## Maintenance Inquiries

| NAME | DESCRIPTION |
|---|---|
| Asset Prvn Maint Sch | This inquiry provides a way for users to query for Preventive Maintenance Schedules that have been configured for a particular Asset Id. |
| Equip Pool | This inquiry provides a way for users to view Equipment Pools by Equipment Pool Id, Maintenance Activity, POC or Location. |
| Maint Asset | This inquiry will allow users to view current information about all assets on the Maintenance Asset Master Table within the selected maintenance activity. |
| Maint Activity | This inquiry will allow users to view current information about all assets on the Maintenance Activity Table within the selected maintenance activity. |
| Wrnty/Svc/Subscript Terms/Cond | This inquiry will allow users to query and retrieve warranty, service or subscription, contract and contractor's information. |
| Wrnty/Svc/Subscript Asset Assoc | This inquiry will allow users to query and retrieve information for assets that have warranty, extended warranties, services and subscriptions, contracts and contractors assigned to the assets. |
| Work Order | This inquiry will allow users to retrieve information regarding Work Orders. |
| Work Plan | This inquiry provides a way for a user to query for Work Plans that have been configured for a particular Maintenance Activity.  Users will be able to select and view the detail of a particular Work Plan. |
| Work Order Lgcy Hist | This inquiry provides a way for a user to retrieve Work Order history imported from the Legacy system into Web DPAS. |

## Utilization Inquiries

| NAME | DESCRIPTION |
|---|---|
| Asset Utilization | This process will allow users to query and retrieve Asset Utilization information for assets that exist in the Maintenance Asset Master Table. This inquiry will provide users the current utilization information for an asset as well as its utilization history. If "Deleted" is selected as a Search Criteria, only the deleted asset will be displayed, not the deleted utilization records. |

## Dispatch Inquiries

| NAME | DESCRIPTION |
|---|---|
| **Dispatch Ctgry** | This inquiry will allow users to query and retrieve Dispatch Categories, Sub Categories and Descriptions for the current Maintenance Activity. An Asset Count displays for each Dispatch Category. |
| **Dispatch** | This inquiry will allow users to query to view current information about all data elements on the Dispatch table within a selected maintenance activity. This process will also show dispatch requests, in which case, there will be no assets currently assigned. |

## Master Data Inquiries

| NAME | DESCRIPTION |
|---|---|
| **Contract** | This inquiry provides a way for users to search and view information regarding contracts that is stored on the Contract Table. |
| **Contractor** | This inquiry provides a way for users to search and view information regarding contractors that are stored on the Contract and Contractor Tables. |

## History Inquiries

| NAME | DESCRIPTION |
|---|---|
| **Audit Viewer** | The purpose of the Maintenance Audit Viewer is to provide a means for displaying historical data related to maintenance records that are subject to auditing. Work plans, maintenance schedules, maintenance teams, and maintenance activities are associated with audit records. |
| **Transaction Journal** | The purpose of the Transaction Journal Viewer is to display Work Order and Dispatch activity information. |

## Statistics Inquiries

| NAME | DESCRIPTION |
|---|---|
| **Asset Type** | This inquiry shows a user the number of assets in their maintenance system, how many are tracked, not tracked and discontinued, how they are being tracked, and if they have exceeded their useful life. |
| **Dispatch** | This inquiry shows a user the number of pending Dispatches, number of Dispatches returned late, number of assets dispatched and the number of assets unavailable. |
| **PM Schedules** | This inquiry shows a user how many One Time and Recurring PM Schedules have been |

| | set up over the current period and over the life of the Maintenance Activities. |
|---|---|
| **Utilization** | This inquiry shows a user how many reportable assets should be reported in a given period and how many assets that have not reported utilization over the last month, and the last 3, 6, 9 and 12 months. |
| **Work Order** | This inquiry shows a user the number of Work Orders, Sum of Estimated Costs/Hours, and Actual Costs/Hours for Work Orders. |
| **Work Plans** | This inquiry shows a user the number of Work Plans that are public and work plans that are private. |
