

## Installing the SigWeb Signature Pad

**\*For Chrome and Edge**

**Note: Do not connect the pad to your computer until all driver installation steps are complete.**

### First Time Install Steps

Follow Steps 1-4 here if you have never installed SigWeb before:

1. Download the SigWeb installer at:

<https://www.topazsystems.com/software/sigweb.exe>

2. Before installing, be sure to close all open browsers (i.e. Chrome, Firefox, Internet Explorer, etc).
3. Run the SigWeb installer (right-click and select "Run as Administrator").

Note: Do not connect your signature pad until installation is complete.

4. Once complete, test SigWeb with the SigWeb Demo at this page:

[https://www.sigplusweb.com/sigwebtablet\\_demo.htm](https://www.sigplusweb.com/sigwebtablet_demo.htm) Click "Sign" and sign on your signature pad; your signature will appear in the signature box.

The screenshot shows a web-based signature interface. At the top, there is a rectangular box containing the handwritten signature "Ea Smith". Below this box are three buttons: "Sign", "Clear", and "Done". At the bottom of the interface, there are two input fields: "SigString:" and "Base64 String:", both of which are currently empty.
