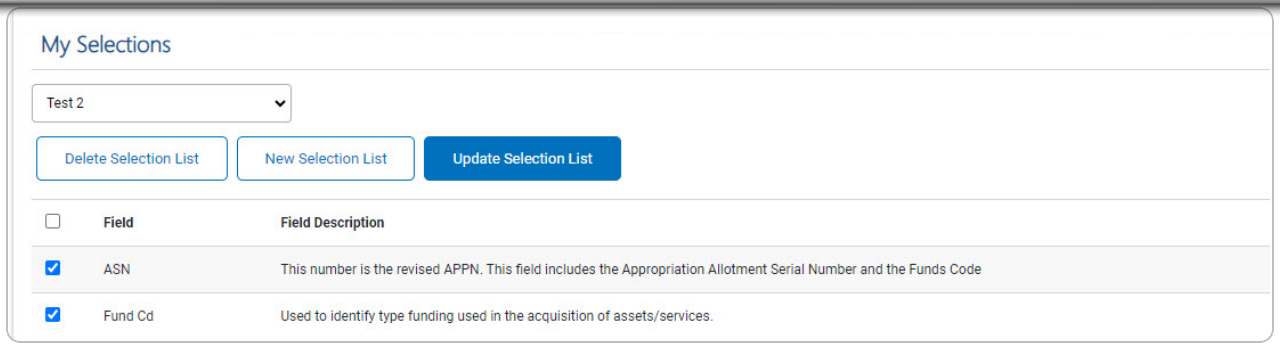
   Select Show Inquiry for small volumes of data. *The **Appropriation Data Inquiry — Results** page appears.*

3. **OR**

   Select Submit for large volumes of data. *The **Appropriation Data Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

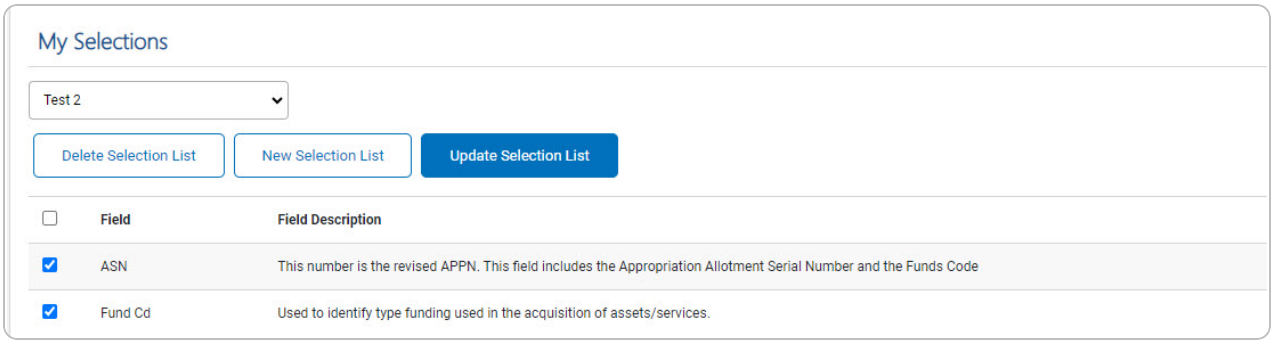
   Select Show Inquiry for small volumes of data. *The* ***Appropriation Data Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Appropriation Data Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

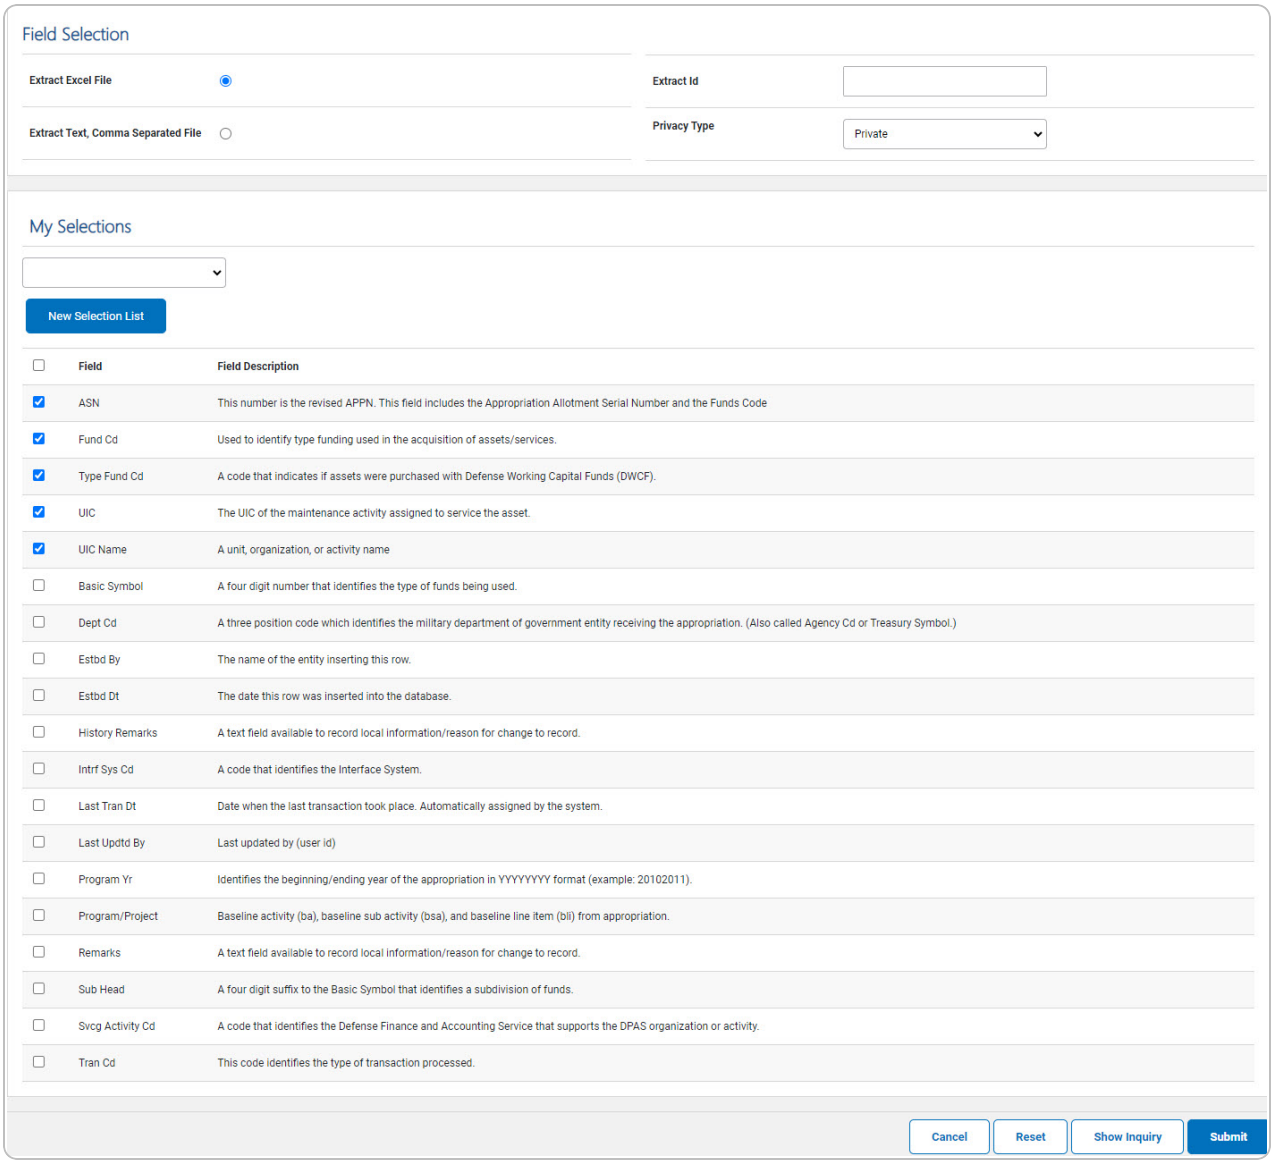


2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Appropriation Data Inquiry** page appears.*



2. Select the fields required for the inquiry. *The first 5 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

Select Fields for the UIC Inquiry

Overview

The UIC Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > Master Data > UIC > Search Criteria > Fields > UIC Inquiry Fields Selection page

Page Fields

The following fields display on the **UIC Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

191	Excel is the only reliable print format for this inquiry.
252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
xxxx	Where available, select "Row" to view details for specific record.
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.
290	Do not "Export" large volumes of data, select "Back" button then select "Submit" button on the Field Selection Page

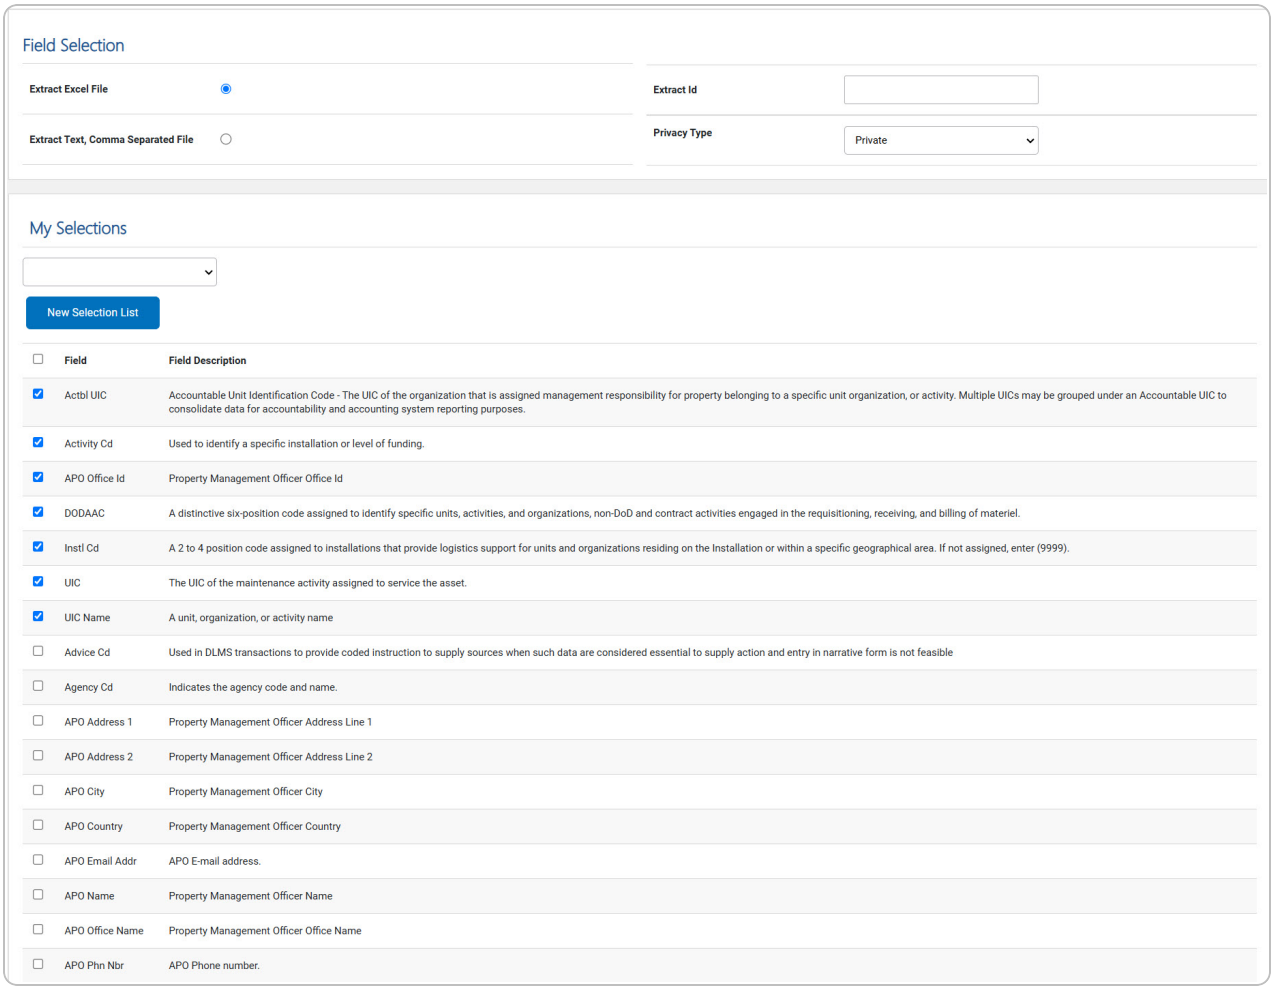
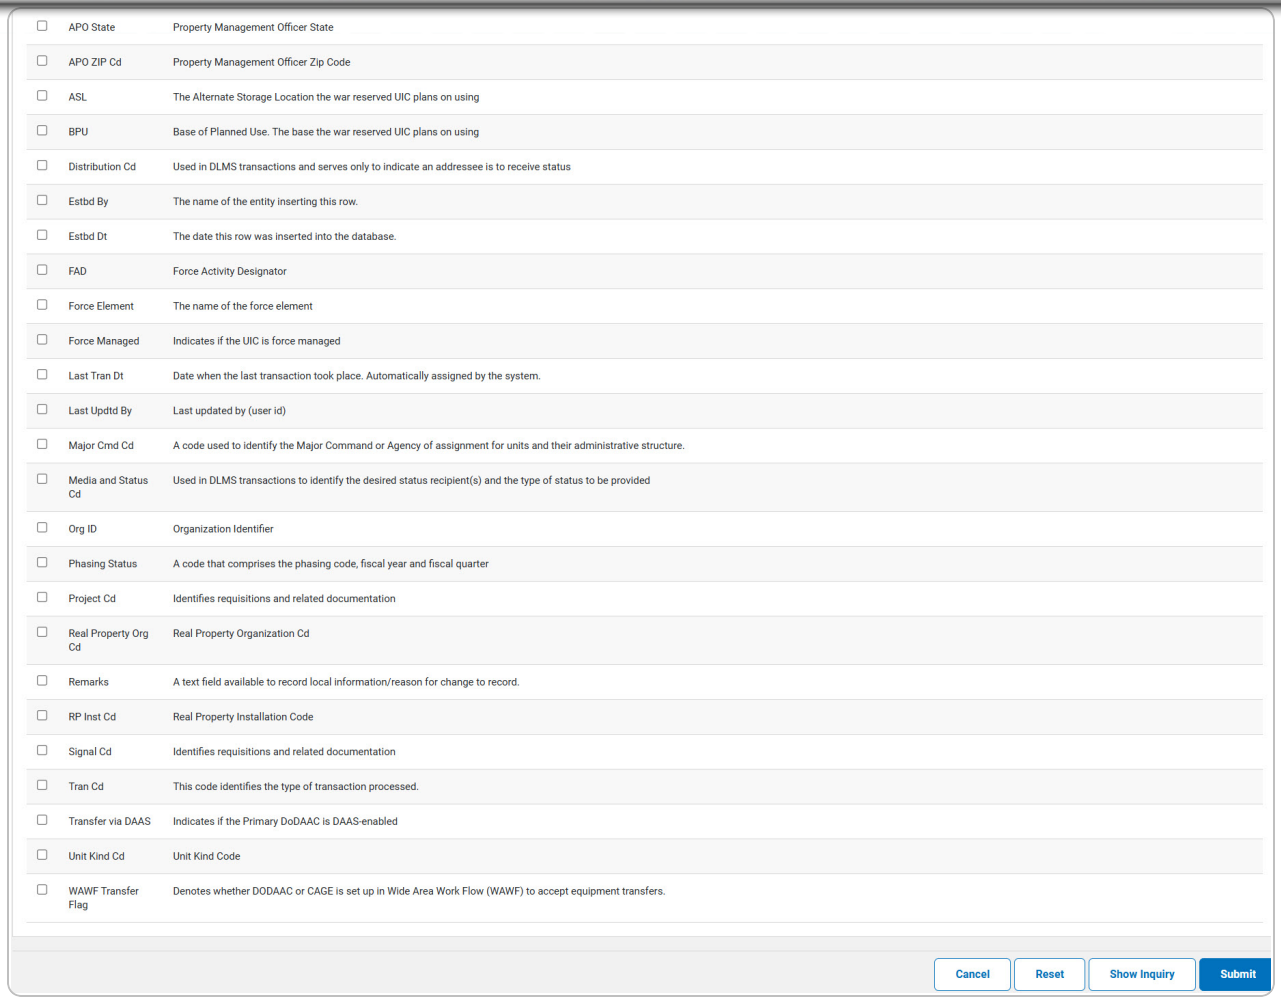
Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The* ***UIC Inquiry*** *page appears.*





☐	APO State	Property Management Officer State
☐	APO ZIP Cd	Property Management Officer Zip Code
☐	ASL	The Alternate Storage Location the war reserved UIC plans on using
☐	BPU	Base of Planned Use. The base the war reserved UIC plans on using
☐	Distribution Cd	Used in DLMS transactions and serves only to indicate an addressee is to receive status
☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt	The date this row was inserted into the database.
☐	FAD	Force Activity Designator
☐	Force Element	The name of the force element
☐	Force Managed	Indicates if the UIC is force managed
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	Major Cmd Cd	A code used to identify the Major Command or Agency of assignment for units and their administrative structure.
☐	Media and Status Cd	Used in DLMS transactions to identify the desired status recipient(s) and the type of status to be provided
☐	Org ID	Organization Identifier
☐	Phasing Status	A code that comprises the phasing code, fiscal year and fiscal quarter
☐	Project Cd	Identifies requisitions and related documentation
☐	Real Property Org Cd	Real Property Organization Cd
☐	Remarks	A text field available to record local information/reason for change to record.
☐	RP Inst Cd	Real Property Installation Code
☐	Signal Cd	Identifies requisitions and related documentation
☐	Tran Cd	This code identifies the type of transaction processed.
☐	Transfer via DAAS	Indicates if the Primary DoDAAC is DAAS-enabled
☐	Unit Kind Cd	Unit Kind Code
☐	WAWF Transfer Flag	Denotes whether DODAAC or CAGE is set up in Wide Area Work Flow (WAWF) to accept equipment transfers.

Cancel Reset Show Inquiry Submit

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

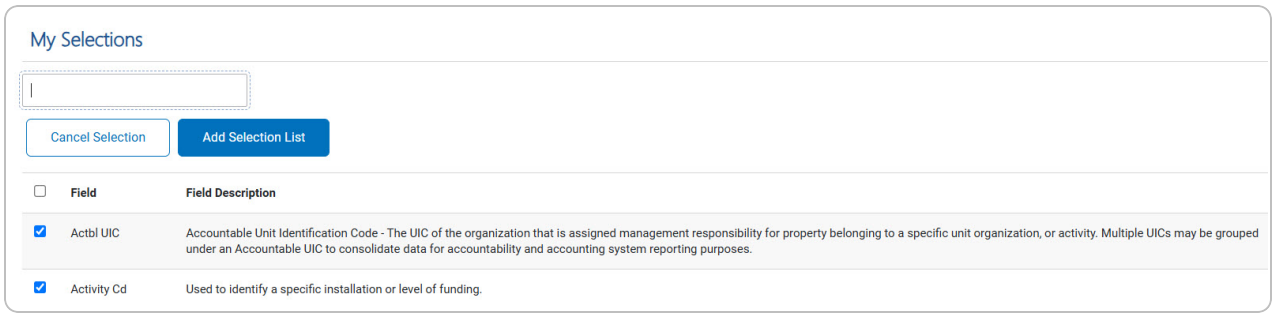
  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*



Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

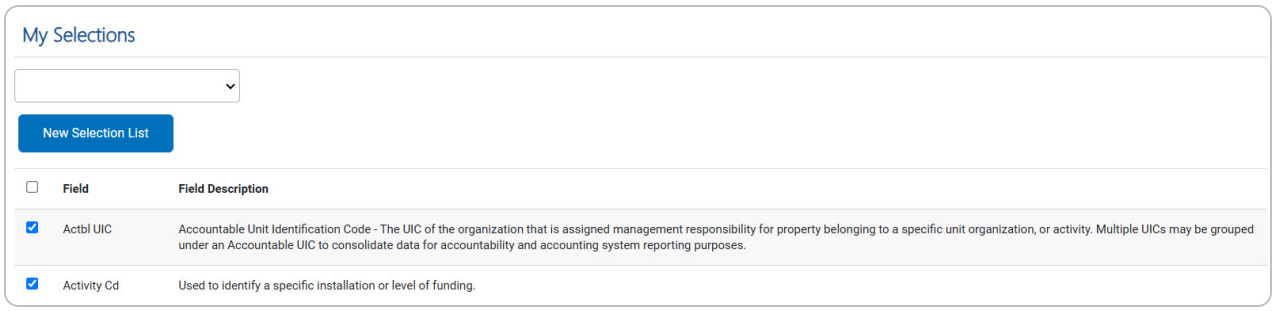
   Select Show Inquiry for small volumes of data. *The* ***UIC Inquiry — Results*** *page appears.*

5. **OR**

   Select Submit for large volumes of data. *The* ***UIC Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.



2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

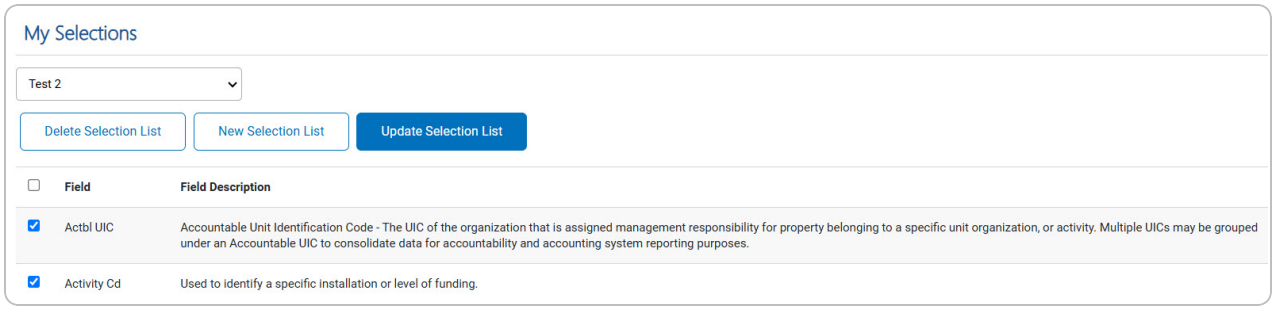
3. Select Show Inquiry for small volumes of data. *The **UIC Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **UIC Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

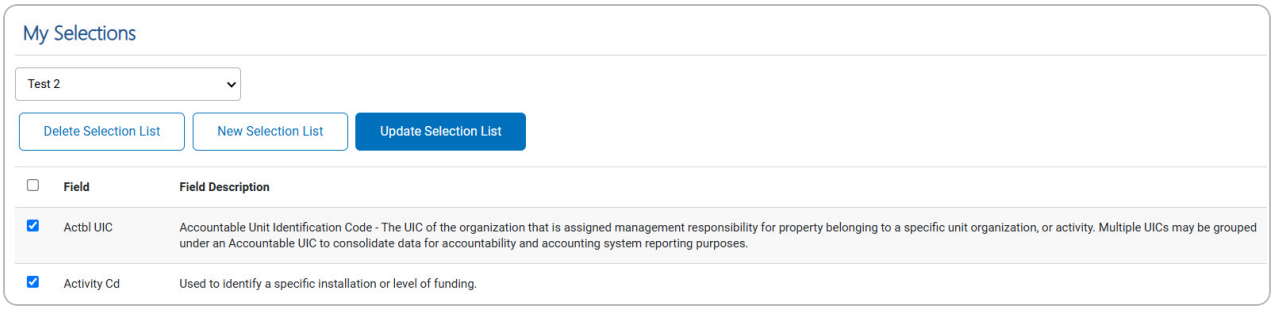
   Select Show Inquiry for small volumes of data. *The* ***UIC Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***UIC Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **UIC Inquiry** page appears.*

Search for a Cost Center Inquiry — Criteria

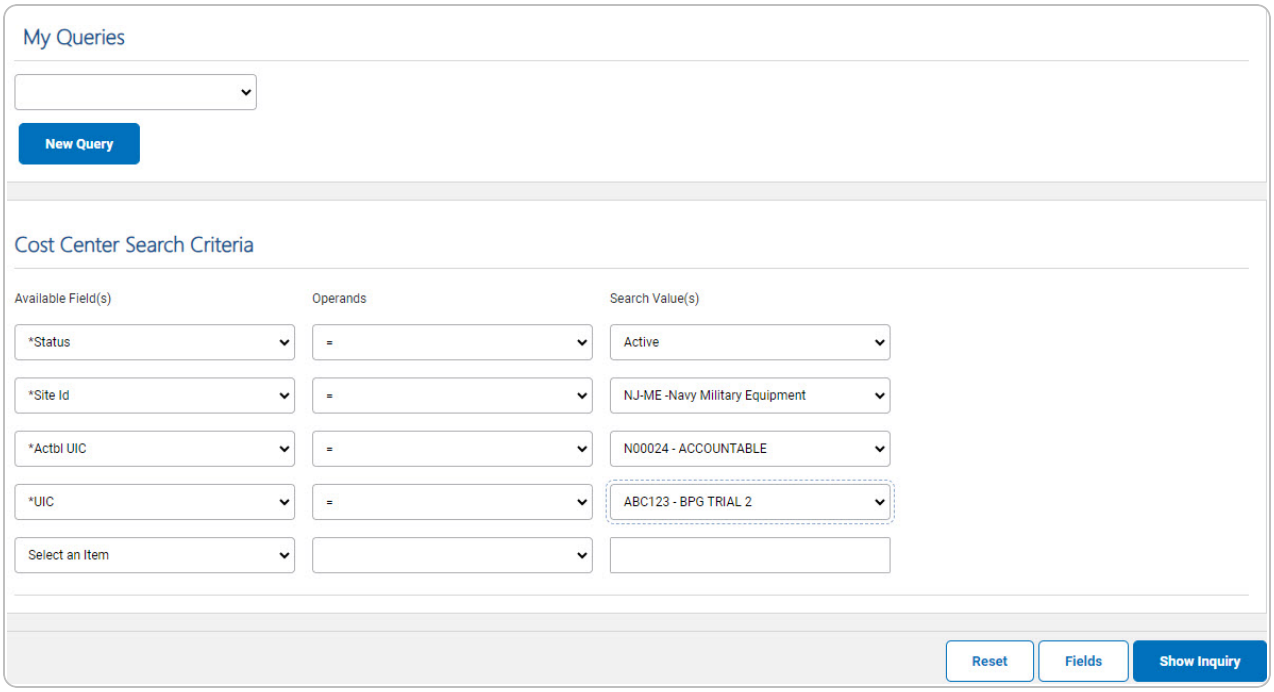
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.



2. *Choose which Available Field(s) to use in the search.*

A. *The first Available Field(s) option (Status) automatically populates and is not editable.*

B. *The second Available Field(s) option (SITE ID) automatically populates and is not editable.*

C. *The third Available Field(s) option (ACTBL UIC) automatically populates and is not editable.*

D. *The fourth Available Field(s) option (UIC) automatically populates and is not editable.*

E. Use ⌄ to select the fifth Available Field.

F. Repeat Step E to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use to select the first Operands.

B. Use to select the second Operands.

C. Use to select the third Operands.

D. Use to select the fourth Operands.

E. Use to select the fifth Operands.

F. Repeat Step E to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use to select the first Search Value.

B. Use to select the second Search Value.

C. Use to select the third Search Value.

D. Use to select the fourth Search Value.

E. Use to select the fifth Search Value.

F. Repeat Step E to add additional search criteria.

Remove an Available Field Row

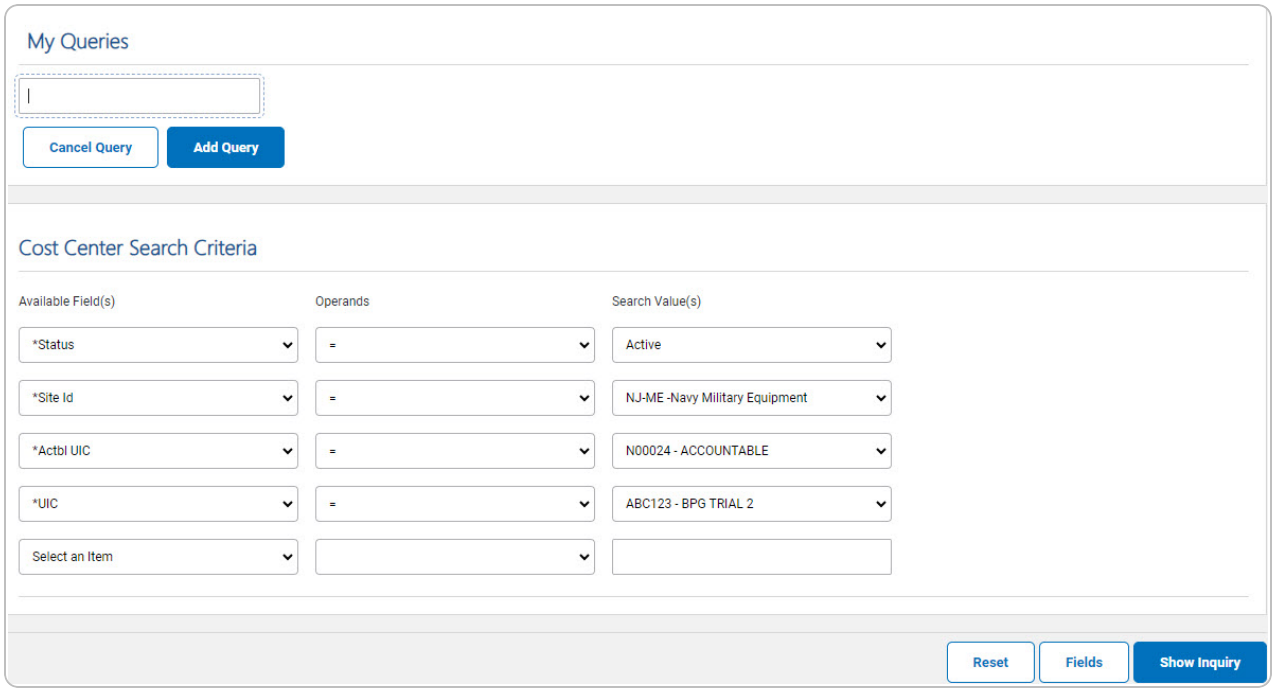
a. Use to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Cost Center Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select **New Query**. *The page refreshes, and My Queries changes from a drop-down field to a text field.*



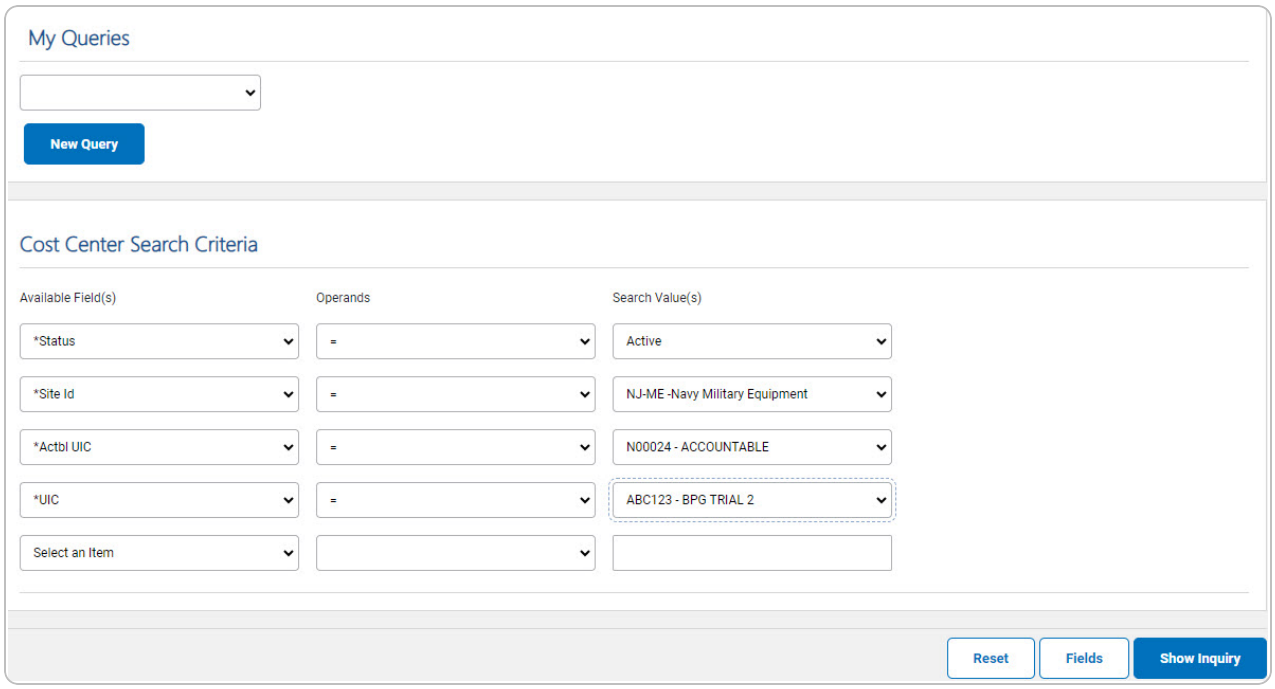
2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select **Add Query**. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*
5. Select Fields. *The* ***Cost Center Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Cost Center Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



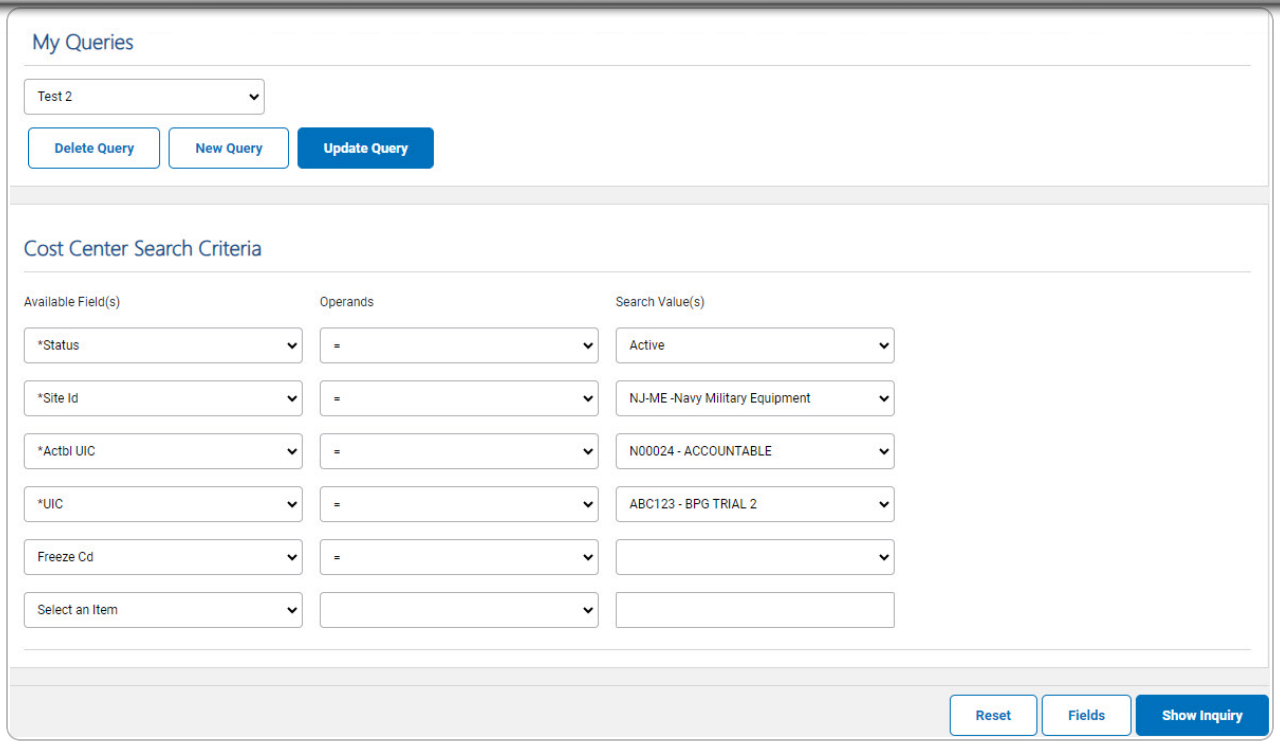
2. Select Fields. *The **Cost Center Inquiry — Select Fields** page appears.*

OR

Select Show Inquiry. *The **Cost Center Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*



2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*

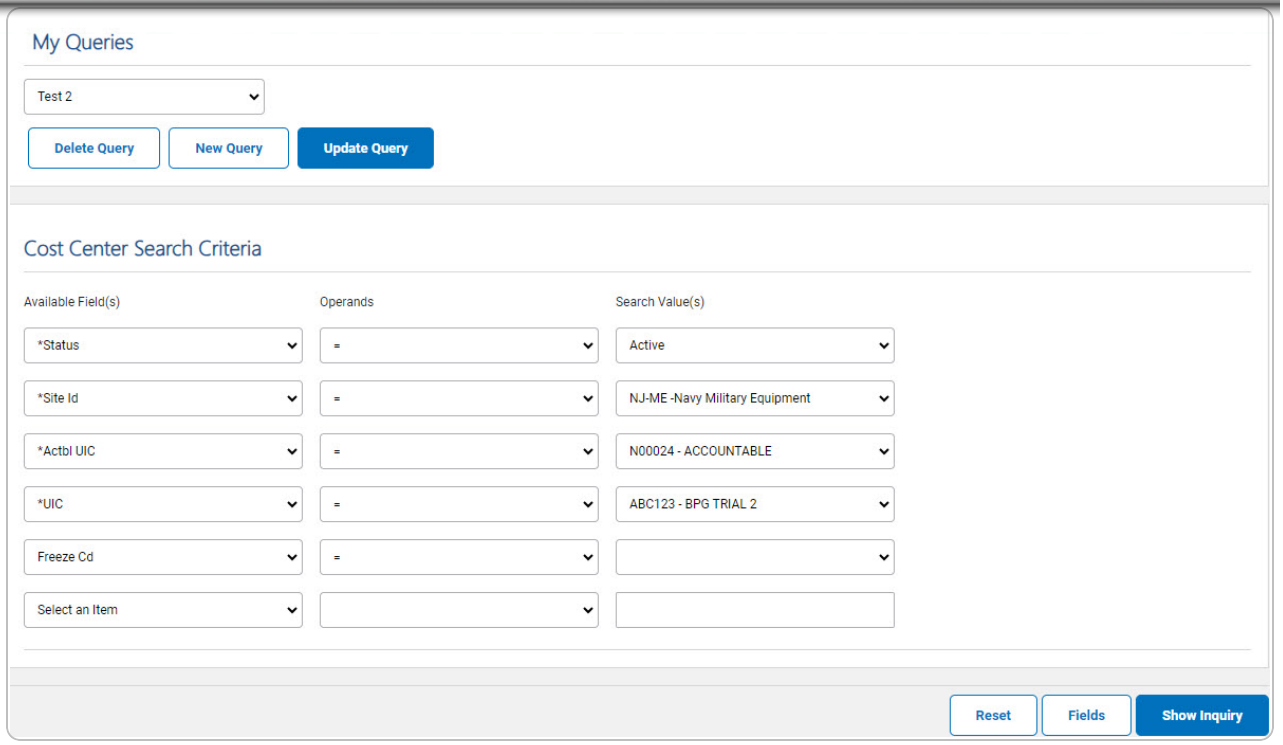
4. Select Fields. *The **Cost Center Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Cost Center Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*



2. *Verify the query information.*

3. Select Delete Query. *The query information is removed.*

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

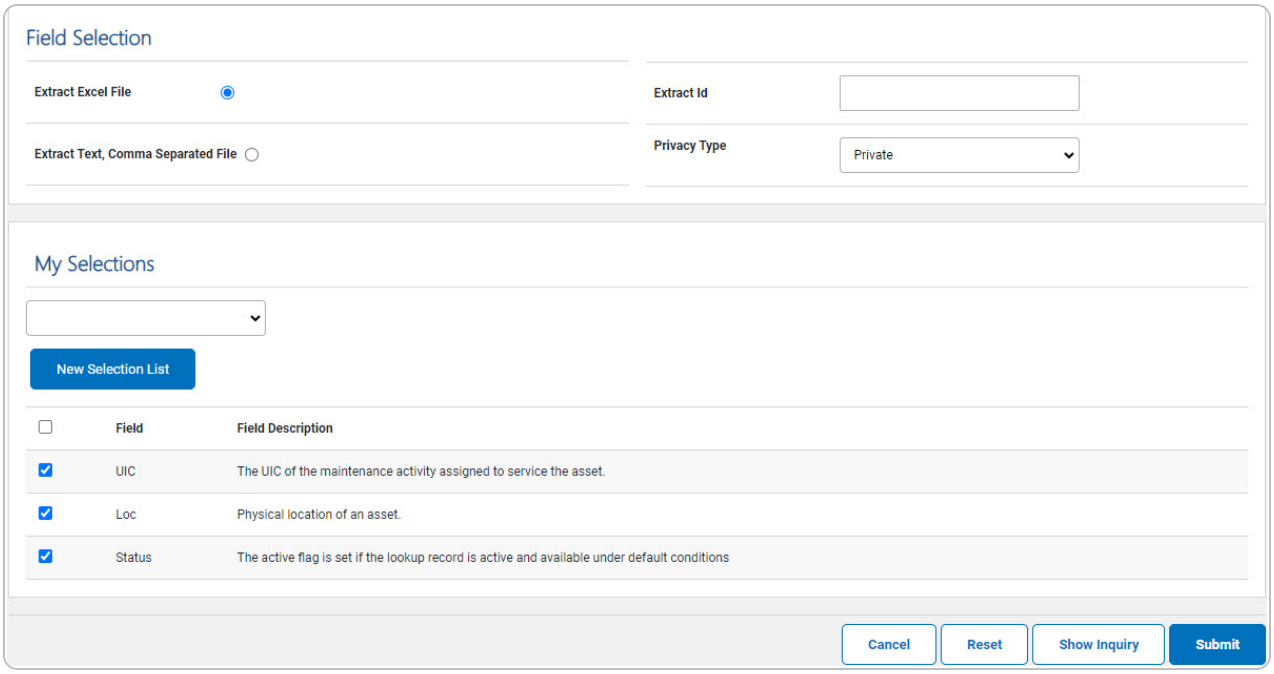
1. Select Fields. *The* ***Location Inquiry*** *page appears.*



2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the* ***View Inquiry Extract*** *page is an .XLS file.*

  OR

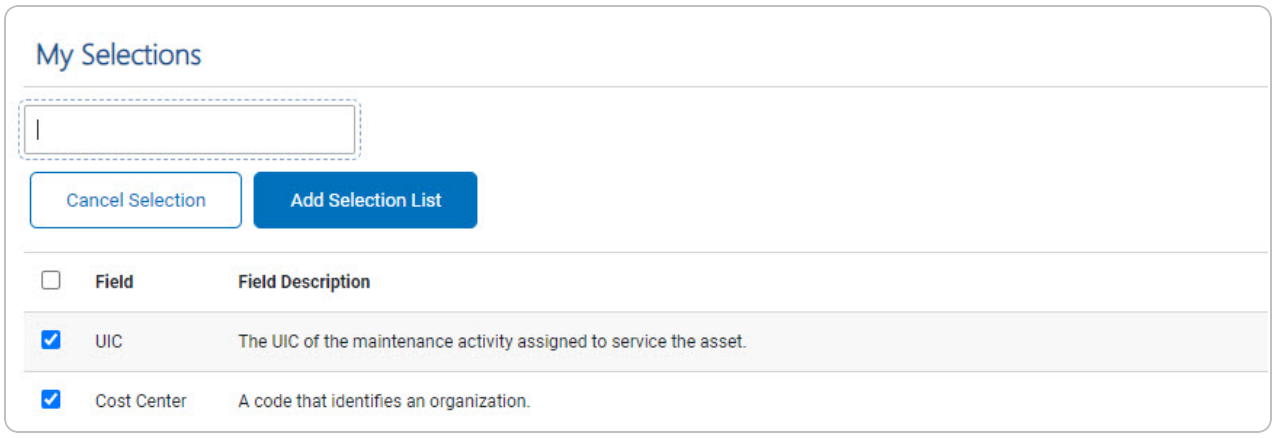
  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the* ***View Inquiry Extract*** *page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the* ***View Inquiry Extract*** *page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*



Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

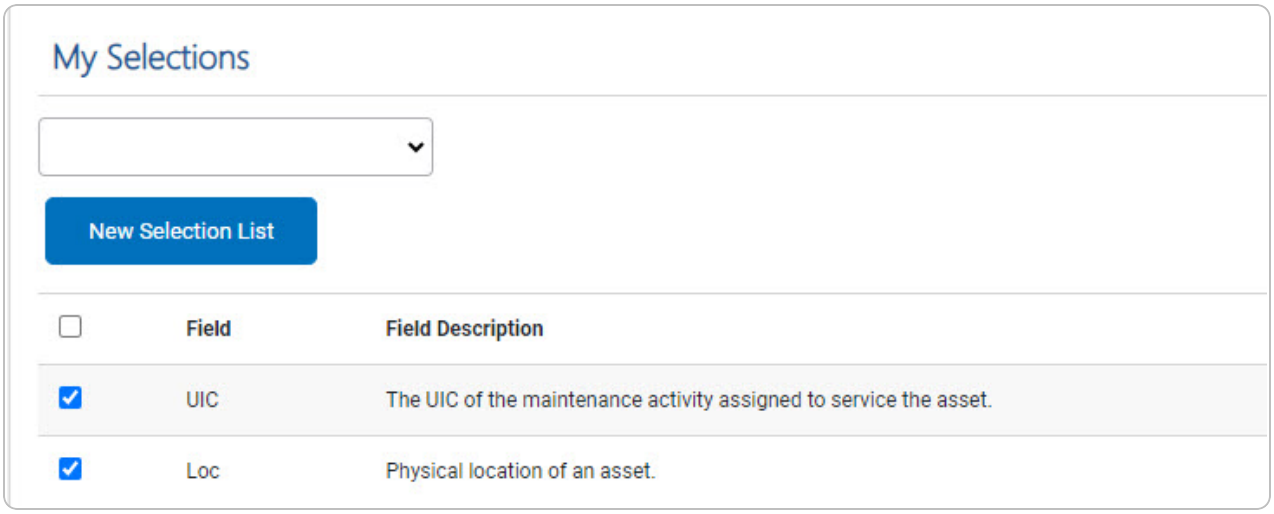
2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

   Select Show Inquiry for small volumes of data. *The* ***Location Inquiry — Results*** *page appears.*
5. **OR**

   Select Submit for large volumes of data. *The* ***Location Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.



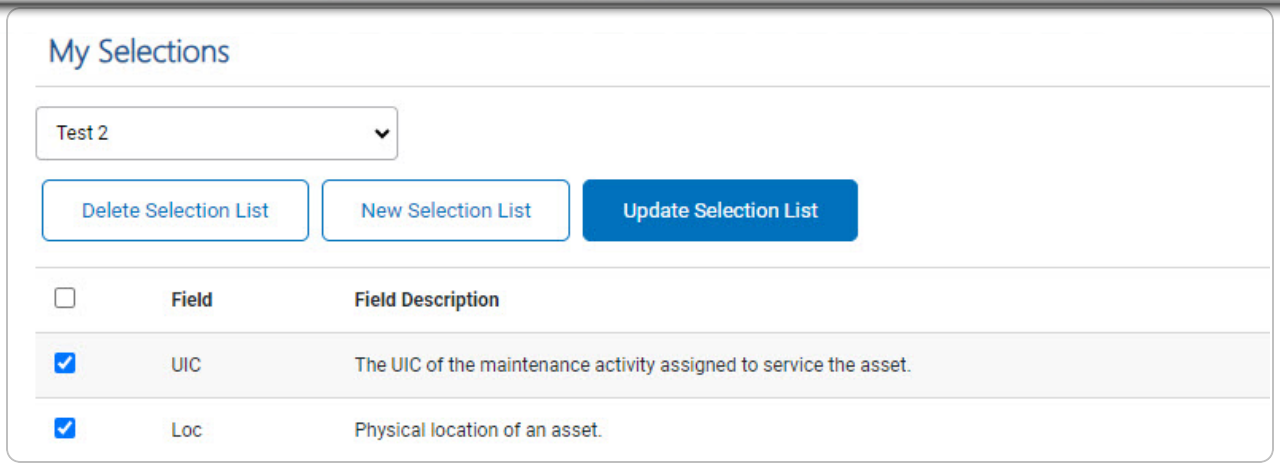
2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*
3. Select Show Inquiry for small volumes of data. *The **Location Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Location Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



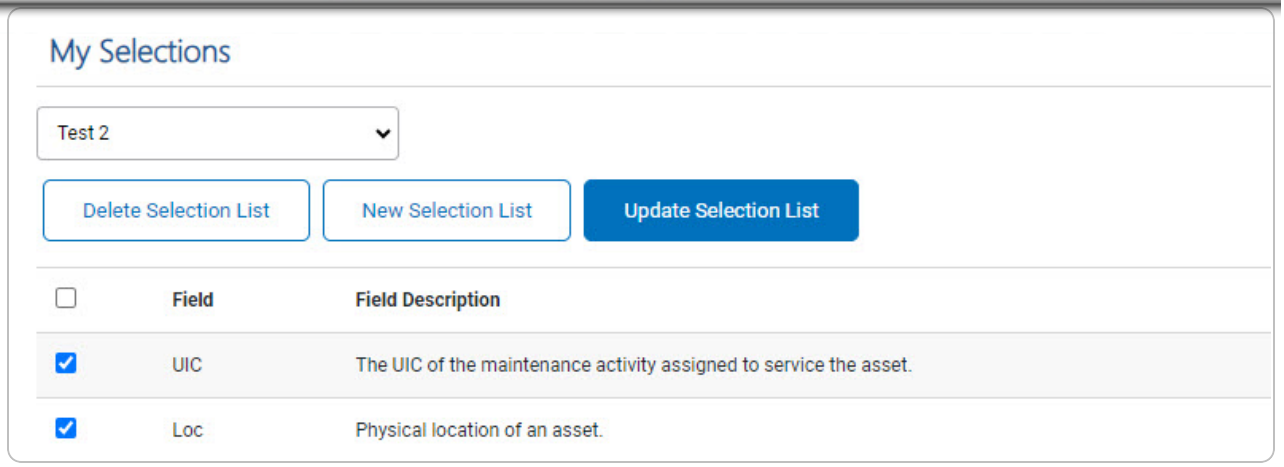
2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***Location Inquiry — Results*** *page appears.*
4. **OR**

   Select Submit for large volumes of data. *The* ***Location Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

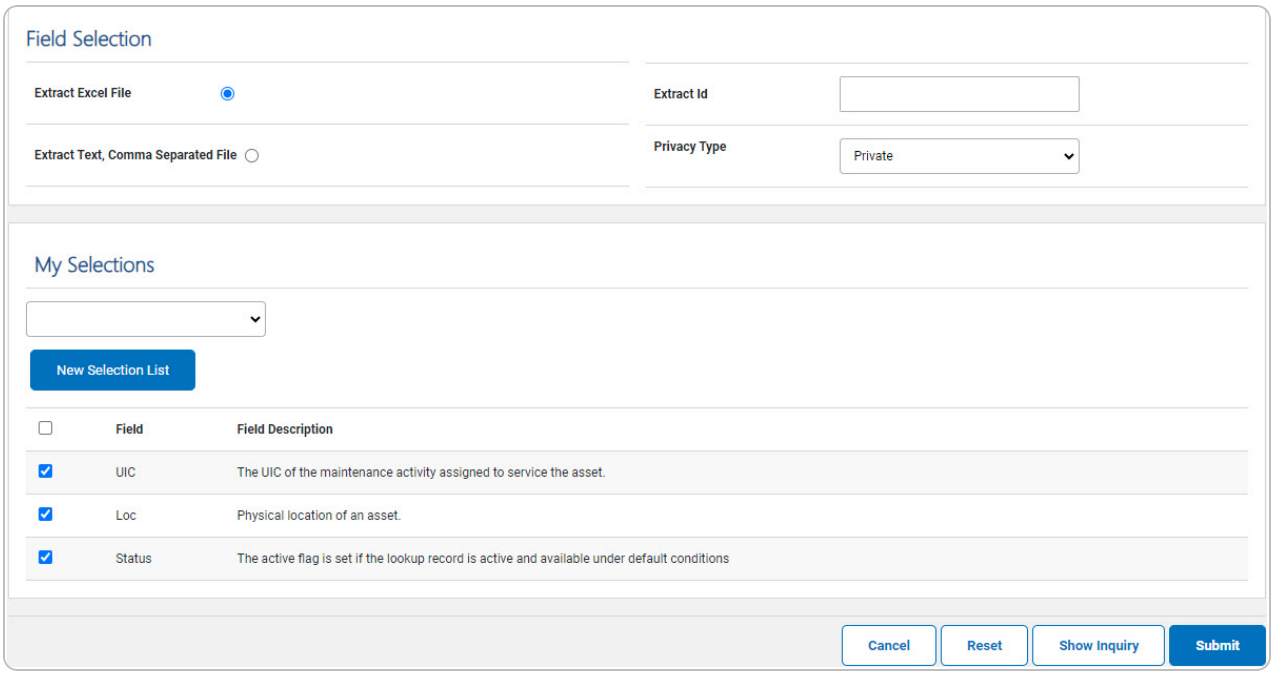


2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Location Inquiry** page appears.*



2. Select the fields required for the inquiry. *The first 3 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the UIC contains the appropriate ☑ or ☐. *Select if the inquiry contains a UIC.*
- Verify the Loc contains the appropriate ☑ or ☐. *Select if the inquiry contains a Location.*
- Verify the Status contains the appropriate ☑ or ☐. *Select if the inquiry contains a Status.*

Select Show Inquiry for small volumes of data. *The **Location Inquiry — Results** page appears.*

3.

OR

Select  for large volumes of data. *The* ***Location Inquiry Transaction Status*** *page appears.*

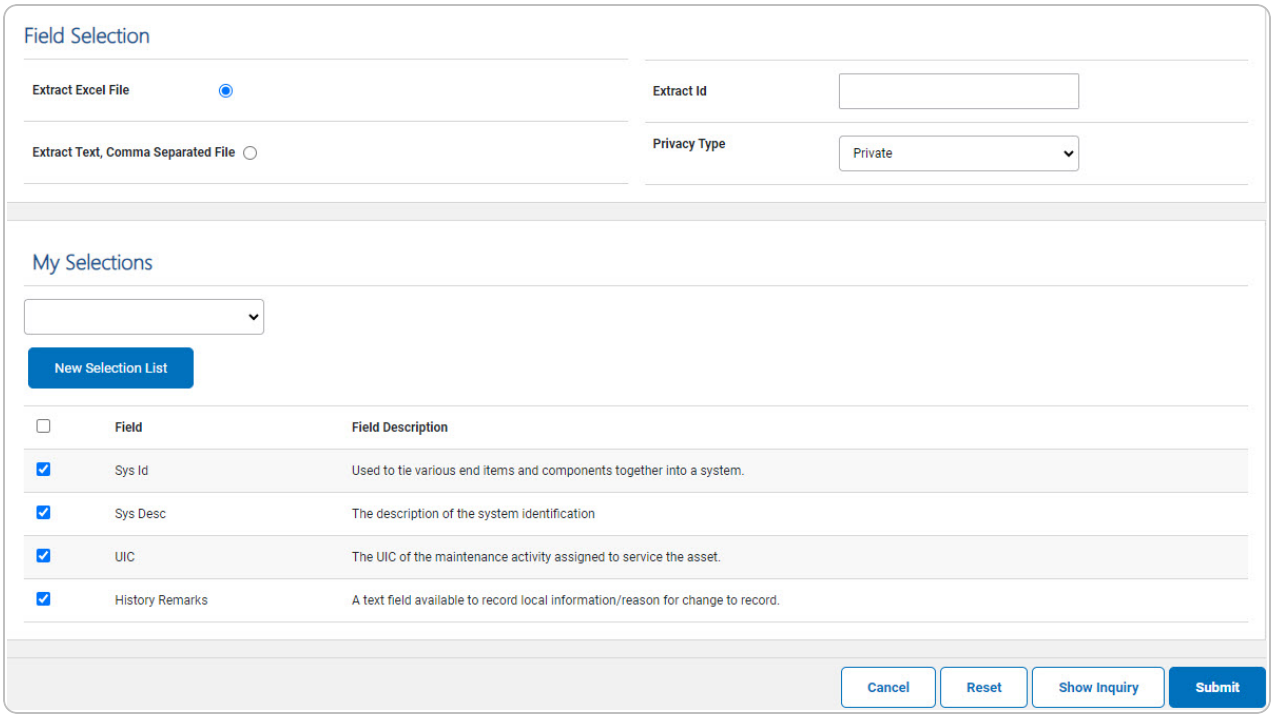
Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The* ***System Identification Inquiry*** *page appears.*



2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the* ***View Inquiry Extract*** *page is an .XLS file.*

  OR

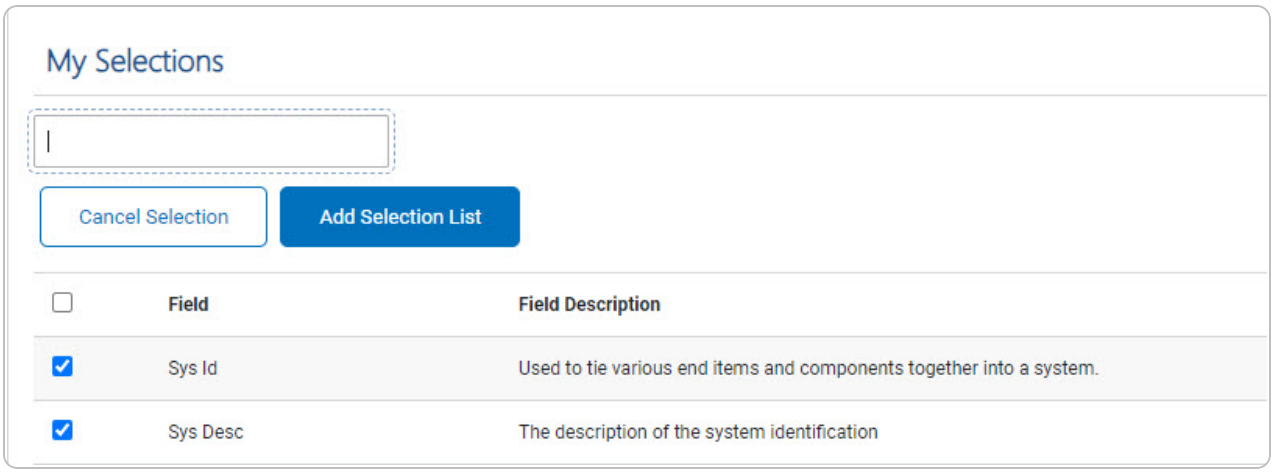
  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the* ***View Inquiry Extract*** *page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the* ***View Inquiry Extract*** *page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*



Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

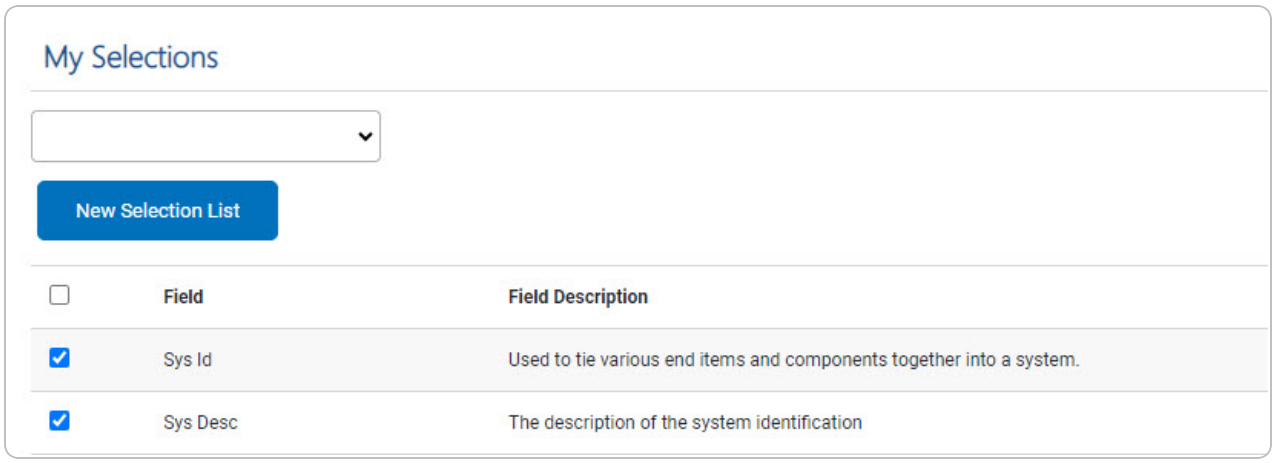
   Select Show Inquiry for small volumes of data. *The* ***System Identification Inquiry — Results*** *page appears.*
5.

OR

Select Submit for large volumes of data. *The* ***System Identification Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.



2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

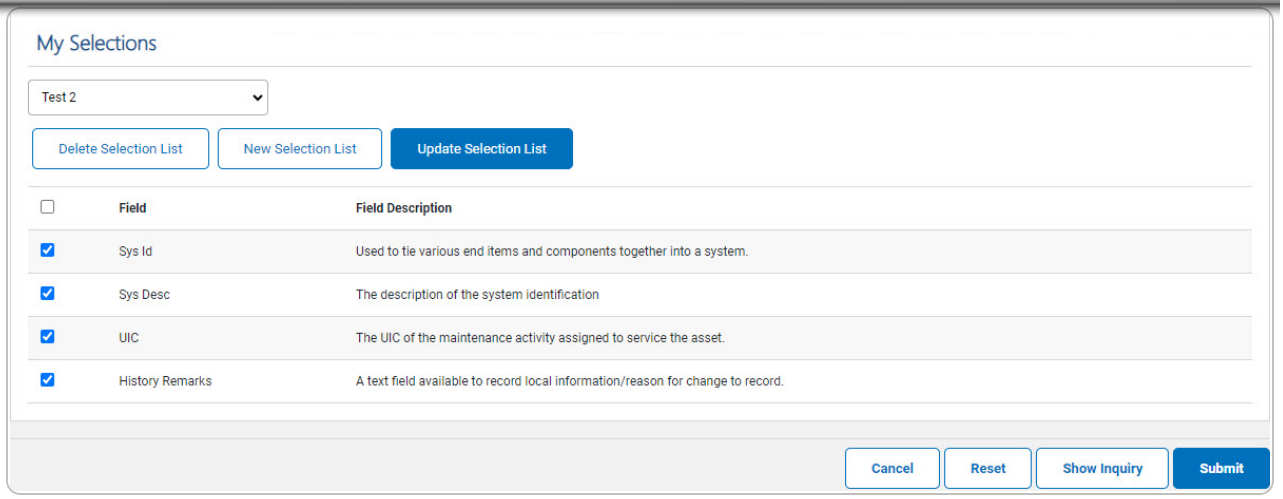
Select Show Inquiry for small volumes of data. *The* ***System Identification Inquiry — Results*** *page appears.*

3. **OR**

Select Submit for large volumes of data. *The* ***System Identification Inquiry Transaction Status*** *page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

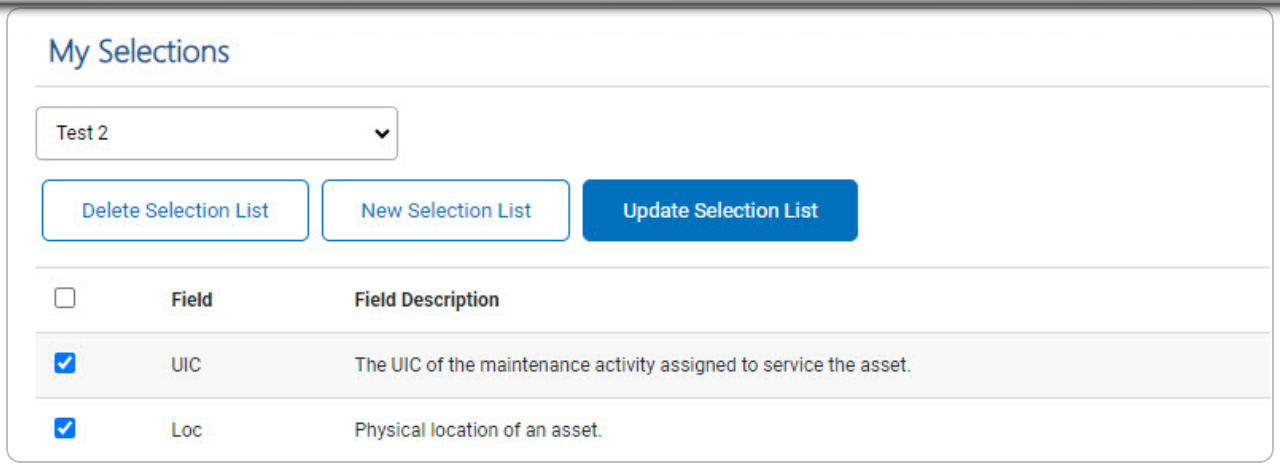
4. Select Show Inquiry for small volumes of data. *The* ***System Identification Inquiry — Results*** *page appears.*

OR

Select Submit for large volumes of data. *The* ***System Identification Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

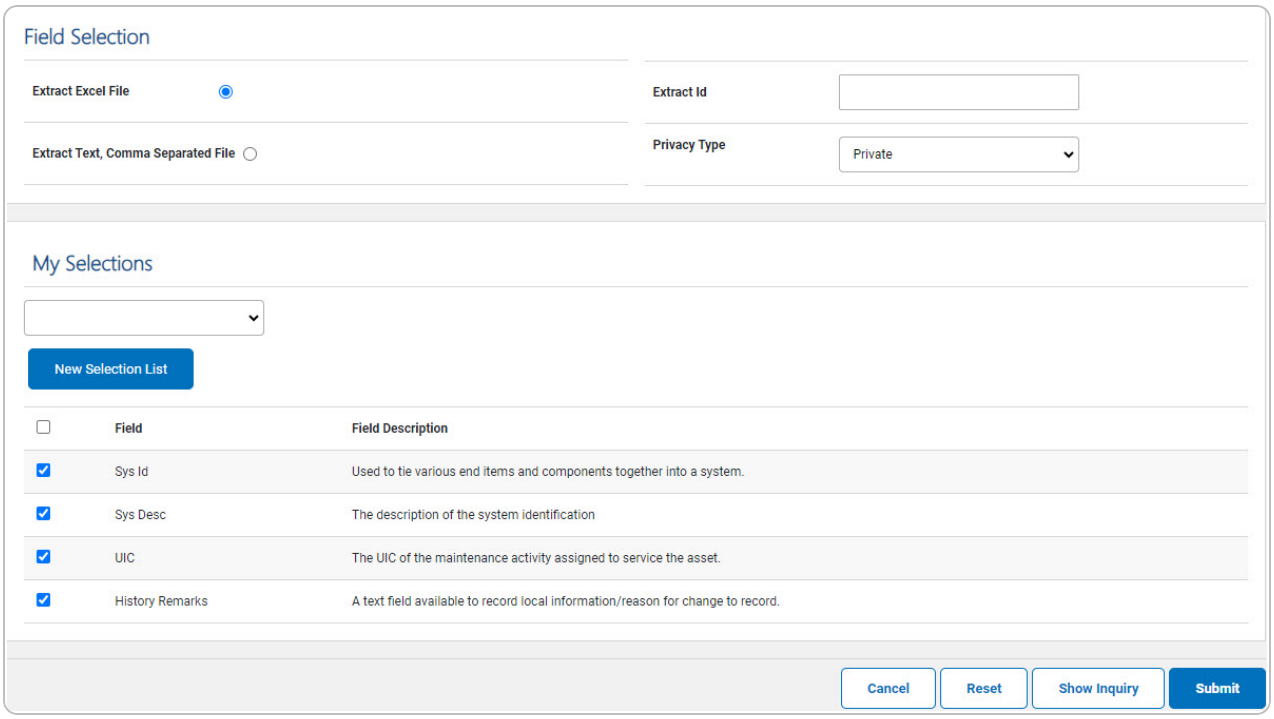


2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **System Identification Inquiry** page appears.*



2. Select the fields required for the inquiry. *The first 4 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the SYS ID contains the appropriate ☑ or ☐. *Select if the inquiry contains a SYS ID.*
- Verify the SYS DESC contains the appropriate ☑ or ☐. *Select if the inquiry contains a SYS DESC.*
- Verify the UIC contains the appropriate ☑ or ☐. *Select if the inquiry contains a UIC.*

- Verify the History Remarks contains the appropriate ☑ or ☐. *Select if the inquiry contains History Remarks information.*

Select Show Inquiry for small volumes of data. *The* ***System Identification Inquiry — Results*** *page appears.*

3. **OR**

Select Submit for large volumes of data. *The* ***System Identification Inquiry Transaction Status*** *page appears.*

Search for a Maintenance Management Assignment Inquiry — Criteria

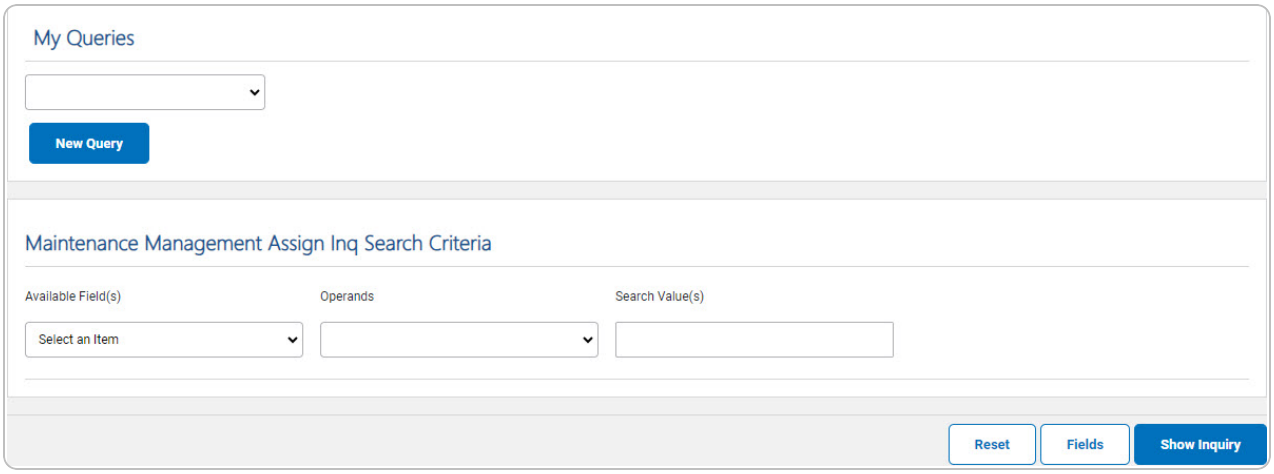
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.



2. *Choose which Available Field(s) to use in the search.*

A. Use ⌄ to select the first Available Field.

B. Use ⌄ to select the second Available Field.

C. Repeat Step B to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Use ⌄ to select the second Operands.

C. Repeat Step B to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use ⌄ to select the first Search Value.

B. Use ⌄ to select the second Search Value.

C. Repeat Step B to add additional search criteria.

Remove an Available Field Row

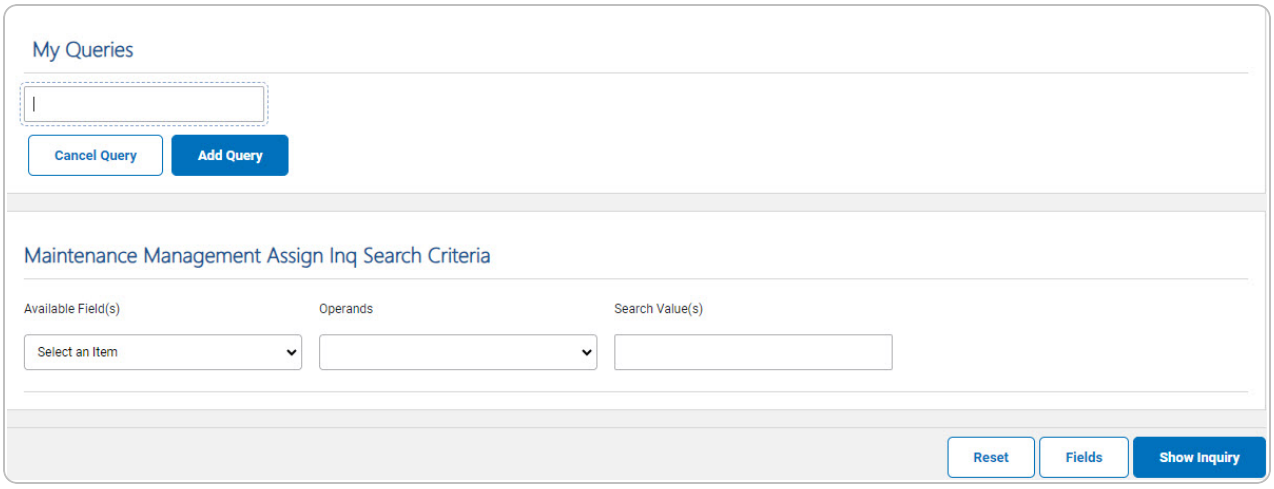
a. Use ⌄ to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Maintenance Management Assignment Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*



2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*

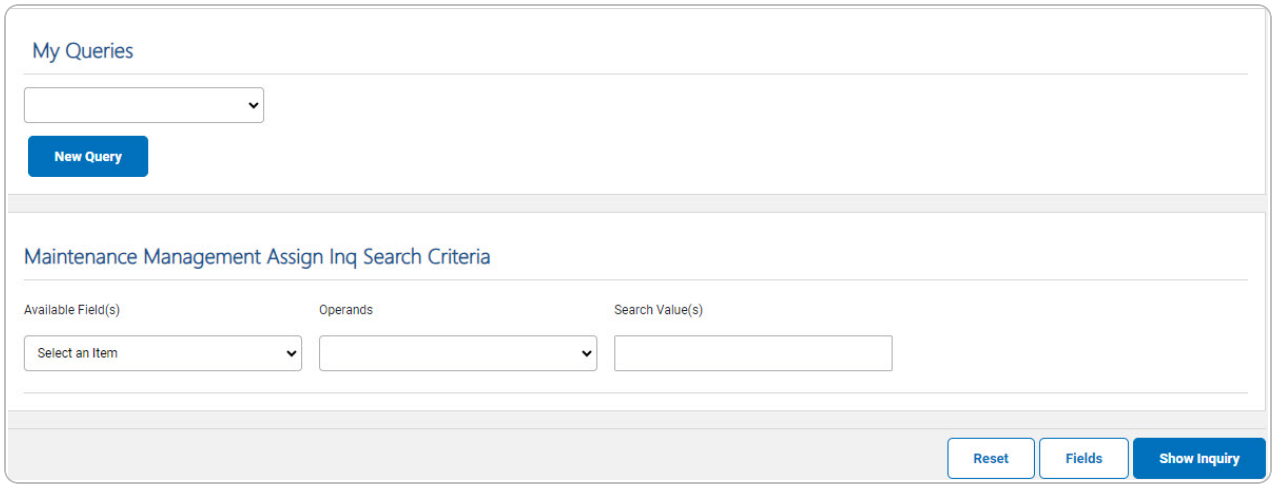
Select Fields. *The **Maintenance Management Assignment Inquiry — Select Fields** page appears.*

5. OR

Select Show Inquiry. *The **Maintenance Management Assignment Inquiry — Results** page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



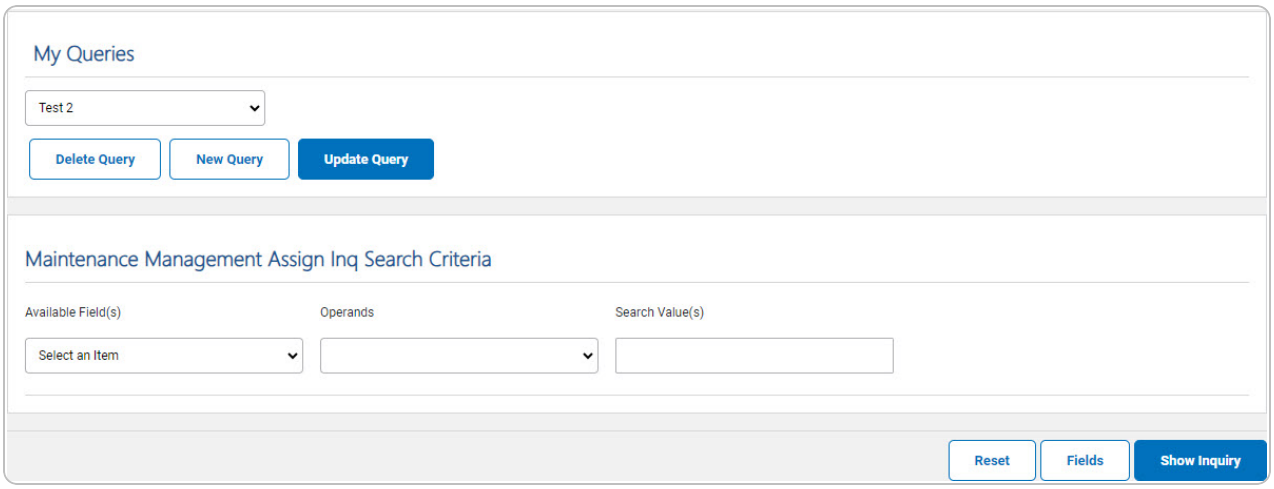
Select Fields. *The **Maintenance Management Assignment Inquiry — Select Fields** page appears.*

2. OR

Select Show Inquiry. *The **Maintenance Management Assignment Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*



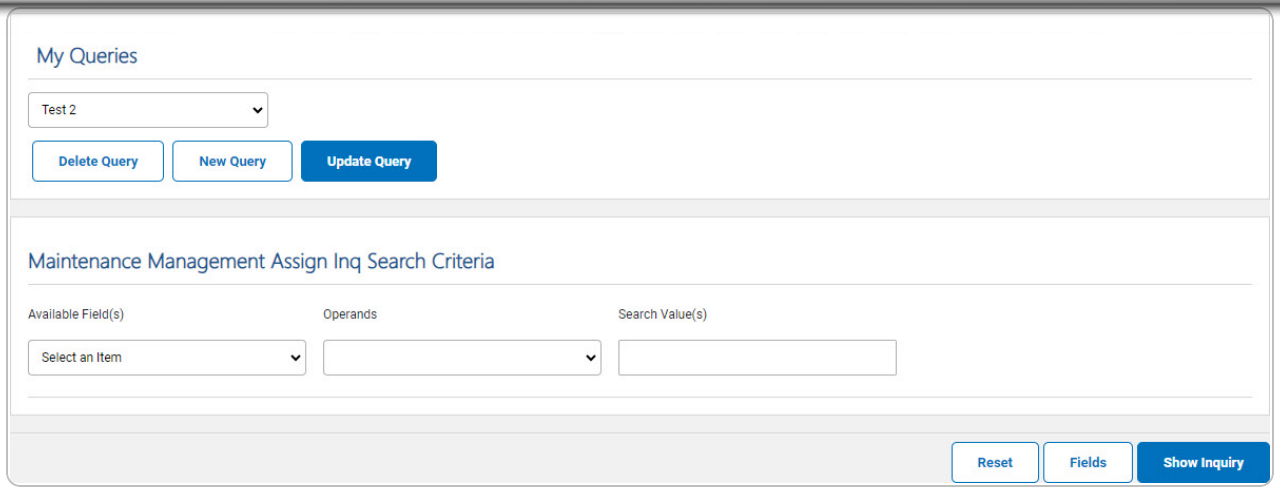
2. *Add and/or Remove rows in the Search Criteria grid as needed.*
3. Select Update Query*. The query information is updated.*

   Select Fields*. The* ***Maintenance Management Assignment Inquiry — Select Fields*** *page appears.*
4. OR

   Select Show Inquiry*. The* ***Maintenance Management Assignment Inquiry — Results*** *page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*



2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Maintenance Management Assignment Inquiry — Select Fields** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..

13 — Mandatory Entry: *Available Field(s)*.	
13 — Mandatory Entry: *Operands*.	Missing Entry. No data was entered. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Query Name*.	
xxxx – Saved Inquiry already exists. Select Update Query **or** Delete Query **.**	Invalid Entry. The inquiry already exists in the database. Use the existing inquiry, or select Update Query to revise the existing query.
102 — Inquiry already exists.	Invalid entry. The Inquiry is already established. Re-enter the inquiry or select Update Query or Delete Query to modify the existing inquiry.
106 — Operand must be =, >, <, >= , <= , <>, or Like.	Missing Entry. The Field value was entered, but no operand was selected. Choose an operand from the drop-down menu.
31 — To perform Search, data must be entered in one or more fields.	Missing Entry. At least one field is necessary to perform the search. Enter at least one field, then select the Search button.
65 — No record(s) match search criteria.	Invalid Entry. Results for the search criteria entered do not exist. Enter different Search Criteria and try the Search again.

Click the following link to display PA Navigation Tips.

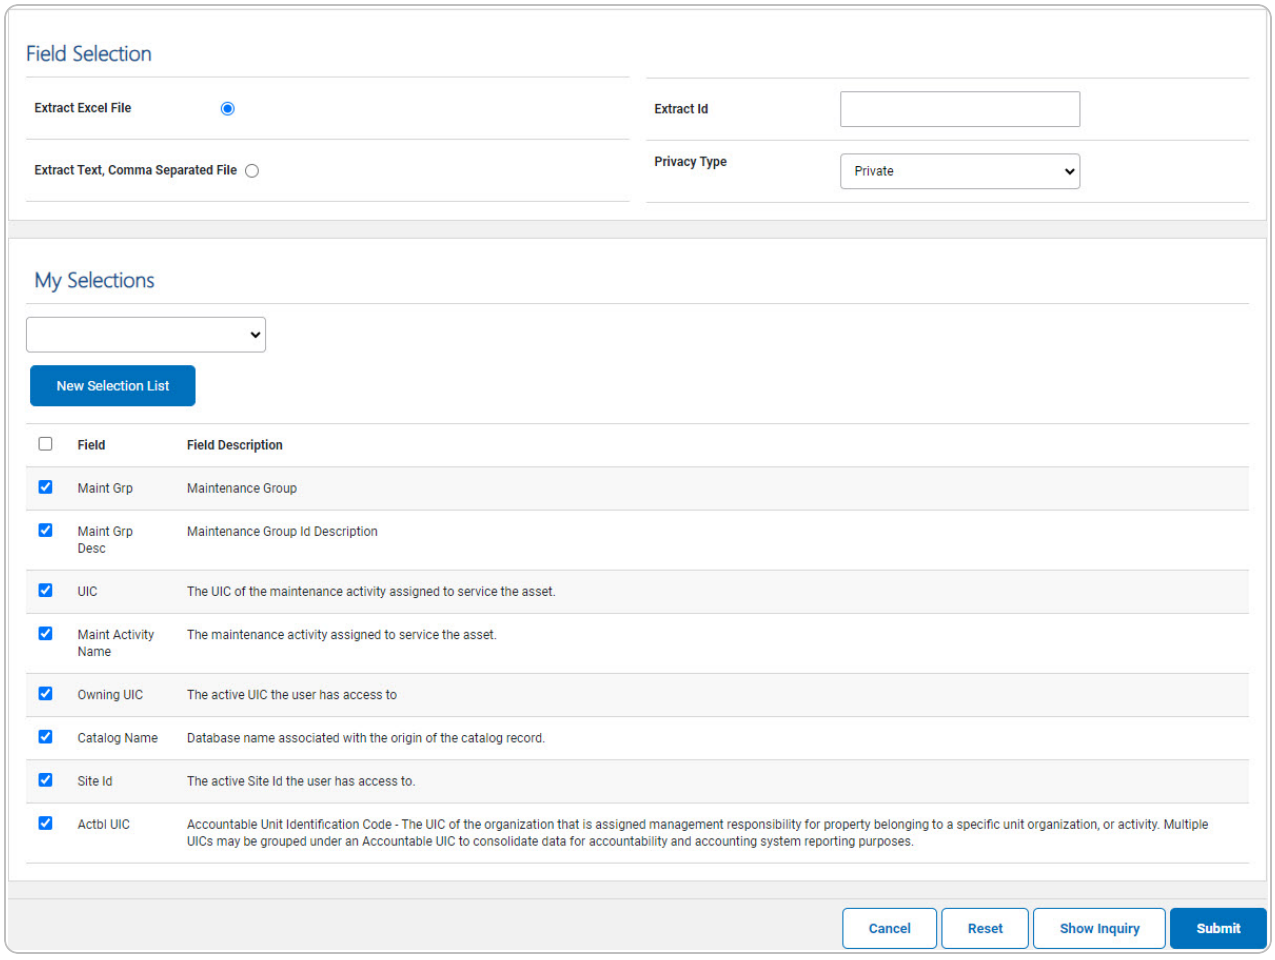
Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The* ***Maintenance Management Assignment Inquiry*** *page appears.*



2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.
5. Select Show Inquiry for small volumes of data. *The* ***Maintenance Management Assignment Inquiry — Results*** *page appears.*

   OR

   Select Submit for large volumes of data. *The* ***Maintenance Management Assignment Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

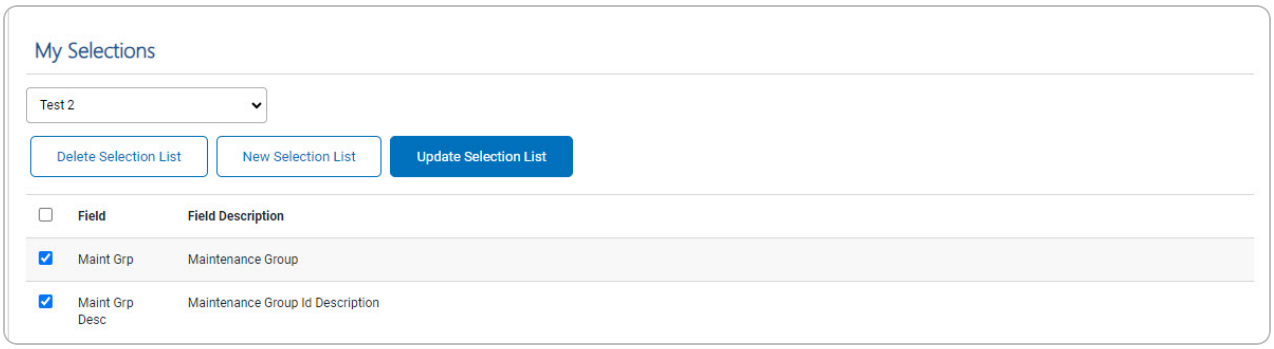
Select Show Inquiry for small volumes of data. *The **Maintenance Management Assignment Inquiry — Results** page appears.*

3. **OR**

Select Submit for large volumes of data. *The **Maintenance Management Assignment Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

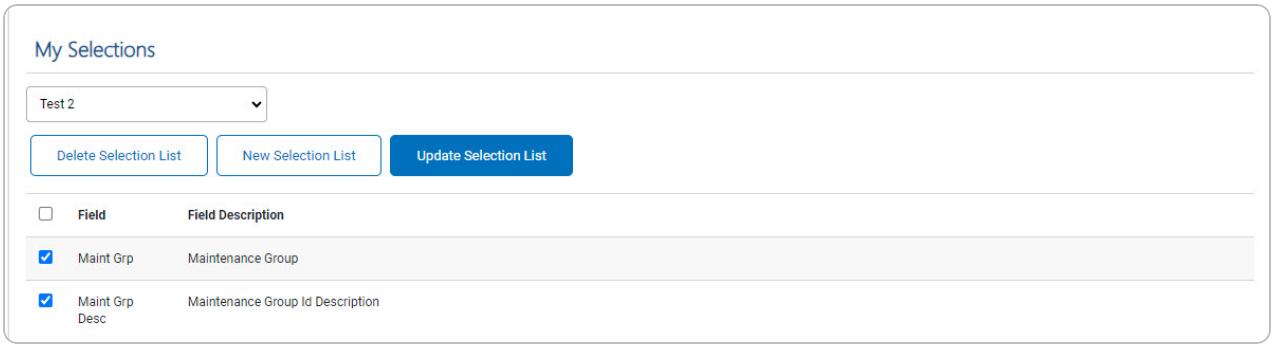
   Select Show Inquiry for small volumes of data. *The* ***Maintenance Management Assignment Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Maintenance Management Assignment Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

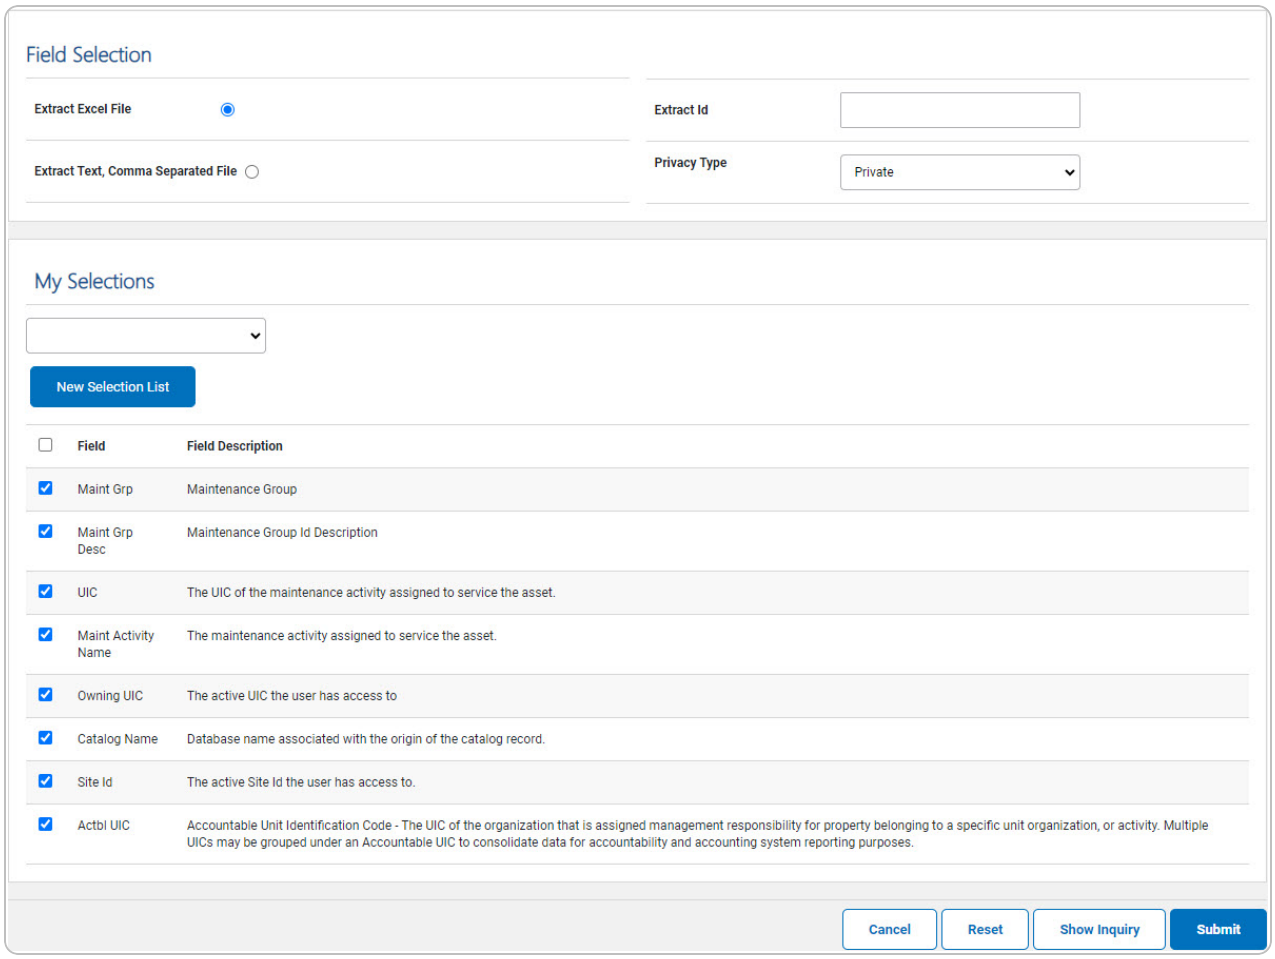


2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Maintenance Management Assignment Inquiry** page appears.*



2. Select the fields required for the inquiry. *The first 8 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the MAINT GRP contains the appropriate ☑ or ☐. *Select if the inquiry contains a MAINT GRP.*

- Verify the MAINT GRP DESC contains the appropriate ☑ or ☐. *Select if the inquiry contains a MAINT GRP DESC.*
- Verify the UIC contains the appropriate ☑ or ☐. *Select if the inquiry contains a UIC.*
- Verify the MAINT ACTIVITY NAME contains the appropriate ☑ or ☐. *Select if the inquiry contains a MAINT ACTIVITY NAME.*
- Verify the OWNING UIC contains the appropriate ☑ or ☐. *Select if the inquiry contains an OWNING UIC.*
- Verify the Catalog Name contains the appropriate ☑ or ☐. *Select if the inquiry contains a Catalog Name.*
- Verify the SITE ID contains the appropriate ☑ or ☐. *Select if the inquiry contains a SITE ID.*
- Verify the ACTBL UIC contains the appropriate ☑ or ☐. *Select if the inquiry contains an ACTBL UIC.*

3. Select Show Inquiry for small volumes of data. *The **Maintenance Management Assignment Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Maintenance Management Assignment Inquiry Transaction Status** page appears.*

Search for a Contractor Inquiry — Criteria

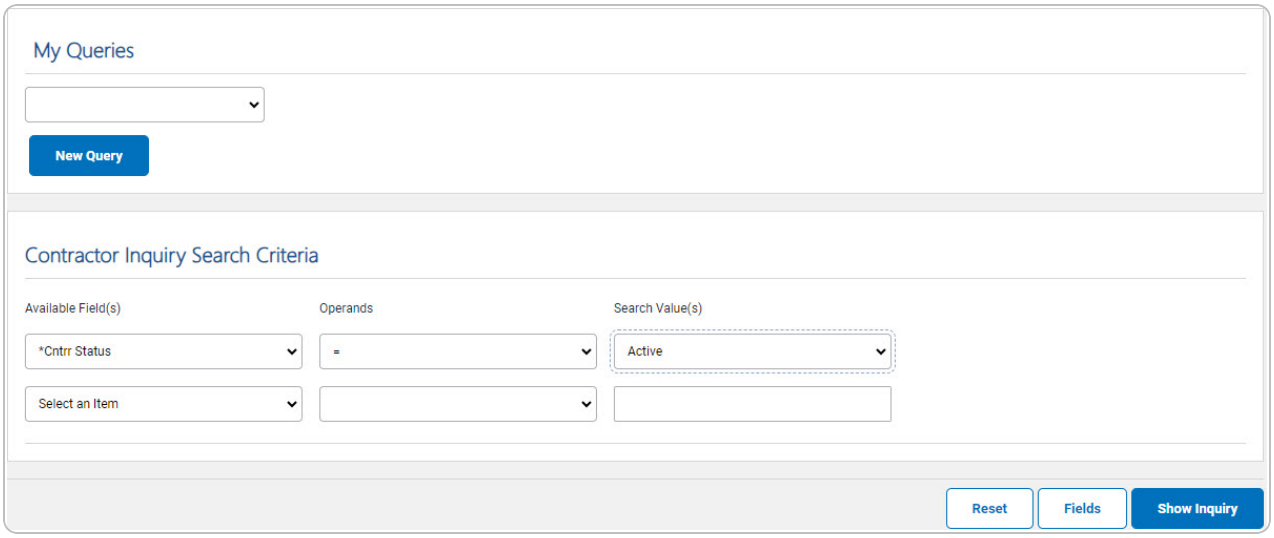
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.



2. *Choose which Available Field(s) to use in the search.*

A. *The first Available Field(s) option (SITE ID) automatically populates and is not editable.*

B. Use ⌄ to select the second Available Field.

C. Repeat Step B to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Use ⌄ to select the second Operands.

C. Repeat Step B to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

   A. Use ⌄ to select the first Search Value.

   B. Use ⌄ to select the second Search Value.

   C. Repeat Step B to add additional search criteria.

Remove an Available Field Row

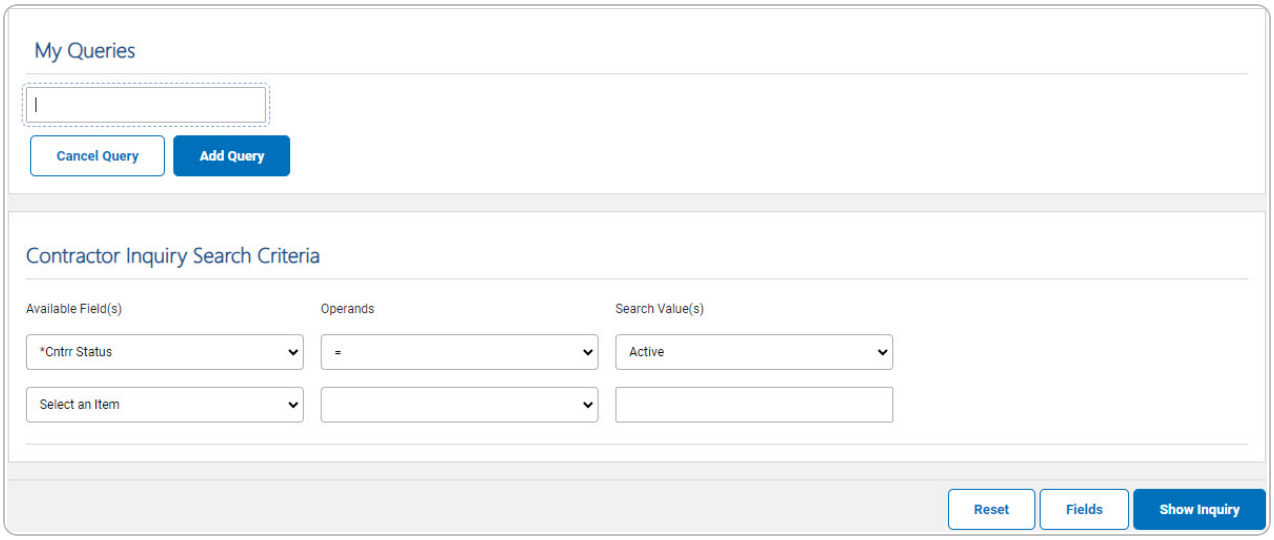
   a. Use ⌄ to select desired Available Field.

   b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Process Queue Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*



2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*

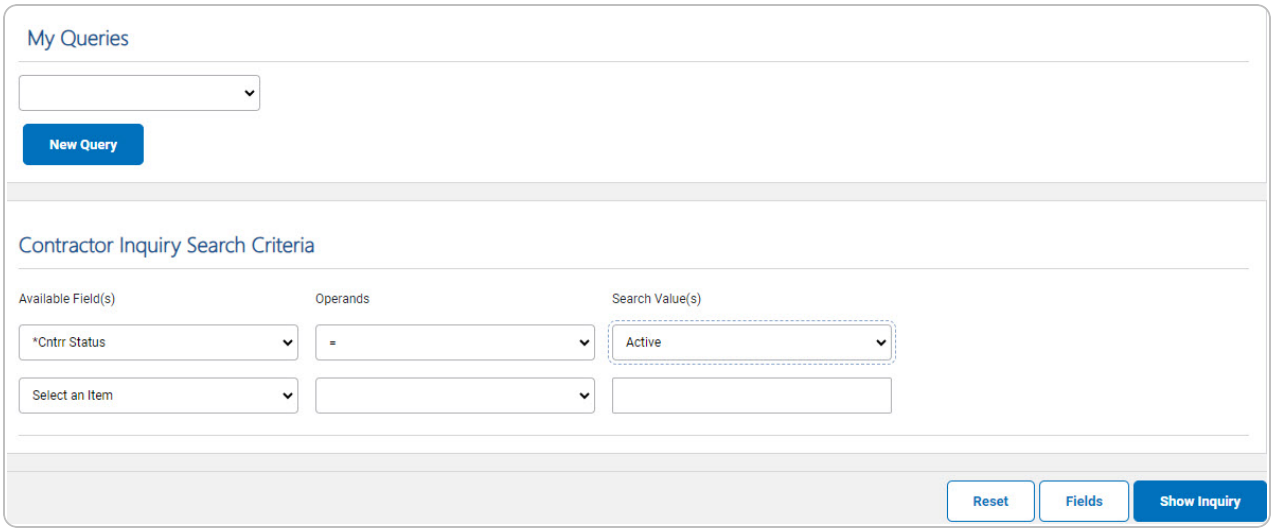
5. Select Fields. *The **Contractor Inquiry — Select Fields** page appears.*

OR

Select Show Inquiry. *The **Contractor Inquiry — Results** page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



2. Select Fields. *The **Contractor Inquiry — Select Fields** page appears.*

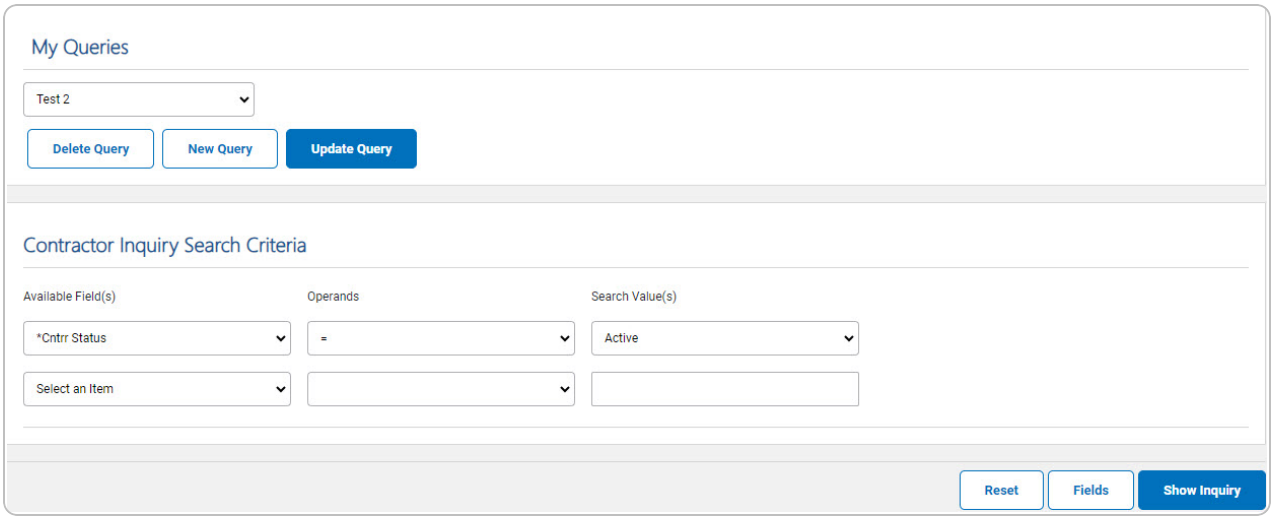
OR

Select Show Inquiry. *The **Contractor Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query*

information appears in the search criteria grid.



2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*

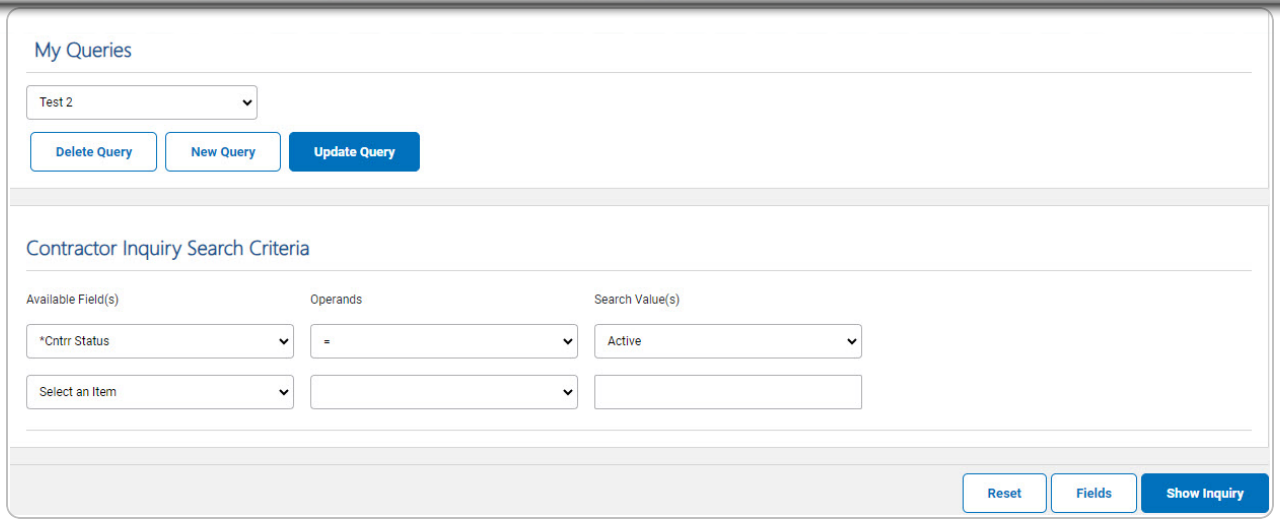
4. Select Fields. *The* ***Contractor Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Contractor Inquiry — Results*** *page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query. *The selected query information appears in the search criteria grid.*



2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

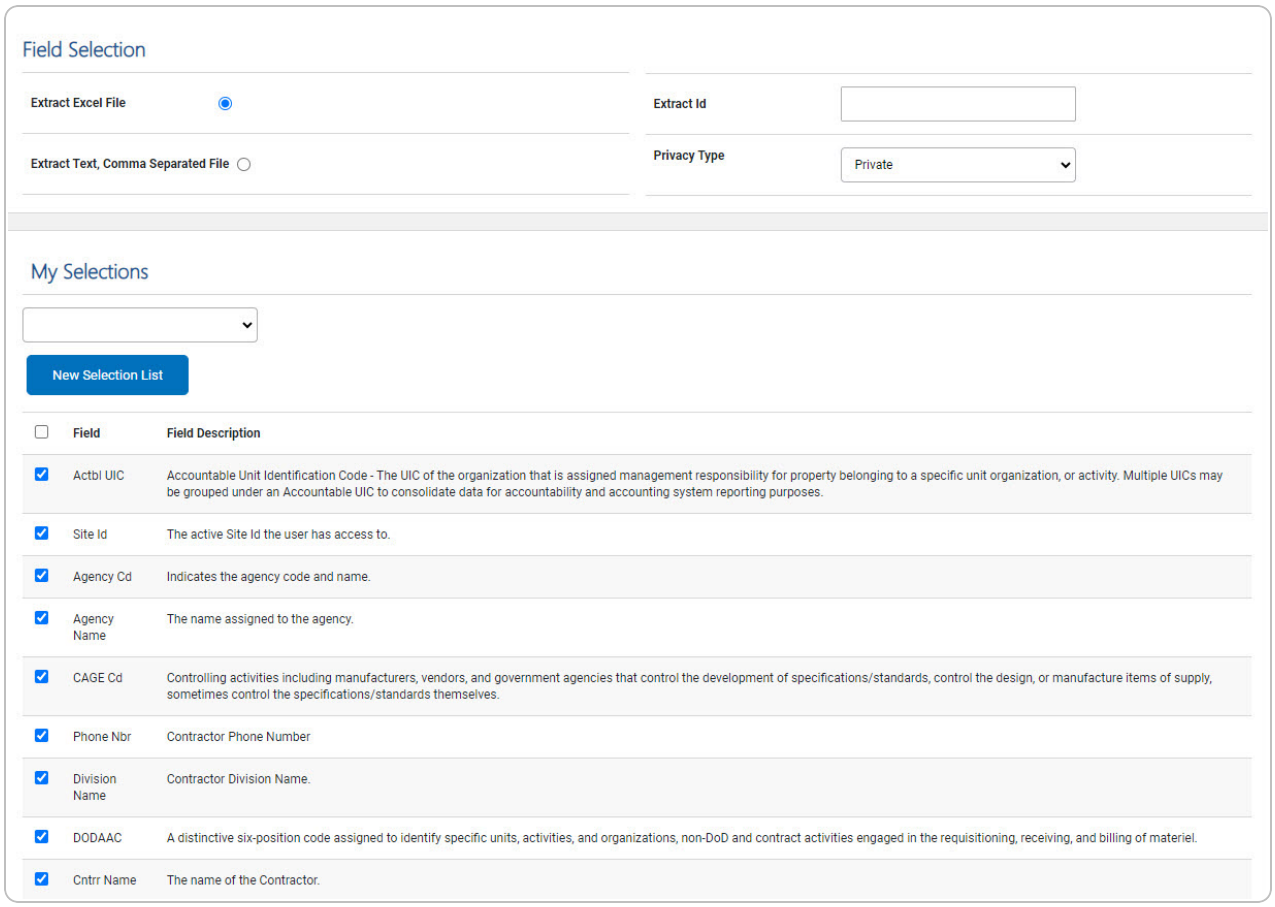
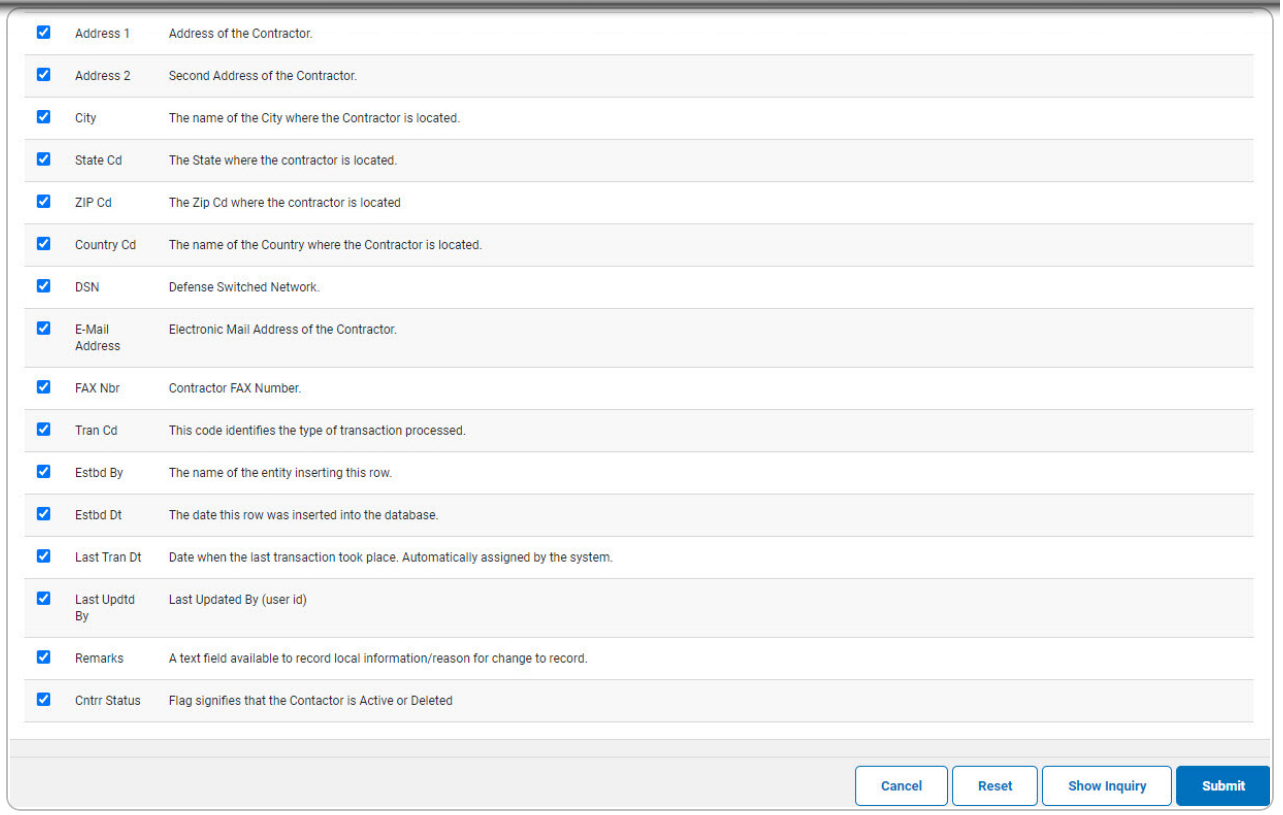
Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **Contractor Inquiry** page appears.*





2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

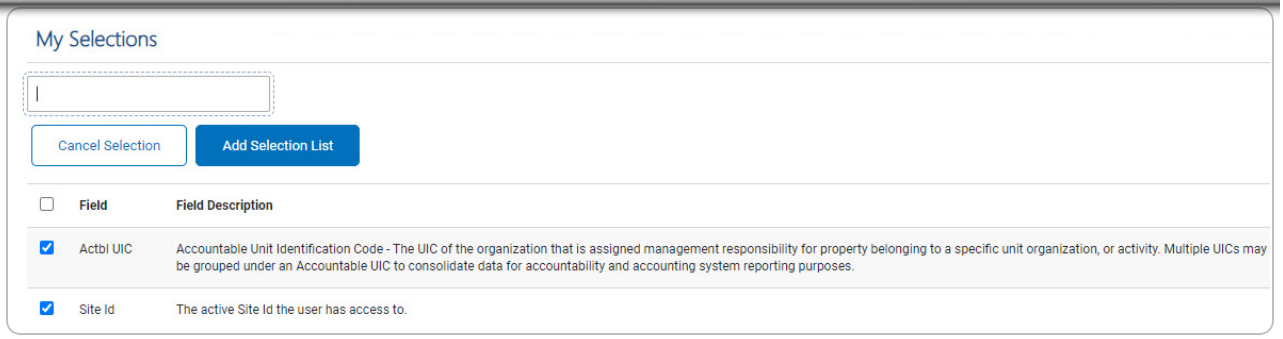
  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*



Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

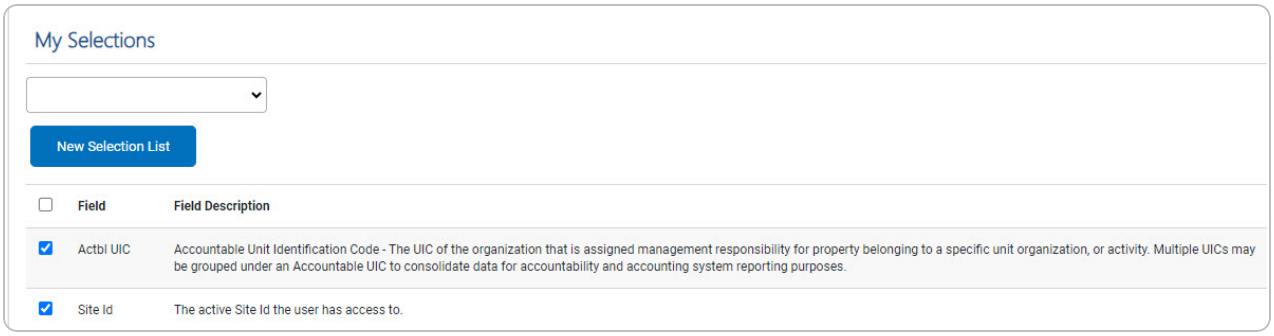
2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select **Add Selection List**. *The page refreshes, and the selected list is added.* **Add Selection List** *is replaced by* **Update Selection List** *and* Delete Selection List.

   Select **Show Inquiry** for small volumes of data. *The* ***Contractor Inquiry — Results*** *page appears.*
5. **OR**

   Select **Submit** for large volumes of data. *The* ***Contractor Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.



2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

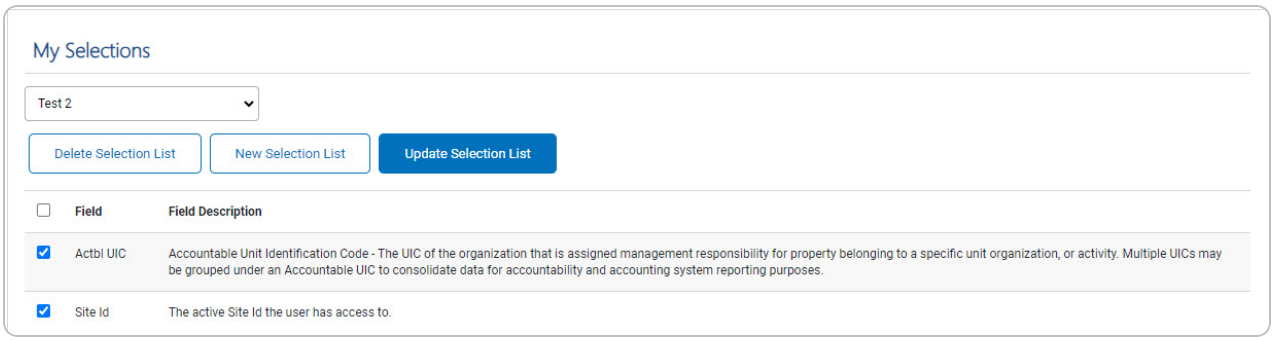
Select Show Inquiry for small volumes of data. *The* ***Contractor Inquiry — Results*** *page appears.*

3. **OR**

Select Submit for large volumes of data. *The* ***Contractor Inquiry Transaction Status*** *page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

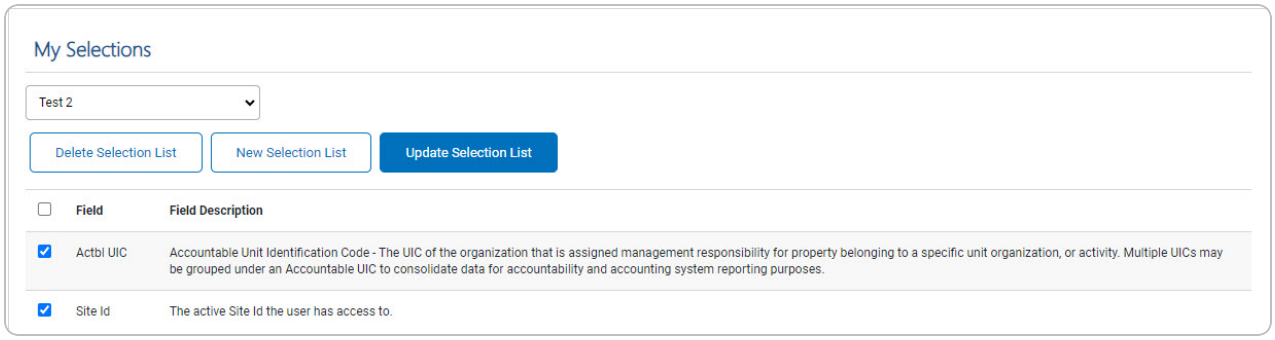
   Select Show Inquiry for small volumes of data. *The* ***Contractor Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Contractor Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

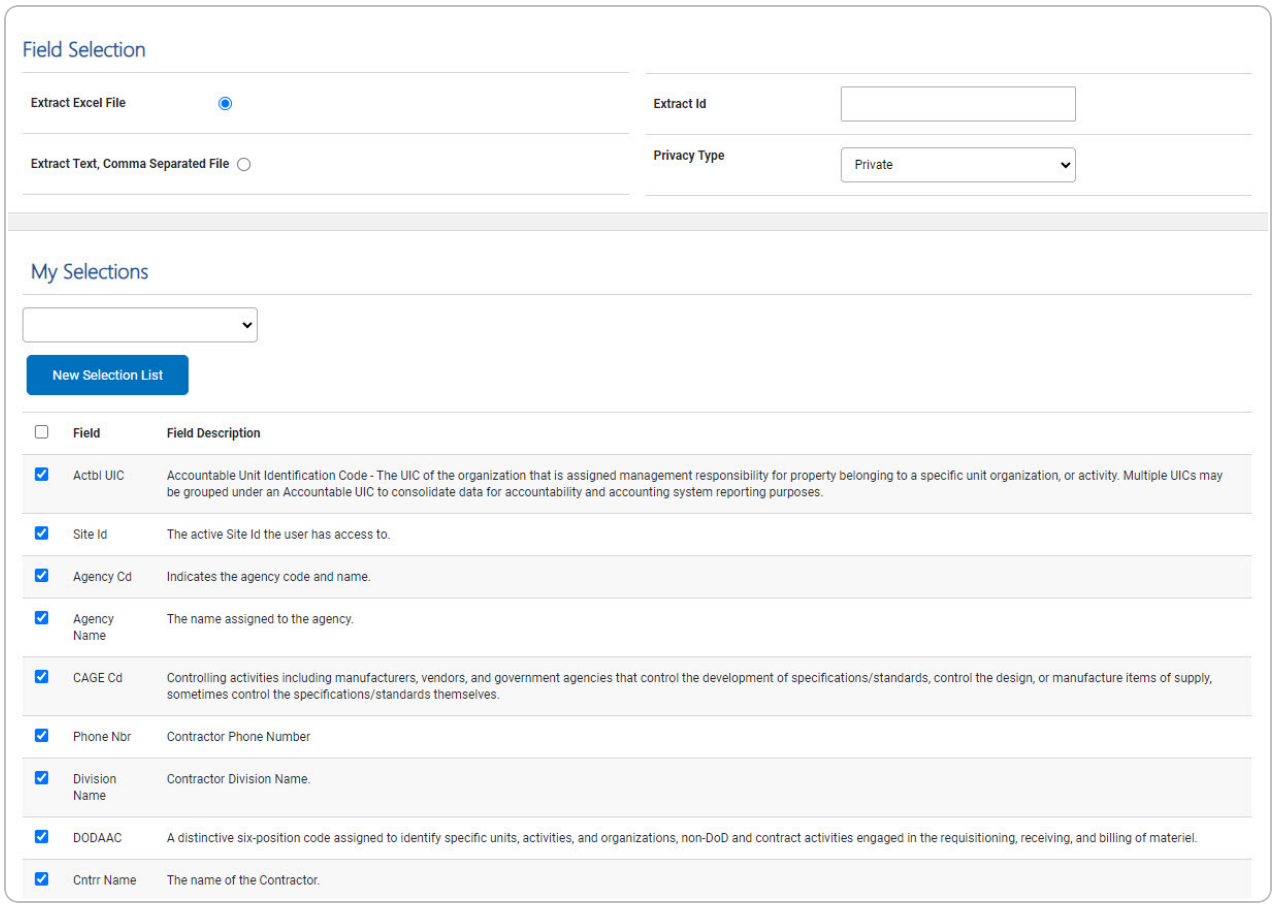


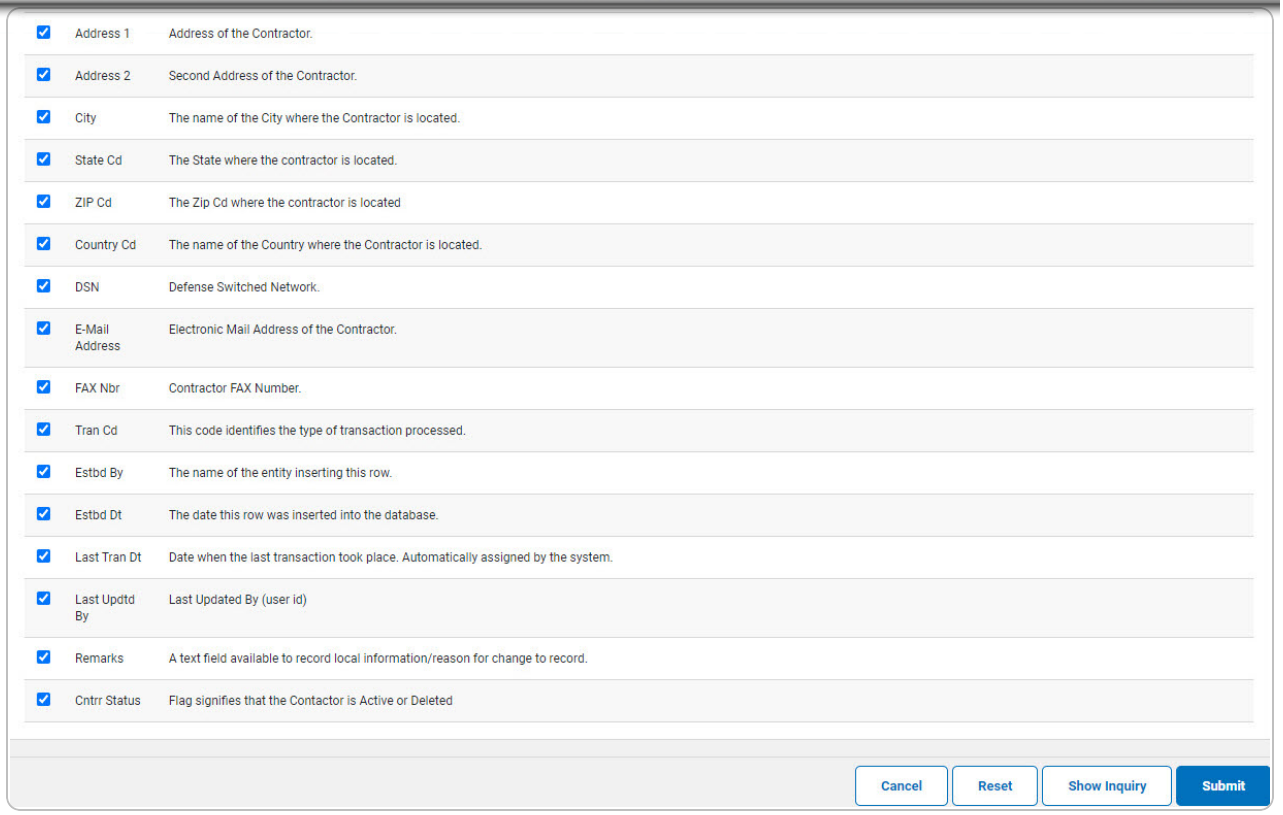
2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Contractor Inquiry** page appears.*





☑	Address 1	Address of the Contractor.
☑	Address 2	Second Address of the Contractor.
☑	City	The name of the City where the Contractor is located.
☑	State Cd	The State where the contractor is located.
☑	ZIP Cd	The Zip Cd where the contractor is located
☑	Country Cd	The name of the Country where the Contractor is located.
☑	DSN	Defense Switched Network.
☑	E-Mail Address	Electronic Mail Address of the Contractor.
☑	FAX Nbr	Contractor FAX Number.
☑	Tran Cd	This code identifies the type of transaction processed.
☑	Estbd By	The name of the entity inserting this row.
☑	Estbd Dt	The date this row was inserted into the database.
☑	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☑	Last Updtd By	Last Updated By (user id)
☑	Remarks	A text field available to record local information/reason for change to record.
☑	Cntrr Status	Flag signifies that the Contactor is Active or Deleted

Cancel Reset Show Inquiry Submit

2. Select the fields required for the inquiry. *The first 25 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

Search for a Contract Inquiry — Criteria

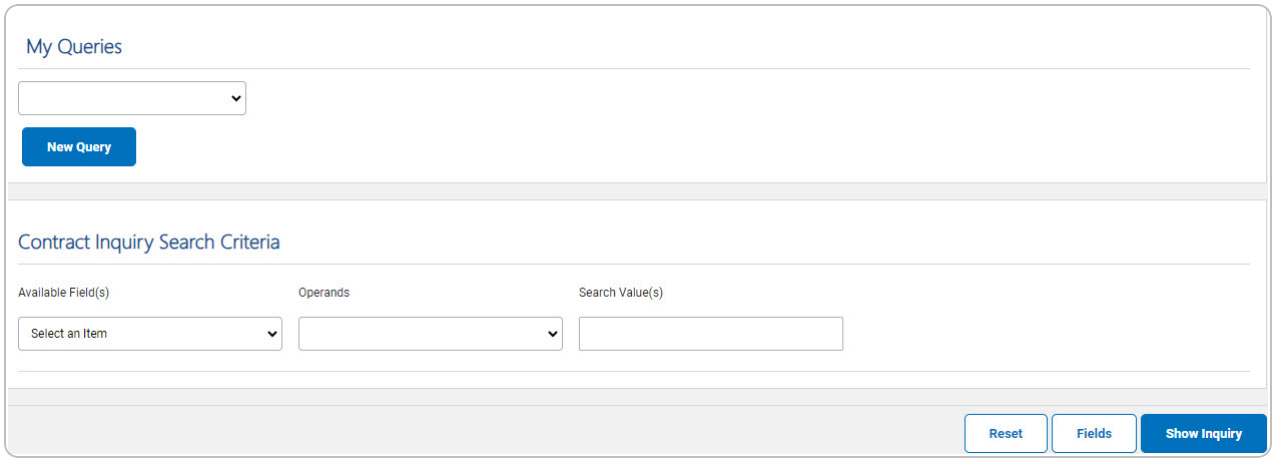
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.



2. *Choose which Available Field(s) to use in the search.*

A. Use ⌄ to select the first Available Field.

B. Repeat Step B to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Use ⌄ to select the second Operands.

C. Repeat Step B to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use ⌄ to select the first Search Value.

B. Use ⌄ to select the second Search Value.

C. Repeat Step B to add additional search criteria.

Remove an Available Field Row

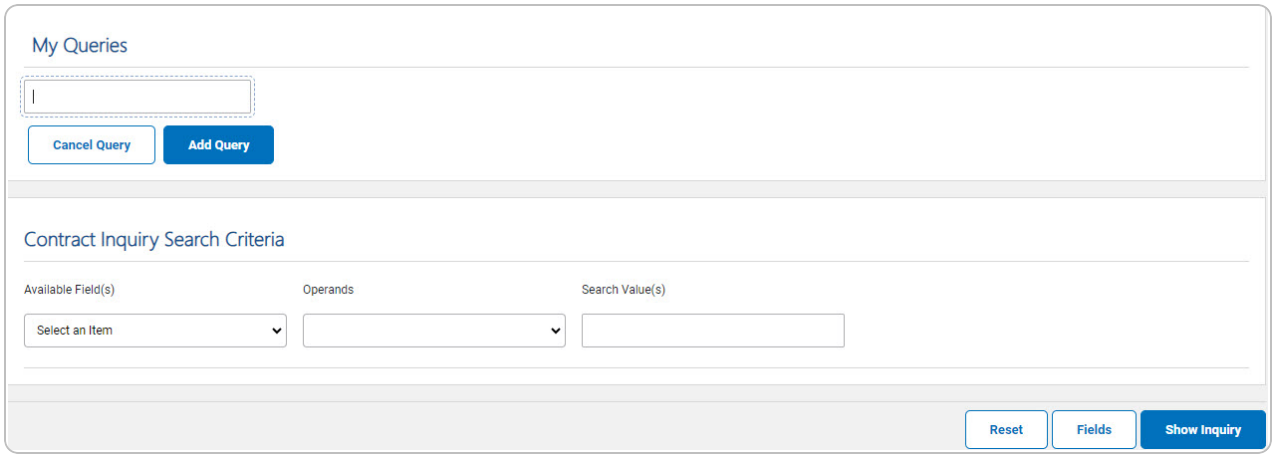
a. Use ⌄ to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Contract Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*



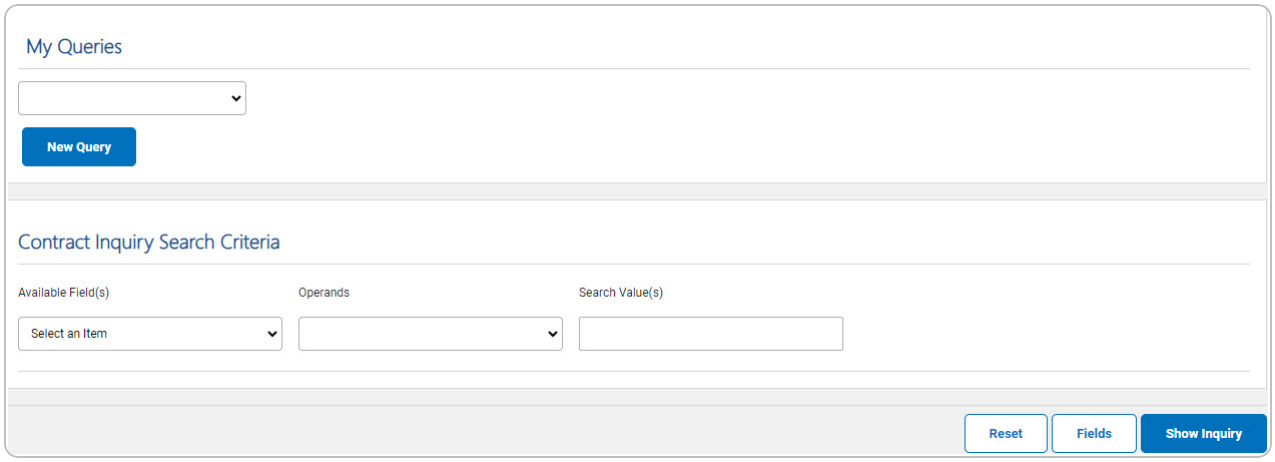
2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*
5. Select Fields. *The **Contract Inquiry — Select Fields** page appears.*

OR

Select Show Inquiry. *The* ***Contract Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



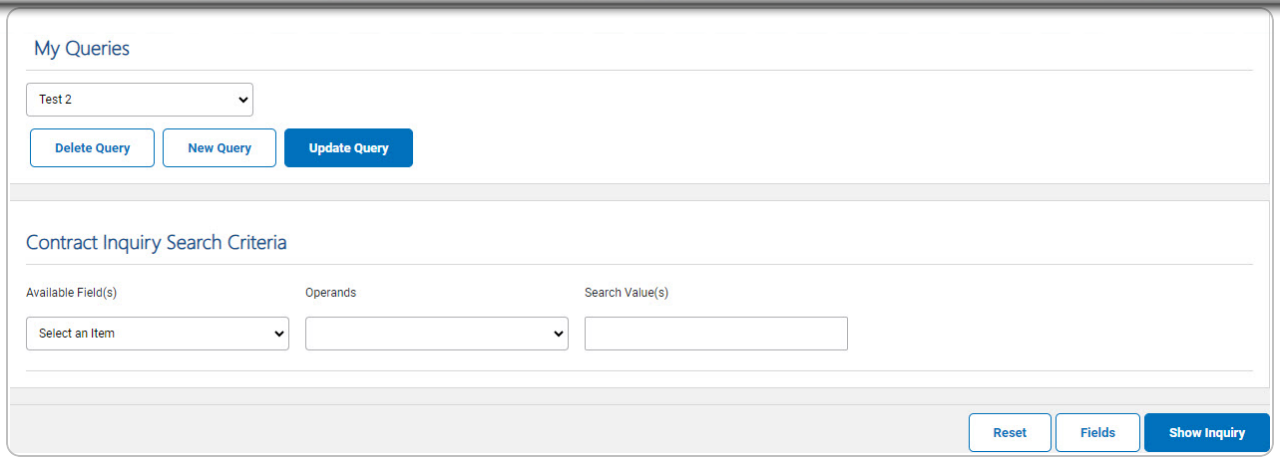
2. Select Fields. *The* ***Contract Inquiry — Select Fields*** *page appears.*

OR

Select Show Inquiry. *The* ***Contract Inquiry — Results*** *page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*



2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*

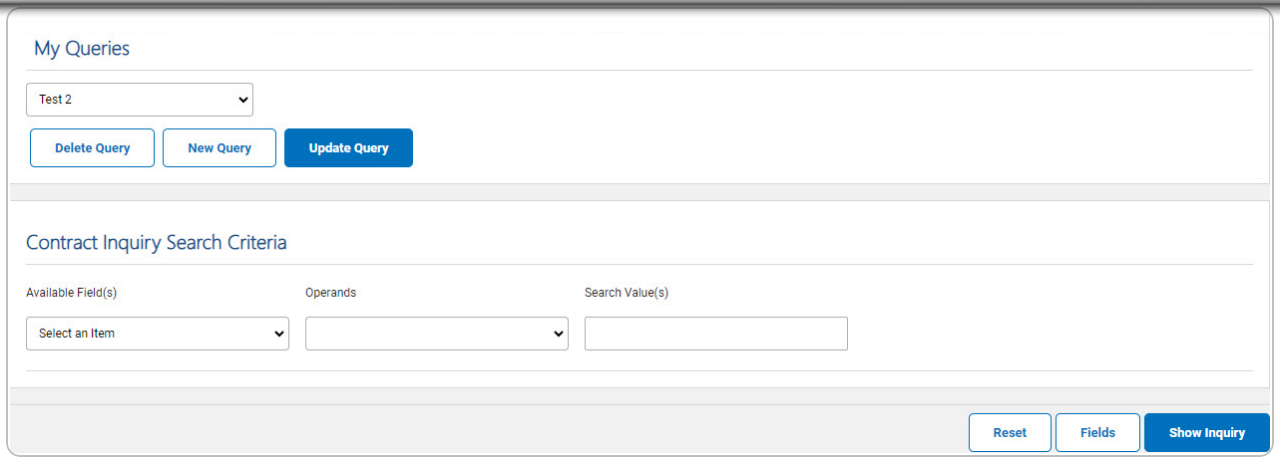
4. Select Fields. *The **Contract Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Contract Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and New Query is joined by Update Query and Delete Query. The selected query information appears in the search criteria grid.*



2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Contract Inquiry — Select Fields** page appears.*

Common Errors

Click the following link to display PA Navigation Tips.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

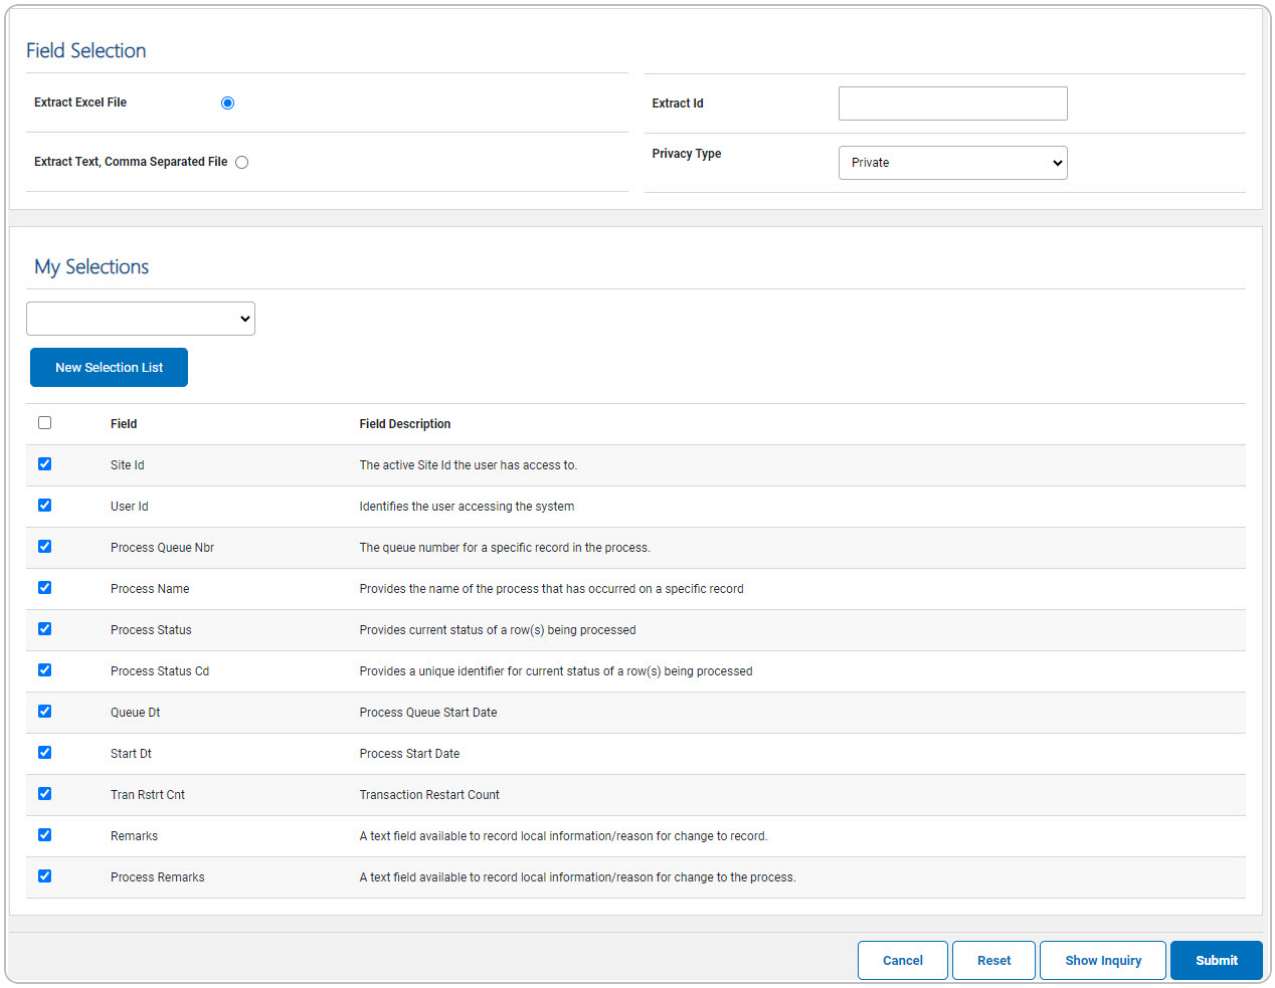
1. Select Fields. *The* ***Process Queue Inquiry*** *page appears.*



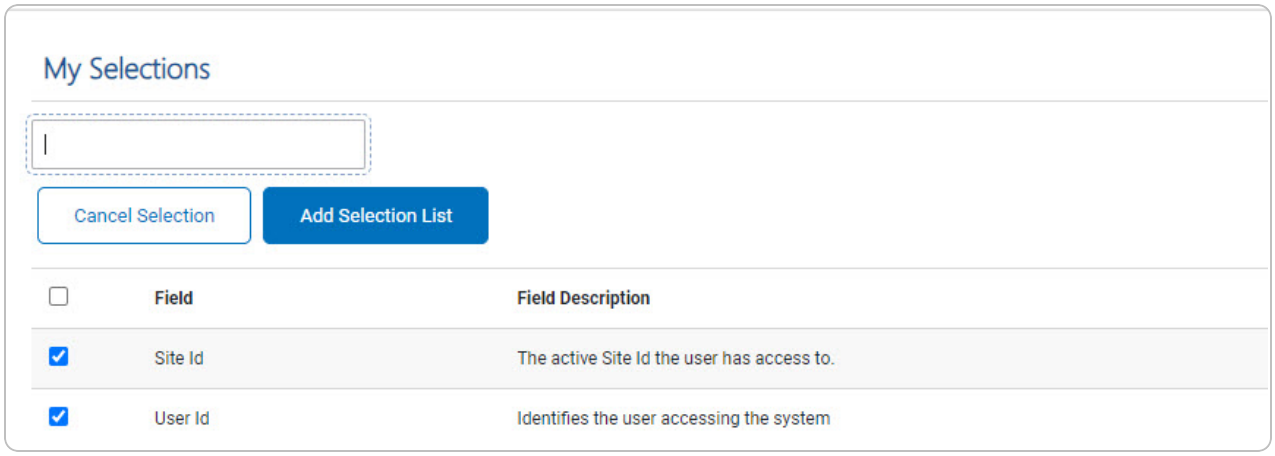
2. Choose the desired file type:
   - Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

     OR

     Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*
3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*
4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*



Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*

3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

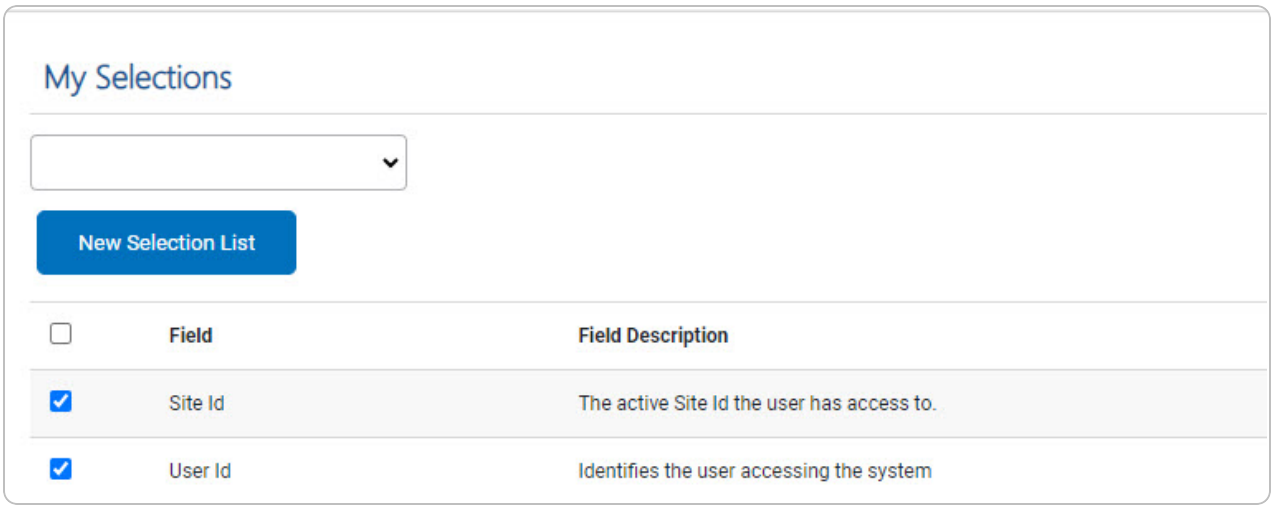
   Select Show Inquiry for small volumes of data. *The* ***Process Queue Inquiry — Results*** *page appears.*

5. **OR**

   Select Submit for large volumes of data. *The* ***Process Queue Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.



2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

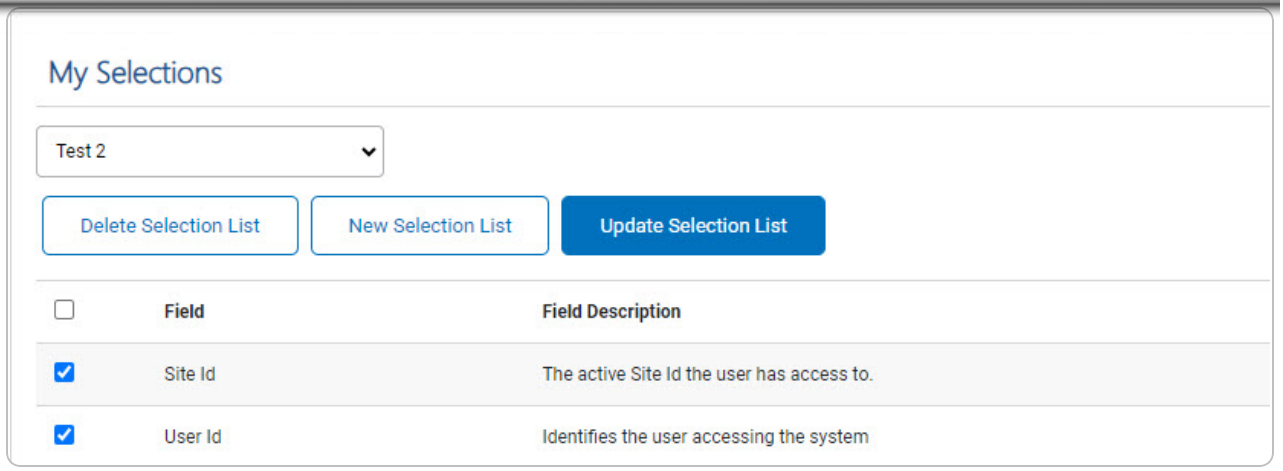
3. Select Show Inquiry for small volumes of data. *The **Process Queue Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Process Queue Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



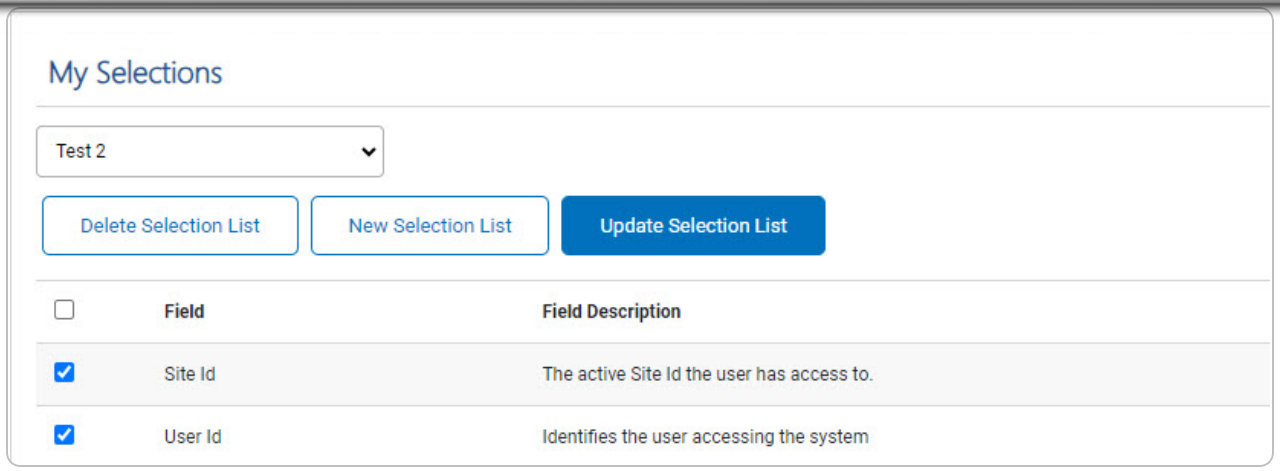
2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*
4. Select Show Inquiry for small volumes of data. *The* ***Process Queue Inquiry — Results*** *page appears.*

OR

Select Submit for large volumes of data. *The* ***Process Queue Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

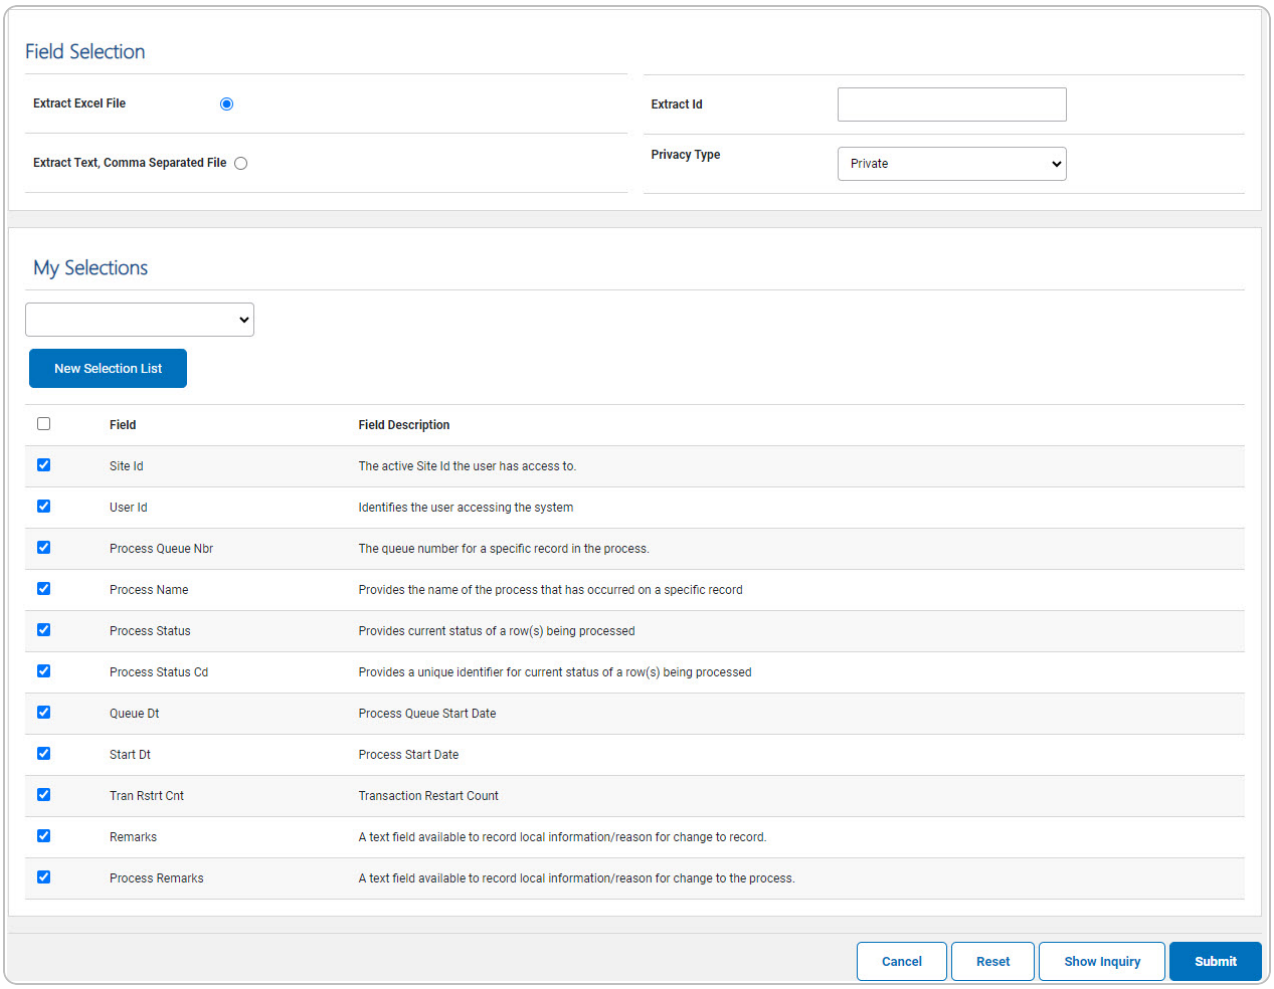


2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Process Queue Inquiry** page appears.*



2. Select the fields required for the inquiry. *The first 11 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the SITE ID contains the appropriate ☑ or ☐. *Select if the inquiry contains a SITE ID.*

- Verify the USR ID contains the appropriate ☑ or ☐. *Select if the inquiry contains a USR ID.*

Search for a DoDAAC Inquiry — Criteria

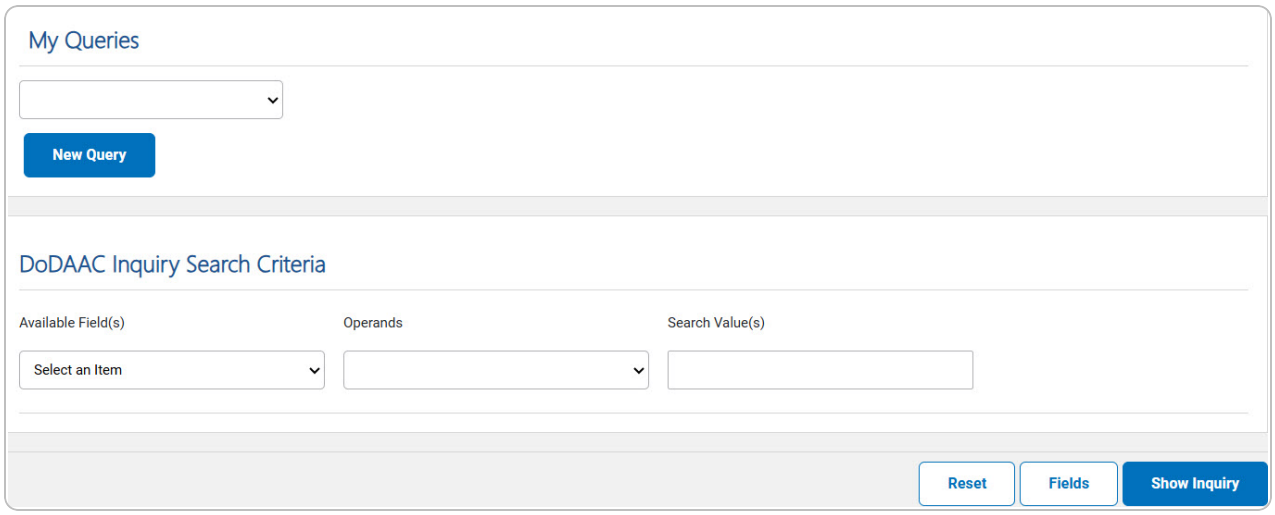
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.



2. *Choose which Available Field(s) to use in the search.*

A. Use ⌄ to select the first Available Field.

B. Repeat Step A to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Repeat Step A to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use ⌄ to select the first Search Value.

B. Repeat Step A to add additional search criteria.

Remove an Available Field Row

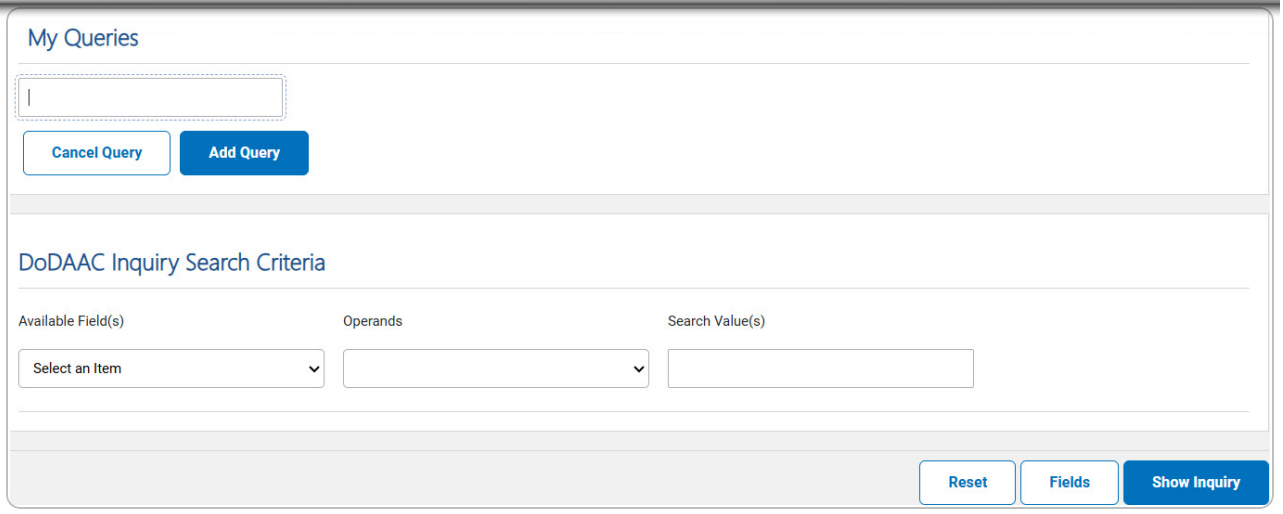
a. Use ⌄ to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **DoDAAC Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*



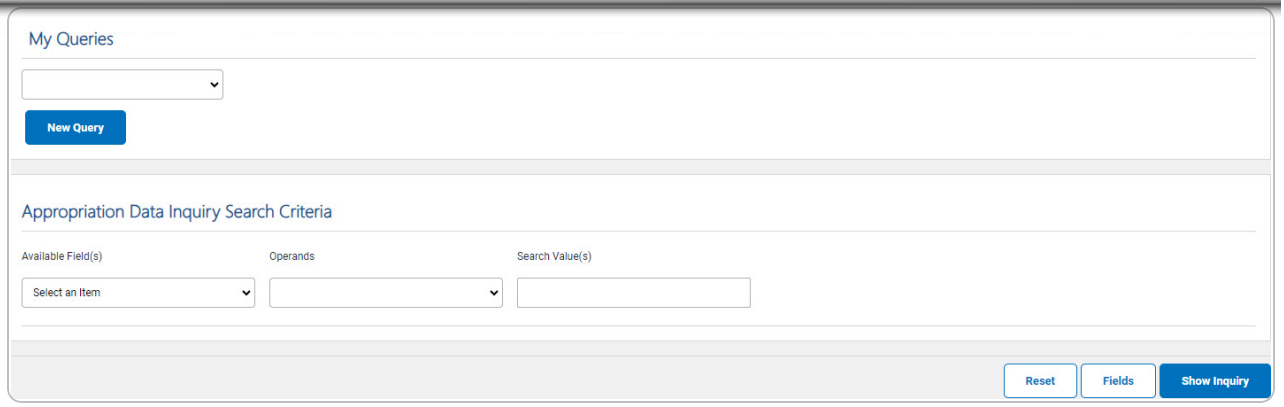
2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*
5. Select Fields. *The* ***DoDAAC Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***DoDAAC Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



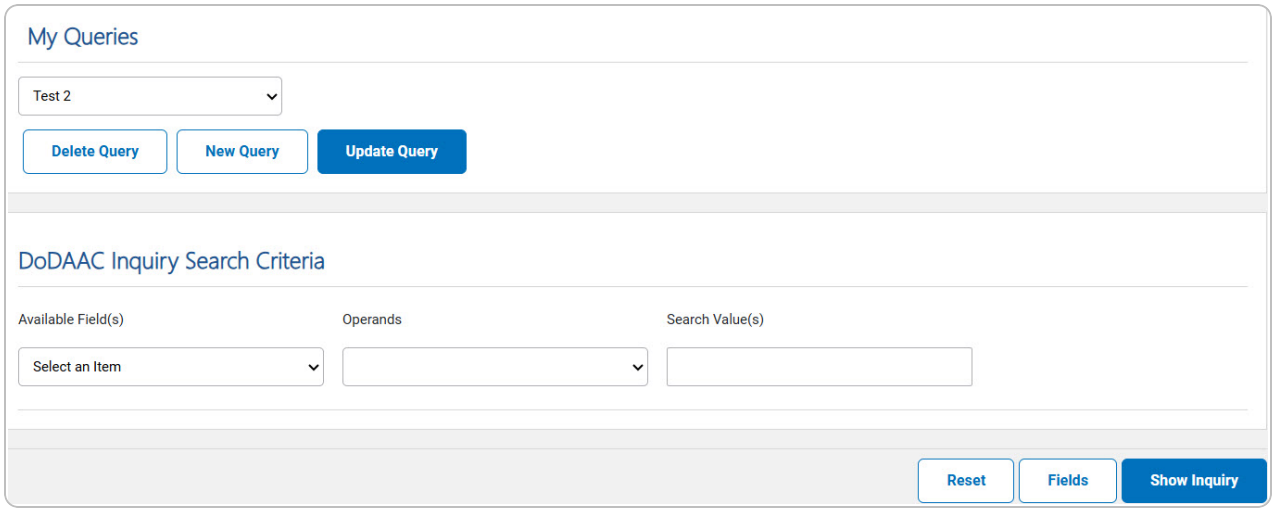
Select Fields. *The **DoDAAC Inquiry — Select Fields** page appears.*

2. OR

Select Show Inquiry. *The **DoDAAC Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*



2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*

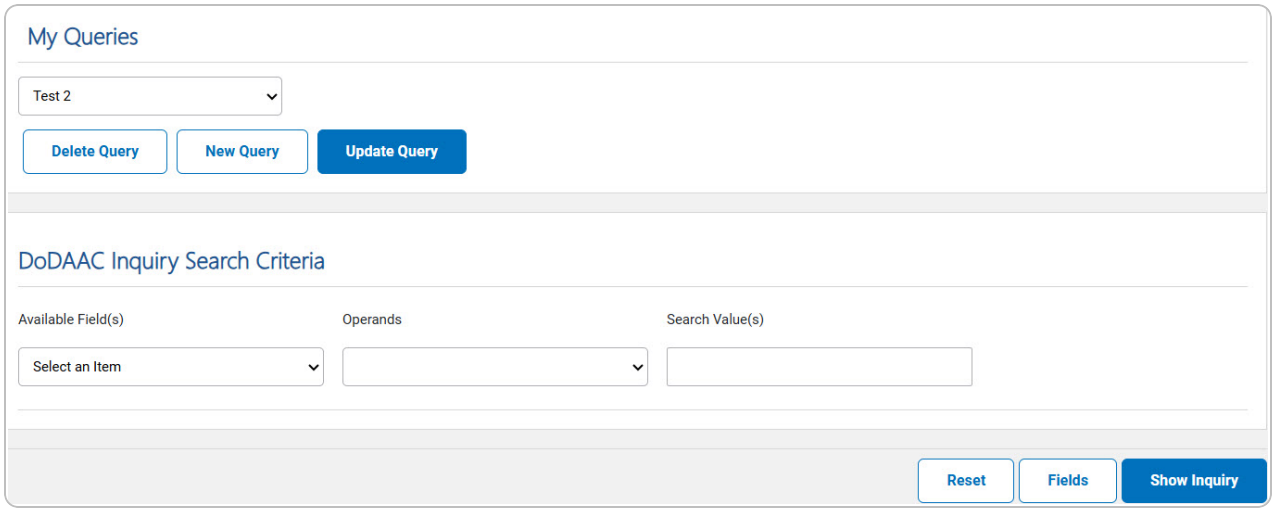
4. Select Fields. *The **DoDAAC Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **DoDAAC Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*



2. *Verify the query information.*

3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **DoDAAC Inquiry — Select Fields** page appears.*

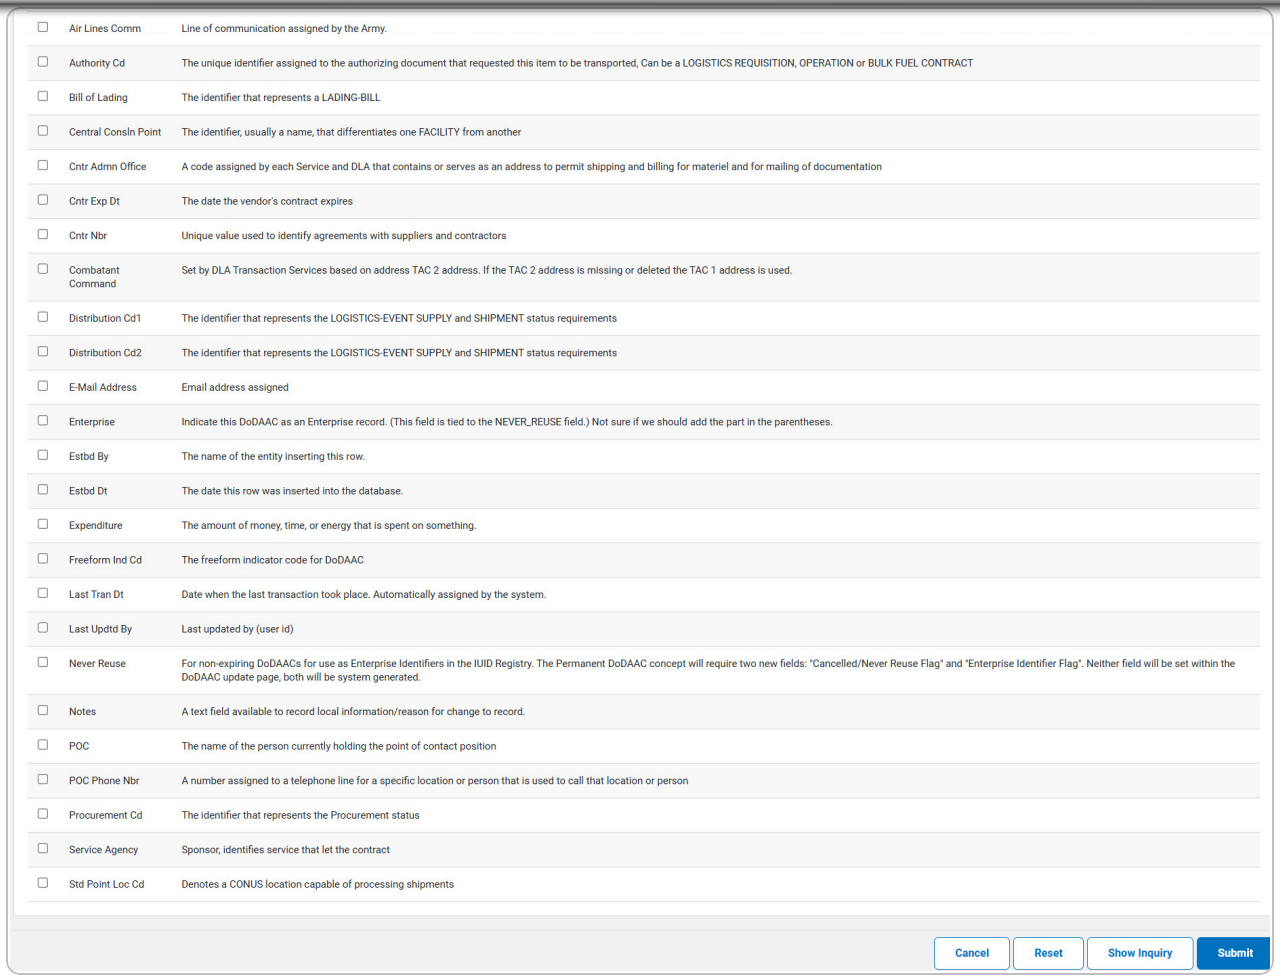
My Selections

New Selection List

	Field	Field Description
☑	DoDAAC	A distinctive six-position code assigned to identify specific units, activities, and organizations, non-DoD and contract activities engaged in the requisitioning, receiving, and billing of material
☑	UIC	A code that uniquely identifies a unit, organization, or activity. The first position is the Service designator, positions 2-4 are the Parent Organization designator, and positions 5-6 are the Descriptive designator
☑	RIC	A code that identifies a specific supply and distribution organization or requisitioning processing point
☑	CAGE Cd	Controlling activities including manufactures, vendors, and government agencies that control the development of specifications/standards, control the design, or manufacture items of supply, sometimes control the specifications/standards themselves.
☑	Major Cmd	The code that represents a specific uniformed service organization
☑	CONUS or OCONUS	Continental United States or Outside Continental United States (C or O)
☑	Ship To Acty Addr1	The first line (normally name) of the mailing address of the ship to activity
☑	Ship To Acty Addr2	The second line (normally the street address) of the ship to activity
☑	Ship To Acty Addr3	The second line (normally the street address) of the ship to activity
☑	Ship To Acty Addr4	The last line of the mailing address of the unit, activity, or organization that is authorized to order/requisition material from the DOD Logistics System
☑	Ship To Acty City	Ship to City (of mailing address)
☑	Ship To State/Prvnc1	Two position alpha code of the state in the mailing address. If address is outside the United States it will be null
☑	Ship To State/Prvnc2	Two position numeric code of the state in the mailing address. If address is outside the United States it will be null
☑	Ship To Pst Dvlry Zn	United States Parcel Postal Code of the mailing address, expressed as either a 5 position code or 10 position with hyphen after 5th position
☑	Ship To Nation2	Two position ISO code for the country of the mailing address
☑	Ship To Nation3	Three position ISO code for the country of the mailing address
☑	MILS Cntry Cd1	Two position MILS code for the country of the requisitioner mailing address
☑	FIPS Cntry Cd1	Two position FIPS code for the country of the requisitioner mailing address
☑	FMS Cntry Cd1	Two position FMS code for the country of the requisitioner mailing address
☑	Ship To Intl Pst Cd	International Postal Code of the address when outside the United States
☑	RIC Addr Eff Dt	Effective date upon which the address became effective
☑	RIC Addr Del Dt	Delete date upon which the address was deleted after this date this address is no longer valid
☑	Break Bulk Point	Break Bulk Point, the location that material is shipped to and broken into smaller shipment for onward movement
☑	Contact Addr1	A location at which an ORGANIZATION or PERSON may be contacted

☑	Contact Addr2	A location at which an ORGANIZATION or PERSON may be contacted
☑	Contact Addr3	A location at which an ORGANIZATION or PERSON may be contacted
☑	Contact Addr4	A location at which an ORGANIZATION or PERSON may be contacted
☑	Contact City	Contact City (of mailing address)
☑	Contact State/Prvnc1	Two position alpha code of the state in the mailing address. If address is outside the United States it will be null
☑	Contact State/Prvnc2	Two position numeric code of the state in the mailing address. If address is outside the United States it will be null
☑	Contact Pst Dlvry Zn	United States Parcel Postal Code of the mailing address, expressed as either a 5 position code or 10 position with hyphen after 5th position
☑	Contact Nation2	Two position ISO code for the country of the mailing address
☑	Contact Nation3	Three position ISO code for the country of the mailing address
☑	MILS Cntry Cd2	Two position MILS code for the country of the requisitioner mailing address
☑	FIPS Cntry Cd2	Two position FIPS code for the country of the requisitioner mailing address
☑	FMS Cntry Cd2	Two position FMS code for the country of the requisitioner mailing address
☑	Contact Intl Pst Cd	International Postal Code of the address when outside the United States
☑	DoDAAC Addr Eff Dt2	Effective date upon which the address became effective
☑	DoDAAC Addr Del Dt2	Delete date upon which the address was deleted after this date this address is no longer valid
☑	Air Terminal Id Cd	Specific air terminal as the overseas place of discharge
☑	Water Port Ind Cd	Specific water port as the overseas place of discharge
☑	Bill To Addr1	A location at which an ORGANIZATION or PERSON may be billed
☑	Bill To Addr2	A location at which an ORGANIZATION or PERSON may be billed
☑	Bill To Addr3	A location at which an ORGANIZATION or PERSON may be billed
☑	Bill To Addr4	A location at which an ORGANIZATION or PERSON may be billed
☑	Bill To City	Bill To City (of mailing address)
☑	Bill To State/Prvnc1	Two position alpha code of the state in the mailing address. If address is outside the United States it will be null
☑	Bill To State/Prvnc2	Two position numeric code of the state in the mailing address. If address is outside the United States it will be null
☑	Bill To Pst Dlvry Zn	United States Parcel Postal Code of the mailing address, expressed as either a 5 position code or 10 position with hyphen after 5th position
☑	Bill To Nation2	Two position ISO code for the country of the mailing address
☑	Bill To Nation3	Three position ISO code for the country of the mailing address
☑	MILS Cntry Cd3	Two position MILS code for the country of the requisitioner mailing address
☑	FIPS Cntry Cd3	Two position FIPS code for the country of the requisitioner mailing address
☑	FMS Cntry Cd3	Two position FMS code for the country of the requisitioner mailing address
☑	Bill To Intl Pst Cd	International Postal Code of the address when outside the United States
☑	DoDAAC Addr Eff Dt3	Effective date upon which the address became effective
☑	DoDAAC Addr Del Dt3	Delete date upon which the address was deleted after this date this address is no longer valid

☑	Sml Prcl Carr Addr1	A location at which an ORGANIZATION or PERSON may be billed
☑	Sml Prcl Carr Addr2	A location at which an ORGANIZATION or PERSON may be billed
☑	Sml Prcl Carr Addr3	A location at which an ORGANIZATION or PERSON may be billed
☑	Sml Prcl Carr Addr4	A location at which an ORGANIZATION or PERSON may be billed
☑	Sml Prcl Carr City	Small Parcel Carrier City (of mailing address)
☑	Sml Prcl State/Prvnc1	Two position alpha code of the state in the mailing address. If address is outside the United States it will be null
☑	Sml Prcl State/Prvnc2	Two position numeric code of the state in the mailing address. If address is outside the United States it will be null
☑	Sml Prcl Pst Dlvry Zn	United States Parcel Postal Code of the mailing address, expressed as either a 5 position code or 10 position with hyphen after 5th position
☑	Sml Prcl Carr Nation2	Two position ISO code for the country of the mailing address
☑	Sml Prcl Carr Nation3	Three position ISO code for the country of the mailing address
☑	MILS Cntry Cd4	Two position MILS code for the country of the requisitioner mailing address
☑	FIPS Cntry Cd4	Two position FIPS code for the country of the requisitioner mailing address
☑	FMS Cntry Cd4	Two position FMS code for the country of the requisitioner mailing address
☑	Sml Prcl Intl Post Cd	International Postal Code of the address when outside the United States
☑	DoDAAC Addr Eff Dt4	Effective date upon which the address became effective
☑	DoDAAC Addr Del Dt4	Delete date upon which the address was deleted after this date this address is no longer valid
☐	ADSN/FSN 1	Code assigned by each Service and DLA that contains or serves as an address to permit shipping and billing for materiel and for mailing of documentation
☐	ADSN/FSN 2	Code assigned by each Service and DLA that contains or serves as an address to permit shipping and billing for materiel and for mailing of documentation



☐	Air Lines Comm	Line of communication assigned by the Army.
☐	Authority Cd	The unique identifier assigned to the authorizing document that requested this item to be transported, Can be a LOGISTICS REQUISITION, OPERATION or BULK FUEL CONTRACT

☐	Cntr Nbr	Unique value used to identify agreements with suppliers and contractors
☐	Combatant Command	Set by DLA Transaction Services based on address TAC 2 address. If the TAC 2 address is missing or deleted the TAC 1 address is used.
☐	Distribution Cd1	The identifier that represents the LOGISTICS-EVENT SUPPLY and SHIPMENT status requirements
☐	Distribution Cd2	The identifier that represents the LOGISTICS-EVENT SUPPLY and SHIPMENT status requirements
☐	E-Mail Address	Email address assigned
☐	Enterprise	Indicate this DoDAAC as an Enterprise record. (This field is tied to the NEVER_REUSE field.) Not sure if we should add the part in the parentheses.
☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt	The date this row was inserted into the database.
☐	Expenditure	The amount of money, time, or energy that is spent on something.
☐	Freeform Ind Cd	The freeform indicator code for DoDAAC
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	Never Reuse	For non-expiring DoDAACs for use as Enterprise Identifiers in the IUID Registry. The Permanent DoDAAC concept will require two new fields: "Cancelled/Never Reuse Flag" and "Enterprise Identifier Flag". Neither field will be set within the DoDAAC update page, both will be system generated.
☐	Notes	A text field available to record local information/reason for change to record.
☐	POC	The name of the person currently holding the point of contact position
☐	POC Phone Nbr	A number assigned to a telephone line for a specific location or person that is used to call that location or person
☐	Procurement Cd	The identifier that represents the Procurement status
☐	Service Agency	Sponsor, identifies service that let the contract
☐	Std Point Loc Cd	Denotes a CONUS location capable of processing shipments

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

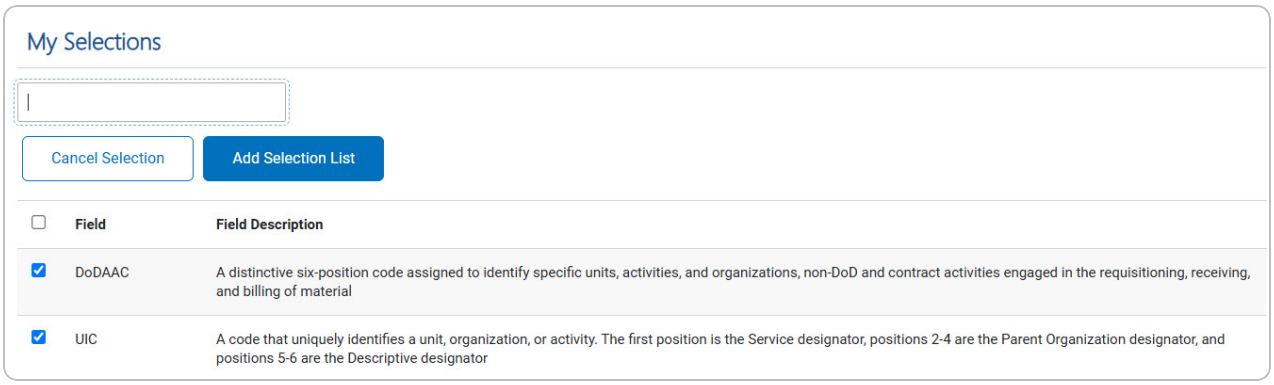
  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*



Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

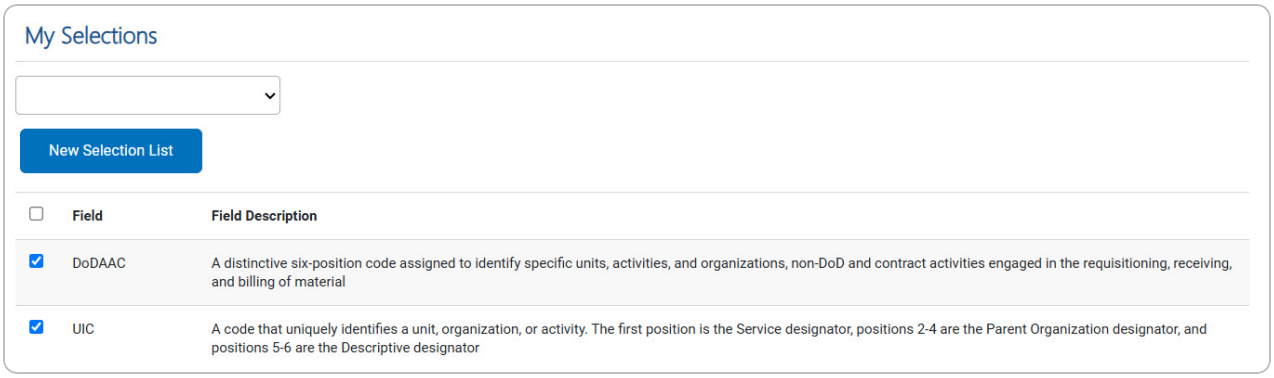
2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

   Select Show Inquiry for small volumes of data. *The* ***DoDAAC Inquiry — Results*** *page appears.*
5. **OR**

   Select Submit for large volumes of data. *The* ***DoDAAC Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.



2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

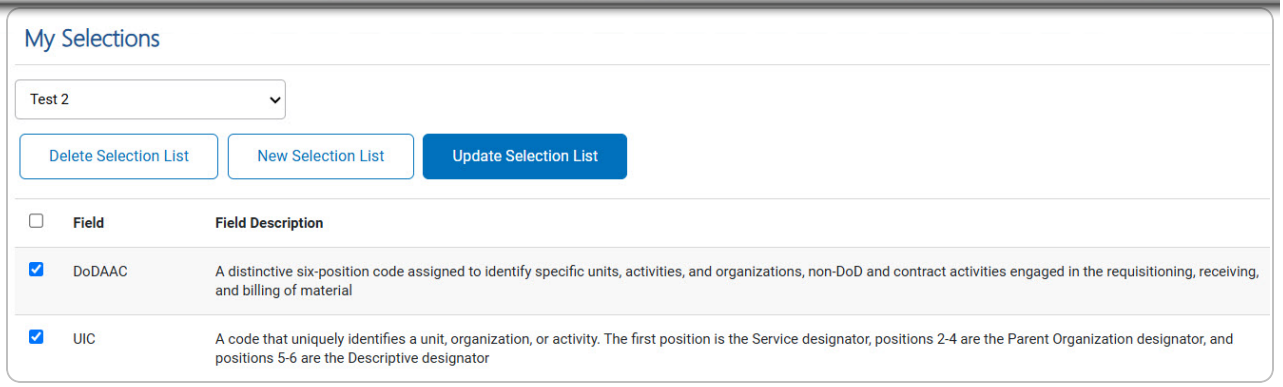
3. Select Show Inquiry for small volumes of data. *The **DoDAAC Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **DoDAAC Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



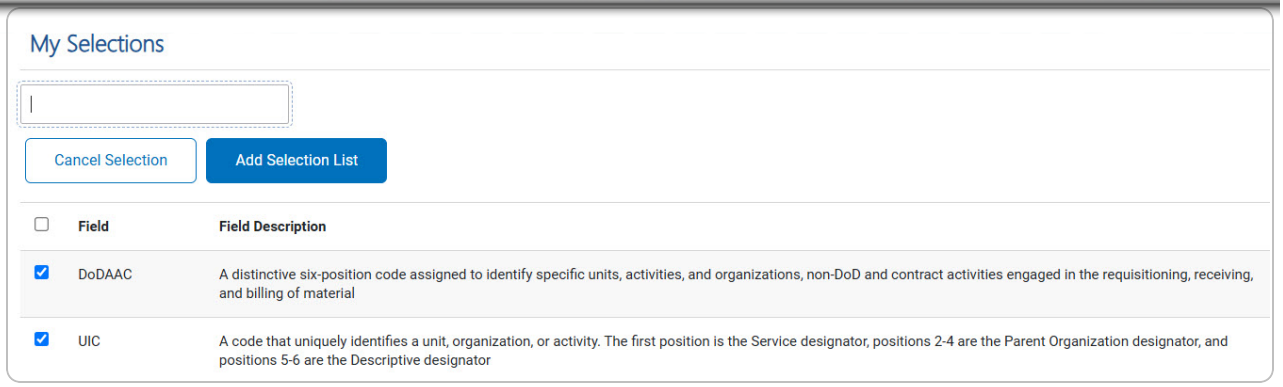
2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*
4. Select Show Inquiry for small volumes of data. *The* ***DoDAAC Inquiry — Results*** *page appears.*

OR

Select Submit for large volumes of data. *The* ***DoDAAC Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **DoDAAC Inquiry** page appears.*

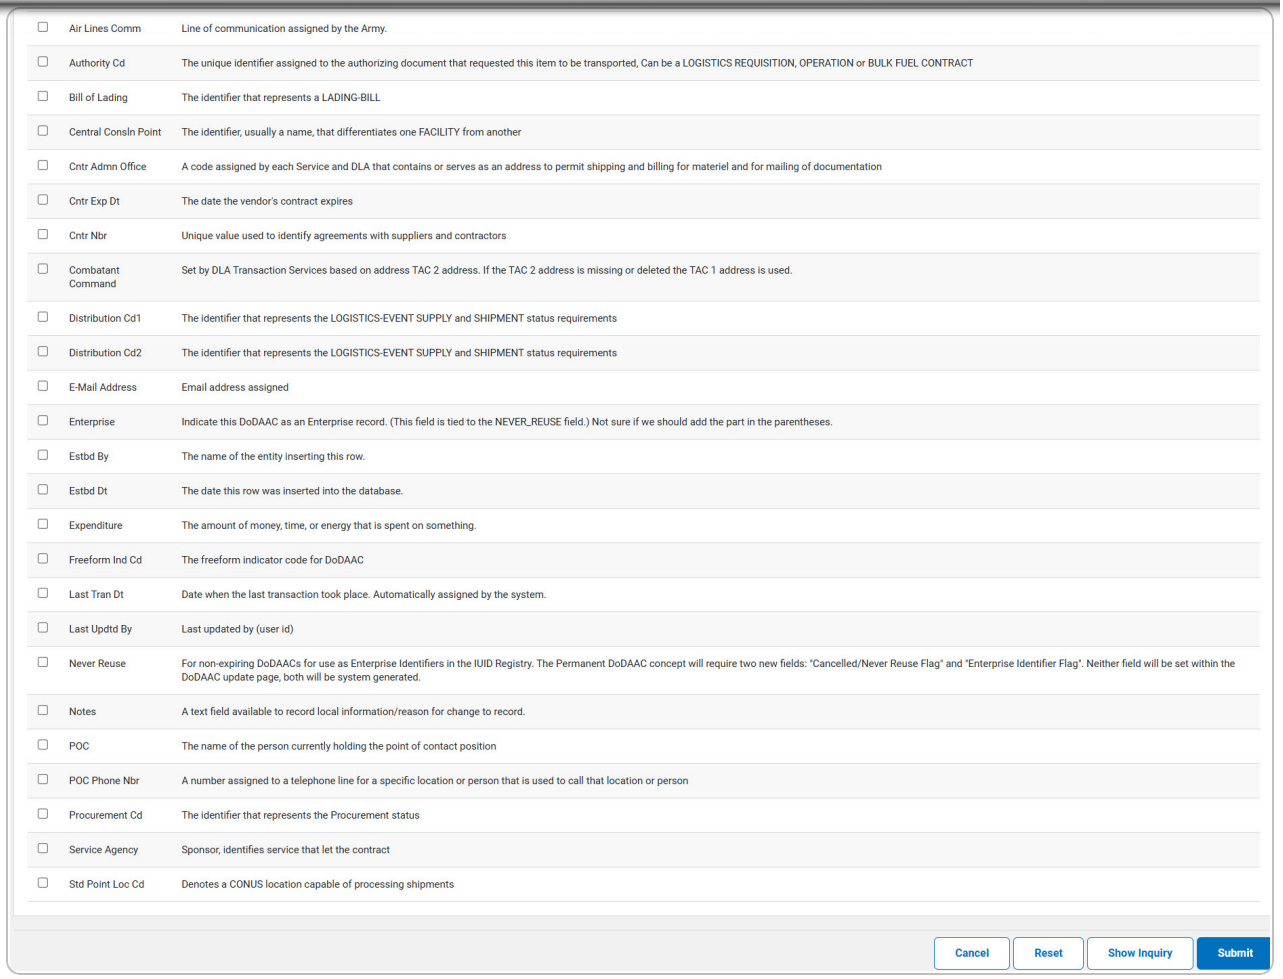
New Selection List

	Field	Field Description
☑	DoDAAC	A distinctive six-position code assigned to identify specific units, activities, and organizations, non-DoD and contract activities engaged in the requisitioning, receiving, and billing of material
☑	UIC	A code that uniquely identifies a unit, organization, or activity. The first position is the Service designator, positions 2-4 are the Parent Organization designator, and positions 5-6 are the Descriptive designator
☑	RIC	A code that identifies a specific supply and distribution organization or requisitioning processing point
☑	CAGE Cd	Controlling activities including manufactures, vendors, and government agencies that control the development of specifications/standards, control the design, or manufacture items of supply, sometimes control the specifications/standards themselves.
☑	Major Cmd	The code that represents a specific uniformed service organization
☑	CONUS or OCONUS	Continental United States or Outside Continental United States (C or O)
☑	Ship To Acty Addr1	The first line (normally name) of the mailing address of the ship to activity
☑	Ship To Acty Addr2	The second line (normally the street address) of the ship to activity
☑	Ship To Acty Addr3	The second line (normally the street address) of the ship to activity
☑	Ship To Acty Addr4	The last line of the mailing address of the unit, activity, or organization that is authorized to order/requisition material from the DOD Logistics System
☑	Ship To Acty City	Ship to City (of mailing address)
☑	Ship To State/Prvnc1	Two position alpha code of the state in the mailing address. If address is outside the United States it will be null
☑	Ship To State/Prvnc2	Two position numeric code of the state in the mailing address. If address is outside the United States it will be null
☑	Ship To Pst Dvlry Zn	United States Parcel Postal Code of the mailing address, expressed as either a 5 position code or 10 position with hyphen after 5th position
☑	Ship To Nation2	Two position ISO code for the country of the mailing address
☑	Ship To Nation3	Three position ISO code for the country of the mailing address
☑	MILS Cntry Cd1	Two position MILS code for the country of the requisitioner mailing address
☑	FIPS Cntry Cd1	Two position FIPS code for the country of the requisitioner mailing address
☑	FMS Cntry Cd1	Two position FMS code for the country of the requisitioner mailing address
☑	Ship To Intl Pst Cd	International Postal Code of the address when outside the United States
☑	RIC Addr Eff Dt	Effective date upon which the address became effective
☑	RIC Addr Del Dt	Delete date upon which the address was deleted after this date this address is no longer valid
☑	Break Bulk Point	Break Bulk Point, the location that material is shipped to and broken into smaller shipment for onward movement
☑	Contact Addr1	A location at which an ORGANIZATION or PERSON may be contacted

☑	Contact Addr2	A location at which an ORGANIZATION or PERSON may be contacted
☑	Contact Addr3	A location at which an ORGANIZATION or PERSON may be contacted
☑	Contact Addr4	A location at which an ORGANIZATION or PERSON may be contacted
☑	Contact City	Contact City (of mailing address)
☑	Contact State/Prvnc1	Two position alpha code of the state in the mailing address. If address is outside the United States it will be null
☑	Contact State/Prvnc2	Two position numeric code of the state in the mailing address. If address is outside the United States it will be null
☑	Contact Pst Dlvry Zn	United States Parcel Postal Code of the mailing address, expressed as either a 5 position code or 10 position with hyphen after 5th position
☑	Contact Nation2	Two position ISO code for the country of the mailing address
☑	Contact Nation3	Three position ISO code for the country of the mailing address
☑	MILS Cntry Cd2	Two position MILS code for the country of the requisitioner mailing address
☑	FIPS Cntry Cd2	Two position FIPS code for the country of the requisitioner mailing address
☑	FMS Cntry Cd2	Two position FMS code for the country of the requisitioner mailing address
☑	Contact Intl Pst Cd	International Postal Code of the address when outside the United States
☑	DoDAAC Addr Eff Dt2	Effective date upon which the address became effective
☑	DoDAAC Addr Del Dt2	Delete date upon which the address was deleted after this date this address is no longer valid
☑	Air Terminal Id Cd	Specific air terminal as the overseas place of discharge
☑	Water Port Ind Cd	Specific water port as the overseas place of discharge
☑	Bill To Addr1	A location at which an ORGANIZATION or PERSON may be billed
☑	Bill To Addr2	A location at which an ORGANIZATION or PERSON may be billed
☑	Bill To Addr3	A location at which an ORGANIZATION or PERSON may be billed
☑	Bill To Addr4	A location at which an ORGANIZATION or PERSON may be billed
☑	Bill To City	Bill To City (of mailing address)
☑	Bill To State/Prvnc1	Two position alpha code of the state in the mailing address. If address is outside the United States it will be null
☑	Bill To State/Prvnc2	Two position numeric code of the state in the mailing address. If address is outside the United States it will be null
☑	Bill To Pst Dlvry Zn	United States Parcel Postal Code of the mailing address, expressed as either a 5 position code or 10 position with hyphen after 5th position
☑	Bill To Nation2	Two position ISO code for the country of the mailing address
☑	Bill To Nation3	Three position ISO code for the country of the mailing address
☑	MILS Cntry Cd3	Two position MILS code for the country of the requisitioner mailing address
☑	FIPS Cntry Cd3	Two position FIPS code for the country of the requisitioner mailing address
☑	FMS Cntry Cd3	Two position FMS code for the country of the requisitioner mailing address
☑	Bill To Intl Pst Cd	International Postal Code of the address when outside the United States
☑	DoDAAC Addr Eff Dt3	Effective date upon which the address became effective
☑	DoDAAC Addr Del Dt3	Delete date upon which the address was deleted after this date this address is no longer valid

☑	Sml Prcl Carr Addr1	A location at which an ORGANIZATION or PERSON may be billed
☑	Sml Prcl Carr Addr2	A location at which an ORGANIZATION or PERSON may be billed
☑	Sml Prcl Carr Addr3	A location at which an ORGANIZATION or PERSON may be billed
☑	Sml Prcl Carr Addr4	A location at which an ORGANIZATION or PERSON may be billed
☑	Sml Prcl Carr City	Small Parcel Carrier City (of mailing address)
☑	Sml Prcl State/Prvnc1	Two position alpha code of the state in the mailing address. If address is outside the United States it will be null
☑	Sml Prcl State/Prvnc2	Two position numeric code of the state in the mailing address. If address is outside the United States it will be null
☑	Sml Prcl Pst Dlvry Zn	United States Parcel Postal Code of the mailing address, expressed as either a 5 position code or 10 position with hyphen after 5th position
☑	Sml Prcl Carr Nation2	Two position ISO code for the country of the mailing address
☑	Sml Prcl Carr Nation3	Three position ISO code for the country of the mailing address
☑	MILS Cntry Cd4	Two position MILS code for the country of the requisitioner mailing address
☑	FIPS Cntry Cd4	Two position FIPS code for the country of the requisitioner mailing address
☑	FMS Cntry Cd4	Two position FMS code for the country of the requisitioner mailing address
☑	Sml Prcl Intl Post Cd	International Postal Code of the address when outside the United States
☑	DoDAAC Addr Eff Dt4	Effective date upon which the address became effective
☑	DoDAAC Addr Del Dt4	Delete date upon which the address was deleted after this date this address is no longer valid
☐	ADSN/FSN 1	Code assigned by each Service and DLA that contains or serves as an address to permit shipping and billing for materiel and for mailing of documentation
☐	ADSN/FSN 2	Code assigned by each Service and DLA that contains or serves as an address to permit shipping and billing for materiel and for mailing of documentation



☐	Air Lines Comm	Line of communication assigned by the Army.
☐	Authority Cd	The unique identifier assigned to the authorizing document that requested this item to be transported, Can be a LOGISTICS REQUISITION, OPERATION or BULK FUEL CONTRACT
☐	Bill of Lading	The identifier that represents a LADING-BILL
☐	Central Consln Point	The identifier, usually a name, that differentiates one FACILITY from another
☐	Cntr Admn Office	A code assigned by each Service and DLA that contains or serves as an address to permit shipping and billing for materiel and for mailing of documentation
☐	Cntr Exp Dt	The date the vendor's contract expires
☐	Cntr Nbr	Unique value used to identify agreements with suppliers and contractors
☐	Combatant Command	Set by DLA Transaction Services based on address TAC 2 address. If the TAC 2 address is missing or deleted the TAC 1 address is used.
☐	Distribution Cd1	The identifier that represents the LOGISTICS-EVENT SUPPLY and SHIPMENT status requirements
☐	Distribution Cd2	The identifier that represents the LOGISTICS-EVENT SUPPLY and SHIPMENT status requirements
☐	E-Mail Address	Email address assigned
☐	Enterprise	Indicate this DoDAAC as an Enterprise record. (This field is tied to the NEVER_REUSE field.) Not sure if we should add the part in the parentheses.
☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt	The date this row was inserted into the database.
☐	Expenditure	The amount of money, time, or energy that is spent on something.
☐	Freeform Ind Cd	The freeform indicator code for DoDAAC
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	Never Reuse	For non-expiring DoDAACs for use as Enterprise Identifiers in the IUID Registry. The Permanent DoDAAC concept will require two new fields: "Cancelled/Never Reuse Flag" and "Enterprise Identifier Flag". Neither field will be set within the DoDAAC update page, both will be system generated.
☐	Notes	A text field available to record local information/reason for change to record.
☐	POC	The name of the person currently holding the point of contact position
☐	POC Phone Nbr	A number assigned to a telephone line for a specific location or person that is used to call that location or person
☐	Procurement Cd	The identifier that represents the Procurement status
☐	Service Agency	Sponsor, identifies service that let the contract
☐	Std Point Loc Cd	Denotes a CONUS location capable of processing shipments

2. Select the fields required for the inquiry. *The first 72 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the DoDAAC contains the appropriate ☑ or ☐. *Select if the inquiry contains a DoDAAC.*
- Verify the UIC contains the appropriate ☑ or ☐. *Select if the inquiry contains a UIC.*

- Verify the RIC contains the appropriate ☑ or ☐. *Select if the inquiry contains a RIC.*
- Verify the CAGE CD contains the appropriate ☑ or ☐. *Select if the inquiry contains a CAGE CD.*
- Verify the MAJOR CMD contains the appropriate ☑ or ☐. *Select if the inquiry contains a MAJOR CMD CD.*
- Verify the CONUS or OCONUS contains the appropriate ☑ or ☐. *Select if the inquiry contains a CONUS or OCONUS designation.*
- Verify the SHIP TO ACTY ADDR 1 contains the appropriate ☑ or ☐. *Select if the inquiry contains a SHIP TO ACTY ADDR.*
- Verify the SHIP TO ACTY ADDR 2 contains the appropriate ☑ or ☐. *Select if the inquiry contains a SHIP TO ACTY ADDR.*
- Verify the SHIP TO ACTY ADDR 3 contains the appropriate ☑ or ☐. *Select if the inquiry contains a SHIP TO ACTY ADDR.*
- Verify the SHIP TO ACTY ADDR 4 contains the appropriate ☑ or ☐. *Select if the inquiry contains a SHIP TO ACTY ADDR.*
- Verify the SHIP TO ACTY City contains the appropriate ☑ or ☐. *Select if the inquiry contains a SHIP TO ACTY City.*
- Verify the SHIP TO STATE/PRVNC 1 contains the appropriate ☑ or ☐. *Select if the inquiry contains a SHIP TO STATE/PRVNC.*
- Verify the SHIP TO STATE/PRVNC 2 contains the appropriate ☑ or ☐. *Select if the inquiry contains a SHIP TO STATE/PRVNC.*
- Verify the SHIP TO PST DVLRY ZN contains the appropriate ☑ or ☐. *Select if the inquiry contains a SHIP TO PST DVLRY ZN.*

- Verify the Ship To Nation 2 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Ship To Nation.*
- Verify the Ship To Nation 3 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Ship To Nation.*
- Verify the MILS CNTRY CD 1 contains the appropriate ☑ or ☐. *Select if the inquiry contains a MILS CNTRY CD.*
- Verify the FIPS CNTRY CD 1 contains the appropriate ☑ or ☐. *Select if the inquiry contains a FIPS CNTRY CD.*
- Verify the FMS CNTRY CD contains the appropriate ☑ or ☐. *Select if the inquiry contains a FMS CNTRY CD.*
- Verify the SHIP TO INTL PST CD contains the appropriate ☑ or ☐. *Select if the inquiry contains a SHIP TO INTL PST CD.*
- Verify the RIC ADDR EFF DT contains the appropriate ☑ or ☐. *Select if the inquiry contains a RIC ADDR EFF DT.*
- Verify the RIC ADDR DEL DT contains the appropriate ☑ or ☐. *Select if the inquiry contains a RIC ADDR DEL DT.*
- Verify the Break Bulk Point contains the appropriate ☑ or ☐. *Select if the inquiry contains a Break Bulk Point.*
- Verify the Contact ADDR 1 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Contact ADDR 1.*
- Verify the Contact ADDR 2 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Contact ADDR 2.*
- Verify the Contact ADDR 3 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Contact ADDR 3.*

- Verify the Contact ADDR 4 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Contact ADDR 4.*
- Verify the Contact City contains the appropriate ☑ or ☐. *Select if the inquiry contains a Contact City.*
- Verify the Contact STATE/PRVNC 1 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Contact STATE/PRVNC.*
- Verify the Contact STATE/PRVNC 2 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Contact STATE/PRVNC.*
- Verify the Contact PST DLVRY ZN contains the appropriate ☑ or ☐. *Select if the inquiry contains a Contact PST DLVRY ZN.*
- Verify the Contact Nation 2 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Contact Nation.*
- Verify the Contact Nation 3 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Contact Nation.*
- Verify the MILS CNTRY CD 2 contains the appropriate ☑ or ☐. *Select if the inquiry contains a MILS CNTRY CD.*
- Verify the FIPS CNTRY CD contains the appropriate ☑ or ☐. *Select if the inquiry contains a FIPS CNTRY CD.*
- Verify the FMS CNTRY CD 2 contains the appropriate ☑ or ☐. *Select if the inquiry contains a FMS CNTRY CD.*
- Verify the Contact INTL PST CD contains the appropriate ☑ or ☐. *Select if the inquiry contains a Contact INTL PST CD.*
- Verify the DODAAC ADDR EFF DT 2 contains the appropriate ☑ or ☐. *Select if the inquiry contains a DODAAC ADDR EFF DT.*

- Verify the DoDAAC Addr Del Dt 2 contains the appropriate ☑ or ☐. *Select if the inquiry contains a DoDAAC Addr Del Dt.*
- Verify the Air Terminal Id Cd contains the appropriate ☑ or ☐. *Select if the inquiry contains an Air Terminal Id Cd.*
- Verify the Water Port Ind Cd contains the appropriate ☑ or ☐. *Select if the inquiry contains a Water Port Ind Cd.*
- Verify the Bill To Addr 1 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Bill To Addr.*
- Verify the Bill To Addr 2 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Bill To Addr.*
- Verify the Bill To Addr 3 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Bill To Addr.*
- Verify the Bill To Addr 4 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Bill To Addr.*
- Verify the Bill To City contains the appropriate ☑ or ☐. *Select if the inquiry contains a Bill To City.*
- Verify the Bill To State/Prvnc 1 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Bill To State/Prvnc.*
- Verify the Bill To State/Prvnc 2 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Bill To State/Prvnc.*
- Verify the Bill To Pst Dlvry Zn contains the appropriate ☑ or ☐. *Select if the inquiry contains a Bill To Pst Dlvry Zn.*
- Verify the Bill To Nation 2 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Bill To Nation.*

- Verify the Bill To Nation 3 contains the appropriate ☑ or ☐. *Select if the inquiry contains a Bill To Nation.*

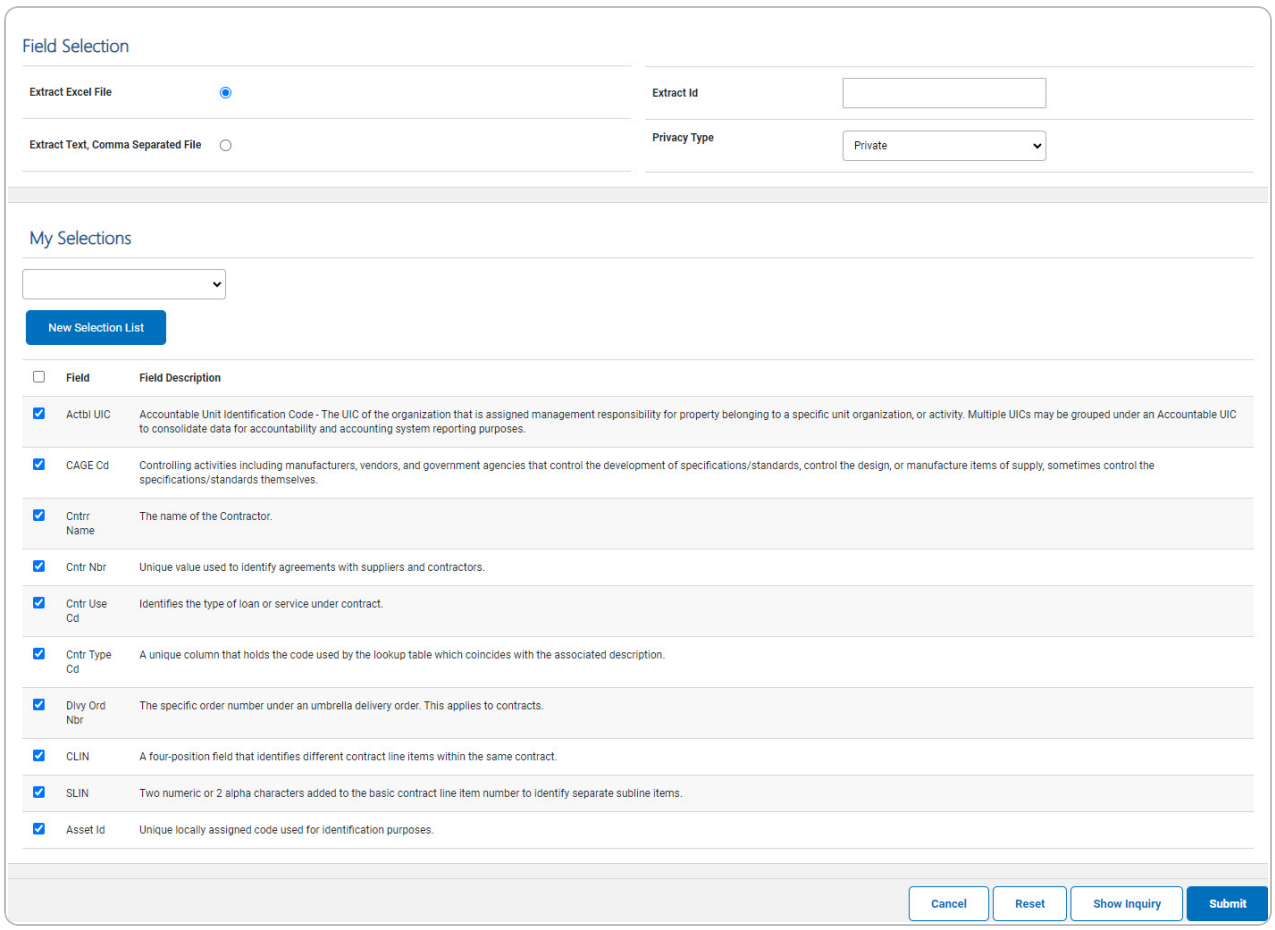
Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The* ***Wrnty/Svc/Subscription - Terms/Cond Inquiry*** *page appears.*



2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

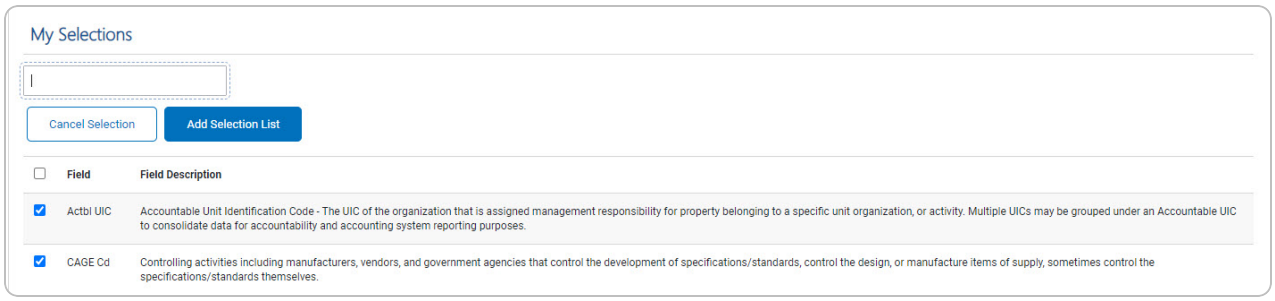
  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*



Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.*

Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

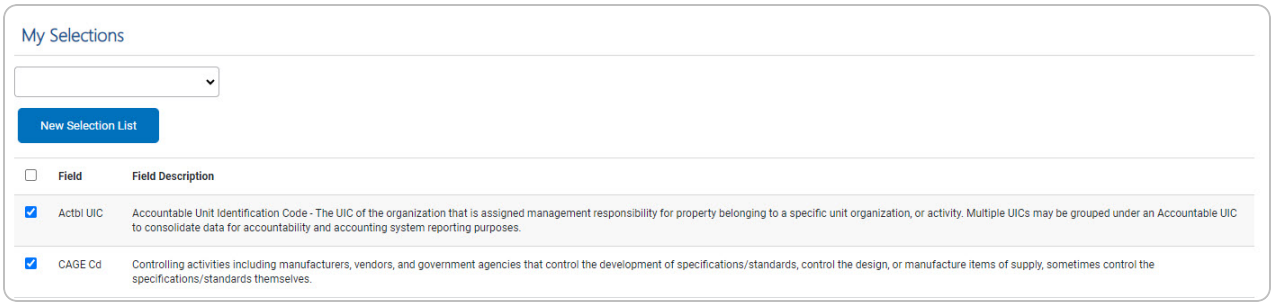
Select Show Inquiry for small volumes of data. *The **Wrnty/Svc/Subscription - Terms/Cond Inquiry — Results** page appears.*

5. **OR**

Select Submit for large volumes of data. *The **Wrnty/Svc/Subscription - Terms/Cond Inquiry Transaction Status** page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.



2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

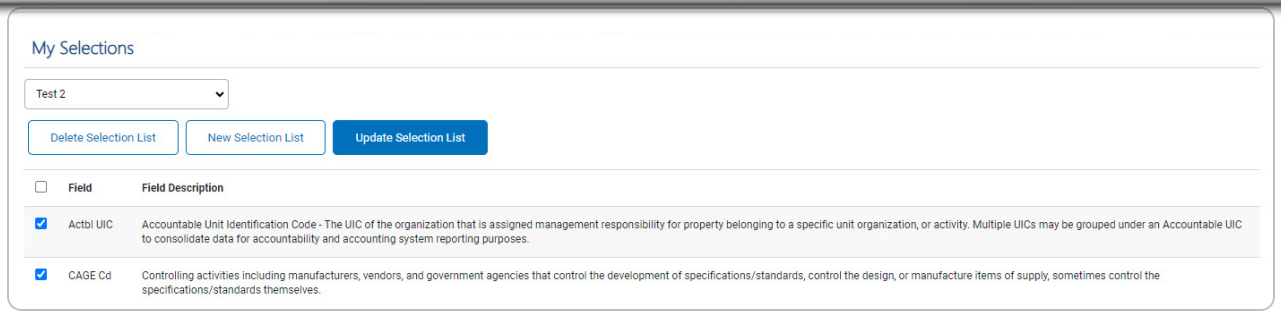
Select Show Inquiry for small volumes of data. *The **Wrnty/Svc/Subscription - Terms/Cond Inquiry — Results** page appears.*

3. **OR**

Select Submit for large volumes of data. *The **Wrnty/Svc/Subscription - Terms/Cond Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



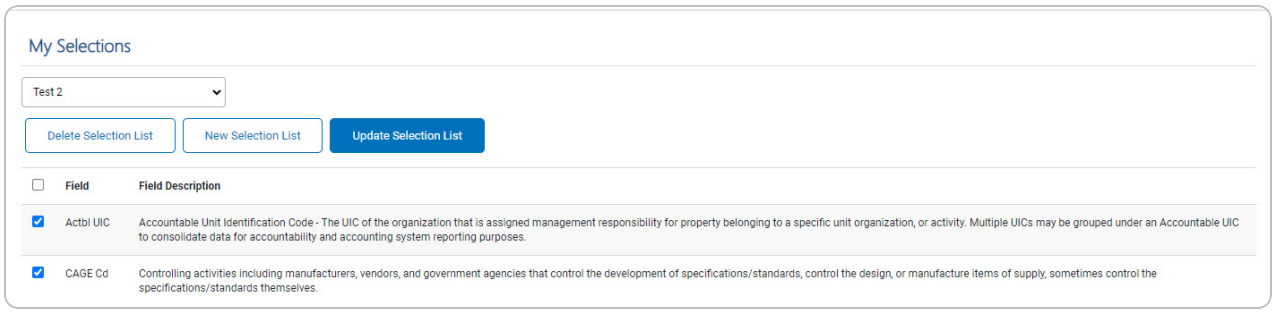
2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*
4. Select Show Inquiry for small volumes of data. *The* ***Wrnty/Svc/Subscription - Terms/Cond Inquiry — Results*** *page appears.*

OR

Select Submit for large volumes of data. *The* ***Wrnty/Svc/Subscription - Terms/Cond Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

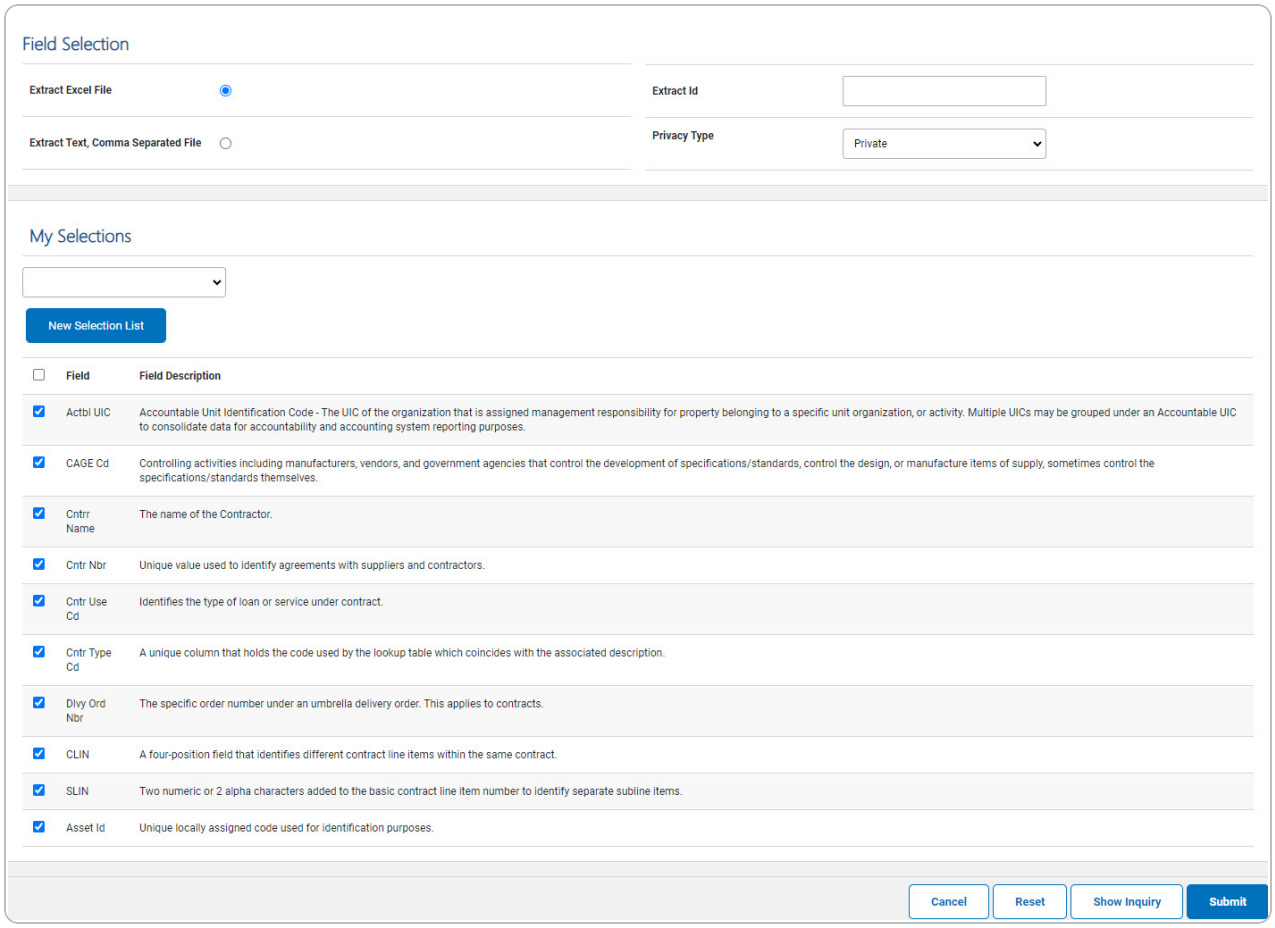


2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The* ***WRNTY/SVC/Subscription - TERMS/COND Inquiry*** *page appears.*



2. Select the fields required for the inquiry. *The first 3 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

Search for a WRNTY/SVC/Subscription - Asset ASSOC Inquiry — Results

Overview

The WRNTY/SVC/Subscription - Asset ASSOC Inquiry Results process provides the ability to view the search results, and save them in different formats.

Navigation

Inquiries > WRNTY/SVC/SUBSCRIP > Asset ASSOC > WRNTY/SVC/Subscription - Asset ASSOC Inquiry Search Results page

Page Fields

The following fields display on the **WRNTY/SVC/Subscription - Asset ASSOC Inquiry Search Results** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

191	Excel is the only reliable print format for this inquiry.
252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
247	Where available, select "Row" to view details for specific record.
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.
290	Do not "Export" large volumes of data, select "Back" button then select "Submit" button on the Field Selection Page

Extract Text, Comma Separated File	○	**Privacy Type**	Private

My Selections

New Selection List

	Field	Field Description
☑	Asset Id	Unique locally assigned code used for identification purposes.
☑	Item Desc	The description of an asset. For an asset with a valid national stock number, Item Description field will be automatically filled with Approved Item Name from the Fed Log.
☑	Site Id	The active Site Id the user has access to.
☑	Cntr Nbr	Unique value used to identify agreements with suppliers and contractors.
☑	Cntr Use Cd	Identifies the type of loan or service under contract.
☑	Cntr Type Cd	A unique column that holds the code used by the lookup table which coincides with the associated description.
☑	Dlvy Ord Nbr	The specific order number under an umbrella delivery order. This applies to contracts.
☑	CLIN	A four-position field that identifies different contract line items within the same contract.
☑	SLIN	Two numeric or 2 alpha characters added to the basic contract line item number to identify separate subline items.
☑	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☑	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☑	Actbl UIC	Accountable Unit Identification Code - The UIC of the organization that is assigned management responsibility for property belonging to a specific unit organization, or activity. Multiple UICs may be grouped under an Accountable UIC to consolidate data for accountability and accounting system reporting purposes.
☐	Agency Cd	Indicates the agency code and name.
☐	Custodian Nbr	One to six position code, locally assigned, used to identify an individual responsible for assigned assets.
☐	Dollar Amt	The dollar amount of construction in progress/work in process, real property or the dollar amount of the accounting transaction.
☐	History Remarks	A text field available to record local information/reason for change to record.
☐	Loc	Physical location of an asset.
☐	Mfr Name	The full name of a specific manufacturer.
☐	Mfr Part Nbr	Number used to record the make or model of a specific piece of equipment.
☐	Mfr Yr	Year an asset was manufactured/built/improved.
☐	Mfr Model Nbr	The specific number assigned to identify the make/model of an asset.
☐	Qty	Quantity on hand or transaction quantity
☐	Remarks	A text field available to record local information/reason for change to record.
☐	Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☐	Sub Loc	A more specific description of the physical location of an asset within its Location.
☐	Total Cost	Total Cost. Cost of individual end item assets including cost of stand-alone components
☐	UIC	The UIC of the maintenance activity assigned to service the asset.
☐	UIC Name	A unit, organization, or activity name
☐	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.
☐	Yr Svc Life	Number of years of recommended service life based upon applicable directives.

Cancel | Reset | Show Inquiry | Submit

2. Choose the desired file type:

   - Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

     OR

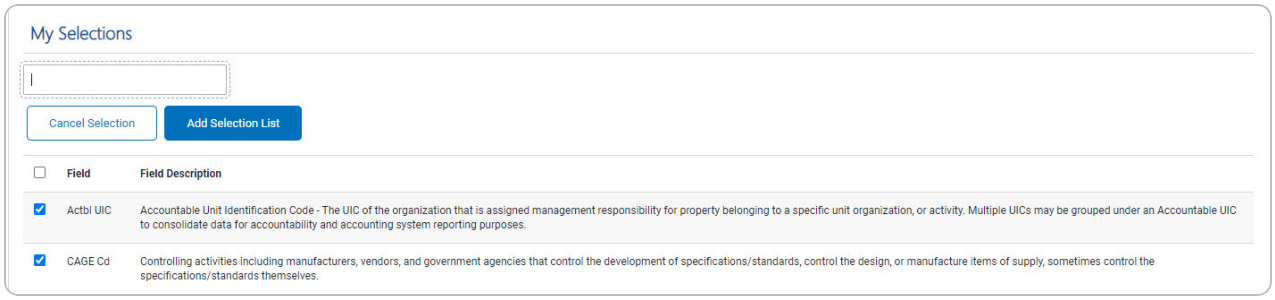
     Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*



Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by*

Update Selection List *and* Delete Selection List.

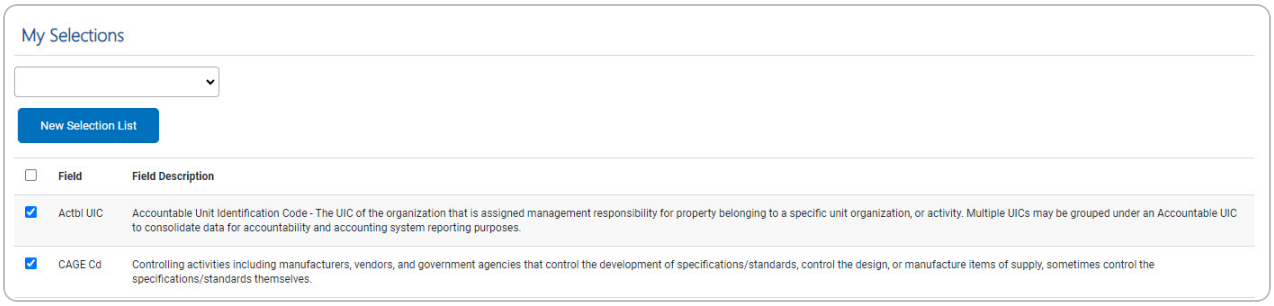
Select Show Inquiry for small volumes of data. *The* ***Wrnty/Svc/Subscription - Asset Assoc Inquiry — Results*** *page appears.*

5. **OR**

Select Submit for large volumes of data. *The* ***Wrnty/Svc/Subscription - Asset Assoc Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.



2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

Select Show Inquiry for small volumes of data. *The* ***Wrnty/Svc/Subscription - Asset Assoc Inquiry — Results*** *page appears.*

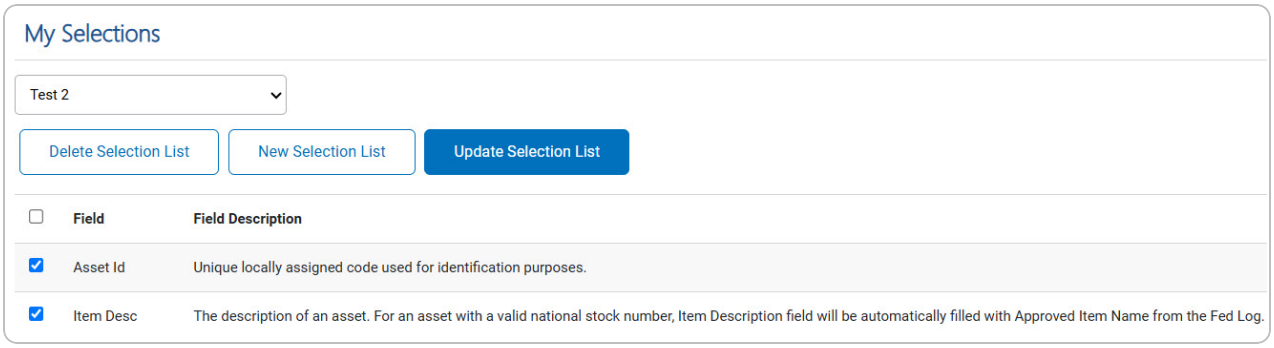
3. **OR**

Select Submit for large volumes of data. *The* ***Wrnty/Svc/Subscription - Asset Assoc Inquiry Transaction Status*** *page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and*

New Selection List *is joined by* Update Selection List *and* Delete Selection List.



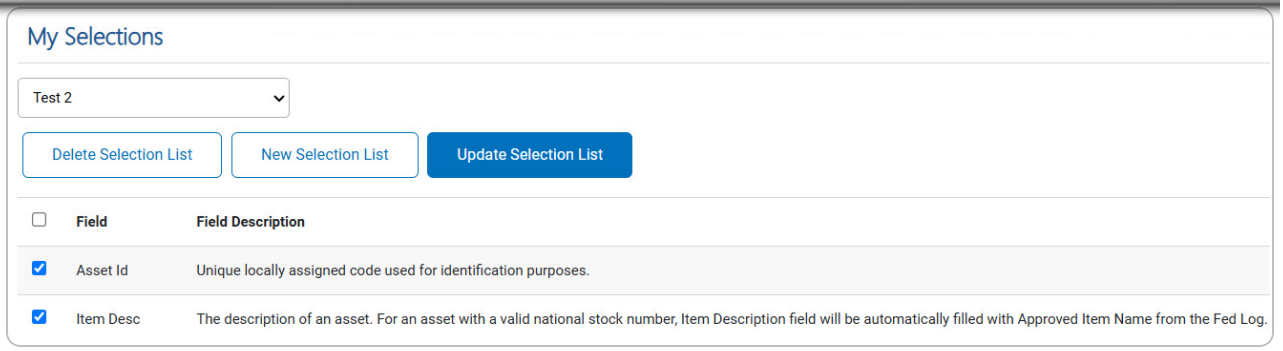
2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*
4. Select Show Inquiry for small volumes of data. *The* ***Wrnty/Svc/Subscription - Asset Assoc Inquiry — Results*** *page appears.*

   OR

   Select Submit for large volumes of data. *The* ***Wrnty/Svc/Subscription - Asset Assoc Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

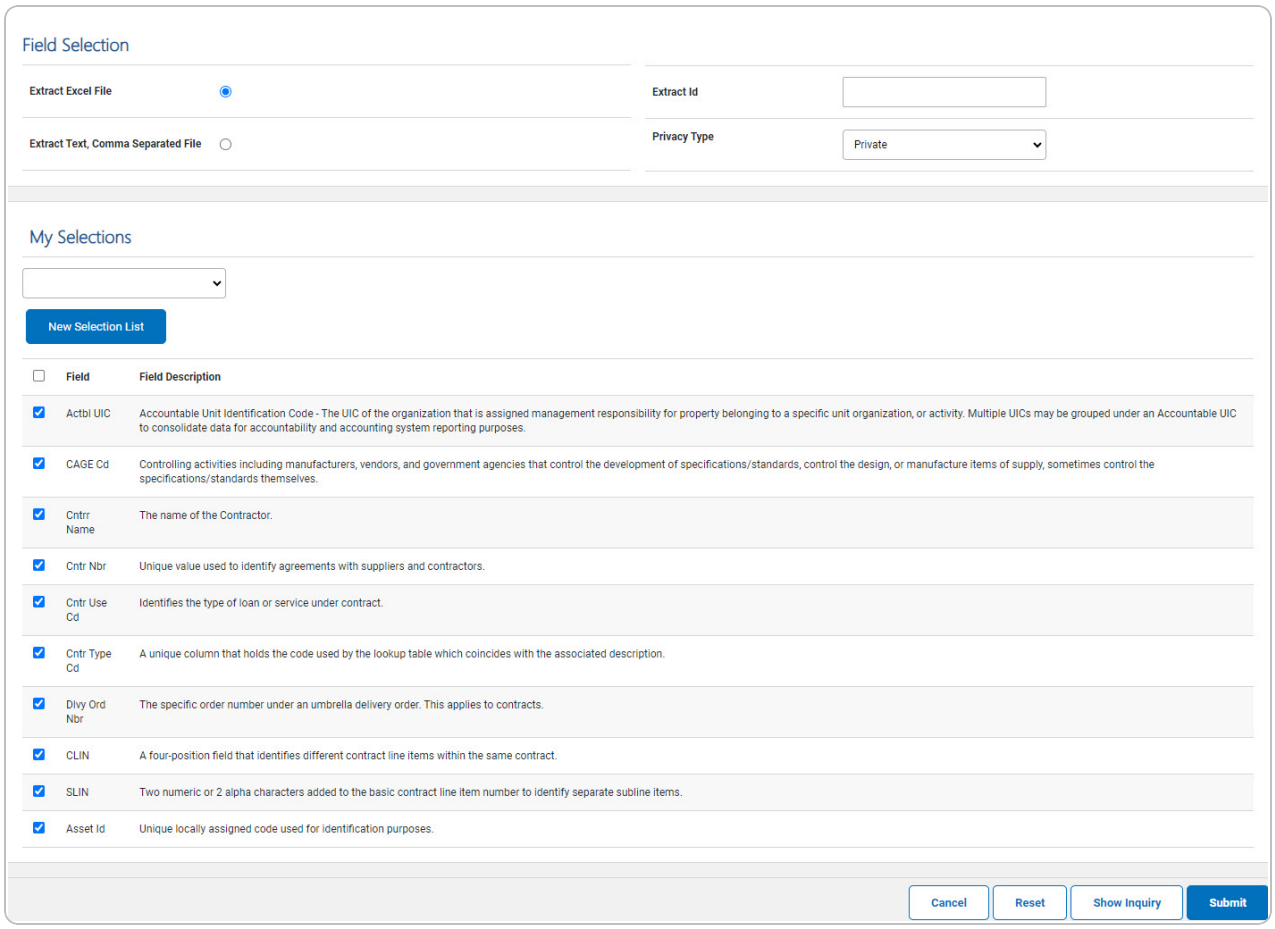


2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The* ***WRNTY/SVC/Subscription - Asset ASSOC Inquiry*** *page appears.*



2. Select the fields required for the inquiry. *The first 12 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

Click the following link to display PA Navigation Tips.

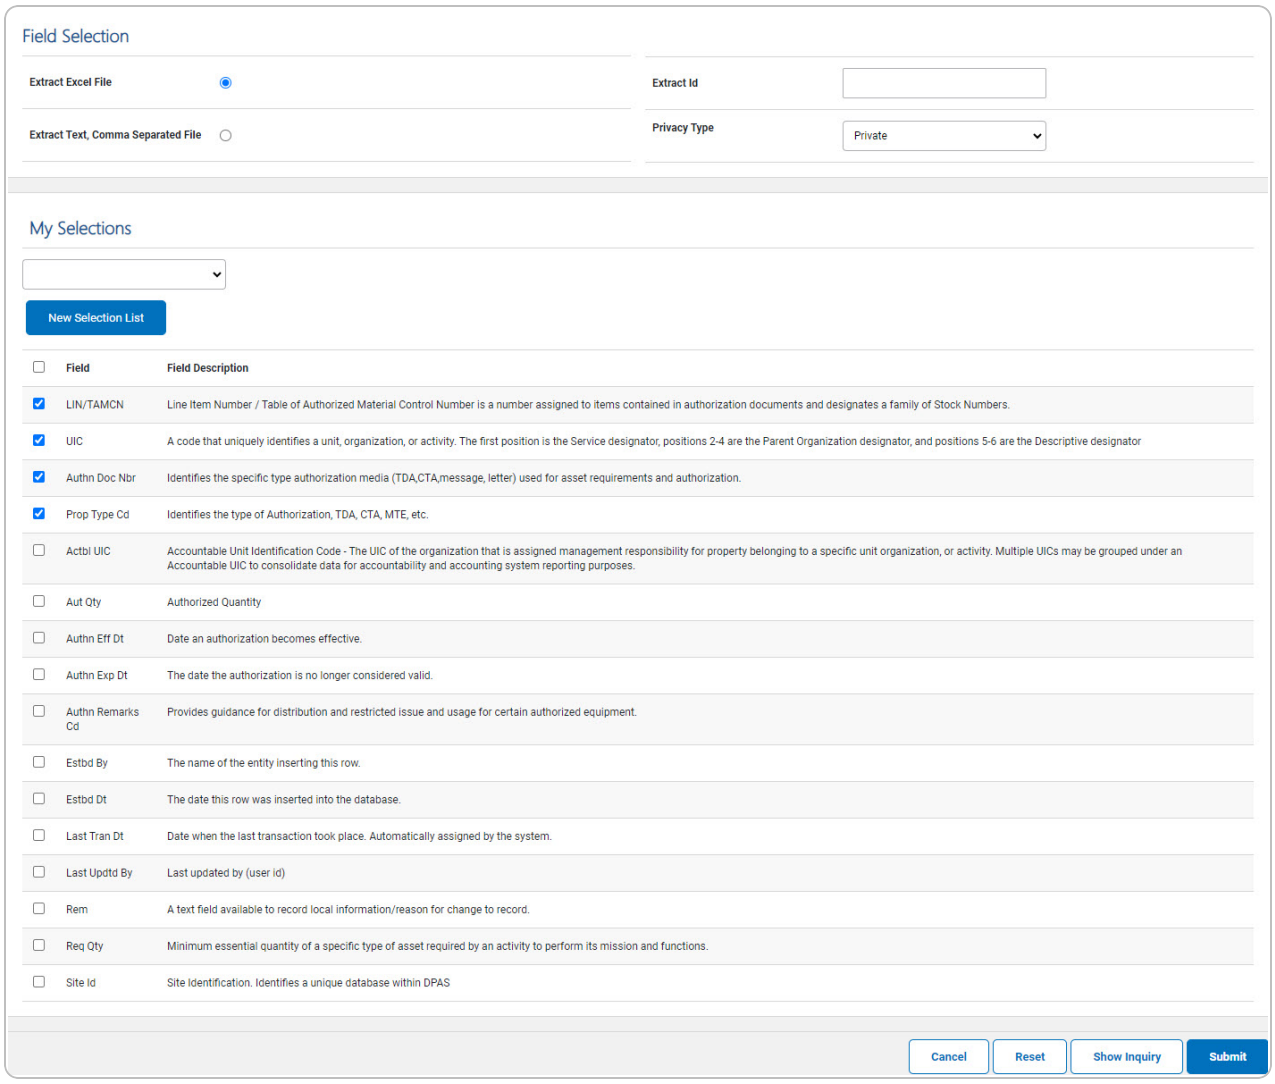
Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **LIN/TAMCN AUTHN History Inquiry** page appears.*



2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

   Select Show Inquiry for small volumes of data. *The **LIN/TAMCN Authn History Inquiry — Results** page appears.*
5. **OR**

   Select Submit for large volumes of data. *The **LIN/TAMCN Authn History Inquiry Transaction Status** page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

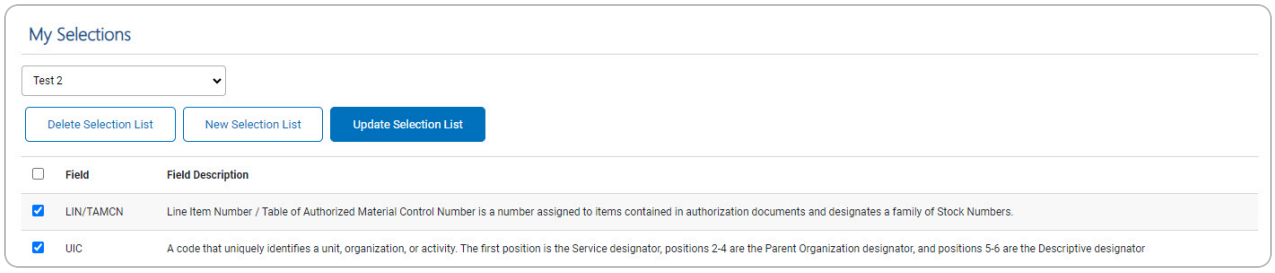
3. Select Show Inquiry for small volumes of data. *The **LIN/TAMCN Authn History Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **LIN/TAMCN Authn History Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

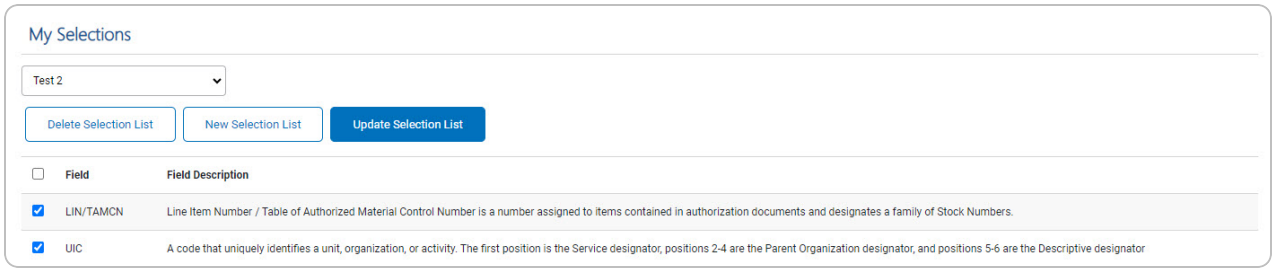
   Select Show Inquiry for small volumes of data. *The* ***LIN/TAMCN Authn History Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***LIN/TAMCN Authn History Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

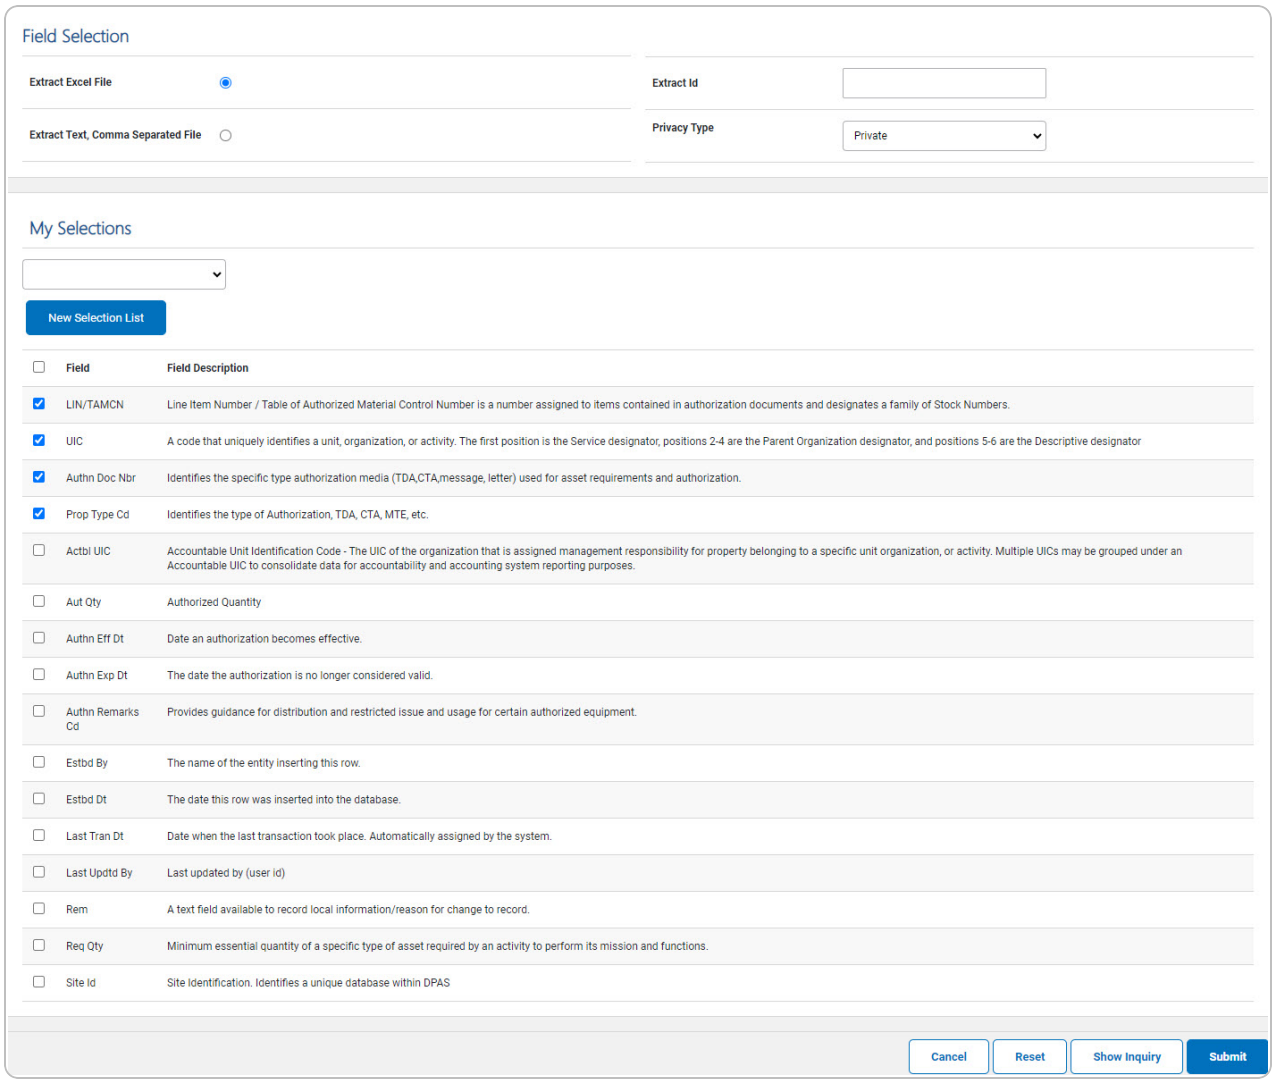


2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **LIN/TAMCN AUTHN History Inquiry** page appears.*



2. Select the fields required for the inquiry. *The first 4 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

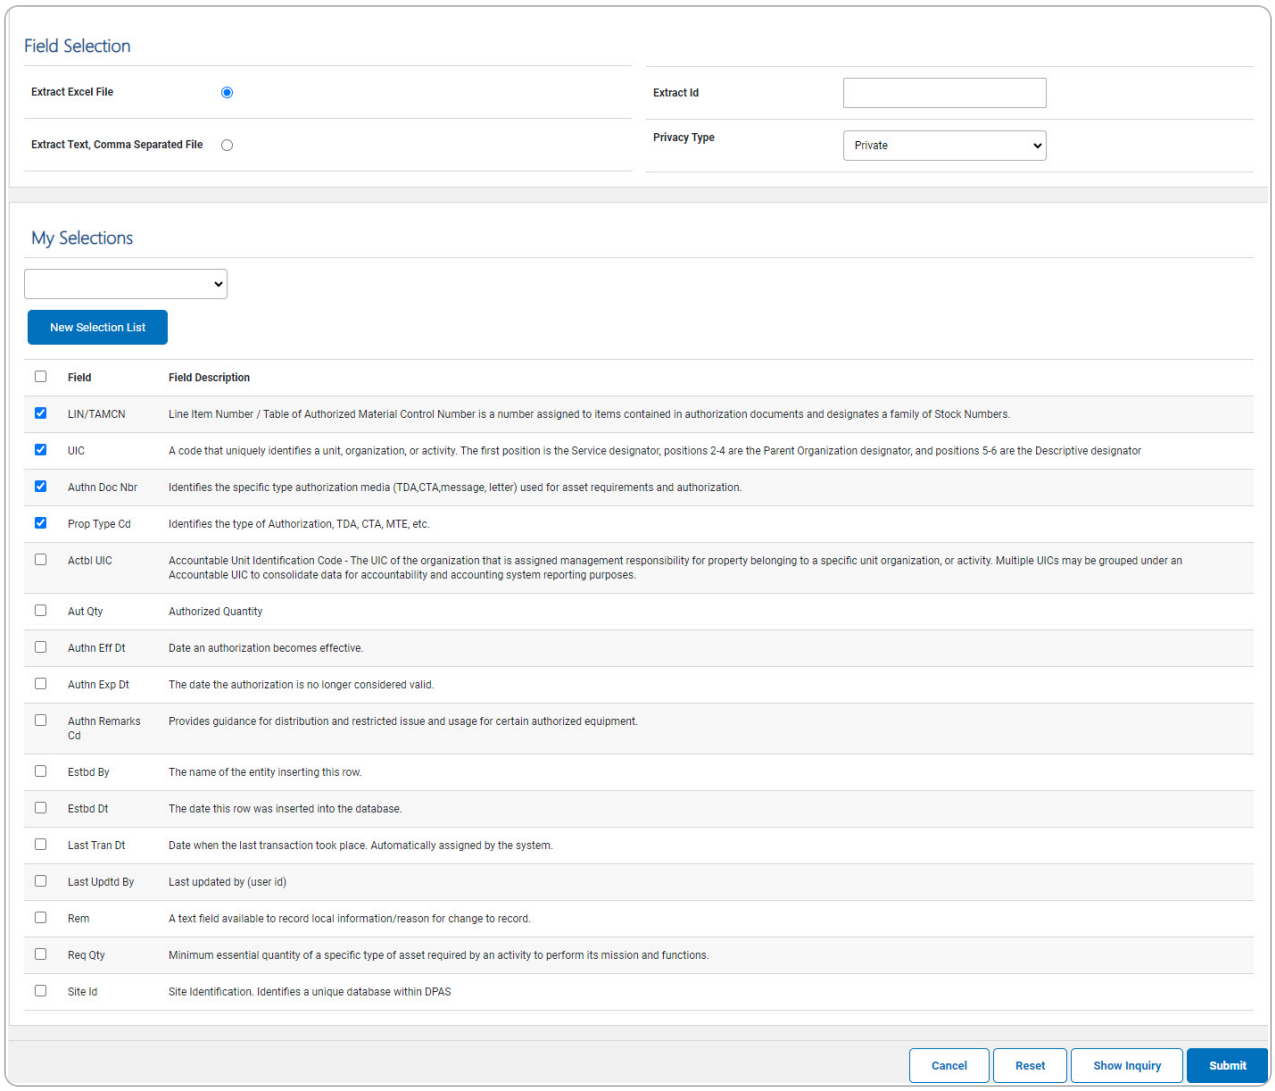
Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **LIN/TAMCN AUTHN Inquiry** page appears.*



2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

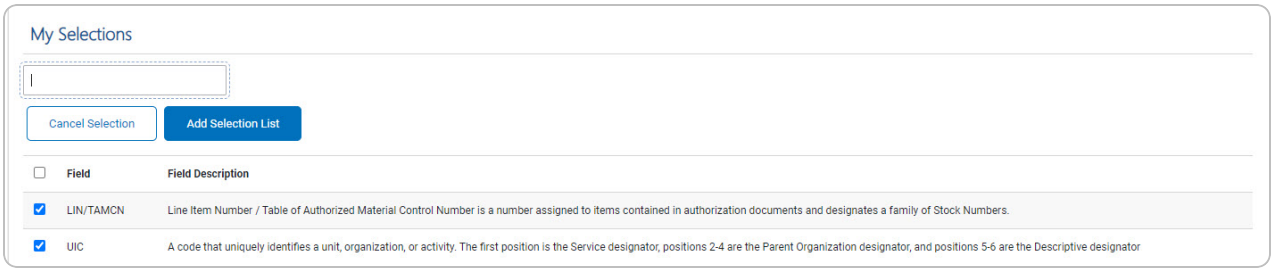
  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*



Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

   Select Show Inquiry for small volumes of data. *The **LIN/TAMCN Authn Inquiry — Results** page appears.*

5. **OR**

   Select Submit for large volumes of data. *The **LIN/TAMCN Authn Inquiry Transaction Status** page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

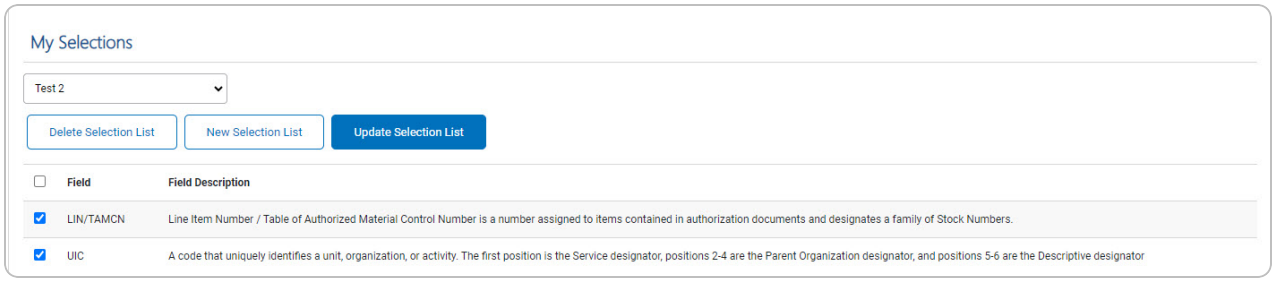
Select Show Inquiry for small volumes of data. *The **LIN/TAMCN Authn Inquiry — Results** page appears.*

3. **OR**

Select Submit for large volumes of data. *The **LIN/TAMCN Authn Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***LIN/TAMCN Authn Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***LIN/TAMCN Authn Inquiry Transaction Status*** *page appears.*

Delete a Selection List

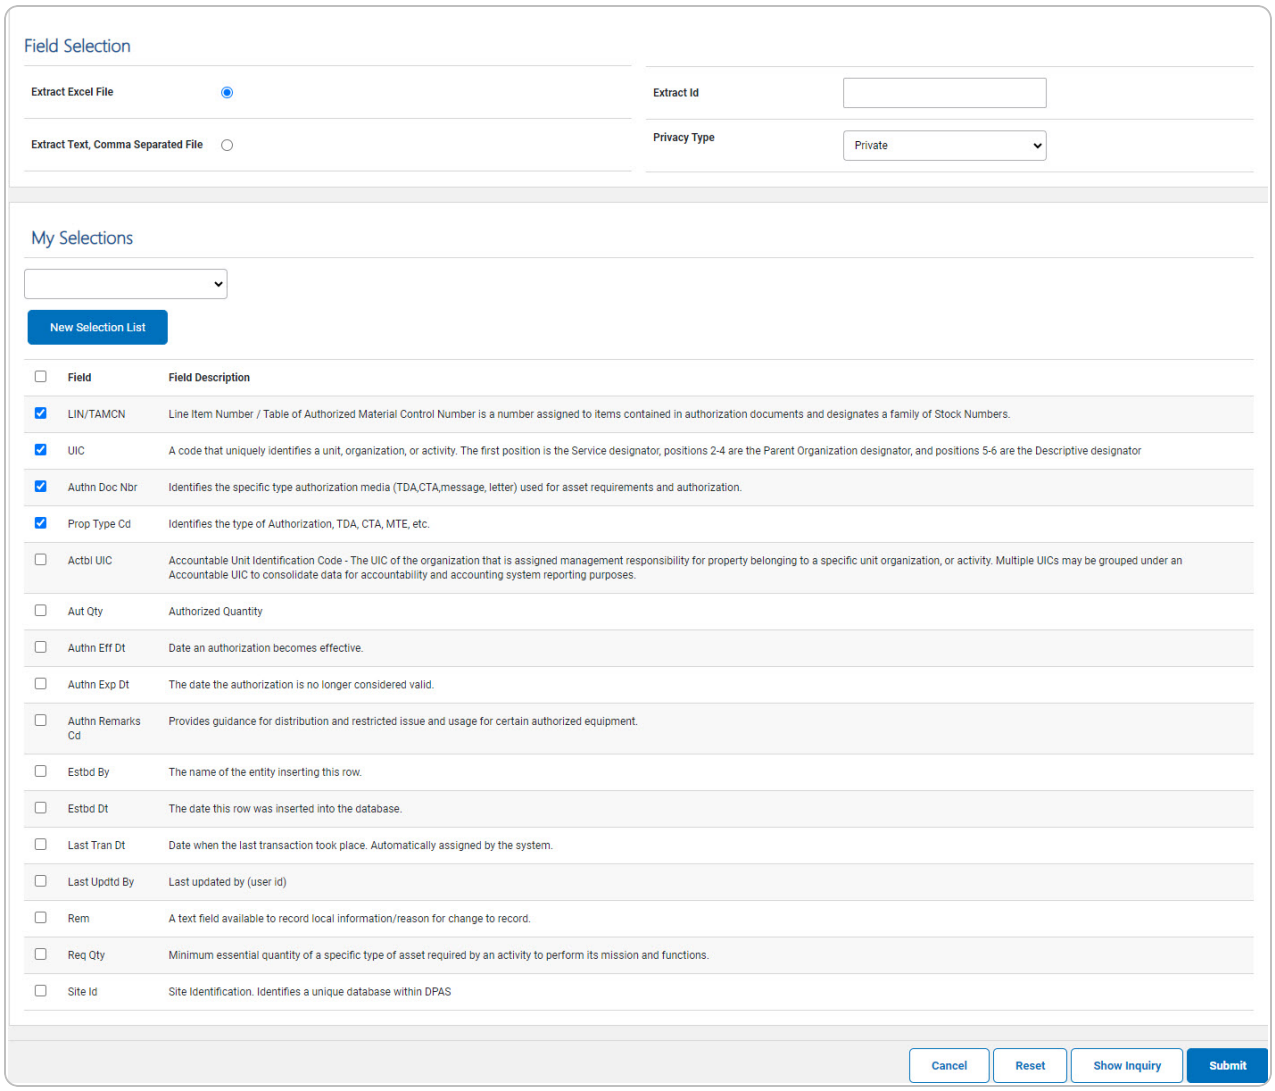
1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **LIN/TAMCN AUTHN Inquiry** page appears.*



2. Select the fields required for the inquiry. *The first 4 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the LIN/TAMCN contains the appropriate ☑ or ☐. *Select if the inquiry contains LIN/TAMCN information.*
- Verify the UIC contains the appropriate ☑ or ☐. *Select if the inquiry contains a UIC.*
- Verify the AUTHN DOC NBR contains the appropriate ☑ or ☐. *Select if the inquiry contains an AUTHN DOC NBR.*

Select Fields for the Paragraph Number Inquiry

Overview

The Paragraph Number Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > Authorizations > Paragraph NBR > Search Criteria > Fields > Paragraph Number Inquiry Fields Selection page

Page Fields

The following fields display on the **Paragraph Number Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

191	Excel is the only reliable print format for this inquiry.
252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
xxxx	Where available, select "Row" to view details for specific record.
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.
290	Do not "Export" large volumes of data, select "Back" button then select "Submit" button on the Field Selection Page

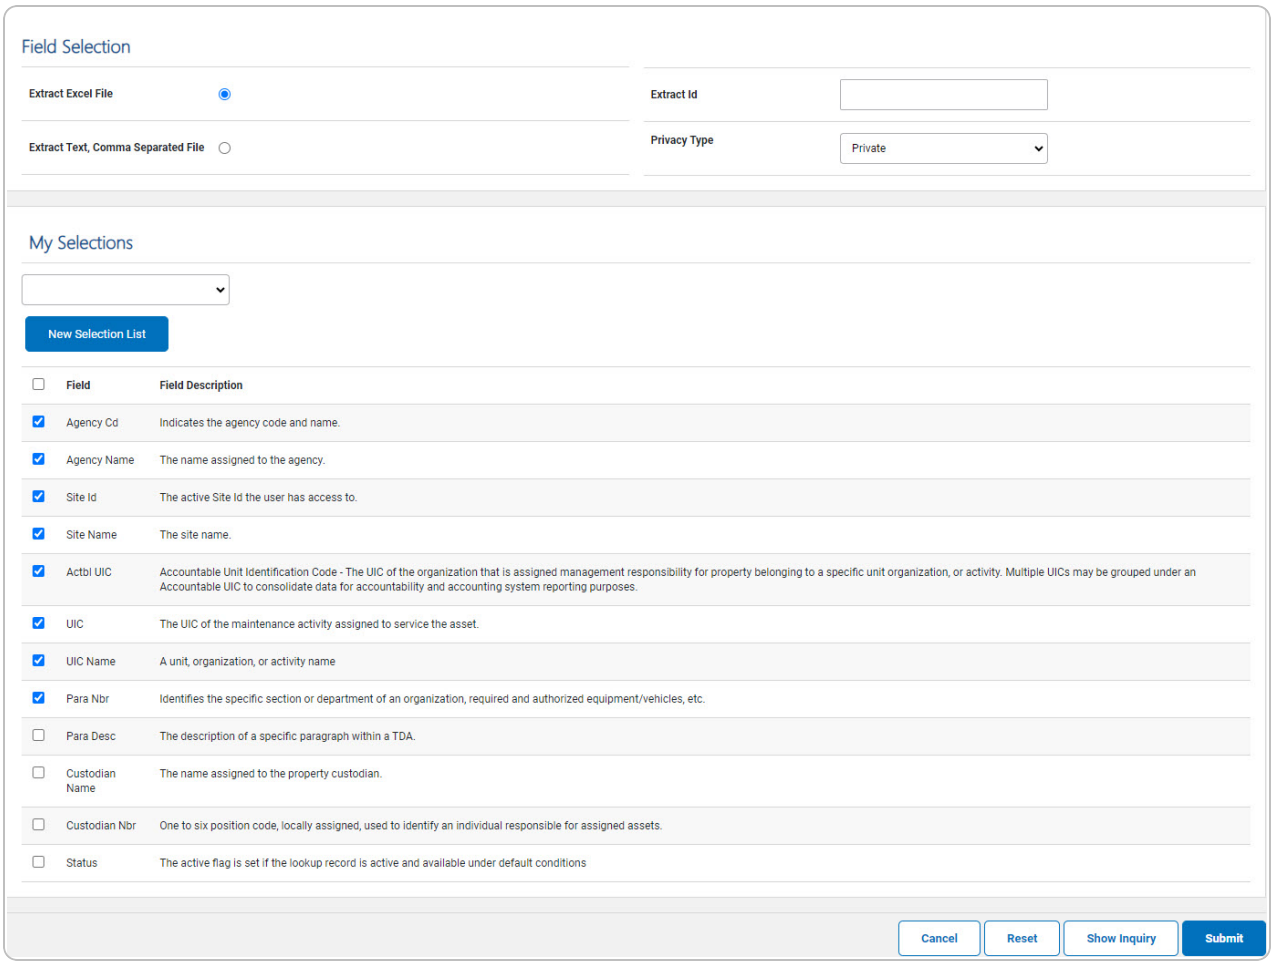
Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **Paragraph Number Inquiry** page appears.*



2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.*

Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

Select Show Inquiry for small volumes of data. *The* ***Paragraph Number Inquiry — Results*** *page appears.*

5. **OR**

Select Submit for large volumes of data. *The* ***Paragraph Number Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

3. Select Show Inquiry for small volumes of data. *The **Paragraph Number Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Paragraph Number Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***Paragraph Number Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Paragraph Number Inquiry Transaction Status*** *page appears.*

Delete a Selection List

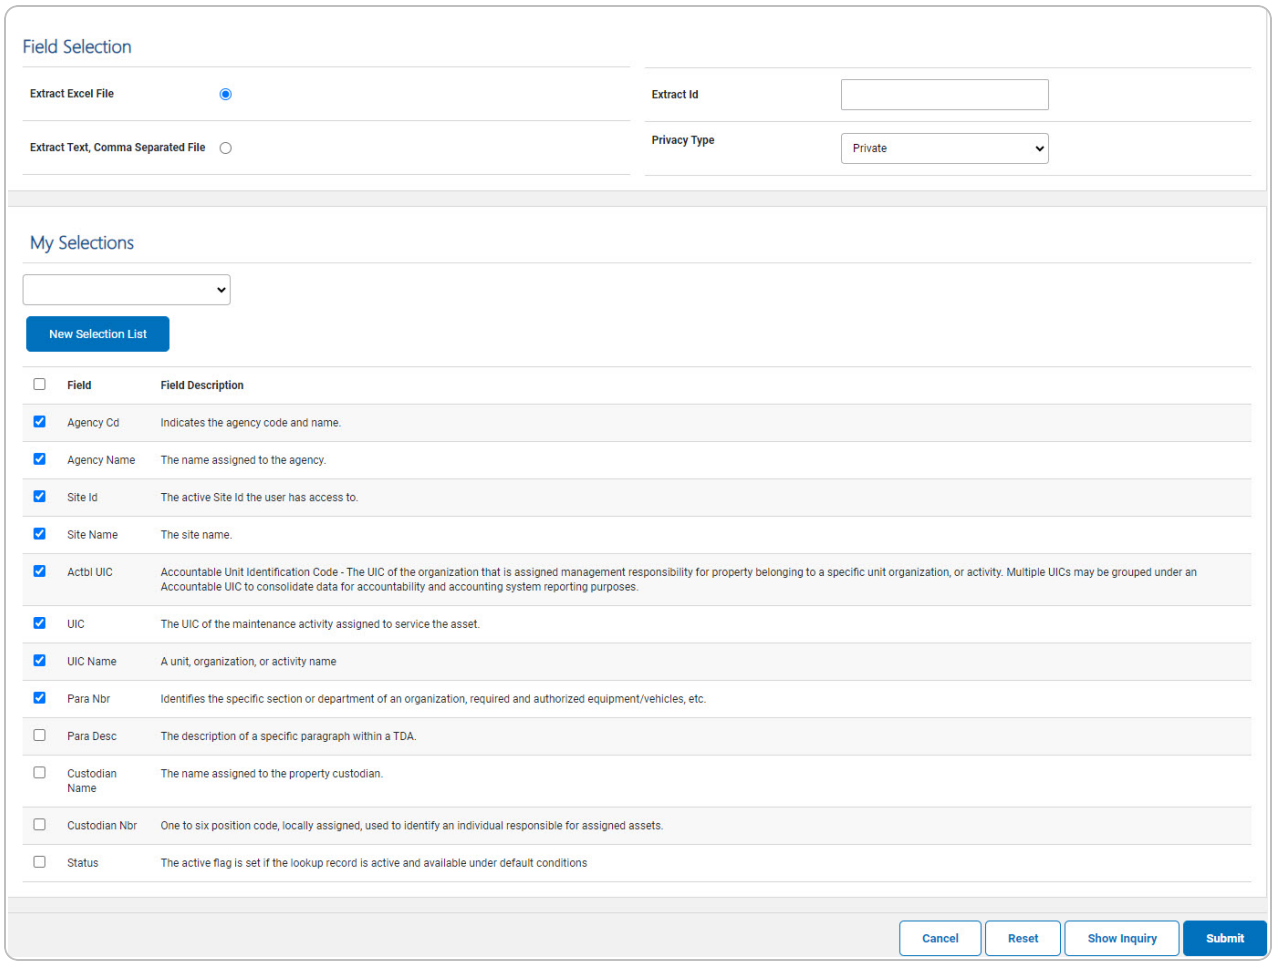
1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Paragraph Number Inquiry** page appears.*



2. Select the fields required for the inquiry. *The first 8 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the AGENCY CD contains the appropriate ☑ or ☐. *Select if the inquiry contains an AGENCY CD.*

- Verify the Agency Name contains the appropriate ☑ or ☐. *Select if the inquiry contains an Agency Name.*
- Verify the SITE ID contains the appropriate ☑ or ☐. *Select if the inquiry contains a SITE ID.*
- Verify the Site Name contains the appropriate ☑ or ☐. *Select if the inquiry has a Site Name.*
- Verify the ACTBL UIC contains the appropriate ☑ or ☐. *Select if the inquiry has an ACTBL UIC.*
- Verify the UIC contains the appropriate ☑ or ☐. *Select if the inquiry has a UIC.*
- Verify the UIC NAME contains the appropriate ☑ or ☐. *Select if the inquiry has a UIC NAME.*
- Verify the PARA NBR contains the appropriate ☑ or ☐. *Select if the inquiry has a PARA NBR.*
- Click ☐ to select the PARA DESC. *Select if the inquiry contains a PARA DESC.*
- Click ☐ to select the Custodian Name. *Select if the inquiry contains a Custodian Name.*
- Click ☐ to select the CUSTODIAN NBR. *Select if the inquiry contains a CUSTODIAN NBR.*
- Click ☐ to select the Status. *Select if the inquiry contains a status.*

Select Show Inquiry for small volumes of data. *The* ***Paragraph Number Inquiry — Results*** *page appears.*

3.

OR

Select  for large volumes of data. *The* ***Paragraph Number Inquiry Transaction Status*** *page appears.*

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

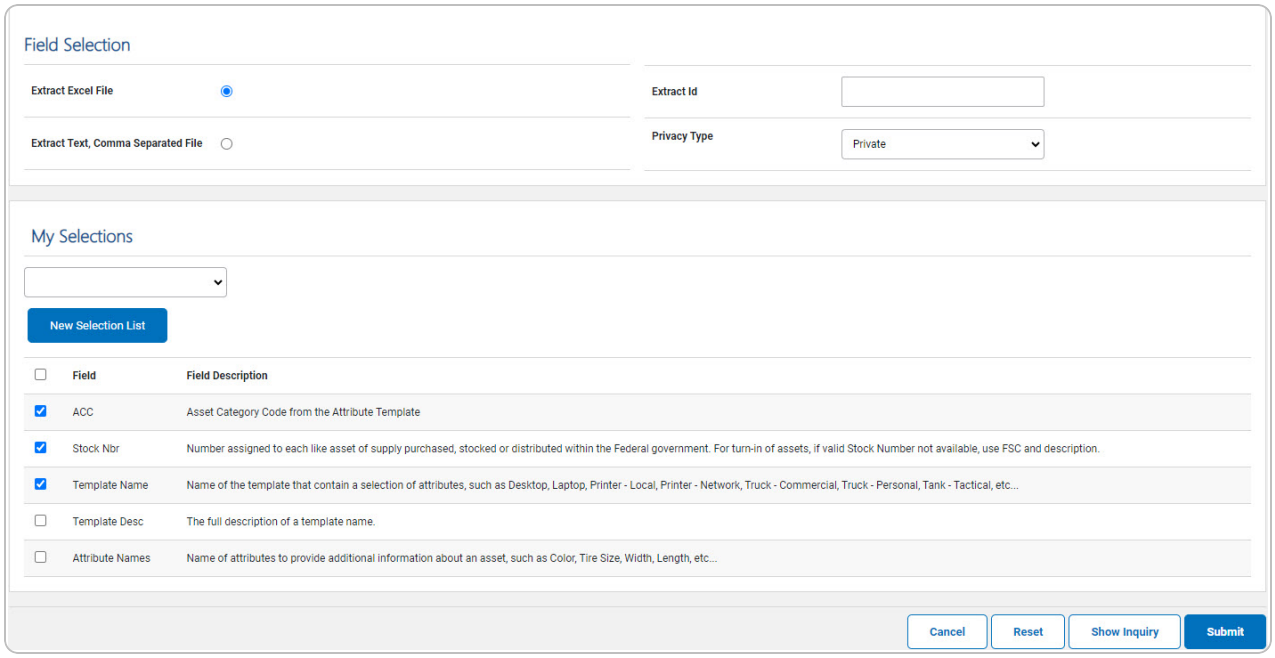
1. Select Fields. *The* ***Template Inquiry*** *page appears.*



2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the* ***View Inquiry Extract*** *page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the* ***View Inquiry Extract*** *page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the* ***View Inquiry Extract*** *page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

   Select Show Inquiry for small volumes of data. *The* ***Template Inquiry — Results*** *page appears.*
5. **OR**

   Select Submit for large volumes of data. *The* ***Template Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

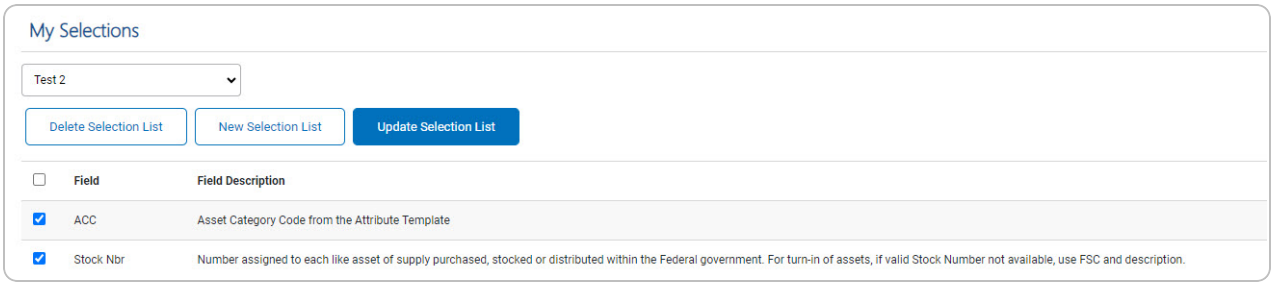
   Select Show Inquiry for small volumes of data. *The* ***Template Inquiry — Results*** *page appears.*

3. **OR**

   Select Submit for large volumes of data. *The* ***Template Inquiry Transaction Status*** *page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

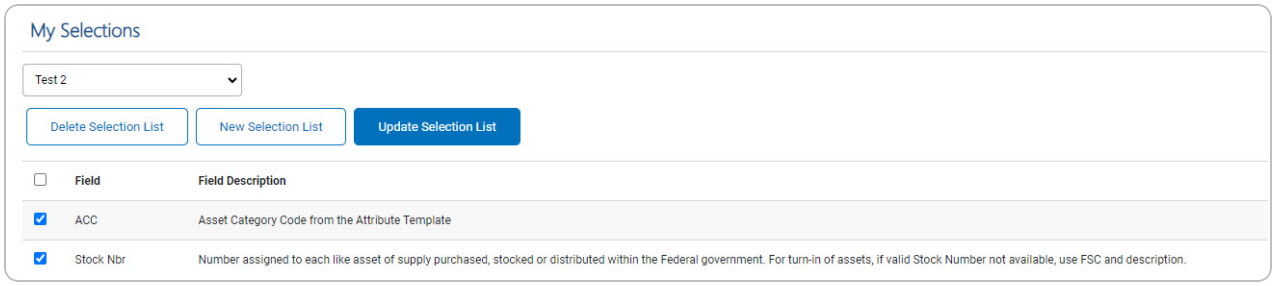
   Select Show Inquiry for small volumes of data. *The* ***Template Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Template Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

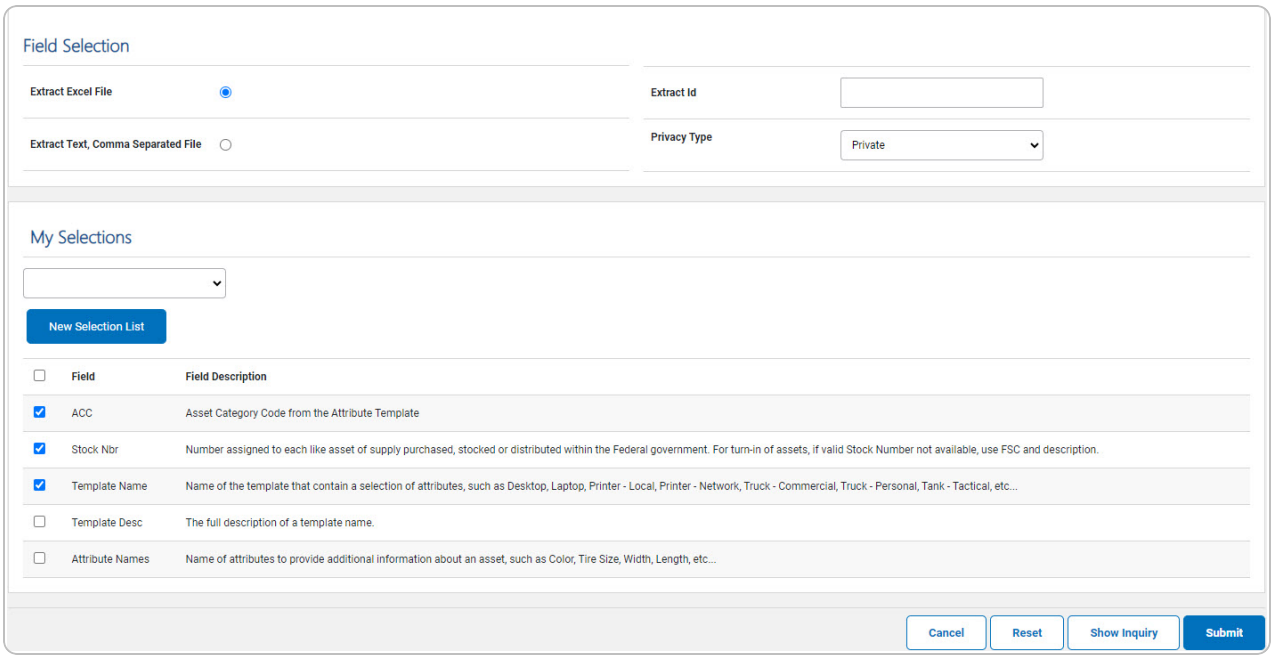


2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Template Inquiry** page appears.*



2. Select the fields required for the inquiry. *The first 3 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the ACC contains the appropriate ☑ or ☐. *Select if the inquiry contains an ACC.*
- Verify the STOCK NBR contains the appropriate ☑ or ☐. *Select if the inquiry contains a STOCK NBR.*
- Verify the Template Name contains the appropriate ☑ or ☐. *Select if the inquiry contains a Template Name.*
- Verify the Template Name contains the appropriate ☑ or ☐. *Select if the inquiry contains a Template Name.*

Select Show Inquiry for small volumes of data. *The* ***Template Inquiry — Results*** *page appears.*

3. **OR**

Select Submit for large volumes of data. *The* ***Template Inquiry Transaction Status*** *page appears.*

Inquiry Detail Page

Overview

The **Inquiry Detail** page displays ELMSmenu tabs to help categorize the information. It is defaulted to the **Basic** tab. This includes general asset information. These tabs may vary by report.

You will find a few **Detail** pages with additional levels of detail hyperlinks to create more complex queries.

For example: **Asset Activity History Detail** page.

The tool bar at the top of the page allows you to select the following tabs to display specific or all information for an asset:

- **Basic** - General asset information.
- **Catalog** - Catalog/Manufacturer information.
- **Excess** - Status information on an asset that has been reported to DRMO.
- **Inventory** - Latest inventory information for the asset.
- **Accounting** - Financial information on the asset.
- **Depreciation** - Current depreciation data for an asset.
- **Ancillary** - Any additional costs such as transportation, installation, de-installation, that exists for an object.
- **Improvement** - An upgrade, change, or modification to a serial or real property asset which will increase its useful life.
- **Agency** - Specific inquiries defined for an agency in ELMS.
- **Warranty** - Management of warranty/service/subscription information.
- **Attachments** - Attachments assigned to the asset displays.
- **Component** - Tree view relationship of the components associated with the asset.
- **All** - Complete information on an asset from the previous sections except: Ancillary, Attachments and Components; used if you need to print out a complete data set for an asset.

Navigation

Inquiries > Search Criteria > Search Results > Inquiry Detail page
or
Inquiries > Search Criteria > Field Selection > Search Results > Inquiry Detail page

Page Fields

The following fields display on the **Inquiry Search Results** page.

Fields vary based on Inquiry selected.

Procedures

To View Detail Page:

Note

Use the browser's **Back** button to return to previous page.

1. Select the **All** tab to display the complete record or choose a specific tab to view data entered into the system and is related to the specified asset.
2. Choose *Excel*, *PDF* or *Word* from **Select Format** drop-down list to **Save** or **Print**.
3. The exported report is automatically generated for viewing, saving or printing.
4. To return to the **Search Criteri**a page, select Cancel.

To View Asset Activity History Detail Page:

Note

The **Asset Activity History Detail** page provides additional levels of hyperlinks to display detail information.

Control	Description
	Use the left-hand pointing arrow with the vertical line (called a jump arrow) to move to the first page of results.

Control	Description
	Use the left-hand pointing arrow to move to the previous page of the results.
	The current page field displays the page number being viewed. To jump to a particular page number, enter the page number in the field and press the **Enter** key.
	The page control tells you how many pages of records you retrieved.
	Use the right-hand pointing arrow to move to the next page of the results.
	Use the right-hand pointing arrow with the vertical line (called a jump arrow) to move to the last page of results.
	Use the **Page size** drop-down list to change the number of rows displayed per page.

1. On the **Asset Activity History Detail** page, select the hyperlink in the grey space at the bottom of the table to select the additional History record.
2. The **Asset Activity Inquiry Details** page displays. You can select *Show all fields* or *Show only updated fields*.
3. When available the changes between the original data and last update display automatically. Select the ⊞ to expand each tab to view all data or ⊟ to collapse the tab.
4. To return to the **Search Criteria** page, select  .

Inquiry Field Selection

Overview

This page can be grouped into four sections:

- **Extract Report** - Output options including Extract file type, Extract Id (Name) and Privacy Type options (Used when creating an Inquiry Extract)
- **My Selections** – Allows you to save and use previously created Field Selection Lists.
- **Field Selection List** – Displays all data elements available for viewing
- **Action Buttons** – Used to complete the process: Show Inquiry, Submit, Reset and Cancel.

On the **Inquiry Field Selection** page you have the option to accept the default data fields for your query or modify the individual checkbox(es). You can also reorganize the column header order simply by dragging the **Field Name** up and down. The field at the top of the list determines the sort sequence.

Inquiries can be viewed immediately by choosing Show Inquiry (used for smaller search results, displays a maximum of 5,000 records) or can be saved as a data extract by choosing Submit (used for larger search results). The data extract can create files in the following formats:

- **Extract Excel File** – Creates an .xls (Excel spreadsheet).
- **Extract Text, Comma Separated File** – Creates a .csv (Comma Separated Value), flat text file to import into other applications.

Helpful Tip

Data Extract Inquiries are accessed by navigating to **Inquiries** > **View Data Extract** and are automatically deleted after 30 days.

On the **Field Selection** page, you can also determine if the **Data Extract** Inquiry you are creating is *Private* or *Shared*.

- **Private** – only the creator is able to download this inquiry
- **Shared** – anyone with the appropriate level of access can download this inquiry

Navigation

Inquiries > Search Criteria > Field Selection

Page Fields

The following fields display on the **Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Extract Excel File
Extract Text, Comma Separated File

Select/Deselect
Field
Field Description
Extract Id
Privacy Type

Procedures

To Select the Extract Excel File Radio Button:

Note

The **Extract Excel File** radio button is optional. Accepting the radio button creates an Excel .xls spreadsheet.

1. Accept the **Extract Excel File** radio button to create an .xls spreadsheet or modify the radio button to **Extract Text, Comma Separated File** – a .csv flat text file for import into other applications.
2. You have the option to enter an **Extract Id** user-defined name that displays on the **Inquiry > View Inquiries Extract** page. It is recommended you enter a customized name to distinguish between multiple inquiries of the same name.
3. The **Privacy Type** default is *Private*. To save the query to allow anyone with the appropriate level of access to download, select the drop-down list and change to *Shared*.

To Modify the Default Field Selection List:

1. Choose the fields to display by selecting individual checkbox(es) or using the **Select/Deselect** header to toggle all checkboxes. Keep in mind, the number of fields selected determines the amount of data returned.

Note

You can select any "Field" name and drag the name up or down to modify the display order. The field at top will be the sort order of the inquiry.

2. For small volumes of data, select Show Inquiry or for large volumes of data choose Submit.
3. Select Reset to reset the default **Fields** selection(s) or choose Cancel to return to the **Search Criteria** page.

To Add, Use, Update and Delete My Selections List:

To Add a My Selections List:

1. **Field Selections** can be saved as a favorite query by selecting New Selection List. The page refreshes and displays Add Selection List and Cancel Selection.
2. Enter your descriptive name for the **New Selection List** in the **My Selections** field.
3. Select Add Selection List.
4. For small volumes of data, select Show Inquiry or for large volumes of data choose Submit. To cancel the **New Selection List** select Cancel Selection.
5. Select Reset to return the fields to their default selections or choose Cancel to return to **Search Criteria** page.

To Use a My Selections List:

1. Select the **My Selections** drop-down list and make a selection of a saved list.
2. The selection list checkboxes are populated and the field order set as saved.

3. Continue with the inquiry.

To Update a My Selections List:

1. Select the **My Selections** drop-down list and choose a saved **Selections List**.
2. You can select or deselect individual checkbox(es) to update your **Field Selection List** to display or export. The **Select/Deselect** header selects or removes all fields displayed.

Helpful Tip

Select any field name and drag it up or down to update the field order. The field name at the top will be the sort order of the inquiry.

3. To update the **Selection List**, select Update Selection List.
4. For small volumes of data, select Show Inquiry or for large volumes of data, select Submit.
5. Select Reset to return the fields to their default selections or choose Cancel to return to **Search Criteria** page.

To Delete a My Selections List:

1. Select the **My Selections** drop-down list and choose the **Selections List** to delete.
2. Choose Delete Selection List to remove the **My Selections List**.
3. Select Reset to return the fields to their default selections or choose Cancel to return to **Search Criteria** page.

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error. Use ⊞ Instructions located at the top left of the page for additional assistance.

Error	Solution

Entry must be alphanumeric with supported special character(s) "-" and "_".	Only enter supported characters in the Extract Id field.
You must choose at least 1 field before showing the query.	Select at least one field to be displayed in the results using the check boxes in the Select column.

Inquiry Search Criteria

Overview

Inquiry Search Criteria provides a general overview of the major functions involved in the search for information and the creation of inquiries based on desired requirements. Retrieval assets and associated information contributes to the management of property.

A series of pre-defined inquiries is available. In addition, each Agency is provided the option to request site specific Agency Pre-defined inquiries added to the ELMS Inquiry menu.

The benefits of Inquiries include the following:

- Customized search criteria create inquiries to meet desired specific requirements for information.
- Additional fields can be selected to display and determine the field (column) order for the results.
- ELMS provides detail query pages and associated attachments for the asset. Attachments supported are jpg, jpeg, gif, and pdf files.
- Agency pre-defined Inquiries are available.
- The Inquiry Extract Viewer feature provides a select output format.
- Inquires can be saved or exported (MS Excel, Adobe PDF or MS Word formats).
- Customized queries (My Queries) can be saved for future use.
- Customized field selections (My Selection) can be saved for future use.

The Search Criteria offers two Inquiry types:

- **Dynamic Search Criteria**- Offers Search Criteria fields in a drop-down list to choose necessary fields.
- **Static Search Criteria** – Complete only necessary Search Criteria fields for search results.

Navigation

Inquiries > *Various Inquiry Selections*

Page Fields

Fields vary based on Inquiry selected.

Procedures

Create a Dynamic Search Criteria

You are able to customize the Search Criteria for your inquiry. The most common options available on the page to create your query are:

- **Available Field(s)** drop-down list – The list of fields available to use as search criteria
- **Operands**: Equal (=), Not Equal (<>), Less Than (<), Less Than or Equal To (<=), Greater Than (>), Greater Than or Equal To (>=), Like. The LIKE operand, if available, can be used for a wildcard search.
- **Search Value** entry options:
  - Drop-down list of available options
  - Text entry fields
  - Calendar tool ( ) for date values

Example of Creating a Dynamic Search Criteria:

Note

The query you select determines the **Available Field** options accessible to create your search criteria. In some cases, your UIC may be displayed. Verify the UIC prior to making any selections on the page. Line one of **Available Field(s)** may be populated for you and you can modify the **Operands** and **Search Value(s)**.

1. On the first available line of the **Available Field(s)**, select the drop-down list and make a selection or accept the default displayed.
2. The **Operands** field automatically populates with the equal (=) operator. Accept the Operand displayed or modify the Operand for your search criteria by selecting the drop-down list. Operands – (Equal (=), Not Equal (<>), Less Than (<), Less Than or Equal To (<=), Greater Than (>), Greater Than or Equal To (>=), Like). The LIKE operator, if available, and can be used for a wildcard search.
3. Enter the **Search Value(s)** to construct your search criteria. Use the available drop-down list or text entry field to enter the Search Value. To help further refine your search criteria, a may be displayed on the page to select a date criterion for your query. To retrieve a field equal to space, a space must be entered using the space bar.

Helpful Tip

After your Search Criteria is entered, you can select the **Enter** or **Tab** key to generate additional **Field Selection(s)**.

4. Select Fields to display the Field Selection page or choose Reset to clear the page.

Note

If the error message *No record(s) match search criteria* displays, you can modify/remove your selection. To remove a *Select an Item*, select the option chosen and pick the *Remove Filter Category* option. The page resets and you can make another selection.

Create a Static Search Criteria

The **Static Search Criteria** page lists fields related to the Inquiry selected. You can choose one or a combination of values to conduct the search. In some cases, your UIC may be displayed. Verify the UIC prior to making any selections on the page. The most common options available on the page to create your query are:

- **Fields** - Based upon the Inquiry selected the options on the page vary
- **Operands** – (Equal (=), Not Equal (<>), Less Than (<), Less Than or Equal To (<=), Greater Than (>), Greater Than or Equal To (>=), Like). The LIKE operator, if available, and can be used for a wildcard search.
- **Search Value** entry options:
  - Drop-down list of available options
  - Text entry fields
  - Calendar tool ( ) for date values

Helpful Tip

Some inquiries allow you to search without any search criteria. It is recommended you enter a search criteria to further refine your search.

Example of Creating a Static Search Criteria:

1. Choose the logical operator which corresponds with the field you wish to use as a filter.
2. Enter the **Search Value(s)** to construct your search criteria. Use the available drop-down list or text entry field to enter the Search Value. To help further refine your search criteria, a may display on the page to select a date criterion for your query. To retrieve a field equal to space, a space must be entered using the space bar.
3. Select Search to display the Search Results page or choose Reset to clear the page.

To Add, Use, Update and Delete My Queries Entries:

To Add My Queries:

Saving inquiries you have created to use at a later date is a time saving tool provided within Inquiries. The New Query allows you to save a new favorite inquiry which has not been previously saved or added. It is important to remember, adding **My Queries** are saved by the individual ELMS menu option you selected.
For example: An **Asset Management** > **Custodian My Queries** you created cannot be accessed from the **Inventory Search Criteria** page.

1. Select New Query on the **Search Criteria** page. The page refreshes and displays Add Query and Cancel Query.
2. Enter a descriptive name for the new inquiry into the **My Queries** text field.

Note

When you are creating My Queries, remember to construct a name with a description which is meaningful. Form a name that includes the purpose of the query.
For example: *Asset Custodian Query* or *AllAssetsBldg20*

3. Construct your inquiry utilizing the following most common options available on the page:

- **Fields and Available Field(s)** drop-down list
- **Operands** – Equal (=), Not Equal (<>), Less Than (<), Less Than or Equal To (<=), Greater Than (>), Greater Than or Equal To (>=), Like
- **Search Values** using:
  - Fields drop-down list
  - Search Value(s)

- Calendar Tool for date values

4. Select Add Query to save the query or choose Cancel Query to return to the **New Query** status. Once the Add Query is selected, the page refreshes and the Update Query and Delete Query display.
5. Select Fields to display Field Selection page or choose Search to display **Search Results** page.

To Use a My Queries Entry:

1. On the **Search Criteria** page, select the **My Queries** drop-down list to choose a saved query to display. The page refreshes and displays New Query, Update Query and Delete Query .
2. At this time your saved criteria displays. You can add another filter to your inquiry. Select the logical operator and enter your search criteria.
3. Select Fields to display the **Field Selection** page or choose Search to display the **Search Results** page.
4. Choose Reset to clear the page.

To Update a My Queries Entry:

1. Select the saved **My Queries** entry from the drop-down list. The page refreshes and the New Query, Update Query, and Delete Query options display.
2. At this time you can update or use your saved **My Queries** entry. On the page, you have the following options:

- For Dynamic Inquiries, you can use the "**Enter**" or "**Tab**" keys to generate additional **Available Field(s)** or **Remove Available Field(s)**.
- Modify Operands – (Equal (=), Not Equal (<>), Less Than (<), Less Than or Equal To (<=), Greater Than (>), Greater Than or Equal To (>=), Like). The LIKE operator, if available, can be used for a wildcard search.
- Modify or remove **Search Value(s)**.

3. If adjustments are made to the query, select the Update Query to save your modifications.
4. Select Fields to display the F**ield Selection** page or choose Search to display the **Search Results** page.
5. Choose Reset to clear the page.

To Delete a My Queries Entry:

1. Choose the **My Queries** drop-down list to select the saved query to delete. The page refreshes and the New Query, Update Query, and Delete Query options display.

   Note

   Selecting Delete Query immediately deletes the query.

   To remove the query, select Delete Query.
2. Select Fields to display the **Field Selection** page or choose Search to display the **Search Results** page.
3. Choose Reset to clear the page.

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error. Use ⊞ Instructions located at the top left of the page for additional assistance.

Error	Solution
Mandatory Entry: Available Field(s) and Operands.	No data is entered.
Mandatory Entry: Available Field(s).	No data is entered in the **Available Field(s)** but an operand is selected.
Saved Inquiry already exists.	Inquiry already exists.
Must enter =, >,<, >=, <=, <>, or Like.	Value entered and no operand is selected.
No record(s) match search criteria.	Results for the search criteria you entered do not exist, you are logged into the wrong ACTBL UIC/UIC, or you do not have security access.

Inquiry Search Results

Overview

The Search Results page displays the output of your query for export to MS Excel, Adobe PDF or MS Word.

Helpful Tip

There may be several pages returned from the Search Criteria. To page through the results, select the page number at the bottom of the page. The information is sorted in ascending order.

On the page you can perform the following:

- Scroll through the number of pages returned from query results
- Determine size of the font
- Find/Next by entering the characters or words to search
- Select the format for export
- View the Details page

Navigation

Inquiries > Search Criteria > Search Results
OR
Inquiries > Search Criteria > Field Selection > Search Results

Page Fields

The following fields display on the **Inquiry Search Results** page.

Fields vary based on the Inquiry selected.

Procedures

To View Search Results:

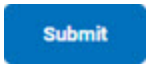
1. You can scroll through the number of pages returned from your query results.

Button	Function
	Return to the first page of results.
	Return to the previous page of the results.
	View the current page number. Enter the desired page number and press Enter to advance to the desired page.
	Display how many pages retrieved.
	Advance to the next page of the results.
	Advance to the last page of results.
	Find data within the Results page.
	Select the format to Export the report.

2. To modify the **Display Format/Font** on the page, select the drop-down list to change the size of the font displayed on the page.
3. The **Find Text in Report** feature allows you to enter the characters or words to search for in the **Find|Next** field. This is not case sensitive so you will find the word *truck* if you enter it as *Truck*, *truck* or even *TrUcK*. Select the **Find** hyperlink; to locate the next matching value select the **Next** hyperlink.
4. Select the **Export** and make a selection from the drop-down list to view the results in MS Excel, Adobe PDF or MS Word. Some inquiries only allow specific export file formats.

Attention

Do not export large volumes of data. Select the browsers **Back** button, then select



on the **Field Selection** page.

5. Where available on the page, right-click on any column heading for more options to modify the **Search Results**. Your options are:

Control	Description
	Use to search the **Search Results** for specific word(s) or characters.
	Use to add additional data columns to the **Search Results**.
	Use to allow the system to automatically adjust the column widths to best display all data.
	Use **Export** to export to Excel.
	Use **Filter** to only show records which match or do not match the criteria.
	Use **Sort Ascending** to sort alphabetically from A-Z 0-9.
	Use **Sort Descending** to sort alphabetically from Z-A 9-0.
	Use **Clear Sorting** to clear any sorting.
	Use the **Group By** to sort by a column heading of your choosing.

Control	Description
Ungroup	Use **Ungroup** to remove all groupings

6. Where available on the page, you can mouse over a data field or hyperlink to select a record to display additional information. A **Detail** page displays for the record selected.

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error. Use ⊞ Instructions located at the top left of the page for additional assistance.

Error	Solution
Mandatory Entry From Date.	**Transaction From Date** is required.
Date format should be MM/DD/YYYY with valid month/day combination.	Re-enter a valid date format.
Transaction was not successful.	Contact the ELMS Call Center.

User Status Inquiry Field Selection

Overview

This page provides you with the data fields which will be included with the results of your inquiry search. You can choose to include or exclude data based upon your inquiry needs.

Navigation

Statistics > Users > User Status > Search Results > Field Selection page

Page Fields

The following fields display on the Inquiry Field Selection page. For more information on each field, select the appropriate hyperlink.

Extract Excel File
Extract Text, Comma Separated File

Extract Id
Privacy Type

Procedures

To create, use, update and delete My Selections entries:

To create a My Selections entry:

1. Choose New Selection List.
2. Select the data elements to appear in the final extract file or report. If it is possible to alter the order of the fields in the output file, your cursor will change. To move a field up or down in the list, move the cursor over the field, click and hold on the field, then drag and drop it into place. Select Reset to return the fields back to their original checked or unchecked state.
3. Enter the name for the selection list in the field.

Note

You should give your selection list a meaningful name. Simply calling it "FranksSelections" may not be enough to remind you of what is contained in this list of data elements. Use meaningful names that describe what the list contains. Names such as "AccountingData" or "StockNbrItemDesc" will make more sense to you next month or next quarter.

4. Select Add Selection List to save the inquiry or choose Cancel Selection to clear your input and return to the New Selection List state.

To use a My Selections entry:

1. Activate the My Selections drop-down list and select the entry to use.
2. The selection list check boxes will be populated and the field order set as it was when the list was saved.
3. Continue with the inquiry.

To update a My Selections entry:

1. Activate the My Selections drop-down list and select the entry to update.
2. Modify the list as needed. You may change the fields selected as well as the order in which they will appear in the output.
3. Select Update Selection List.

To delete a My Selections entry:

1. Activate the My Selections drop-down list and select the entry to delete.
2. Select Delete Selection List.

Note

All selection lists are stored by the type of query they associated with. For instance, you cannot access a manufacturer selection list from the stock number inquiry page.

To view the inquiry results on-screen:

1. Select the data elements to appear in your output using the check boxes in the Select column or by selecting a saved entry from My Selections. The selected data elements will appear in your output in the order they appear in the list. If it is possible to alter the

order of the fields in the output file, your cursor will change. To move a field up or down in the list, move the cursor over the field, click and hold on the field, then drag and drop it into place. Select Reset to return the fields back to their original checked or unchecked state.

2. Select Show Inquiry. This will produce an on-screen report that will display the data you selected.

To create an inquiry data extract:

1. Determine the extract data type.
   A. Select the Extract Excel File radio button to create a spreadsheet file optimized as a native Excel (.xls) file. The file is only readable using the Excel program.
   B. Select the Extract Text, Comma Separated File to create a plain text data file readable by any plain text editing program. This file is also compatible with Excel.
2. Enter a name into the EXTRACT ID field to create an identifier that will be appended to the report name in the Download column in the inquiry viewer. This field is not mandatory.
3. Select a Privacy Type using the drop-down list.
   A. Select Private to make the report viewable only by you.
   B. Select Shared to allow others in your organization access to the extract results.
4. Select the data elements to appear in your output using the check boxes in the "Select" column or by selecting a saved entry from My Selections. The selected data elements will appear in your output in the order they appear in the list. Use the blue up and down arrows on the right hand side of the page to move the fields up and down in your output file. Select Reset to return the fields back to their original checked or unchecked state.
5. Select Submit to send the extract to the background processing agent. To retrieve the output, use the View Inquiry Extract page.

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error. Use ⊞ Instructions located at the top left of the page for additional assistance.

User Identifier Browse

Reference Document

The purpose of this process in the Enterprise Logistics Management System (ELMS) is to allow users to browse for a User Id (User Identifier). Following the browse, the User Identifier is input into the User Id field of the particular **User Id Browse Search Criteria** screen.
This process may be used by any program requiring entry of a User Id. The program provides several retrieval options based upon the process calling the browse. These options and the processes using them are described below.
In addition to the individual User's permissions to perform a User Id browse, retrieval options are followed based on the process calling the browse:

- If the individual using the browse is an Application Security Officer, all active users are displayed.
- If the individual using the browse is a Site Security Officer, all active users are displayed that have access to the same sites as the security officer except those who are also Site Security Officers.
- If the individual using the browse is an Accountable Unit Identification Code Security Officer, all active users are displayed that have access to the same Accountable UICs (Unit Identification Code) as the security officer except those who are also Accountable UIC Security Officers.

Steps to Browse for A User Id

1. When necessary, select the **User Identifier** . The User Identifier Browse screen automatically opens when you enter the **ACTBLUIC/UIC/Custodian NBR Access** (Accountable Unit Identification Code, Unit Identification Code, and Custodian Number Access) screen.

   Fields are displayed in the following order:

   - **Search By** (Display–only)
   - User Id — Entry field into which you may enter all or any part of a User Identifier. You may use the wildcard character (a **'%'** percent sign) as a substitute for all or any number of characters.
   - Last Name — An alternative data entry field into which you may enter all or any part of a user last name. You may use the wildcard character (a **'%'** percent sign) as a substitute for all or any number of characters.

2. Select Search to begin the search, or select Reset to clear data. All fields are optional; however, you must enter data to limit the number of rows retrieved. Full or partial values can be entered in either field.

   The **User Id Search Browse Results** records are displayed.
   Fields and data are displayed in the following order. Restrictions on those User Ids displayed are based on the User Type and security profile of the user.
   - Carried forward from the **Search Criteria** screen:
   - **Search By**
   - **User Id**
   - **Last Name**
   - **Search Results** Grid display in the following order:
   - **Select** (Hyperlink)
   - **User Id** Default sort. Can sort on the column heading
   - **Last Name**
   - First Name

   You may alphabetically sort the return list by selecting the User Id link at the top of the User Id data column.
3. Choose the **Select** link for the User Id needed.

The data selected after the search populates the User ID (Identifier) field in the initial transaction screen being used, allowing you to continue processing your transaction. The **User Id Browse Search Results** screen also closes automatically.

Processing considerations for a User Id

- **Site Id**
  - When a site Security Officer is using the browse, ELMS automatically determines what sites the security officer can access also.
  - When returning results for a Site Security Officer using the browse, ELMS determines whether the user has access to any site that the Site Security Officer can access, too.
- **User Accountable UIC** (Unit Identification Code)
  - When an Accountable UIC Security Officer is using the browse, ELMS determines which Accountable UIC(s) the security officer can access. This includes determining whether the user has access to any Site Id that the Accountable UIC Security Officer can access.

Accessibility

The pages on the Enterprise Logistics Management System (ELMS) web-site are developed to be accessible to individuals with disabilities, in accordance with Section 508 of the Rehabilitation Act of 1973, as amended-29 U.S.C. § 794.

Specifically, the pages have been developed to comply with the following 508 web site accessibility requirements developed by the Architectural and Transportation Barriers Compliance Board (The Board) and published by the W3C as worldwide accessibility standards.

These requirements are based upon the Final Rule as Published in the Federal Register on December 21, 2000 at 36 CFR Part 1195 [Docket No. 2001-01] RIN 3014-AA25 and as published in The Board's on-line guide to the standards for Web-based Intranet and Internet Information and Applications (1194.22).

These requirements include the following:

A text equivalent for every non-text element shall be provided (e.g., via "alt," "longdesc," or in element content).

Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.

Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.

Documents shall be organized so they are readable without requiring an associated style sheet.

Redundant text links shall be provided for each active region of a server-side image map.

Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.

Row and column headers shall be identified for data tables.

Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.

Frames shall be titled with text that facilitates frame identification and navigation.

Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.

A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of these standards, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.

When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by assistive technology.

When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).

When electronic forms are designed to be completed on-line, the form shall allow people using assistive technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.

A method shall be provided that permits users to skip repetitive navigation links.

When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.

If you have trouble using this site, report the issue to the point of contact listed on the Contact Us page.

Consent To Monitoring

This is a U.S. Government (USG) Information System (IS) that is provided for USG-authorized use only.

By using this IS (which includes any device attached to this IS), you consent to the following conditions:

The USG routinely intercepts and monitors communications on this IS for purposes including, but not limited to, penetration testing, communications security (COMSEC) monitoring, network operations and defense, personnel misconduct (PM), law enforcement (LE), and counterintelligence (CI) investigations.

At any time, the USG may inspect and seize data stored on this IS.

Communications using, or data stored on, this IS are not private, are subject to routine monitoring, interception, and search, and may be disclosed or used for any USG authorized purpose.

This IS includes security measures (e.g., authentication and access controls) to protect USG interests — not for your personal benefit or privacy.

Notwithstanding the above, using this IS does not constitute consent to PM, LE or CI investigative searching or monitoring of the content of privileged communications, or work product, related to personal representation or services by attorneys, psychotherapists, or clergy, and their assistants.
Such communications and work product are private and confidential.
See User Agreement for details.
