

Help Reference Guide

Collateral Item

Overview

The WAREHOUSE MGMT module Collateral Item process provides the ability to associate one or more collateral items with its Parent Item (STOCK NBR), which integrates into the responsibility of maintaining the User Catalog that is associated with the Logistics Program.

The process views what items are associated with another item. For example, when someone requests to be issued skis, the warehouse clerk uses this process to view what collateral items may need to be issued to outfit the requester such as boots, poles, bindings, etc.

Procedures

Search for a Collateral Item

One or more of the Search Criteria fields can be entered to isolate the results. By default, all

results are displayed. Selecting CReset at any point of this procedure returns all fields to the default "All" setting.

1. In the Search Criteria box, narrow the results by entering one of the following optional fields.

Instructions					Ψ
Search Criteria					*
i Stock Nbr	All		i Item Desc	All	
i Collateral Stock Nbr	All		i Collateral Item Desc	All	
		Q Search	Reset		

- Use or to assist with the STOCK NBR entry. *This is a 15 alphanumeric character field.*
- Use or to assist with the COLLATERAL STOCK NBR entry. *This is a 15 alpha-numeric character field.*

Update a COLLATERAL STOCK NBR

1. Click rext to the desired Collateral Item record. The record expands to display the COLLATERAL STOCK NBR entries.
