

Site

Overview

The Warehouse Management module Site process provides the ability to group Warehouses within a Region.

Sites are part of the logical structure for warehousing resources. The Logistics Programs begins to create a logical structure for the warehousing resources.

The following diagram illustrates the hierarchy defining the Warehouse Management Module. The items listed in the pyramid (Logistics Program, Region, Site and Warehouse) are all created by the **ELMS User Account Management** team.

Once created by the ELMS User Account Management team, an inquiry finds what Sites are available and which are editable, depending on what the role allows.

View the History of a Site Record

Selecting  at any point of this procedure removes all revisions and closes the page. **Bold** numbered steps are required.

1. Select . The **Site History** pop-up window displays.

The screenshot shows a pop-up window titled "History" with a close button (X) in the top right corner. Below the title bar is an "Instructions" section. The main content area is titled "Site History" and includes a "Grid Options" dropdown menu. It displays a table with the following columns: Operation, Last Transaction Dt/Tm, Last Updated By, Site Name, Site Desc, Contact Point, Phone Nbr, DSN Nbr, Fax Nbr, and Email Address. The table contains two rows of data, both for "BPG TESTING SITE". The first row is marked as "Updated" and the second as "Created". Below the table is a pagination bar showing "50 items per page" and "1 - 2 of 2 items". A "Close" button is located at the bottom left of the window.
