

## Effective Date

11 June 2021

## Release Notes Overview

Release 2021.2.1 for the Defense Property Accountability System (DPAS) was released on June 11, 2021.

This release includes system change requests and corrects program deficiencies identified by the user community. The update impacts Appointment Scheduler, eCatalog, Inventory, Mobile Platform, Maintenance and Utilization, Property Accountability and Warehouse Management modules.

## Appointment Scheduler

### System Change Request (SCR)

The following feature, which is a part of Appointment Scheduler SCR 01622, was implemented by this release:

#### SCR #01622 – Check-In Kiosk / Member Cleanup

- Provides enhanced data management for the appointment members and contact information. Once the member has fulfilled their scheduled appointment, there is no requirement to maintain the information within the appointment databases. Member data will be cleaned up to the minimum information required for historical metrics and reporting. This will ensure that with each appointment, the member information is refreshed to include any changes made since their last visit.

### Help Tickets

The following Appointment Scheduler Help Tickets were closed by this release:

#### *DPAS Database (LCDBD01)*

##### Help Ticket #54691

- Added the following providers to the mobile phone provider drop down on Appointment AUD.
  - DOCOMO
  - AU
  - SoftBank
  - US Cellular
  - Boost Mobile
  - Cricket Wireless

#### *Appointment Checked In Inquiry (LPWHQ93)*

##### Help Ticket #54690

- Corrected a deficiency where appointments were not getting displayed in IE.

## eCatalog

### **System Change Request (SCR)**

The following feature, which is a part of eCatalog SCR 01659, was implemented by this release:

SCR #01659 – Agency Catalog Interfaces / Cleanup and Resolve Invalid Lookup Values in the External Catalog

- Addresses the invalid foreign key values that reside in the external agency catalog. This ensures these values do not cause issues with the background processes, or get pulled into DPAS, thereby causing issues with the cataloging processes.

### **Help Tickets**

The following eCatalog Help Ticket was closed by this release:

#### *WebFLIS Catalog Data Validation and Staging (LPCTI29)*

Help Ticket #50196

- Corrected a deficiency where the I&S grouping was missing on the FSM Asset Authorization Report.

## Inventory

### **Help Tickets**

The following Inventory Help Ticket was closed by this release:

#### *Physical Inventory (LPAID30)*

Help Ticket #53239

- Corrected a deficiency where Bulk Quantity was not getting incremented correctly on Physical Inventory.

## Mobile Platform

### **System Change Request (SCR)**

The following feature, which is a part of Mobile Platform SCR 01637, was implemented by this release:

SCR #01637 – Reconstitute Planned Pick for HHT

- Provides the capability to view, pick and deliver Planned Picks via an AIT Terminal that is compatible with DPAS.
- The solution downloads Planned Picks for disconnected operation, and uploads them when the terminal is reconnected.
- All business processes related to confirming the Pick are complete; such as updating the MRO to Picked/Ready for Release, and generating a QC action when applicable.
- When using Planned Picks while connected, the process receives new picks and posts completed picks in real-time.

## Maintenance and Utilization (M&U) Module

### Help Tickets

The following Maintenance and Utilization Help Ticket was closed by this release:

#### *Work Order AU (WPMAN12)*

Help Ticket #53512

- Corrected a deficiency where associating Stock Numbers with Special Characters to Assets was causing an error.

## Property Accountability (PA) Module

### Help Tickets

The following Property Accountability Help Ticket was closed by this release:

#### *Software Catalog AUD (WPITN03)*

Help Ticket #49166

- Corrected a deficiency where a Software Request was not accepting the submission of the newer version numbers on Software Catalog AUD.

## Warehouse Management (WM) Module

### System Change Request (SCR)

The following feature, which is a part of Warehouse Management SCR 01535, was implemented by this release:

SCR #01535 – Physical Inventory Inquiry – Add Type Asset Code

- Type Asset Cd column has been added to the Physical Inventory Reconciliation Results Inquiry.

The following feature, which is a part of Warehouse Management SCR 01643, was implemented by this release:

SCR #01643 – Generate DLMS867I for Materiel Release Order

- Adds the ability to setup an externally managed Owing DoDAAC to outbound an 856S with MRO shipments.

### Help Tickets

The following Warehouse Management Help Tickets were closed by this release:

#### *Warehouse Receiving (LPWHN19)*

Help Ticket #51553

- Corrected a deficiency where warehouse technicians were receiving errors when they tried to receive Inventory.

### *Individual Returns (LPWHN46.1)*

Help Ticket #51707

- Corrected a deficiency where Individual Return could update an “issue” record, instead of a “loan” record.

### *Material Release Order (LPWHN35)*

Help Ticket #50655

- Corrected a deficiency where shipping an MRO with a destination ship to address type of “1 – Mailing” was causing an error.

Help Ticket #54237

- Corrected a deficiency where 867I was not including the suffix code segment, when the suffix code existed.

### *Inspection AUD (LPWHN88)*

Help Ticket #54131

- Corrected a deficiency where repairing a part assigned to multiple end items was causing an error.

### *Unit/Individual Transfer (LPWHN80)*

Help Ticket #53667

- Corrected a deficiency where selecting Items for Transfer was causing the following:
  - “Outstanding Items” tab had a blank grid.
  - Items were moved to the “Selected Items” tab.
  - Odd changes to the number of pages.

### *DLMS Transaction Review (WH) (LPWHN77)*

Help Ticket #54595

- Corrected a deficiency where expanding the detail grid in DLMS inquiry was causing a critical error.
