Bridging the DPAS MM Module to the DPAS WM Module

The bridging of the DPAS Materiel Management (MM) module to the DPAS Warehouse Management (WM) module allows an Inventory Control Point to manage inventory within associated Remote Storage Activities. The MM module also provides the capability to fulfill and generate requisitions, contract management, OM&S accounting, and In-transit tracking.

Different portions of the process are accomplished by different roles within the DPAS modules.

Procedure	Required Role		
	Security	ICP Officer	WH Officer
1. Have a Materiel Management Program created	☑	☐	☐
2. Establish a Division & ICP	☑	☑	☐
3. Add a Remote Storage Activity (RSA) to the ICP	☐	☑	☐
4. Add a managed DoDAAC to the ICP	☐	☑	☐
5. Add the ICP managed DoDAAC to the RSA	☐	☑	☐
6. Create a Contractor and Contract (Optional for the MM Module but necessary for Government Furnished Property)	☐	☑	☐
7. Assign the GFM Contract to the RSA's ICP managed DoDAAC	☐	☑	☐
