Release 3.0.02 for the Defense Property Accountability System (DPAS) was released on June 15, 2015. This release corrects program deficiencies identified by the user community and through testing by the development teams. There is no action required by the user to receive the update.

Warehouse Management Module:

This release contains the following Help Tickets:

Receiving

- LPWHN19 - Receiving
 - o Users reported a deficiency that occurred when attempting to cancel a Pending Due-In receipt from Receiving. The code was modified to correct the validation logic so users can successfully cancel documents (Help Ticket #1085).

Stock Number AUD

- LPCTN01 - Stock Number AUD
 - o Users reported a deficiency that occurred when adding an NSN with a LIN/TAMCN from the Technical Data Management System (TDMS) on the Stock Number AUD screen when using a catalog with the Colloquial Name functionality in use. The code was modified to correctly determine which LIN/TAMCN to select when committing the new Stock Number to the database (Help Ticket #2163).

DD Form 1348

- LPWHR01 - DD Form 1348
 - o Users reported a deficiency on the DD Form 1348 which was showing the incorrect DoDAAC to be displayed on the 'Ship From' and 'Ship To' fields. After investigating, it was determined the fields were displaying the Owning DoDAAC fields and was corrected to display the Warehouse DoDAAC (Help Ticket #2179).

General

- General - Warehouse
 - o Users reported multiple screen displays and layouts within the Warehouse application as being unusable. After further research, it was determined that the user's web browser were upgraded to Internet Explorer 11 and caused the application to render incorrectly. The code rendering these problem areas was updated to accommodate the changes made in IE 11 (Help Ticket #2315).
