

Shelf Life Extension Overview

Overview

The WAREHOUSE MGMT module Shelf Life Extension process provides the ability to input and maintain records of Shelf Life Extension Notifications that have been officially received based on Shelf Life Extension testing on specific Shelf Life managed items. These records are used in a background process to:

- Update expiration dates on Inventory Control Number records
- Update Condition Codes on Inventory Master records
- Validate allowable Condition Codes that can be selected during the Receiving, Unit Returns, Individual Returns, and Warehouse Transfer (receipts) processes
- Determine the applicable Expiration Date value when an Inventory Control Number record is created

Shelf Life Extension Notifications / Shelf Life Failed Testing Notifications are typically obtained from one or more of the following official sources:

- Joint Acquisition CBRN Knowledge System (J.A.C.K.S.)
- Joint Equipment Assessment Program (JEAP)
- Joint Program Executive Office for Chemical and Biological Defense (JPEO – CBD)
- DoD Shelf-Life Extension System (SLES)
- U.S. Army testing laboratories
- U.S. Army Research, Development and Engineering Command (REDCOM)
- Naval Messages
- Other Official Agency or Program Office Notifications
