Release Notes Overview

Release 7.1.00 for the Defense Property Accountability System (DPAS) was released on July 26, 2019.

This release includes system change requests and corrects program deficiencies identified by the user community. The update impacts Appointment Scheduler, eCatalog, Force Systems Management, Maintenance and Utilization, Materiel Management, Mobile Platform, Property Accountability, Registry and Warehouse modules.

Appointment Scheduler

Help Tickets

The following Appointment Scheduler Help Tickets were closed by this release:

Appointment AUD (LPWHN37)

Help Ticket #28770

- Corrected a deficiency where individual issue/return will start a scheduled appointment for future dates rather than the current day.

eCatalog

System Change Request (SCR)

The following eCatalog SCRs were closed by this release:

SCR #1241 – eCatalog

- Users can now find a stock number and its associated information using the manufacturer part number.
- User can identify and delete up to 100 stock numbers at a time from the stock number page.

Force Systems Management

System Change Request (SCR)

The following Force Systems Management SCRs were closed by this release:

SCR #1307 – Force Systems Management (FSM)

- Added WRM fields to UIC/FSM Association for BPU and ASL location types. Added ability to assign multiple Authorizations to UICs within Authorization Association process. Updated Platform A/U/D screen with proper fields. Give ability to disconnect UICs from Authorization assignments. Give ability for Postponed Action of UIC assignment. Improve Authorization Browse Button. Authorization Management pages added searchable dropdown combo boxes within FSM.

Maintenance and Utilization (M&U) Module

System Change Request (SCR)

The following Maintenance and Utilization SCRs were closed by this release:

SCR #1162 – Priority Levels for MU and Warehouse
- Added Priority field on the Parts tab of Sub Work Order. Removed logic and XML schema to allow congruent data updates between Warehouse and MU of parts management.

Help Tickets

The following Maintenance and Utilization Help Tickets were closed by this release:

Yearly Statistics Scan for FAST (WPGLX17)

Help Ticket #25916
- Corrected a deficiency where fuel calculation of the FAST outbound FY and month tables was not taking place for lease codes other than AO = Government Owned.

Materiel Management

System Change Request (SCR)

The following Materiel Management SCRs were closed by this release:

SCR #1016 – Accountability and Accounting for OM&S
- Enhanced ICP module to support the monitoring of a Logistic Reassignment process between a Gaining Inventory Manager and a Losing Inventory Manager when copies of the transactions are received.

SCR #1177 – Modify DPAS to support the Receipt and Mgmt of Customer Requisitions
- Users can create a template for each customer (by DoDAAC) that will automatically populate the details of a push Requisition from the ICP when applied.
- Enhanced capabilities for the ICP to track inventory stored in RSA's that are external to DPAS.

The following Materiel Management Help Tickets were closed by this release:

DLMS 511R - Requisition (LPGLM22)

Help Ticket #28795
- Corrected a deficiency where 511R, 527R, 846P and 869C transactions were not setting Stub fields on Inbound.

Mobile Platform

System Change Request (SCR)

The following Mobile Platform SCRs were closed by this release:

SCR #1235 – Mobile Application
- Provided the ability to export physical inventory counts into a formatted excel file from Property Accountability and Warehouse modules. This feature is intended to enable the system to transmit expected inventory records from the Web application to any enabling system with the ability to apply counts or for manual entry. A follow on feature will be required in order to process these counts back to DPAS server and update inventory.
- Added the ability to identify business key values at the time of resolving Mobile inventory counts from the UWP application. Values such as Owning DoDAAC, Cond Cd, Project Cd etc need to be specified when more than one ICN is returned for a counted item.
- Enhanced UWP application with the following:
  - Addressed latency issue when parsing barcode
  - Reformatted barcode scan block to be more user intuitive
  - Added additional details aide in asset identification
  - Added control to force application offline
  - Provided ability to Purge the local database
  - Provided ability to adjust Queue size

Property Accountability (PA) Module

System Change Request (SCR)
The following Property Accountability SCRs were closed by this release:

SCR #1221 – Army Hand Receipt
- Created Primary and Secondary Hand Receipt report for LIN/TAMCN Authorizations.

SCR #1305 – CMOS Support as a TMO
- Created DLMS transaction capability in Asset Transfer and Asset Disposition processes to generate DLMS 940R transactions with TMO data to Air Force CMOS.

Help Tickets
The following Property Accountability Help Tickets were closed by this release:

Manufacturer AUD (WPCTN03)

Help Ticket #26051
- Corrected a deficiency where user was not able to add manufacturer for fast reportable asset.

Registry

System Change Request (SCR)
The following Registry SCRs were closed by this release:

SCR #1303 – Add New Registry Module
- Registry module will automatically send out inter-component shipment and receipt notifications.

- Users can manually create new Registry Assets and edit those manually created Assets.
- Full support of synchronization between Warehouse inventory and SA/LW Registry Assets.

Warehouse Management (WM) Module

System Change Request (SCR)

The following Warehouse Management SCRs were closed by this release:

SCR #1452 – Individual return show all
- Added a New user role within the Warehouse module for GFM-A.

SCR #1444 – United States Air Force Academy
- Added data fields to the Member Profile table to support the USAFA Student Information System interface.

SCR #1446 – United States Air Force Academy
- Created an Interface between DPAS and The USAFA Student Information System to import and update Member Profile records.

SCR #1440 – United States Air Force Academy
- Added LPWHQ89 - Member Sales Inquiry to review inventory sales and to generate the LPWHR89 - Member Sales Report. Updates Individual issue to allow cash sales and Not Returning Reason Code "Paid."

SCR #1441 – United States Air Force Academy
- Added Tariff, Fund Code and Billable Flag to ICP managed DoDAACS and Displays Tariff price for all items on Individual Issue Receipts.

SCR #1363 – Student Class Name
- Within Member Profile, users will be able add a Class Name to a Member's record. Class Name will also be available to Import through the spreadsheet template.

SCR #1326 – AFERMS Appointment Scheduler Requests – Generic Appointment Types
- AFERMS users will be able to schedule 'generic' appointments through the Appointment Scheduler. These 'generic' appointments will not link to a DPAS process. The Appointment AUD has also been updated with multi check in/check out and a Complete button to help facilitate these 'generic' appointments.

SCR #1349 – Physical Inventory tethered scan ability
- Provided the ability to conduct a physical inventory from the DPAS web application, using a tethered scanner device.

SCR #1379 – Turn line item red when other than A coded
- Provided the ability to easily identify a SKO component that is less than condition code A.

SCR #1198 – Serviceable Storage
- Provided the ability to assign schedules to inspections and notify as due based on the location of materiel

SCR #1112 – Inspection Due Labels
- Provide the ability to print inspection due labels.

Help Tickets

The following Warehouse Management Help Tickets were closed by this release:
