Effective Date

29 September 2017

Release Notes Overview

Release 5.2.00 for the Defense Property Accountability System (DPAS) was released on September 29, 2017.

This release includes corrections to program deficiencies identified by the user community. This update impacts Warehouse Management, Property Accountability, Maintenance and Utilization, and Materiel Management Modules.

Warehouse Management Module

System Change Requests

The following Warehouse Management System Change Requests were closed by this release:

- SCR 0714 – Addition of the capability to transfer unit issued equipment from one UIC to another, from a UIC to a UIC/Account Name (Sub UIC), and UIC to Individual within the Warehouse and provide users the ability to print all receipt and return documentation.
- SCR 0849 – Inventory Activity Inquiry was upgraded to include the ability to search on the From Date and To Date field for all inventory changes within a warehouse.
- SCR 0950 – Inventory Activity Inquiry was upgraded to provide a more robust search criteria and inventory tracking at the Warehouse level.
- SCR 1028 – Provide the capability within the Warehouse Module to conduct Physical Inventories of Issued Materiel. The capability includes Unit and Individual Issued Items. Users will be able to auto-schedule the inventory, establishing the frequency, as well as manually schedule the Inventory.
- SCR 1029 – Provide the capability for the Warehouse Module to schedule and conduct an assessment review. Users will be able to auto-generate an assessment for items Receipted into the warehouse and for items being Returned from an Individual/Unit/Armory issue. These assessments will be generated in the current Quality Control process and allow the users the ability to replace components with the kits as part of the assessment. Items replaced can be disposed of, or put back into stock. Appropriate inventory transactions will be generated for the actions taken.
- SCR 1030 – Inventory Activity Inquiry was upgraded to provide a more robust search criteria and inventory tracking at the Warehouse level.
- SCR 1031 – Capability to report activity by any User or Warehouse by a specific Date that will allow the user to view all of the activity within those parameters.
- SCR 1068 – Provide the ability to ship multiple stock numbers within the warehouse transfer process and provide the ability to view and print the DD Form 1149.
- SCR 1079 – Upgrade the Manage SKO pop-up within the Quality Control process to allow increased functionality directly through the QC process.
- SCR1092 – Addition of the Quality Assurance (QA) Inspection Type that will be added to the Quality Control process and function the same way as the QC process.
- SCR 1119 – Recommend having Individual and Unit Issues process associated with the Warehouses that conduct the Issues to better track inventory activity.

- SCR 1140 – Inventory Activity Inquiry was upgraded to provide a more robust search criteria and inventory tracking at the Warehouse level (inventory movement transactions).
- SCR 1141 – Inventory Activity Inquiry was upgraded to provide a more robust search criteria and inventory tracking at the Warehouse level (inventory adjustment transactions).

Help Tickets

The following Warehouse Management Help Tickets were closed by this release:

Materiel Release Order (LPWHN35)

Help Ticket #14889, #18204
- Corrected a deficiency that allows users to re-pick a canceled MRO and sends out the correct DLMS transactions.

Help Ticket #15126
- Corrected a deficiency that was causing the collateral items to be included in the total quantity for the Material Release Order.

Help Ticket #14538
- Corrected a deficiency that was causing MRO grid export to error out by removing the option to export the grid.

Help Ticket #14575
- Corrected a deficiency where MRO receiving documents would not be generated because of a fund code error.

Set Kit Outfit Catalog (LPCTN06)

Help Ticket #15933
- Corrected a deficiency that caused the incorrect column to display when exporting the results.

Help Ticket #17235
- Corrected a deficiency to add a non-required component to the kit without the condition code changing on existing inventory records.

Help Ticket #14508
- Corrected a deficiency that caused the SKO catalog grid to display incorrectly.

Help Ticket #16029, #16723
- Corrected a deficiency that would not allow a user to update the quantity for components in a SKO.

Quality Control (LPWHN56)

Help Ticket #15941
- Corrected a deficiency that caused the same Quality Control Inspection Result to be displayed twice when a user would select the Inspection Result.

Help Ticket #16278, #16499
- Corrected a deficiency that the "Reset" button incorrectly cleared out the fields when the user selected the reset button.

Help Ticket #17208
- Updated the Add screen within the Quality Control process to include the Serial Number field.

Help Ticket #16137, #17444
- Corrected a deficiency that caused the Inspected By Dates to not get properly set when personnel was assigned.

Unit Returns (LPWHN47)

Help Ticket #16015
- Corrected a deficiency that caused the incorrect issued items to be displayed for the Custodian's Outstanding Items form.

Inventory Update Manager (LPWHN52)

Help Ticket #16607, #16258, #17361
- Corrected a deficiency that caused the incorrect inspection dates to be displayed on the Inventory Update Manager screen.

Help Ticket #17178, #17192
- Corrected a deficiency where the last inventoried date was not populating on the ICN inquiry grid.

Help Ticket #14694
- Corrected a deficiency that caused the user to receive an error while attempting to do a batch stock number update.

Help Ticket #13090
- Corrected a deficiency that would not allow the user to print labels successfully upon completion, even when the "Print Labels When Finished" checkbox was selected.

Help Ticket #17937
- Corrected a deficiency where the user could not re-identify an ICN that had already been created without using the same manufactured date.

Help Ticket #15650
- Corrected a deficiency that caused an error when attempting to re-identify an asset that had an associated UII.

Unit Issue Trend Analysis Inquiry (LPWHN47)

Help Ticket #16230
- Corrected a deficiency that caused the user to receive a critical error when attempting to execute the inquiry.

Reconcile Physical Inventory (LPWHN54)

Help Ticket #17055
- Corrected physical inventory error for selecting "recount" for a large amount of serialized items.

Conduct Physical Inventory (LPWHN54)

Help Ticket #17123
- Corrected a deficiency that caused the Reconciliation Report to display the incorrect records.

Help Ticket #16826
- Corrected a deficiency that caused the user to be forced to save the quantity and exit the screen before moving on to the next item in the inventory.

Warehouse Issue (LPWHN73)

Help Ticket #17142
- Corrected a deficiency that caused the incorrect TAC2 address to display on the DD-1149 form.

Document Inquiry (LPWHQ79)

Help Ticket #17257
- Corrected a deficiency that caused the Disposition Remarks to not appear in the Document Inquiry.

Security Roles

Help Ticket #15831
- Updated MARSOC Line Manager Role as requested.

Help Ticket #12061
- Add roles for DF-VEHS VSCOS warehouse.

Help Ticket #17206
- Add roles for USMC – CSP Logistics Program.

Disposition (LPWHN50)

Help Ticket #17257
- Corrected a deficiency where disposition remarks were not appearing in the document inquiry table.

Unit Issue (LPWHN34)

Help Ticket #12077
- Corrected a deficiency that caused the Unit Issue inventory counts to be mismatched.

Help Ticket #14711
- Corrected a deficiency that caused the Outstanding Items to not display correctly when changing the RO.

Help Ticket #16486
- Corrected a deficiency that caused the due dates to not be displayed on the DW Form 05.

Warehouse AUD (LPWHN04)

Help Ticket #13639
- Corrected a deficiency that caused the user to be unable to update a Warehouse's information due to a validation error.

Individual Returns (LPWHN46)

Help Ticket #12970
- Corrected a deficiency when returning LIN/TAMCN kits that would create SKO Build records for the components.

Help Ticket #16251
- Corrected a deficiency where the correct error would be shown when trying to return a kit that has a component already on hand in the warehouse.

Individual Issue (LPWHN32)

Help Ticket #13788
- Corrected a deficiency where the prior individual functionality was not working for LIN/TAMCN issues.

Facility AUD (LPWHN05)

Help Ticket #16287
- Corrected a deficiency that caused an 83 error when trying to delete a facility with history attached to it.

DW Form 01 (LPWHR07)

Help Ticket #15855
- Corrected a spelling mistake on the DW Form 01.

Maintenance Issue (LPWHN71)

Help Ticket #16845
- Corrected a deficiency that caused the Remarks / History Remarks to not be saved.

Materiel Release Order Report (LPWHR73)

Help Ticket #16845
- Created a new MRO Header Status report.

Maintenance and Utilization Module

System Change Requests
The following Maintenance and Utilization Module System Change Requests were closed by this release:

- SCR 0845 – Addition of the Longitude and Latitude fields to the DPAS M&U module to allow for proper FAST reporting.
- SCR 0982 – Recommended when all NSNs have an ACC value of "P", modify the user interface to only show "Vehicle" as the only Attribute value that is available for FAST reporting.
- SCR 0983 – Addition of the ability to record and report the U.S. state where vehicle re-fueling takes place by adding the "Fuel State" field as a drop-down selection box to the Maintenance Asset Utilization and Dispatch Return Utilization.
- SCR 0945 – Recommended for assets with a Fuel Association of "Electric" only, M&U needs to provide the ability to capture the electricity (kWH) consumption for FAST Reporting.
- SCR 1039 – Addition of new data elements to meet the requirement for FAST Vehicle Level Reporting Out Year Vehicle Acquisition, Disposal, and Fleet Cost.
- SCR 1052 – Recommended adding the "Location Withheld" field to allow FAST users the ability to designate that the vehicle location be withheld for specific vehicles.
- SCR 1053 – Recommended adding the Petroleum Dedicated LGHG Vehicle Qualifying as AFV that is used to identify for FAST Reporting.

Help Tickets
The following Maintenance & Utilization Module Help Tickets were closed by this release:

Dispatch (WPMAN30)

Help Ticket #14576
- Corrected a deficiency where the Dispatcher IDs were not following the proper validations.

Schedule PM AUD (WPMAN11)

Help Ticket #13392
- Corrected a deficiency where one-time Schedule Preventative Maintenance was not checking the scheduled date.

LIMS-EV Export Interface (WPHRI08)

Help Ticket #13409
- Corrected a deficiency where deferred work orders were not showing in the work_order_detail history properly.

Warranty Service Subscription Terms Condition AUD (WPMAN01)

Help Ticket #18049
- Corrected a deficiency in the warranty/svc/subscriptions inquiry. Also ran a script to bring back user's deleted contractor.

Work Order AU (WPMAN21)

Help Ticket #18049
- Corrected a deficiency where there existed a foreign key conflict between work_order_detail and work_order_detail_part tables.

Property Accountability Module

System Change Requests
The following Property Accountability Module System Change Requests were closed by this release:

- SCR 0403 – Addition of the APO Phone Number and Email Address fields to the UIC Inquiry results.

Help Tickets
The following Property Accountability Help Tickets were closed by this release:

Asset Disposition (WPHRN29)

Help Ticket #14591
- Corrected a deficiency that caused the attachments for Asset Dispositions to be missing from the record.

Real Property AUD (WPACN11)

Help Ticket #12281
- Corrected a deficiency that caused a critical error when users attempted to transfer / receive an asset into a UIC which had previously disposed of the asset.

Help Ticket #17793, #16901
- Corrected a deficiency that placed in-service date is now pulling values from DAIS file feed and allowing and recording user input. If the date is not provided via DAIS file feed, and it has not been updated by a DPAS user, the field will be blank until user input or DAIS file update occurs.

Increase Decrease Action Report (WPHRR06)

Help Ticket #11898, #13938
- Corrected a deficiency that caused an asset two shows increased twice when in-fact the asset had not.

Manage Inventories (WPHRN02)

Help Ticket #12468
- Corrected a deficiency that caused the asset to not be updated with the assets new location during the inventory.

Asset Inquiry (WPHRQ14)

Help Ticket #15420, #19447
- Corrected a deficiency where deleted attachments were still showing in the attachment viewer within the asset inquiry results.

Depreciation AUD (WPACN10)

Help Ticket #15568
- Corrected the deficiency where updating the stock number type code of "O" now removes depreciation from the asset.

Asset Update (WPHRN51)

Help Ticket #14591
- Corrected a deficiency in the way that the system was caching attachments.

Help Ticket #17839
- Corrected a deficiency that threw an unhandled error when updating the serial number on a capital asset.

Asset Activity Inquiry (WPHRQ20)

Help Ticket #14635
- Corrected a deficiency where an asset with a manufacture that was previously deleted would not show results.

Help Ticket #14687, #15222
- Corrected a deficiency where the User ID was not being populated in the query results.

Help Ticket #14572
- Corrected a deficiency where an asset with a manufacturer that was previously deleted would not show results.

Improvement AUD (WPHRQ20)

Help Ticket #17176
- Corrected the deficiency where updating an LOA on an Improvement was throwing a critical error.

Attachment View Delete (WPSRX06)

Help Ticket #15994
- Corrected a deficiency where deleting an attachment in attachment viewer would not show properly.

User Preference Update (WPSEN06)

Help Ticket #13721
- Corrected a deficiency where user preferences were not being saved.

Upload from PDCD (WPAIN01)

Help Ticket #13721
- Added new PCDC device: Motorola MC55A to be used on PA and Warehouse

Asset Update Background (WPSAB17)

Help Ticket #18110
- Corrected a deficiency that caused an unhandled error when updating the serial number on a capital asset.

Location AUD (WPUTN02)

Help Ticket #17711
- Updated Location fields throughout PA and M&U to be synced that Location can only has a containing alphanumeric and spaces.

DAI Accounting Interface Import (WPACI16)

Help Ticket #18016
- Corrected a deficiency where DPAS pulled back dates from the current record when start and end dates were not set.

SITE ID / ACTBL UIC Change (WPSEN21)

Help Ticket # 9586, #10156, #1122, #11608
- Updated the process that will no longer show Inactive Sites in the user's selector.

Stock Number / Selected Mass (WPCTN02)

Help Ticket # 18163
- Corrected a deficiency where a mass stock number update set to 'O', then the Depreciation Code is set to 'T' on assets.

Stock Number / Selected Mass (WPCTN02)

Help Ticket # 18074

- Corrected a deficiency that caused the Depreciation Period to show a value when depreciation is not set on the asset.

Asset Mgmt (N/A)

Help Ticket # 17390

- Corrected a deficiency where substitute Stock Numbers were not being tracked on the UIT report properly.

Materiel Management Module

System Change Requests

The following Materiel Management Module System Change Requests were closed by this release:

- SCR 1016 – Addition of the Financial Reporting functionality for the Materiel Management Module.

Enterprise

System Change Requests

The following System Change Requests were closed by this release:

- SCR 0942 – Increase the attachment file size within the DPAS Modules from 2MB to 10MB.

Notes

The following notes are deemed important to the DPAS user community and will be affected by this release:

- Aging of DPAS user accounts will now be as follows:

  a. From 15-34 days of inactivity – A system generated email is sent daily requesting the user to log in to his/her account to remain active.

  b. From 35-180 days of inactivity – A system generated email is sent daily confirming the DPAS account has been suspended. The user must contact the DPAS Support Desk and request an account reset. Once the reset is complete, the user must login within 5 day(s) after the reset or the account will be suspended again due to inactivity.

  c. At 181 days of inactivity – The user's account is deleted. Email is sent to the user confirming deletion of the account. If access is required, all new paperwork must be submitted.

  d. At 181 days, Non-Authentication (Never logged in) – The user's account is deleted. Email is sent to the user confirming deletion of the account. If access is required, all new paperwork must be submitted.

- To comply with DoD requirements, session termination will now occur after user has been inactive for 15 minutes, at which time the user will need to reestablish a new session if he/she desires to continue working in the application.
