## Effective Date

23 June 2017

## Release Notes Overview

Release 5.1.20  for the Defense Property Accountability System (DPAS) was released on June 23, 2017.

This release includes system change requests and corrections to program deficiencies identified by the user community. This update impacts Warehouse Management and Maintenance & Utilization modules.

## Warehouse Management Module

### System Change Requests

The following Warehouse Management System Change Requests were closed by this release:

- SCR0924 -  Functionality was added to support a more efficient Physical Inventory process within the warehouse by integrating with IUID.

### Help Tickets

The following Warehouse Management module Help Tickets were closed by this release:

#### *Quality Control  (LPWHN56)*

##### Help Ticket #15537, #15636

- Corrected a deficiency that caused the user to receive an invalid validation message that the Inventory Control Number (ICN) was allocated.

#### *Shelf Life Extension AUD  (LPWHN40)*

##### Help Ticket #15871

- Corrected a deficiency that caused the user to receive to critical error when attempting to process a Location Move through Inventory Update due to invalid data in the Shelf Life Extension record.

#### *Manage Physical Inventory  (LPWHN53)*

##### Help Ticket #16021

- Corrected a deficiency that caused the Inventory Reconciliation Report report to display the in-correct counts during the inventory process.

#### *Inventory Update Manager (LPWHN52)*

##### TFS Bug 24877

- Corrected a deficiency wherein the wrong DLMS transaction is generated when changing the Owning DoDAAC from an internal type to an external type while changing a stock number in one transaction.

## DLMS Inbound Reprocessor (LPWHI09)

TFS Bug 24906

- Corrected a deficiency wherein the DLMS transactions inbound to the ICP were processing extremely slowly, thereby making the inbound SCS transactions to the warehouse wait before they would be processed. Also, the inbound transactions to the ICP would fail if multiple 945's were processed in a row. All of this was resolved by these changes.

## Maintenance & Utiliziation Module

### Help Tickets
The following Maintenance and Utilization module Help Tickets were closed by this release:

#### Work Order AU (WPMAN12)

Help Ticket #16140
- Corrected the deficiency where Attachment File size on M&U was hard coded to wrong value.
