Release 3.1.02 for the Defense Property Accountability System (DPAS) was released on September 10, 2015. This release corrects program deficiencies identified by the user community and through testing by the development teams. There is no action required by the user to receive the update.

Warehouse Management Module:

This release contains the following Help Tickets:

Receiving Add, Update, Delete (AUD(

- LPWHN19 – Receiving AUD
  - o Corrected a deficiency that caused the user to receive a UII Validation message when the field was populated. This was caused by the UII not being set on the server when creating the Inventory Control Number (ICN) for a kit or flex field. The user is now able to complete the UII Verification with the UII Status field completed and receive no validation message. (Help Ticket #3443)

Set, Kit, Outfit (SKO) Catalog

- LPCTN06 – SKO Catalog
  - o Corrected a deficiency which caused the user to receive a Javascript error while attempting to select the Add button after a blank row was deleted from the SKO catalog grid. (Help Ticket #3310)

Reconile Physical Inventory

- LPWHN54 – Reconcile Physical Inventory
  - o Corrected a deficiency which caused the Changed Inventory Quantity field to change to a value of 1 when 0 was entered by the user. (Help Ticket #3353)

Individual Return

- LPWHN46.1 – Individual Return
  - o Corrected a deficiency which caused a Member's Prior Issue Quantity values to be increased and appear that the user was issued additional equipment. This was caused by the LIN/TAMCN and Stock Number being grouped for every record causing the LIN/TAMCN to be in-correct. (Help Ticket #3260).

Stock Number Inventory Inquiry

- LPWHNQ46 – Stock Number Inventory Inquiry
  - Corrected a deficiency which caused the Stock Number Inventory Inquiry to timeout and display an error to the user (Help Desk #3202, #3444).

This release contains the following System Change Requests (SCRs):
