Release Notes Overview

Release 6.3.00 for the Defense Property Accountability System (DPAS) was released on December 21, 2018.

This release includes system change requests and corrects program deficiencies identified by the user community. The update impacts the Maintenance and Utilization, Materiel Management, Member Access, Property Accountability, and Warehouse Management Modules.

Maintenance and Utilization (M&U) Module

System Change Request (SCR)

The following Maintenance and Utilization SCRs were closed by this release:

SCR #1142 – FAST Report Disposition

- Add FAST reportable Disposition fields to M&U MAM process create status of awaiting disposition.

SCR #985 – Telematic Info Upload, SCR #944 – Fuel Management, SCR #735 – Trimble Interface, SCR #736 – CFAMS Interface

- Allows the ability for Users to upload Telematics data from multiple vehicle management system solutions into DPAS.

SCR #1186 – M&U Dashboard

- The M&U Dashboard was refreshed with a new design and enhanced functionality. New grids on the home page include My Reports, Shared Reports, and a role-based Enterprise Roll-Up that allows users to view all open actions that are accessible to the logged-in user up to the Agency level, based on the user's security access. On the left sidebar, users can view all sub-categories for each primary category to which they have access, and users can see the number of open actions for each sub-category, even if the count is zero. New fields were added to several sub-category filters and field selections within the Asset and Work Order categories. A new sub-category, NMC, was added to the Work Order category to display all open work orders assigned with an NMC status. In addition, under the Asset category, a Statistics sub-category was added to display a pie graph that shows FAST Reportable Profiled/Not Profiled by the Agency Owned/Leased Type.

SCR #1122 – Work Order Inquiry Filter & Field Updates

- Update the Work Order Inquiries to be more complete and offer additional filtering capabilities.

SCR #1380 – NMC Status Date Field

- Allows the ability for Users to back date and/or edit the NMC Status field.

Help Tickets

The following Maintenance and Utilization Help Tickets were closed by this release:

Asset Preventative Maintenance Schedule Inquiry (WPMAQ08)

Help Ticket #25636

- Corrected a deficiency where a mandatory field was missing on the AUD.

FAST Outbound Display AUD (WPACN28)

Help Ticket #25961

- Corrected a deficiency where fuel reporting was duplicated.

Member Access

Help Tickets

The following member Access Help Tickets were closed by this release:

Individual Returns (LPWHN46.1)

Help Ticket #25452

- Corrected a deficiency where member name was not appearing on walk-in appointments.

Property Accountability (PA) Module

System Change Request (SCR)

The following Property Accountability SCRs were closed by this release:

SCR #1174 – Provide the Capability to Export the Pending Transactions Report in Excel

- Agency Pending Transaction Report allows the ability to see due-in and due-out records in excel form by agency, site, and lower based on the selected criteria.

SCR #1062 – IUS: Dashboard Update, Reports and Inquiries

- Functionality has been added to allow users to associate IT device assets and IUS software assets. The IT Dashboard has been updated, and the PA asset management functionality has been updated to manage software assets within the existing processes.

SCR #1248 – GFP/GFM Location

- For Loan Update with Loan Code = C (out on loan to non-government activity) set the Asset's Loc to be the CAGE code of the selected Contract Number's Contractor.

SCR #1057 – Increase Mass Uploads

- This feature was added to expand the capacity of the Asset Receiving Mass Upload spreadsheet template from 50 records to 500 records. Additionally, the UII column was added to the far right of the Mass Upload spreadsheet template to enable users to include the UII when assigned. The UII column in the Mass Upload template is mandatory and will populate the field on the asset record when UII Status Code is ART or ARN. It is not used for any other UII Status.

SCR #1173 – Modify Document Nbr System Settings

- The feature was added to provide the capability to manage Document Number Range Assignments at Site Level. The solution designed was to create a new User Role called, “Data Coordinator” that will provide a menu path to a newly developed DPAS Property Accountability Data Import feature. The Data Import Utility provides users with the capability to download a formatted template for Document Number Range Assignments, populate the template, browse a file directory for a completed file and submit the file to validate and import records. The user MUST have the Data Coordinator role assigned at the Site tier level or higher to use this feature. The Data Coordinator role was designed to support New User Conversion or set up of new Sites for existing customers.

Help Tickets

The following Property Accountability Help Tickets were closed by this release:

Asset Update (WPHRN51)

Help Ticket #25822

- Corrected a deficiency where the Cap Cd was unable to be changed.

Warehouse Management (WM) Module

System Change Request (SCR)

The following Warehouse Management SCRs were closed by this release:

SCR #1088 – ICN Scan ON DW01

- Added Kit ICN Barcode to DW Form 01 - Set Kit Outfit.

SCR #1320 – Form 46

- Provided user the ability to enter the Installation Date and clear the originating station on DW Form 18A.

SCR #1099 – LINTAMCN Filter Amendment, SCR #1025 – LINTAMCN Filter

- Sorted kit components and allowed component update based on warehouse stock items in SKO Update.

SCR #1274 – Add Attachments to Containers

- Added attachments to the Container AUD.
