Web Release 2.6.00 Emergency 1 for the Defense Property Accountability System (DPAS) was released on 31 October 2014. This release corrects Remedy tickets which document issues reported by the user community, System Change Requests (SCRs) which update program functionality and program deficiencies identified by the user community and development teams' testing. There is no action required by the user to receive the update.

Property Accountability (PA) Module

System Change Requests (SCRs) in this release:

DPAS – 00589 – Wide Area Work Flow (WAWF) Permit Multiple Product/Service Identification (Id)
Background – Prior to Release 2.6.00, WAWF only sent one Product/Service Id Number to DPAS in its XML Schema and DPAS only accepted one Product/Service Id Number. In November FY14, WAWF will implement a change in their 5.6 Software Version which permits up to 15 Product/Service Id Qualifier and Product/Service Id pairs on a WAWF Property Transfer Document. The Fed 956 IC, Version 4010 accommodates 15 such pairs. In order to make this change, WAWF is renaming and validating WAWF data elements and updating their XML Schema to allow for multiple Product/Service Ids so that files flowing in and out of DPAS do not fail compliancy. This facilitates import of new Assets into the Government Furnished Property (GFP) System semi-automated process. It allows the system to pre-populate more data and reduces user's data entry time.

This SCR includes the following:
- Updated Inbound XML File Reader to point to newest XML Schema Version

- Updated Outbound XML File Creator to use newest XML Schema Version for creating XML Files

- Updated WAWF Inbound and Outbound processes to use newest data element names

- Updated WAWF Outbound processes to populate more data information by using more Product/Service Identification information

- Updated WAWF Inbound process to use all of the new inbound data to update existing Assets or receive new Assets (depending on the Transfer Transaction Type)

WAWF Inbound XML Import - Modified for new WAWF schema changes.

WAWF Inbound AS Processor - Modified for new WAWF schema changes.

WAWF Inbound TS Processor - Modified for new WAWF schema changes.

1

WAWF Export - Modified code to use new WAWF 5.6 Schema to pull data off the WAWF_Outbound table to create XML files to send to WAWF.

This release contains the following Program Trouble Report (PTR) Bugs:

Property Accountability

Asset Management

Asset Receiving
- Moved the Serial Number field on the ASSET Tab directly below the Asset Id field so the screen maintains the format from prior to the 2.6.00 Release. Remedy Ticket 112870 applies. Bug 13274 applies.

- Corrected the process to show and enable the Agency Defined Fields in the Asset Update and Asset Receiving processes. Remedy Ticket 112875 applies. Bug 13273 applies.

- Enabled the Serial Number to receive 30 positions instead of only 20 positions so the user can receive an asset. Remedy Ticket 112921 applies. Bug 13312 applies.

Asset Update - Prevented a null value from being entered into the user key so that a Transaction Results Batch Table record can be properly inserted. Bug 13340 applies.

Update Inventory Data – Fixed the Custodian Browse to allow the user to select a Custodian from the Update Inventory Data Search Criteria page. Remedy Ticket 112940 applies. Bug 13305 applies.

Stock Number Browse - Corrected the process to prevent the styling changes from occurring when adding a new Stock Number from the Catalog/Pending Catalog Transaction. Bug 13347 applies.

Auto Created Soft Improvement Batch
- Removed the empty string columns from the Depreciation Personal Improvement process. Bug 13316 applies.

- Fixed the CIP Project Depreciation insert table where Cost Center Key was zero. Bug 13342 applies.

Inquiry

Asset Activity Inquiry - Corrected the process to prevent frequent timeouts from occurring. Bug 13367 applies.

Interfaces

DBMS Interface – Updated to prevent system error message 11003 from appearing when no records are displayed. Bug 13317 applies.

E-BIZ Interface – Added a header line for the first UIC so files are properly generated. Remedy Ticket 112993 applies. Bug 13318 applies.

<u>**Security**</u>

Actbl UIC/UIC/Custodian Nbr – Fixed the issue to allow proper delete of Accountable UIC and UIC information from the user's account. Remedy Ticket 112966 applies. Bug 13309 applies.

User Account Inquiry – Fixed the inquiry to display all user types. Remedy Ticket 112929 applies. Bug 13284 applies.

Warehouse Management (WM) Module

Quality Control (QC) – Updated the Integration between Project Planning and Receiving to consider pending Due-Ins only, which prevents the "Source Inventory Record Not Found" error from occurring on QC Receipt

System Acceptance Test Defects
- **Individual Return** - DW Form 12 (Return Receipt) modified to show accurate "Not Returned" component quantities and costs on a fully non-returned kit.

- **Individual Issue** – Updated to prevent inaccurate negative outstanding quantities on issue details.

Points of Contact for this Release

    a. DPAS Support Site: – http://dpassupport.golearnportal.org/

    b. Questions / Problems encountered during processing:
        DPAS Call Center: cco-dpas@dfas.mil,
        Phone: 216-522-6975, DSN 580-6975 or 1-866-498-8687

    c. Questions regarding DPAS Training Content:
        Ms. Tina Frazier, Email address tina.frazier@dfas.mil
