Release Notes Overview

Release 5.0.10 for the Defense Property Accountability System (DPAS) was released on March 10, 2017.

This release corrects program deficiencies identified by the user community. The update impacts the Warehouse Module, Property Accountability Module, and Maintenance & Utilization Module.

Warehouse Management (WM) Module

System Change Requests (SCR)

The following Warehouse SCRs were closed by this release:

SCR1103

- The 'Serial Number' field Search Criteria on the Quality Control process page was upgraded to include Intellisense as well as now allows the user to search on a partial match. Prior to this change, the field required an exact match to return a result.

Help Tickets

The following Warehouse Help Tickets were closed by this release:

DW Form 02 (LPWHR08)

Help Ticket #7811

- Corrected a deficiency that caused the Item Description for Components of a kit to be cut-off when printing the Pick List form.

Set Kit Outfit (LPWHN41)

Help Ticket #8609

- Corrected a deficiency that caused the users to be unable to use the ICN Scan field for LIN/TAMCN's when selecting inventory on the Set Kit Outfit screen.

Material Release Order (LPWHN35)

Help Ticket #12008

- Corrected a deficiency that caused DPAS to echo stock denials for follow-up requests which caused issues in the SOS.

Stock Number AUD (LPCTN01)

Help Ticket #12212

- Corrected a deficiency that caused the user to receive an error when attempting to add a new stock number to the catalog.

DW Form 05 (LPWHR11)

Help Ticket #12531
- Corrected a deficiency that caused the Item Description for Components of a kit to be cut-off when viewing the Outstanding Returnable Items list.

Inventory Update Manager (LPWHN52)

Help Ticket #12766
- Corrected a deficiency that caused the user to be unable to move an asset to a new Location that was not the items Stock Item Issue Location due to the sequence of steps being taken by the user.

Help Ticket #13065
- Corrected a deficiency that caused the user to be unable to record the Reason Description for an update. The Reason Desc field was added to allow users to record a description of their activities on the current asset.

Individual Issue (LPWHN32)

Help Ticket #12822
- Corrected a deficiency that wouldn't allow the user to scan an ICN or Serial Number directly in to the Members Issue.

Disposition (LPWHN50)

Help Ticket #12894
- Corrected a deficiency that would cause the quantities of items within a container to change based upon editing a single items record on the Disposition screen. Also corrected a deficiency that was causing the RIC to not auto populate on the Disposal screen.

Unit Issue Activity (LPWHQ32)

Help Ticket #12923, #12786, #13245
- Corrected a deficiency that caused the Unit Issue Activity inquiry to not be able to search for all UICs within a Logistics Program.

Unit Reconciliation (LPWHN69)

Help Ticket #12924
- Corrected a deficiency that caused the user to receive an error when trying to add a new reconciliation for an already opened reconciliation.

Receiving (LPWHN19)

Help Ticket #12826
- Corrected a deficiency that caused the user to receive a validation message for a non-present field on the Receiving screen for a Due-in from a Warehouse Transfer.

Quality Control (LPWHN56)

Help Ticket #13136
- Corrected a deficiency that caused the user to be unable to view the QC details by allowing the QC details to be visible unless the items are in an In-Transit location.

Unit Issue Post-Post   (LPWHN68) - Security

Help Ticket #13164
- Update the Line Manager role to have access to LPWHN68 – Unit Issue Post Post and LPWHN69 – Unit Issue Reconciliation.

AIT Conduct Physical Inventory (LPAID05)

Help Ticket #13316
- Created a new mode via Data Management > Overlay process to support the Physical Inventory process only while all other Processes are disabled.

Maintenance& Utilization Module

Help Tickets
The following M&U Help Tickets were closed by this release:

Work Order AU (WPMAN12)

Help Ticket #11454, #12471, #12620, #12995, #13012, #13070, #13408
- Corrected a deficiency that caused the user to receive an error when attempting to close a Work Order.

Help Ticket #11864, #12289
- Corrected a deficiency that caused the user to receive an error when attempting to update a Sub Work Order.

Maint Asset Master (WPMAN10)

Help Ticket #12808
- Corrected a deficiency that caused the user to be unable to search for a stock number that contained a special character and received a validation failed error message.

Labor Category AUD (WPMAN41)

Help Ticket #12866, #12465
- Corrected a deficiency where the user was unable to modify the Labor Category Rate Type.

Attribute (WPHRN75)

Help Ticket #12906
- Corrected a deficiency that caused the GVWR field to throw an error based on the length of the text being entered in the field.

Dispatch (WPMAN30)

Help Ticket #11970
- Corrected the deficiency where 9 was erroring on Days Used within Dispatch Utilization.

Property Accountability Module

System Change Requests (SCR)

The following Property Accountility SCRs were closed by this release:

SCR923
