

## Effective Date

04 November, 2016

## Release Notes Overview

Release 4.1.30 for the Defense Property Accountability System (DPAS) was released on November 04, 2016.

This release corrects program deficiencies identified by the user community. The update impacts the Warehouse Management, Property Accountability, Maintenance & Utilization and Security modules.

## Warehouse Management (WM) Module

### Help Tickets

The following Warehouse Help Tickets were closed by this release:

#### *Unit Identification Code Custodian AUD (LPWHN31)*

Help Ticket #11092

- Corrected a deficiency that caused the user to be unable to modify a UIC Custodian when items were currently issued to that custodian.

#### *Material Release Order (LPWHN35)*

Help Ticket #10707

- Corrected a deficiency that caused the Special Instructions field to not print on the DD Form 1348.

Help Ticket #11879

- Corrected a deficiency that caused the user to receive an Unexpected Error when attempting to cancel the Pick for a Material Release Order.

Help Ticket #11627, #11648

- Corrected a deficiency that caused the user to be unable to process a large MRO.

#### *Set Kit Outfits (LPWHN41)*

Help Ticket #11515

- Corrected a deficiency that when the To Condition Code field would default to a condition code other than the current condition code of the inventory record and the Update button was clicked within Inventory Update, the pop up would disappear, acting as if the update occurred. However, it did not. Now when the To Condition field defaults to a different value, an applicable reason code is selected, and Update is clicked, the condition code will update on the inventory record to reflect the To Condition Code that was defaulted.

#### *Inventory Update Manager (LPWHN52)*

Help Ticket #11682

- Corrected a deficiency that caused the user to receive an error when trying to remove a component from a Kit through Inventory Update.

### *Fiscal Year Report (LPWHR15)*

Help Ticket #11768

- Corrected a deficiency that caused the fiscal year data to not populate for some Warehouses when using the Enterprise Rollup by Logistic Program.

### *DD Form 1348 (LPWHR01)*

Help Ticket #11598

- Corrected a deficiency that caused the DEMIL Code to be displayed in-correctly on the DD Form 1348 after a disposal action.

### *Inspection Type AUD (LPCTN17)*

Help Ticket #11651

- Corrected a deficiency that caused the user to be unable to edit an Inspection Type.

### *Quality Control (LPWHN56)*

SAT 4.1 Defect #33

- Corrected a deficiency that caused the Next Inspection Date to calculate in-correctly.

### *ICN Update (LPWHN58)*

Help Ticket #10921

- Corrected a deficiency that caused the user to be unable to set the Secondary Serial Number correctly based on the primary Serial Number for that ICN.

## Property Accountability (PA) Module

### Help Tickets

The following Property Accountability Help Tickets were closed by this release:

#### *Agency Pre-Defined / User Last Login Report (WPSAN25)*

Help Ticket #11055

- Corrected a deficiency that caused in-correct data to be displayed on the User Last Log-in Report.

#### *Asset Update (WPHRN51)*

Help Ticket #11242

- Corrected the deficiency where user was unable to update location and sub location on a Capital Asset within Asset Update

#### *Post Reconciliation Asset Master Inventory Update (WPHRN69)*

Help Ticket #11596, #11729, #11855

- Corrected a deficiency that caused the post-inventory reconciliation asset update process to fail for assets updated by users with long user names.

## Maintenance & Utilization (M&U) Module

### Help Tickets

The following Maintenance & Utilization Help Tickets were closed by this release:

#### *Work Order Report (WPMAQ04)*

Help Ticket #9727, #10492

- Corrected a deficiency that caused the labor portion of the Work Order to in-correctly track the hours and rate information for the technician.

#### *Asset Preventive Maintenance Schedule Inquiry (WPMAQ08)*

Help Ticket #11167

- Corrected a deficiency that caused vehicles with scheduled maintenance to not be displayed on the inquiry.

#### *Work Order Inquiry (WPMAQ13)*

Help Ticket #10984, #11020

- Corrected a deficiency that caused the inquiry to display the in-correct number of closed work orders within a user's Maintenance Activity.

Help Ticket #11422

- Corrected a deficiency that caused the inquiry to return zero results when executing the search.

#### *Asset Utilization Record (WPUTN30)*

Help Ticket #10953, #10947

- Corrected a deficiency that was causing the mileage to be modified in-correctly when attempting to process a mass update through the mass template functionality.

#### *Maintenance Asset Utilization Record (WPMAN24)*

Help Ticket #11711

- Corrected a deficiency that was causing the mileage to double in utilization records.

#### *Dispatch Add Update (WPMAN30)*

Help Ticket #11760, #11873, #11619

- Corrected a deficiency that caused the user names to not populate correctly in the Dispatcher drop-down.

Help Ticket #11389

- Corrected the deficiency where Equipment Pool user was unable to update dispatches.

## Security Module

### Help Tickets

The following Security Help Tickets were closed by this release:

#### *User AUD Program (LPSEN05)*

Help Ticket #10659

- Corrected a deficiency that caused user accounts to go in to suspense prior to the expiration dates set on their user account.
