Search for an Ancillary Cost — Criteria

Overview

The Property Accountability module Ancillary Cost process provides the ability to add additional costs and improvement costs to assets. Additional costs, known as ancillary costs, are shown as installation, de-installation, and transportation costs, legal fees, etc. Improvement costs are those costs incurred to 'improve' an existing asset and extend its useful life.

Note

Ancillary Costs are recorded costs or values that include the amount(s) paid to bring the asset to its form and location suitable for its intended use. They are identifiable and Materiel to the value of the asset. In addition to the amount paid to the vendor, additional, usually subordinate costs that are identifiable, shall be included in the recorded cost.

Navigation

Accounting > Ancillary Cost > Ancillary Cost Search Criteria page

Page Fields

The following fields display on the **Ancillary Cost Search Criteria** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
21	Select "Add" button to create a new record.
337	ASSET ID or STOCK NBR/SERIAL NBR is mandatory when "Add" button is selected.

12	Select "Search" button to view Search Results page.
13	Select "Reset" button to clear data.

Search for a Real Property — Criteria

Overview

The Property Accountability module Real Property process provides the ability to receive, update, transfer, and dispose of land, structures, and improvements with the exception of movable machinery and equipment. The key is that land must be involved; structures without land are not typically considered real property in and of themselves.

Note

When adding Real Property assets to the database, only add, transfer, update or dispose of one asset at a time.

There are three ways to receive new RP on the property book:

- New purchase
- Transfer from another UIC
- Construction In Progress (CIP) transfer

DoD Financial Management Regulation 7000.14-R (FMR) directs the relationship of CIP to RP. When authorization to construct RP is received, and the CIP project is opened, the sponsoring entity will request and assign a Real Property Unique Identifier (RPUID). This RPUID is recorded in the RP Registry. When the construction is complete and the property is accepted, this RPUID will be assigned to receive the new RP on the property book.

Add a Real Property

Overview

The Real Property Add process provides the ability to create a new Real Property record. The Add process starts with the Receipt type action.
There are two types of Receipts to add a real property:

- **INPR** — New Procurement
- **ITRO** — Transfer In – Outside ELMS

Update a Real Property

Overview

The Real Property Update process allows editing of a Real Property record.
There are three types of actions available:

- **CNPR** — New Procurement — Price Correction
  — requires the Basic Tab only
- **INPR** — New Procurement — Update
  — requires all 13 Tabs
- **RNPR** — New Procurement — Price Revaluation
  — requires the Basic Tab only

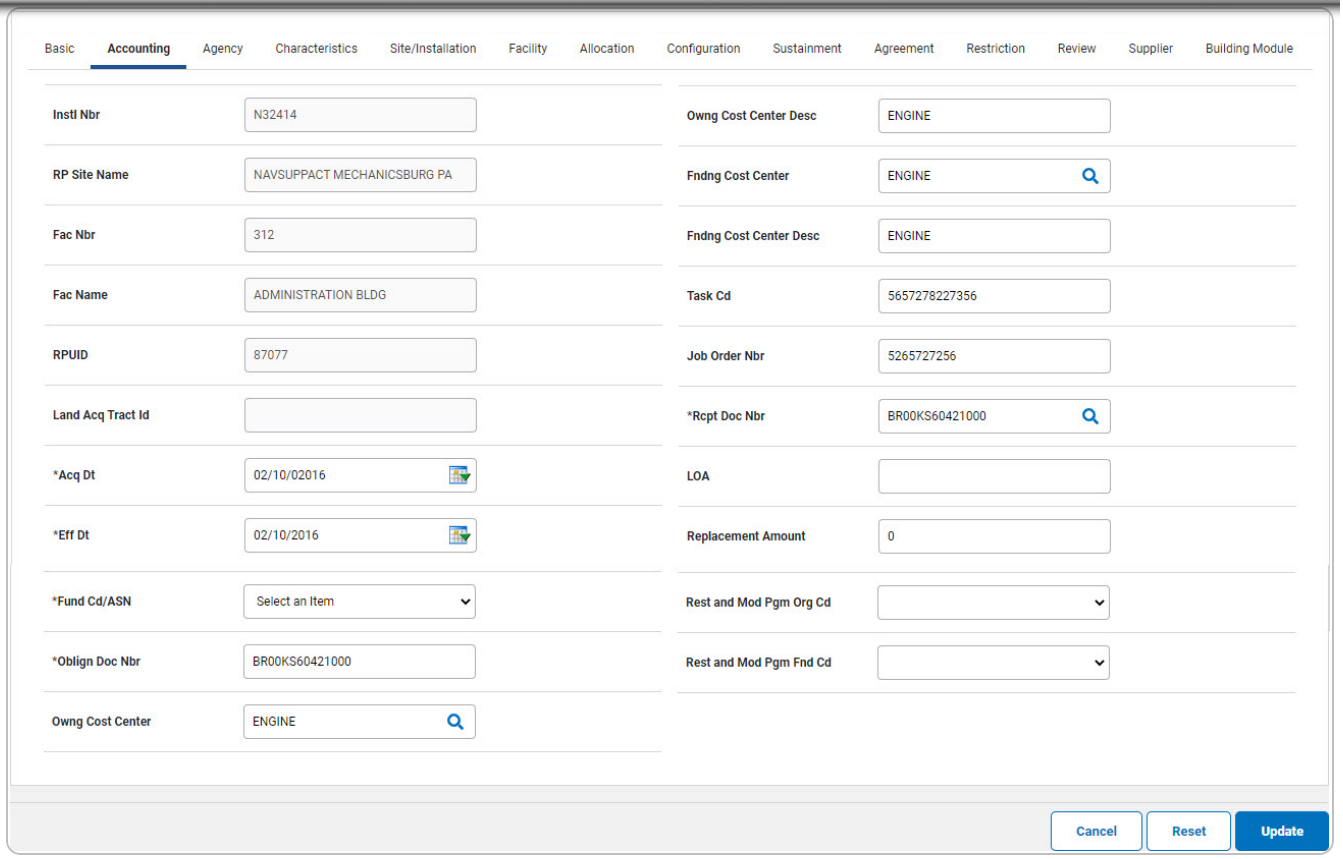
AA. Update the Remarks, entering the revised comments in the field provided. *This is a 256 alphanumeric character field.*

AB. Enter any additional History Remarks in the field provided. *This is a 256 alphanumeric character field.*



AC. Select Add Attachment. *The **Attachment Add** page appears.*

AD. *View any attachments as thumbnails in the Attachments field.*

AE. Select Update. *The **Real Property Transaction Status** page appears.*

OR

Select Accounting. Update the fields on the Accounting tab:

a. *Verify the INSTL NBR.*

b. *Verify the RP SITE NAME.*

c. *Verify the FAC NBR.*

d. *Verify the FAC NAME.*

e. *Verify the RPUID.*

f. *Verify the LAND ACQ TRACT ID.*

g. Update the ACQ DT, using or entering the date (MM/DD/YYYY) in the field provided.

h. Update the EFF DT, using or entering the date (MM/DD/YYYY) in the field provided.

i. Update the Fund Cd/ASN, using to select the desired code.

j. Update the OBLIGN DOC NBR, entering the revised identification in the field provided. *This is a 15 alphanumeric character field.*

k. Update the OWNG COST CENTER, using to browse for the correct number. *This is a 11 alphanumeric character field.*

Cost Center Browse help

l. Update the OWNG COST CENTER DESC, entering the revised explanation in the field provided. *This is a 250 alphanumeric character field.*

m. Update the FNDNG COST CENTER, using to browse for the correct number. *This is a 11 alphanumeric character field.*

Cost Center Browse help

n. Update the FNDNG COST CENTER DESC, entering the revised explanation in the field provided. *This is a 250 alphanumeric character field.*

o. Update the TASK CD, entering the revised identification in the field provided. *This is a 25 alphanumeric character field.*

p. Update the JOB ORDER NBR, entering the revised identification in the field provided. *This is a 15 alphanumeric character field.*

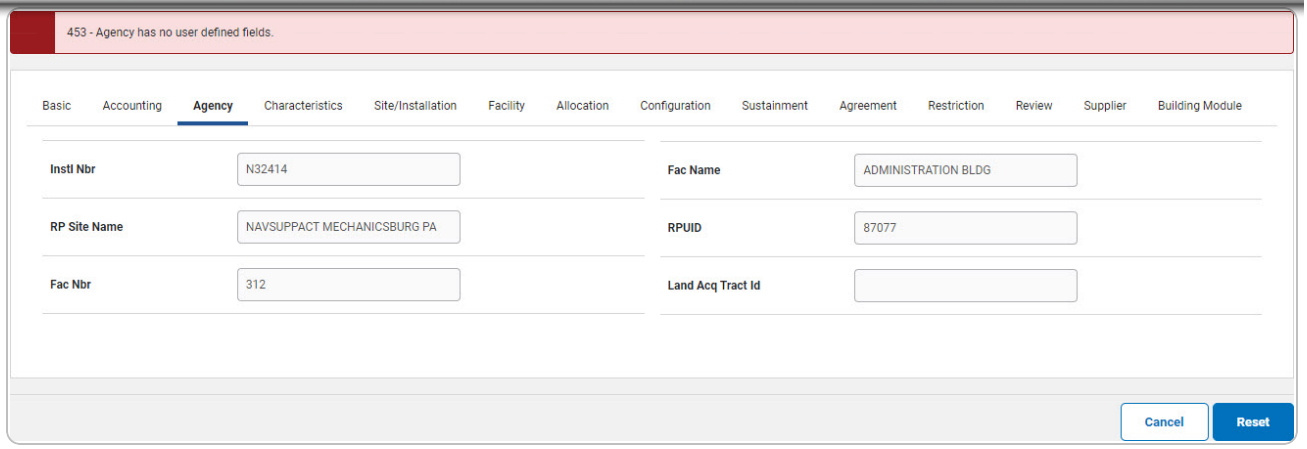
q. Update the RCPT DOC NBR, using to browse for the correct number. *This is a 14 alpha-numeric character field.*

Document Number Browse help

r. Update the LOA, using to browse for the correct number. *This is a 31 alphanumeric character field.*

Line of Accounting Browse help

s. Update the Replacement Amount, entering the revised amount in the field provided. *This is a 16 numeric character field.*



t. Update the Rest and Mod Pgm Org Cd, using to select the desired code.

u. Update the Rest and Mod Pgm Fnd Cd, using to select the desired code.

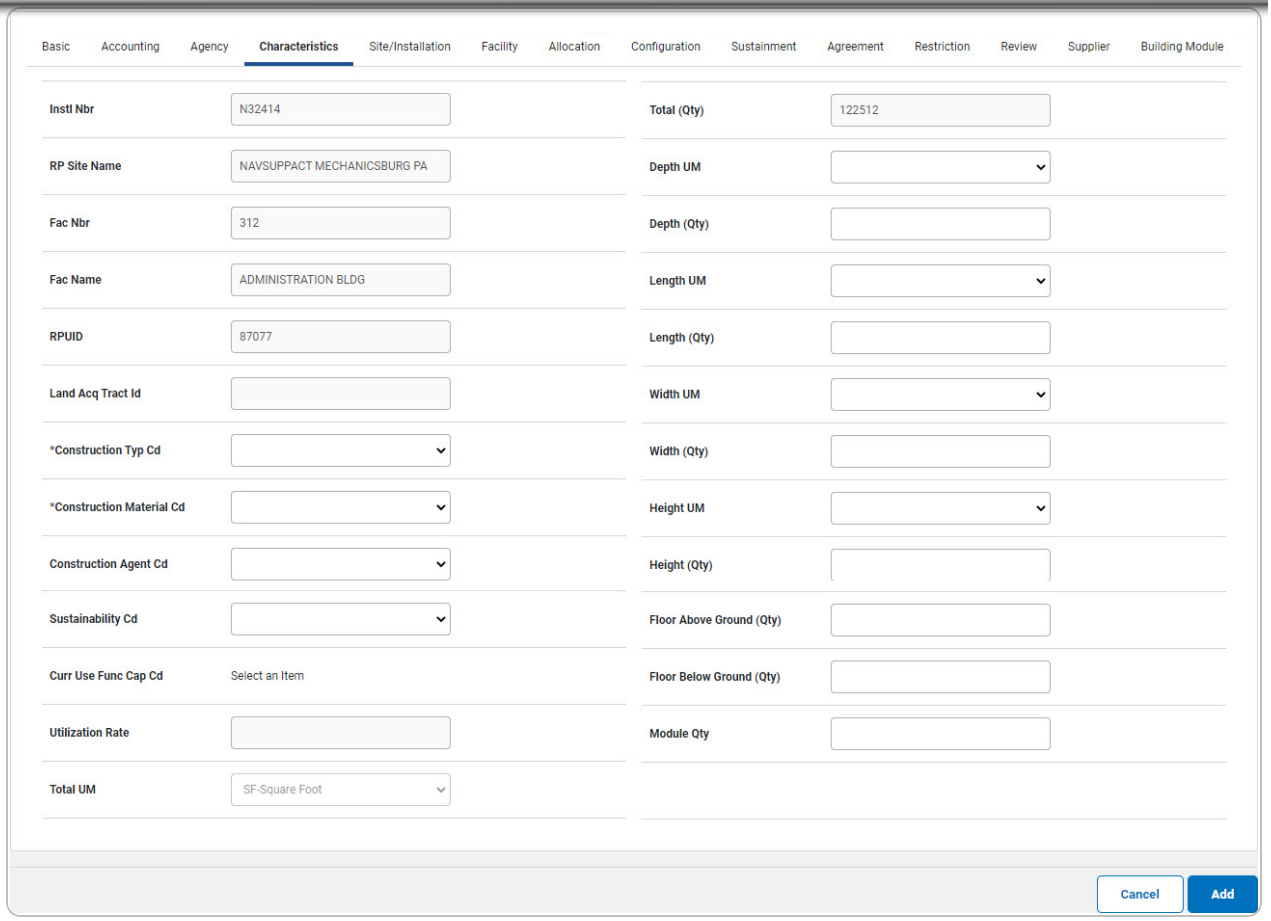
v. Select Update. *The **Real Property Transaction Status** page appears.*

OR

Select Agency. Review the fields on the Agency tab:

1. *Verify the INSTL NBR.*
2. *Verify the RP SITE NAME.*
3. *Verify the FAC NBR.*
4. *Verify the FAC NAME.*
5. *Verify the RPUID.*
6. *Verify the LAND ACQ TRACT ID.*

Note



The Agency tab is customer-specific. There are five fields available for the customer to show information.

ELMS does not contribute to the fields in this tab, nor store the information. It is simply a pass-through space.

7.

OR

Select Characteristics. Update the fields on the Characteristics tab:

A. *Verify the INSTL NBR.*

B. *Verify the RP SITE NAME.*

C. *Verify the FAC NBR.*

D. *Verify the FAC NAME.*

E. *Verify the RPUID.*

F. *Verify the LAND ACQ TRACT ID.*

G. Update the Construction Typ Cd, using ⌄ to select the desired code.

H. Update the Construction Materiel Cd, using ⌄ to select the desired code.

I. Update the Construction Agent Cd, using ⌄ to select the desired code.

J. Update the Sustainability Cd, using ⌄ to select the desired code.

K. *Verify the CURR USE FUNC CAP CD.*

L. *Verify the Utilization Rate.*

M. *Verify the Total UM.*

N. *Verify the Total QTY.*

O. Update the Depth UM, using ⌄ to select the desired units.

P. Update the Depth (QTY), entering the revised amount in the field provided. *This is a 3 numeric character field.*

Q. Update the Length UM, using ⌄ to select the desired units.

R. Enter the Length (QTY), entering the revised amount in the field provided. *This is a 8 numeric character field.*

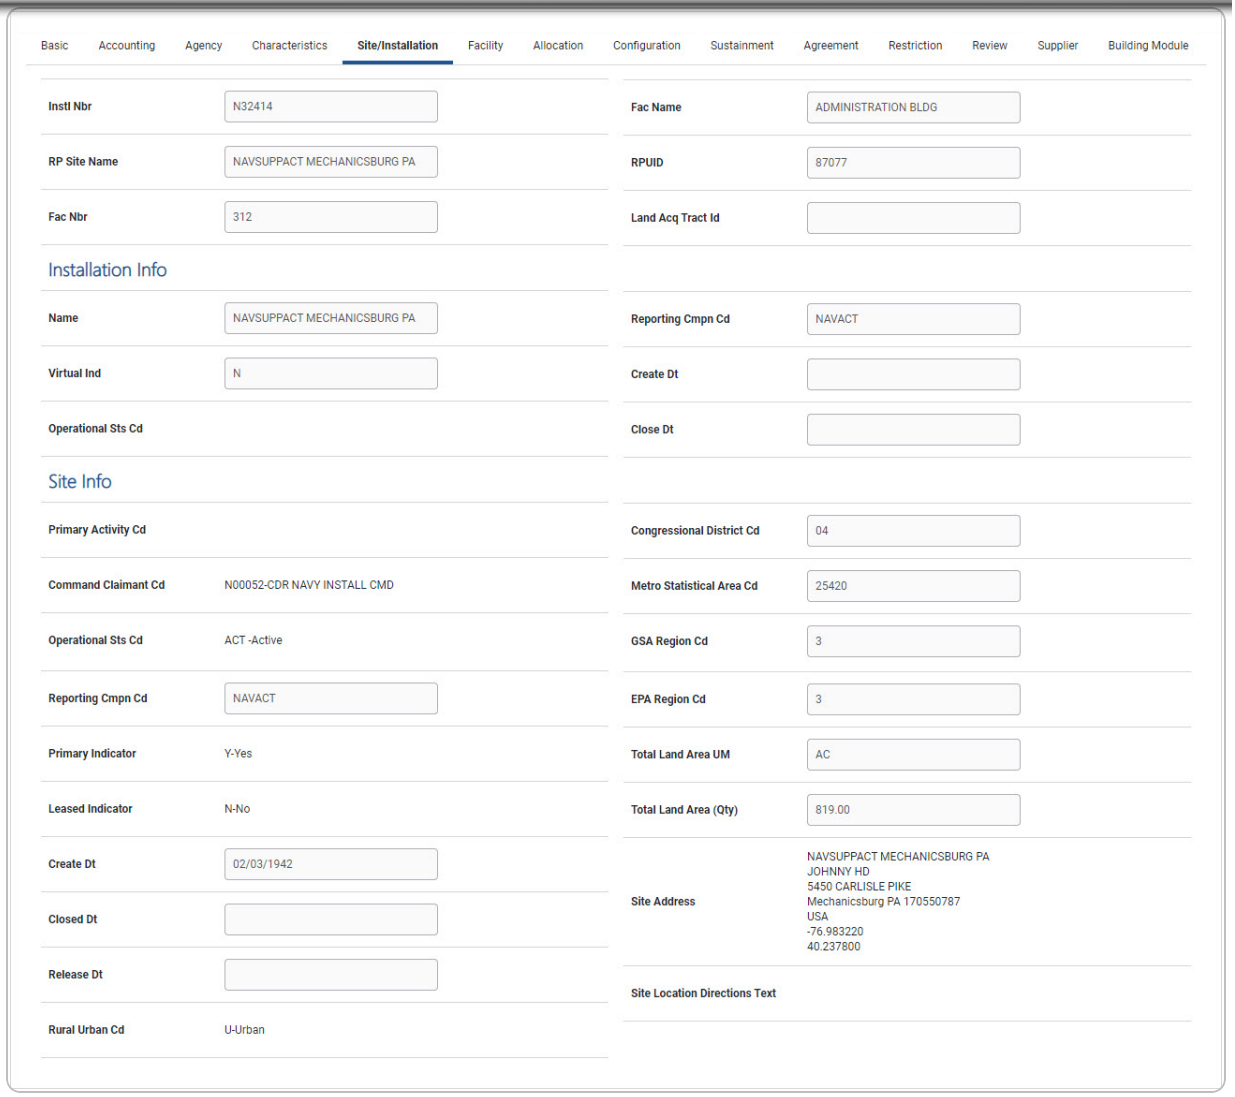
S. Update the Width UM, using ⌄ to select the desired units.

T. Enter the Width (QTY), entering the revised amount in the field provided. *This is a 8 numeric character field.*

U. Update the Height UM, using ⌄ to select the desired units.

V. Enter the Height (QTY), entering the revised amount in the field provided. *This is a 8 numeric character field.*

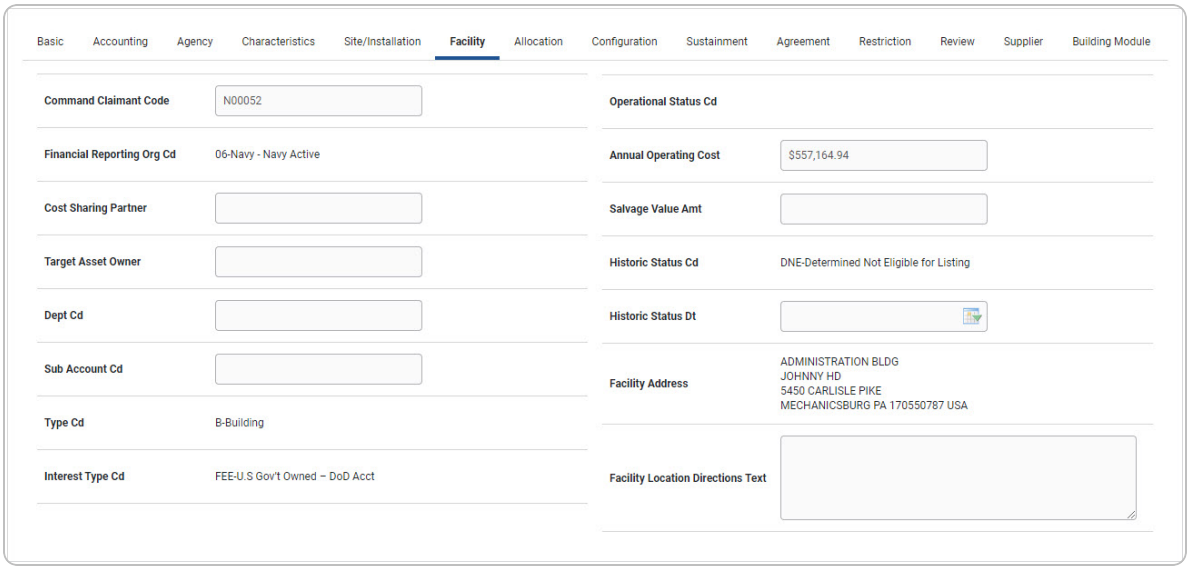
W. Update the Floor Above Ground (QTY), entering the revised amount in the field provided. *This is a 3 numeric character field.*



X. Update the Floor Below Ground (QTY), entering the revised amount in the field provided. *This is a 2 numeric character field.*

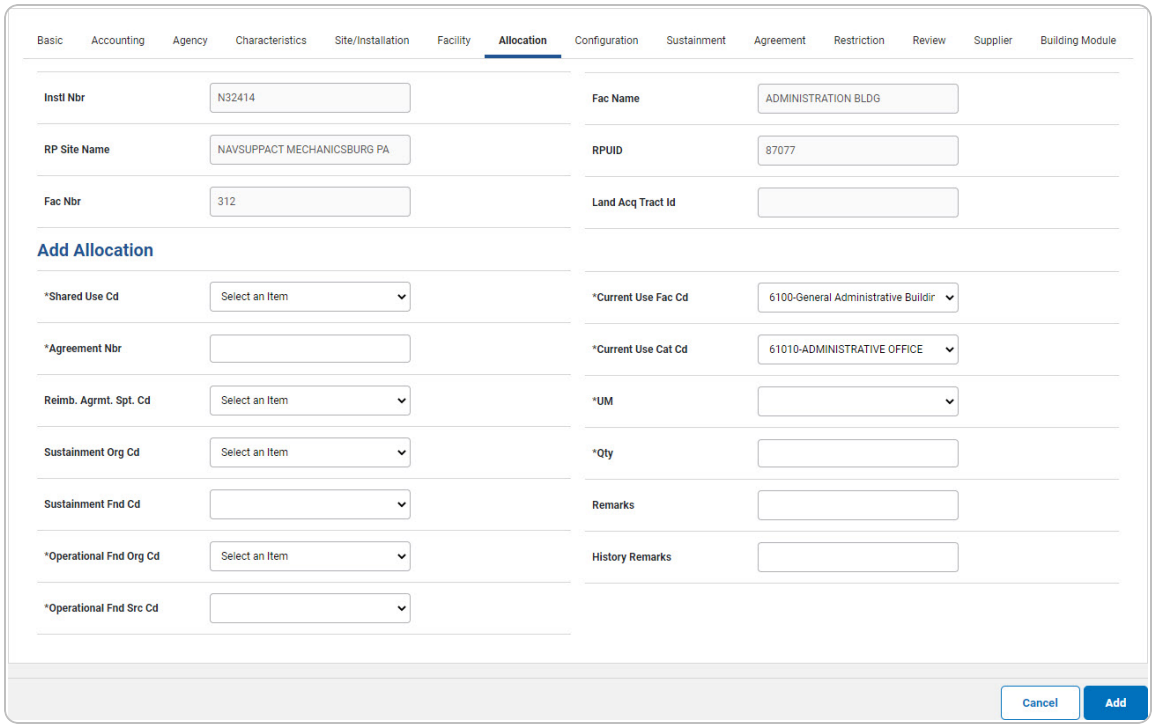
Y. Update the Module QTY, entering the revised amount in the field provided. *This is a 3 numeric character field.*

Z. Select Update. *The **Real Property Transaction Status** page appears.*



OR

Select Site/Installation. Review the fields on the Site/Installation tab:



a. *Verify the INSTL NBR.*
b. *Verify the RP SITE NAME.*
c. *Verify the FAC NBR.*
d. *Verify the FAC NAME.*
e. *Verify the RPUID.*
f. *Verify the LAND ACQ TRACT ID.*
g. *Verify the Name.*
h. *Verify the VIRTUAL IND.*
i. *Verify the Operational STS CD.*

j. *Verify the Reporting CMPN CD.*
k. *Verify the Primary Indicator.*

13. *Verify the Historic Status DT.*
14. *Verify the Facility Address.*
15. *Verify the Facility Location Directions Text.*
16. Select Allocation. Enter the fields on the Allocation tab:

A. *Verify the INSTL NBR.*
B. *Verify the RP SITE NAME.*
C. *Verify the FAC NBR.*

D. *Verify the FAC NAME.*

E. *Verify the RPUID.*

F. *Verify the LAND ACQ TRACT ID.*

G. Use ⌄ to select the Shared Use Cd.

H. Enter the Agreement NBR in the field provided. *This is a 25 numeric character field.*

I. Use ⌄ to select the Reimb. Agrmt. Spt. Cd.

J. Use ⌄ to select the Sustainment Org Cd.

K. Use ⌄ to select the Sustainment Fnd Cd.

L. Use ⌄ to select the Operational Fnd Org Cd.

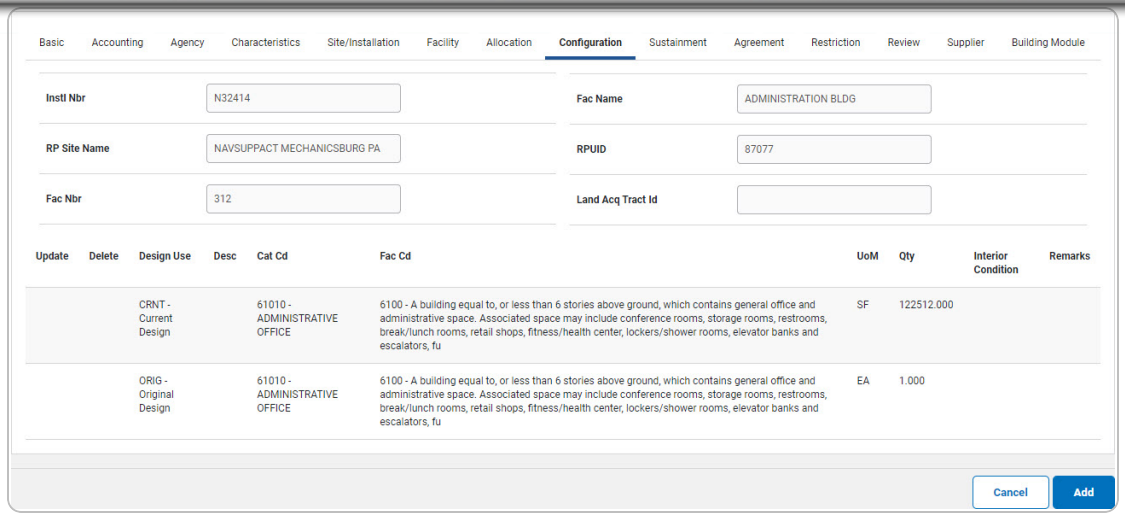
M. Use ⌄ to select the Operational Fnd Src Cd.

N. Use ⌄ to select the Current Use Fac Cd.

O. Use ⌄ to select the Current Use Cat Cd.

P. Use ⌄ to select the UM.

Q. Enter the QTY in the field provided. *This is a 6 numeric character field.*



R. Enter any additional information in the Remarks field. *This is a 256 alphanumeric character field.*

S. Enter any History Remarks in the field provided. *This is a 256 alphanumeric character field.*

T. Select Add. *The **Real Property Transaction Status** page appears.*

OR

Select Configuration. Verify the fields on the Configuration tab:

a. *Verify the INSTL NBR.*

b. *Verify the RP SITE NAME.*

c. *Verify the FAC NBR.*

d. *Verify the FAC NAME.*

e. *Verify the RPUID.*

f. *Verify the LAND ACQ TRACT ID.*

g. Select the desired Update hyperlink. *The Configuration Update page appears.*

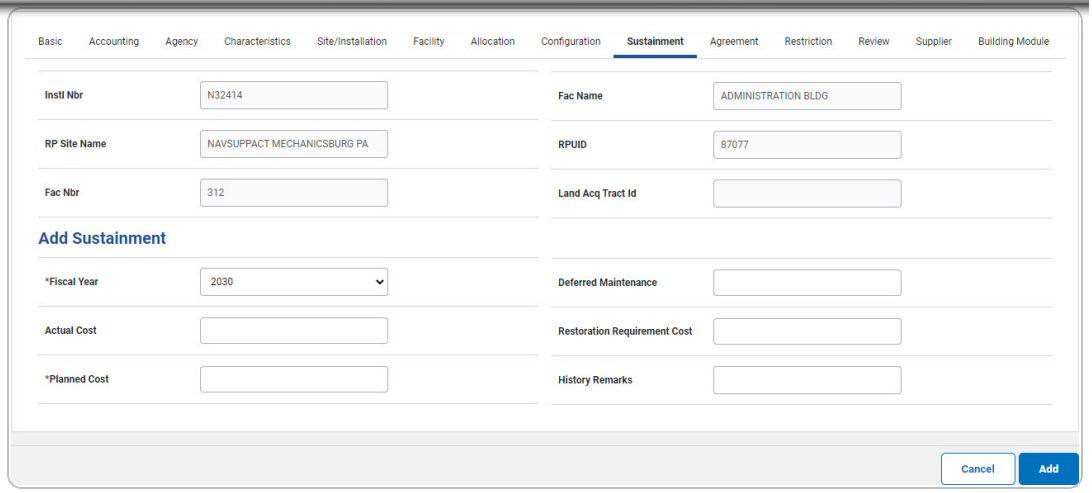
h. Select the desired Delete hyperlink. *The Configuration Update page appears.*

i. *Verify the Design Use.*

j. *Verify the CAT CD.*

k. *Verify the FAC CD.*

l. *Verify the UOM.*



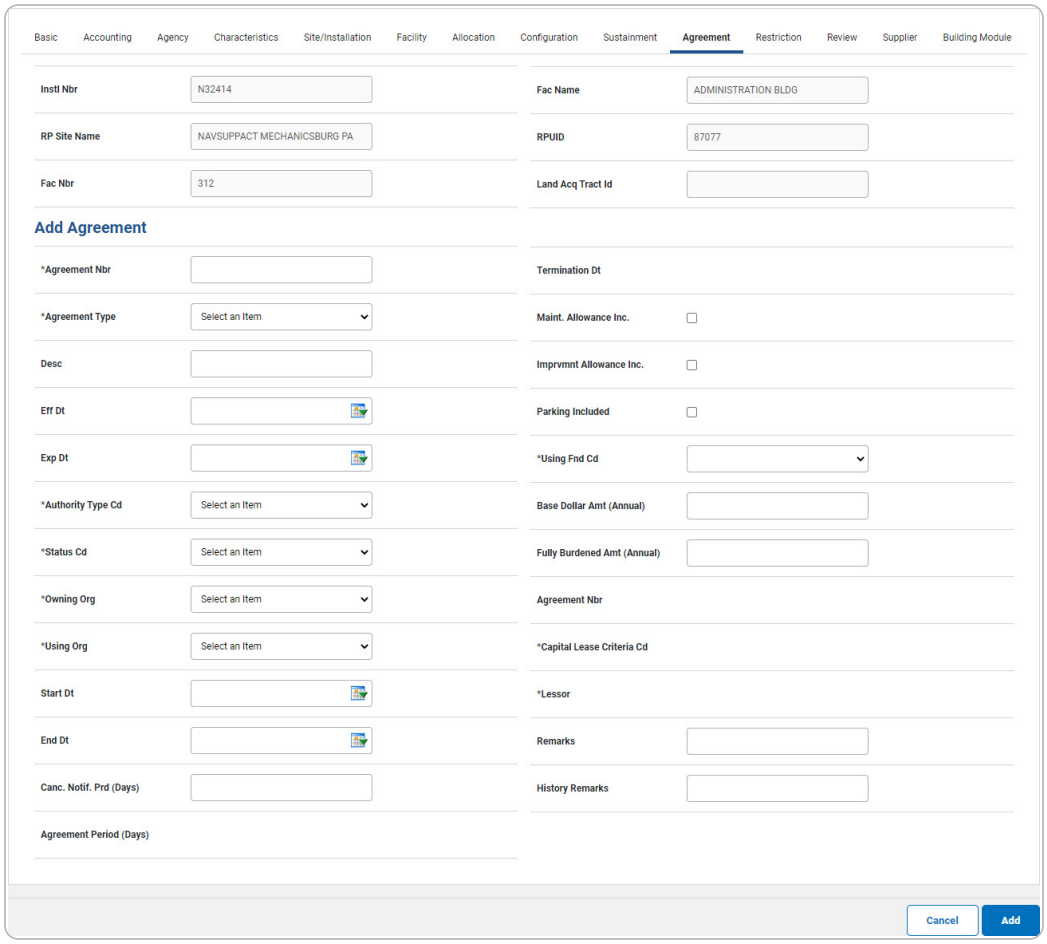
m. *Verify the QTY.*

n. *Verify the Remarks.*

o. Select Add. *The **Real Property Transaction Status** page appears.*

OR

Select Sustainment. Enter the fields on the Sustainment tab.



1. *Verify the INSTL NBR.*
2. *Verify the RP SITE NAME.*
3. *Verify the FAC NBR.*
4. *Verify the FAC NAME.*
5. *Verify the RPUID.*
6. *Verify the LAND ACQ TRACT ID.*
7. Use ⌄ to select the Fiscal Year.
8. Enter the Actual Cost in the field provided. *This is a 12 numeric character field.*
9. Enter the Planned Cost in the field provided. *This is a 12 numeric character field.*
10. Enter the Deferred Maintenance in the field provided. *This is a 12 numeric character field.*
11. Enter the Restoration Requirement Cost in the field provided. *This is a 12 numeric character field.*
12. Enter any History Remarks in the field provided. *This is a 256 alpha-numeric character field.*

    Select Add. *The **Real Property Transaction Status** page appears.*
13.

OR

Select Agreement. Enter the fields on the Agreement tab:

A. *Verify the INSTL NBR.*

B. *Verify the RP SITE NAME.*

C. *Verify the FAC NBR.*

D. *Verify the FAC NAME.*

E. *Verify the RPUID.*

F. *Verify the LAND ACQ TRACT ID.*

G. Enter the Agreement NBR in the field provided. *This is a 25 numeric character field.*

H. Use ⌄ to select the Agreement Type.

I. Enter the DESC in the field provided. *This is a 250 alphanumeric character field.*

J. Use  to select the EFF DT, or enter the date (MM/DD/YYYY) in the field provided.

K. Use  to select the EXP DT, or enter the date (MM/DD/YYYY) in the field provided.

L. Use  to select the Authority Type Cd.

M. Use  to select the Status Cd.

N. Use  to select the Owning Org.

O. Use  to select the Using Org.

P. Use  to select the START DT, or enter the date (MM/DD/YYYY) in the field provided.

Q. Use  to select the END DT, or enter the date (MM/DD/YYYY) in the field provided.

R. Enter the CANC NOTIF PRD (DAYS) in the field provided. *This is a 3 numeric character field.*

S. *Verify the Agreement Period (Days).*

T. *Verify the Termination DT.*

U. Click  to select the MAINT ALLOWANCE INC. *This indicates that the Grantee of the asset has responsibility for maintaining it.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
13 — Mandatory Entry: *ACC*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Acquisition Method Cd*.	
13 — Mandatory Entry: *Acquisition Org Cd*.	
13 — Mandatory Entry: *Acquisition Fund Source Cd*.	

13 — Mandatory Entry: *Asset Cd*.	
13 — Mandatory Entry: *Cptl Cd*.	
13 — Mandatory Entry: *Heritage Asset Cd*.	
13 — Mandatory Entry: *Mfr Yr*.	
13 — Mandatory Entry: *Replacement Org Cd*.	
13 — Mandatory Entry: *Using Fund Code*.	
13 — Mandatory Entry: *Yr Svc Life*.	
92 — Entry must be numeric.	Invalid Entry. The characters entered in the field include letters. Enter numeric (“0” through “9”) characters.
219 — Capital Threshold criteria does not exist.	Missing Entry. The Basic Tab is completed, but the mandatory fields from the other tabs are still empty. Enter the information from the other tabs, then select Add.

453 — Agency has no user defined fields.	Empty tab. The Agency tab is customer-specific, and currently has no available fields. Select the Characteristics tab to continue.
194 — Entry must be > zero.	Missing Entry. The field must be a positive number. Enter the missing field.
44 — Input date must be <= system date.	Invalid Date Entry. The system date (Today's Date) must be after or the same as the Input date. Re—enter the date.
xxxx — Planned Cost requires two decimal places.	Invalid Cost Entry. The Planned Cost must have two decimal places (0.00). Re—enter the Planned Cost.
xxxx — This screen is only editable when the Asset Code is set to 'B'.	Invalid Entry. The current screen is not editable because the Asset Code is not set to 'B'. Change the Asset Code and re—try the entry.

Dispose of a Real Property

Overview

The Real Property Disposition process allows removal of a real property through five different means:

- **DSPL** — Disposal
  — Write it off as disposed
- **DTNI** — Turn In
  — Exchanged for money inside ELMS
- **DTRO** — Transfer Out
  — Exchanged for money outside ELMS
- **DSAL** — Sales
  — Sold for money
- **DAAR** — AAR
  — Administrative Adjustment Report

Navigation

Transfer a Real Property

Overview

The Real Property Transfer process provides the ability to exchange ownership of a Real Property, either between two ELMS facilities, or between a ELMS facility and non-ELMS facility. There are two types of Transfers for a real property:

- **ITRI** — Transfer In
  — Within ELMS
- **DTRI** — Transfer Out
  — Within ELMS

Depreciation Scheduler

Overview

The Property Accountability module Depreciation Scheduler process provides the ability to schedule to process a depreciation on a regular basis, or submit a one-time request to have a depreciation run in the next batch cycle.

Navigation

Accounting > DEPRN SCHED > Depreciation Scheduler page

Page Fields

The following fields display on the **Depreciation Scheduler** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
237	Select the "Cost" Tab to continue updating cost data.
257	Select the "Next DEPRN DT" to schedule depreciation date.
258	Select "Schedule Time" 20 - 30 day to schedule depreciation by day.
259	Select "Last" to schedule depreciation the last day of the month.
260	Select "NA" to cancel depreciation for accessed ACTBL UIC.

261	Select "Manually Scheduled" to schedule depreciation any day of the month.
262	Select "One Report" to generate report by ACTBL UIC. Select "Individual UIC Reports" for individual UICs.

Depreciation Forecast Report Request

Overview

The Property Accountability module Depreciation Forecast Report Request process provides the ability to ask for the report either by ACTBL UIC or specific UIC.
There are five types of Depreciation Forecast Reports:

- Detail by Asset
- Summary by UIC and Office
- Summary by UIC and Type of Asset
- Summary by FUND CD / APPN
- Detail and Summary

The report is either Private or Shared, and is schedulable at any time, but only compiles on a monthly or quarterly basis and compute via a nightly batch request.

CIP Overview

Overview

Construction in Progress (CIP) is the temporary classification of assets that are not yet completed. It provides the ability to enter cost and other related data for CIP projects, including building construction, vehicle construction, and software development. This data allows tracking of costs prior to an asset (personal property, real property, and military equipment) being placed into service.
Before starting any CIP PROJECT, set up the following items:

- **Stock Number Catalog**
  — all applicable assets, such as components and end item
- **Manufacturer**
  — information for all applicable assets
- **POC Addresses**
  — everyone involved with this project

Before starting a Military Equipment project, set up these additional items:

- **Type Designation**
  — mandatory while setting up the Stock Number Catalog
- **ACQ PROGRAM NAME**
  — for the project and assets

Normally, upon completion, a CIP item is reclassified. The costs accumulated in the CIP account are used to support the initial acquisition cost of the asset and are recorded in the appropriate General Ledger Account Code (GLAC). The reclassified asset is capitalized and depreciated as appropriate.

Navigation

Accounting > CIP

Overall Flow

The CIP process has a very specific start and a very specific end. This overview contains all the CIP processes, but not all projects include every process.

1. **Project Setup**

CIP Project

- Select project type and category
- Assign project number
- Enter project data

2. **Monetary Setup**

CIP Cost

Manually enter project expenditure and quantity

CIP Funding

Manage quantity and appropriation information for the project

3. **Pending Asset or Improvement**

CIP Asset

Finalize and designate assets for receipt

4. **Confirm Data Integrity**

CIP Attestation

Periodic review and certification of assets and project financial information

Search for a CIP PROJECT — Criteria

Overview

The Property Accountability module Construction in Progress (CIP) Project process provides the ability to track the development of assets for eventual placement on the property book, or the improvement of assets currently on the property book.
There are three types of CIP PROJECTS:

- **Personal Property**
  — Tangible property, not including building(s) or land. (i.e. Equipment and IT systems).
- **Real Property**
  — Buildings, land, ground improvements and permanently installed fixtures contained by the property. (i.e. Buildings and sidewalks).
- **Military Equipment**
  — As defined by the Property and Equipment Policy Office, assets that can be used directly by the Armed Forces to carry out battle field missions.

The management of an activity performing a construction project is responsible for ensuring that all significant costs (that is, both funded and unfunded costs) are recorded for the project and that all costs subject to capitalization are included in the real property asset accounts, property records, and reports.

Note

The PRJ CATEGORY CD selected to Add a CIP PROJECT determines the tabs available.

Navigation

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Enter the Prj Nbr, or use to browse for the project. *This is a 20 alphanumeric character field.*

Project Number Browse help

2. Use ⌄ to select the desired Prj Type Cd.
3. Use ⌄ to select the desired Prj Category Cd.
4. Use ⌄ to select the desired Prj Status.
5. Use ⌄ to select the desired Acq Program Name.
6. Select Search. *The **CIP Project Search Results** page appears. Results display in the Search Results grid.*

Add a CIP Project

1. Enter the Prj Nbr, or use 🔍 to browse for the project. *This is a 20 alphanumeric character field.*

   Project Number Browse help

Note

Depending upon the PRJ TYPE CD, different fields are required.

2. Select Add. *The **CIP Project Add** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
387 — No records exist or unauthorized access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
13 — Mandatory Entry: *PRJ NBR*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *PRJ TYPE CD*.	
13 — Mandatory Entry: *PRJ CATEGORY CD*.	
383 — Project exists with this PRJ NBR, select "Search" to Update / Delete.	Invalid Entry. The PROJECT NBR entered already exists for this UIC. Check the information again, and re-enter the field.

381 — PRJ NBR contains invalid special characters.	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alpha-numeric (alphabetic "A" through "Z", numeric "0" through "9") characters, or the following per-mitted special characters: $, -, /, #, &, comma, period, and space. Special characters like ! or @ are prohibited.
xxxx — PRJ CATEGORY is not valid for the PRJ TYPE selected.	Invalid Entry. The PRJ CATEGORIES Real Property and Personal Property can only have a PRJ TYPE of Standard Project or Standard Improvement. Choose an approved PRJ TYPE.
72 — CIP record(s) exist for this UIC.	Invalid Entry. The PRJ NBR entered already exists. Check the PRJ NBR again, and re-enter the field.

Add a CIP Project

Overview

The Construction in Progress (CIP) Project Add process provides the ability to create a new CIP Project. The Project can either be brand new (for a building or vehicle that does not already exist), or a new improvement (for an existing building or vehicle).
Before starting any CIP Project, set up the following items:

- **Stock Number Catalog**
  — all applicable assets, such as components and end item
- **Manufacturer**
  — information for all applicable assets
- **POC Addresses**
  — personnel involved with this project

Before starting a Military Equipment project, set up these additional items:

- **Type Designation**
  — mandatory while setting up the Stock Number Catalog
- **Acq Program Name**
  — for the project and assets

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
387 — No records exist or unauthorized access.	Results for the search criteria entered do not exist; Incorrect security access. Enter different search criteria.
13 — Mandatory Entry: *ACC*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Asset Cd*.	
13 — Mandatory Entry: *Prj Desc*.	
13 — Mandatory Entry: *Type Action*.	
13 — Mandatory Entry: *Fund Cd/ASN* .	
13 — Mandatory Entry: *Doc Nbr* .	
13 — Mandatory Entry: *Asset Cd* .	

2061 — Invalid Entry: *PRJ DESC*	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alpha-numeric (alphabetic "A" through "Z", numeric "0" through "9") characters, or the following per-mitted special characters: $, -, /, #, &, comma, period, and space. Special characters like ! or @ are prohibited.
895 — Date entered must be >= System Date.	Invalid Date Entry. The date must be either the system (current) date or later. Re-enter the date.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date.

Update a CIP Project

Overview

The Construction in Progress (CIP) Project Update process allows editing of an existing CIP Project.

Navigation

Accounting > CIP > Project > Search Criteria > Search > Search Results > Update hyperlink > CIP Project Update page

Page Fields

The following fields display on the **CIP Project Update** page. For more information on each field, select the appropriate hyperlink.

Instructions

The tables below provide the list of instructions.

Project Tab

Number	Value
24	(*) Asterisk identifies mandatory fields.
14	Select "Cancel" button to return to previous page.

Accounting Tab

Number	Value
13	Select "Reset" button to clear data.

xxxx	Select "Update" button to revise selected fields in record(s).
14	Select "Cancel" button to return to previous page.

Search for a CIP Cost — Criteria

Overview

The Property Accountability module Construction in Progress (CIP) Costs process provides the ability to enter costs and other financial information for CIP Projects. CIP Costs tracks the costs prior to an asset (Personal Property, Real Property, or Military Equipment) being placed into service. The costs enter the system:

- Automatically, based on feeds like Business Enterprise Information Services (BEIS).
- Manually, supported by the appropriate documentation for audit purposes.

Navigation

Accounting > CIP > Cost > CIP Cost Search Criteria page

&Add a CIP Asset

Overview

The Construction In Progress (CIP) Add process provides the ability to create a new CIP Asset. This represents a 'due in' to be received on the Property Book of Record.

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Navigation

Accounting > CIP > Asset > Search Criteria > Add > CIP Asset Add page

Page Fields

The following fields display on the **CIP Asset Add** page. For more information on each field, select the appropriate hyperlink.

Instructions

The tables below provides the list of instructions.

Personal Property And Military Equipment

Number	Value
24	(*) Asterisk identifies mandatory fields.
196	To update / correct grid data, select "Edit", then select "Update" to repopulate grid.

195	Enter mandatory data, then select "Save" to populate grid.
134	Valid special characters for SERIAL NBR are: "/", "-", ":", "$", "#", and space.
198	When complete select "Add" to process single and / or multiple records.
243	Maximum of 50 Assets / Improvements can be added at a time.
13	Select "Reset" button to clear data.
14	Select "Cancel" button to return to previous page.

Real Property

Number	Value

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
387 — No records exist or unauthorized access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
13 — Mandatory Entry: *DOC NBR*.	Missing Entry. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *ITEM DESC*.	
13 — Mandatory Entry: *SERIAL NBR*.	

350 — Must be alpha-numeric with supported special characters $, — , /, #, &, comma, period, and space.	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alphanumeric (alphabetic "A" through "Z", numeric "0" through "9") characters, or the following permitted special characters: $, —, /, #, &, ;, comma, period, and space. Special characters like ! or @ are prohibited.
195 — SERIAL NBR contains invalid special characters.	Invalid Entry. The field must have alphanumeric (alphabetic "A" through "Z", numeric "0" through "9") characters only. Re-enter the Serial Number.
255 — ASSET ID / SERIAL NBR already exists in grid.	Invalid Entry. The item entered already exists in the CIP PROJECT. Re-enter the ASSET ID or SERIAL NBR.
194 — Entry must be > zero.	Invalid Entry. The field must be a positive number. Enter the missing field.
xxxx — Cannot add assets. Funded quantity fulfilled.	Invalid Entry. The CIP PROJECT entered has no more money allocated for assets. Check the PROJECT NBR again, or choose a CIP PROJECT that still has funding available for assets.
xxxx — Assets can only be added 50 at a time.	Invalid Entries. The amount of added Assets per CIP PROJECT must not be more than 50. Reduce the number of entries and select Save.

Update a CIP Asset

Overview

The Construction In Progress (CIP) Asset Update process allows editing of an asset within a CIP Project.

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Navigation

Accounting > CIP > Asset > Search Criteria > Search > Search Results > Update hyperlink > CIP Asset Update page

Page Fields

The following fields display on the **CIP Asset Update** page. For more information on each field, select the appropriate hyperlink.

Search for a CIP FUNDING Record — Criteria

Overview

The Property Accountability module Construction in Progress (CIP) Funding process provides the ability to create, update, or delete a funding record associated with an existing CIP PROJECT.
When the CIP PROJECT's Valuation method is "F" (Average Funding), the funding record determines asset values. When the Valuation method is "C" (Average Cost), the Quantity Funded determines the cost averaging.

Note

Multiple funding records can exist for specific project categories, as long as the funding source and fiscal year are not duplicated.

Navigation

Accounting > CIP > Funding > CIP FUNDING Search Criteria page

Page Fields

The following fields display on the **CIP FUNDING Search Criteria** page. For more information on each field, select the appropriate hyperlink.

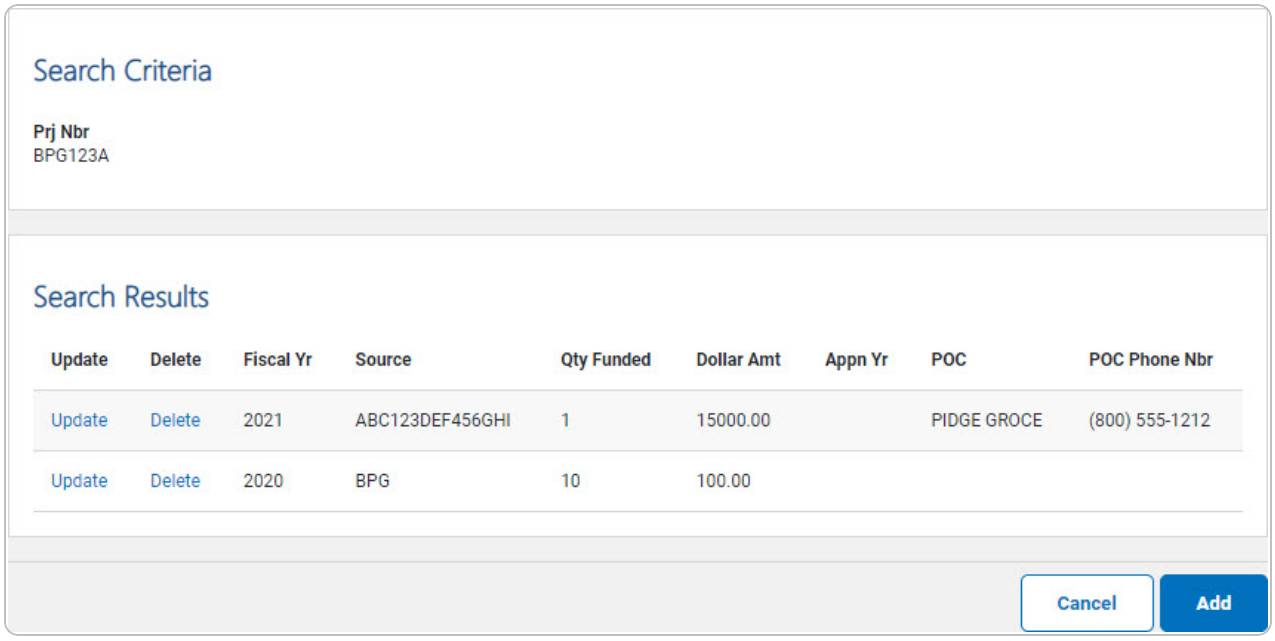
Search for a CIP FUNDING

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*



1. Enter the PRJ NBR, or use to browse for the project. *This is a 20 alphanumeric character field.*

   Project Number Browse help

2. Select Search. *The **CIP Funding Search Results** page appears. Results display in the*

Search Results grid.

Add a CIP Funding

Select Add. *The **CIP Funding Add** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
387 — No records exist or unauthorized access.	Results for the search criteria entered do not exist; Incorrect security access. Enter different search criteria.
13 — Mandatory Entry: *Prj Nbr*.	Missing Entry. Enter the appropriate information in the desired field.

386 — Project Number does not exist on CIP table.	Invalid Entry. The PROJECT NBR entered is either closed or does not exist in this Property Book. Review the PROJECT NBR again, and re—enter or create a new CIP PROJECT NBR.
479 — Funding already exists for project. Single Asset projects can have only one funding record.	Invalid Entry. The CIP PROJECT NBR entered already has a CIP FUNDING record. Check the PRJ NBR again, and re-enter the field.
483 — Funding already exists for project. Projects with Average Cost valuation can have only one funding record.	
472 — Project cannot be updated. An Attestation exists for the current quarter.	Invalid Entry. The CIP PROJECT NBR entered has been attested for this Quarter. Either enter a different PROJECT NBR, or delete the current attestation.
482 — Project is closed. Processing cannot continue.	Invalid Entry. The PRJ NBR entered is already closed. Check the PRJ NBR again, and re-enter the field.
381 — PRJ NBR contains invalid special characters.	Invalid Entry. The characters entered in the field include prohibited special characters. Enter alphanumeric (alphabetic "A" through "Z", numeric "0" through "9") characters, or the following permitted special characters: $, -, /, #, &, comma, period, and space. Special characters

	like ! or @ are prohibited.

Search for a CIP ATTESTATION — Criteria

Overview

The Property Accountability module Construction in Progress (CIP) Attestation process provides the ability to review the Asset data and Point of Contact (POC) information for each current CIP PROJECT. It is mandatory for Military Projects, and optional for other CIP PROJECTs. The CIP ATTESTATION process locks the CIP PROJECT from further updates until the attestation is manually deleted, or it is automatically unlocked at the beginning of the following quarter.
There are two types of CIP ATTESTATION:

- **Quarterly Asset Attestation** — Each Quarter, every Program Management Office (PMO) reviews the asset data and POC information for its current CIP PROJECT. The PMO electronically attests (vouches, swears) that the CIP PROJECT is current and correct as of the end of the quarter.
- **Yearly Fiduciary Attestation** — Each year-end close, *in addition to a Quarterly Attestation*, every PMO electronically attests (vouches, swears) that each program (which contains one or more CIP PROJECTs) is complete and accurate for the Fiscal Year. The executive in charge of the PMO then attests to the completeness of all the programs under their jurisdiction to the Property and Equipment Policy Office.

Navigation

Search for an Authorization — Criteria

Overview

The Property Accountability module Authorization process provides the ability to add, update and delete assets to authorizations and to provide a link between the on-hand item and the authorization for the item.
An authorization, while optional, must be built for each asset. It can be built against an existing Line Item Number (LIN) or a Stock Number. An authorization consists of a Master Authorization record and a Detail Authorization record.

The Master record contains:

- Unit Identification Code (UIC)
- Paragraph Number (PARA NBR)
- Line Item Number/Table of Authorized Materiel Control Number (LIN/TAMCN)

The Detail record contains:

- Property Type Code (PROP TYPE CD)
- Table of Distribution and Allowances (TDA) Remarks
- Authorization Document Number (AUTHN DOC NBR)
- Interface System Code (INTRF SYS CD)
- Effective Date (EFF DT)
- Expiration Date (EXPR DT)
- Required Quantity (REQ QTY)
- Authorized Quantity (AUT QTY)
- Remarks

The Interface System Code on the Detail Authorization Record identifies any authorization records which interface to ELMS from an external system.

Navigation

Search for a Type Designation Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

A. Use to select the Available Field.

B. Repeat Step A to add additional search criteria.

Note

Adding another Available Field automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use to select the first Operands.

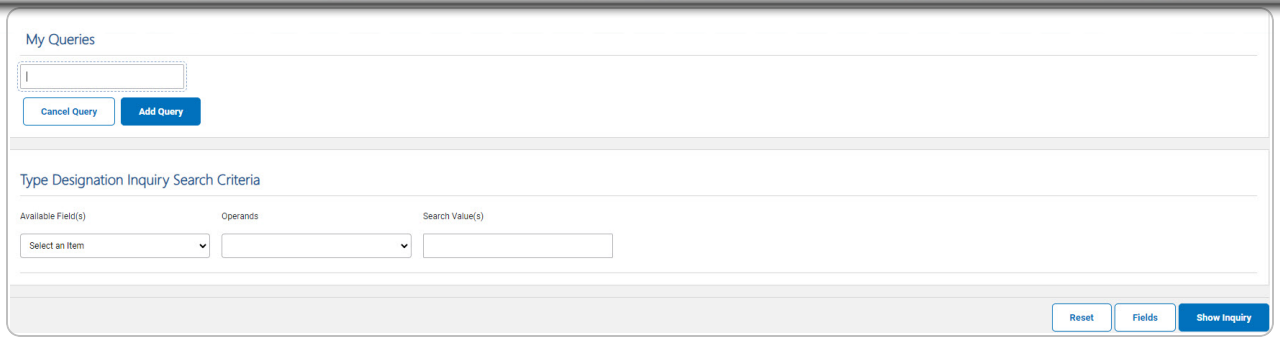
B. Repeat Step B to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use to select the first Search Value.

B. Repeat Step B to add additional search criteria.

Remove an Available Field Row



a. Use to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Type Designation Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*

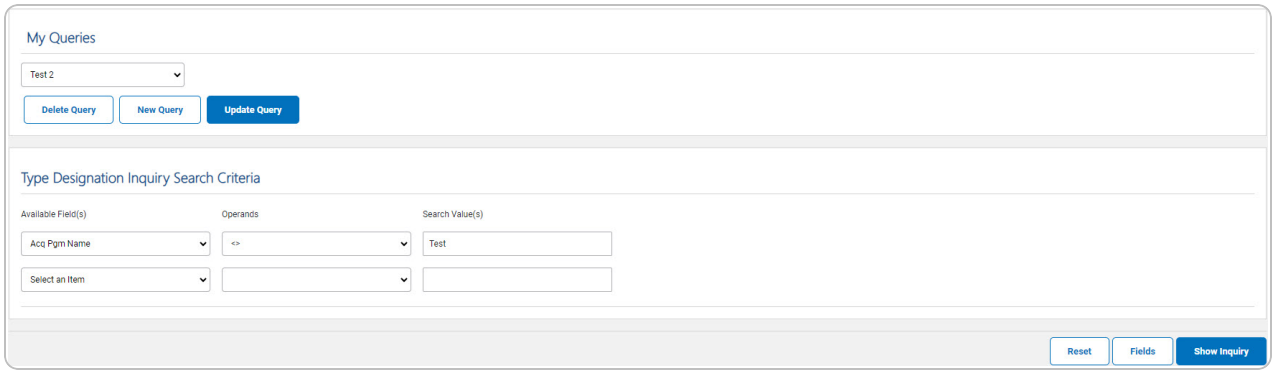
2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*
5. Select Fields. *The* ***Type Designation Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Type Designation Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



2. Select Fields. *The **Type Designation Inquiry — Select Fields** page appears.*

OR

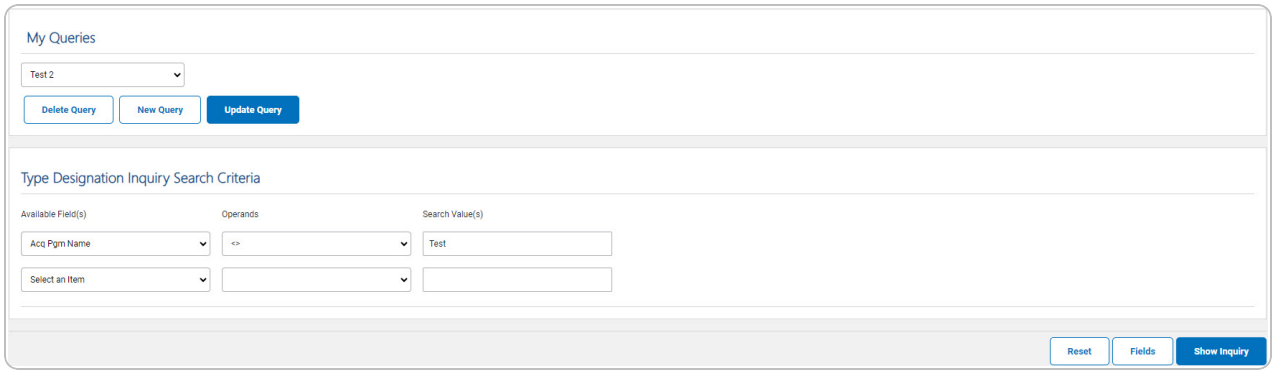
Select Show Inquiry. *The **Type Designation Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*



4. Select Fields. *The **Type Designation Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Type Designation Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and New Query is joined by Update Query and Delete Query. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*

3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Type Designation Inquiry — Select Fields** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..
13 — Mandatory Entry: *Available Field(s)*.	Missing Entry. No data was entered. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Operands*.	
13 — Mandatory Entry: *Query Name*.	
xxxx – Saved Inquiry already exists. Select Update Query **or** Delete Query **.**	Invalid Entry. The inquiry already exists in the database. Use the existing inquiry, or select Update Query to revise the existing query.
102 — Inquiry already exists.	Invalid entry. The Inquiry is already established. Re-enter the inquiry or select Update Query or Delete Query to modify the existing inquiry.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **Type Designation Inquiry Field Selection** page appears.*

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

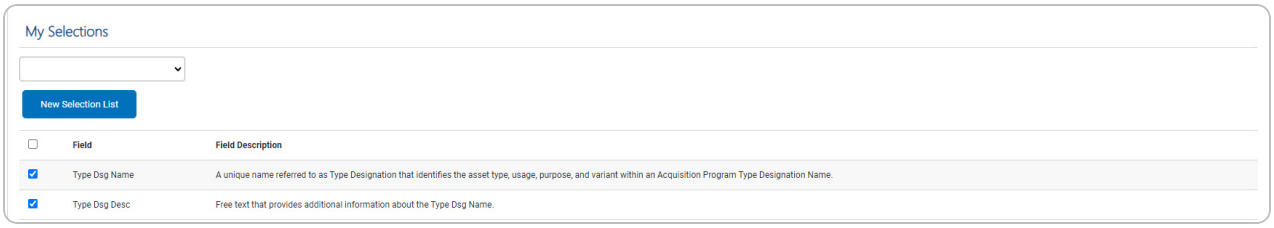
Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.



5. Select Show Inquiry for small volumes of data. *The* ***Type Designation Inquiry — Results*** *page appears.*

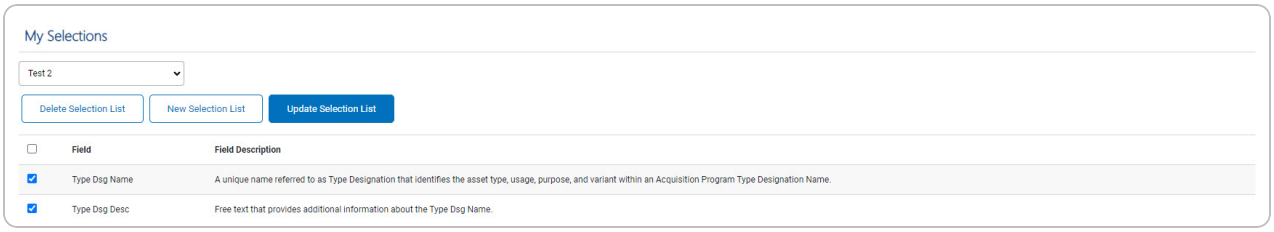
OR

Select Submit for large volumes of data. *The* ***Type Designation Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*



3. Select Show Inquiry for small volumes of data. *The **Type Designation Inquiry — Results** page appears.*

OR

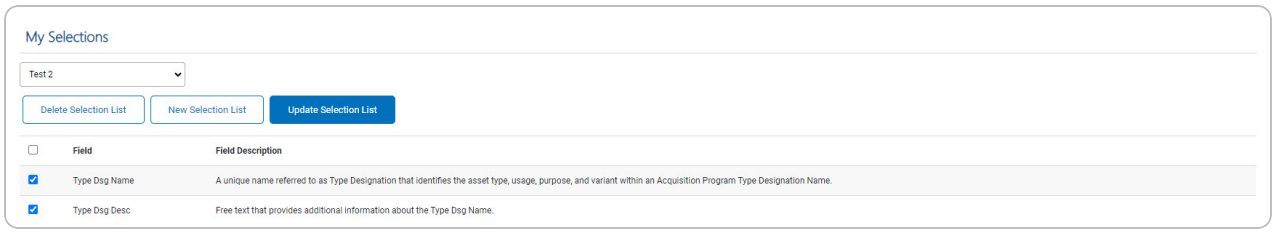
Select Submit for large volumes of data. *The **Type Designation Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*



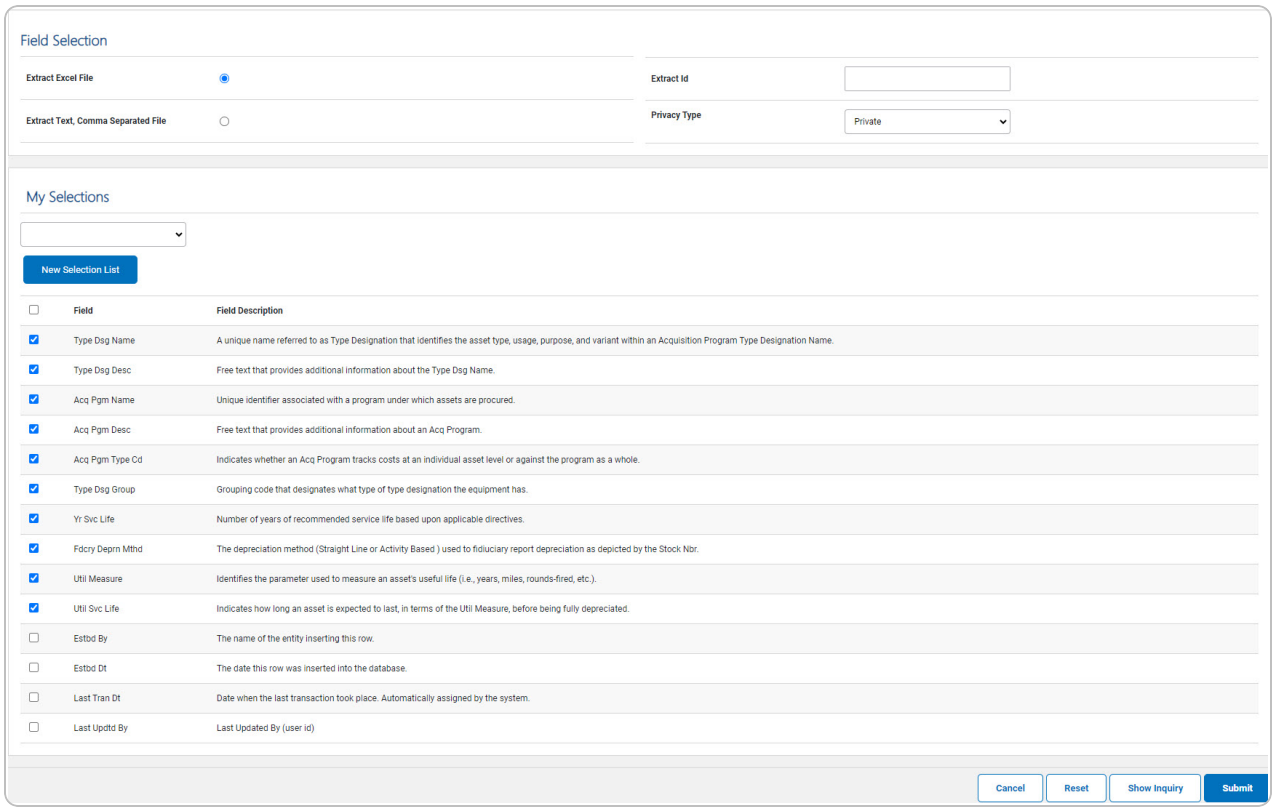
Select Show Inquiry for small volumes of data. *The **Type Designation Inquiry — Results** page appears.*

4. **OR**

Select Submit for large volumes of data. *The **Type Designation Inquiry Transaction Status** page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

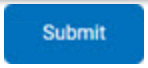
Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
***Bold** numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Type Designation Inquiry** page appears.*

2. Select the fields required for the inquiry. *The first 10 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.



- Verify the TYPE DSG NAME contains the appropriate ☑ or ☐. *Select if the inquiry contains a TYPE DSG NAME.*
- Verify the TYPE DSG DESC contains the appropriate ☑ or ☐. *Select if the inquiry contains a TYPE DSG DESC.*

Select Fields for the Asset Inquiry

Overview

The Asset Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > Asset Management > Asset > Search Criteria > Fields > Asset Inquiry Fields Selection page

Page Fields

The following fields display on the **Asset Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

191	Excel is the only reliable print format for this inquiry.
252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
xxxx	Where available, select "Row" to view details for specific record.
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.
290	Do not "Export" large volumes of data, select "Back" button then select "Submit" button on the Field Selection Page

New Selection List

	Field	Field Description
☑	Actbl UIC	Accountable Unit Identification Code - The UIC of the organization that is assigned management responsibility for property belonging to a specific unit organization, or activity. Multiple UICs may be grouped under an Accountable UIC to consolidate data for accountability and accounting system reporting purposes.
☑	Asset Id	Unique locally assigned code used for identification purposes.
☑	Asset Level Cd	A unique column that holds the code used by the lookup table which coincides with the associated description. Indicates if item is end item or component and if asset has lower level components.
☑	Custodian Nbr	One to six position code, locally assigned, used to identify an individual responsible for assigned assets.
☑	Expr Dt	The date the asset is no longer considered usable for its intended purpose, or the date the authority to operate the asset ends.
☑	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☑	Loc	Physical location of an asset.
☑	Non-Actbl	Non Accountable is displayed Yes or No.
☑	Lot Nbr	Manufacturer assigned number that identifies items produced on the same production run.
☑	Rcpt Doc Nbr	Doc Nbr used to receive asset
☑	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☑	Site Id	The active Site Id the user has access to.
☑	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☑	Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☑	Sub Loc	A more specific description of the physical location of an asset within its Location.
☑	Total Cost	Total Cost. Cost of individual end item assets including cost of stand-alone components
☑	UIC	The UIC of the maintenance activity assigned to service the asset.
☑	UIC Name	A unit, organization, or activity name
☑	User Id	Identifies the user accessing the system
☐	ACC-SFIS	Pos. 1-2 identifies the accounting class of assets. Remaining positions identify the SFIS code.
☐	Acct Rpt Nbr	Report number assigned when the accounting data is generated
☐	ACRN	Two position alpha or alpha/numeric code assigned to each discrete accounting classification citation within a contract.
☐	Agency Defined1	Agency set user defined function
☐	Agency Defined2	Agency set user defined function
☐	Agency Defined3	Agency set user defined function
☐	Agency Defined4	Agency set user defined function
☐	Agency Defined5	Agency set user defined function
☐	ARC	Designates an asset as expendable, non-expendable or durable.
☐	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Asset Pilferable	Asset Pilferable Flag. Yes or No
☐	Asset Sts Cd	Used to keep track of the status of an asset.

☐	CLIN	A four position field that identifies different contract line items within the same contract.
☐	Cntr/PO Nbr	Assigned by the procurement activity and used to identify requests for a supply purchase.
☐	Cond Cd	Used to classify material for degree of serviceability, condition, and completeness in terms of readiness for issue, and to identify actions underway to change status of materiel. This Field defaults to (A) but can be updated.
☐	Deprn AB Lst Rebsln	The activity based accumulated depreciation that has been incurred at the time the asset was last rebaselined.
☐	Deprn Cost Center	Cost Control Number/Office where the depreciation expense is charged.
☐	Deprn Cost Center Id	The date of this row's insertion into the database.
☐	Deprn AB Rebsln	The accumulated depreciation calculated using AB with rebaselining of the asset.
☐	Deprn Cd	Indicates whether the asset is a capital asset and if fiduciary reportable by DPAS. C – Capital/Non-Reportable, N – Non-Capital/Non-Reportable, T - Capital/Reportable.
☐	Deprn Job Order Nbr	Job order number where the depreciation expense is charged.
☐	Deprn Period Days	The number of days the asset is scheduled to be depreciated.
☐	Deprn Project Nbr	A number that identifies the Depreciation Project.
☐	Deprn SL Lst Rebsln	The straight line accumulated depreciation that has been incurred at the time the asset was last rebaslined.
☐	Deprn SL Rebsln	The accumulated depreciation calculated using SL with rebaselining of the asset.
☐	Deprn Task Cd	Task Code/Cost Acct Code/Organization Code where the depreciation expense is charged.
☐	Deprn Task Id	The interfacing accounting system's Row Key for the supplied Depreciation Task Cd
☐	Deprn Util Qty	The assets actual utilization when depreciation last ran.
☐	Deprn Util Svc Life	The assets planned utilization for depreciation purposes.
☐	Disposition Type Action Cd	Code signifying the type of disposition action
☐	Dmil Cd	The code that represents instructions for removal of functional or military characteristics of a materiel item.
☐	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☐	Dollar Amt	The dollar amount of construction in progress/work in process, real property or the dollar amount of the accounting transaction.
☐	Embedded Cost	Identifies the unit cost of a component as embedded in the total cost of the end item. Bulk component is automatically embedded.
☐	Excess Action Cd	Code which indicates the action being taken for the excess asset. Codes (E, P and I) are system generated. For code (W) (Withdraw), there is a Check Box used to withdraw previously reported excess asset.
☐	Excess Dt	Date an asset is documented as excess.
☐	Cntr Nbr	Unique value used to identify agreements with suppliers and contractors.
☐	Excess Type Action Cd	Excess Action type code which indicates the action being taken for the excess asset
☐	Fndng Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code
☐	FSC	Number which provides the capability to identify the Federal Supply Class that would be assigned to a nonstandard national stock number.
☐	Haz Mat Cd	Code identifying explosives and other dangerous articles which require special handling in shipment as freight.
☐	History Remarks	A text field available to record local information/reason for change to record.
☐	Inv User Id	Identifies the user who last inventoried this asset.

☐	Item Desc	The description of an asset. For an asset with a valid national stock number, Item Description field will be automatically filled with Approved Item Name from the Fed Log.
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Last Updtd By	Last updated by (user id)
☐	iRAPT/WAWF Details	Details of the iRAPT/WAWF Inbound processing, including: processing date; item unit price; contract identifier.
☐	iRAPT/WAWF Receipt	Identifies if asset originated as an iRAPT/WAWF transaction.
☐	iRAPT/WAWF Shipment Id	iRAPT/WAWF Inbound processing Shipment Identifier.
☐	Lease Cd	Indicates the lease status of a particular asset.
☐	Lease End Dt	The date the assets warranty, service or lease contract expires
☐	Lease Start Dt	The date the assets warranty, service or lease contract starts
☐	LIN/TAMCN - Authorization	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Nbrs.
☐	LIN/TAMCN - Catalog	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Numbers.
☐	LOA	Identifies the department code, period of availability, basic symbol, and subhead of the original appropriation.
☐	Loan Cd	Indicates the loan status of a particular asset.
☐	Loaning DODAAC/CAGE Cd	A code that identifies a Department of Defense Activity Address or a Commercial and Government Entity
☐	Loan End Dt	The date the assets warranty, service or loan contract expires
☐	Loan Notfy Cd	Identifies if loan is between a DPAS to DPAS Non-WAWF user, between a DPAS to Non-DPAS user or between a DPAS to DPAS WAWF user.
☐	Loan Rcvd By	The name of the entity that received the loan.
☐	Loan Rcvd Dt	The date the assets warranty, service, or loan has been received.
☐	Loan Start Dt	The date the assets warranty, service or loan contract starts
☐	Local Rcpt Dt	Date asset received
☐	Mfr Name	The full name of a specific manufacturer.
☐	Mfr Part Nbr	Number used to record the make or model of a specific piece of equipment.
☐	Mfr Yr	Year an asset was manufactured/built/improved.
☐	Major Cmd Task Id	Task Id number that is associated with a project that is distinct within the enterprise. Used with the DAI interface.
☐	Mfr Model Nbr	The specific number assigned to identify the make/model of an asset.
☐	Mode of Shipment	Identifies the method of shipment.
☐	Obj Class Cd	Identifies labor and materiel resources utilized in the production processes that apply to accounting transactions.
☐	Obj Class Cd2	First two-positions identifies the Expense Code.
☐	Oblign Doc Nbr	Number used by accounting to track each obligation record.
☐	Operating Unit	The name of the operating Unit provided by the interfacing accounting system.
☐	Owng Cost Center	A code that identifies an organization
☐	Para Nbr	Identifies the specific section or department of an organization, required and authorized equipment/vehicles, etc.
☐	Para Desc	The description of a specific paragraph within a TDA.
☐	Pgm Id	Unique software identification.
☐	Pgm Desc	Program Long Name
☐	Project Nbr	The reference number assigned to the acquisition project the asset was acquired by.
☐	Program Yr	Identifies the beginning/ending year of the appropriation in YYYYYYYY format (example: 20102011).

☐	Program/Project	Baseline activity (ba), baseline sub activity (bsa), and baseline line item (bli) from appropriation.
☐	Prr Deprn AB RebsIn	The Rebaselined Activity Based depreciation expense incurred by previous owners at the time the asset was transferred to current owning UIC.
☐	Prr Deprn SL RebsIn	The Rebaselined Straight Line depreciation expense incurred by previous owners at the time the asset was transferred to current owning UIC.
☐	Qty	Quantity on hand or transaction quantity
☐	Rcpt Action Cd	Code signifying the receipt action processed
☐	Rcpt Action Type Cd	Code signifying the type of receipt action
☐	Rcvd By	The name of the entity that received the asset.
☐	Remarks	A text field available to record local information/reason for change to record.
☐	Report Acty Name	The name of the installation/activity reporting/responsible for the excess asset or the name of the activity where excess asset is located.
☐	Reportable Cd	A code assigned to items that identifies the level of reporting.
☐	Retirement/Dspsl Dt	Date that asset (personal or real property) or improvement is deleted from property book. Date is entered by user during Disposition action.
☐	Shipment Dt	Shipment Date. User Input.
☐	SLIN	A item that is used in place of an authorized LIN.
☐	SPIIN	Four to six position field added to the basic procurement instrument identification number that identifies amendments/modifications, or calls orders under contract.
☐	Sply Cat Mat Cd	Code that manages the class of supply and sub-classification of supply
☐	Sys Desc	The description of the system identification
☐	Sys Id	Used to tie various end items and components together into a system.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Task Id	The interfacing accounting system's Row Key for the supplied Task Cd
☐	TCN	Shipment of Transportation Control Id
☐	Total Avg Cost	The calculated average cost of a bulk item within an UIC in a point of time.
☐	Trading Partner Nbr	This code identifies the intragovernmental trading partner for transfer actions. Used when reporting eliminations in the CFO Accounting Statement Report.
☐	Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
☐	Transfer Type Cd	Code to let user know what type of fund the asset has been transferred from or being transferred to.
☐	Type Action	Designates selection of an action to be taken on disposition of asset
☐	Type Asset Cd	Identifies the category of an asset as General PP&E, National Defense PP&E or Heritage Asset.
☐	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.

☐	Fndng Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code
☐	FSC	Number which provides the capability to identify the Federal Supply Class that would be assigned to a nonstandard national stock number.
☐	Haz Mat Cd	Code identifying explosives and other dangerous articles which require special handling in shipment as freight.
☐	History Remarks	A text field available to record local information/reason for change to record.
☐	Inv User Id	Identifies the user who last inventoried this asset.

☐	Item Desc	The description of an asset. For an asset with a valid national stock number, Item Description field will be automatically filled with Approved Item Name from the Fed Log.
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Last Updtd By	Last updated by (user id)
☐	iRAPT/WAWF Details	Details of the iRAPT/WAWF Inbound processing, including: processing date; item unit price; contract identifier.
☐	iRAPT/WAWF Receipt	Identifies if asset originated as an iRAPT/WAWF transaction.
☐	iRAPT/WAWF Shipment Id	iRAPT/WAWF Inbound processing Shipment Identifier.
☐	Lease Cd	Indicates the lease status of a particular asset.
☐	Lease End Dt	The date the assets warranty, service or lease contract expires
☐	Lease Start Dt	The date the assets warranty, service or lease contract starts
☐	LIN/TAMCN - Authorization	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Nbrs.
☐	LIN/TAMCN - Catalog	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Numbers.
☐	LOA	Identifies the department code, period of availability, basic symbol, and subhead of the original appropriation.
☐	Loan Cd	Indicates the loan status of a particular asset.
☐	Loaning DODAAC/CAGE Cd	A code that identifies a Department of Defense Activity Address or a Commercial and Government Entity
☐	Loan End Dt	The date the assets warranty, service or loan contract expires
☐	Loan Notfy Cd	Identifies if loan is between a DPAS to DPAS Non-WAWF user, between a DPAS to Non-DPAS user or between a DPAS to DPAS WAWF user.
☐	Loan Rcvd By	The name of the entity that received the loan.
☐	Loan Rcvd Dt	The date the assets warranty, service, or loan has been received.
☐	Loan Start Dt	The date the assets warranty, service or loan contract starts
☐	Local Rcpt Dt	Date asset received
☐	Mfr Name	The full name of a specific manufacturer.
☐	Mfr Part Nbr	Number used to record the make or model of a specific piece of equipment.
☐	Mfr Yr	Year an asset was manufactured/built/improved.
☐	Major Cmd Task Id	Task Id number that is associated with a project that is distinct within the enterprise. Used with the DAI interface.
☐	Mfr Model Nbr	The specific number assigned to identify the make/model of an asset.
☐	Mode of Shipment	Identifies the method of shipment.
☐	Obj Class Cd	Identifies labor and materiel resources utilized in the production processes that apply to accounting transactions.
☐	Obj Class Cd2	First two-positions identifies the Expense Code.
☐	Oblign Doc Nbr	Number used by accounting to track each obligation record.
☐	Operating Unit	The name of the operating Unit provided by the interfacing accounting system.
☐	Owng Cost Center	A code that identifies an organization
☐	Para Nbr	Identifies the specific section or department of an organization, required and authorized equipment/vehicles, etc.
☐	Para Desc	The description of a specific paragraph within a TDA.
☐	Pgm Id	Unique software identification.
☐	Pgm Desc	Program Long Name
☐	Project Nbr	The reference number assigned to the acquisition project the asset was acquired by.
☐	Program Yr	Identifies the beginning/ending year of the appropriation in YYYYYYYY format (example: 20102011).

☐	Program/Project	Baseline activity (ba), baseline sub activity (bsa), and baseline line item (bli) from appropriation.
☐	Prr Deprn AB Rebsln	The Rebaselined Activity Based depreciation expense incurred by previous owners at the time the asset was transferred to current owning UIC.
☐	Prr Deprn SL Rebsln	The Rebaselined Straight Line depreciation expense incurred by previous owners at the time the asset was transferred to current owning UIC.
☐	Qty	Quantity on hand or transaction quantity
☐	Rcpt Action Cd	Code signifying the receipt action processed
☐	Rcpt Action Type Cd	Code signifying the type of receipt action
☐	Rcvd By	The name of the entity that received the asset.
☐	Remarks	A text field available to record local information/reason for change to record.
☐	Report Acty Name	The name of the installation/activity reporting/responsible for the excess asset or the name of the activity where excess asset is located.
☐	Reportable Cd	A code assigned to items that identifies the level of reporting.
☐	Retirement/Dspsl Dt	Date that asset (personal or real property) or improvement is deleted from property book. Date is entered by user during Disposition action.
☐	Shipment Dt	Shipment Date. User Input.
☐	SLIN	A item that is used in place of an authorized LIN.
☐	SPIIN	Four to six position field added to the basic procurement instrument identification number that identifies amendments/modifications, or calls orders under contract.
☐	Sply Cat Mat Cd	Code that manages the class of supply and sub-classification of supply
☐	Sys Desc	The description of the system identification
☐	Sys Id	Used to tie various end items and components together into a system.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Task Id	The interfacing accounting system's Row Key for the supplied Task Cd
☐	TCN	Shipment of Transportation Control Id
☐	Total Avg Cost	The calculated average cost of a bulk item within an UIC in a point of time.
☐	Trading Partner Nbr	This code identifies the intragovernmental trading partner for transfer actions. Used when reporting eliminations in the CFO Accounting Statement Report.
☐	Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
☐	Transfer Type Cd	Code to let user know what type of fund the asset has been transferred from or being transferred to.
☐	Type Action	Designates selection of an action to be taken on disposition of asset
☐	Type Asset Cd	Identifies the category of an asset as General PP&E, National Defense PP&E or Heritage Asset.
☐	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.

Search for an Asset Activity Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

   A. *The first Available Field(s) option (Bulk) automatically populates and is not editable.*

   B. *The second Available Field(s) option (TRAN DT FROM) automatically populates and is not editable.*

   C. *The third Available Field(s) option (TRAN DT TO) automatically populates and is not editable.*

   D. Use ⌄ to select the fourth Available Field.

   E. Repeat Step D to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Use ⌄ to select the second Operands.

C. Use ⌄ to select the third Operands.

D. Use ⌄ to select the fourth Operands.

E. Repeat Step D to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use ⌄ to select the first Search Value.

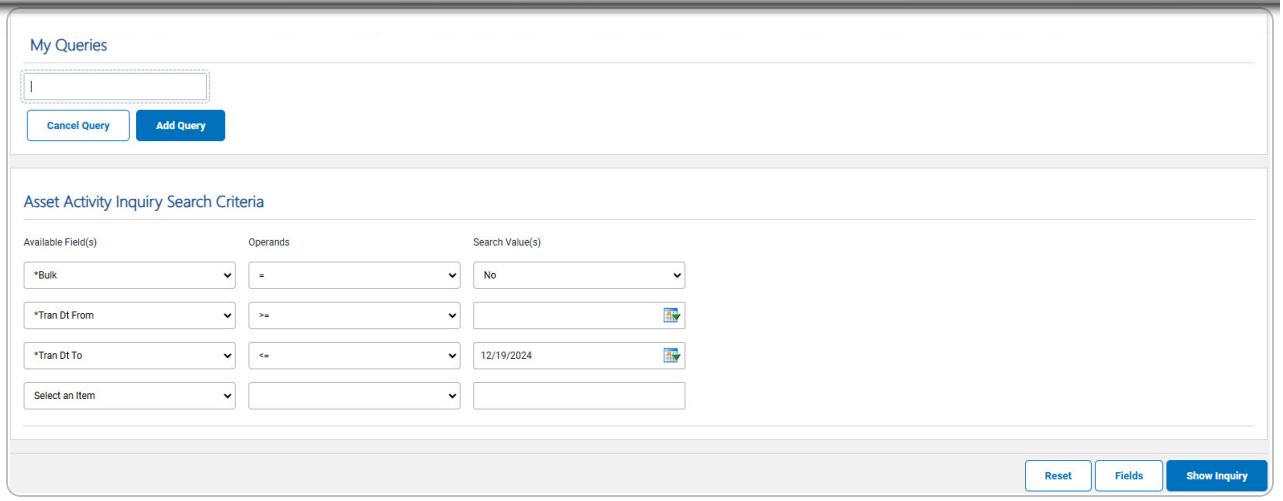
B. Use  to select the Search Value(s), or enter the date (MM/DD/YYY) in the field provided.

C. Use  to select the Search Value(s), or enter the date (MM/DD/YYY) in the field provided.

D. Use ⌄ to select the fourth Search Value.

E. Repeat Step D to add additional search criteria.

Remove an Available Field Row



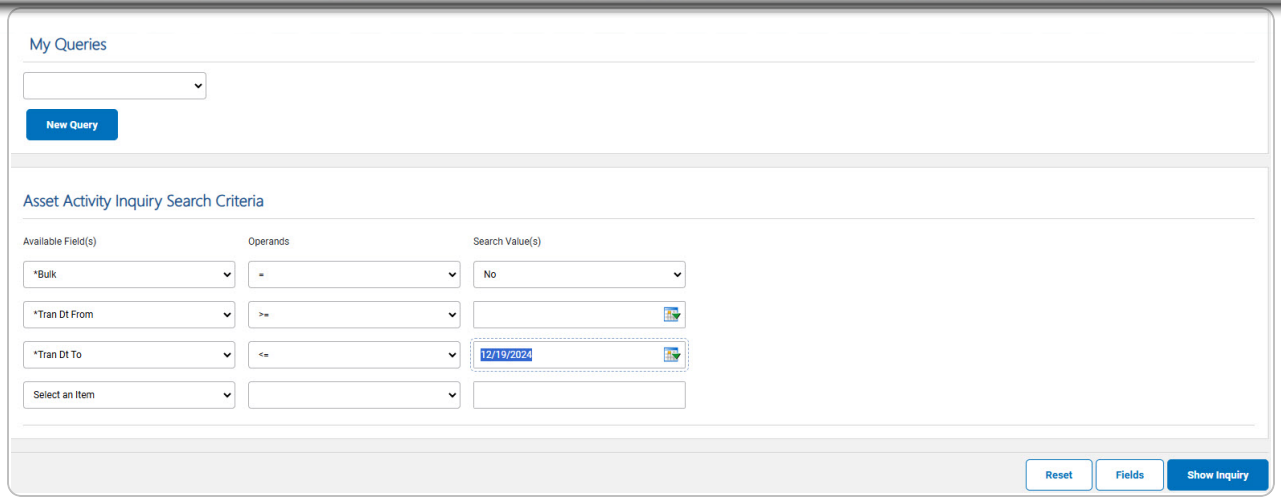
a. Use ⌄ to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Asset Activity Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*



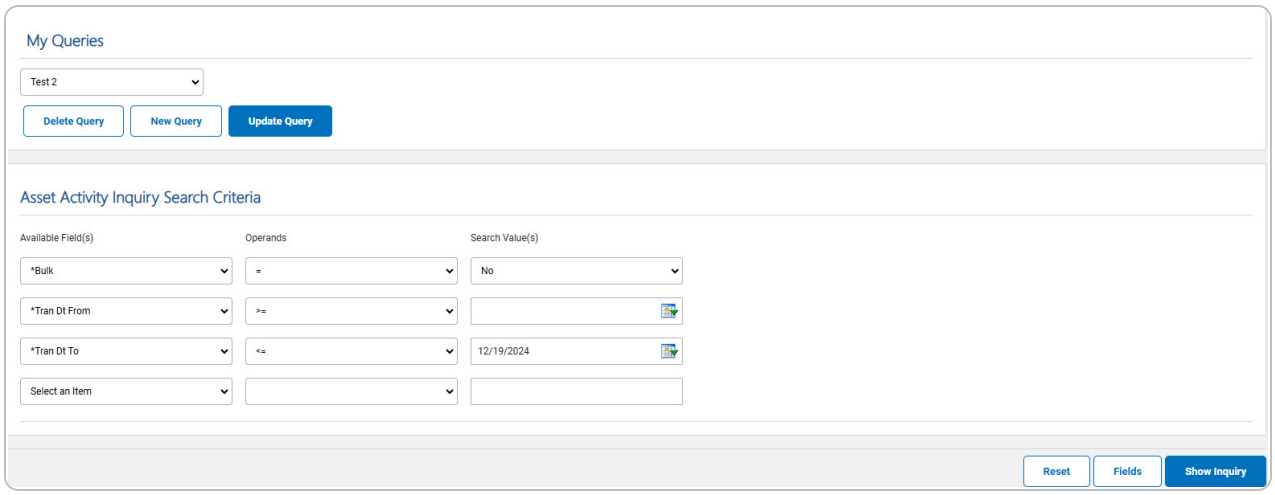
2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*
5. Select Fields. *The* ***Asset Activity Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Asset Activity Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



2. Select Fields. *The **Asset Activity Inquiry — Select Fields** page appears.*

   OR

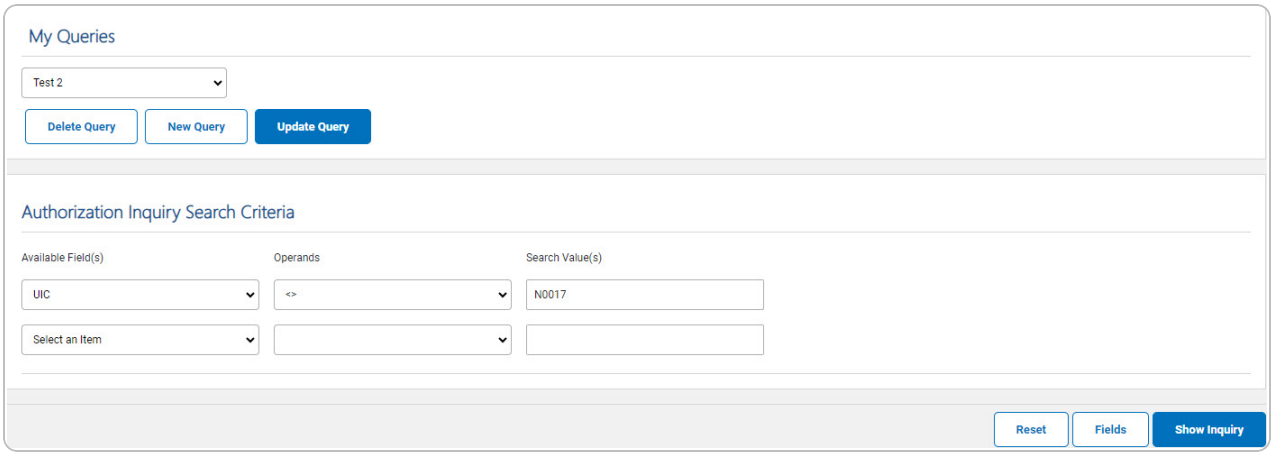
   Select Show Inquiry. *The **Asset Activity Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*



4. Select Fields. *The **Asset Activity Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Asset Activity Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*

3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Asset Activity Inquiry — Select Fields** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..
13 — Mandatory Entry: *Available Field(s)*.	Missing Entry. No data was entered. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Operands*.	
13 — Mandatory Entry: *Query Name*.	
xxxx – Saved Inquiry already exists. Select  **or**  **.**	Invalid Entry. The inquiry already exists in the database. Use the existing inquiry, or select  to revise the existing query.
102 — Inquiry already exists.	Invalid entry. The Inquiry is already established. Re-enter the inquiry or select

	Update Query or Delete Query to modify the existing inquiry.
106 — Operand must be =, >, <, >= , <= , <>, or Like.	Missing Entry. The Field value was entered, but no operand was selected. Choose an operand from the drop-down menu.
31 — To perform Search, data must be entered in one or more fields.	Missing Entry. At least one field is necessary to perform the search. Enter at least one field, then select the Search button.
65 — No record(s) match search criteria.	Invalid Entry. Results for the search criteria entered do not exist. Enter different Search Criteria and try the Search again.
xxxx – Please add at least one more search criteria.	Missing Entry. The Field value is missing. Select an Item to proceed.

Search for an Asset Activity Inquiry — Results

Overview

The Asset Activity Inquiry Results process provides the ability to view the search results, and save them in different formats.

Navigation

Inquiries > Asset Management > Asset Activity > Search Criteria > Show Inquiry > Asset Activity Inquiry Search Results page

Page Fields

The following fields display on the **Asset Activity Inquiry Search Results** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.
191	Excel is the only reliable print format for this inquiry.

252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
247	Where available, select "Row" to view details for specific record.
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.
290	Do not "Export" large volumes of data, select "Back" button then select "Submit" button on the Field Selection Page

My Selections

New Selection List

	Field	Field Description
☑	Actbl UIC	Accountable Unit Identification Code - The UIC of the organization that is assigned management responsibility for property belonging to a specific unit organization, or activity. Multiple UICs may be grouped under an Accountable UIC to consolidate data for accountability and accounting system reporting purposes.
☑	Asset Id	Unique locally assigned code used for identification purposes.
☑	Asset Level Cd	A unique column that holds the code used by the lookup table which coincides with the associated description. Indicates if item is end item or component and if asset has lower level components.
☑	Custodian Nbr	One to six position code, locally assigned, used to identify an individual responsible for assigned assets.
☑	Expr Dt	The date the asset is no longer considered usable for its intended purpose, or the date the authority to operate the asset ends.
☑	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☑	Loc	Physical location of an asset.
☑	Non-Actbl	Non Accountable is displayed Yes or No.
☑	Lot Nbr	Manufacturer assigned number that identifies items produced on the same production run.
☑	Rcpt Doc Nbr	Doc Nbr used to receive asset
☑	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☑	Site Id	The active Site Id the user has access to.
☑	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☑	Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☑	Sub Loc	A more specific description of the physical location of an asset within its Location.
☑	Total Cost	Total Cost. Cost of individual end item assets including cost of stand-alone components
☑	UIC	The UIC of the maintenance activity assigned to service the asset.
☑	UIC Name	A unit, organization, or activity name
☑	User Id	Identifies the user accessing the system
☐	ACC-SFIS	Pos. 1-2 identifies the accounting class of assets. Remaining positions identify the SFIS code.
☐	Acct Rpt Nbr	Report number assigned when the accounting data is generated
☐	ACRN	Two position alpha or alpha/numeric code assigned to each discrete accounting classification citation within a contract.
☐	Agency Defined1	Agency set user defined function
☐	Agency Defined2	Agency set user defined function
☐	Agency Defined3	Agency set user defined function
☐	Agency Defined4	Agency set user defined function
☐	Agency Defined5	Agency set user defined function
☐	ARC	Designates an asset as expendable, non-expendable or durable.
☐	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Asset Pilferable	Asset Pilferable Flag. Yes or No
☐	Asset Sts Cd	Used to keep track of the status of an asset.

☐	CLIN	A four position field that identifies different contract line items within the same contract.
☐	Cntr/PO Nbr	Assigned by the procurement activity and used to identify requests for a supply purchase.
☐	Cond Cd	Used to classify material for degree of serviceability, condition, and completeness in terms of readiness for issue, and to identify actions underway to change status of materiel. This Field defaults to (A) but can be updated.
☐	Deprn AB Lst Rebsln	The activity based accumulated depreciation that has been incurred at the time the asset was last rebaselined.
☐	Deprn Cost Center	Cost Control Number/Office where the depreciation expense is charged.
☐	Deprn Cost Center Id	The date of this row's insertion into the database.
☐	Deprn AB Rebsln	The accumulated depreciation calculated using AB with rebaselining of the asset.
☐	Deprn Cd	Indicates whether the asset is a capital asset and if fiduciary reportable by DPAS. C – Capital/Non-Reportable, N – Non-Capital/Non-Reportable, T - Capital/Reportable.
☐	Deprn Job Order Nbr	Job order number where the depreciation expense is charged.
☐	Deprn Period Days	The number of days the asset is scheduled to be depreciated.
☐	Deprn Project Nbr	A number that identifies the Depreciation Project.
☐	Deprn SL Lst Rebsln	The straight line accumulated depreciation that has been incurred at the time the asset was last rebaslined.
☐	Deprn SL Rebsln	The accumulated depreciation calculated using SL with rebaselining of the asset.
☐	Deprn Task Cd	Task Code/Cost Acct Code/Organization Code where the depreciation expense is charged.
☐	Deprn Task Id	The interfacing accounting system's Row Key for the supplied Depreciation Task Cd
☐	Deprn Util Qty	The assets actual utilization when depreciation last ran.
☐	Deprn Util Svc Life	The assets planned utilization for depreciation purposes.
☐	Disposition Type Action Cd	Code signifying the type of disposition action
☐	Dmil Cd	The code that represents instructions for removal of functional or military characteristics of a materiel item.
☐	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☐	Dollar Amt	The dollar amount of construction in progress/work in process, real property or the dollar amount of the accounting transaction.
☐	Embedded Cost	Identifies the unit cost of a component as embedded in the total cost of the end item. Bulk component is automatically embedded.
☐	Excess Action Cd	Code which indicates the action being taken for the excess asset. Codes (E, P and I) are system generated. For code (W) (Withdraw), there is a Check Box used to withdraw previously reported excess asset.
☐	Excess Dt	Date an asset is documented as excess.
☐	Cntr Nbr	Unique value used to identify agreements with suppliers and contractors.
☐	Excess Type Action Cd	Excess Action type code which indicates the action being taken for the excess asset
☐	Fndng Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code
☐	FSC	Number which provides the capability to identify the Federal Supply Class that would be assigned to a nonstandard national stock number.
☐	Haz Mat Cd	Code identifying explosives and other dangerous articles which require special handling in shipment as freight.
☐	History Remarks	A text field available to record local information/reason for change to record.
☐	Inv User Id	Identifies the user who last inventoried this asset.

☐	Item Desc	The description of an asset. For an asset with a valid national stock number, Item Description field will be automatically filled with Approved Item Name from the Fed Log.
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Last Updtd By	Last updated by (user id)
☐	iRAPT/WAWF Details	Details of the iRAPT/WAWF Inbound processing, including: processing date; item unit price; contract identifier.
☐	iRAPT/WAWF Receipt	Identifies if asset originated as an iRAPT/WAWF transaction.
☐	iRAPT/WAWF Shipment Id	iRAPT/WAWF Inbound processing Shipment Identifier.
☐	Lease Cd	Indicates the lease status of a particular asset.
☐	Lease End Dt	The date the assets warranty, service or lease contract expires
☐	Lease Start Dt	The date the assets warranty, service or lease contract starts
☐	LIN/TAMCN - Authorization	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Nbrs.
☐	LIN/TAMCN - Catalog	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Numbers.
☐	LOA	Identifies the department code, period of availability, basic symbol, and subhead of the original appropriation.
☐	Loan Cd	Indicates the loan status of a particular asset.
☐	Loaning DODAAC/CAGE Cd	A code that identifies a Department of Defense Activity Address or a Commercial and Government Entity
☐	Loan End Dt	The date the assets warranty, service or loan contract expires
☐	Loan Notfy Cd	Identifies if loan is between a DPAS to DPAS Non-WAWF user, between a DPAS to Non-DPAS user or between a DPAS to DPAS WAWF user.
☐	Loan Rcvd By	The name of the entity that received the loan.
☐	Loan Rcvd Dt	The date the assets warranty, service, or loan has been received.
☐	Loan Start Dt	The date the assets warranty, service or loan contract starts
☐	Local Rcpt Dt	Date asset received
☐	Mfr Name	The full name of a specific manufacturer.
☐	Mfr Part Nbr	Number used to record the make or model of a specific piece of equipment.
☐	Mfr Yr	Year an asset was manufactured/built/improved.
☐	Major Cmd Task Id	Task Id number that is associated with a project that is distinct within the enterprise. Used with the DAI interface.
☐	Mfr Model Nbr	The specific number assigned to identify the make/model of an asset.
☐	Mode of Shipment	Identifies the method of shipment.
☐	Obj Class Cd	Identifies labor and materiel resources utilized in the production processes that apply to accounting transactions.
☐	Obj Class Cd2	First two-positions identifies the Expense Code.
☐	Oblign Doc Nbr	Number used by accounting to track each obligation record.
☐	Operating Unit	The name of the operating Unit provided by the interfacing accounting system.
☐	Owng Cost Center	A code that identifies an organization
☐	Para Nbr	Identifies the specific section or department of an organization, required and authorized equipment/vehicles, etc.
☐	Para Desc	The description of a specific paragraph within a TDA.
☐	Pgm Id	Unique software identification.
☐	Pgm Desc	Program Long Name
☐	Project Nbr	The reference number assigned to the acquisition project the asset was acquired by.
☐	Program Yr	Identifies the beginning/ending year of the appropriation in YYYYYYYY format (example: 20102011).

☐	Program/Project	Baseline activity (ba), baseline sub activity (bsa), and baseline line item (bli) from appropriation.
☐	Prr Deprn AB Rebsln	The Rebaselined Activity Based depreciation expense incurred by previous owners at the time the asset was transferred to current owning UIC.
☐	Prr Deprn SL Rebsln	The Rebaselined Straight Line depreciation expense incurred by previous owners at the time the asset was transferred to current owning UIC.
☐	Qty	Quantity on hand or transaction quantity
☐	Rcpt Action Cd	Code signifying the receipt action processed
☐	Rcpt Action Type Cd	Code signifying the type of receipt action
☐	Rcvd By	The name of the entity that received the asset.
☐	Remarks	A text field available to record local information/reason for change to record.
☐	Report Acty Name	The name of the installation/activity reporting/responsible for the excess asset or the name of the activity where excess asset is located.
☐	Reportable Cd	A code assigned to items that identifies the level of reporting.
☐	Retirement/Dspsl Dt	Date that asset (personal or real property) or improvement is deleted from property book. Date is entered by user during Disposition action.
☐	Shipment Dt	Shipment Date. User Input.
☐	SLIN	A item that is used in place of an authorized LIN.
☐	SPIIN	Four to six position field added to the basic procurement instrument identification number that identifies amendments/modifications, or calls orders under contract.
☐	Sply Cat Mat Cd	Code that manages the class of supply and sub-classification of supply
☐	Sys Desc	The description of the system identification
☐	Sys Id	Used to tie various end items and components together into a system.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Task Id	The interfacing accounting system's Row Key for the supplied Task Cd
☐	TCN	Shipment of Transportation Control Id
☐	Total Avg Cost	The calculated average cost of a bulk item within an UIC in a point of time.
☐	Trading Partner Nbr	This code identifies the intragovernmental trading partner for transfer actions. Used when reporting eliminations in the CFO Accounting Statement Report.
☐	Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
☐	Transfer Type Cd	Code to let user know what type of fund the asset has been transferred from or being transferred to.
☐	Type Action	Designates selection of an action to be taken on disposition of asset
☐	Type Asset Cd	Identifies the category of an asset as General PP&E, National Defense PP&E or Heritage Asset.
☐	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.

New Selection List

	Field	Field Description
☑	Actbl UIC	Accountable Unit Identification Code - The UIC of the organization that is assigned management responsibility for property belonging to a specific unit organization, or activity. Multiple UICs may be grouped under an Accountable UIC to consolidate data for accountability and accounting system reporting purposes.
☑	Asset Id	Unique locally assigned code used for identification purposes.
☑	Asset Level Cd	A unique column that holds the code used by the lookup table which coincides with the associated description. Indicates if item is end item or component and if asset has lower level components.
☑	Custodian Nbr	One to six position code, locally assigned, used to identify an individual responsible for assigned assets.
☑	Expr Dt	The date the asset is no longer considered usable for its intended purpose, or the date the authority to operate the asset ends.
☑	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☑	Loc	Physical location of an asset.
☑	Non-Actbl	Non Accountable is displayed Yes or No.
☑	Lot Nbr	Manufacturer assigned number that identifies items produced on the same production run.
☑	Rcpt Doc Nbr	Doc Nbr used to receive asset
☑	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☑	Site Id	The active Site Id the user has access to.
☑	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☑	Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☑	Sub Loc	A more specific description of the physical location of an asset within its Location.
☑	Total Cost	Total Cost. Cost of individual end item assets including cost of stand-alone components
☑	UIC	The UIC of the maintenance activity assigned to service the asset.
☑	UIC Name	A unit, organization, or activity name
☑	User Id	Identifies the user accessing the system
☐	ACC-SFIS	Pos. 1-2 identifies the accounting class of assets. Remaining positions identify the SFIS code.
☐	Acct Rpt Nbr	Report number assigned when the accounting data is generated
☐	ACRN	Two position alpha or alpha/numeric code assigned to each discrete accounting classification citation within a contract.
☐	Agency Defined1	Agency set user defined function
☐	Agency Defined2	Agency set user defined function
☐	Agency Defined3	Agency set user defined function
☐	Agency Defined4	Agency set user defined function
☐	Agency Defined5	Agency set user defined function
☐	ARC	Designates an asset as expendable, non-expendable or durable.
☐	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Asset Pilferable	Asset Pilferable Flag. Yes or No
☐	Asset Sts Cd	Used to keep track of the status of an asset.

☐	CLIN	A four position field that identifies different contract line items within the same contract.
☐	Cntr/PO Nbr	Assigned by the procurement activity and used to identify requests for a supply purchase.
☐	Cond Cd	Used to classify material for degree of serviceability, condition, and completeness in terms of readiness for issue, and to identify actions underway to change status of materiel. This Field defaults to (A) but can be updated.
☐	Deprn AB Lst Rebsln	The activity based accumulated depreciation that has been incurred at the time the asset was last rebaselined.
☐	Deprn Cost Center	Cost Control Number/Office where the depreciation expense is charged.
☐	Deprn Cost Center Id	The date of this row's insertion into the database.
☐	Deprn AB Rebsln	The accumulated depreciation calculated using AB with rebaselining of the asset.
☐	Deprn Cd	Indicates whether the asset is a capital asset and if fiduciary reportable by DPAS. C – Capital/Non-Reportable, N – Non-Capital/Non-Reportable, T - Capital/Reportable.
☐	Deprn Job Order Nbr	Job order number where the depreciation expense is charged.
☐	Deprn Period Days	The number of days the asset is scheduled to be depreciated.
☐	Deprn Project Nbr	A number that identifies the Depreciation Project.
☐	Deprn SL Lst Rebsln	The straight line accumulated depreciation that has been incurred at the time the asset was last rebaslined.
☐	Deprn SL Rebsln	The accumulated depreciation calculated using SL with rebaselining of the asset.
☐	Deprn Task Cd	Task Code/Cost Acct Code/Organization Code where the depreciation expense is charged.
☐	Deprn Task Id	The interfacing accounting system's Row Key for the supplied Depreciation Task Cd
☐	Deprn Util Qty	The assets actual utilization when depreciation last ran.
☐	Deprn Util Svc Life	The assets planned utilization for depreciation purposes.
☐	Disposition Type Action Cd	Code signifying the type of disposition action
☐	Dmil Cd	The code that represents instructions for removal of functional or military characteristics of a materiel item.
☐	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☐	Dollar Amt	The dollar amount of construction in progress/work in process, real property or the dollar amount of the accounting transaction.
☐	Embedded Cost	Identifies the unit cost of a component as embedded in the total cost of the end item. Bulk component is automatically embedded.
☐	Excess Action Cd	Code which indicates the action being taken for the excess asset. Codes (E, P and I) are system generated. For code (W) (Withdraw), there is a Check Box used to withdraw previously reported excess asset.
☐	Excess Dt	Date an asset is documented as excess.
☐	Cntr Nbr	Unique value used to identify agreements with suppliers and contractors.
☐	Excess Type Action Cd	Excess Action type code which indicates the action being taken for the excess asset
☐	Fndng Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code
☐	FSC	Number which provides the capability to identify the Federal Supply Class that would be assigned to a nonstandard national stock number.
☐	Haz Mat Cd	Code identifying explosives and other dangerous articles which require special handling in shipment as freight.
☐	History Remarks	A text field available to record local information/reason for change to record.
☐	Inv User Id	Identifies the user who last inventoried this asset.

☐	Item Desc	The description of an asset. For an asset with a valid national stock number, Item Description field will be automatically filled with Approved Item Name from the Fed Log.
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Last Updtd By	Last updated by (user id)
☐	iRAPT/WAWF Details	Details of the iRAPT/WAWF Inbound processing, including: processing date; item unit price; contract identifier.
☐	iRAPT/WAWF Receipt	Identifies if asset originated as an iRAPT/WAWF transaction.
☐	iRAPT/WAWF Shipment Id	iRAPT/WAWF Inbound processing Shipment Identifier.
☐	Lease Cd	Indicates the lease status of a particular asset.
☐	Lease End Dt	The date the assets warranty, service or lease contract expires
☐	Lease Start Dt	The date the assets warranty, service or lease contract starts
☐	LIN/TAMCN - Authorization	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Nbrs.
☐	LIN/TAMCN - Catalog	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Numbers.
☐	LOA	Identifies the department code, period of availability, basic symbol, and subhead of the original appropriation.
☐	Loan Cd	Indicates the loan status of a particular asset.
☐	Loaning DODAAC/CAGE Cd	A code that identifies a Department of Defense Activity Address or a Commercial and Government Entity
☐	Loan End Dt	The date the assets warranty, service or loan contract expires
☐	Loan Notfy Cd	Identifies if loan is between a DPAS to DPAS Non-WAWF user, between a DPAS to Non-DPAS user or between a DPAS to DPAS WAWF user.
☐	Loan Rcvd By	The name of the entity that received the loan.
☐	Loan Rcvd Dt	The date the assets warranty, service, or loan has been received.
☐	Loan Start Dt	The date the assets warranty, service or loan contract starts
☐	Local Rcpt Dt	Date asset received
☐	Mfr Name	The full name of a specific manufacturer.
☐	Mfr Part Nbr	Number used to record the make or model of a specific piece of equipment.
☐	Mfr Yr	Year an asset was manufactured/built/improved.
☐	Major Cmd Task Id	Task Id number that is associated with a project that is distinct within the enterprise. Used with the DAI interface.
☐	Mfr Model Nbr	The specific number assigned to identify the make/model of an asset.
☐	Mode of Shipment	Identifies the method of shipment.
☐	Obj Class Cd	Identifies labor and materiel resources utilized in the production processes that apply to accounting transactions.
☐	Obj Class Cd2	First two-positions identifies the Expense Code.
☐	Oblign Doc Nbr	Number used by accounting to track each obligation record.
☐	Operating Unit	The name of the operating Unit provided by the interfacing accounting system.
☐	Owng Cost Center	A code that identifies an organization
☐	Para Nbr	Identifies the specific section or department of an organization, required and authorized equipment/vehicles, etc.
☐	Para Desc	The description of a specific paragraph within a TDA.
☐	Pgm Id	Unique software identification.
☐	Pgm Desc	Program Long Name
☐	Project Nbr	The reference number assigned to the acquisition project the asset was acquired by.
☐	Program Yr	Identifies the beginning/ending year of the appropriation in YYYYYYYY format (example: 20102011).

Program/Project	Baseline activity (ba), baseline sub activity (bsa), and baseline line item (bli) from appropriation.
Prr Deprn AB RebsIn	The Rebaselined Activity Based depreciation expense incurred by previous owners at the time the asset was transferred to current owning UIC.
Prr Deprn SL RebsIn	The Rebaselined Straight Line depreciation expense incurred by previous owners at the time the asset was transferred to current owning UIC.
Qty	Quantity on hand or transaction quantity
Rcpt Action Cd	Code signifying the receipt action processed
Rcpt Action Type Cd	Code signifying the type of receipt action
Rcvd By	The name of the entity that received the asset.
Remarks	A text field available to record local information/reason for change to record.
Report Acty Name	The name of the installation/activity reporting/responsible for the excess asset or the name of the activity where excess asset is located.
Reportable Cd	A code assigned to items that identifies the level of reporting.
Retirement/Dspsl Dt	Date that asset (personal or real property) or improvement is deleted from property book. Date is entered by user during Disposition action.
Shipment Dt	Shipment Date. User Input.
SLIN	A item that is used in place of an authorized LIN.
SPIIN	Four to six position field added to the basic procurement instrument identification number that identifies amendments/modifications, or calls orders under contract.
Sply Cat Mat Cd	Code that manages the class of supply and sub-classification of supply
Sys Desc	The description of the system identification
Sys Id	Used to tie various end items and components together into a system.
Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
Task Id	The interfacing accounting system's Row Key for the supplied Task Cd
TCN	Shipment of Transportation Control Id
Total Avg Cost	The calculated average cost of a bulk item within an UIC in a point of time.
Trading Partner Nbr	This code identifies the intragovernmental trading partner for transfer actions. Used when reporting eliminations in the CFO Accounting Statement Report.
Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
Transfer Type Cd	Code to let user know what type of fund the asset has been transferred from or being transferred to.
Type Action	Designates selection of an action to be taken on disposition of asset
Type Asset Cd	Identifies the category of an asset as General PP&E, National Defense PP&E or Heritage Asset.
UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **Custodian Inquiry** page appears.*

☐	Address 1	First line of the address for the Major Custodian
☐	Address 2	Second line of the address for the Major Custodian
☐	Alt Name	Alternate Custodian Name
☐	Alt Order Dt	Alternate Custodian Order Date
☐	Alt Phone Nbr	Alternate Custodian Phone Number
☐	City	The name of the city of the responsible activity reporting the Asset, or the city where real property facility is located.
☐	Country Cd	Identifies the Country where the Major Custodian is located
☐	DSN	Defense Switched Network for the Major Custodian.
☐	E-Mail Address	The electronic mailing address of the Point of Contact for the Major Custodian.
☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt	The date this row was inserted into the database.
☐	FAX Nbr	The commercial fax number of the Point of Contact
☐	History Remarks	A text field available to record local information/reason for change to record.
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	Office Name	Description of the organization of the Major Custodian
☐	Phone Nbr	Office commercial phone number of Major Custodian
☐	Remarks	A text field available to record local information/reason for change to record.
☐	Tran Cd	This code identifies the type of transaction processed.
☐	Transfer Authority Flag	Indicates when a user has Transfer Authority Yes or No.
☐	ZIP Cd	ZIP Code

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

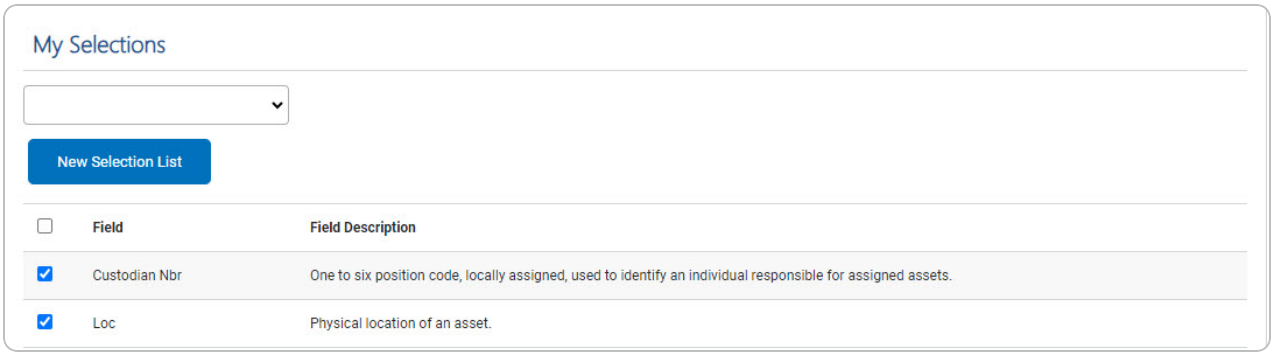
4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.



2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

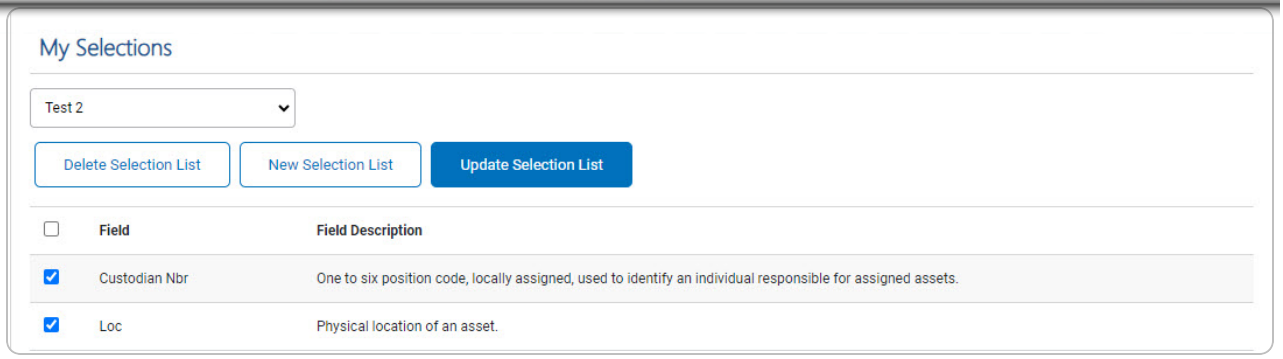
   Select Show Inquiry for small volumes of data. *The* ***Custodian Inquiry — Results*** *page appears.*
5. **OR**

   Select Submit for large volumes of data. *The* ***Custodian Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*



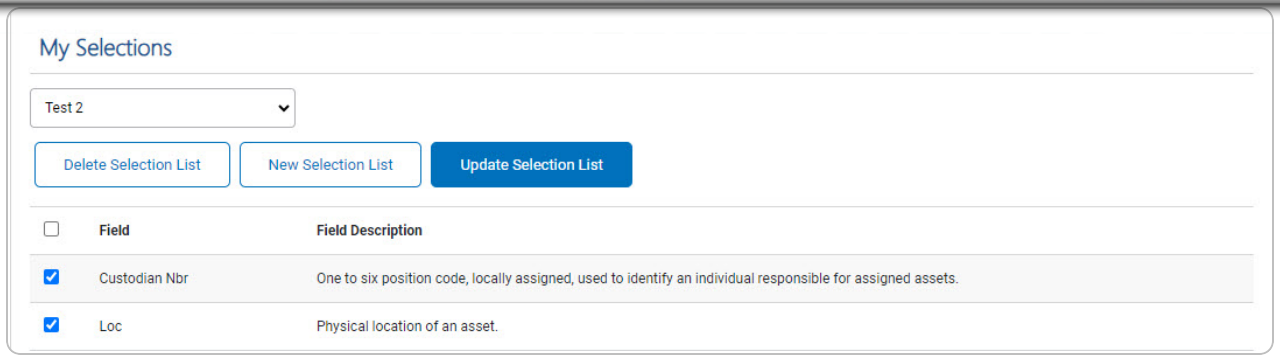
3. Select Show Inquiry for small volumes of data. *The **Custodian Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Custodian Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



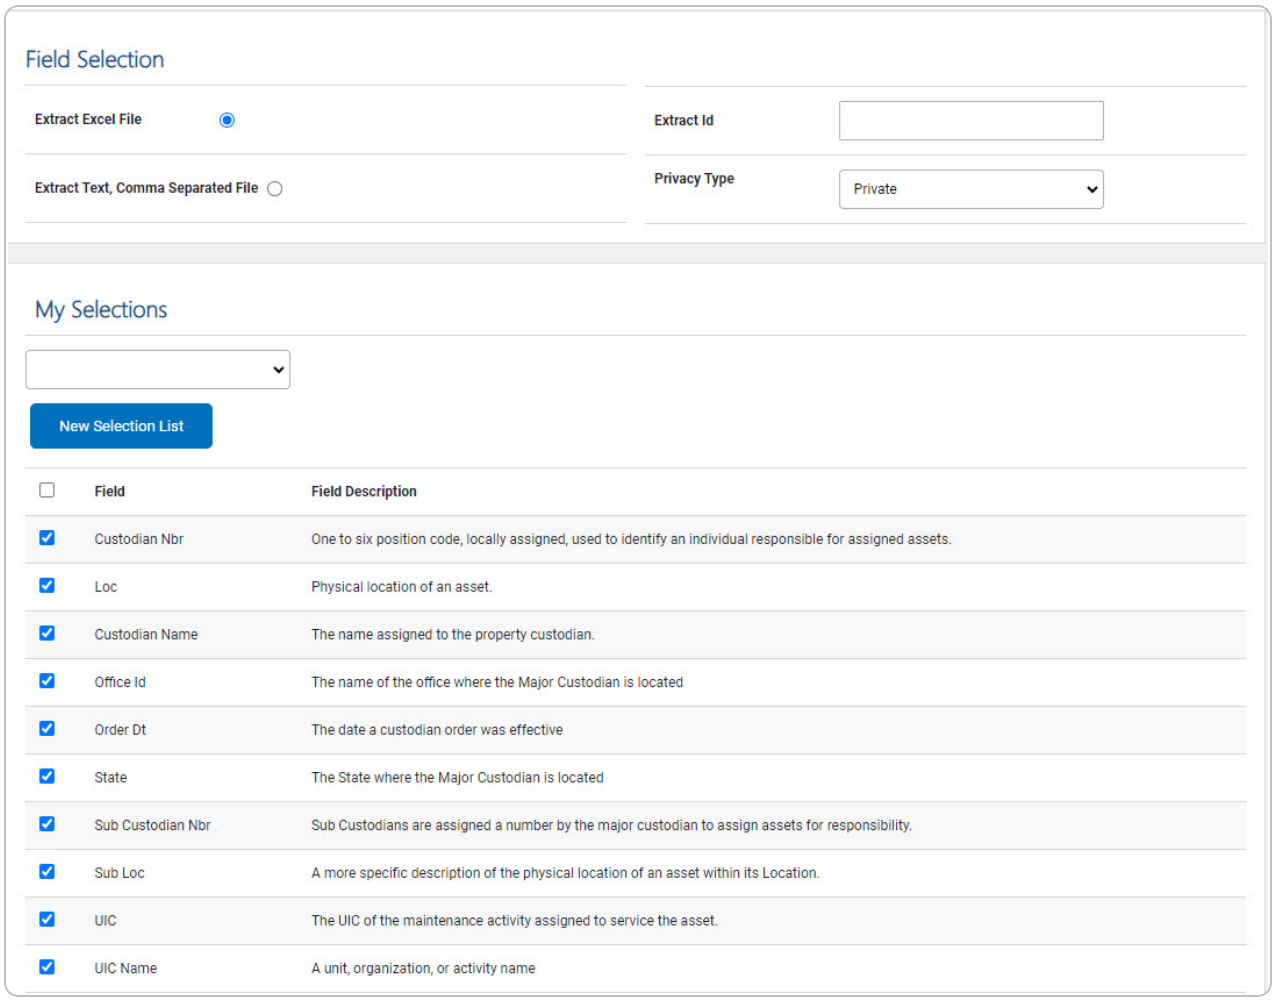
2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*

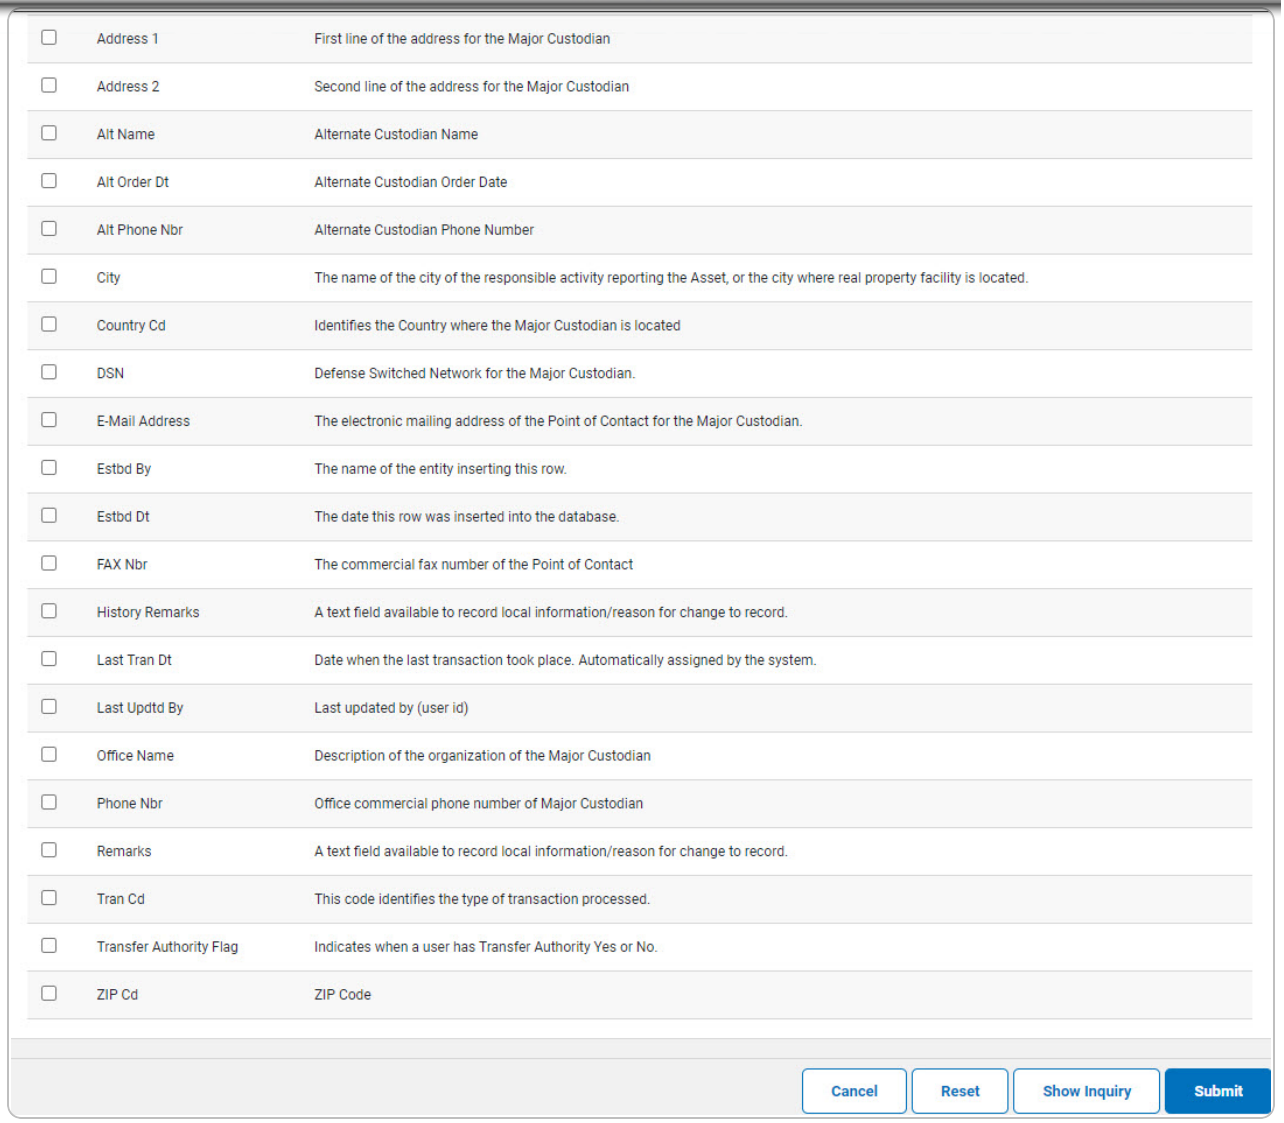
   Select Show Inquiry for small volumes of data. *The* ***Custodian Inquiry — Results*** *page appears.*
4. **OR**

   Select Submit for large volumes of data. *The* ***Custodian Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.





2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Custodian Inquiry** page appears.*

☐	Address 1	First line of the address for the Major Custodian
☐	Address 2	Second line of the address for the Major Custodian
☐	Alt Name	Alternate Custodian Name
☐	Alt Order Dt	Alternate Custodian Order Date
☐	Alt Phone Nbr	Alternate Custodian Phone Number
☐	City	The name of the city of the responsible activity reporting the Asset, or the city where real property facility is located.
☐	Country Cd	Identifies the Country where the Major Custodian is located
☐	DSN	Defense Switched Network for the Major Custodian.
☐	E-Mail Address	The electronic mailing address of the Point of Contact for the Major Custodian.
☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt	The date this row was inserted into the database.
☐	FAX Nbr	The commercial fax number of the Point of Contact
☐	History Remarks	A text field available to record local information/reason for change to record.
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	Office Name	Description of the organization of the Major Custodian
☐	Phone Nbr	Office commercial phone number of Major Custodian
☐	Remarks	A text field available to record local information/reason for change to record.
☐	Tran Cd	This code identifies the type of transaction processed.
☐	Transfer Authority Flag	Indicates when a user has Transfer Authority Yes or No.
☐	ZIP Cd	ZIP Code

2. Select the fields required for the inquiry. *The first 10 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The* ***Authorization Inquiry*** *page appears.*

2. Choose the desired file type:

   - Click ○ to select Extract Excel File. *The extracted file on the* ***View Inquiry Extract*** *page is an .XLS file.*

OR

Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.*

Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

Select Show Inquiry for small volumes of data. *The **Authorization Inquiry — Results** page appears.*

5.

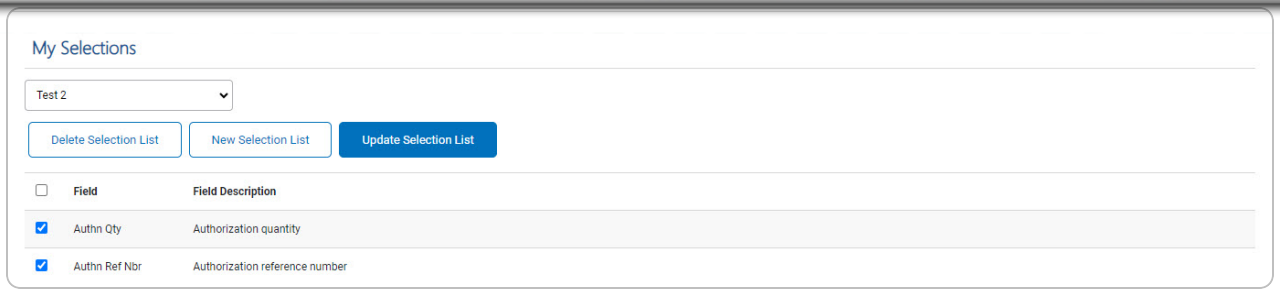
OR

Select Submit for large volumes of data. *The **Authorization Inquiry Transaction Status** page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*



Select Show Inquiry for small volumes of data. *The **Authorization Inquiry — Results** page appears.*

3. **OR**

Select Submit for large volumes of data. *The **Authorization Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

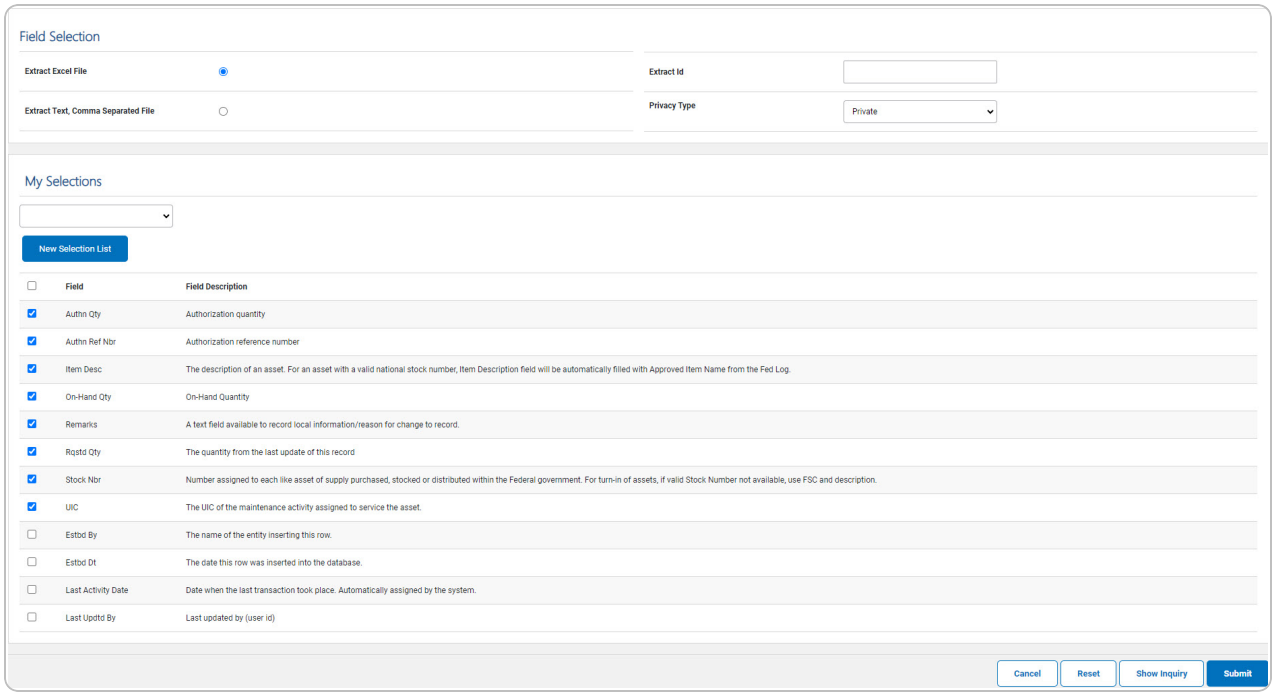
2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select **Update Selection List**. *The page refreshes.*

   Select **Show Inquiry** for small volumes of data. *The* ***Authorization Inquiry — Results*** *page appears.*
4. **OR**

   Select **Submit** for large volumes of data. *The* ***Authorization Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* **Update Selection List** *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

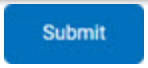
Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The* ***Authorization Inquiry*** *page appears.*

2. Select the fields required for the inquiry. *The first 8 fields are automatically selected.*

Note



The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the AUTHN QTY contains the appropriate ☑ or ☐. *Select if the inquiry contains an AUTHN QTY.*

- Verify the AUTHN REF NBR contains the appropriate ☑ or ☐. *Select if the inquiry contains an AUTHN REF NBR.*
- Verify the ITEM DESC contains the appropriate ☑ or ☐. *Select if the inquiry contains a description of the asset.*
- Verify the On-Hand QTY contains the appropriate ☑ or ☐. *Select if the inquiry has an On-Hand count.*

Select Fields for the Excess Asset Inquiry

Overview

The Excess Asset Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > Asset Management > Excess Asset > Search Criteria > Fields > Excess Asset Inquiry Fields Selection page

Page Fields

The following fields display on the **Excess Asset Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

191	Excel is the only reliable print format for this inquiry.
252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
xxxx	Where available, select "Row" to view details for specific record.
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.
290	Do not "Export" large volumes of data, select "Back" button then select "Submit" button on the Field Selection Page

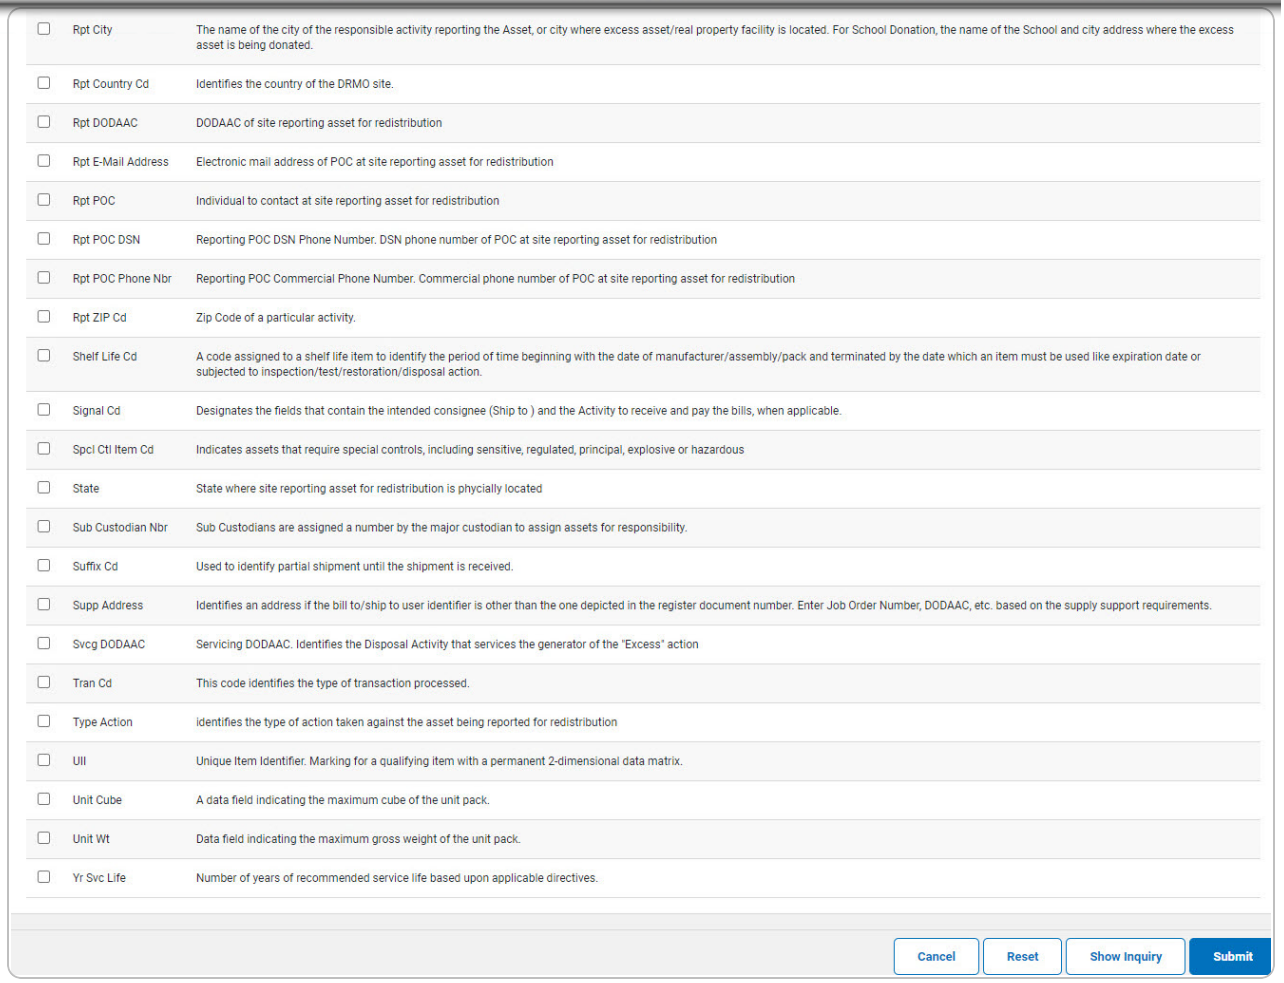
Choose the Extracted Inquiry File Details



Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **Excess Asset Inquiry** page appears.*

☐	Avail Dt	Estimated Availability Date. Estimated date that the asset will be available for redistribution
☐	CAGE Cd	Controlling activities including manufactures, vendors, and government agencies that control the development of specifications/standards, control the design, or manufacture items of supply, sometimes control the specifications/standards themselves.
☐	Cond Cd	Identifies the degree of condition in terms of readiness for issue
☐	Designee Cd	The Designee Cd indicating where the excess equipment is being transferred. The Designee Cd must match a designee code on the Disposal Designee Table.
☐	Disposition Cd	A unique column that holds the code used by the lookup table which coincides with the associated disposition description
☐	Dmil Cd	The code that represents instructions for removal of functional or military characteristics of a materiel item.
☐	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt	The date this row was inserted into the database.
☐	Excess In Place	Flag is set if Excess in Place. Yes or No
☐	Expr Dt	The date the asset is no longer considered usable for its intended purpose, or the date the authority to operate the asset ends.
☐	FAX Nbr	The commercial fax number of the Point of Contact
☐	FSC	Number which provides the capability to identify the Federal Supply Class that would be assigned to a nonstandard national stock number.
☐	Fund Cd	Used to identify type funding used in the acquisition of assets/services.
☐	Haz Mat Id Cd	Code identifying explosives and other dangerous articles which require special handling in shipment as freight.
☐	Holding DODAAC	A distinctive code assigned to identify units, activities, organizations, non-DoD, and contract activities engaged in the requisitioning, receiving, and billing of material.
☐	Holding Loc	Description of the physical location of an asset.
☐	Holding POC	For Holding Location, the name of the individual who is holding the asset marked as excess
☐	Holding Sub Loc	A more specific description of the physical location of an asset within its Location.
☐	Intrf Sys Cd	A code that identifies the Interface System.
☐	IT Device Cd	Indicates a particular type of IT asset.
☐	IT Device Desc	Description of the IT Asset
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	Lot Nbr	Manufacturer assigned number that identifies items produced on the same production run.

☐	Mat Doc Nbr	DPAS assigned identifier for an item being reported as excess to DISA. This number is used to obtain status of excessed equipment in the ADP and appears on the DISA disposition document.
☐	Media Sts Cd	A unique column that holds the code used by the lookup table which coincides with the associated dspl_desc - description
☐	Mfr Cd	Code that identifies the Manufacturer of the asset that is available for redistribution
☐	Mfr Part Nbr	Number used to record the make or model of a specific piece of equipment.
☐	Mfr Yr	Year an asset was manufactured/built/improved.
☐	Model Nbr	The specific number assigned to identify the make/model of an asset.
☐	NIIN	NIIN-National Item Identification Number.The second part of the NSN (National Stock Number). The NIIN consists of a 2 position NATO/Country Code, and a 7 position nbr serially assigned without regard to the kind of item or its classification
☐	Pilferable Sensitive Cd	Code that identifies any pilferable or sensitive information for asset available for redistribution
☐	Precious Mtl Cd	A one position alphanumeric code used to identify items that have precious metals as part of their content. Precious metals are those metals generally considered to be uncommon and highly valuable. Use this code to make sure that precious metal is recover
☐	Printed	Printed Flag indicates that the transaction has been printed on a report (No indicates not printed, Yes indicates printed)
☐	Prj Cd	Project Code. Used to define specific uses or projects for which the asset is intended
☐	Process Cycle Id	An identifier used for restarting a program from the point of failure. The processing cycle id is stored in the sys_parm_header and detail table. The processing cycle is usually the YYYYMMDD HHMMSS
☐	Remarks	A text field available to record local information/reason for change to record.
☐	Process Sts Cd	Provides current status of a row(s) being processed
☐	Prop	Identifies asset as being property managed or Not property managed.
☐	Remarks	A text field available to record local information/reason for change to record.
☐	RIC	Identifies an activity. RICs are three position codes which have multiple uses. RICs are source of supply codes, inter and intra-system routing codes and shipper codes. The first position of the RIC will indicate the service of the activity code
☐	RIC From	Identifies an activity. RICs are three position codes which have multiple uses. RICs are source of supply codes, inter and intra-system routing codes and shipper codes. The first position of the RIC will indicate the service of the activity code
☐	Rpt Address1	The primary address name of a particular activity, agency or facility. When used, a second address area (Address2) is available to enter additional address information.
☐	Rpt Address2	Used in conjunction with Address1, Address2 provides additional address information for a particular activity, agency or facility.

☐	Rpt City	The name of the city of the responsible activity reporting the Asset, or city where excess asset/real property facility is located. For School Donation, the name of the School and city address where the excess asset is being donated.
☐	Rpt Country Cd	Identifies the country of the DRMO site.
☐	Rpt DODAAC	DODAAC of site reporting asset for redistribution
☐	Rpt E-Mail Address	Electronic mail address of POC at site reporting asset for redistribution
☐	Rpt POC	Individual to contact at site reporting asset for redistribution
☐	Rpt POC DSN	Reporting POC DSN Phone Number. DSN phone number of POC at site reporting asset for redistribution
☐	Rpt POC Phone Nbr	Reporting POC Commercial Phone Number. Commercial phone number of POC at site reporting asset for redistribution
☐	Rpt ZIP Cd	Zip Code of a particular activity.
☐	Shelf Life Cd	A code assigned to a shelf life item to identify the period of time beginning with the date of manufacturer/assembly/pack and terminated by the date which an item must be used like expiration date or subjected to inspection/test/restoration/disposal action.
☐	Signal Cd	Designates the fields that contain the intended consignee (Ship to) and the Activity to receive and pay the bills, when applicable.
☐	Spcl Ctl Item Cd	Indicates assets that require special controls, including sensitive, regulated, principal, explosive or hazardous
☐	State	State where site reporting asset for redistribution is phycially located
☐	Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☐	Suffix Cd	Used to identify partial shipment until the shipment is received.
☐	Supp Address	Identifies an address if the bill to/ship to user identifier is other than the one depicted in the register document number. Enter Job Order Number, DODAAC, etc. based on the supply support requirements.
☐	Svcg DODAAC	Servicing DODAAC. Identifies the Disposal Activity that services the generator of the "Excess" action
☐	Tran Cd	This code identifies the type of transaction processed.
☐	Type Action	identifies the type of action taken against the asset being reported for redistribution
☐	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.
☐	Unit Cube	A data field indicating the maximum cube of the unit pack.
☐	Unit Wt	Data field indicating the maximum gross weight of the unit pack.
☐	Yr Svc Life	Number of years of recommended service life based upon applicable directives.

Cancel Reset Show Inquiry Submit

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

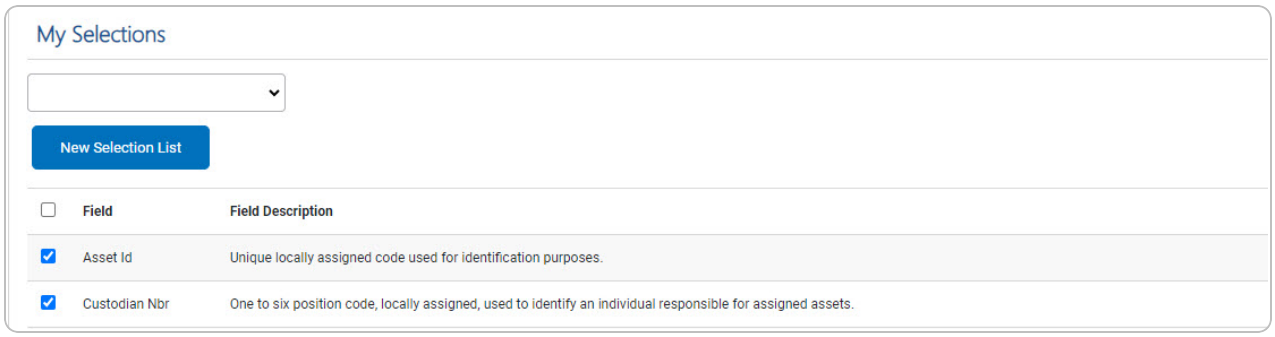
Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.*

Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

Select Show Inquiry for small volumes of data. *The* ***Excess Asset Inquiry — Results*** *page appears.*



5.

OR

Select Submit for large volumes of data. *The **Excess Asset Inquiry Transaction Status** page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

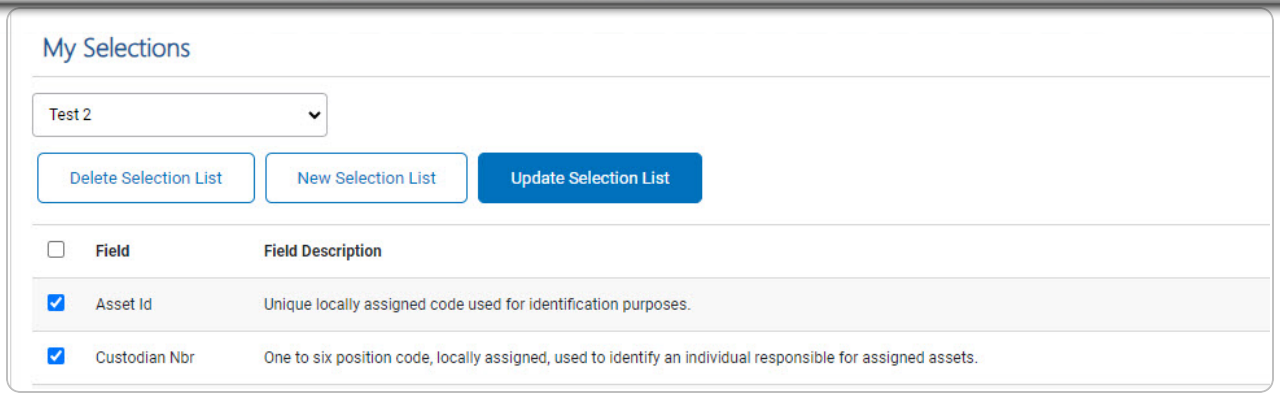
   Select Show Inquiry for small volumes of data. *The **Excess Asset Inquiry — Results** page appears.*

3. **OR**

   Select Submit for large volumes of data. *The **Excess Asset Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



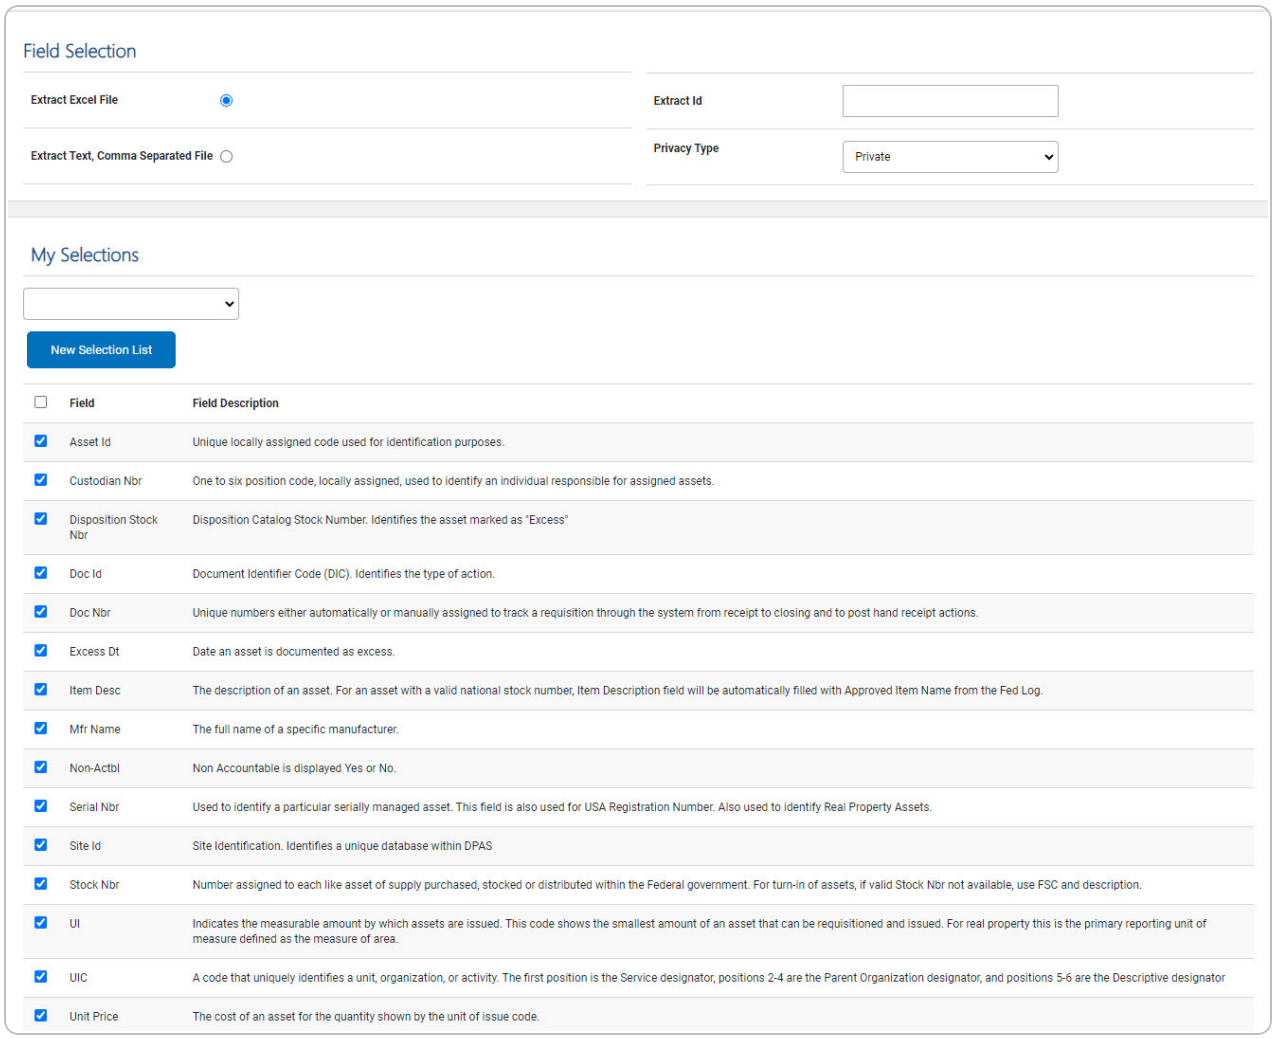
2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*
4. Select Show Inquiry for small volumes of data. *The* ***Excess Asset Inquiry — Results*** *page appears.*

OR

Select Submit for large volumes of data. *The* ***Excess Asset Inquiry Transaction Status*** *page appears.*

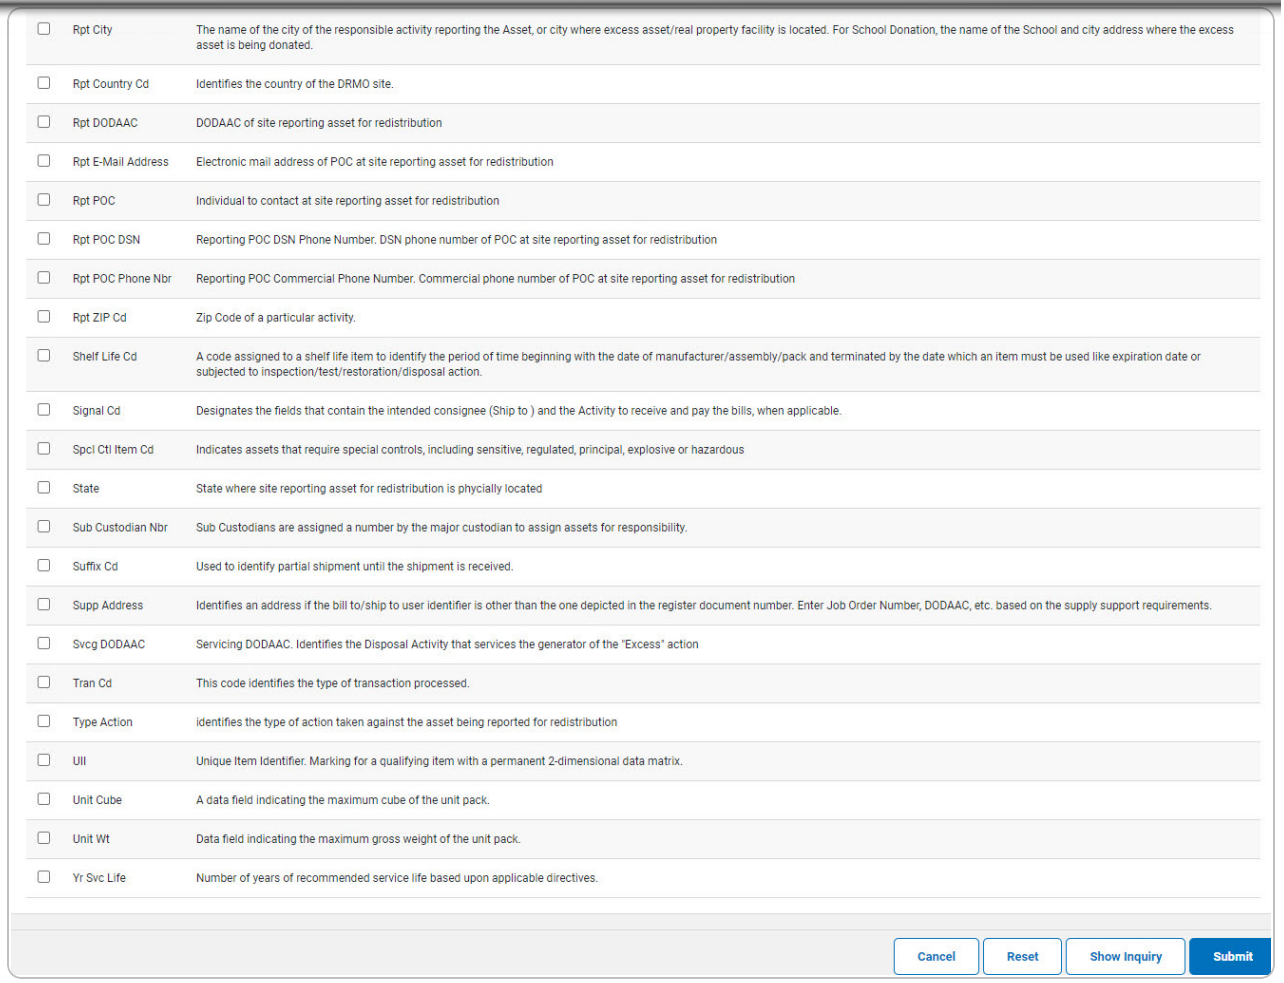
Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry



Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Excess Asset Inquiry** page appears.*

Search for a Disposal Activity Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

   A. Use ⌄ to select the first Available Field.

   B. Repeat Step A to add additional search criteria.

Note

Adding another Available Field automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

   A. Use to select the first Operands.

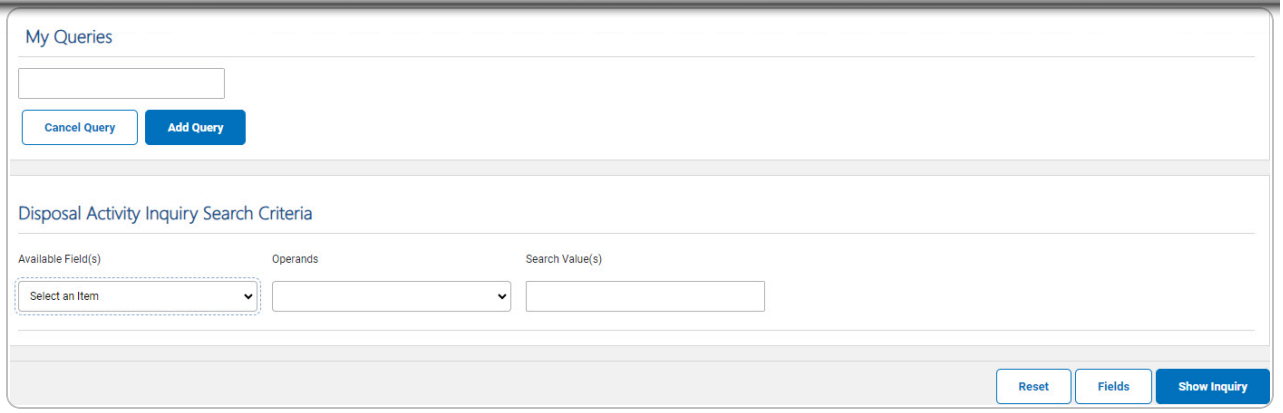
   B. Repeat Step A to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

   A. Use to select the first Search Value.

   B. Repeat Step A to add additional search criteria.

Remove an Available Field Row



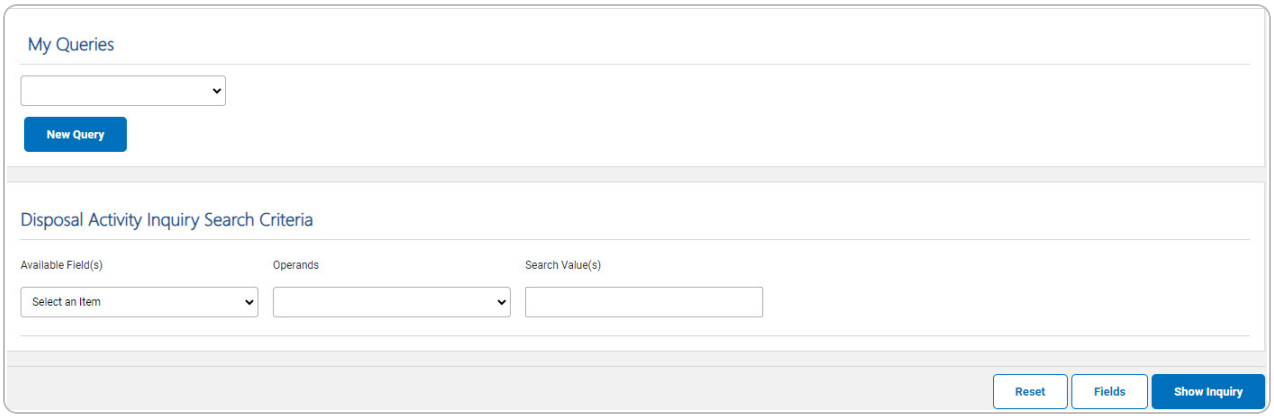
a. Use to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Disposal Activity Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*



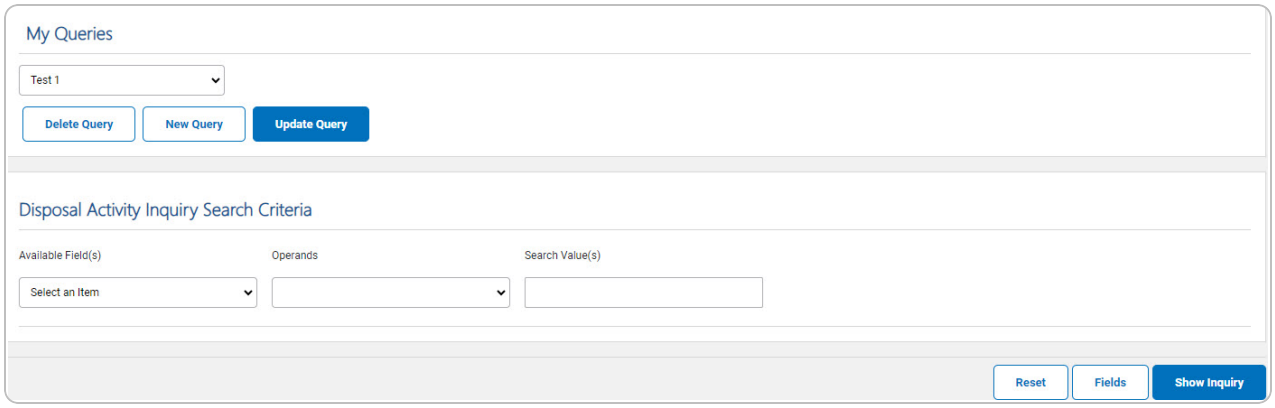
2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*
5. Select Fields. *The* ***Disposal Activity Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Disposal Activity Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



2. Select Fields. *The **Disposal Activity Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Disposal Activity Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and New Query is joined by Update Query and Delete Query. The selected query information appears in the search criteria grid.*

2. *Add and/or Remove rows in the Search Criteria grid as needed.*
3. Select Update Query. *The query information is updated.*

   Select Fields. *The **Disposal Activity Inquiry — Select Fields** page appears.*

4. OR

   Select Show Inquiry. *The **Disposal Activity Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query. *The selected query information appears in the search criteria grid.*

2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The* ***Disposal Activity Inquiry — Select Fields*** *page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.

18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..
13 — Mandatory Entry: *Available Field(s)*.	Missing Entry. No data was entered. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Operands*.	
13 — Mandatory Entry: *Query Name*.	
xxxx – Saved Inquiry already exists. Select Update Query **or** Delete Query **.**	Invalid Entry. The inquiry already exists in the database. Use the existing inquiry, or select Update Query to revise the existing query.
102 — Inquiry already exists.	Invalid entry. The Inquiry is already established. Re-enter the inquiry or select Update Query or Delete Query to modify the existing inquiry.
106 — Operand must be =, >, <, >= , <= , <>, or Like.	Missing Entry. The Field value was entered, but no operand was selected. Choose an operand from the drop-down menu.
31 — To perform Search, data must be entered in one or more fields.	Missing Entry. At least one field is necessary to perform the search. Enter at least one field, then select the Search button.

65 — No record(s) match search criteria.	Invalid Entry. Results for the search criteria entered do not exist. Enter different Search Criteria and try the Search again.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The* ***Disposal Activity Inquiry*** *page appears.*

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the* ***View Inquiry Extract*** *page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the* ***View Inquiry Extract*** *page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the* ***View Inquiry Extract*** *page, and does not change the file name.*

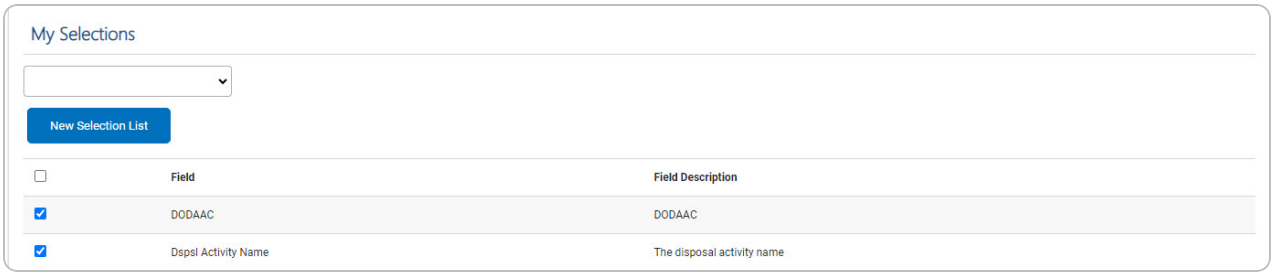
4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.



2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

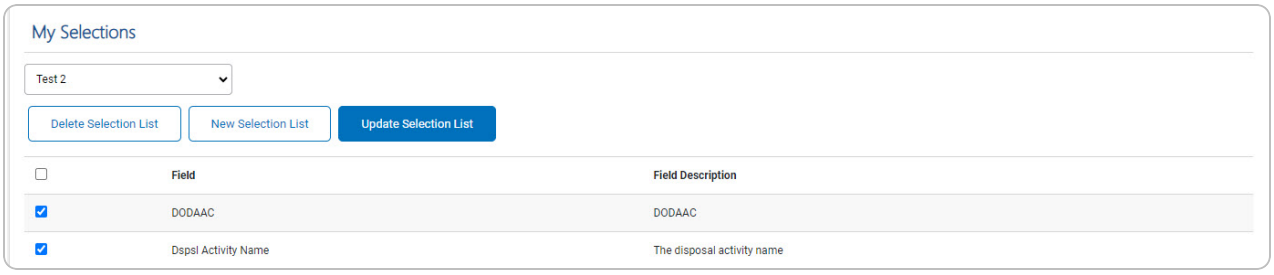
   Select Show Inquiry for small volumes of data. *The* ***Disposal Activity Inquiry — Results*** *page appears.*
5. **OR**

   Select Submit for large volumes of data. *The* ***Disposal Activity Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*



3. Select Show Inquiry for small volumes of data. *The* ***Disposal Activity Inquiry — Results*** *page appears.*

OR

Select Submit for large volumes of data. *The* ***Disposal Activity Inquiry Transaction Status*** *page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

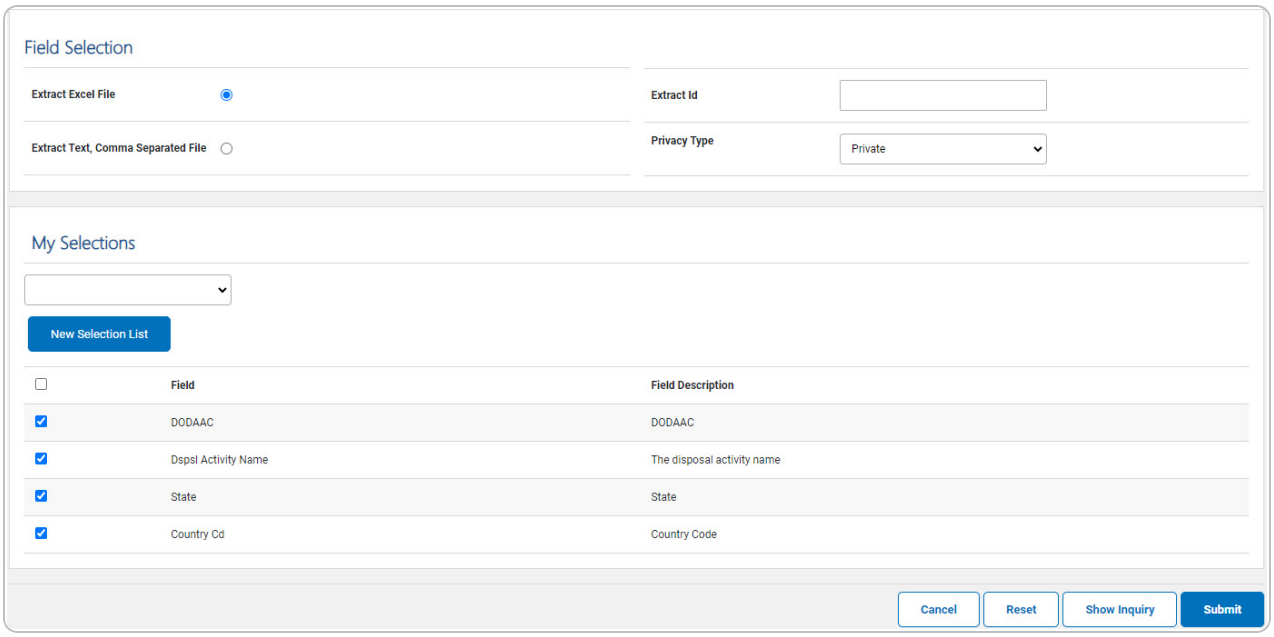
   Select Show Inquiry for small volumes of data. *The* ***Disposal Activity Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Disposal Activity Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Disposal Activity Inquiry** page appears.*

2. Select the fields required for the inquiry. *The first 4 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the DoDAAC contains the appropriate ☑ or ☐. *Select if the inquiry contains a DoDAAC.*
- Verify the Dspsl Acty Name contains the appropriate ☑ or ☐. *Select if the inquiry contains a Dspsl Acty Name.*
- Verify the State contains the appropriate ☑ or ☐. *Select if the inquiry contains a State.*
- Verify the Country Cd contains the appropriate ☑ or ☐. *Select if the inquiry has a Country Cd.*

Select Show Inquiry for small volumes of data. *The **Disposal Activity Inquiry — Results** page appears.*

3. **OR**

Select Submit for large volumes of data. *The **Disposal Activity Inquiry Transaction Status** page appears.*

Select Fields for the Disposal Designee Code Inquiry

Overview

The Disposal Designee Code Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > Asset Management > Disposal Designee > Search Criteria > Fields > Disposal Designee Code Inquiry Fields Selection page

Page Fields

The following fields display on the **Disposal Designee Code Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

191	Excel is the only reliable print format for this inquiry.
252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
xxxx	Where available, select "Row" to view details for specific record.
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.
290	Do not "Export" large volumes of data, select "Back" button then select "Submit" button on the Field Selection Page

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The* ***Disposal Designee Code Inquiry*** *page appears.*

2. Choose the desired file type:

   - Click ○ to select Extract Excel File. *The extracted file on the* ***View Inquiry Extract*** *page is an .XLS file.*

OR

Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select **New Selection List**. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select **Add Selection List**. *The page refreshes, and the selected list is added.*

Add Selection List *is replaced by* **Update Selection List** *and* Delete Selection List.

Select **Show Inquiry** for small volumes of data. *The **Disposal Designee Code Inquiry — Results** page appears.*

5.

OR

Select Submit for large volumes of data. *The* ***Disposal Designee Code Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

   Select Show Inquiry for small volumes of data. *The* ***Disposal Designee Code Inquiry — Results*** *page appears.*

3. **OR**

   Select Submit for large volumes of data. *The* ***Disposal Designee Code Inquiry Transaction Status*** *page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

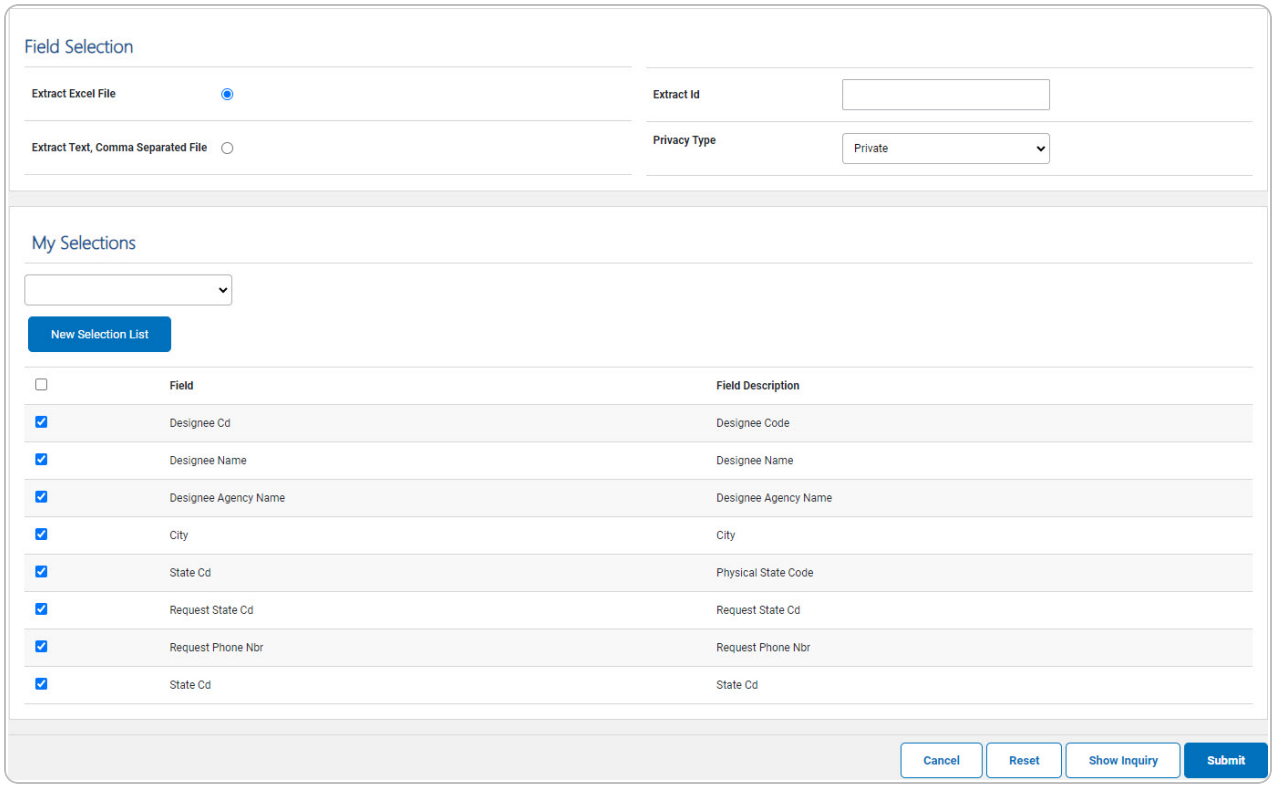
2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***Disposal Designee Code Inquiry — Results*** *page appears.*
4. **OR**

   Select Submit for large volumes of data. *The* ***Disposal Designee Code Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The* ***Disposal Designee Code Inquiry*** *page appears.*

2. Select the fields required for the inquiry. *8 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the Designee CD contains the appropriate ☑ or ☐. *Select if the inquiry contains a Designee Code.*
- Verify the Designee Name contains the appropriate ☑ or ☐. *Select if the inquiry contains a Designee Name.*
- Verify the Designee Agency Name contains the appropriate ☑ or ☐. *Select if the inquiry contains a Designee Agency Name.*
- Verify the City contains the appropriate ☑ or ☐. *Select if the inquiry has a City.*
- Verify the State CD contains the appropriate ☑ or ☐. *Select if the inquiry has a State CD.*
- Verify the Request State CD contains the appropriate ☑ or ☐. *Select if the inquiry has a Request State Code.*
- Verify the Request Phone NBR contains the appropriate ☑ or ☐. *Select if the inquiry has a Request Phone Number.*
- Verify the State CD contains the appropriate ☑ or ☐. *Select if the inquiry has a State CD.*

3. Select Show Inquiry for small volumes of data. *The **Disposal Designee Code Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Disposal Designee Code Inquiry Transaction Status** page appears.*

Search for an Asset By Acquisition Program Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

A. Use ⌄ to select the first Available Field.

B. Repeat Step A to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Use ⌄ to select the second Operands.

C. Repeat Step B to add additional search criteria.

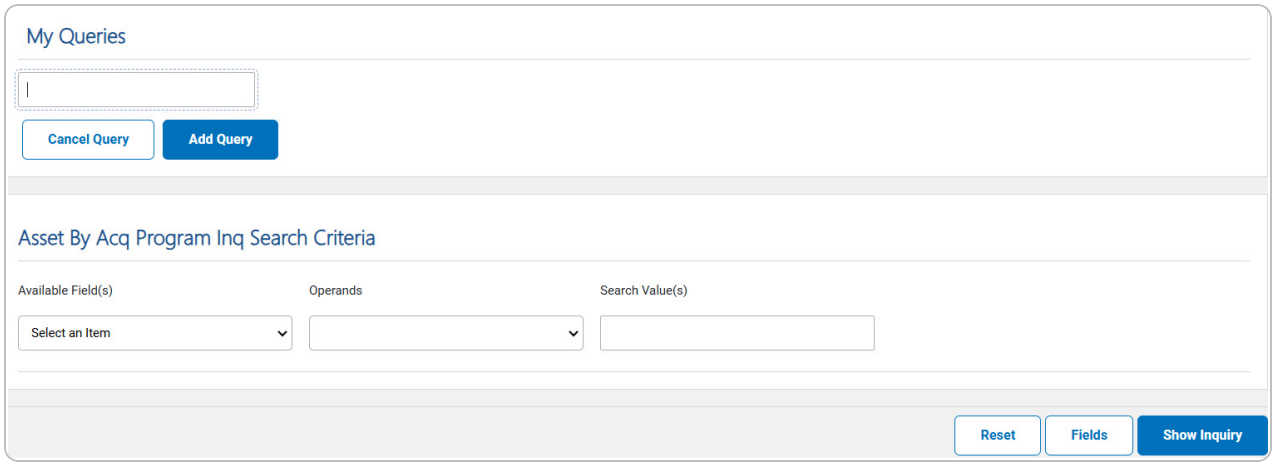
4. *Choose which Search Value(s) to use in the search.*

A. Use ⌄ to select the first Search Value.

B. Use ⌄ to select the second Search Value.

C. Repeat Step B to add additional search criteria.

Remove an Available Field Row



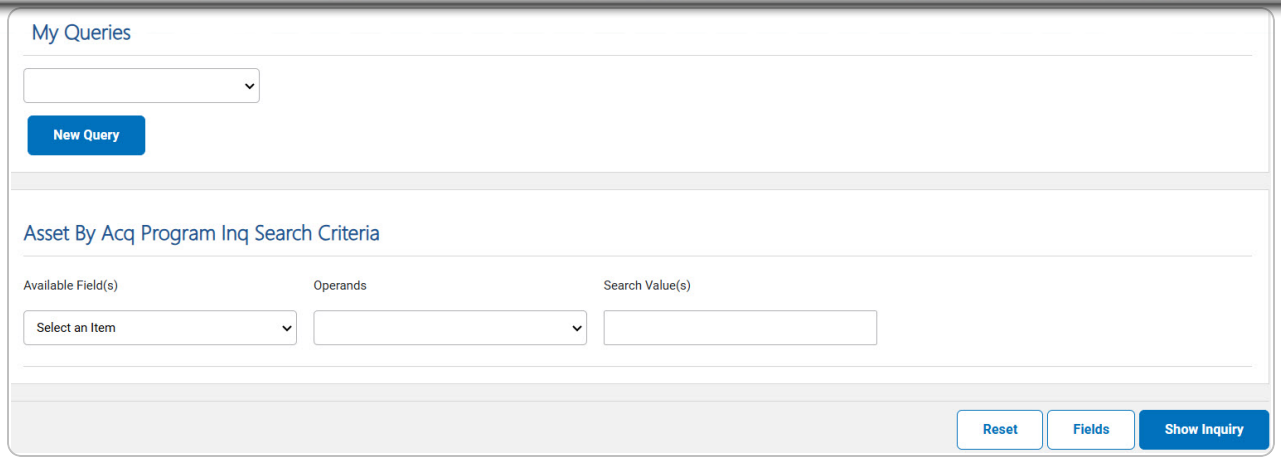
a. Use ⌄ to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Asset By Acquisition Program Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*



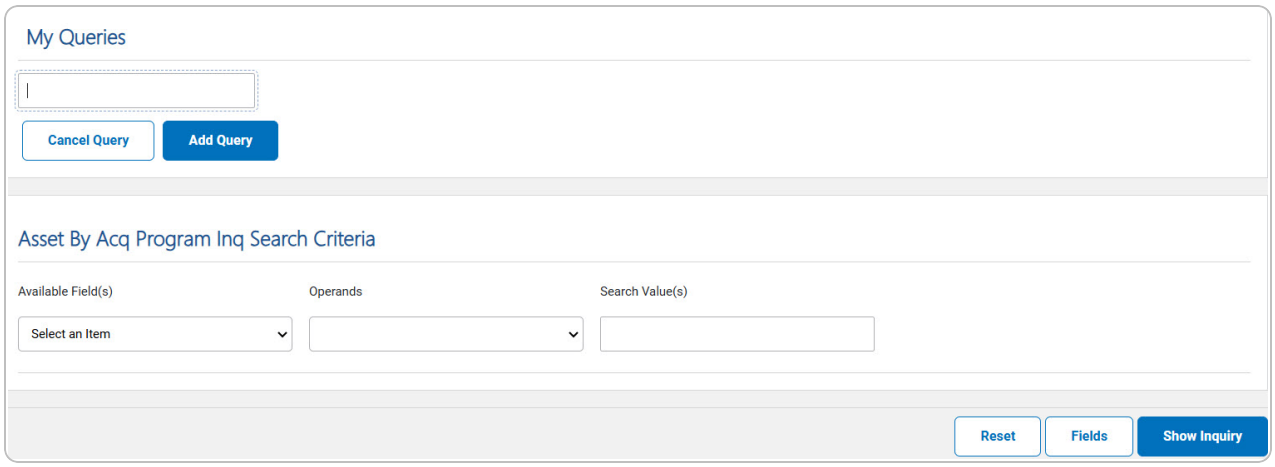
2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*

   Select Fields. *The* ***Asset By Acquisition Program Inquiry — Select Fields*** *page appears.*
5. OR

   Select Show Inquiry. *The* ***Asset By Acquisition Program Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



Select Fields. *The **Asset By Acquisition Program Inquiry — Select Fields** page appears.*

2. OR

Select Show Inquiry. *The **Asset By Acquisition Program Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*

   Select Fields. *The **Asset By Acquisition Program Inquiry — Select Fields** page appears.*

4. OR

   Select Show Inquiry. *The **Asset By Acquisition Program Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*

3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Asset By Acquisition Program Inquiry — Select Fields** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..
13 — Mandatory Entry: *Available Field(s)*.	Missing Entry. No data was entered. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Operands*.	
13 — Mandatory Entry: *Query Name*.	
xxxx – Saved Inquiry already exists. Select Update Query **or** Delete Query **.**	Invalid Entry. The inquiry already exists in the database. Use the existing inquiry, or select Update Query to revise the existing query.
102 — Inquiry already exists.	Invalid entry. The Inquiry is already established. Re-enter the inquiry or select

	Update Query or Delete Query to modify the existing inquiry.
106 — Operand must be =, >, <, >= , <= , <>, or Like.	Missing Entry. The Field value was entered, but no operand was selected. Choose an operand from the drop-down menu.
31 — To perform Search, data must be entered in one or more fields.	Missing Entry. At least one field is necessary to perform the search. Enter at least one field, then select the Search button.
65 — No record(s) match search criteria.	Invalid Entry. Results for the search criteria entered do not exist. Enter different Search Criteria and try the Search again.
xxxx – Please add at least one more search criteria.	Missing Entry. The Field value is missing. Select an Item to proceed.

My Selections

New Selection List

	Field	Field Description
☑	Acq Pgm Name	Unique identifier associated with a program under which assets are procured.
☑	Actbl UIC	Accountable Unit Identification Code - The UIC of the organization that is assigned management responsibility for property belonging to a specific unit organization, or activity. Multiple UICs may be grouped under an Accountable UIC to consolidate data for accountability and accounting system reporting purposes.
☑	Agency Name	The name assigned to the agency.
☑	Asset Id	Unique locally assigned code used for identification purposes.
☑	Custodian Nbr	One to six position code, locally assigned, used to identify an individual responsible for assigned assets.
☑	Item Desc	The description of an asset. For an asset with a valid national stock number, Item Description field will be automatically filled with Approved Item Name from the Fed Log.
☑	Loc	Physical location of an asset.
☑	Mfr Name	The full name of a specific manufacturer.
☑	Mfr Part Nbr	Number used to record the make or model of a specific piece of equipment.
☑	Mfr Yr	Year an asset was manufactured/built/improved.
☑	Mfr Model Nbr	The specific number assigned to identify the make/model of an asset.
☑	Qty	Quantity on hand or transaction quantity
☑	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☑	Site Id	The active Site Id the user has access to.
☑	Status	The active flag is set if the lookup record is active and available under default conditions
☑	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☑	Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☑	Sub Loc	A more specific description of the physical location of an asset within its Location.
☑	Total Cost	Total Cost. Cost of individual end item assets including cost of stand-alone components
☑	Type Dsg Name	A unique name referred to as Type Designation that identifies the asset type, usage, purpose, and variant within an Acquisition Program Type Designation Name.
☑	UI	Indicates the measurable amount by which assets are issued. This code shows the smallest amount of an asset that can be requisitioned and issued. For real property this is the primary reporting unit of measure defined as the measure of area.
☑	UIC	The UIC of the maintenance activity assigned to service the asset.
☑	Yr Svc Life	Number of years of recommended service life based upon applicable directives.
☐	ACC-SFIS	Pos. 1-2 identifies the accounting class of assets. Remaining positions identify the SFIS code.
☐	Acct Rpt Nbr	Report number assigned when the accounting data is generated
☐	Accumd Deprn	Total depreciation incurred to date. Includes depreciation incurred by the current holder and prior holder(s) of the capital asset.
☐	Acq Dt	The fund approval/obligation date.

☐	ACRN	Two position alpha or alpha/numeric code assigned to each discrete accounting classification citation within a contract.
☐	Activation Dt	The date a Serial Asset was put into use.
☐	Agency Defined1	Agency set user defined function
☐	Agency Defined2	Agency set user defined function
☐	Agency Defined3	Agency set user defined function
☐	Agency Defined4	Agency set user defined function
☐	Agency Defined5	Agency set user defined function
☐	ARC	Designates an asset as expendable, non-expendable or durable.
☐	ASN	This number is the revised APPN. This field includes the Appropriation Allotment Serial Number and the Funds Code
☐	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Asset Level Cd	A unique column that holds the code used by the lookup table which coincides with the associated description. Indicates if item is end item or component and if asset has lower level components.
☐	Asset Pilferable	Asset Pilferable Flag. Yes or No
☐	Asset Sts Cd	Used to keep track of the status of an asset.
☐	Basic Symbol	A four digit number that identifies the type of funds being used.
☐	Calibration Cd	Identifies assets requiring periodic calibration.
☐	Cause Lst Inv Dt Chg	Identifies how the lst inv dt was modified. Program description or Inv List Nbr.
☐	Cause Lst Rcl Dt Chg	Identifies how the Rcl Last Inv Date was modified. Program description of Inv List Nbr.
☐	Cause of Suspt Loss	Identifies the Inv List Nbr or program that most recently changed the suspected loss status code.
☐	CIIC	Indicates the security classification, security risk or pilferage controls required for storage and transportation of DoD assets.
☐	CLIN	A four position field that identifies different contract line items within the same contract.
☐	Cntr/PO Nbr	Assigned by the procurement activity and used to identify requests for a supply purchase.
☐	Cond Cd	Used to classify material for degree of serviceability, condition, and completeness in terms of readiness for issue, and to identify actions underway to change status of materiel. This Field defaults to (A) but can be updated.
☐	Cntr Nbr	Unique value used to identify agreements with suppliers and contractors.
☐	Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code required by the Accounting Interface System.
☐	Cptl Cd	Denotes capital asset not in use, or capital asset with a dollar value under the specified dollar threshold or an asset over a specified dollar threshold that is non-capital.
☐	Current Mnth Deprn Amt	The total computed depreciation amount for the month
☐	Deprn Cd	Indicates whether the asset is a capital asset and if fiduciary reportable by DPAS. C – Capital/Non-Reportable, N – Non-Capital/Non-Reportable, T - Capital/Reportable.
☐	Deprn Cost Center	Cost Control Number/Office where the depreciation expense is charged.
☐	Deprn Exp Cd	Identifies the depreciation expense as funded or unfunded.
☐	Deprn Job Order Nbr	Job order number where the depreciation expense is charged.
☐	Deprn Period	Number of months depreciation will be expensed. Minimum number allowed is 24. Code values represent the maximum number of allowable months based on applicable directives.
☐	Deprn Sts Cd	A code and description that identifies the depreciation status of the asset/real property/improvement.
☐	Deprn Task Cd	Task Code/Cost Acct Code/Organization Code where the depreciation expense is charged.
☐	Dept Cd	A three position code which identifies the military department of government entity receiving the appropriation. (Also called Agency Cd or Treasury Symbol.)
☐	Dmil Cd	The code that represents instructions for removal of functional or military characteristics of a materiel item.
☐	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☐	Dollar Amt	The dollar amount of construction in progress/work in process, real property or the dollar amount of the accounting transaction.
☐	Embedded Cost	Identifies the unit cost of a component as embedded in the total cost of the end item. Bulk component is automatically embedded.
☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt	The date this row was inserted into the database.
☐	Excess Action Cd	Code which indicates the action being taken for the excess asset. Codes (E, P and I) are system generated. For code (W) (Withdraw), there is a Check Box used to withdraw previously reported excess asset.
☐	Excess Doc Nbr	A system generated number that is used to track potential Excess (Prenotification) and Excess notifications asset. This number is generated for either prenotification or excess actions
☐	Excess Dt	Date an asset is documented as excess.
☐	Excess Type Action Cd	Excess Action type code which indicates the action being taken for the excess asset

☐	Expr Dt	The date the asset is no longer considered usable for its intended purpose, or the date the authority to operate the asset ends.
☐	Fdcry Deprn Mthd Cd	The depreciation method (Straight Line or Activity Based) used to fidiuciary report depreciation as depicted by the Stock Nbr.
☐	FSC	Number which provides the capability to identify the Federal Supply Class that would be assigned to a nonstandard national stock number.
☐	Fund Cd	Used to identify type funding used in the acquisition of assets/services.
☐	FY Cost	Accumulated monthly depreciation to date, in a fiscal year.
☐	Haz Mat Cd	Code identifying explosives and other dangerous articles which require special handling in shipment as freight.
☐	Inv By Serial Nbr	Is asset to be inventoried by Serial Number. Yes or No.
☐	Inv Custodian Nbr	A unique system generated number that identifies the custodian id inventory the associated asset is included on
☐	Inv Input Type	Identifies how the inventory data was entered in the database.
☐	Inv Loc	The physical location of an asset when it was inventoried.
☐	Inv Qty	Inventory Quantity. The quantity for bulk items
☐	Inv Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☐	Inv Sub Loc	The sub location where the asset was last inventoried.
☐	Inv UIC	UIC asset recorded when inventoried
☐	Inv User Id	Identifies the user who last inventoried this asset.
☐	IT Device Cd	Indicates a particular type of IT asset.
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Last Inv Dt/Tm	Last Inventory Date - Date the last official inventory of a particular asset or group of assets was conducted
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	Lease Cd	Indicates the lease status of a particular asset.
☐	LIN/TAMCN - Catalog	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Numbers.
☐	LIN/TAMCN Desc	Description that the Line Item Number / Table of Authorized Material Control Number represents.
☐	LOA	Identifies the department code, period of availability, basic symbol, and subhead of the original appropriation.
☐	Loan Cd	Indicates the loan status of a particular asset.
☐	Mode of Shipment	Identifies the method of shipment.
☐	Loan Rcvd Dt	The date the assets warranty, service, or loan has been received.
☐	Loaning DODAAC/CAGE Cd	A code that identifies a Department of Defense Activity Address or a Commercial and Government Entity
☐	Loan Notfy Cd	Identifies if loan is between a DPAS to DPAS Non-WAWF user, between a DPAS to Non-DPAS user or between a DPAS to DPAS WAWF user.
☐	Local Rcpt Dt	Date asset received
☐	Lot Nbr	Manufacturer assigned number that identifies items produced on the same production run.
☐	Mat Doc Nbr	DPAS assigned identifier for an item being reported as excess to DISA. This number is used to obtain status of excessed equipment in the ADP and appears on the DISA disposition document.
☐	Loan Rcvd By	The name of the entity that received the loan.
☐	Custodian Name	The name assigned to the property custodian.
☐	Non-Actbl	Non Accountable is displayed Yes or No.
☐	Obj Class Cd	Identifies labor and materiel resources utilized in the production processes that apply to accounting transactions.
☐	Obj Class Cd2	First two-positions identifies the Expense Code.
☐	Oblign Doc Nbr	Number used by accounting to track each obligation record.
☐	Origl In Svc Dt	A date that an acquisition was placed in service
☐	Pgm Yr	Identifies the beginning/ending year of the appropriation in YYYYYYYY format.
☐	Precious Mtl Cd	Identifies items that have precious metals as part of their content. Precious metals are those metals generally considered to be uncommon and highly valuable
☐	Prior Deprn	Total accumulated depreciation incurred by previous holders of the capital asset.
☐	Rcl Inv Input Type	Reconciliation Inventory Input Type. Identifies how the reconciliation data was entered in the database
☐	Rcl Inv User Id	Identifies the user id of who entered the inventory data.
☐	Rcl Last Inv Dt	The date of the last reconciled official inventory of the asset.

☐	Rcl Loc	Location of asset when inventoried reconciled
☐	Rcl Qty	Quantity of asset when inventoried/reconciled
☐	Rcl Sub Loc	Sub Location of asset when inventoried/reconciled
☐	Rcpt Action Cd	Code signifying the receipt action processed
☐	Rcpt Action Type Cd	Code signifying the type of receipt action
☐	Rcpt Doc Nbr	Doc Nbr used to receive asset
☐	Rcvd By	The name of the entity that received the asset.
☐	Remarks	A text field available to record local information/reason for change to record.
☐	Report Acty Name	The name of the installation/activity reporting/responsible for the excess asset or the name of the activity where excess asset is located.
☐	Reportable Cd	A code assigned to items that identifies the level of reporting.
☐	RFID Tag	The tag number for a RFID tag.
☐	Salvage Value Amt	Estimated value remaining at the end of a capital assets useful life or the amount that can be expected to be recovered from the assets disposal when removed from service.
☐	Shelf Life Cd	A code assigned to a shelf life item to identify the period of time beginning with the date of manufacturer/assembly/pack and terminated by the date which an item must be used like expiration date or subjected to inspection/test/restoration/disposal action.
☐	Shipment Dt	Shipment Date. User Input.
☐	TCN	Shipment of Transportation Control Id
☐	SLIN	A item that is used in place of an authorized LIN.
☐	SPIIN	Four to six position field added to the basic procurement instrument identification number that identifies amendments/modifications, or calls orders under contract.
☐	Sub Head	A four digit suffix to the Basic Symbol that identifies a subdivision of funds.
☐	Suspt Loss Chg Dt	The date of a Suspected Loss Change
☐	Suspt Loss Dt	The date of a Suspected Loss
☐	Suspt Loss Sts Cd	Indicates the status of an asset that is missing.
☐	Sys Desc	The description of the system identification
☐	Sys Id	Used to tie various end items and components together into a system.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Trading Basic Symbol	A 4-position code that identifies the type of funds being used.
☐	Trading Dept Cd	A 3-position alphanumeric code that identifies the Department or Agency used to facilitate the preparation of the Financial Report.
☐	Trading Partner Nbr	This code identifies the intragovernmental trading partner for transfer actions. Used when reporting eliminations in the CFO Accounting Statement Report.
☐	Trading Subhead	A 4-position alphanumeric code used in financial transactions.
☐	Tran Cd	This code identifies the type of transaction processed.
☐	Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
☐	Tran Qty	Transaction Quantity of the item being processed.
☐	Transfer Type Cd	Code to let user know what type of fund the asset has been transferred from or being transferred to.
☐	Type Asset Cd	Identifies the category of an asset as General PP&E, National Defense PP&E or Heritage Asset.
☐	Type Fund Cd	A code that indicates if assets were purchased with Defense Working Capital Funds (DWCF).
☐	UIC Name	A unit, organization, or activity name
☐	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.
☐	Util Measure Cd	The measure used to calculate depreciation for fiduciary reporting the assets Depreciation Amount.
☐	Util Svc Life	Indicates how long an asset is expected to last, in terms of the Util Measure, before being fully depreciated.

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

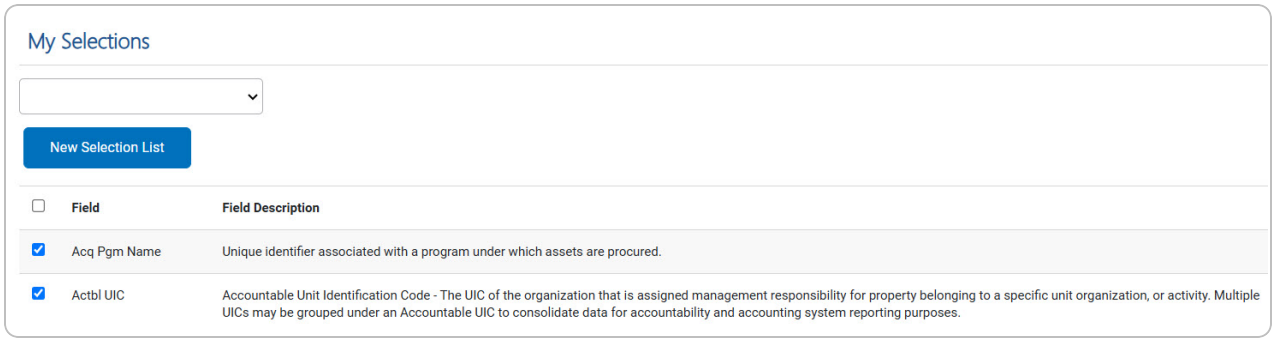
1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.*

Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.



Select Show Inquiry for small volumes of data. *The **Asset By Acquisition Program Inquiry — Results** page appears.*

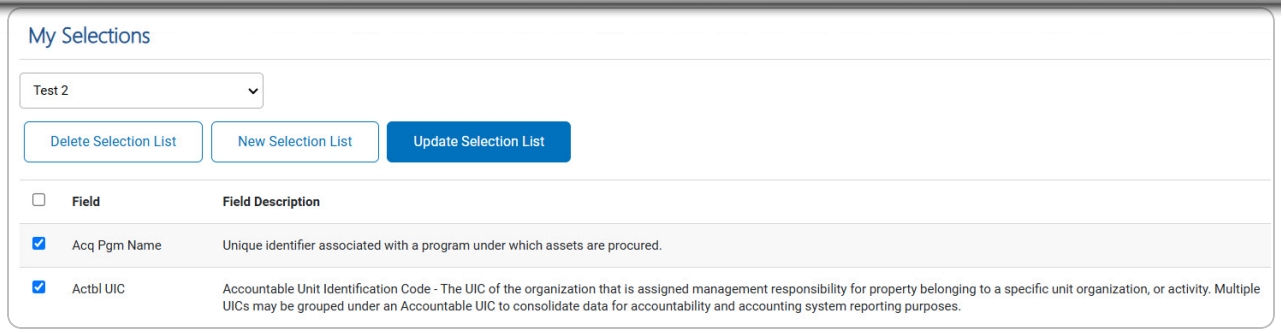
5. **OR**

Select Submit for large volumes of data. *The **Asset By Acquisition Program Inquiry Transaction Status** page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*



Select Show Inquiry for small volumes of data. *The **Asset By Acquisition Program Inquiry — Results** page appears.*

3. **OR**

Select Submit for large volumes of data. *The **Asset By Acquisition Program Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

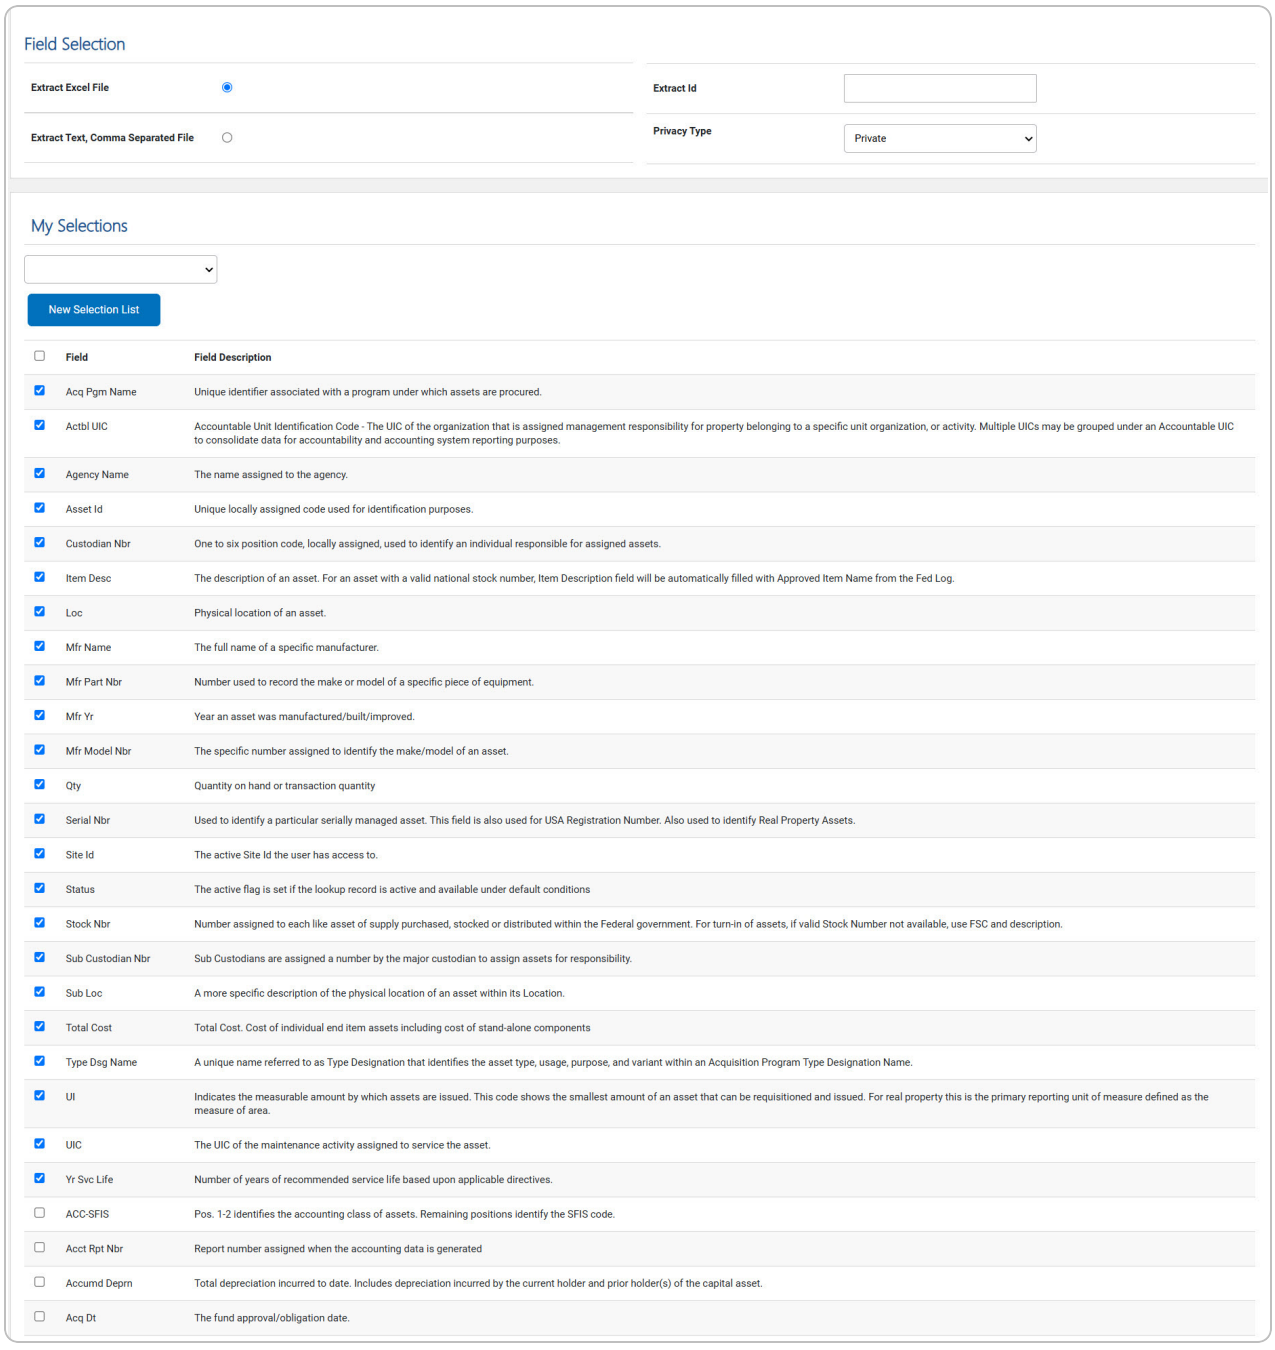
   Select Show Inquiry for small volumes of data. *The* ***Asset By Acquisition Program Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Asset By Acquisition Program Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Asset By Acquisition Program Inquiry** page appears.*

My Selections

New Selection List

	Field	Field Description
☑	Acq Pgm Name	Unique identifier associated with a program under which assets are procured.
☑	Actbl UIC	Accountable Unit Identification Code - The UIC of the organization that is assigned management responsibility for property belonging to a specific unit organization, or activity. Multiple UICs may be grouped under an Accountable UIC to consolidate data for accountability and accounting system reporting purposes.
☑	Agency Name	The name assigned to the agency.
☑	Asset Id	Unique locally assigned code used for identification purposes.
☑	Custodian Nbr	One to six position code, locally assigned, used to identify an individual responsible for assigned assets.
☑	Item Desc	The description of an asset. For an asset with a valid national stock number, Item Description field will be automatically filled with Approved Item Name from the Fed Log.
☑	Loc	Physical location of an asset.
☑	Mfr Name	The full name of a specific manufacturer.
☑	Mfr Part Nbr	Number used to record the make or model of a specific piece of equipment.
☑	Mfr Yr	Year an asset was manufactured/built/improved.
☑	Mfr Model Nbr	The specific number assigned to identify the make/model of an asset.
☑	Qty	Quantity on hand or transaction quantity
☑	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☑	Site Id	The active Site Id the user has access to.
☑	Status	The active flag is set if the lookup record is active and available under default conditions
☑	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☑	Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☑	Sub Loc	A more specific description of the physical location of an asset within its Location.
☑	Total Cost	Total Cost. Cost of individual end item assets including cost of stand-alone components
☑	Type Dsg Name	A unique name referred to as Type Designation that identifies the asset type, usage, purpose, and variant within an Acquisition Program Type Designation Name.
☑	UI	Indicates the measurable amount by which assets are issued. This code shows the smallest amount of an asset that can be requisitioned and issued. For real property this is the primary reporting unit of measure defined as the measure of area.
☑	UIC	The UIC of the maintenance activity assigned to service the asset.
☑	Yr Svc Life	Number of years of recommended service life based upon applicable directives.
☐	ACC-SFIS	Pos. 1-2 identifies the accounting class of assets. Remaining positions identify the SFIS code.
☐	Acct Rpt Nbr	Report number assigned when the accounting data is generated
☐	Accumd Deprn	Total depreciation incurred to date. Includes depreciation incurred by the current holder and prior holder(s) of the capital asset.
☐	Acq Dt	The fund approval/obligation date.

☐	ACRN	Two position alpha or alpha/numeric code assigned to each discrete accounting classification citation within a contract.
☐	Activation Dt	The date a Serial Asset was put into use.
☐	Agency Defined1	Agency set user defined function
☐	Agency Defined2	Agency set user defined function
☐	Agency Defined3	Agency set user defined function
☐	Agency Defined4	Agency set user defined function
☐	Agency Defined5	Agency set user defined function
☐	ARC	Designates an asset as expendable, non-expendable or durable.
☐	ASN	This number is the revised APPN. This field includes the Appropriation Allotment Serial Number and the Funds Code
☐	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Asset Level Cd	A unique column that holds the code used by the lookup table which coincides with the associated description. Indicates if item is end item or component and if asset has lower level components.
☐	Asset Pilferable	Asset Pilferable Flag. Yes or No
☐	Asset Sts Cd	Used to keep track of the status of an asset.
☐	Basic Symbol	A four digit number that identifies the type of funds being used.
☐	Calibration Cd	Identifies assets requiring periodic calibration.
☐	Cause Lst Inv Dt Chg	Identifies how the lst inv dt was modified. Program description or Inv List Nbr.
☐	Cause Lst Rcl Dt Chg	Identifies how the Rcl Last Inv Date was modified. Program description of Inv List Nbr.
☐	Cause of Suspt Loss	Identifies the Inv List Nbr or program that most recently changed the suspected loss status code.
☐	CIIC	Indicates the security classification, security risk or pilferage controls required for storage and transportation of DoD assets.
☐	CLIN	A four position field that identifies different contract line items within the same contract.
☐	Cntr/PO Nbr	Assigned by the procurement activity and used to identify requests for a supply purchase.
☐	Cond Cd	Used to classify material for degree of serviceability, condition, and completeness in terms of readiness for issue, and to identify actions underway to change status of materiel. This Field defaults to (A) but can be updated.
☐	Cntr Nbr	Unique value used to identify agreements with suppliers and contractors.
☐	Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code required by the Accounting Interface System.
☐	Cptl Cd	Denotes capital asset not in use, or capital asset with a dollar value under the specified dollar threshold or an asset over a specified dollar threshold that is non-capital.
☐	Current Mnth Deprn Amt	The total computed depreciation amount for the month
☐	Deprn Cd	Indicates whether the asset is a capital asset and if fiduciary reportable by DPAS. C – Capital/Non-Reportable, N – Non-Capital/Non-Reportable, T - Capital/Reportable.
☐	Deprn Cost Center	Cost Control Number/Office where the depreciation expense is charged.
☐	Deprn Exp Cd	Identifies the depreciation expense as funded or unfunded.
☐	Deprn Job Order Nbr	Job order number where the depreciation expense is charged.
☐	Deprn Period	Number of months depreciation will be expensed. Minimum number allowed is 24. Code values represent the maximum number of allowable months based on applicable directives.
☐	Deprn Sts Cd	A code and description that identifies the depreciation status of the asset/real property/improvement.
☐	Deprn Task Cd	Task Code/Cost Acct Code/Organization Code where the depreciation expense is charged.
☐	Dept Cd	A three position code which identifies the military department of government entity receiving the appropriation. (Also called Agency Cd or Treasury Symbol.)
☐	Dmil Cd	The code that represents instructions for removal of functional or military characteristics of a materiel item.
☐	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☐	Dollar Amt	The dollar amount of construction in progress/work in process, real property or the dollar amount of the accounting transaction.
☐	Embedded Cost	Identifies the unit cost of a component as embedded in the total cost of the end item. Bulk component is automatically embedded.
☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt	The date this row was inserted into the database.
☐	Excess Action Cd	Code which indicates the action being taken for the excess asset. Codes (E, P and I) are system generated. For code (W) (Withdraw), there is a Check Box used to withdraw previously reported excess asset.
☐	Excess Doc Nbr	A system generated number that is used to track potential Excess (Prenotification) and Excess notifications asset. This number is generated for either prenotification or excess actions
☐	Excess Dt	Date an asset is documented as excess.
☐	Excess Type Action Cd	Excess Action type code which indicates the action being taken for the excess asset

☐	Expr Dt	The date the asset is no longer considered usable for its intended purpose, or the date the authority to operate the asset ends.
☐	Fdcry Deprn Mthd Cd	The depreciation method (Straight Line or Activity Based) used to fidiuciary report depreciation as depicted by the Stock Nbr.
☐	FSC	Number which provides the capability to identify the Federal Supply Class that would be assigned to a nonstandard national stock number.
☐	Fund Cd	Used to identify type funding used in the acquisition of assets/services.
☐	FY Cost	Accumulated monthly depreciation to date, in a fiscal year.
☐	Haz Mat Cd	Code identifying explosives and other dangerous articles which require special handling in shipment as freight.
☐	Inv By Serial Nbr	Is asset to be inventoried by Serial Number. Yes or No.
☐	Inv Custodian Nbr	A unique system generated number that identifies the custodian id inventory the associated asset is included on
☐	Inv Input Type	Identifies how the inventory data was entered in the database.
☐	Inv Loc	The physical location of an asset when it was inventoried.
☐	Inv Qty	Inventory Quantity. The quantity for bulk items
☐	Inv Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☐	Inv Sub Loc	The sub location where the asset was last inventoried.
☐	Inv UIC	UIC asset recorded when inventoried
☐	Inv User Id	Identifies the user who last inventoried this asset.
☐	IT Device Cd	Indicates a particular type of IT asset.
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Last Inv Dt/Tm	Last Inventory Date - Date the last official inventory of a particular asset or group of assets was conducted
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	Lease Cd	Indicates the lease status of a particular asset.
☐	LIN/TAMCN - Catalog	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Numbers.
☐	LIN/TAMCN Desc	Description that the Line Item Number / Table of Authorized Material Control Number represents.
☐	LOA	Identifies the department code, period of availability, basic symbol, and subhead of the original appropriation.
☐	Loan Cd	Indicates the loan status of a particular asset.
☐	Mode of Shipment	Identifies the method of shipment.
☐	Loan Rcvd Dt	The date the assets warranty, service, or loan has been received.
☐	Loaning DODAAC/CAGE Cd	A code that identifies a Department of Defense Activity Address or a Commercial and Government Entity
☐	Loan Notfy Cd	Identifies if loan is between a DPAS to DPAS Non-WAWF user, between a DPAS to Non-DPAS user or between a DPAS to DPAS WAWF user.
☐	Local Rcpt Dt	Date asset received
☐	Lot Nbr	Manufacturer assigned number that identifies items produced on the same production run.
☐	Mat Doc Nbr	DPAS assigned identifier for an item being reported as excess to DISA. This number is used to obtain status of excessed equipment in the ADP and appears on the DISA disposition document.
☐	Loan Rcvd By	The name of the entity that received the loan.
☐	Custodian Name	The name assigned to the property custodian.
☐	Non-Actbl	Non Accountable is displayed Yes or No.
☐	Obj Class Cd	Identifies labor and materiel resources utilized in the production processes that apply to accounting transactions.
☐	Obj Class Cd2	First two-positions identifies the Expense Code.
☐	Oblign Doc Nbr	Number used by accounting to track each obligation record.
☐	Origl In Svc Dt	A date that an acquisition was placed in service
☐	Pgm Yr	Identifies the beginning/ending year of the appropriation in YYYYYYYY format.
☐	Precious Mtl Cd	Identifies items that have precious metals as part of their content. Precious metals are those metals generally considered to be uncommon and highly valuable
☐	Prior Deprn	Total accumulated depreciation incurred by previous holders of the capital asset.
☐	Rcl Inv Input Type	Reconciliation Inventory Input Type. Identifies how the reconciliation data was entered in the database
☐	Rcl Inv User Id	Identifies the user id of who entered the inventory data.
☐	Rcl Last Inv Dt	The date of the last reconciled official inventory of the asset.

☐	Rcl Loc	Location of asset when inventoried reconciled
☐	Rcl Qty	Quantity of asset when inventoried/reconciled
☐	Rcl Sub Loc	Sub Location of asset when inventoried/reconciled
☐	Rcpt Action Cd	Code signifying the receipt action processed
☐	Rcpt Action Type Cd	Code signifying the type of receipt action
☐	Rcpt Doc Nbr	Doc Nbr used to receive asset
☐	Rcvd By	The name of the entity that received the asset.
☐	Remarks	A text field available to record local information/reason for change to record.
☐	Report Acty Name	The name of the installation/activity reporting/responsible for the excess asset or the name of the activity where excess asset is located.
☐	Reportable Cd	A code assigned to items that identifies the level of reporting.
☐	RFID Tag	The tag number for a RFID tag.
☐	Salvage Value Amt	Estimated value remaining at the end of a capital assets useful life or the amount that can be expected to be recovered from the assets disposal when removed from service.
☐	Shelf Life Cd	A code assigned to a shelf life item to identify the period of time beginning with the date of manufacturer/assembly/pack and terminated by the date which an item must be used like expiration date or subjected to inspection/test/restoration/disposal action.
☐	Shipment Dt	Shipment Date. User Input.
☐	TCN	Shipment of Transportation Control Id
☐	SLIN	A item that is used in place of an authorized LIN.
☐	SPIIN	Four to six position field added to the basic procurement instrument identification number that identifies amendments/modifications, or calls orders under contract.
☐	Sub Head	A four digit suffix to the Basic Symbol that identifies a subdivision of funds.
☐	Suspt Loss Chg Dt	The date of a Suspected Loss Change
☐	Suspt Loss Dt	The date of a Suspected Loss
☐	Suspt Loss Sts Cd	Indicates the status of an asset that is missing.
☐	Sys Desc	The description of the system identification
☐	Sys Id	Used to tie various end items and components together into a system.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Trading Basic Symbol	A 4-position code that identifies the type of funds being used.
☐	Trading Dept Cd	A 3-position alphanumeric code that identifies the Department or Agency used to facilitate the preparation of the Financial Report.
☐	Trading Partner Nbr	This code identifies the intragovernmental trading partner for transfer actions. Used when reporting eliminations in the CFO Accounting Statement Report.
☐	Trading Subhead	A 4-position alphanumeric code used in financial transactions.
☐	Tran Cd	This code identifies the type of transaction processed.
☐	Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
☐	Tran Qty	Transaction Quantity of the item being processed.
☐	Transfer Type Cd	Code to let user know what type of fund the asset has been transferred from or being transferred to.
☐	Type Asset Cd	Identifies the category of an asset as General PP&E, National Defense PP&E or Heritage Asset.
☐	Type Fund Cd	A code that indicates if assets were purchased with Defense Working Capital Funds (DWCF).
☐	UIC Name	A unit, organization, or activity name
☐	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.
☐	Util Measure Cd	The measure used to calculate depreciation for fiduciary reporting the assets Depreciation Amount.
☐	Util Svc Life	Indicates how long an asset is expected to last, in terms of the Util Measure, before being fully depreciated.

Search for an Asset Legacy History Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

   A. *The first Available Field(s) option (TRAN DT FROM) automatically populates and is not editable.*

   B. *The second Available Field(s) option (TRAN DT TO) automatically populates and is not editable.*

   C. Use ⌄ to select the third Available Field.

   D. Repeat Step C to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

   A. Use ⌄ to select the first Operands.

   B. Use ⌄ to select the second Operands.

C. Use to select the third Operands.

D. Repeat Step C to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

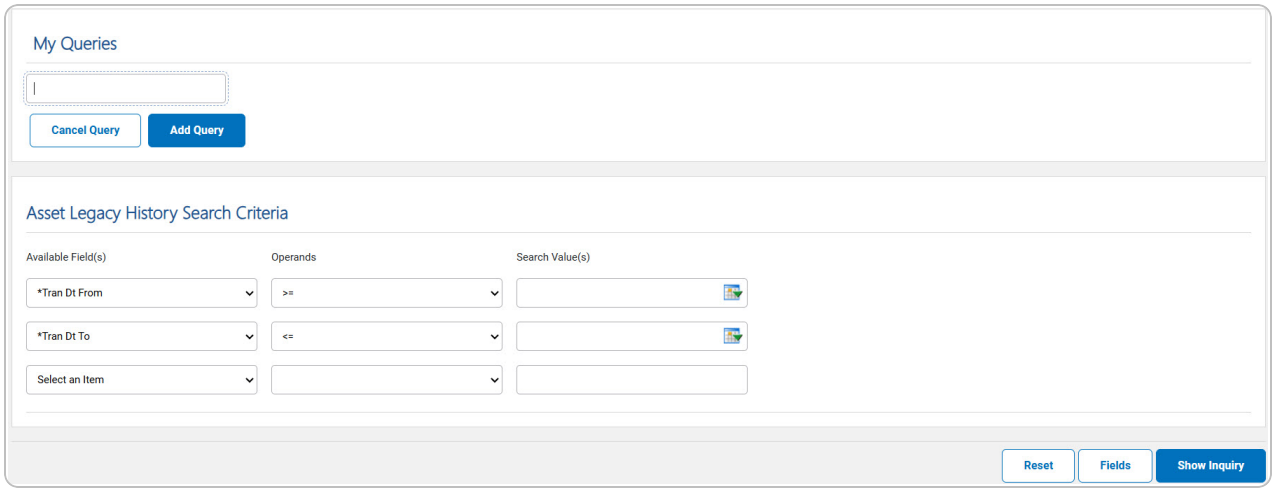
A. Use to select the first Search Value or enter the date (MM/DD/YYYY) in the field provided.

B. Use to select the second Search Value or enter the date (MM/DD/YYYY) in the field provided.

C. Use to select the third Search Value.

D. Repeat Step C to add additional search criteria.

Remove an Available Field Row



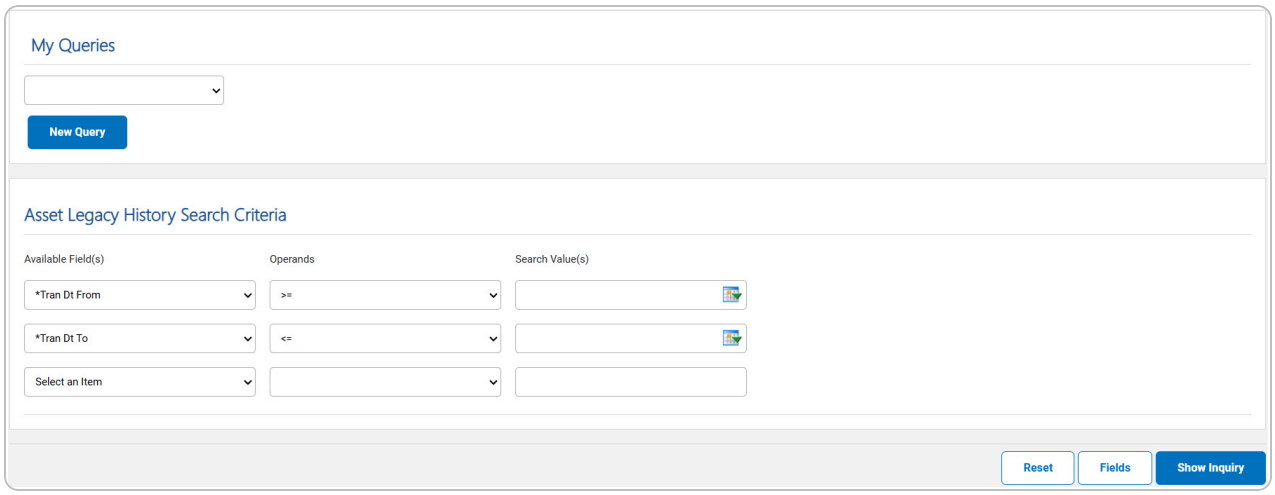
a. Use to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Asset Legacy History Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*



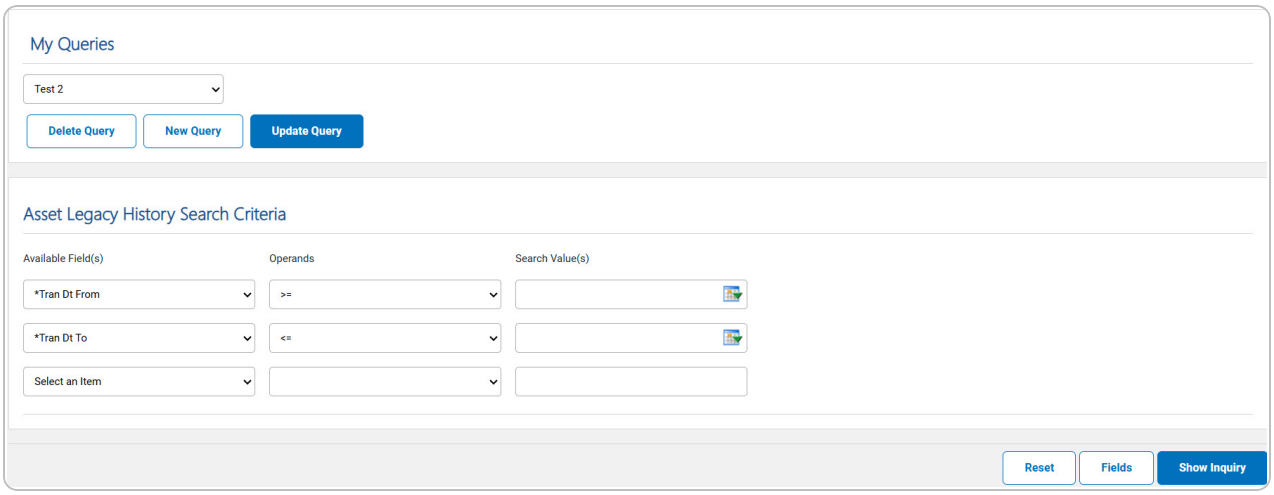
2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*
5. Select Fields. *The* ***Asset Legacy History Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Asset Legacy History Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



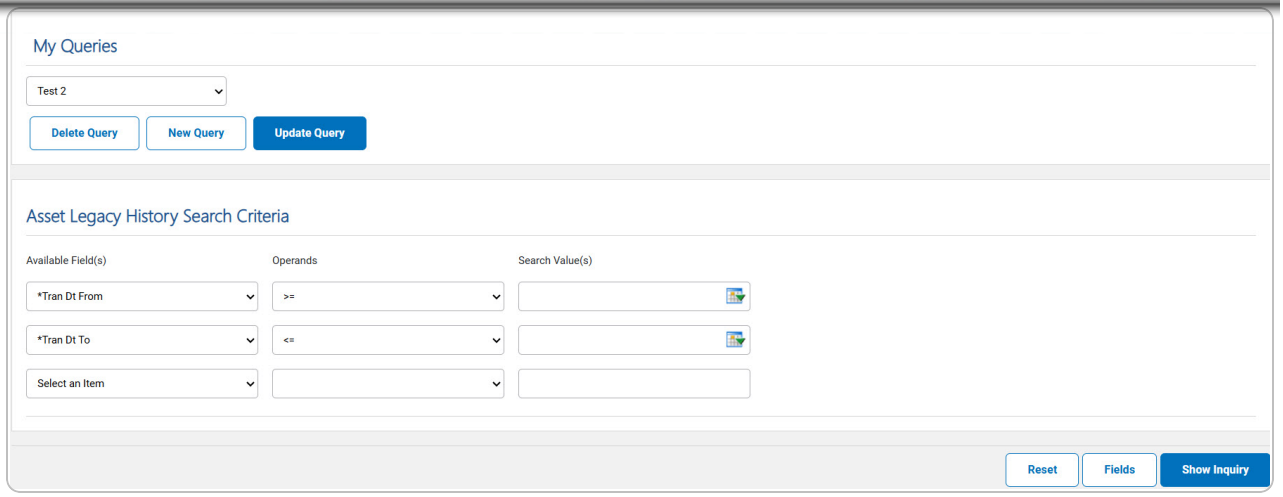
2. Select Fields. *The* ***Asset Legacy History Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Asset Legacy History Inquiry — Results*** *page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*



2. *Add and/or Remove rows in the Search Criteria grid as needed.*
3. Select Update Query*. The query information is updated.*
4. Select Fields*. The* ***Asset Legacy History Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry*. The* ***Asset Legacy History Inquiry — Results*** *page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Asset Legacy History Inquiry — Select Fields** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..

13 — Mandatory Entry: *Available Field(s)*.	
13 — Mandatory Entry: *Operands*.	Missing Entry. No data was entered. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Query Name*.	
xxxx – Saved Inquiry already exists. Select Update Query **or** Delete Query **.**	Invalid Entry. The inquiry already exists in the database. Use the existing inquiry, or select Update Query to revise the existing query.
102 — Inquiry already exists.	Invalid entry. The Inquiry is already established. Re-enter the inquiry or select Update Query or Delete Query to modify the existing inquiry.
106 — Operand must be =, >, <, >= , <= , <>, or Like.	Missing Entry. The Field value was entered, but no operand was selected. Choose an operand from the drop-down menu.
31 — To perform Search, data must be entered in one or more fields.	Missing Entry. At least one field is necessary to perform the search. Enter at least one field, then select the Search button.
65 — No record(s) match search criteria.	Invalid Entry. Results for the search criteria entered do not exist. Enter different Search Criteria and try the Search again.

Select Fields for the Asset Legacy History Inquiry

Overview

The Asset Legacy History Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > Asset Management > Asset Legacy History > Search Criteria > Fields > Asset Legacy History Inquiry Fields Selection page

Page Fields

The following fields display on the **Asset Legacy History Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

191	Excel is the only reliable print format for this inquiry.
252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
xxxx	Where available, select "Row" to view details for specific record.
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.
290	Do not "Export" large volumes of data, select "Back" button then select "Submit" button on the Field Selection Page

My Selections

New Selection List

	Field	Field Description
☑	Acct Rpt Nbr	Used to track ELMS transactions to the host accounting system (automatically assigned with the format of Activity Code, YYYYMMDD, and a four-position sequence number, i.e., (HP199608250001).)
☑	Acq Cost	Cost of an asset at the time of receipt.
☑	Acq Cost To	Revised cost of an asset at the time of receipt.
☑	APPN	A number defined by the supporting Budget Office to identify a subdivision of funds within an appropriation. Depending upon the requirements of the accounting system that supports your acivity, this code may or may not be a requirement.
☑	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☑	Authn Doc Nbr	Identifies the specific type authorization media (message, letter) used for asset requirements and authorization.
☑	Bar Cd	Unique locally assigned code used for identification purposes.
☑	Cptl Cd	Denotes capital asset not in use, or capital asset with a dollar value under the specified dollar threshold or an asset over a specified dollar threshold that is non-capital.
☑	Eff Dt	Date the transaction being entered occurred. Example: The transfer or receipt of property occurred on 2/15/06 is the effective date even though the date it was input into the computer may have been a later date.
☑	Fund Cd	Used to identify type funding used in the acquisition of assets/services.
☑	Loc	Physical location of an asset.
☑	Loc To	Revised Local Use
☑	HRH Nbr	The first one to six positions of the Hand Receipt Holder Nbr. Locally assigned.
☑	Nomen	(1) The description of an asset. For an asset with a valid national stock number, Nomen field will be automatically filled with Nomen from DA Supply Bulletin 700-20; (2) Used to describe Work in Process (WIP) or Construction in Progress (CIP)
☑	Oblign Doc Nbr	Number used by accounting to track each obligation record.
☑	Pgm Desc	The name or description of a grouping of program codes.
☑	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☑	Site Name	The site name.
☑	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Nbr not available, use FSC and description.
☑	Sub HRH Nbr	SUB - The last one to three positions of the Hand Receipt Holder Nbr. Locally assigned.
☑	Tran Dt From	The system date at time of transaction.

☑	LHAZ Time	The system time of the transaction posted to the Transaction History Table.
☑	UIC	A code that uniquely identifies a unit, organization, or activity. The first position is the Service designator, positions 2-4 are the Parent Organization designator, and positions 5-6 are the Descriptive designator.
☑	User Id	Identification number used by system user to gain access to the system.
☐	ACC	Identifies the accounting class of assets.
☐	ACC To	Revised code that identifies the accounting class of assets.
☐	Accumd Deprn	Revised total depreciation incurred to date. Includes depreciation incurred by the current holder and prior holder(s) of the capital asset.
☐	Accumd Deprn To	Revised Accumd Deprn
☐	Acq Cd	Indicates how the asset was acquired.
☐	Acq Dt	The fund approval/obligation date
☐	Acq Dt To	Revised Acquisition Dt
☐	ACRN	Two position alpha or alpha/numeric code assigned to each discrete accounting classification citation within a contract.
☐	ACRN To	Revised Accounting Classification Reference Number.
☐	Action Cd	Represents the type of action taken personal property or real property.
☐	Activation Dt	The date a Serial Asset was put into use.
☐	Agency Cd	Indicates the agency code and name.
☐	Agency Data Process	Assigned by the reporting agency focal point. This code must be unique within a Unit or Agency to identify a specific organization that manages or controls automation equipment.
☐	APPN To	Revised number defined by the supporting Budget Office to identify a subdivision of funds within an appropriation. Depending upon the requirements of the accounting system that supports your acivity, this code may or may not be a requirement.
☐	Asset Cd To	Revised code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Asset Sts Cd	Used to keep track of the status of an asset.
☐	Asset Sts Cd To	A revised code used to keep track of the status of an asset.
☐	Auth Ctl Nbr To	Revised Auth Ctl Nbr
☐	Authn Ctl Nbr	System generated number assigned to relate authorization data to actual hand receipt quantities.
☐	Authn Doc Nbr To	Revised Authn Doc Nbr
☐	Bar Cd To	Revised unique locally assigned code used for identification purposes
☐	Basic Symbol	A four digit number that identifies the type of funds being used.
☐	Basic Symbol To	A revised four digit number that identifies the type of funds being used
☐	CLIN	A four position field that identifies different contract line items within the same contract.
☐	CLIN To	Revised Contract Line Item Number.
☐	Cmpn Acq Cost	Cost of a component asset at the time of receipt.
☐	Cmpn Acq Cost To	Revised Component Acq Cost
☐	Cmpn Cost Cd	Indicates whether the cost of a component has been included in its end item cost.
☐	Cmpn Level	A system-generated code used to identify the various levels of components within an assemblage.
☐	Cmpn Level To	Revised system-generated code used to identify the various levels of components within an assemblage.
☐	Cmpn Qty	Number of components a particular end item contains.
☐	Cmpn Serial Nbr	The serial number of the component.
☐	Cmpn Stock Nbr	The stock number of the component.
☐	Cntr/PO Nbr	Assigned by the procurement activity and used to identify requests for a supply purchase.

☐	Cond Cd	Used to classify material for degree of serviceability, condition, and completeness in terms of readiness for issue, and to identify actions underway to change status of materiel. This Field defaults to (A) but can be updated.
☐	Cond Cd To	A revised code used to classify material for degree of serviceability, condition, and completeness in terms of readiness for issue, and to identify actions underway to change status of materiel. This Field defaults to (A) but can be updated.
☐	Cost Center	Users interfaced with AMCISS or SIFS should enter Cost Control Number. All other users should enter the requirement of the accounting system to which user is interfaced.
☐	Cptl Cd To	A revised code that denotes a capital asset
☐	Deinstallation Cost	Cost of dismantling an asset from the place and the configuration in which it was used.
☐	Deprn Job Order Nbr	Job order number where the depreciation expense is charged.
☐	Deprn Office	Cost Control Number/Office where the depreciation expense is charged.
☐	Deprn Period	Number of months depreciation will be expensed. Minimum number allowed is 24. Code values represent the maximum number of allowable months based on applicable directives.
☐	Deprn Period To	Revised Deprn Period
☐	Dept Cd	A three position code which identifies the military department of government entity receiving the appropriation. (Also called Agency Cd or Treasury Symbol.)
☐	Dept Cd To	Revised Dept Cd.
☐	Designee Cd	The designee code indicating where the excess equipment is being transferred to.
☐	Destn Id	User defined field that identifies the destination of a turned-in asset. This field will generally be an organizations acronym, i.e., Defense Logistics Agency may be shown as DLA.
☐	Doc Nbr	Unique numbers either automatically or manually assigned to track a requisition through the system from receipt to closing and to post hand receipt actions. For reversal actions, enter the Doc Nbr on the history record for the original increase/decrease
☐	Doc Nbr To	A revised code that identifies the specific type authorization media (message, letter) used for asset requirements and authorization.
☐	Eff Dt To	Revised date the transaction being entered occurred. Example: The transfer or receipt of property occurred on 2/15/06 is the effective date even though the date it was input into the computer may have been a later date.
☐	Excess Action	Code which indicates the action being taken for the excess asset. Codes (E, P and I) are system generated. For code (W) (Withdraw), there is a Check Box used to withdraw previously reported excess asset.
☐	Excess Cond Cd	Indicates the action being taken for the excess asset. If asset is ADP reportable, a two position ADP Condition Code is required. For non-ADP assets, a one-position condition code (See Cond Cd) is required.
☐	Excess Dt	Date an asset is documented as excess.
☐	Excess Remv Dt	Date an asset is withdrawn from excess.
☐	Exp Cd	Code that identifies whether depreciation should be considered (funded or unfunded).
☐	Expr Dt	The date the asset is no longer considered usable for its intended purpose, or the date the authority to operate the asset ends.
☐	Expr Dt To	A revised code where the date the asset is no longer considered usable for its intended purpose, or the date the authority to operate the asset ends.
☐	Full Deprn Cd	A code to indicate a serial asset is fully depreciated.
☐	Fund Cd To	Revised Code used to identify type funding used in the acquisition of assets/services.
☐	Gain Loss Amt	Will record the amount of Loss or Gain taken on a Transaction
☐	HA Serial Nbr	This field represents the serial number of a higher assemblage to the component.
☐	HA Serial Nbr To	Revised code that represents the serial number of a higher assemblage to the component.
☐	HA Stock Nbr	This field represents the stock number of a higher assemblage to the component.
☐	HA Stock Nbr To	Revised code that represents the stock number of a higher assemblage to the component.
☐	Impv Cost	Total cost of improving serial asset which will extend the useful life of the asset.
☐	Installation Cost	Cost of installing an asset in the place and in the configuration which it will be used.

☐	IPE Nbr	Unique number assigned by the Defense Industrial Plant Equipment Center in response to a request by an activity for the asset. This only applies to items with FSC of 3400 costing $5,000.00. No longer used for new receipts.
☐	IPE Nbr To	Revised unique number assigned by the Defense Industrial Plant Equipment Center in response to a request by an activity for the asset. This only applies to items with FSC of 3400 costing $5,000.00. No longer used for new receipts.
☐	IT Device Cd	Indicates a particular type of IT Asset.
☐	IT Owner Cd	Indicates the ownership classification of the equipment.
☐	IT Sys Id	A user defined system number used to identify designated system configuration within a Defense Reporting Activity. The assigned number should not be duplicated within a DRA. (Refer to DRA Cd.)
☐	IT Sys Id To	A revised user defined system number used to identify designated system configuration within a Defense Reporting Activity. The assigned number should not be duplicated within a DRA. (Refer to DRA Cd.)
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Job Order Nbr To	Revised Job Order Nbr.
☐	Lo Le Cd	Indicates the loan/lease status of a particular asset.
☐	Lo Le Cd To	Revised code that indicates the loan/lease status of a particular asset.
☐	LOA	Identifies the department code, period of availability, basic symbol, and subhead of the original appropriation.
☐	LOA To	Revised code that identifies the department code, period of availability, basic symbol, and subhead of the original appropriation.
☐	Local Use	Comment field reserved for use by each activity.
☐	Local Use To	Revised comment field reserved for use by each activity.
☐	Lot Nbr	Manufacturer assigned number that identifies items produced on the same production run.
☐	Lot Nbr To	A revised manufacturer assigned number that identifies items produced on the same production run.
☐	HRH Nbr To	A revised code that represents the first one to six positions of the Hand Receipt Holder Nbr. Locally assigned.
☐	Mat Doc Nbr	ELMS assigned identifier for an item being reported as excess to DISA. This number is used to obtain status of excessed equipment in the ADP and appears on the DISA disposition document.
☐	Mat Item Nbr	ELMS assigned number to an item being reported as excess to DISA. Number appears on DISA disposition document.
☐	Mfr Key Id	Unique key in manufacturer name sequence identifying manufacturer data for a specific stock number residing on the Manufacturers Model/Part Number Table (LHAC). Use Manufacturers Part Number Add/Change/Delete process to establish a manufacturer key.
☐	Mfr Key Id To	A revised unique key in manufacturer name sequence identifying manufacturer data for a specific stock number residing on the Manufacturers Model/Part Number Table (LHAC). Use Manufacturers Part Number Add/Change/Delete process to establish a manufacturer key.
☐	Mfr Yr	Year an asset was manufactured/built/improved.
☐	Mfr Yr To	The revised year an asset was manufactured/built/improved.
☐	Obj Class Cd	Identifies labor and materiel resources utilized in the production processes that apply to accounting transactions.
☐	Object Class Cd To	Revised Object Class Code.

☐	Oblign Doc Nbr To	Revised number used by accounting to track each obligation record.
☐	Official Id To	Revised name of the office where the Major Custodian is located
☐	PBIC	A code that identifies the type of property contained in a property book (i.e., I = installation, O = organizational).
☐	PBIC To	Revised code that identifies the type of property contained in a property book (i.e., I = installation, O = organizational).
☐	Pgm Name	Unique software identification.
☐	Pgm Yr	Identifies the beginning/ending year of the appropriation in YYYYYYYY format.
☐	Pgm Yr To	Revised Program Yr
☐	Prior Deprn	Total accumulated depreciation incurred by previous holders of the capital asset.
☐	Qty	Quantity of transaction.
☐	Rcl Last Inv Dt/Tm	The date of the last reconciled official inventory of the asset.
☐	Rcl Last Inv Dt/Tm To	Revised date of the last reconciled official inventory of the asset.
☐	Remarks	A text field available to record local information/reason for change to record.
☐	Req Kit Qty	Authorized quantity of a particular asset within a set or kit assemblage.
☐	Residual Value	Estimated value remaining at the end of a capital assets useful life or the amount that can be expected to be recovered from the assets disposal when removed from service.
☐	RIC	A code assigned to items that identifies the level of reporting.
☐	RIC Exempt	Identifies assets that are exempt from reporting to UIT.
☐	RIC Exempt To	Revised code that identifies assets that are exempt from reporting to UIT.
☐	RIC To	Revised code assigned to items that identifies the level of reporting.
☐	Sell Price	Field to show the amount an asset has been sold for.
☐	Serial Nbr To	Revised Serial Nbr.
☐	Site Cd	Identifies physical location of stored equipment.
☐	Site Cd To	Revised code that identifies physical location of stored equipment.
☐	Site Id	Identifies a unique activity database within ELMS.
☐	Site Id To	Revised Site Identification
☐	SLIN	Two numeric or 2 alpha characters added to the basic contract line item number to identify separate subline items.
☐	SLIN To	Revised two numeric or 2 alpha characters added to the basic contract line item number to identify separate subline items.
☐	SPIIN	Four to six position field added to the basic procurement instrument identification number that identifies amendments/modifications, or calls orders under contract.

☐	SPIIN To	Revised four to six position field added to the basic procurement instrument identification number that identifies amendments/modifications, or calls orders under contract.
☐	Stock Nbr To	Revised number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☐	Sub Head	A four digit suffix to the Basic Symbol that identifies a subdivision of funds.
☐	Sub Head To	Revised four digit suffix to the Basic Symbol that identifies a subdivision of funds.
☐	Sub HRH Nbr To	Revised first one to six positions of the Hand Receipt Holder Nbr. Locally assigned.
☐	Sub Loc	A more specific description of the physical location of an asset within its Location.
☐	Sub Loc To	Revised more specific description of the physical location of an asset within its Location.
☐	Sys Id	Used to tie various end items and components together into a system.
☐	Sys Id To	Revised code used to tie various end items and components together into a system.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Task Cd To	Revised code that indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	TDA Para Nbr	Identifies a specific organization within a specific Unit Identification Code (UIC).
☐	TDA Para Nbr To	Revised code that identifies a specific organization within a specific Unit Identification Code (UIC).
☐	Trading Partner Nbr	This code identifies the intragovernmental trading partner for transfer actions. Used when reporting eliminations in the CFO Accounting Statement Report.
☐	Trading Partner Nbr To	This code identifies the intragovernmental trading partner for transfer actions. Used when reporting eliminations in the CFO Accounting Statement Report.
☐	Transfer Cd	User defined codes for the categories of disposal for assets (i.e. M = Mission, CRU = Community Re-use).
☐	Transfer Type Cd	Code to let user know what type of fund the asset has been transferred from or being transferred to.
☐	Transfer Type Cd To	Revised code to let user know what type of fund the asset has been transferred from or being transferred to.
☐	Trnsp Cost	Cost of transporting assets from the shipment point to the destination point.
☐	Type Asset Cd	Identifies the category of an asset as General PP&E, National Defense PP&E or Heritage Asset.
☐	Type Fund Id	A code that indicates if assets were purchased with Defense Working Capital Funds (DWCF).
☐	UIC TO	Revised code that uniquely identifies a unit, organization, or activity. The first position is the Service designator, positions 2-4 are the Parent Organization designator, and positions 5-6 are the Descriptive designator
☐	UID	The Unique Identifier that ensures uniqueness of items that are listed in the registry.
☐	UID To	Revised Unique Identifier that ensures uniqueness of items that are listed in the registry.
☐	Yr Svc Life	Number of years of recommended service life based upon applicable directives.
☐	Yr Svc Life To	Revised number of years of recommended service life based upon applicable directives.

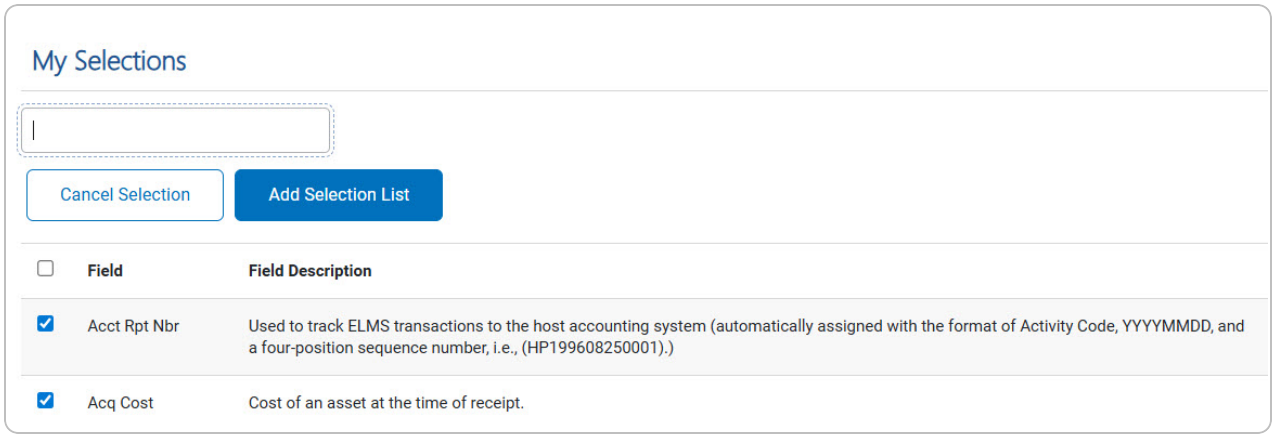
2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

OR



Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

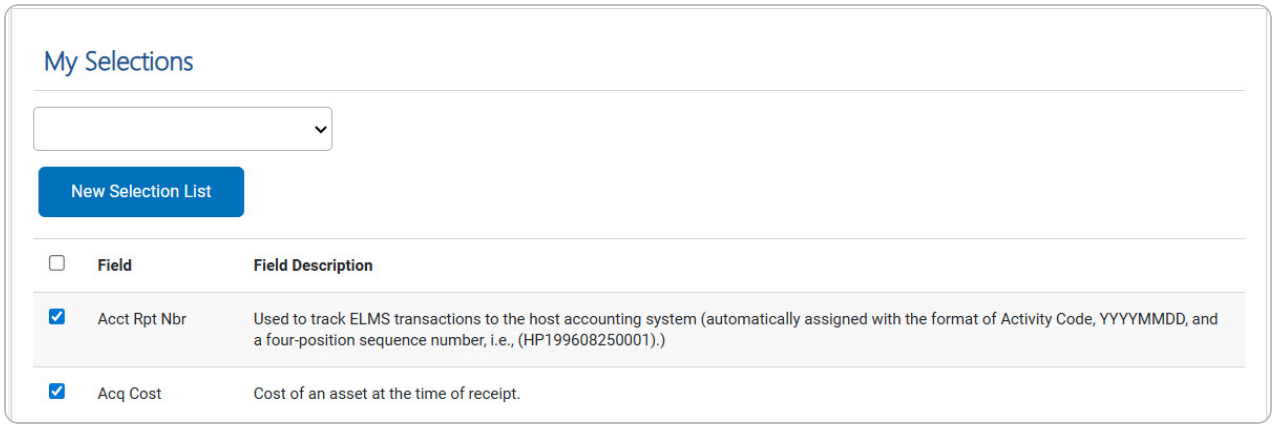
Add a Selection List

1. Select **New Selection List**. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting **Cancel Selection** at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select **Add Selection List**. *The page refreshes, and the selected list is added.* **Add Selection List** *is replaced by* **Update Selection List** *and* **Delete Selection List**.



Select Show Inquiry for small volumes of data. *The **Asset Legacy History Inquiry — Results** page appears.*

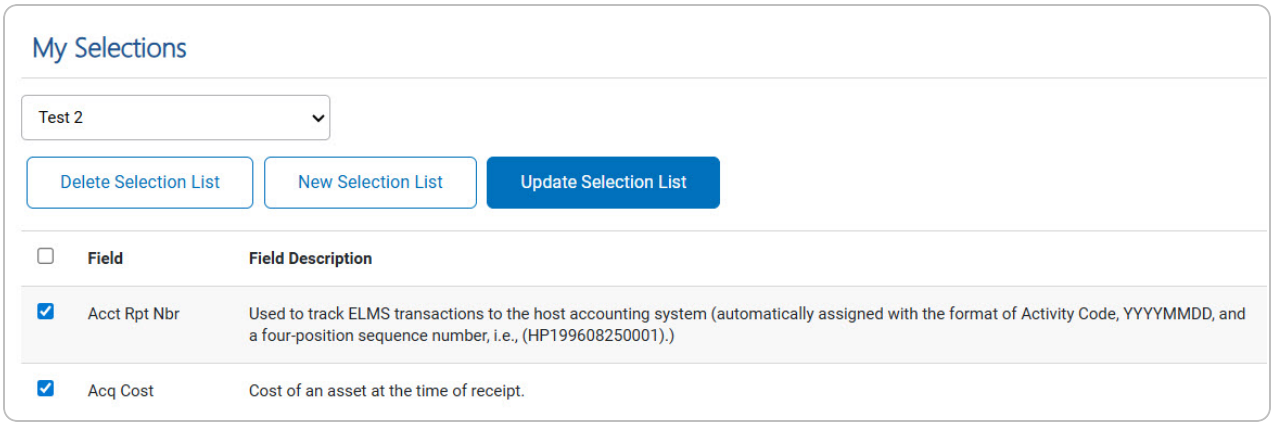
5. **OR**

Select Submit for large volumes of data. *The **Asset Legacy History Inquiry Transaction Status** page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*



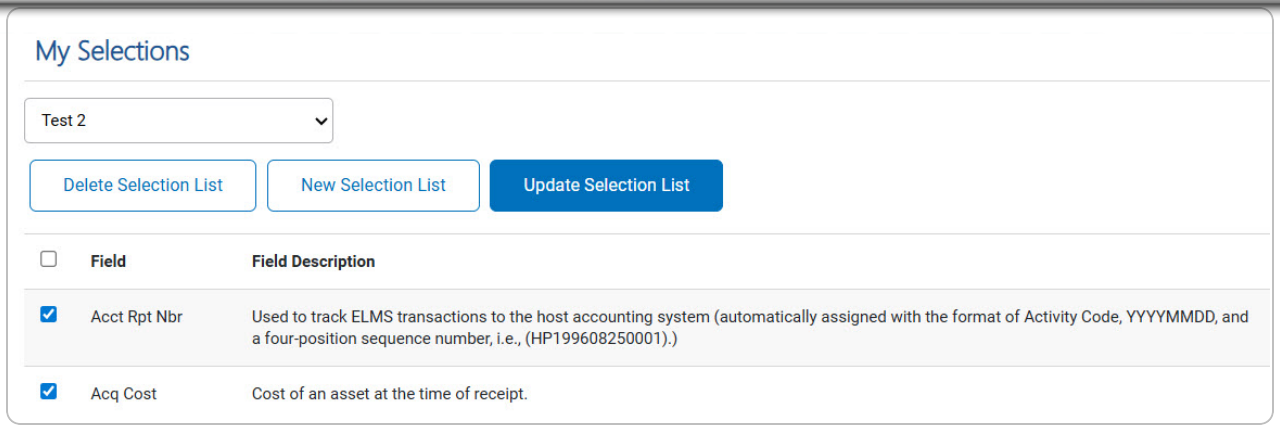
Select Show Inquiry for small volumes of data. *The **Asset Legacy History Inquiry — Results** page appears.*

3. **OR**

Select Submit for large volumes of data. *The **Asset Legacy History Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



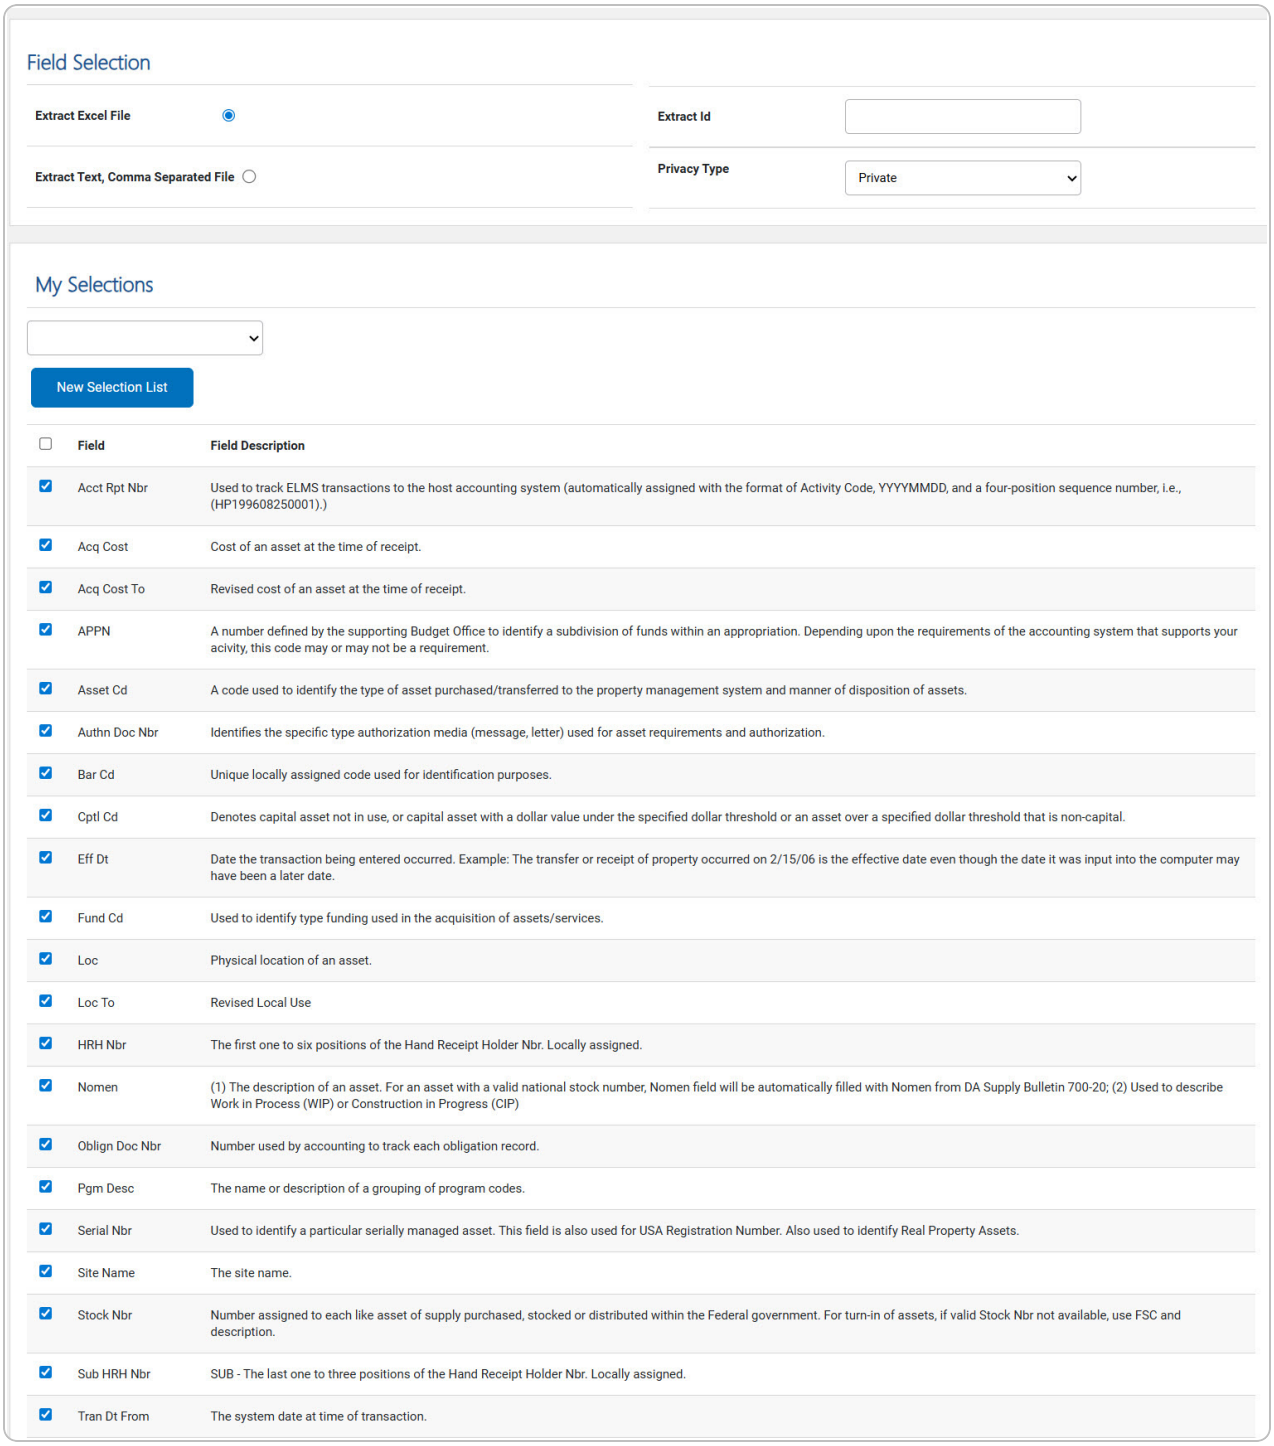
2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***Asset Legacy History Inquiry — Results*** *page appears.*
4. **OR**

   Select Submit for large volumes of data. *The* ***Asset Legacy History Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Asset Legacy History Inquiry** page appears.*

☑	UIC	A code that uniquely identifies a unit, organization, or activity. The first position is the Service designator, positions 2-4 are the Parent Organization designator, and positions 5-6 are the Descriptive designator.
☑	User Id	Identification number used by system user to gain access to the system.
☐	ACC	Identifies the accounting class of assets.
☐	ACC To	Revised code that identifies the accounting class of assets.
☐	Accumd Deprn	Revised total depreciation incurred to date. Includes depreciation incurred by the current holder and prior holder(s) of the capital asset.
☐	Accumd Deprn To	Revised Accumd Deprn
☐	Acq Cd	Indicates how the asset was acquired.
☐	Acq Dt	The fund approval/obligation date
☐	Acq Dt To	Revised Acquisition Dt
☐	ACRN	Two position alpha or alpha/numeric code assigned to each discrete accounting classification citation within a contract.
☐	ACRN To	Revised Accounting Classification Reference Number.
☐	Action Cd	Represents the type of action taken personal property or real property.
☐	Activation Dt	The date a Serial Asset was put into use.
☐	Agency Cd	Indicates the agency code and name.
☐	Agency Data Process	Assigned by the reporting agency focal point. This code must be unique within a Unit or Agency to identify a specific organization that manages or controls automation equipment.
☐	APPN To	Revised number defined by the supporting Budget Office to identify a subdivision of funds within an appropriation. Depending upon the requirements of the accounting system that supports your acivity, this code may or may not be a requirement.
☐	Asset Cd To	Revised code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Asset Sts Cd	Used to keep track of the status of an asset.
☐	Asset Sts Cd To	A revised code used to keep track of the status of an asset.
☐	Auth Ctl Nbr To	Revised Auth Ctl Nbr
☐	Authn Ctl Nbr	System generated number assigned to relate authorization data to actual hand receipt quantities.
☐	Authn Doc Nbr To	Revised Authn Doc Nbr
☐	Bar Cd To	Revised unique locally assigned code used for identification purposes
☐	Basic Symbol	A four digit number that identifies the type of funds being used.
☐	Basic Symbol To	A revised four digit number that identifies the type of funds being used
☐	CLIN	A four position field that identifies different contract line items within the same contract.
☐	CLIN To	Revised Contract Line Item Number.
☐	Cmpn Acq Cost	Cost of a component asset at the time of receipt.
☐	Cmpn Acq Cost To	Revised Component Acq Cost
☐	Cmpn Cost Cd	Indicates whether the cost of a component has been included in its end item cost.
☐	Cmpn Level	A system-generated code used to identify the various levels of components within an assemblage.
☐	Cmpn Level To	Revised system-generated code used to identify the various levels of components within an assemblage.
☐	Cmpn Qty	Number of components a particular end item contains.
☐	Cmpn Serial Nbr	The serial number of the component.
☐	Cmpn Stock Nbr	The stock number of the component.
☐	Cntr/PO Nbr	Assigned by the procurement activity and used to identify requests for a supply purchase.

☐	Cond Cd	Used to classify material for degree of serviceability, condition, and completeness in terms of readiness for issue, and to identify actions underway to change status of materiel. This Field defaults to (A) but can be updated.
☐	Cond Cd To	A revised code used to classify material for degree of serviceability, condition, and completeness in terms of readiness for issue, and to identify actions underway to change status of materiel. This Field defaults to (A) but can be updated.
☐	Cost Center	Users interfaced with AMCISS or SIFS should enter Cost Control Number. All other users should enter the requirement of the accounting system to which user is interfaced.
☐	Cptl Cd To	A revised code that denotes a capital asset
☐	Deinstallation Cost	Cost of dismantling an asset from the place and the configuration in which it was used.
☐	Deprn Job Order Nbr	Job order number where the depreciation expense is charged.
☐	Deprn Office	Cost Control Number/Office where the depreciation expense is charged.
☐	Deprn Period	Number of months depreciation will be expensed. Minimum number allowed is 24. Code values represent the maximum number of allowable months based on applicable directives.
☐	Deprn Period To	Revised Deprn Period
☐	Dept Cd	A three position code which identifies the military department of government entity receiving the appropriation. (Also called Agency Cd or Treasury Symbol.)
☐	Dept Cd To	Revised Dept Cd.
☐	Designee Cd	The designee code indicating where the excess equipment is being transferred to.
☐	Destn Id	User defined field that identifies the destination of a turned-in asset. This field will generally be an organizations acronym, i.e., Defense Logistics Agency may be shown as DLA.
☐	Doc Nbr	Unique numbers either automatically or manually assigned to track a requisition through the system from receipt to closing and to post hand receipt actions. For reversal actions, enter the Doc Nbr on the history record for the original increase/decrease
☐	Doc Nbr To	A revised code that identifies the specific type authorization media (message, letter) used for asset requirements and authorization.
☐	Eff Dt To	Revised date the transaction being entered occurred. Example: The transfer or receipt of property occurred on 2/15/06 is the effective date even though the date it was input into the computer may have been a later date.
☐	Excess Action	Code which indicates the action being taken for the excess asset. Codes (E, P and I) are system generated. For code (W) (Withdraw), there is a Check Box used to withdraw previously reported excess asset.
☐	Excess Cond Cd	Indicates the action being taken for the excess asset. If asset is ADP reportable, a two position ADP Condition Code is required. For non-ADP assets, a one-position condition code (See Cond Cd) is required.
☐	Excess Dt	Date an asset is documented as excess.
☐	Excess Remv Dt	Date an asset is withdrawn from excess.
☐	Exp Cd	Code that identifies whether depreciation should be considered (funded or unfunded).
☐	Expr Dt	The date the asset is no longer considered usable for its intended purpose, or the date the authority to operate the asset ends.
☐	Expr Dt To	A revised code where the date the asset is no longer considered usable for its intended purpose, or the date the authority to operate the asset ends.
☐	Full Deprn Cd	A code to indicate a serial asset is fully depreciated.
☐	Fund Cd To	Revised Code used to identify type funding used in the acquisition of assets/services.
☐	Gain Loss Amt	Will record the amount of Loss or Gain taken on a Transaction
☐	HA Serial Nbr	This field represents the serial number of a higher assemblage to the component.
☐	HA Serial Nbr To	Revised code that represents the serial number of a higher assemblage to the component.
☐	HA Stock Nbr	This field represents the stock number of a higher assemblage to the component.
☐	HA Stock Nbr To	Revised code that represents the stock number of a higher assemblage to the component.
☐	Impv Cost	Total cost of improving serial asset which will extend the useful life of the asset.
☐	Installation Cost	Cost of installing an asset in the place and in the configuration which it will be used.

☐	IPE Nbr	Unique number assigned by the Defense Industrial Plant Equipment Center in response to a request by an activity for the asset. This only applies to items with FSC of 3400 costing $5,000.00. No longer used for new receipts.
☐	IPE Nbr To	Revised unique number assigned by the Defense Industrial Plant Equipment Center in response to a request by an activity for the asset. This only applies to items with FSC of 3400 costing $5,000.00. No longer used for new receipts.
☐	IT Device Cd	Indicates a particular type of IT Asset.
☐	IT Owner Cd	Indicates the ownership classification of the equipment.
☐	IT Sys Id	A user defined system number used to identify designated system configuration within a Defense Reporting Activity. The assigned number should not be duplicated within a DRA. (Refer to DRA Cd.)
☐	IT Sys Id To	A revised user defined system number used to identify designated system configuration within a Defense Reporting Activity. The assigned number should not be duplicated within a DRA. (Refer to DRA Cd.)
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Job Order Nbr To	Revised Job Order Nbr.
☐	Lo Le Cd	Indicates the loan/lease status of a particular asset.
☐	Lo Le Cd To	Revised code that indicates the loan/lease status of a particular asset.
☐	LOA	Identifies the department code, period of availability, basic symbol, and subhead of the original appropriation.
☐	LOA To	Revised code that identifies the department code, period of availability, basic symbol, and subhead of the original appropriation.
☐	Local Use	Comment field reserved for use by each activity.
☐	Local Use To	Revised comment field reserved for use by each activity.
☐	Lot Nbr	Manufacturer assigned number that identifies items produced on the same production run.
☐	Lot Nbr To	A revised manufacturer assigned number that identifies items produced on the same production run.
☐	HRH Nbr To	A revised code that represents the first one to six positions of the Hand Receipt Holder Nbr. Locally assigned.
☐	Mat Doc Nbr	ELMS assigned identifier for an item being reported as excess to DISA. This number is used to obtain status of excessed equipment in the ADP and appears on the DISA disposition document.
☐	Mat Item Nbr	ELMS assigned number to an item being reported as excess to DISA. Number appears on DISA disposition document.
☐	Mfr Key Id	Unique key in manufacturer name sequence identifying manufacturer data for a specific stock number residing on the Manufacturers Model/Part Number Table (LHAC). Use Manufacturers Part Number Add/Change/Delete process to establish a manufacturer key.
☐	Mfr Key Id To	A revised unique key in manufacturer name sequence identifying manufacturer data for a specific stock number residing on the Manufacturers Model/Part Number Table (LHAC). Use Manufacturers Part Number Add/Change/Delete process to establish a manufacturer key.
☐	Mfr Yr	Year an asset was manufactured/built/improved.
☐	Mfr Yr To	The revised year an asset was manufactured/built/improved.
☐	Obj Class Cd	Identifies labor and materiel resources utilized in the production processes that apply to accounting transactions.
☐	Object Class Cd To	Revised Object Class Code.

☐	Oblign Doc Nbr To	Revised number used by accounting to track each obligation record.
☐	Official Id To	Revised name of the office where the Major Custodian is located
☐	PBIC	A code that identifies the type of property contained in a property book (i.e., I = installation, O = organizational).
☐	PBIC To	Revised code that identifies the type of property contained in a property book (i.e., I = installation, O = organizational).
☐	Pgm Name	Unique software identification.
☐	Pgm Yr	Identifies the beginning/ending year of the appropriation in YYYYYYYY format.
☐	Pgm Yr To	Revised Program Yr
☐	Prior Deprn	Total accumulated depreciation incurred by previous holders of the capital asset.
☐	Qty	Quantity of transaction.
☐	Rcl Last Inv Dt/Tm	The date of the last reconciled official inventory of the asset.
☐	Rcl Last Inv Dt/Tm To	Revised date of the last reconciled official inventory of the asset.
☐	Remarks	A text field available to record local information/reason for change to record.
☐	Req Kit Qty	Authorized quantity of a particular asset within a set or kit assemblage.
☐	Residual Value	Estimated value remaining at the end of a capital assets useful life or the amount that can be expected to be recovered from the assets disposal when removed from service.
☐	RIC	A code assigned to items that identifies the level of reporting.
☐	RIC Exempt	Identifies assets that are exempt from reporting to UIT.
☐	RIC Exempt To	Revised code that identifies assets that are exempt from reporting to UIT.
☐	RIC To	Revised code assigned to items that identifies the level of reporting.
☐	Sell Price	Field to show the amount an asset has been sold for.
☐	Serial Nbr To	Revised Serial Nbr.
☐	Site Cd	Identifies physical location of stored equipment.
☐	Site Cd To	Revised code that identifies physical location of stored equipment.
☐	Site Id	Identifies a unique activity database within ELMS.
☐	Site Id To	Revised Site Identification
☐	SLIN	Two numeric or 2 alpha characters added to the basic contract line item number to identify separate subline items.
☐	SLIN To	Revised two numeric or 2 alpha characters added to the basic contract line item number to identify separate subline items.
☐	SPIIN	Four to six position field added to the basic procurement instrument identification number that identifies amendments/modifications, or calls orders under contract.

☐	SPIIN To	Revised four to six position field added to the basic procurement instrument identification number that identifies amendments/modifications, or calls orders under contract.
☐	Stock Nbr To	Revised number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☐	Sub Head	A four digit suffix to the Basic Symbol that identifies a subdivision of funds.
☐	Sub Head To	Revised four digit suffix to the Basic Symbol that identifies a subdivision of funds.
☐	Sub HRH Nbr To	Revised first one to six positions of the Hand Receipt Holder Nbr. Locally assigned.
☐	Sub Loc	A more specific description of the physical location of an asset within its Location.
☐	Sub Loc To	Revised more specific description of the physical location of an asset within its Location.
☐	Sys Id	Used to tie various end items and components together into a system.
☐	Sys Id To	Revised code used to tie various end items and components together into a system.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Task Cd To	Revised code that indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	TDA Para Nbr	Identifies a specific organization within a specific Unit Identification Code (UIC).
☐	TDA Para Nbr To	Revised code that identifies a specific organization within a specific Unit Identification Code (UIC).
☐	Trading Partner Nbr	This code identifies the intragovernmental trading partner for transfer actions. Used when reporting eliminations in the CFO Accounting Statement Report.
☐	Trading Partner Nbr To	This code identifies the intragovernmental trading partner for transfer actions. Used when reporting eliminations in the CFO Accounting Statement Report.
☐	Transfer Cd	User defined codes for the categories of disposal for assets (i.e. M = Mission, CRU = Community Re-use).
☐	Transfer Type Cd	Code to let user know what type of fund the asset has been transferred from or being transferred to.
☐	Transfer Type Cd To	Revised code to let user know what type of fund the asset has been transferred from or being transferred to.
☐	Trnsp Cost	Cost of transporting assets from the shipment point to the destination point.
☐	Type Asset Cd	Identifies the category of an asset as General PP&E, National Defense PP&E or Heritage Asset.
☐	Type Fund Id	A code that indicates if assets were purchased with Defense Working Capital Funds (DWCF).
☐	UIC TO	Revised code that uniquely identifies a unit, organization, or activity. The first position is the Service designator, positions 2-4 are the Parent Organization designator, and positions 5-6 are the Descriptive designator
☐	UID	The Unique Identifier that ensures uniqueness of items that are listed in the registry.
☐	UID To	Revised Unique Identifier that ensures uniqueness of items that are listed in the registry.
☐	Yr Svc Life	Number of years of recommended service life based upon applicable directives.
☐	Yr Svc Life To	Revised number of years of recommended service life based upon applicable directives.

Search for a Pending Transactions Due-In Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

   A. *The first Available Field(s) option (Type Action) automatically populates and is not editable.*

   B. Use ⌄ to select the second Available Field.

   C. Repeat Step B to add additional search criteria.

> **Note**
>
> Adding another Available Field ⌄ automatically populates an additional search criteria row.

> **Note**
>
> Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

   A. Use ⌄ to select the first Operands.

   B. Use ⌄ to select the second Operands.

   C. Repeat Step B to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

   A. Use ⌄ to select the first Search Value.

   B. Use ⌄ to select the second Search Value.

   C. Repeat Step B to add additional search criteria.

Remove an Available Field Row

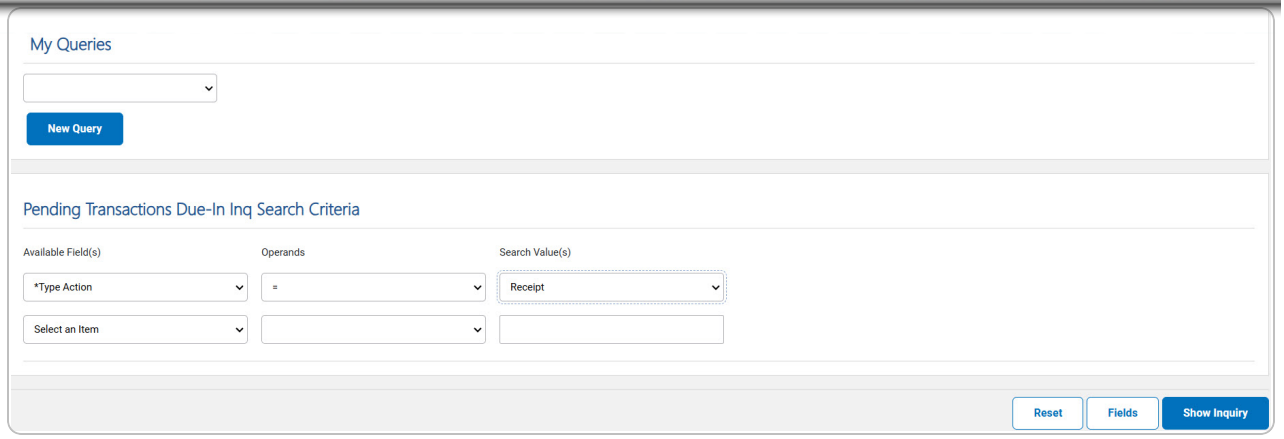
   a. Use ⌄ to select desired Available Field.

   b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Pending Transactions Due-In Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*



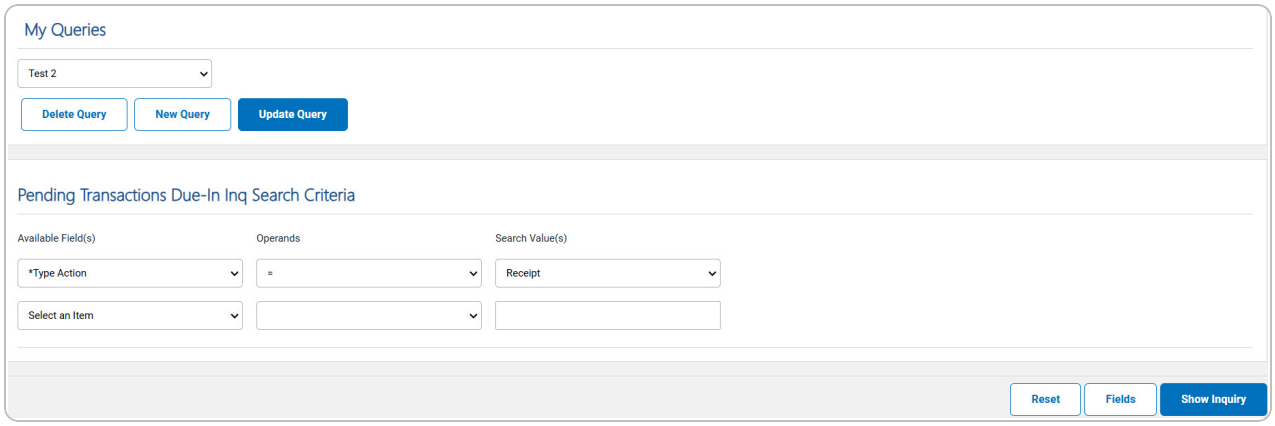
2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*
5. Select Fields. *The* ***Pending Transactions Due-In Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Pending Transactions Due-In Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



Select Fields. *The **Pending Transactions Due-In Inquiry — Select Fields** page appears.*

2. OR

Select Show Inquiry. *The **Pending Transactions Due-In Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*

   Select Fields. *The* ***Pending Transactions Due-In Inquiry — Select Fields*** *page appears.*

4. OR

   Select Show Inquiry. *The* ***Pending Transactions Due-In Inquiry — Results*** *page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query. *The selected query information appears in the search criteria grid.*

2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The* ***Pending Transactions Due-In Inquiry — Select Fields*** *page appears.*

Search for a Pending Transactions Due-Out Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

A. *The first Available Field(s) option (Type Action) automatically populates and is not editable.*

B. Use ⌄ to select the second Available Field.

C. Repeat Step B to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Use ⌄ to select the second Operands.

C. Repeat Step B to add additional search criteria.

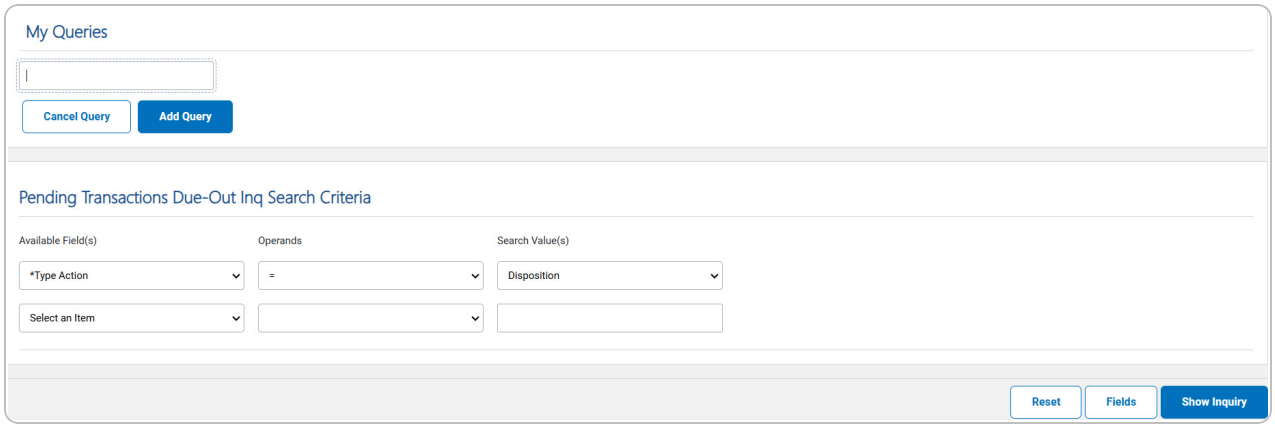
4. *Choose which Search Value(s) to use in the search.*

A. Use ⌄ to select the first Search Value.

B. Use ⌄ to select the second Search Value.

C. Repeat Step B to add additional search criteria.

Remove an Available Field Row



a. Use ⌄ to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Pending Transactions Due-Out Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*

2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*

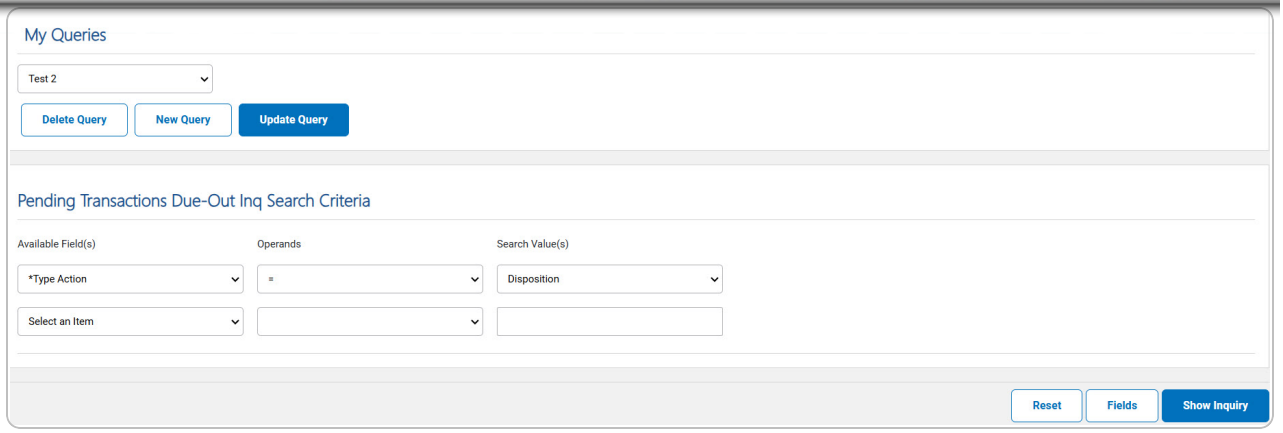
   Select Fields. *The **Pending Transactions Due-Out Inquiry — Select Fields** page appears.*
5.

OR

Select Show Inquiry. *The **Pending Transactions Due-Out Inquiry — Results** page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



Select Fields. *The **Pending Transactions Due-Out Inquiry — Select Fields** page appears.*

2. OR

Select Show Inquiry. *The **Pending Transactions Due-Out Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*

   Select Fields. *The **Pending Transactions Due-Out Inquiry — Select Fields** page appears.*

4. OR

   Select Show Inquiry. *The **Pending Transactions Due-Out Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query. *The selected query information appears in the search criteria grid.*

2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

ELMS Navigation Helpful Tips

Click the following link to display PA Navigation Tips.

Choose the Extracted Inquiry File Details

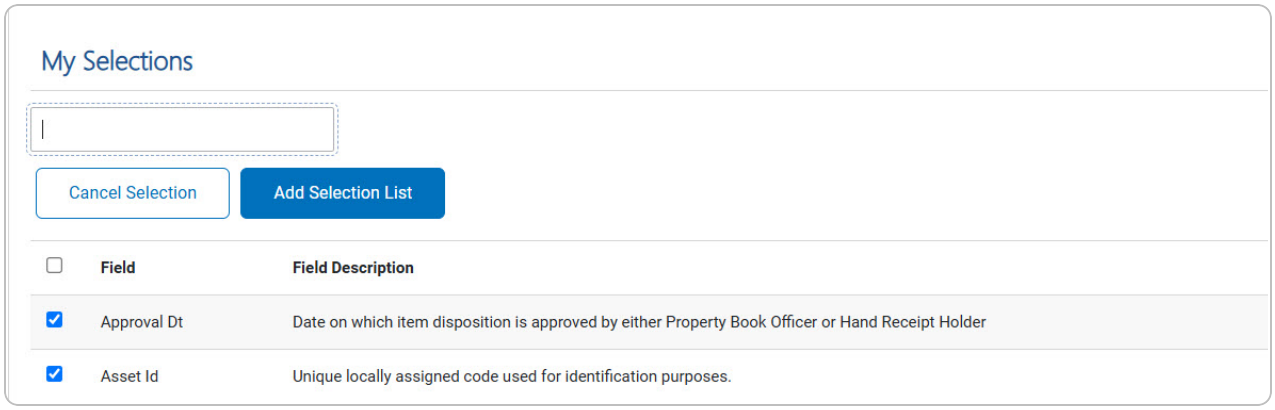
Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The* ***Pending Transactions Due-Out Inquiry Field Selection*** *page appears.*

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

OR



Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

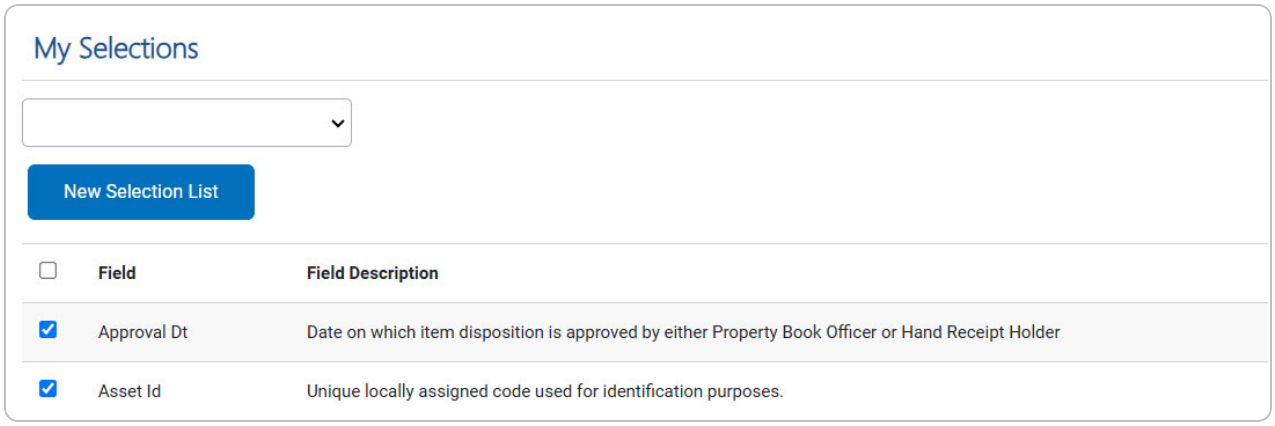
1. Select **New Selection List**. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select **Add Selection List**. *The page refreshes, and the selected list is added.*

Add Selection List *is replaced by* **Update Selection List** *and* Delete Selection List.



Select Show Inquiry for small volumes of data. *The* ***Pending Transactions Due-Out Inquiry — Results*** *page appears.*

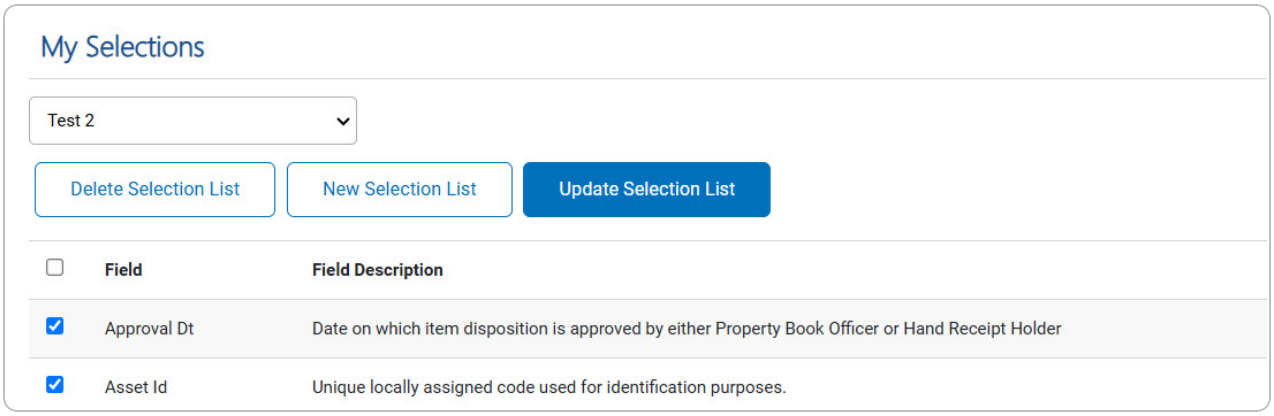
5. **OR**

Select Submit for large volumes of data. *The* ***Pending Transactions Due-Out Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*



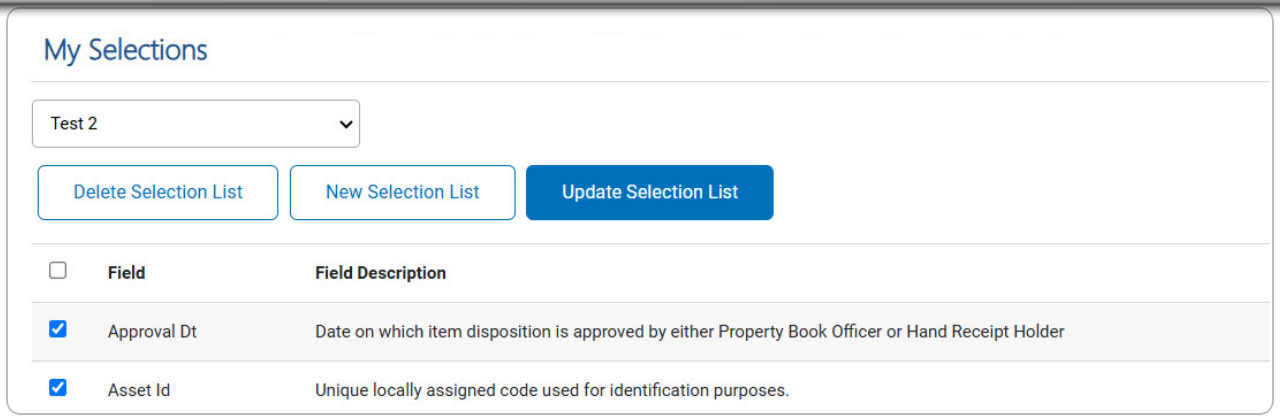
Select Show Inquiry for small volumes of data. *The* ***Pending Transactions Due-Out Inquiry — Results*** *page appears.*

3. **OR**

Select Submit for large volumes of data. *The* ***Pending Transactions Due-Out Inquiry Transaction Status*** *page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



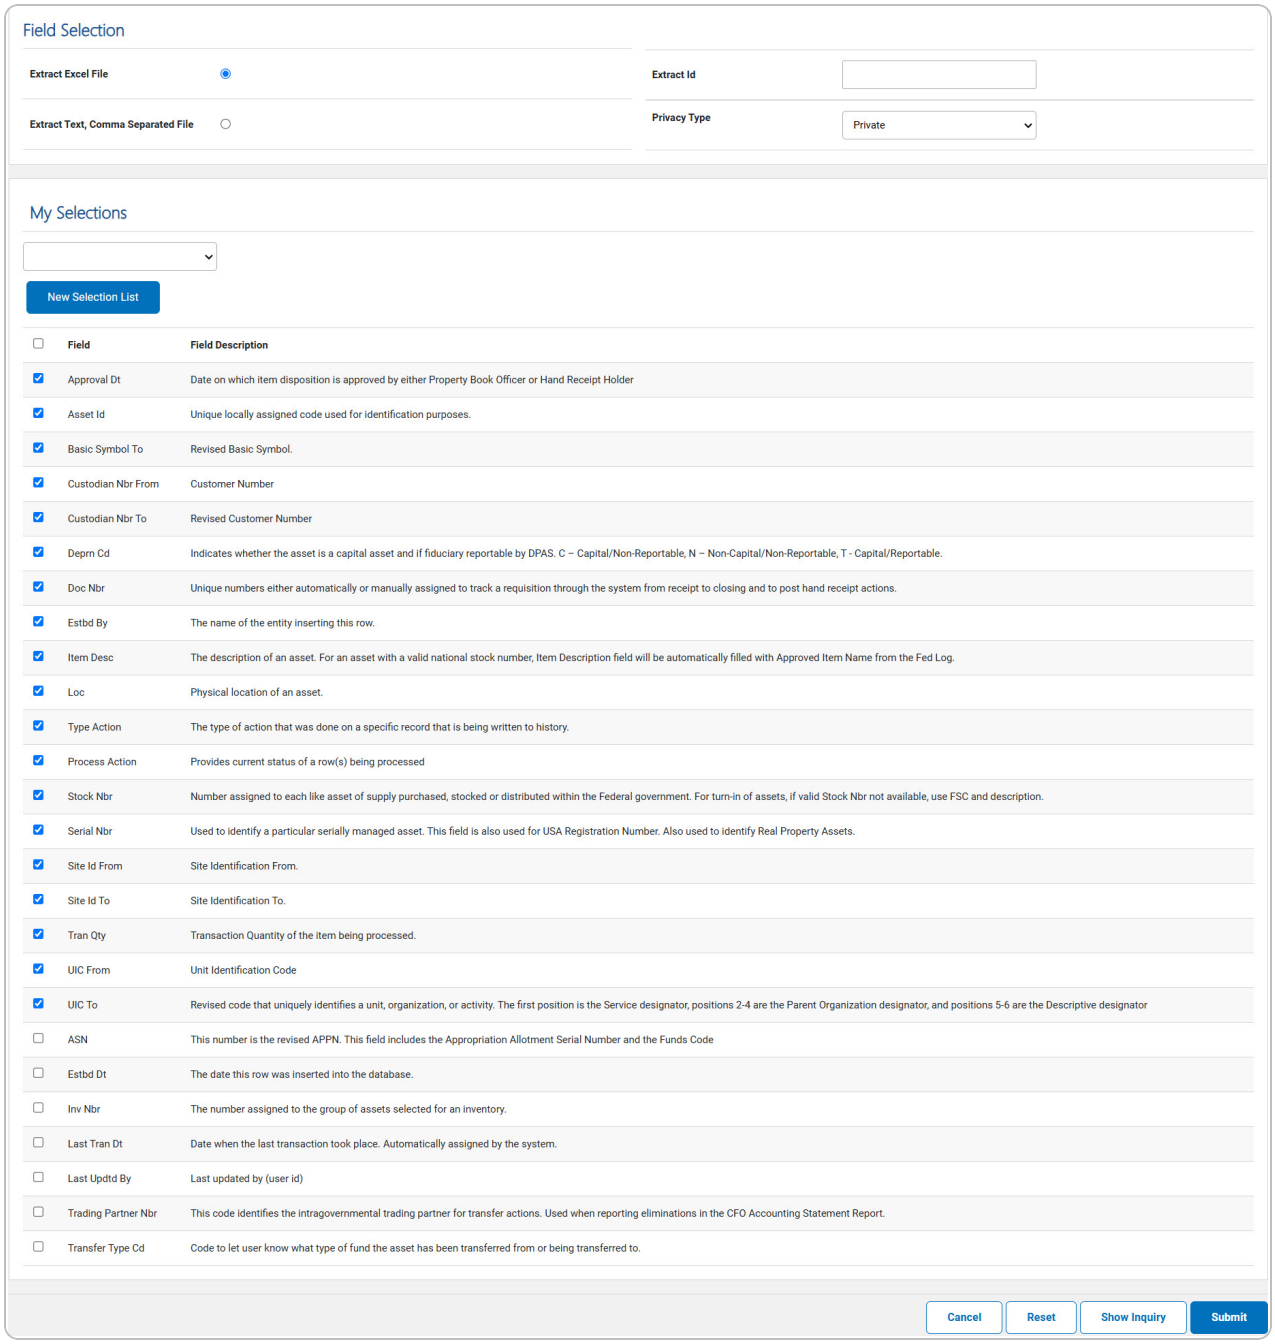
2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***Pending Transactions Due-Out Inquiry — Results*** *page appears.*
4. **OR**

   Select Submit for large volumes of data. *The* ***Pending Transactions Due-Out Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Pending Transactions Due-Out Inquiry** page appears.*

2. Select the fields required for the inquiry. *The first 19 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	LIN/TAMCN - Catalog	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Numbers.
☐	Maint Grp	Maintenance Group
☐	NIIN Sts Cd	A code used to indicate the present status of the National Item Identification Number recorded in the FLIS database. This code indicates if the NIIN is active, restricted, cancelled,non-procurable, or inactive.
☐	Pgm Id	Unique software identification.
☐	Precious Mtl Cd	Identifies items that have precious metals as part of their content. Precious metals are those metals generally considered to be uncommon and highly valuable
☐	Recover Cd	Indicates what supply levels have disposition authority on certain unserviceable support assets
☐	Remarks	A text field available to record local information/reason for change to record.
☐	Reportable Cd	A code assigned to items that identifies the level of reporting.
☐	Shelf Life Cd	A code assigned to a shelf life item to identify the period of time beginning with the date of manufacturer/assembly/pack and terminated by the date which an item must be used like expiration date or subjected to inspection/test/restoration/disposal action.
☐	Tran Cd	This code identifies the type of transaction processed.
☐	Type Dsg Name	A unique name referred to as Type Designation that identifies the asset type, usage, purpose, and variant within an Acquisition Program Type Designation Name.
☐	Unit Cube	A data field indicating the maximum cube of the unit pack.
☐	Unit Wt	Data field indicating the maximum gross weight of the unit pack.
☐	Usng Svc Cd	A code to differentiate between Service, Integrated Materiel Manager, Lead Service, and Civil Agency Catalog Management Data.
☐	Util Measure Cd	The measure used to calculate depreciation for fiduciary reporting the assets Depreciation Amount.
☐	Util Svc Life	Indicates how long an asset is expected to last, in terms of the Util Measure, before being fully depreciated.

2. Select the fields required for the inquiry. *The first 11 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

Search for a Stock Number Inquiry

Overview

The Property Accountability module Stock Number Inquiry process provides the ability to search for Stock Number records.
Each Stock Number is unique to a specific catalog within each logistics program and can only be added once per catalog.
There are four types of stock numbers identified by the STOCK ITEM CD:

- **A - NSN** (National Stock Number)
  — from FEDLOG or TDMS or other DOD lists.
- **J - MCN** (Management Control Number)
  — created at the local level, when an NSN does not exist for that asset.
- **B - PART NBR** (Part Number)
  — created by either the manufacturer or the local level.
- **I - Intangible** (Intangible)
  — created for Software and other stock that has no physical presence.
- **L - Local** (Local)
  — created at the local level, when the MCN does not fit the required form for the asset.

ELMS interfaces with the DOD Federal Logistics Information Services (FLIS), and can interface with Enterprise Agency Catalogs (e.g., the United States Marine Corps Technical Data Management System - USMC TDMS). The FLIS allows the Warehouse Management module to access NSN data in the Federal Logistics Data (FEDLOG). The TDMS allows the Warehouse module to access NSN data in the Marine Corps standard catalog information.
The Line Item Number (LIN) / Table of Authorized Materiel Control Numbers (TAMCN) plays a key role in managing equipment. The LIN/TAMCN can be thought of as a Group ID. Stock numbers are grouped under one LIN/TAMCN. For example, when the Warehouse receives a LIN/TAMCN for equipment of various sizes, a Stock Number is assigned for each size.

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Search for a Stock Number Inquiry

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria panel, narrow the results by entering one or more of the following optional fields:.

- Use or to assist with the STOCK NBR entry. *This is a 15 alphanumeric character field.*

  Stock Number Browse

- Enter the ITEM DESC, using to assist with the entry. *This is a 256 alphanumeric character field.*
- Use or to assist with the LIN/TAMCN entry. *This is a 10 alphanumeric character field.*

  Line Item Number / Table of Authorized Materiel Control Number Browse

- Use to select the Stock Item Cd.
- Enter the MFR PART NBR, using to assist with the entry. *This is an 88 alphanumeric character field.*
- Use to select the Type Asset Cd.
- Enter the FSC, using to assist with the entry. *This is a 4 numeric character field.*
- Use to select the Reportable Commodity Type.
- Use to select the Mgmt Cd.
- Enter the CAGE CD, using to assist with the entry. *This is a 5 alphanumeric character field.*

2. Select Search. *The results display in the Search Results grid.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.

Search for an Agency Catalog Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

   A. Use ⌄ to select the first Available Field.

   B. Repeat Step A to add additional search criteria.

> **Note**
>
> Adding another Available Field ⌄ automatically populates an additional search criteria row.

> **Note**
>
> Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

   A. Use ⌄ to select the first Operands.

   B. Repeat Step A to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

   A. Use ⌄ to select the first Search Value.

   B. Repeat Step A to add additional search criteria.

Remove an Available Field Row

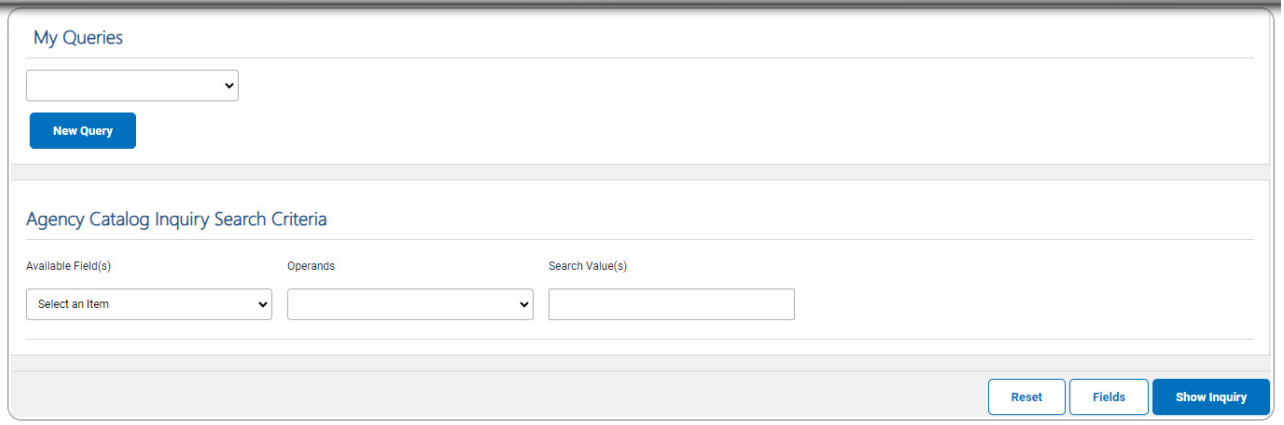
   a. Use ⌄ to select desired Available Field.

   b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Agency Catalog Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*



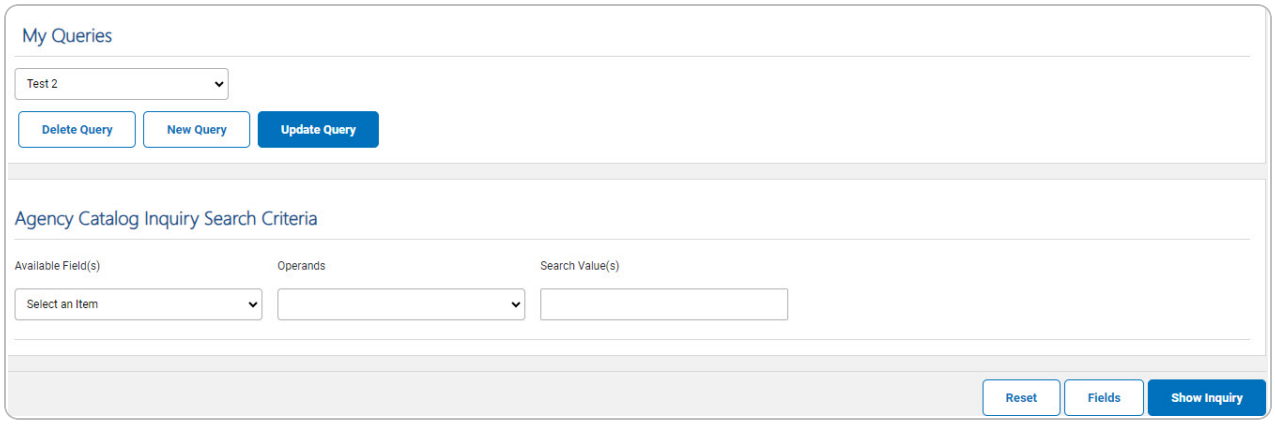
2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*
5. Select Fields. *The* ***Agency Catalog Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Agency Catalog Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



2. Select Fields. *The **Agency Catalog Inquiry — Select Fields** page appears.*

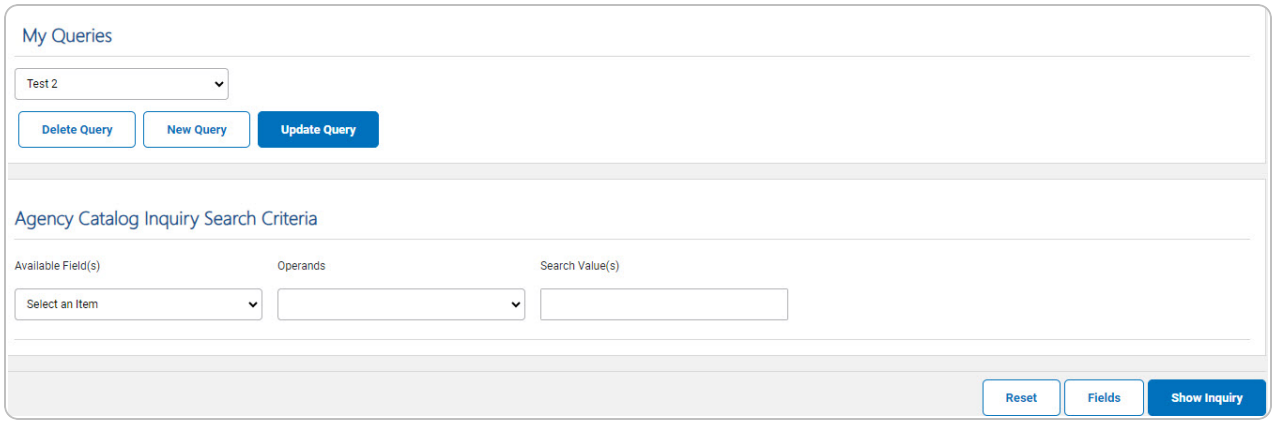
OR

Select Show Inquiry. *The **Agency Catalog Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Add and/or Remove rows in the Search Criteria grid as needed.*
3. Select Update Query. *The query information is updated.*



4. Select Fields. *The **Agency Catalog Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Agency Catalog Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Agency Catalog Inquiry — Select Fields** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..
13 — Mandatory Entry: *Available Field(s)*.	Missing Entry. No data was entered. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Operands*.	
13 — Mandatory Entry: *Query Name*.	
xxxx – Saved Inquiry already exists. Select Update Query **or** Delete Query **.**	Invalid Entry. The inquiry already exists in the database. Use the existing inquiry, or select Update Query to revise the existing query.
102 — Inquiry already exists.	Invalid entry. The Inquiry is already established. Re-enter the inquiry or select Update Query or Delete Query to modify the existing inquiry.
106 — Operand must be =,	Missing Entry. The Field value was entered, but

>, <, >= , <= , <>, or Like.	no operand was selected. Choose an operand from the drop-down menu.
31 — To perform Search, data must be entered in one or more fields.	Missing Entry. At least one field is necessary to perform the search. Enter at least one field, then select the Search button.
65 — No record(s) match search criteria.	Invalid Entry. Results for the search criteria entered do not exist. Enter different Search Criteria and try the Search again.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **Agency Catalog Inquiry** page appears.*

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

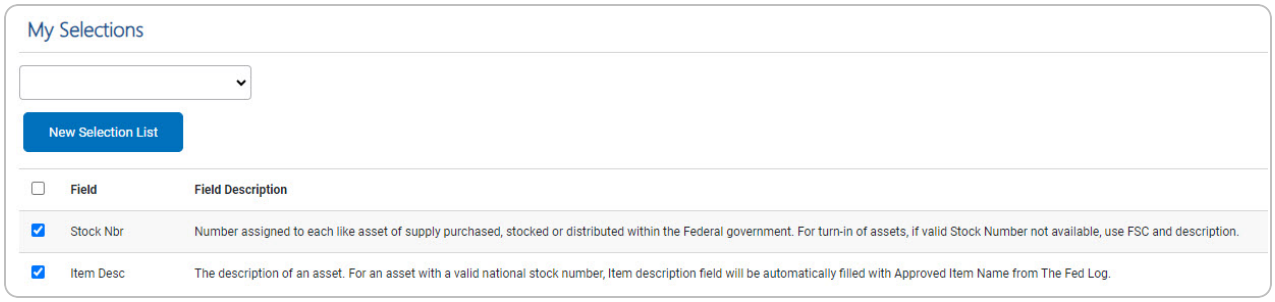
Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.* Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.



Select Show Inquiry for small volumes of data. *The* ***Agency Catalog Inquiry — Results*** *page appears.*

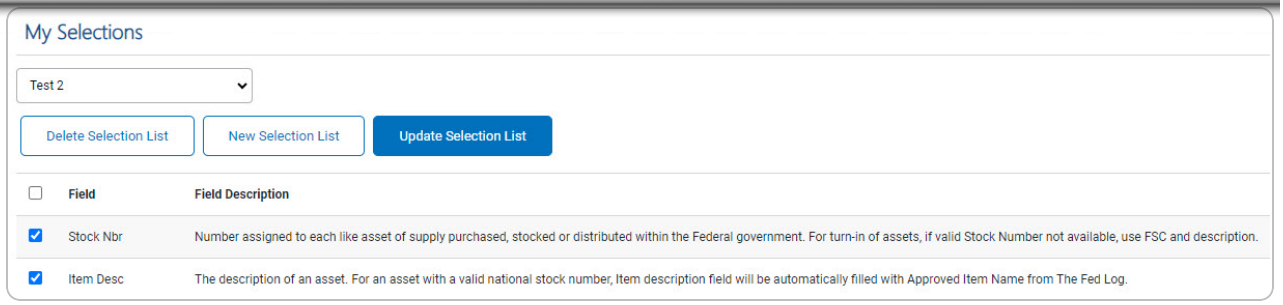
5. **OR**

Select Submit for large volumes of data. *The* ***Agency Catalog Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*



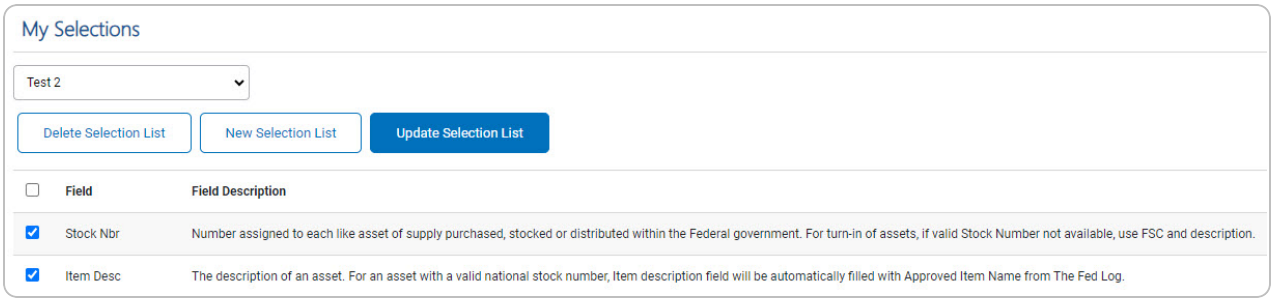
Select Show Inquiry for small volumes of data. *The* ***Agency Catalog Inquiry — Results*** *page appears.*

3. **OR**

Select Submit for large volumes of data. *The* ***Agency Catalog Inquiry Transaction Status*** *page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



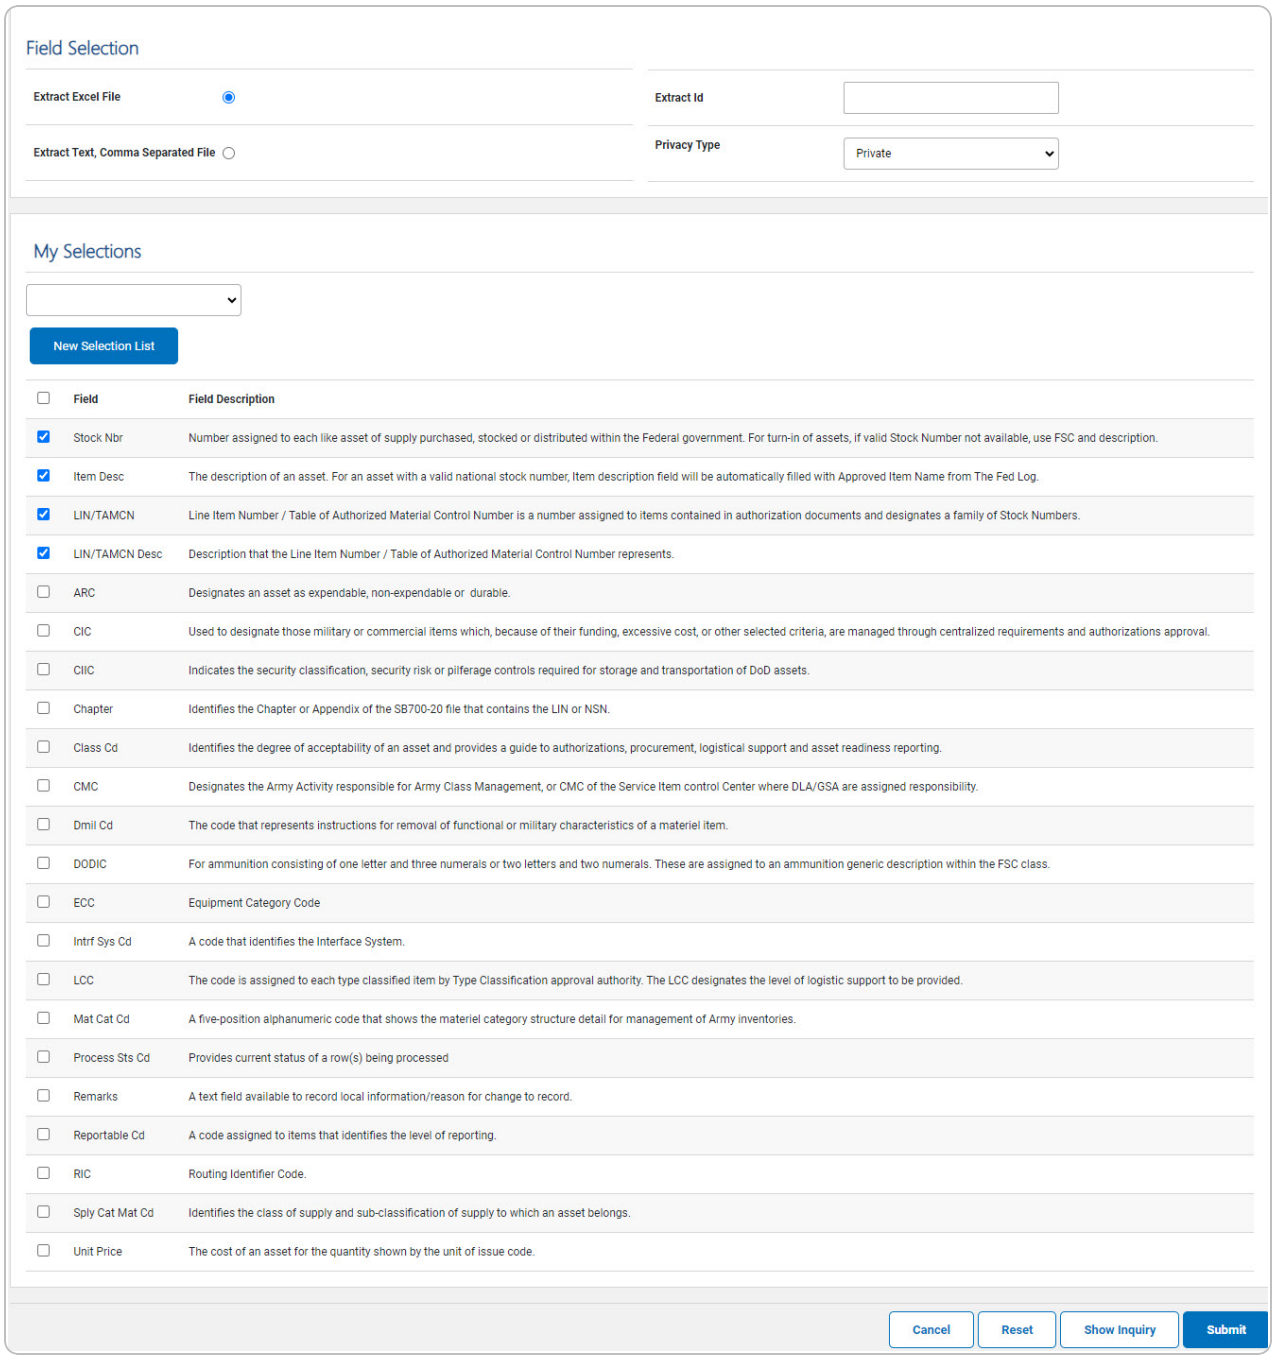
2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*
4. Select Show Inquiry for small volumes of data. *The **Agency Catalog Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Agency Catalog Inquiry Transaction Status** page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Agency Catalog Inquiry** page appears.*

2. Select the fields required for the inquiry. *The first 4 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

Search for an Agency Catalog Inquiry

Overview

The Property Accountability module Agency Catalog Inquiry process provides the ability to search for Agency Catalog records.

Note

Some fields provide **Intellisense**, which is the automatic completion of a field entry in a software application.

The application displays a selectable word or phrase in that field, based on the input (that was previously entered), without having to completely type the entry.

Search for a Manufacturer Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

A. Use to select the first Available Field.

B. Repeat Step A to add additional search criteria.

Note

Adding another Available Field automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use to select the first Operands.

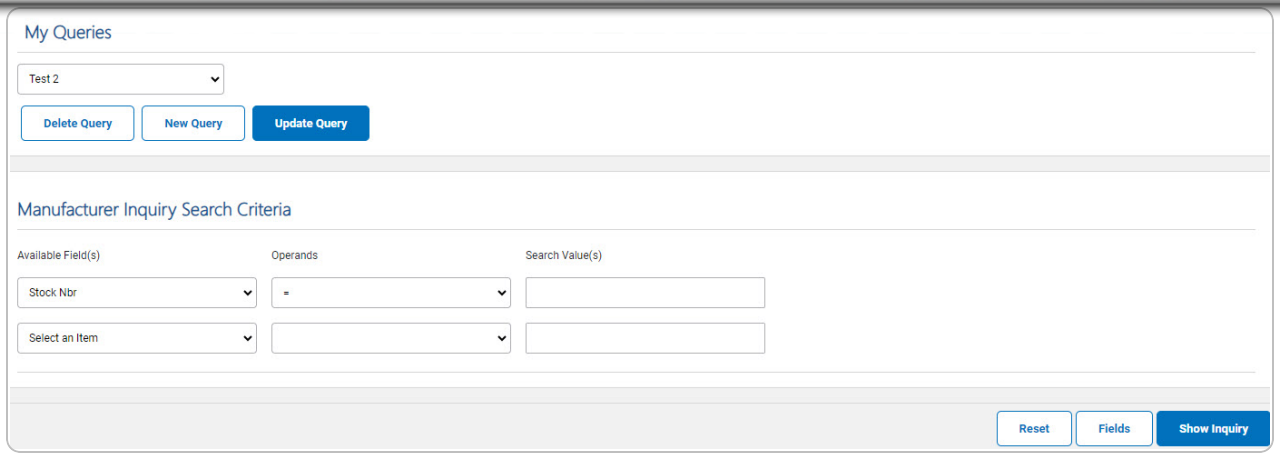
B. Repeat Step A to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

A. Use to select the first Search Value.

B. Repeat Step A to add additional search criteria.

Remove an Available Field Row



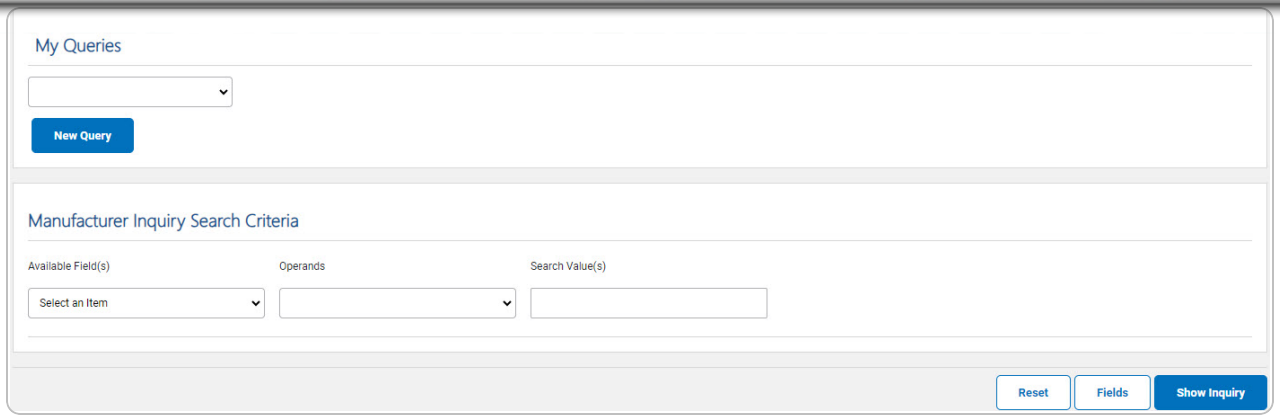
a. Use to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Manufacturer Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*



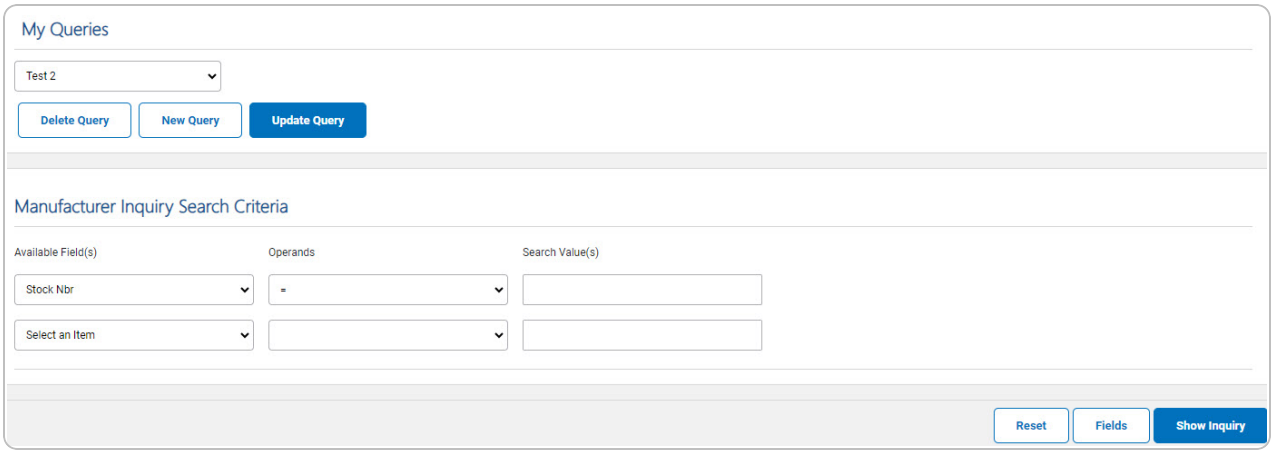
2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*
5. Select Fields. *The* ***Manufacturer Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Manufacturer Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



2. Select Fields. *The **Manufacturer Inquiry — Select Fields** page appears.*

   OR

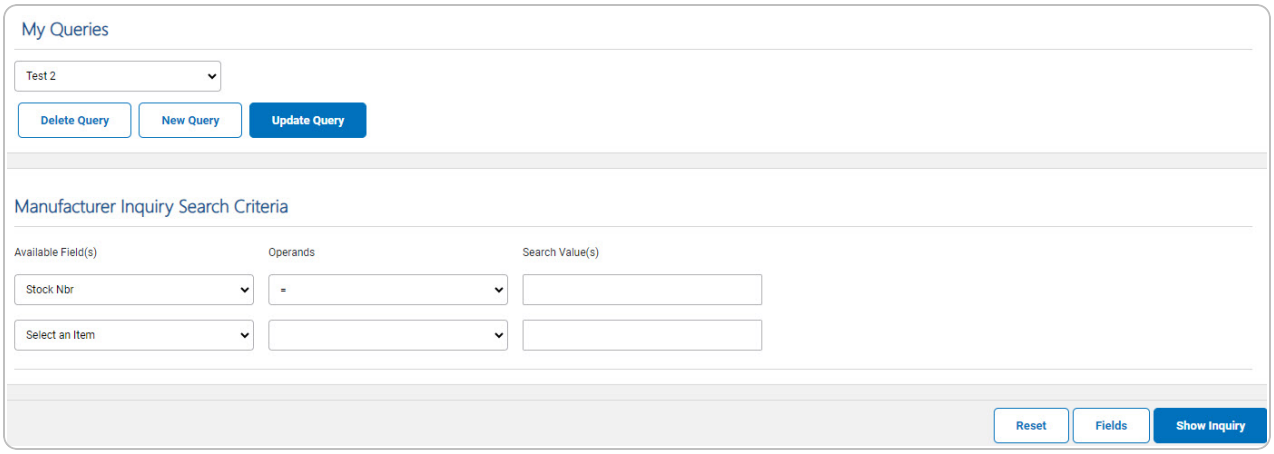
   Select Show Inquiry. *The **Manufacturer Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*



4. Select Fields. *The **Manufacturer Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **Manufacturer Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and New Query is joined by Update Query and Delete Query. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*

3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Manufacturer Inquiry — Select Fields** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..
13 — Mandatory Entry: *Available Field(s)*.	Missing Entry. No data was entered. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Operands*.	
13 — Mandatory Entry: *Query Name*.	
xxxx – Saved Inquiry already exists. Select  **or**  **.**	Invalid Entry. The inquiry already exists in the database. Use the existing inquiry, or select  to revise the existing query.
102 — Inquiry already exists.	Invalid entry. The Inquiry is already established. Re-enter the inquiry or select

	Update Query or Delete Query to modify the existing inquiry.
106 — Operand must be =, >, <, >= , <= , <>, or Like.	Missing Entry. The Field value was entered, but no operand was selected. Choose an operand from the drop-down menu.
31 — To perform Search, data must be entered in one or more fields.	Missing Entry. At least one field is necessary to perform the search. Enter at least one field, then select the Search button.
65 — No record(s) match search criteria.	Invalid Entry. Results for the search criteria entered do not exist. Enter different Search Criteria and try the Search again.

ELMS Navigation Helpful Tips

Click the following link to display PA Navigation Tips.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **Manufacturer Inquiry** page appears.*

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.*

Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

Select Show Inquiry for small volumes of data. *The* ***Manufacturer Inquiry — Results*** *page appears.*

5. **OR**

Select Submit for large volumes of data. *The* ***Manufacturer Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

Select Show Inquiry for small volumes of data. *The **Manufacturer Inquiry — Results** page appears.*

3. **OR**

Select Submit for large volumes of data. *The **Manufacturer Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

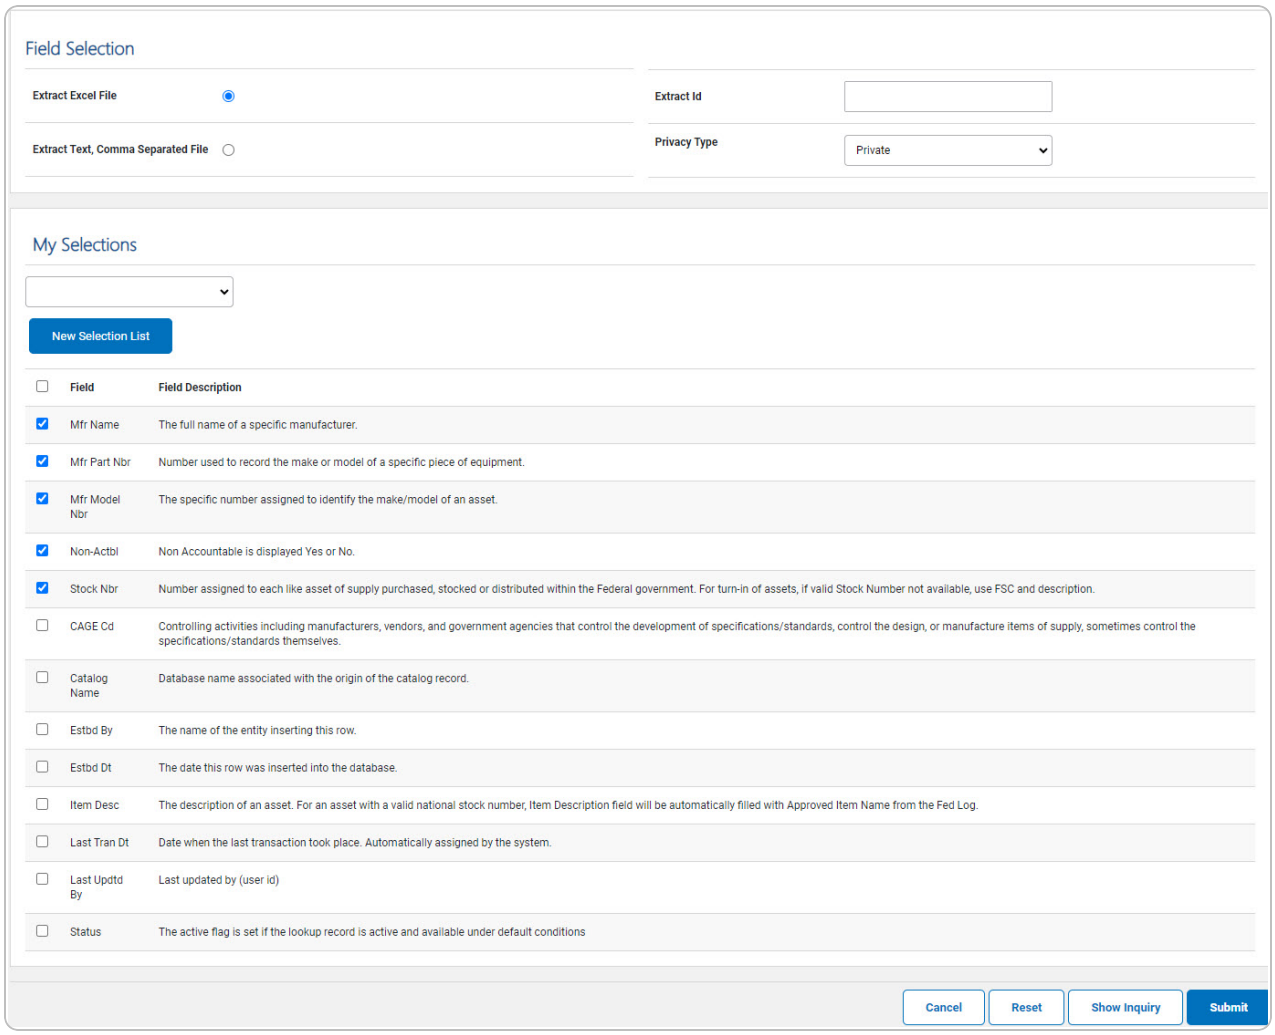
   Select Show Inquiry for small volumes of data. *The* ***Manufacturer Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Manufacturer Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

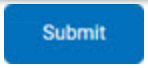
Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The* ***Manufacturer Inquiry*** *page appears.*

2. Select the fields required for the inquiry. *The first 5 fields are automatically selected.*

Note



The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the MFR NAME contains the appropriate ☑ or ☐. *Select if the inquiry contains an MFR NAME.*

- Verify the MFR PART NBR contains the appropriate ☑ or ☐. *Select if the inquiry contains a MFR PART NBR.*
- Verify the MFR MODEL NBR contains the appropriate ☑ or ☐. *Select if the inquiry contains a MFR MODEL NBR.*
- Verify the NON—ACTBL contains the appropriate ☑ or ☐. *Select if the inquiry has a NON—ACTBL display.*
- Verify the STOCK NBR contains the appropriate ☑ or ☐. *Select if the inquiry contains a STOCK NBR.*
- Click ☐ to select the CAGE CD. *Select if the inquiry contains a CAGE CD.*
- Click ☐ to select the Catalog Name. *Select if the inquiry contains a Catalog Name.*
- Click ☐ to select the ESTBD BY. *Select if the inquiry contains ESTBD BY information.*
- Click ☐ to select the ESTBD DT. *Select if the inquiry contains ESTBD DT information.*
- Click ☐ to select the ITEM DESC. *Select if the inquiry contains a ITEM DESC.*
- Click ☐ to select the LAST TRAN DT. *Select if the inquiry contains a LAST TRAN DT.*

Select Fields for the Manufacturer History Inquiry

Overview

The Manufacturer History Inquiry Field Selection process provides the ability to accept or modify the default data fields for the query. The column order changes by dragging the Field Name up or down the grid. The field at the top of the list determines the sort sequence.

Navigation

Inquiries > Catalog > Manufacturer History > Search Criteria > Fields > Manufacturer History Inquiry Fields Selection page

Page Fields

The following fields display on the **Manufacturer History Inquiry Field Selection** page. For more information on each field, select the appropriate hyperlink.

Instructions

The table below provides the list of instructions.

Number	Value
248	Select/Deselect checkbox will select or deselect fields for display or export of desired fields in query.
249	Select "Show Inquiry" button for small volumes of data, select "Submit" button for large volumes of data.
250	Click any "Field" name and drag name Up or Down for sort selection. Field at top will be the sort order of the inquiry.

191	Excel is the only reliable print format for this inquiry.
252	To save "Field Selections" as a favorite query, select "New Selection List" enter desired name and "Add".
xxxx	Where available, select "Row" to view details for specific record.
253	Select "Reset" button to set default "Fields" selections.
61	Select "Cancel" to return to Search Criteria page.
290	Do not "Export" large volumes of data, select "Back" button then select "Submit" button on the Field Selection Page

Click the following link to display PA Navigation Tips.

Choose the Extracted Inquiry File Details

Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The **Manufacturer History Inquiry** page appears.*

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select Add Selection List. *The page refreshes, and the selected list is added.*

Add Selection List *is replaced by* Update Selection List *and* Delete Selection List.

Select Show Inquiry for small volumes of data. *The* ***Manufacturer History Inquiry — Results*** *page appears.*

5. **OR**

Select Submit for large volumes of data. *The* ***Manufacturer History Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

Select Show Inquiry for small volumes of data. *The **Manufacturer History Inquiry — Results** page appears.*

3. **OR**

Select Submit for large volumes of data. *The **Manufacturer History Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select Update Selection List. *The page refreshes.*

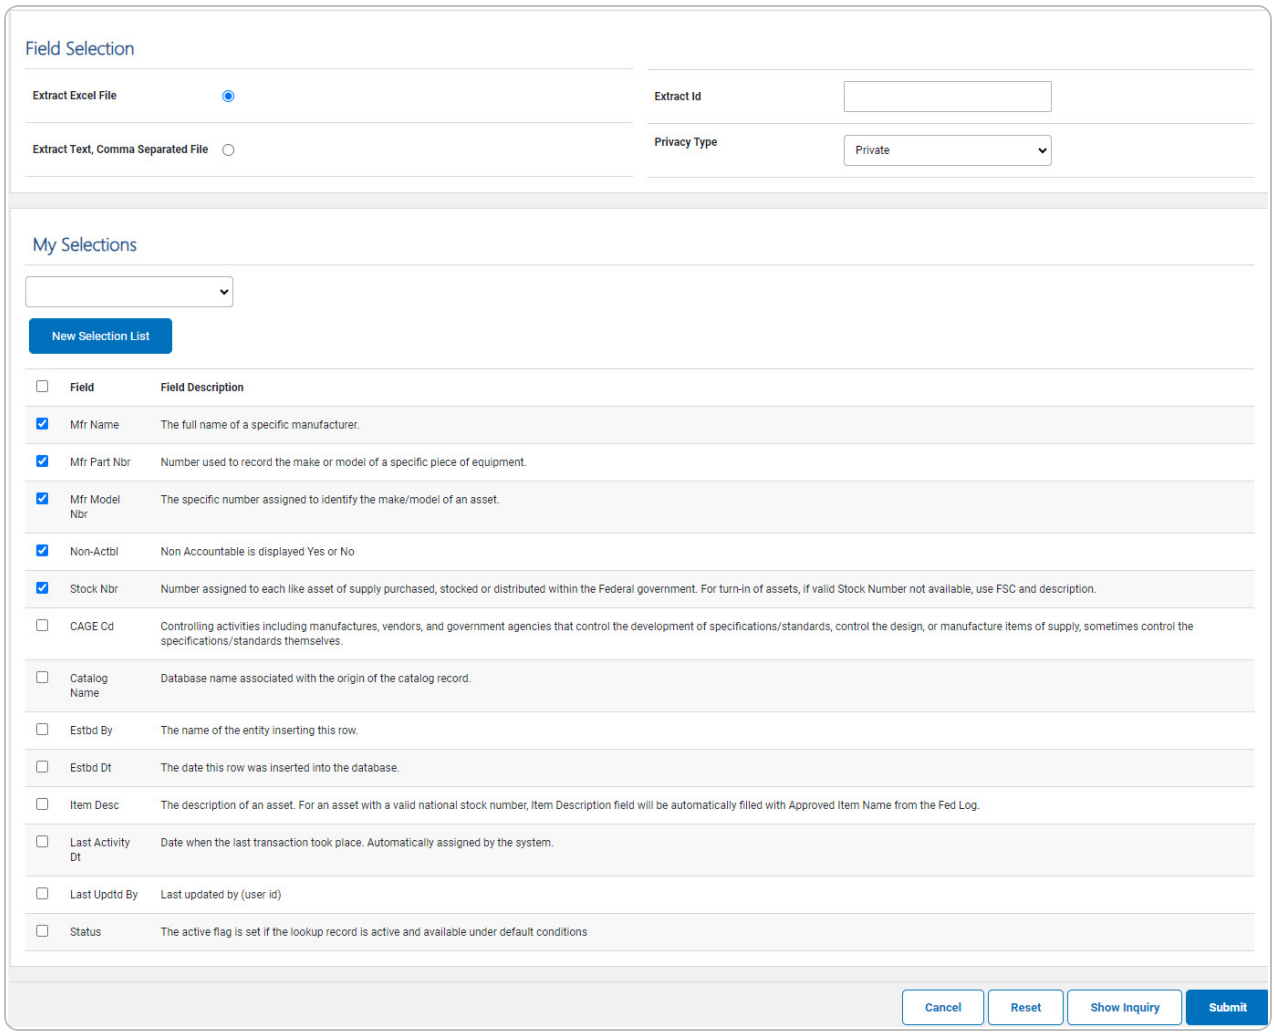
   Select Show Inquiry for small volumes of data. *The* ***Manufacturer History Inquiry — Results*** *page appears.*

4. **OR**

   Select Submit for large volumes of data. *The* ***Manufacturer History Inquiry Transaction Status*** *page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

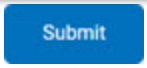
Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The* ***Manufacturer History Inquiry*** *page appears.*

2. Select the fields required for the inquiry. *The first 5 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.



- Verify the MFR NAME contains the appropriate ☑ or ☐. *Select if the inquiry contains an MFR NAME.*

- Verify the MFR PART NBR contains the appropriate ☑ or ☐. *Select if the inquiry contains a MFR PART NBR.*
- Verify the MFR MODEL NBR contains the appropriate ☑ or ☐. *Select if the inquiry contains a MFR MODEL NBR.*
- Verify the NON—ACTBL contains the appropriate ☑ or ☐. *Select if the inquiry has a NON—ACTBL display.*
- Verify the STOCK NBR contains the appropriate ☑ or ☐. *Select if the inquiry contains a STOCK NBR.*
- Click ☐ to select the CAGE CD. *Select if the inquiry contains a CAGE CD.*
- Click ☐ to select the Catalog Name. *Select if the inquiry contains a Catalog Name.*
- Click ☐ to select the ESTBD BY. *Select if the inquiry contains ESTBD BY information.*
- Click ☐ to select the ESTBD DT. *Select if the inquiry contains ESTBD DT information.*
- Click ☐ to select the ITEM DESC. *Select if the inquiry contains a ITEM DESC.*
- Click ☐ to select the LAST ACTIVITY DT. *Select if the inquiry contains a LAST ACTIVITY DT.*
- Click ☐ to select the LAST UPDTD BY. *Select if the inquiry contains a LAST UPDTD BY.*
- Click ☐ to select the Status. *Select if the inquiry contains status information.*

Select Show Inquiry for small volumes of data. *The* ***Manufacturer History Inquiry — Results*** *page appears.*

3.

OR

Select  for large volumes of data. *The* ***Manufacturer History Inquiry Transaction Status*** *page appears.*

Choose the Extracted Inquiry File Details

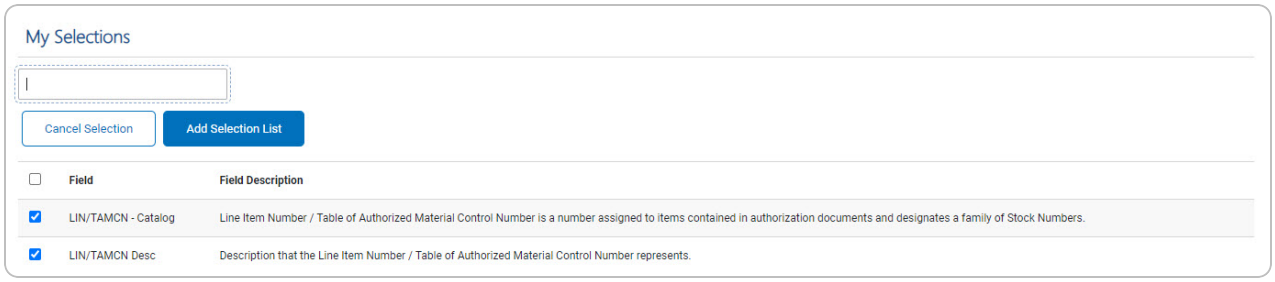
Selecting Cancel *at any point of this procedure removes all revisions and closes the page, whereas selecting* Reset *returns all fields to the default "All" setting.* ***Bold*** *numbered steps are required.*

1. Select Fields. *The* ***LIN/TAMCN Inquiry*** *page appears.*

2. Choose the desired file type:

   - Click ○ to select Extract Excel File. *The extracted file on the* ***View Inquiry Extract*** *page is an .XLS file.*

OR



Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select [New Selection List]. *The page refreshes, and Selections changes from a drop-down field to a text field.*

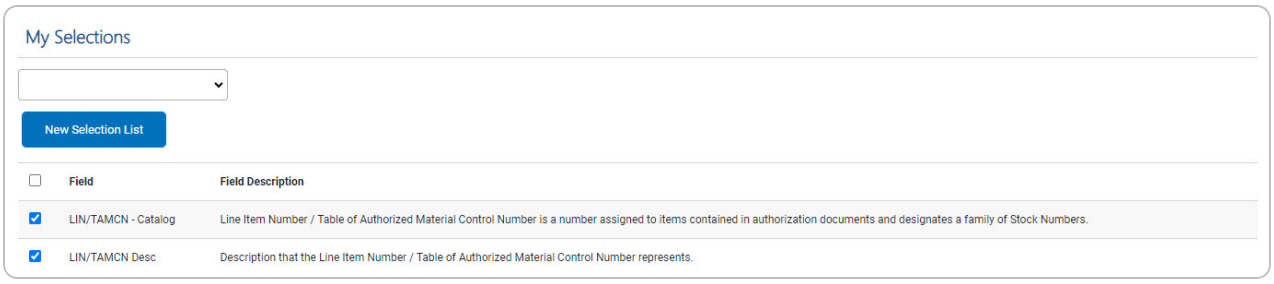
Note

Selecting [Cancel Selection] at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.

2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select [Add Selection List]. *The page refreshes, and the selected list is added.*

[Add Selection List] *is replaced by* [Update Selection List] *and* [Delete Selection List].

Select [Show Inquiry] for small volumes of data. *The **LIN/TAMCN Inquiry — Results** page appears.*



5.

OR

Select Submit for large volumes of data. *The **LIN/TAMCN Inquiry Transaction Status** page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*

   Select Show Inquiry for small volumes of data. *The **LIN/TAMCN Inquiry — Results** page appears.*

3. **OR**

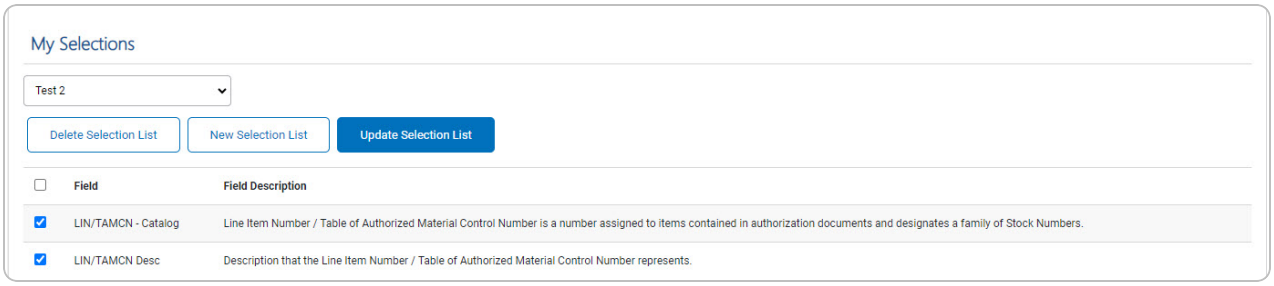
   Select Submit for large volumes of data. *The **LIN/TAMCN Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.

2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*

3. Select **Update Selection List**. *The page refreshes.*



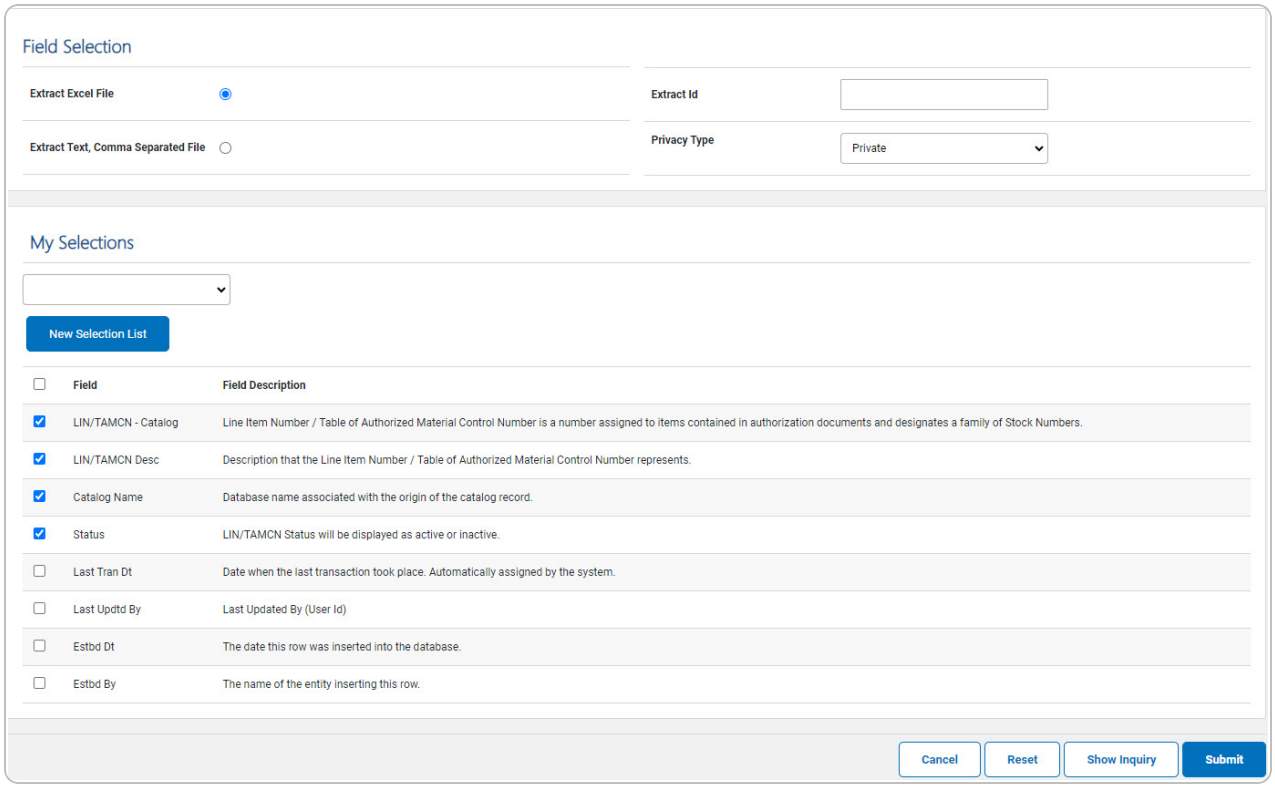
4. Select **Show Inquiry** for small volumes of data. *The **LIN/TAMCN Inquiry — Results** page appears.*

OR

Select **Submit** for large volumes of data. *The **LIN/TAMCN Inquiry Transaction Status** page appears.*

Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* **New Selection List** *is joined by* **Update Selection List** *and* **Delete Selection List**.



2. Select **Delete Selection List**. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry

Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The* ***LIN/TAMCN Inquiry*** *page appears.*

2. Select the fields required for the inquiry. *The first 4 fields are automatically selected.*

Note

The number of fields selected determines the amount of data returned from the database. The more data returned, the longer the inquiry takes.

- Verify the LIN/TAMCN - Catalog contains the appropriate ☑ or ☐. *Select if the inquiry contains LIN/TAMCN - Catalog information.*
- Verify the LIN/TAMCN DESC contains the appropriate ☑ or ☐. *Select if the inquiry contains a LIN/TAMCN DESC.*
- Verify the Catalog Name contains the appropriate ☑ or ☐. *Select if the inquiry contains a Catalog Name.*
- Verify the Status contains the appropriate ☑ or ☐. *Select if the inquiry has a status.*
- Click ☐ to select the LAST TRAN DT. *Select if the inquiry contains a LAST TRAN DT.*
- Click ☐ to select the LAST UPDTD BY. *Select if the inquiry contains a LAST UPDTD BY.*
- Click ☐ to select the ESTBD DT. *Select if the inquiry contains ESTBD DT information.*
- Click ☐ to select the ESTBD BY. *Select if the inquiry contains ESTBD BY information.*

3. Select Show Inquiry for small volumes of data. *The **LIN/TAMCN Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **LIN/TAMCN Inquiry Transaction Status** page appears.*

New Selection List

	Field	Field Description
☑	Acct Rpt Nbr	Report number assigned when the accounting data is generated
☑	Activity Cd	Used to identify a specific installation or level of funding.
☑	ASN	This number is the revised APPN. This field includes the Appropriation Allotment Serial Number and the Funds Code
☑	Asset Id	Unique locally assigned code used for identification purposes.
☑	Dollar Amt	The dollar amount of construction in progress/work in process, real property or the dollar amount of the accounting transaction.
☑	Estbd Dt	The date this row was inserted into the database.
☑	Event Type	Identifies the accounting transaction as either an 'A' equals increase or 'M' decrease in the cost.
☑	Fund Cd	Used to identify type funding used in the acquisition of assets/services.
☑	Intrf Asset Cd	The Asset Code assigned to a specific accounting interface.
☑	Intrf Sys Event Nbr	The accounting Event Number identified by a specific accounting interface.
☑	Item Desc	The description of an asset. For an asset with a valid national stock number, Item Description field will be automatically filled with Approved Item Name from the Fed Log.
☑	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☑	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☑	UIC	A code that uniquely identifies a unit, organization, or activity. The first position is the Service designator, positions 2-4 are the Parent Organization designator, and positions 5-6 are the Descriptive designator
☐	Acq Dt	The fund approval/obligation date.
☐	ACRN	Two position alpha or alpha/numeric code assigned to each discrete accounting classification citation within a contract.
☐	Actbl UIC	Accountable Unit Identification Code - The UIC of the organization that is assigned management responsibility for property belonging to a specific unit organization, or activity. Multiple UICs may be grouped under an Accountable UIC to consolidate data for accountability and accounting system reporting purposes.
☐	Action Cd	Represents the type of action taken personal property or real property.
☐	Action Type Cd	A unique column that holds the code used by the lookup table which coincides with the associated description. Program generated.

☐	Activation Dt	The date a Serial Asset was put into use.
☐	Agency Cd	Indicates the agency code and name.
☐	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Asset Ctgry Cd	Identifies the accounting class of assets.
☐	Basic Symbol	A four digit number that identifies the type of funds being used.
☐	CFO Acct Type	This code identifies the in the clear name for the CFO Accounting Statement categories that are required for reporting purposes.
☐	CFO Reported	CFO Reported Flag Yes or No
☐	CLIN	A four position field that identifies different contract line items within the same contract.
☐	Cntr/PO Nbr	Assigned by the procurement activity and used to identify requests for a supply purchase.
☐	Deprn Exp Cd	Identifies the depreciation expense as funded or unfunded.
☐	Deprn Period	Number of months depreciation will be expensed. Minimum number allowed is 24. Code values represent the maximum number of allowable months based on applicable directives.
☐	Dept Cd	A three position code which identifies the military department of government entity receiving the appropriation. (Also called Agency Cd or Treasury Symbol.)
☐	Doc Nbr	Unique numbers either automatically or manually assigned to track a requisition through the system from receipt to closing and to post hand receipt actions.
☐	DODAAC	A distinctive six-position code assigned to identify specific units, activities, and organizations, non-DoD and contract activities engaged in the requisitioning, receiving, and billing of materiel.
☐	Eff Dt	Date the transaction being entered occurred. Example: The transfer or receipt of property occurred on 2/15/06 is the effective date even though the date it was input into the computer may have been a later date.
☐	Estbd By	The name of the entity inserting this row.
☐	Event Nbr	Identifies the type of accounting transaction. Changed from Function Code.
☐	Fac Name	The name given to a real property facility, usually for commemorative or descriptive purposes.
☐	Fac Nbr	A number assigned to a real property facility within an installation for identification purposes.
☐	Fdcry Deprn Mthd Cd	The depreciation method (Straight Line or Activity Based) used to report depreciation.
☐	Fndng Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code required by the Accounting Interface System.
☐	Fndng Cost Center Id	Cost Center Id that is used with the DAI interface.
☐	Heritage Asset Cd	Code used to identify the type of heritage asset. (Note: Heritage assets are not depreciated)
☐	Impv Nbr	System generated number assigned to relate the correct amount each fund source paid for the improvement within the same installation number, facility number, and document number.
☐	Instl Nbr	Unique identification number that identifies a specific location of land or real property facility
☐	Instl Name	Name of a specific location or real property facility
☐	Intrf Sys Cd	A code that identifies the Interface System.
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Land Acq Tract Id	Land Acquisition Tract Identification. The tract number assigned by the government for each parcel in a land acquisition.
☐	Lease Cd	Indicates the lease status of a particular asset.
☐	LIN/TAMCN	Line Item Number / Table of Authorized Material Control Number is a number assigned to items contained in authorization documents and designates a family of Stock Numbers.
☐	Loan Cd	Indicates the loan status of a particular asset.

☐	Major Cmd Cd	A code used to identify the Major Command or Agency of assignment for units and their administrative structure.
☐	Major Cmd Prj Id	Project Id number that is distinct within the enterprise. Used with the DAI interface.
☐	Major Cmd Task Id	Task Id number that is associated with a project that is distinct within the enterprise. Used with the DAI interface.
☐	Obj Class Cd	Identifies labor and materiel resources utilized in the production processes that apply to accounting transactions.
☐	Oblign Doc Nbr	Number used by accounting to track each obligation record.
☐	Pgm Id	Unique software identification.
☐	Pgm Yr	Identifies the beginning/ending year of the appropriation in YYYYYYYY format.
☐	Prj Desc	A description of the project. Should include details of the project.
☐	Prj Nbr	A number that identifies the project
☐	Program/Project	Baseline activity (ba), baseline sub activity (bsa), and baseline line item (bli) from appropriation.
☐	Process Dt	Date/Time that response row was generated.
☐	Process Sts Cd	Provides current status of a row(s) being processed
☐	Qty	Quantity of primary reporting unit of measure defined as the measure of area for real property (implied two decimal positions for UI equal to AC).
☐	Record Type Cd	Identifies the type record, asset, real property, improvement, component or CIP.
☐	RP Site Name	Real Property Site Name
☐	RPSUID	The Unique Identifier that insures uniqueness of items that are listed in the registry
☐	RPUID	The Unique Identifier that insures uniqueness of items that are listed in the registry
☐	Salvage Value Amt	Estimated value remaining at the end of a capital assets useful life or the amount that can be expected to be recovered from the assets disposal when removed from service.
☐	Site Id	Site Identification. Identifies a unique database within DPAS

2. Choose the desired file type:

- Click ○ to select Extract Excel File. *The extracted file on the **View Inquiry Extract** page is an .XLS file.*

  OR

  Click ○ to select Extract Text, Comma Separated File. *The extracted file on the **View Inquiry Extract** page is a .CSV file.*

3. Enter an unique identifier in the Extract ID field provided. *This adds the identifier to the link on the **View Inquiry Extract** page, and does not change the file name.*

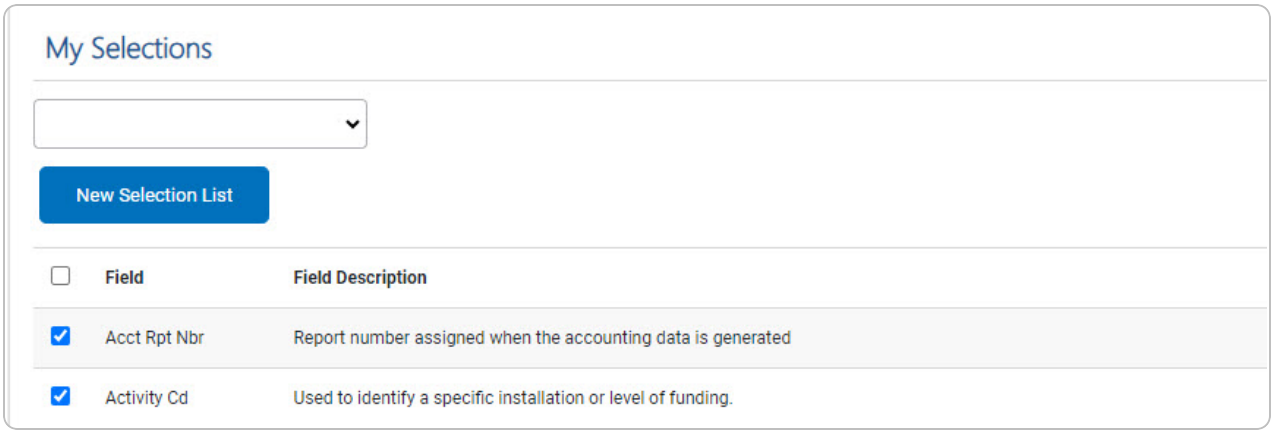
4. Use ⌄ to select the Privacy Type.

Add a Selection List

1. Select New Selection List. *The page refreshes, and Selections changes from a drop-down field to a text field.*

Note

Selecting Cancel Selection at any time from this point of the procedure removes all revisions and returns My Selections to a drop-down field.



2. Enter the unique field list name. *This is a 90 alphanumeric character field.*
3. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
4. Select **Add Selection List**. *The page refreshes, and the selected list is added.* **Add Selection List** *is replaced by* **Update Selection List** *and* Delete Selection List.

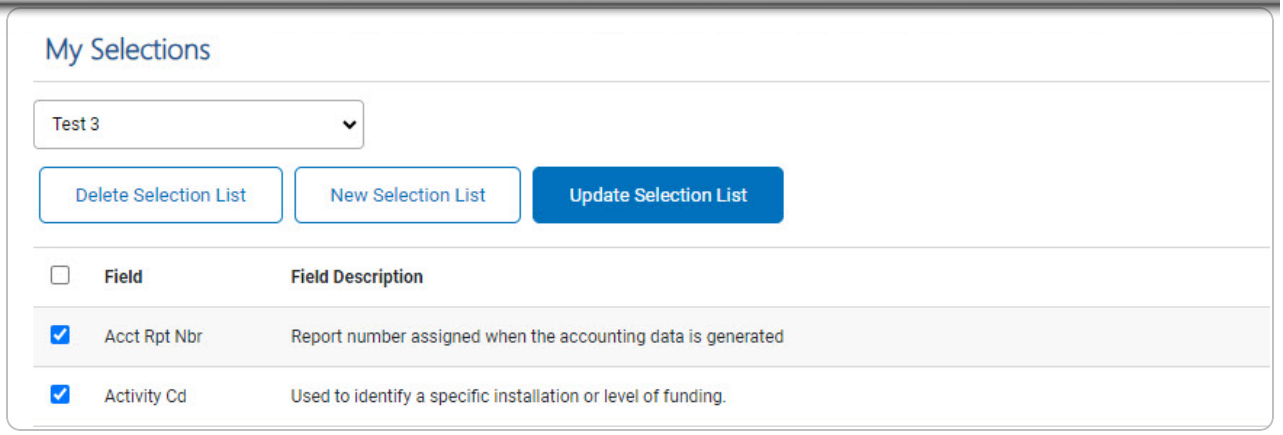
   Select **Show Inquiry** for small volumes of data. *The* ***Accounting Transactions Inquiry — Results*** *page appears.*
5. **OR**

   Select **Submit** for large volumes of data. *The* ***Accounting Transactions Inquiry Transaction Status*** *page appears.*

Use a Predetermined Field Selection List

1. Use ⌄ to display the Selection List.

2. Select the desired Selection list. *The page refreshes, and the preselected fields change.*



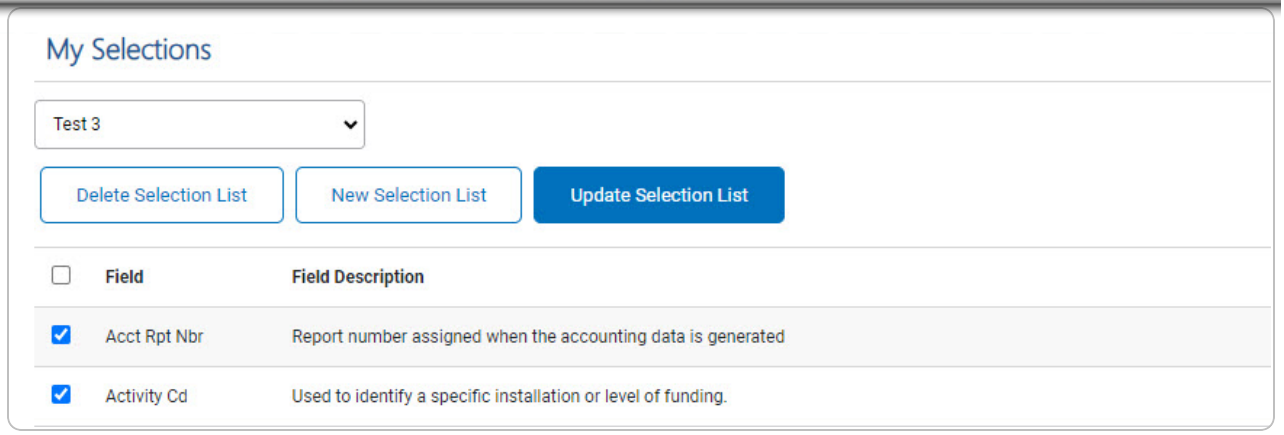
3. Select Show Inquiry for small volumes of data. *The **Accounting Transactions Inquiry — Results** page appears.*

OR

Select Submit for large volumes of data. *The **Accounting Transactions Inquiry Transaction Status** page appears.*

Update a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



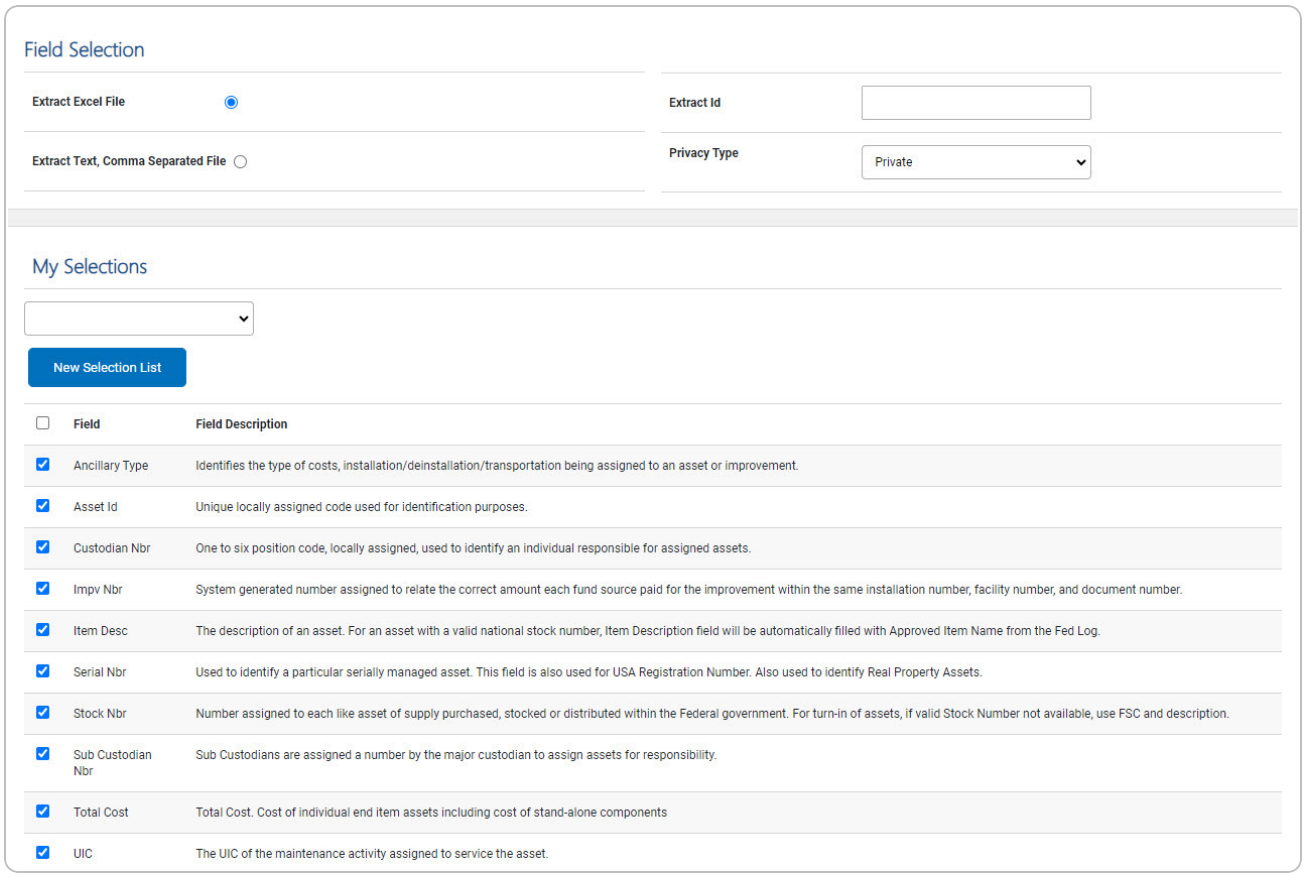
2. Verify the desired fields contains the appropriate ☑ or ☐. *The check mark appears when selected.*
3. Select Update Selection List. *The page refreshes.*

   Select Show Inquiry for small volumes of data. *The* ***Accounting Transactions Inquiry — Results*** *page appears.*
4. **OR**

   Select Submit for large volumes of data. *The* ***Accounting Transactions Inquiry Transaction Status*** *page appears.*

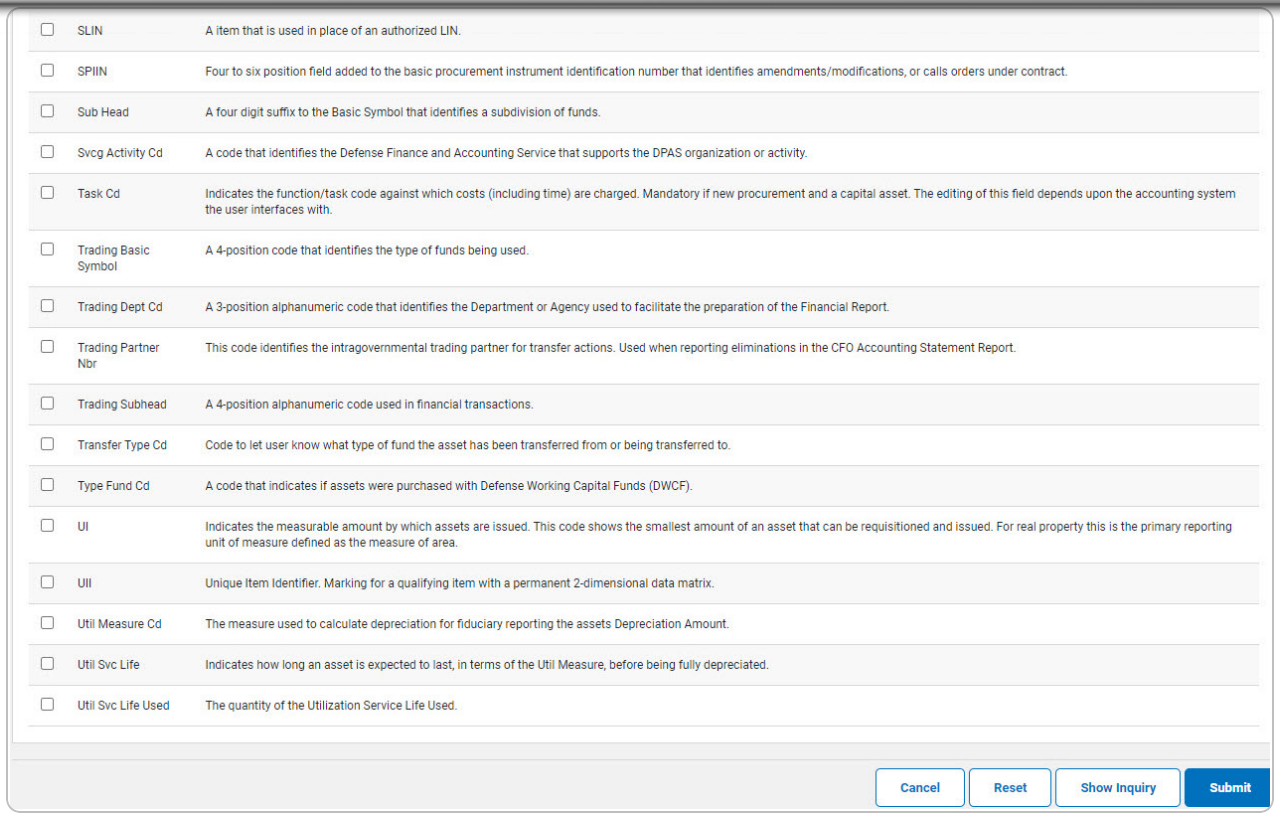
Delete a Selection List

1. Use ⌄ to select the desired Selection List. *The page refreshes, the search criteria fields change, and* New Selection List *is joined by* Update Selection List *and* Delete Selection List.



2. Select Delete Selection List. *The page refreshes and the list is immediately deleted.*

Modify the Fields Used for the Inquiry



Selecting Cancel *at any point of this procedure removes all revisions and closes the page.*
Bold *numbered steps are required.*
One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. Select Fields. *The **Accounting Transactions Inquiry** page appears.*

☐	Activation Dt	The date a Serial Asset was put into use.
☐	Agency Cd	Indicates the agency code and name.

Search for an Asset Activity Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*

   A. *The first Available Field(s) option (DEPRN CD) automatically populates and is not editable.*

   B. Use ⌄ to select the second Available Field.

   C. Use ⌄ to select the third Available Field.

   D. Repeat Step C to add additional search criteria.

Note

Adding another Available Field ⌄ automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use ⌄ to select the first Operands.

B. Use ⌄ to select the second Operands.

C. Repeat Step B to add additional search criteria.

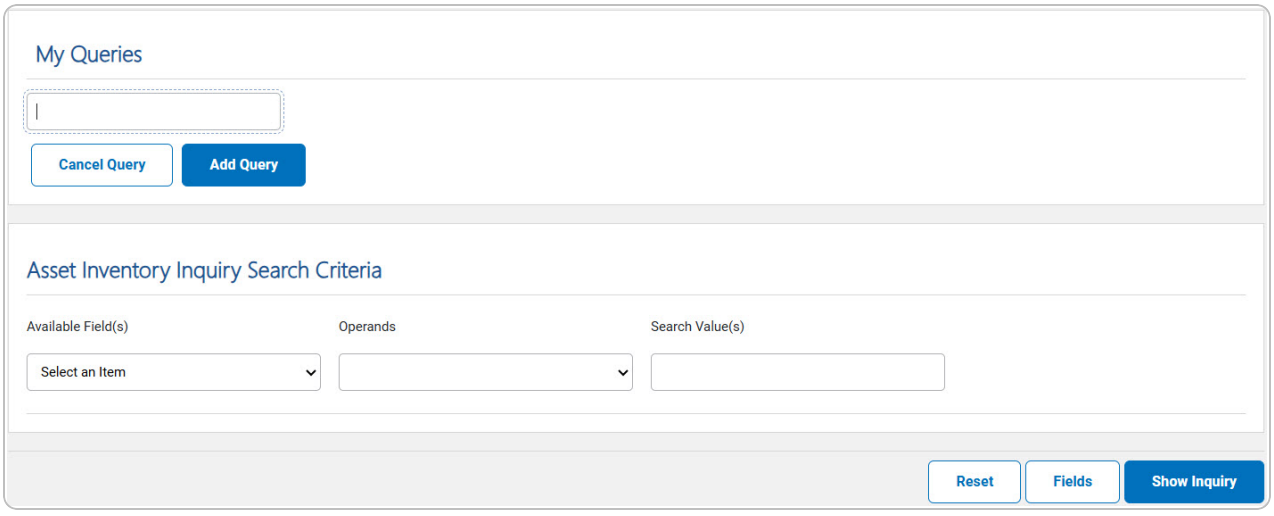
4. *Choose which Search Value(s) to use in the search.*

A. Use ⌄ to select the first Search Value.

B. Use ⌄ to select the second Search Value.

C. Repeat Step B to add additional search criteria.

Remove an Available Field Row



a. Use ⌄ to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **Capital Asset Inquiry — Results** page appears.*

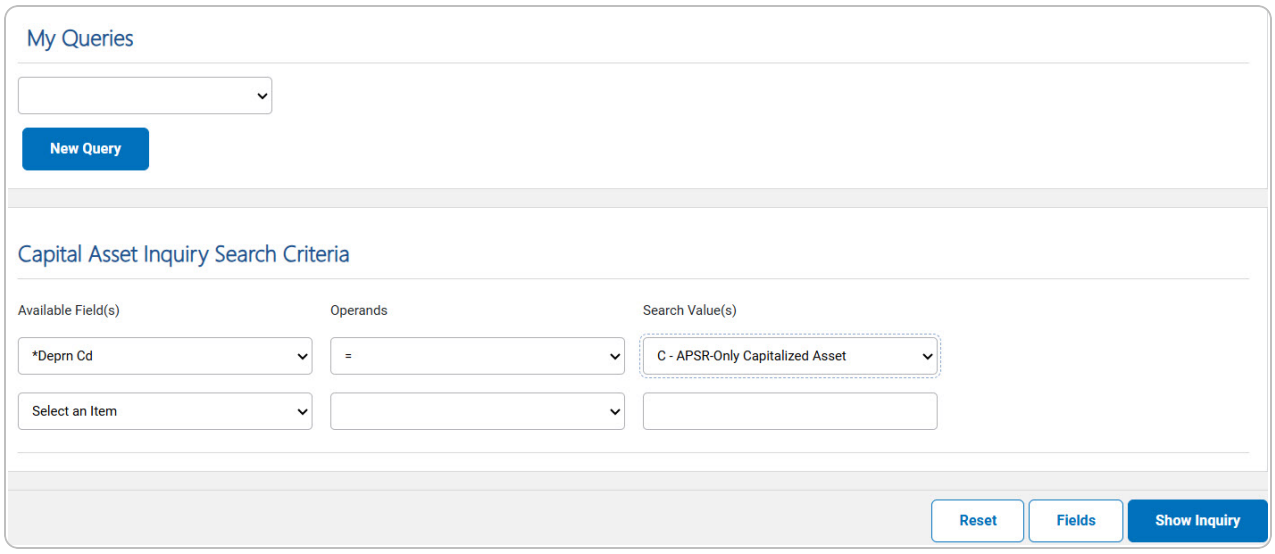
Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*

2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*

3. *Add and/or Remove rows in the Search Criteria grid as needed.*

4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*



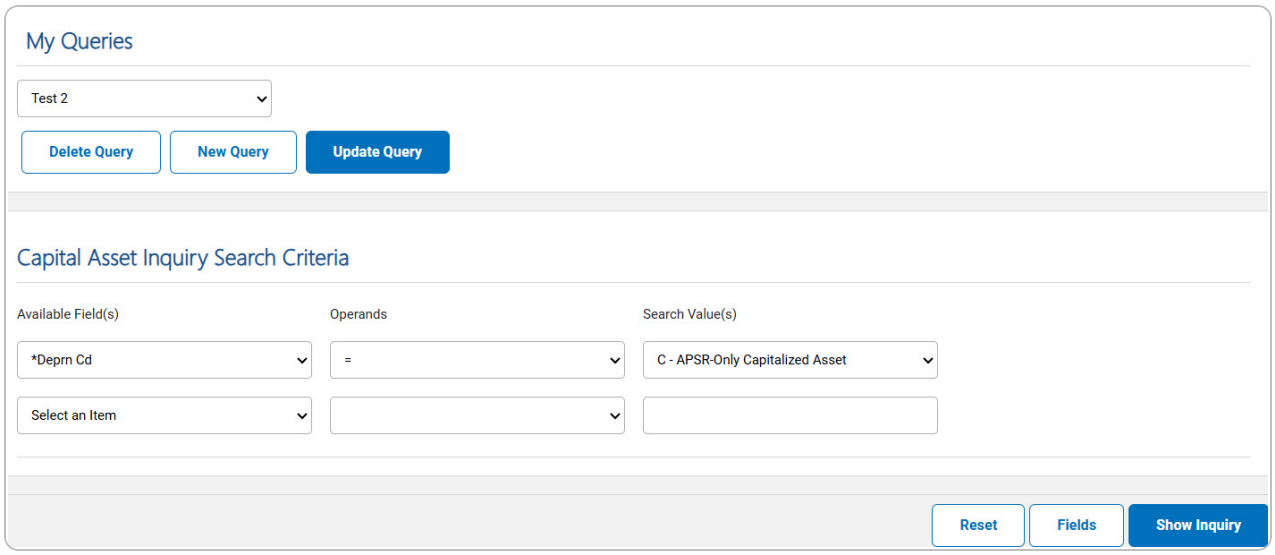
5. Select Fields. *The* ***Capital Asset Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Capital Asset Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



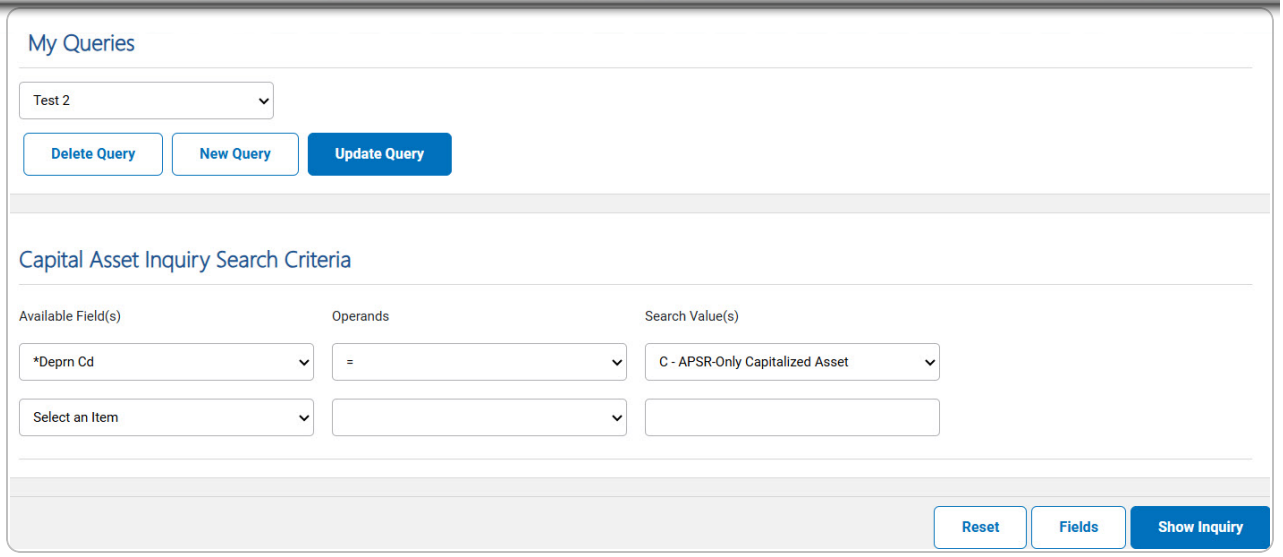
2. Select Fields. *The* ***Capital Asset Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***Capital Asset Inquiry — Results*** *page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*



2. *Add and/or Remove rows in the Search Criteria grid as needed.*
3. Select Update Query*. The query information is updated.*

   Select Fields*. The* ***Capital Asset Inquiry — Select Fields*** *page appears.*
4. OR

   Select Show Inquiry*. The* ***Capital Asset Inquiry — Results*** *page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*
3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **Capital Asset Inquiry — Select Fields** page appears.*

New Selection List

	Field	Field Description
☑	Accumd Deprn	Total depreciation incurred to date. Includes depreciation incurred by the current holder and prior holder(s) of the capital asset.
☑	Acq Dt	The fund approval/obligation date.
☑	Actbl UIC	Accountable Unit Identification Code - The UIC of the organization that is assigned management responsibility for property belonging to a specific unit organization, or activity. Multiple UICs may be grouped under an Accountable UIC to consolidate data for accountability and accounting system reporting purposes.
☑	Asset Id	Unique locally assigned code used for identification purposes.
☑	Deprn Period	Number of months depreciation will be expensed. Minimum number allowed is 24. Code values represent the maximum number of allowable months based on applicable directives.
☑	Item Desc	The description of an asset. For an asset with a valid national stock number, Item Description field will be automatically filled with Approved Item Name from the Fed Log.
☑	Mfr Name	The full name of a specific manufacturer.
☑	Mfr Part Nbr	Number used to record the make or model of a specific piece of equipment.
☑	Mfr Yr	Year an asset was manufactured/built/improved.
☑	Mfr Model Nbr	The specific number assigned to identify the make/model of an asset.
☑	Oblign Doc Nbr	Number used by accounting to track each obligation record.
☑	Salvage Value Amt	Estimated value remaining at the end of a capital assets useful life or the amount that can be expected to be recovered from the assets disposal when removed from service.
☑	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☑	Site Id	The active Site Id the user has access to.
☑	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☑	Total Cost	Total Cost. Cost of individual end item assets including cost of stand-alone components
☑	Type Asset Cd	Identifies the category of an asset as General PP&E, National Defense PP&E or Heritage Asset.
☑	UIC	The UIC of the maintenance activity assigned to service the asset.
☑	Yr Svc Life	Number of years of recommended service life based upon applicable directives.
☐	ACC-SFIS	Pos. 1-2 identifies the accounting class of assets. Remaining positions identify the SFIS code.
☐	Acct Rpt Nbr	Report number assigned when the accounting data is generated
☐	ACRN	Two position alpha or alpha/numeric code assigned to each discrete accounting classification citation within a contract.

☐	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Asset Sts Cd	Used to keep track of the status of an asset.
☐	Basic Symbol	A four digit number that identifies the type of funds being used.
☐	Cause Lst Rcl Dt Chg	Identifies how the Rcl Last Inv Date was modified. Program description of Inv List Nbr.
☐	CLIN	A four position field that identifies different contract line items within the same contract.
☐	Cntr/PO Nbr	Assigned by the procurement activity and used to identify requests for a supply purchase.
☐	Cond Cd	Used to classify material for degree of serviceability, condition, and completeness in terms of readiness for issue, and to identify actions underway to change status of materiel. This Field defaults to (A) but can be updated.
☐	Cptl Cd	Denotes capital asset not in use, or capital asset with a dollar value under the specified dollar threshold or an asset over a specified dollar threshold that is non-capital.
☐	Current Mnth Deprn Amt	The total computed depreciation amount for the month
☐	Custodian Name	The name assigned to the property custodian.
☐	Custodian Nbr	One to six position code, locally assigned, used to identify an individual responsible for assigned assets.
☐	Deprn AB Lst Rebsln	The activity based accumulated depreciation that has been incurred at the time the asset was last rebaselined.
☐	Deprn AB Rebsln	The accumulated depreciation calculated using AB with rebaselining of the asset.
☐	Deprn Cd	Indicates whether the asset is a capital asset and if fiduciary reportable by ELMS. C – Capital/Non-Reportable, N – Non-Capital/Non-Reportable, T - Capital/Reportable.
☐	Deprn Cost Center	Cost Control Number/Office where the depreciation expense is charged.
☐	Deprn Exp Cd	Identifies the depreciation expense as funded or unfunded.
☐	Deprn Job Order Nbr	Job order number where the depreciation expense is charged.
☐	Deprn Period Days	The number of days the asset is scheduled to be depreciated.
☐	Deprn SL Lst Rebsln	The straight line accumulated depreciation that has been incurred at the time the asset was last rebaslined.
☐	Deprn SL Rebsln	The accumulated depreciation calculated using SL with rebaselining of the asset.
☐	Deprn Sts Cd	A code and description that identifies the depreciation status of the asset/real property/improvement.
☐	Deprn Task Cd	Task Code/Cost Acct Code/Organization Code where the depreciation expense is charged.
☐	Deprn Util Qty	The assets actual utilization when depreciation last ran.
☐	Deprn Util Svc Life	The assets planned utilization for depreciation purposes.

☐	Dept Cd	A three position code which identifies the military department of government entity receiving the appropriation. (Also called Agency Cd or Treasury Symbol.)
☐	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt	The date this row was inserted into the database.
☐	Fndng Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code
☐	Fund Cd	Used to identify type funding used in the acquisition of assets/services.
☐	FY Cost	Accumulated monthly depreciation to date, in a fiscal year.
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	LOA	Identifies the department code, period of availability, basic symbol, and subhead of the original appropriation.
☐	Loc	Physical location of an asset.
☐	Local Rcpt Dt	Date asset received
☐	Obj Class Cd	Identifies labor and materiel resources utilized in the production processes that apply to accounting transactions.
☐	Obj Class Cd2	First two-positions identifies the Expense Code.
☐	Owng Cost Center	A code that identifies an organization
☐	Pgm Yr	Identifies the beginning/ending year of the appropriation in YYYYYYYY format.
☐	Prior Deprn	Total accumulated depreciation incurred by previous holders of the capital asset.
☐	Prr Deprn AB Rebsln	The Rebaselined Activity Based depreciation expense incurred by previous owners at the time the asset was transferred to current owning UIC.
☐	Prr Deprn SL Rebsln	The Rebaselined Straight Line depreciation expense incurred by previous owners at the time the asset was transferred to current owning UIC.
☐	Rcl Inv User Id	Identifies the user id of who entered the inventory data.
☐	Rcl Last Inv Dt	The date of the last reconciled official inventory of the asset.
☐	Rcl Loc	Location of asset when inventoried reconciled
☐	Rcl Sub Loc	Sub Location of asset when inventoried/reconciled
☐	Rcpt Action Cd	Code signifying the receipt action processed
☐	Rcpt Action Type Cd	Code signifying the type of receipt action
☐	Rcpt Doc Nbr	Doc Nbr used to receive asset

☐	Rcvd By	The name of the entity that received the asset.
☐	Remarks	A text field available to record local information/reason for change to record.
☐	SLIN	A item that is used in place of an authorized LIN.
☐	SPIIN	Four to six position field added to the basic procurement instrument identification number that identifies amendments/modifications, or calls orders under contract.
☐	Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☐	Sub Head	A four digit suffix to the Basic Symbol that identifies a subdivision of funds.
☐	Sub Loc	A more specific description of the physical location of an asset within its Location.
☐	Sys Desc	The description of the system identification
☐	Sys Id	Used to tie various end items and components together into a system.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Trading Basic Symbol	A 4-position code that identifies the type of funds being used.
☐	Trading Dept Cd	A 3-position alphanumeric code that identifies the Department or Agency used to facilitate the preparation of the Financial Report.
☐	Trading Partner Nbr	This code identifies the intragovernmental trading partner for transfer actions. Used when reporting eliminations in the CFO Accounting Statement Report.
☐	Trading Subhead	A 4-position alphanumeric code used in financial transactions.
☐	Tran Cd	This code identifies the type of transaction processed.
☐	Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
☐	Tran Qty	Transaction Quantity of the item being processed.
☐	Transfer Type Cd	Code to let user know what type of fund the asset has been transferred from or being transferred to.
☐	Type Fund Cd	A code that indicates if assets were purchased with Defense Working Capital Funds (DWCF).
☐	UIC Name	A unit, organization, or activity name
☐	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.

New Selection List

	Field	Field Description
☑	Accumd Deprn	Total depreciation incurred to date. Includes depreciation incurred by the current holder and prior holder(s) of the capital asset.
☑	Acq Dt	The fund approval/obligation date.
☑	Actbl UIC	Accountable Unit Identification Code - The UIC of the organization that is assigned management responsibility for property belonging to a specific unit organization, or activity. Multiple UICs may be grouped under an Accountable UIC to consolidate data for accountability and accounting system reporting purposes.
☑	Asset Id	Unique locally assigned code used for identification purposes.
☑	Deprn Period	Number of months depreciation will be expensed. Minimum number allowed is 24. Code values represent the maximum number of allowable months based on applicable directives.
☑	Item Desc	The description of an asset. For an asset with a valid national stock number, Item Description field will be automatically filled with Approved Item Name from the Fed Log.
☑	Mfr Name	The full name of a specific manufacturer.
☑	Mfr Part Nbr	Number used to record the make or model of a specific piece of equipment.
☑	Mfr Yr	Year an asset was manufactured/built/improved.
☑	Mfr Model Nbr	The specific number assigned to identify the make/model of an asset.
☑	Oblign Doc Nbr	Number used by accounting to track each obligation record.
☑	Salvage Value Amt	Estimated value remaining at the end of a capital assets useful life or the amount that can be expected to be recovered from the assets disposal when removed from service.
☑	Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number. Also used to identify Real Property Assets.
☑	Site Id	The active Site Id the user has access to.
☑	Stock Nbr	Number assigned to each like asset of supply purchased, stocked or distributed within the Federal government. For turn-in of assets, if valid Stock Number not available, use FSC and description.
☑	Total Cost	Total Cost. Cost of individual end item assets including cost of stand-alone components
☑	Type Asset Cd	Identifies the category of an asset as General PP&E, National Defense PP&E or Heritage Asset.
☑	UIC	The UIC of the maintenance activity assigned to service the asset.
☑	Yr Svc Life	Number of years of recommended service life based upon applicable directives.
☐	ACC-SFIS	Pos. 1-2 identifies the accounting class of assets. Remaining positions identify the SFIS code.
☐	Acct Rpt Nbr	Report number assigned when the accounting data is generated
☐	ACRN	Two position alpha or alpha/numeric code assigned to each discrete accounting classification citation within a contract.

☐	Asset Cd	A code used to identify the type of asset purchased/transferred to the property management system and manner of disposition of assets.
☐	Asset Sts Cd	Used to keep track of the status of an asset.
☐	Basic Symbol	A four digit number that identifies the type of funds being used.
☐	Cause Lst Rcl Dt Chg	Identifies how the Rcl Last Inv Date was modified. Program description of Inv List Nbr.
☐	CLIN	A four position field that identifies different contract line items within the same contract.
☐	Cntr/PO Nbr	Assigned by the procurement activity and used to identify requests for a supply purchase.
☐	Cond Cd	Used to classify material for degree of serviceability, condition, and completeness in terms of readiness for issue, and to identify actions underway to change status of materiel. This Field defaults to (A) but can be updated.
☐	Cptl Cd	Denotes capital asset not in use, or capital asset with a dollar value under the specified dollar threshold or an asset over a specified dollar threshold that is non-capital.
☐	Current Mnth Deprn Amt	The total computed depreciation amount for the month
☐	Custodian Name	The name assigned to the property custodian.
☐	Custodian Nbr	One to six position code, locally assigned, used to identify an individual responsible for assigned assets.
☐	Deprn AB Lst Rebsln	The activity based accumulated depreciation that has been incurred at the time the asset was last rebaselined.
☐	Deprn AB Rebsln	The accumulated depreciation calculated using AB with rebaselining of the asset.
☐	Deprn Cd	Indicates whether the asset is a capital asset and if fiduciary reportable by ELMS. C – Capital/Non-Reportable, N – Non-Capital/Non-Reportable, T - Capital/Reportable.
☐	Deprn Cost Center	Cost Control Number/Office where the depreciation expense is charged.
☐	Deprn Exp Cd	Identifies the depreciation expense as funded or unfunded.
☐	Deprn Job Order Nbr	Job order number where the depreciation expense is charged.
☐	Deprn Period Days	The number of days the asset is scheduled to be depreciated.
☐	Deprn SL Lst Rebsln	The straight line accumulated depreciation that has been incurred at the time the asset was last rebaslined.
☐	Deprn SL Rebsln	The accumulated depreciation calculated using SL with rebaselining of the asset.
☐	Deprn Sts Cd	A code and description that identifies the depreciation status of the asset/real property/improvement.
☐	Deprn Task Cd	Task Code/Cost Acct Code/Organization Code where the depreciation expense is charged.
☐	Deprn Util Qty	The assets actual utilization when depreciation last ran.
☐	Deprn Util Svc Life	The assets planned utilization for depreciation purposes.

☐	Dept Cd	A three position code which identifies the military department of government entity receiving the appropriation. (Also called Agency Cd or Treasury Symbol.)
☐	DOD Serial Nbr	Used to identify a particular serially managed asset. This field is also used for USA Registration Number.
☐	Estbd By	The name of the entity inserting this row.
☐	Estbd Dt	The date this row was inserted into the database.
☐	Fndng Cost Center	Identifies the Cost Control Center/MCLO and Work Center or Code
☐	Fund Cd	Used to identify type funding used in the acquisition of assets/services.
☐	FY Cost	Accumulated monthly depreciation to date, in a fiscal year.
☐	Job Order Nbr	Number used to track costs against an asset.
☐	Last Tran Dt	Date when the last transaction took place. Automatically assigned by the system.
☐	Last Updtd By	Last updated by (user id)
☐	LOA	Identifies the department code, period of availability, basic symbol, and subhead of the original appropriation.
☐	Loc	Physical location of an asset.
☐	Local Rcpt Dt	Date asset received
☐	Obj Class Cd	Identifies labor and materiel resources utilized in the production processes that apply to accounting transactions.
☐	Obj Class Cd2	First two-positions identifies the Expense Code.
☐	Owng Cost Center	A code that identifies an organization
☐	Pgm Yr	Identifies the beginning/ending year of the appropriation in YYYYYYYY format.
☐	Prior Deprn	Total accumulated depreciation incurred by previous holders of the capital asset.
☐	Prr Deprn AB Rebsln	The Rebaselined Activity Based depreciation expense incurred by previous owners at the time the asset was transferred to current owning UIC.
☐	Prr Deprn SL Rebsln	The Rebaselined Straight Line depreciation expense incurred by previous owners at the time the asset was transferred to current owning UIC.
☐	Rcl Inv User Id	Identifies the user id of who entered the inventory data.
☐	Rcl Last Inv Dt	The date of the last reconciled official inventory of the asset.
☐	Rcl Loc	Location of asset when inventoried reconciled
☐	Rcl Sub Loc	Sub Location of asset when inventoried/reconciled
☐	Rcpt Action Cd	Code signifying the receipt action processed
☐	Rcpt Action Type Cd	Code signifying the type of receipt action
☐	Rcpt Doc Nbr	Doc Nbr used to receive asset

☐	Rcvd By	The name of the entity that received the asset.
☐	Remarks	A text field available to record local information/reason for change to record.
☐	SLIN	A item that is used in place of an authorized LIN.
☐	SPIIN	Four to six position field added to the basic procurement instrument identification number that identifies amendments/modifications, or calls orders under contract.
☐	Sub Custodian Nbr	Sub Custodians are assigned a number by the major custodian to assign assets for responsibility.
☐	Sub Head	A four digit suffix to the Basic Symbol that identifies a subdivision of funds.
☐	Sub Loc	A more specific description of the physical location of an asset within its Location.
☐	Sys Desc	The description of the system identification
☐	Sys Id	Used to tie various end items and components together into a system.
☐	Task Cd	Indicates the function/task code against which costs (including time) are charged. Mandatory if new procurement and a capital asset. The editing of this field depends upon the accounting system the user interfaces with.
☐	Trading Basic Symbol	A 4-position code that identifies the type of funds being used.
☐	Trading Dept Cd	A 3-position alphanumeric code that identifies the Department or Agency used to facilitate the preparation of the Financial Report.
☐	Trading Partner Nbr	This code identifies the intragovernmental trading partner for transfer actions. Used when reporting eliminations in the CFO Accounting Statement Report.
☐	Trading Subhead	A 4-position alphanumeric code used in financial transactions.
☐	Tran Cd	This code identifies the type of transaction processed.
☐	Tran Doc Nbr	Unique number either automatically or manually assigned to track a requisition or action through the system from receipt to closing and to post property management actions.
☐	Tran Qty	Transaction Quantity of the item being processed.
☐	Transfer Type Cd	Code to let user know what type of fund the asset has been transferred from or being transferred to.
☐	Type Fund Cd	A code that indicates if assets were purchased with Defense Working Capital Funds (DWCF).
☐	UIC Name	A unit, organization, or activity name
☐	UII	Unique Item Identifier. Marking for a qualifying item with a permanent 2-dimensional data matrix.

Click the following link to display PA Navigation Tips.

Search for a CIP Inquiry — Criteria

One or more of the Search Criteria fields can be entered to isolate the results. By default, all results are displayed. Selecting Reset *at any point of this procedure returns all fields to the default "All" setting.*

1. In the Search Criteria box, choose which available field to use in the search.

2. *Choose which Available Field(s) to use in the search.*
   - **A.** *The first Available Field(s) option (UIC) automatically populates and is not editable.*
   - **B.** *The second Available Field(s) option (PRJ STATUS) automatically populates and is not editable.*

C. Use to select the third Available Field.

D. Repeat Step C to add additional search criteria.

Note

Adding another Available Field automatically populates an additional search criteria row.

Note

Select Fields to modify the fields used in the inquiry. *The Fields Selection page opens.*

3. *Choose which Operands to use in the search.*

A. Use to select the first Operands.

B. Use to select the second Operands.

C. Use to select the third Operands.

D. Repeat Step C to add additional search criteria.

4. *Choose which Search Value(s) to use in the search.*

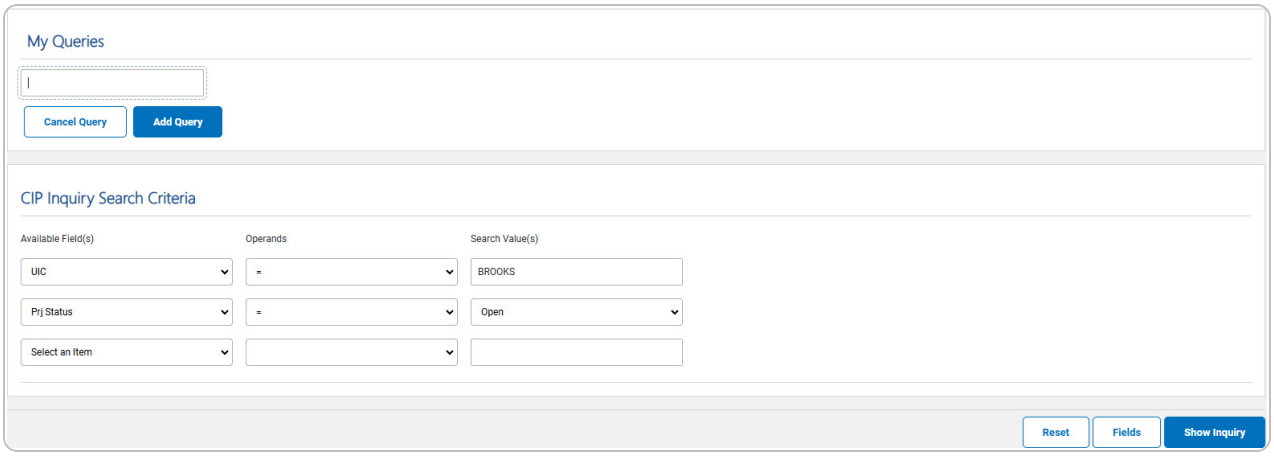
A. Use to select the first Search Value.

B. Use to select the second Search Value.

C. Use to select the third Search Value.

D. Repeat Step C to add additional search criteria.

Remove an Available Field Row



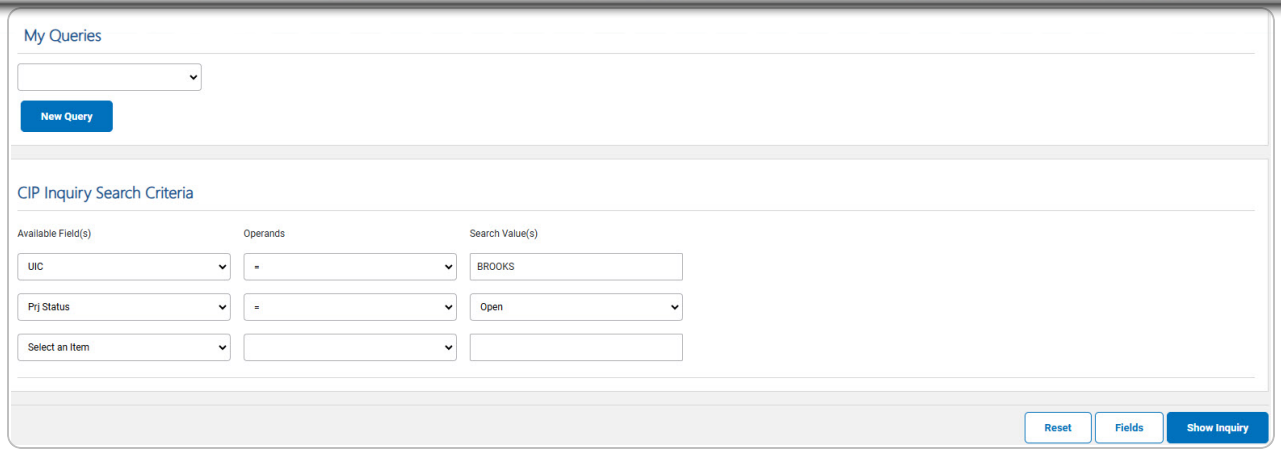
a. Use to select desired Available Field.

b. Select Remove Filter Category. *The desired row is removed.*

5. Select Show Inquiry. *The **CIP Inquiry — Results** page appears.*

Add a My Queries Inquiry

1. Select New Query. *The page refreshes, and My Queries changes from a drop-down field to a text field.*



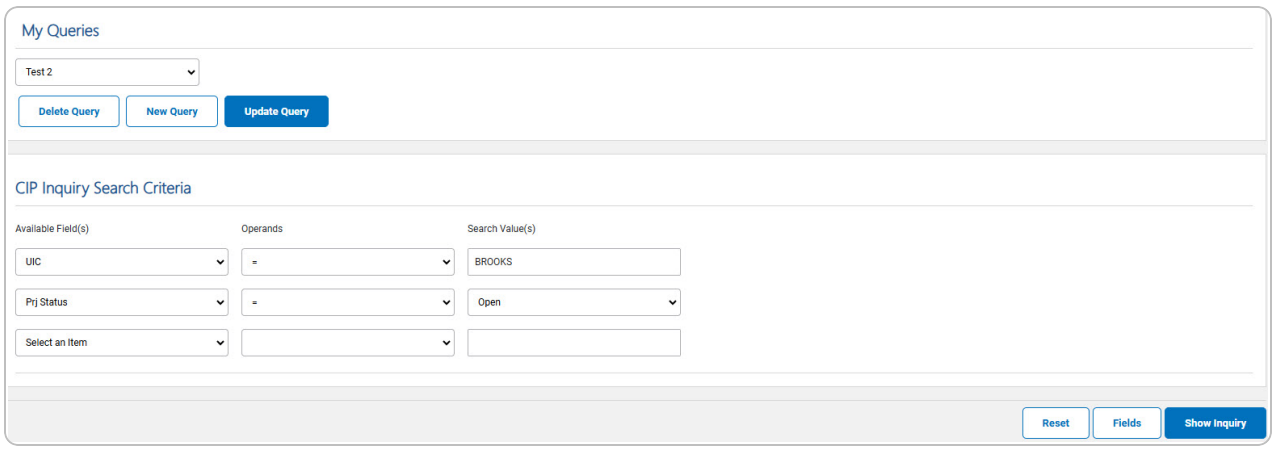
2. Enter the Query Name in the field provided. *This is a 90 alphanumeric character field.*
3. *Add and/or Remove rows in the Search Criteria grid as needed.*
4. Select Add Query. *The Query and the information entered in the Search Criteria grid are added to My Queries. Select* Cancel Query *to disregard the Query.*
5. Select Fields. *The* ***CIP Inquiry — Select Fields*** *page appears.*

   OR

   Select Show Inquiry. *The* ***CIP Inquiry — Results*** *page appears.*

Select a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and the selected query information appears in the search criteria grid.*



2. Select Fields. *The **CIP Inquiry — Select Fields** page appears.*

   OR

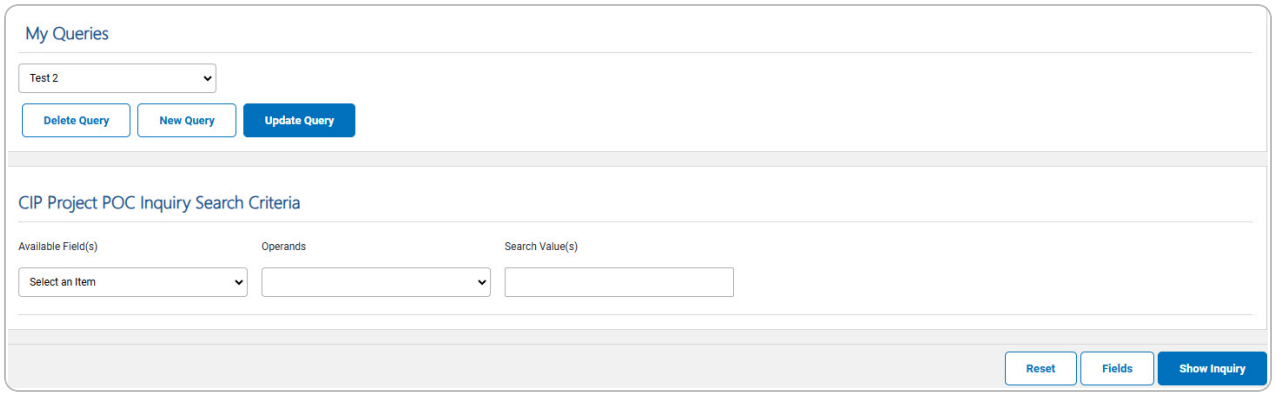
   Select Show Inquiry. *The **CIP Inquiry — Results** page appears.*

Update a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, the search criteria fields change, and* New Query *is joined by* Update Query *and* Delete Query*. The selected query information appears in the search criteria grid.*

2. *Add and/or Remove rows in the Search Criteria grid as needed.*

3. Select Update Query. *The query information is updated.*



4. Select Fields. *The **CIP Inquiry — Select Fields** page appears.*

   OR

   Select Show Inquiry. *The **CIP Inquiry — Results** page appears.*

Delete a My Queries Inquiry

1. Use ⌄ to select the desired saved query. *The page refreshes, and New Query is joined by Update Query and Delete Query. The selected query information appears in the search criteria grid.*

2. *Verify the query information.*

3. Select Delete Query. *The query information is removed.*

Revise the Fields for the Inquiry

Select Fields. *The **CIP Inquiry — Select Fields** page appears.*

Common Errors

The table below provides a list of common errors and possible solutions. There may be more than one solution to a given error.

Error	Solution
125 — No record(s) match search criteria or you do not have the appropriate security access.	Invalid Entry. Results for the search criteria entered do not exist or Incorrect security access. Enter different Search Criteria and try the Search again.
18 — Date format should be MM/DD/YYYY with valid month/day combination.	Invalid Date Format Entry. The date must be entered in the (MM/DD/YYYY) format. Re-enter the date..
13 — Mandatory Entry: *Available Field(s)*.	Missing Entry. No data was entered. Enter the appropriate information in the desired field.
13 — Mandatory Entry: *Operands*.	
13 — Mandatory Entry: *Query Name*.	
xxxx – Saved Inquiry already exists. Select Update Query **or** Delete Query **.**	Invalid Entry. The inquiry already exists in the database. Use the existing inquiry, or select Update Query to revise the existing query.
102 — Inquiry already exists.	Invalid entry. The Inquiry is already established. Re-enter the inquiry or select Update Query or Delete Query to modify the existing inquiry.
106 — Operand must be =,	Missing Entry. The Field value was entered, but

>, <, >= , <= , <>, or Like.	no operand was selected. Choose an operand from the drop-down menu.
31 — To perform Search, data must be entered in one or more fields.	Missing Entry. At least one field is necessary to perform the search. Enter at least one field, then select the Search button.
65 — No record(s) match search criteria.	Invalid Entry. Results for the search criteria entered do not exist. Enter different Search Criteria and try the Search again.
