Release 4.0.03 for the Defense Property Accountability System (DPAS) was
released on May 12, 2016. This release corrects program deficiencies
identified by the user community and through testing by the development teams.
There is no action required by the user to receive the update.

Property Accountability (PA)

**The following System Change Requests (SCRs) were implemented for
the Property Accountability module in this release:**

N/A

The following PA Help Tickets were closed by this release:

- AIT Asset Relocation (WPAIN09)
  - Corrected a deficiency that caused a timeout error when
    attempting to process an asset relocation transaction from a PDCD
    (Help Ticket #9229, 9230, 9337).

- Asset Transfer (WPHRN52)
  - Corrected a deficiency that caused asset transfers to sometimes
    go to pending when it shouldn't have and vice-versa (Help Ticket
    #8990, 9005, 9040, 9059, 9103, 9142, 9156, 9280, 9307, 9318,
    9331, 9322).

- Asset Update (WPHRN51)
  - Corrected a deficiency that caused various fields and options on
    the program to not be correctly enabled/available to the user
    (Help Ticket #9029, 9085, 9248, 9312, 9316, 9329).

- Close Inventory (WPHRN03)
  - Corrected a deficiency that caused OIN and OUM inventories to be
    treated like OUA inventories when being closed (Help Ticket
    #8997, 9071, 9158, 9188).

- Depreciation Update Real Property (WPACB10)
  - Corrected a deficiency that caused an Unexpected Error when
    selecting the Search button (Help Ticket #8994).

- LIN/TAMCN Browse (WCGLM47)
  - Corrected a deficiency that caused the user to receive an "access
    denied" error when attempting to access the LIN/TAMCN Browse in
    the Asset Receiving and Catalog AUD processes (Help Ticket #8943,
    9075, 9083, 9090).

- Reports Manager (WPUTR01)

1

- o Corrected a deficiency that caused other agency reports to show up on the View Inquiry Extract/My Sites option (Help Ticket #8982).

- Site Id/Accountable UIC Update (WPSEN21)
  - o Updated the display to include the UIC Command Name on the Tier Selector (Help Ticket #8936).

- Global
  - o Restored multiple Agency-Defined Reports that were removed in release 4.0.00 (Help Ticket #9042, 9117, 9137, 9199).
  - o Restored custom "My Queries" inquiries for users that lost their settings after release 4.0.00 (Help Ticket #8924, 8993, 9199).

Warehouse

The following System Change Requests (SCRs) were implemented for the Warehouse module in this release:

N/A

The following Warehouse Help Tickets were closed by this release:

- Stock Item Individual Issue Location (LPWHN30)
  - Corrected a deficiency that caused the user to receive an error when attempting to navigate to the Stock Item Individual Issue Location screen (Help Ticket #8841).

- DLMS Outbound File Generator (LPWHI03)
  - Corrected a deficiency that caused 945A and 856S DLMS transaction to contain redundantly looped transactions multiple times with a transaction quantity of 0 (Help Ticket #8445).

- Individual Issue (LPWHN32)
  - Corrected a deficiency that occurred when selecting a serial number to be issued (Help Ticket #8826).

- Set Kit Outfits (LPWHN42)
  - Corrected a deficiency that caused the user to receive a validation message when removing an item from a kit (Help Ticket #8868).

- Unit Returns (LPWHN47)
  - Corrected a deficiency that displayed the Contract and Lot Numbers in-correctly based on the item being part of a kit or an end item (Help Ticket #8923).
  - Corrected a deficiency that caused the Comp of Kit field to only display for those items that were marked as Component of Kit (Help Ticket #7499).

- Quality Control (LPWHN56)
  - Corrected a deficiency that caused the user to receive a validation message when trying to complete a QC request (Help Ticket #9036).

Maintenance and Utilization

The following System Change Requests (SCRs) were implemented for the Maintenance and Utilization module in this release:

N/A

The following Maintenance and Utilization Help Tickets were closed by this release:

- Contractor AUD (WPMAN19)
    - o Corrected a deficiency that caused the user to receive an Unexpected Error when accessing the Contractor AUD screen (Help Ticket #8959, 8971, 8974, 9192).
