Release 3.0.00 for the Defense Property Accountability System (DPAS) was released on May 15, 2015. This release corrects program deficiencies identified by the user community and through testing by the development teams. There is no action required by the user to receive the update.

Property Accountability Module:

This release contains the following Remedy Tickets:

General

- Corrected a deficiency which caused locking and deadlocking issues in multiple programs (Remedy #115123, 114903).
- Corrected a deficiency which caused the calendar icons and popup displays to be missing in multiple programs (Remedy #115370).
- Increased the maximum file size of attachments in the system to two megabytes (2MB).

Accountable UIC/UIC Add/Update/Delete (AUD)

- WPSN25 - Accountable UIC/UIC AUD
 - Corrected a deficiency which displayed an error when adding an Accountable UIC (Remedy #115133).

Accounting Ancillary Cost AUD

- WPACN01 - Accounting Ancillary Cost AUD
 - Corrected a deficiency which did not allow a user to delete an Ancillary Cost for an asset (Remedy #115025).

Asset Activity Inquiry

- WPHRQ20 - Asset Activity Inquiry
 - Corrected a deficiency which prevented the user from being able to view Asset Activity details on a Bulk asset (Remedy #114939).
 - Corrected a deficiency which caused the user to not receive Search Results when attempting to search on a Date range of a single day (Remedy #113926).

Asset Disposition

- WPHRN29 - Asset Disposition
 - Corrected a deficiency which displayed an error message when trying to dispose of Bulk assets (Remedy #115234 and #115578).
 - Corrected a deficiency which prevented completion of an Asset Disposition using the Pending Disposition process (Remedy #115265).

- o Corrected a deficiency which prevented the user from selecting an asset for disposition when the asset had a blank UII (Remedy #115902).

Asset Receiving

- WPHRN11 - Asset Receiving
 - o Corrected a deficiency which allowed a locally created Due-In record with multiple assets to have the same Stock Number/Serial Number combination (Remedy #115369).

Asset Update

- WPHRN51 - Asset Update
 - o Corrected a deficiency which displayed an error when attempting to add attachments that exceeded the maximum file size (Remedy #115115).
 - o Corrected a deficiency which did not allow the user to process loan. The Transaction Status page showed "Error 83" (Remedy #114138).

Authorization Report by LIN/TAMCN

- WPAUR01R - Authorization Report by LIN/TAMCN
 - o Corrected a deficiency in the format of the report which caused the report to print incorrectly with an over-run of data onto the next page (Remedy #113839, #113251).

Asset Inquiry

- WPHRQ14 - Asset Inquiry
 - o Corrected a deficiency in Asset Inquiry which caused the user to be unable to view assets using "All" as the Status Search Criteria value (Remedy #115589).

Background Data Extract

- WPUTR04 - Background Data Extract
 - o Corrected a deficiency where user-submitted inquiries did not finish processing (Remedy #115482).

Failed Login Authentication Inquiry

- WPSEQ02 - Failed Login Authentication Inquiry
 - o Corrected a deficiency which caused the Failed Login Inquiry to display the incorrect results (Remedy #114576, #114582).

Help Desk Support

- WPUTN44 - Help Desk Support
 - o Corrected a deficiency which displayed an error while adding helpdesk tickets (Remedy #114960).

Increase / Decrease Report

- WPHRR06R - Increase / Decrease Report

- o Corrected a deficiency which included assets from Inventory Update to appear on the report (Remedy #114706 and 115619).

Maint Activity AUD

- WPSEN34 - Maintenance Activity AUD
 - o Corrected a deficiency which displayed the UICs in unsorted order in the Maintenance Activity AUD process (Remedy #115547).

Paragraph Number Browse

- WCGLM59 - Paragraph Number Browse
 - o Corrected a timeout error when searching using the Paragraph Number Browse (Remedy #113668).

Pending Transaction UD

- WPHRN53 - Pending Transaction
 - o Corrected a deficiency which displayed an error while completing a Designated Disposition (Remedy #114704).

Software Catalog AUD

- WPITN03 - Software Catalog AUD
 - o Corrected a deficiency which prevented IT Software Requests from being approved (Remedy #114373).

Software License Association

- WPITN01 - Software License Association
 - o Corrected display issues when updating software licenses (Remedy #114987).
 - o Corrected a deficiency which was caused when associating an IT Device with software, the system displayed "No Software Was Added or Removed" (Remedy #115214).

Software Search Utility

- WPITN06 - Software Search Utility
 - o Corrected a deficiency with the Software Title display when adding a device or a license to the selected software (Remedy #116131).

Security

- Security -
 - o Corrected a deficiency which caused an incorrect role to show up in the M&U application (Remedy #115857).

User Account Inquiry

- WPSEQ04 - User Account Inquiry
 - o Corrected a deficiency which showed the wrong header name for the User Account Inquiry (Remedy #115063).
 - o Corrected a deficiency which showed enterprise results for Agency Coordinators on the User Account Inquiry (Remedy #115069).

User Preferences

- WPSSEN06 - User Preferences
 - Corrected a deficiency which prevented users from updating User Preferences (Remedy #114449).

This release contains the following System Change Requests (SCRs):

Asset Disposition

- WPHRN29 - Asset Disposition
 - Process was updated to add the RIC To and RIC From fields to the DD Form 1348 when performing an Asset Disposition (SCR #00426).
