

Adding a Location Condition Code Default

1. In the DPAS Warehouse Management module, navigate to **Location Condition Code Default** from the **Warehouse Mgmt** menu - The Results Grid displays a list of all currently available Location Condition Code Defaults.
2. Select the **Add** button - The **Add Location Cond Cd Default** pop-up displays.
3. Enter or browse for either a **LIN/TAMCN** (Line Item Number/Table of Authorized Materiel Control Number) or a **Stock Nbr** (Number).
4. Select a **Location Type Cd** (Code) as an identifier for the type of Location.
5. Select the **Cond Cd** (Condition Code) from the drop-down list to identify the Condition to assign to the Location.
6. Browse for the **Default Location** or **Default Container** to be recommended.
7. Select the optional **Add / Edit Remarks** hyperlink to add a comment in the **Remarks** and/or **History Remarks** fields.
8. Select the **Add** button to process the transaction - The new Location Condition Code Default displays highlighted at the top of the Results Grid.

Location Type Cd does not include the Individual Issue Type Code. This is a special Type with its own process to define Location settings.

Updating a Location Condition Code Default

1. In the DPAS Warehouse Management module, navigate to **Location Condition Code Default** from the **Warehouse Mgmt** menu - The Results Grid displays a list of all currently available Location Condition Code Defaults.
2. Select the **Edit** button for the Location Condition Code Default to update - The **Update Location Condition Code Default** pop-up displays. (Step not shown)
3. Change data as needed.
4. Select the **Add / Edit Remarks** hyperlink to add a comment in the **History Remarks** field to document the reason for the change.
5. Select the **Update** button to save the changes - The updated Location Condition Code Default displays highlighted at the top of the Results Grid.

The **Location Type Cd** is disabled in the update process and cannot be changed.
